Ten Complete Courses In Apprentice Training School

Suggestions Increase In Third Quarter

Employees of Apparatus Works Submit 7,923 Ideas During Three Months

Third quarter reports on General Electric's Suggestion System for employees, show a 72 per cent increase in the number of new ideas submitted for consideration over the corresponding period of 1939. For the three months ended September 30, 7,923 suggestions were made as contrasted with 4,613 made for the period last year. The total amount of money paid to employees during the period was $17,476 as compared with $13,591 paid for the period in 1939, an increase of 29 per cent.

Bridgeport Works topped the list for the period with 2,820 suggestions submitted, an increase of 1,783 over last year. Second was Philadelphia Works with 364 suggestions more than last year and third was Schenectady with 322 more. Fort Wayne Works suggestions showed an increase of 57 per cent, there having been 448 suggestions submitted during the third quarter of 1939 as compared with 703 during the same period this year.

Badgeless Chairman Presents Problem

General Electric's No. 1 employee, Philip D. Reed, chairman of the board, presented a problem this week to the Schenectady Works management when he appeared at the main gate of the Works without the identification badge worn by all employees of the Company. "Left it home, I guess," said the genial chairman of the board. "What do I do now?"

The rules provide that employees reporting for duty without badges must sign a special register, get their immediate superior's approval and be issued a huge yellow and gold badge marked "Temporary." Works officials were stumped, however, for whom could they assign as the superior officer of the chairman of the board? E. D. Spicer, manager of the Works solved the problem in a hurry when he suggested that Mr. Reed be treated as a visitor for the day and so after complying with the rules regarding visitors, he was given one of the familiar paper visitors badges and allowed to proceed into the Works.

Ten young men have completed the exacting requirements of the G-E Apprentice School of the Fort Wayne Works and are ready to start their careers as machinist-toolmakers or draftsmen. The graduates, the course completed, and the high school graduation year are as follows: Top, left to right—John Rehrer, machinist-toolmaker, South Side, 1936; John Skevington, draftsman, Central Catholic, 1936; Eugene Rosener, draftsman, Central, 1936. Second row—Norman Jueschke, draftsman, North Side, 1936; George Glenn, machinist-toolmaker, South Side, 1936; Melvin

$44,900 Paid In Insurance In September

Grand Total Paid On Claims Since Plan Was Inaugurated Reaches $17,828,798

Death claims totaling $44,900 were paid under terms of the Group Life Insurance plan to beneficiaries of 14 employees who died during September, according to the monthly report compiled in the office of the secretary of the company. Claims were paid in five of the major apparatus works.

There were seven claims in Schenectady Works for a total of $22,000. Lynn River had two claims for a total of $7,000. Erie also had two for $7,000. West Lynn had two for a total of $5,400 and there was one in Pittsfield for $3,500.

Throughout the company the total of death and disability claims paid for the first nine months of 1940 was $871,182. Since January 1, 1920, when the Group Insurance plans were inaugurated a total of $17,828,798 has been paid out in claims.

Paul Merkey Heads Apprentice Alumni

Paul Merkey, Bldg. 4-3, was elected president of the Apprentice Alumni Association at the recently held annual meeting. Other officers chosen included Wilmer LaVine, Bldg. 17-3, vice-president; Ed Bangert, Bldg. 26-2, secretary; Bob Barnes, Bldg. 19-3, treasurer; George Owens, Bldg. 26-2, financial secretary; Harold Koehlinger, Bldg. 6-B; Milton Ray, Bldg. 26-5; Paul Menze, Bldg. 17-4, and Walt Hazelett, Bldg. 4-4, directors.

Net Sales Billed Up Thirty-Two Percent

Increase In Billing For Fourth Quarter Is Anticipated

General Electric Company's profit available for dividends in the first nine months this year, after provision for estimated federal income and excess profits taxes applicable to this period, amounted to $37,094,776, an increase of 48 per cent over the $25,022,631 of profit for the corresponding period last year. It is announced by President Charles E. Wilson. These amounts were equivalent to $1.29 and 87 cents, respectively, a share of common stock.

Net sales billed by the Company during the nine months ended September 30 amounted to $287,249,930, compared with $217,900,154 billed in the same period a year ago, an increase of 32 per cent.

The amount of billing should increase somewhat in the fourth

Volume 24 Friday. October 25, 1940 Number 35

• Industry And Rearmament

At the outset—and not because I believe the American people have any real doubts on the subject but because these basic truths cannot be expressed too frequently—I want to say, with all the vigor and sincerity I possess:

First, that American industry neither profits by nor under any circumstances desires war.

Second, that American industry recognizes the need for defense rearmament, is actively and wholeheartedly co-operating with the Army, the Navy and the Advisory Defense Council, and will in my judgment do a job, unparalleled in history, of turning out the enormous quantity of armaments and supplies needed to make this nation a factor in the restoration of world peace.

Third, that American industry has no thought or intention of profiteering in the rearmament program; that it has from the first favored adequate measures to prevent profiteering. Indeed I am confident that I speak the mind of industry when I say that it would be well satisfied to discharge this tremendous task with no other assurances than that it shall not ultimately sustain a net loss on the material produced or the investment in special plants and equipment required to do the job.

If this be not a reasonable attitude on the part of those charged with the duty of administering private business enterprise, whose capital is provided by the savings of tens of millions of Americans from every walk of life, then I frankly admit to having failed to understand the obligations and responsibilities of corporate management.—*From an address by Philip D. Reed, Chairman of the Board, General Electric Company.*

• The Joke That Turned

One of the reasons why you can buy an electric light bulb today for 15 cents that in 1931 would have cost 40 cents, and would have delivered only half the present quantity of light, is the joke old-timers in General Electric's lamp division used to play on new engineers. They were assigned the "impossible" task of frosting bulbs on the inside. Such a bulb would diffuse more light with less absorption, but everyone knew it couldn't be done, and each perspiring neophyte forgave the snickers greeting his failure.

One day, however, Marvin Pipkin was initiated. And he not only found a way to frost bulbs on the inside, but developed an etching acid which gave minute rounded pits instead of sharp depressions, thus materially strengthening each bulb. No one told him it couldn't be done, and he took it so seriously that he did it. —*Christian Science Monitor*

• Get Into The Play!

Any football coach will tell you that regardless of how good a backfield a team may have the chances of victory are mighty slim unless the guards, the tackles, and the ends do their job well.

The quarterback of our "team" is the foreman. When he calls the signals it's up to everybody to get into the play to win new customers, more orders, and more friends!

"In reality, the traders, with their wealth and energy and activity, were the first influential civilizers. It was the towns and cities, as the name 'city' implies, that gave rise to what we call civilization; and it was the traders, the merchants, and the carriers that made these aggregations possible. . . . So from the earliest days we find banking, shipping, and mining, and all the complementary fields of industry and commerce, closely associated with the bolder spirits who were so engaged."—Carl Snyder, author.

METER
1 QUARTER HORSE, COMING UP
— MR. ROSE WAS FIRST EMPLOYED IN 1913 AS AN INSPECTOR IN THE METER DEPARTMENT ——
HE WAS PRESENTED AN AWARD FOR DISTINGUISHED SERVICE BY THE CHARLES A. COFFIN FOUNDATION IN 1932!
—SERVED MANY YEARS AS ASSISTANT AND HEAD SUPERVISOR OF PRODUCTION IN THE FRACTIONAL HORSEPOWER DIVISION ——

Sales Billed

(Continued from Page 1)

quarter this year, Mr. Wilson stated, due to the record volume of orders being received, but such a sizeable proportion of this new business is represented by large apparatus requiring many months to manufacture that the full effect on billing will not be reflected until well into 1941. It is not presently anticipated that profits will increase proportionately, however, because of greatly increased provision for total taxes, lower margins on products for National Defense, and the necessity for a speeding up of production which will undoubtedly involve some sacrifice in efficiency.

A dividend of 35 cents a share on common stock is payable on October 25 to 211,611 stockholders, making a total of $1.05 in dividends for the first nine months this year compared with 75 cents a share paid for the same period last year.

A comparative statement of operations for the first nine months of this year and last year, partly estimated and subject to audit at the year-end, is shown below:

	Nine months ended Sept. 30	
	1940	1939
Orders received	$397,810,151	$248,581,851
Net sales billed	$287,249,930	$217,900,154
Cost, expenses and all other charges	257,260,506	198,857,457
Net income from sales	29,989,424	19,042,697
Income from other sources —net	7,105,352	5,979,934
Profit available for dividends on common stock	$ 37,094,776	$ 25,022,631
Per share	$1.29	$0.87

Apprentice Graduates

Kiessling, machinist-toolmaker, South Side 1936. Third row—Thomas Doell, draftsman, South Side, 1934, and John Reuille, draftsman, Central Catholic, 1936. Bottom row—Aaron Schoenefeld, machinist toolmaker, South Side, 1936; Milton Almandinger, machinist-toolmaker, South Side, 1936.

General Electric's apprentice training program has turned out more than 5,000 craftsmen since its origin in 1901, and at the present time there are approximately 830 apprentices enrolled in the courses now in progress in the company's nine major plants.

Extensive Training

An interesting explanation of the company's system of apprentice training was made in a talk recently by R. E. Ellis, supervisor of apprentices at Schenectady. Mr. Ellis said in part:

"Any training program must be built around the objectives of the course. Originally, our program was started to produce skilled mechanics. As newer, high speed machines and more exacting processes were introduced, more extensive training became necessary. So today's apprentice training student not only 'studies' in the shop, but in the classroom as well to acquire the necessary technical training demanded in his chosen line of work.

"Each year a number of our graduates go on to college and take up engineering work. We encourage this, particularly with our graduates who have done outstanding work in both school and shop, and have shown that they have

(Continued on Page 3)

Credit Union Facts

by T. L. WALLACE

Many persons think of Credit Unions as bodies formed amongst industrial workers within the cities. This is not true.

Over one-half of Indiana's 92 counties have Credit Unions serving rural families under the sponsorship of the County Farm Bureaus and their affiliated cooperatives.

Extending further one could travel across the continent by bus, train or airplane and then continue on half way around the world by airliner, or steamship and never go beyond the service of transportation employees who belong to some Credit Union.

The Federal government in July issued its 4,000th Federal Credit Union charter, this was awarded to the H. J. Heinz Pittsburgh Employers' Federal Credit Union.

Total loans made by the Credit Unions of the United States to their members have been enough to pay all the expenses of the Federal government for the first 24 years of its existence.

The newly-formed Membership Relations Committee is starting to function. Many Credit Union members should take the opportunity to acquaint themselves with their nearest representative, then when the time comes approach them with those questions you have been wanting to ask for some time.

Russel Case of Bldg. 19-1, immediately after being appointed, signed up seven of his associates within one day's time. Nice going!

Named Supervisor

P. A. BERGHORN

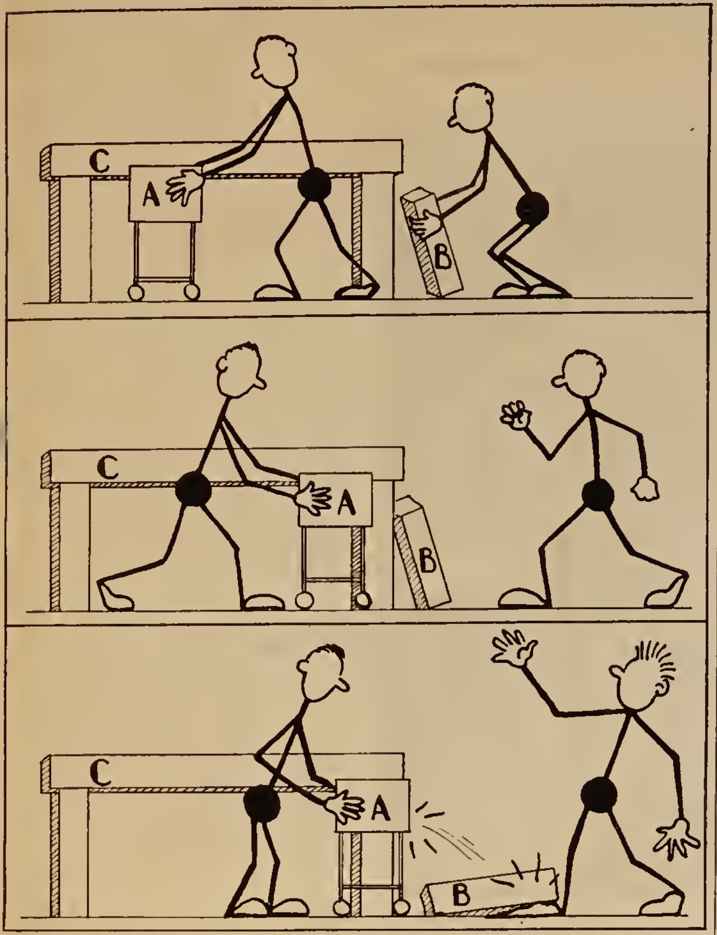
Announcement is made by P. O. Noble, engineer of the Fractional Horsepower Motor Department, of the appointment of Paul A. Berghorn as supervisor of requisition engineering and drafting with responsibilities in connection with shipping promises, load scheduling, finished stock and production data.

Mr. Berghorn entered the Apprentice Training School following his graduation from Central High in 1925. Completing a drafting course in the Apprentice School he was assigned to the central drafting department in 1928 and later to the tool and transformer drafting departments. In 1937 he was transferred to the Fractional H.P. Motor Engineering Department where he followed requisition engineering duties, continuing up to the present time.

Mr. and Mrs. Berghorn and their three children live at 4005 Buell Drive.

If you have a definite budget figure you feel you can spend for an electric range, take a look at the new General Electric model "Statesmen." Advanced 1941 features, yet very moderate in price.

Simple Type Accident Breaks Million Man Hour Safety Record



By H. L. Smith, Safety Engineer

On June 28, 1937, a toolmaker in Bldg. 26-5, suffered a mishap that was recorded as a losing time accident for the Tool Division. That was a little more than three years ago but the date holds special significance for members of the Tool Division, for from that date until September of this year the Division maintained a perfect safety record without a single losing-time accident. More than one million man-hours were worked in the Division during the accident-free period. With equipment such as lathes, milling machines, drill presses, power presses, grinders, shapers, etc., safety hazards were similar to those in many other manufacturing departments.

With the excellent safety record maintained over such a long period it is interesting to note the seemingly trivial circumstances which led up to the September accident and broke the record.

The accident is illustrated above. Act 1 shows the accident in the making. "A" is a portable grinder and "B" is a large steel plate. "C" represents a regular toolmaker's work bench. One day the plate and grinder were left in the positions shown at the top.

Act 2 shows the circumstances leading up to the mishap. An employee started to move the grinder to a different location, not knowing or forgetting the position of the plate. In the meanwhile a fellow employee was walking toward the plate.

Act 3, below, shows the final chapter. The circumstances, even to the timing to a small fraction of a second were just right—or should we say just wrong—so that when the grinder knocked over the plate the approaching employee's foot was directly in its path. Who was to blame for the accident?

Elex Second Shift Members Plan Outing

An outing at Foster Park, including a hike and treasure hunt is being planned by Elex Club members working on the second shift. The affair will be held on Tuesday, October 29, with all those participating, meeting at the end of the Broadway carline at 11:30 A.M. Breakfast will be served at the Bonnie Oaks at 12:30. Reservations must be made by 9:00 A.M. next Monday morning.

The committee in charge includes Ruth Laney, chairman, Marie Louden, Irene Forest, Sue Cameron, Alvena Greber, Lois Burry, Helen Wagner and Mazie Greek.

Apprentice Graduates

(Continued from Page 2)

leadership ability, by granting them educational loans and helping them to get scholarships. Last year five of our boys secured scholarships to four different colleges and they are all standing in the top five per cent of their respective classes.

Results Obtained

"The results obtained from our apprentice system are difficult to evaluate in dollars and cents. The best answer to this question is found in the positions occupied by our graduates. Many of the best skilled mechanics, designers and draftsmen in our shops are men whom we have trained. Our graduates are also holding positions as plant managers, general superintendents, superintendents, assistant superintendents, general foremen, foremen, chief designers, planners and teachers.

"Today's urgent demand for highly trained men emphasizes the importance of the apprentice training system, both as a continuing responsibility of industry and as a factor in the government's defense program," said Mr. Ellis.

G-E Club Program Draws Big Crowd

Boxing and Wrestling Carnival Proves a Popular Attraction

A large number of G-E employees and their families enjoyed a free-of-charge card consisting of five amateur boxing bouts and a professional wrestling match provided the fans two full hours of thrilling entertainment last Tuesday evening.

All of the boxing bouts arranged by Chairman Frank Newport were very evenly matched constantly providing the crowd with a display of clever boxing and the whirl-wind climax between "rasslers" Bad Boy Brown and Georgie Dusette sent all of the fans homeward in a dazed but happy mood.

The evening's card was suitably opened by a couple of tough middleweights, LaMoille Lawrence and Doc Griffin, as these two boys slugged it out toe to toe with Lawrence getting the decision chiefly on the second round.

Tommy Taylor and Casey Love, two boys who are not newcomers to any boxing fan put on the next tilt with Love winning also by a decision.

The third bout between Bud Thomas and Lial Gresham went to Gresham although Thomas finished fast but Gresham had piled up too big a margin in the opening two cantos.

The always dependable winner, Bud Hershey added another win to his string by decisively trouncing Woodrow Pierce.

The hottest battle of the evening was put on by Frank Bodey and Dick Weaver, middleweights, as both boys started to slug it out in the first round and kept this up constantly throughout the bout with Weaver just squeaking out a close nod.

Bad Boy Brown and George Dusette put the nightcap on the proceedings in a red hot battle which ended in a draw. Dusette copped the first fall after fifteen minutes of hot and heavy action. Bad Boy evened it up eight minutes later using a hammerlock as the convincer. They finished out the aloted hour without either getting another fall.

Red Cross Classes For Elex Members

Red Cross "Home Hygiene" classes for Elex Club members are being held at the Y.W.C.A. on Thursday evenings. The classes started last Thursday and members may register for attendance with Irene Meyers, 555, or Eva Lynn, 522. There is no charge, the only cost being the purchase of a text book.

Cook a whole meal with the new G-E automatic roaster. Bakes cakes, pies and cookies, roasts meat ro fish, boils or steams vegetables. Further information at the Employees Store.

G-E CLUB DANCE

Don't forget the pre-Halloween dance at the G-E Club, Saturday, October 26th. Tickets fifteen cents in advance or twenty-five cents at the door, plus tax.

HEALTH HINTS

By Dr. H. W. Garton

In these days of talk of "total defense", "a total national effort" and similar terms, the physical and mental state of mobilized manpower will be a foundation stone—and an important one—in the entire structure. Our Surgeon General of the U. S. Public Health Service has stated it this way: "Important in the easy days of peace without a cloud on the horizon, it is urgent now that this nation be physically tough, mentally sound, and morally strong.—The physical fitness, the freedom from preventable disease, the moral or mental stamina of our men, women and children will determine almost entirely the effectiveness of all other defense efforts."

Industrial manpower will be all important in this program. The protection and promotion of the health of workers who operate the world's most efficient machines is deserving of attention that will help him raise his general health level and thereby his efficiency.

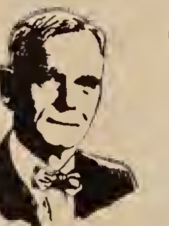
That our manpower is not free from physical defects was forcibly brought to our attention during the draft of the first World War, when 32% of those called were rejected because of such defects. To be sure, the physical requirements for military duty are more rigid than for industrial employment; nevertheless physical defects carry some degree of handicap even in the latter. The military draft will select the cream of manpower and subject them to a "hardening" process that will soon enable each one to march 15 to 20 miles a day carrying 50 pounds of equipment on his back. Those left in industry can well subject themselves to a similar hardening process, less rigid, of course, but designed to raise the level of health, endurance and stamina.

What each individual needs to do to raise his health level will vary with personal needs. First, there are many with physical defects which need correction. This means medical or dental expense in most instances. Many industrial employees have been unable to have these corrections made because of unemployment; but with the return of jobs, many of these defects can eventually be corrected and it will represent a good health investment to have such corrections made.

Malnutrition is widespread even in populations where food seems abundant. In some instances lack of finances for buying enough of the proper kinds of foods may be the reason, but in many others it is a matter of poor selection of foods. It is stated by some authorities that the diet of 40% of the people is insufficient either in quantity or quality to maintain good health and vigor. The diets of many are lacking in sufficient amounts of milk and milk products, citrus fruits (oranges, lemons, grapefruit, etc.), green vegetables and meat. Too often the diet is top heavy in bread, potatoes and other starchy foods, and sweets. Keeping body weight reasonably near what it should be for your height and age is one good way to raise the health level, to avoid certain diseases and to increase the life span.

A health program designed to raise the health level includes many things which depend upon the individual and cost nothing in dollars and cents. Observance of the simple daily rules of hygiene are all-important and include such matters as exercise, recreation, rest, sleep, intake of water, and proper elimination.

Americans have been accused of becoming physically "soft" because of over-eating and under-exercise, modern conveniences and easy living. In general it is probably true; but the process can be reversed—and should be, if man power on *all* fronts is to be effectively prepared.



SCIENCE FORUM

BY

L. A. HAWKINS

EXECUTIVE ENGINEER
GENERAL ELECTRIC RESEARCH LABORATORY

Q. What is the composition of the artificial rubber from which tires are being made?

A. This particular product is an artificial rubber made from petroleum products. By a cracking process, the petroleum is broken down to a mixture of simple molecules, and from this mixture a gas is separated. Under pressure, this gas liquifies to form a compound known as Butadiene. When this is mixed with other ingredients, prepared from natural gas, air and soap, a milky emulsion is formed; this is heated and agitated, and the result is a latex similar to natural rubber latex, which can be treated and vulcanized in the same way.

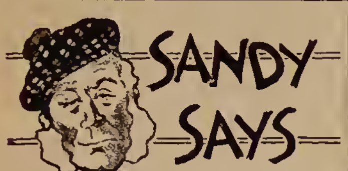
Q. Can science prevent tuberculosis entirely?

A. Yes, it is believed that in time tuberculosis will be completely wiped out. Dr. Henry Chadwick, president of the National Tuberculosis Association, has predicted that by the year 2000, at least, there will be no more cases of tuberculosis in this country. The death rate from this disease has been dropping approximately one-third every 10 years. New discoveries in chemical remedies and in nutrition may kill off the great White Plague even more quickly.

Q. Can lightning strike an airplane?

A. Yes, it is entirely possible for lightning to flash between clouds, and strike an airplane in its path, but modern all-metal transport planes have successfully withstood at least 50 cases of lightning discharges since their introduction about five years ago. In no case has there been serious damage to the plane, and the risk to flight from this cause is no serious menace.

»» NEWS THROUGH THE PLANTS ««



SANDY SAYS

It's a queer world, isn't it? I can hear ye say, "so what?" Well, I'll tell ye what. I'll oxplain myself in four parts.

Part One: Ye remember the statement in last week's WORKS NEWS by the dear Feminine Viewpointers. They're keeping me in suspense all week as to what they'll say, and as to why a woman ever waits a whole week to say anything.

Part Two: It's queer how ye start with one thing and end up with another. For instance, Mrs. Sandy starts with breakfast food and ends up with cookies or candy. Sandy, Jr. is always finding new uses for his toys. One day he turned his table upside down and pushed it around for a truck. So I bought him a truck. So he turned it on its side and used it for a table.

Part Three: Men also find strange uses for things. It's never safe to pass up anything because it appears useless at first glance.

In our General Electric Research Laboratory there are a considerable number of scientists and helpers who spend all their time prying into new, strange, and seemingly useless phenomena. They work with gasses, solids, atoms, hermones, X-rays, soap films, cellulose, decibils, vitamins, and everything else you can think of.

In this cock-eyed world anything may, and does, happen.

Nearly everything we build here in the Fort Wayne Works owes something directly or indirectly to the Research Lab. The quiet fan was born there. Our insulations and finishes, which make our products so much better and cheaper, came from there. Even the finish on your automobile is based on discoveries they have made.

Part Four: Cousin Colin's pretty daughter, Bonny, also finds unusual applications for old devices. "Uncle Sandy," she said today, "When that tall Duncan McPherson tells me goodnight, he kisses me on the forehead. Well, I've been measuring, and tonight I'm going to plant the dictionary and "How to Win Friends and Influence People" to stand on.

4-4 Eavesdropper

Before: Jim Gargett, Bldg. 4-4—"Boys, when I get married I'm going to be boss."

After: Same Gargett at telephone—"Listen honey, I'm going down town for dinner." (Long silence) "All right, dear, I'll be home."

Our good friend Ed Kimmel, Bldg. 4-3, is spending a lot of money on postage getting all the good farms set up for the boys of Bldg. 4-3 for their annual pheasant hunt.

The haughty senior girl sniffed distainfully as the tiny freshman cut in. "And just why did you have to cut in when I was dancing?" she inquired nastily.

The freshman hung his head in shame. "I'm sorry ma'am," he said, "but I'm working my way through college, and your partner was waving a five dollar bill at me."

Gecode Club Concludes Successful Conference

Delegates to the Decatur Works Gecode Club conference are shown leaving their headquarters at the Anthony Hotel. The conference was held last Saturday and was for the purpose of completing the club's 1940-41 social calendar.

19-5 Office Chatter

Was wondering what was wrong with Walter Mersman's picture in last weeks WORKS NEWS, then the thought dawned—no hat on Walter, that's the first time he was ever seen without it. . . . The style of the week was started by Alma "Butch" Witte when she wore her fur coat to work the other morning. . . . Seems like the subject of conversation is "Where did you get that cold" or "How's yours." . . . One of the single gals in the office is reading "I married Adventure," it must be good as she even forgets to eat at noon. . . . Have just found a name to fit May Rose Slagle. She now answers to Gill—our half pint. . . . Just heard that George Zollars celebrated his wedding anniversary Saturday. . . . Kind of made a mistake in calling Carl Alter by the name of Al. but this may alter the situation.

Wanda Maszkiewicz, Bldg. 26-3, is going to get one of those calenders that have the holidays marked in red. She waited two hours for the bank to open before she realized it was Columbus Day.

Tom Freeman, Bldg. 26-2, must be one of those nonchalant purchasers who buy cars like one buys a pound of coffee. At any rate Tom bought a new car, and after he parked it he had a little difficulty in recognizing it when he got ready to leave.

Good luck and best wishes to Catherine Adams, a Bldg. 26-3 bride.

Diminutive George Angel's (Bldg. 17-1) eyes swept the horizon as a single ragged line of waterfowl crossed the Yellow Banks to settle on the channel a short distance away. All around him men were poised for the kill. So he beat a hasty retreat, circled widely, made an end run, and bagged two nice fat Mallards. Not bad for opening day, George.

All this draft talk reminds one of the days back in 1914-18 when Art Walda of Bldg. 6-3 was a dare devil motorcycle rider. Art, his iron steed and big waist belt used to "zoom up and down the streets" scaring horses, making women raise a handkerchief to their nose and children run for home. In those days he was nicknamed the "Maumee Avenue Menace."

Mary Hile, Bldg. 4-4, believes in letting everyone celebrate her birthday. Even to the extent of letting a local chop house furnish free eats. It may have been the new glasses, but anyway Mary had a birthday and got by the cashier—so there.

He Aint Afeerd

Most of us go the other way when a snake comes our way, but Williard Smith, Bldg. 19-5, produces the evidence that snakes are just something else again in his life. It is admitted that Mrs. Smith has other ideas, judging from the safe distance she is maintaining—probably wondering what kind of a pastime Williard will take up next. Anyone interested in the snake charming business should get in touch with Williard, he claims all it takes is a bottle of snake bite medicine and a pair of high top shoes, and a hickory stick.

19-4 Spot Jottings

Our good friend Mr. Mosshammer has been up to his old tricks. Yes, we mean fishing. Harold says he spent a most exciting day on Blue Lake. He saw a boat capsize, an oar fight between two loads of fishermen, and then got himself lost in the fog. No fish of course. ***Anyone interested in buying a perambulator see Martha Woodward. Although its fifteen years old the carriage is as good as new and is a good buy.***MacMcoy is completing repairs in his basement, and we hear it's really a honey.*** One birthday we missed was that of Maggie Moore, but we don't think it is too late to wish her many "Moore" of them.***The Series and Specialty Motor Department extends congratulations and best wishes to Betty Gunkle who was married Saturday. And here is the pay-off. The pastor urged Betty not to be late because he wanted to attend a football game. ***Clyde Helms claims that cold he has is the result of being caught in the draft on October 16. We wish the boys would stop reading College Humor.

Earl Sauers, Bldg. 4-3, our champion nimrod who often boasts of his successes afield will surely have to retract some of his statements regarding game bagged. A week or so ago Earl and a friend went after some quail. Spying two birds perched upon a limb, he said to his friend, "Behold, two quail." Then he let go with his trusty blunderbuss only to discover that he had killed two birds of another specie. We wish to issue this warning to the farmers. Keep a close watch on your canaries and parrots, for Earl will shoot anything that flys. Meat on the table is his motto, regardless.

Karl Geller, Bldg. 17-2, doesn't mind turtle soup, but when it comes to live turtle highballs, he simply can't take it.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

"The Gobble-uns'll git you ef you don't watch out!" It's Halloween next week and anything can happen then. Ghosts and witches are abroad, to say nothing of the neighbors' kids, all on mischief bent of one sort or another.

Halloween is a grand time for parties, too. Decorations can be as elaborate or as simple as you please, cornstalks, jack-o-lanterns, bittersweet, with skeletons, black cats and broomsticks to fill up the odd corners. Costume parties are always fun and the ice is broken right from the very start.

After everybody has admired all the other guests' costumes it is time for the old familiar Halloween games and stunts that are always fun, so turn back the clock and go bobbing for apples, try to eat an apple or doughnut suspended on a string, try various kinds of fortune telling.

A jack-o-lantern makes a good centerpiece for your table, and black candles would add an eerie touch; use black and orange napkins which may be of either linen or paper, and if you wish to serve refreshments on card tables center each one with a tiny jack-o-lantern or a black or orange candle.

For a midnight supper menu we suggest hamburgers on buns, orange ice with cookies, cider and coffee. If you intend to serve a real supper cold sliced meats and an assortment of cheese would be good with baked beans in individual crocks and pumpkin pie or doughnuts for dessert accompanied by coffee or cider.

If you're giving a party for children hamburgers on buns with baked potatoes, orange ice and chocolate ice cream with chocolate sauce and substitute milk or cocoa for the coffee and cider for the grown-ups menu.

We're Sorry Cal

Be it known that Cal Marhenke, Bldg. 19-1, was a member of the G-E Club tennis team during the past season, and did then and there take part in the team's activities. All of which means that we are apologizing for omitting his name from the story carried in the WORKS NEWS some issues ago.

Over the last week-end Art Brandenberger, Bldg. 4-3, entertained a group of the boys from the flange section and their wives at his cottage, "Bachelor's Roost" on Big Long Lake. They report Art to be an excellent host and cook. They tell us that he can cook a dog fish so that it tastes exactly like a fresh caught lake trout.

Now that George Cooper, Bldg. 4-3, is a very proud papa, the possessor of a brand new baby girl, he tells us with pride that he is becoming very efficient with handling the three-cornered trousers. Nice going, George.

Frank Williams, Bldg. 17-1, bagged two nice fox squirrel at Knapp Lake last Saturday. When a cock pheasant got up ahead, Frank reports that he froze to the realization that it won't be long now.

NEWS THROUGH THE PLANTS

Slips And Chips

By Sir Vis.
Bldg. 4-4

Well, well, well. The boys seem to be studying the comic strips, particularly Dagwood. Thomas was seen dashing out of the house, breakfast in one hand and shoes in the other. Blair was seen arriving at work five minutes earlier. Bet he is getting wan and peeked. . . . Did some one loose a nickle? Norbert Gase was seen purchasing a bit of candy. . . . At last the special Thomas trailer is complete, and it surely is special. One of Don's neighbors remarked that Don "had his cart done." A restless night was enjoyed by Don following the maiden trip. He dreamed the writer was buzzing wood, cleaning fish, and then swinging ringnecked pheasants. . . . Some time back our beloved "Flash" Meyers was telling Edison Martin that his feet were bothering him, and he thought it was from being up on his toes so much. How are they now Charlie. . . . Congratulations to Dave and Mrs. Powers on the safe arrival of their twenty-seventh wedding anniversary. . . . Congratulations to Paul and Mrs. Hitzeman on the arrival of a baby girl, who came to their house to stay. . . . Welcome back to the fold Max. . . . Mr. G. reports that the professor, Arthur Stahl, is with us again for a while. For all who don't remember him. He is the one who jumps when he plugs in the bench light. . . . May the chips slip, but not on someone's shoulder.

A group of girls of Bldg. 4-3 were beyond control when turned loose at a weiner bake held at the farm home of Leona Scheumann last Sunday evening. Augusta Fuller considers herself too good to eat hot dogs, so she brought her own steak. It's a wonder Edna Lindsey doesn't look like a marshmallow due to the fact that she ate so many. Mary Hale was all dressed up in a riding habit, and all she rode was a bicycle. Since the radio that Helen Head brought along didn't amount to much, the girls furnished their own music. The honored guest of the evening was Sue Maddox and she seemed to have more pep than the whole group put together. Others present besides those mentioned above were: Nola Decker, Bldg. 26-5, Vena Baker, Ruth Smith, Ruth Lauer, Eileen Stemmler, Rachel Beach, Hilda Hiatt, Otillie Berning, Hilda and Irma Scheumann.

Everyone in Bldg. 6-3 wonders what Grueb, Wilson, Sliger, and Edwards will chew the rag about after election. The boys have argued so long and constantly that they have run out of campaign promises and inducements. How about a nice juicy battle over conscription, boys, that could go on for five years or try a verbal round for round on the weather.

Ceal Romary, of Bldg. 26-2, has many talents, besides being a first rate piano mover, she is also a good mixer-upper, she talked to a girl named Eileen over the telephone for half an hour before she discovered it wasn't Eileen Morris of Bldg. 17-2.

Do you remember when Lewis Fox, Bldg. 19-3, drove a Brush; Charles Strodle a Velie; Ted Schlup a Model T Ford which ran on from one to four cylinders; Henry Lapp with the Monroe with the slippery clutch that wouldn't work unless you put some sand on it. Those were the real motoring days—or were they?

Flag Raising Ceremony At Winter Street

Tribute is paid to the Flag with appropriate raising and lowering ceremonies each day at the Winter Street Plant. Above, a group of Winter Street employees are shown standing at attention while the Flag is being raised.

Winter Street News

"Old Glory" was raised at a ceremony witnessed by Winter Street supervisors, firemen, watchmen and ex-service men, Tuesday morning, October 22.

"It just won't work," famous last words of Harold Steinbacker after laboriously experimenting, substituting water for gasoline in his auto.

Impatiently waiting—ask Ruth Lesh about the bus service to Markle. She only had to wait six hours.

Fred Ellinger was standing in water up to his knees, duck hunting last Saturday. We wonder if he was trying to fool the ducks or hide in the weeds.

Walter Walker came in with his arm in rainbow colors. What's your explanation, Walt?

We all heard of the absent-minded professor and here at Winter Street we have an absent-minded processor, Frank Mason, who buys light bulbs and secures a pass-out for them. When he had the light bulbs he couldn't find the pass-out, and vice versa. Finally after a lapse of three weeks he managed to get the two out together.

Harry Driver, Bldg. 19-3, came in one morning this week smiling and happy, with all the buttons popping off of his vest. The answer—a baby girl, an eight-pounder.

We have no proof but Milt Dennison, Bldg. 19-3, claims to be the champion oyster eater. Milt says he ate nine dozen at a sitting while in Florida. At that he's got a lot of space to fill.

Edna Martin, Bldg. 12-B, really rates. After several hours of persuasion "Mooney" Gardt not only agreed, but actually did haul her card table in that nice new Plymouth. How did you do it, Edna?

Ruth Fuller, Bldg. 4-3, has a novel way of locking the door. All she does is cut a hole in the screen and insert her calling card in it.

Do you remember when Clarence Didier, Bldg. 4-3, used to be Chief Bell Hop at the Anthony Hotel, and Ivo Bubb, Bldg. 4-3, wearing badge No. 53.

"Tony" Federspiel, Bldg. 17-1, reports an unusual experience on Jones Lake last Saturday. Nine runs, said Tony, eight of them dog fish and one cat fish. Tony, that is unique.

Irene Receives Best Wishes

When Irene May, Bldg. 4-3, returned to work following her marriage she was greeted not only by the best wishes of her associates, and gifts but by a gaily decorated desk as well. Irene, who was married on October 12 at the St. John's Catholic Church of New Haven is shown seated at the desk.

Thisa And Thata

Last week Dortha Kanser surprised us and now it is her turn to be surprised. The winders had a shower at the home of Jenny Frazier and those present were: Lucille Mingard, Bernice Scheuman, Marg Bennett, Mildred Wherling, Thelma Pond, Evelyn Archbold, Dorothy Dunifon, Ruby Wall, Gretchen Webb, Hilda Bearman, Marg Feaster, and Dorothy Craig. . . . It seems Mildred Wherling had bad luck driving home from Columbia City. She ran out of gas, nearly ditched her car and almost hit quick sand. . . . It is reported Dorothy Dunifon's curiosity almost got the best of her at an Undertakers home. . . . That's all about the Bldg. 19-5 winders this week.

Some two weeks ago Boyd "Dagwood" Fisher, Bldg. 19-3, rushed into the office at 8:05 a.m.—the tardiness being due to Boyd having missed one of the new quiet trackless trolley buses. It appears that "Dagwood" depended on the noise of the car to warn him to start his one block dash to the car line. He now reports that progress is being made in arrangements for the installation of a warning light to let him know when the car is near. "Dagwood's" experience was duly reported to Dwight Meyers, our WORKS NEWS representative, but never appeared in print. Just how much "hush" money changed hands?

Frank "Pete" Peternell, Bldg. 4-6, decided the best way to let everyone know that he has a new topcoat is to wear it down Calhoun Street on Saturday with the tags showing.

In last week's issue of the WORKS NEWS, Mrs. "Bill" Fisher, Bldg. 17-1, wishes to correct the statement that "they rowed back" which is not true. "I rowed back," she commented.

Don Schultz, Bldg. 19-3, dropped a piece of iron on his foot and a few days later Mike Dole dropped a welding fixture on his foot. What's going on here?

The Irishman was relating his adventures in the jungle.

"Ammunition, food and whiskey had run out," he said, "and we were parched with thirst."

"But wasn't there any water?"

"Sure, but it was no time to be thinking of cleanliness."

Punch Press 19-5

By Slug

The new home of Mr. and Mrs. Walter Griffith was officially opened on Friday evening, October 20, by the punch press gang and several honored guests. The dedication ceremony was performed in a very efficient manner. The higblights are too numerous to mention but just for an example; the lunch, for which the ladies deserve a blue ribbon; the quartette which really quartetted; the orchestra, and last, but not least, the photographer whose recorded evidence may cause visions of blackmail, but at the same time will afford pleasure in the years to come. . . . One Saturday morning, so we hear, Otto Kirby partook of a hearty breakfast and started out to do a little expert fishing. He dropped anchor at his favorite spot and after hauling 'em in until his arm got weary he decided "anchors aweigh." The anchor had, by this time, become firmly embedded in forty fathom of mud, and so Otto, forgetting all about the hearty breakfast gave a mighty yank—which means something has gotta go. In this case it was the rope and Otto took off. After a mighty upheaval he shook the water out of his hair, recaptured the boat and took a mighty oath to treat anchor ropes with respect thenceforth. . . . The "Forgetters" corners are all but filled this week. Harold Harter, we shall excuse (once) but L. Jacobs, and Harry Magner have no excuse, being as they are, long service men in this department of super caliber minds. The department is fast losing its reputation and if you guys forget your buttons once more Judge Stocks will put you in the Stocks. . . . Will the fan who wrote claiming that my stuff is nothing but hysterical imaginings please give me more information as to his identity so that I can properly assemble a list of adjectives to fit the case.

Marie Martz, Bldg. 19-5, sure comes to work in style these days. Marie says she has a colored chauffeur, and he even wears a white uniform. Marie, he couldn't have been a repair man, wearing his heavy underwear?

Hold on to your seats folks, here is real news. Sam Allmandinger, Bldg. 4-3, our super bachelor has finally declared himself. He said, "I believe that I will get married."

The men's sewing circle of Bldg. 4-3 held its first meeting Thursday afternoon, Johnnie Deahl, president of the club, gave a very fine demonstration on how to mend trousers. A very good time was enjoyed by everyone present. Anyone wishing to join, please see Johnnie.

Ivan Butler, Bldg. 4-4, has been nominated for recognition as a persevering news scout. If you don't get your name in the WORKS NEWS you can't blame it on Ivan.

Since cold weather has set in, Ina Archbold, Bldg. 19-5, has started to entertain ber pet chickens in the front parlor, and not only that, but Ina even feeds them with a spoon. Oh, to be one of Ina's pet chickens!

Walt Buesking, Bldg. 4-4, didn't know that one of Billy Wehrs' accomplishments was lip reading. Was Walt's face red when he found out.

Norbert Gase, Bldg. 4-4, wants to put an anchor on Zilla Sheehan. He's afraid that with those big ruffles on her apron straps, she'll take a notion to fly away.

(Continued on Page 6)

REFRIGERATION BOWLING

By Bob Ringle

The power bowlers started to roll on Tuesday evening, October 15. Cunningham got a 222 count for high, to make a three-game total of 565. Glad to know that some of us still know how to bowl. Our league secretary, Royal Roeger, seems to be pushing the ball also for we hear he got a nice count—one of the scores being 203. Pond hit the 200 bracket with one right on the nose. Blomberg still continues to hold to first place by rolling good consistent scores. Wish we could say the same about someone else.

That little word "if" is a big word in any man's language. If John Schwartz would have finished the last five frames in the last game like he did the first, you would have seen a real score. A spare, then four strikes in a row. After that, well, a split, a blow, and a split in succession can do a lot to a good start like that. Better luck next time, John. Four of our fair-haired laddies topped at the sacred portals of the elusive two hundred. Mr. Roeger with 218, Waltz, 203, English 201, and Cunningham 200.

Thanksgiving is on its way, let's hope we have another Thanksgiving jackpot for a nice big turkey. We hope this is a gentle hint to Mr. Roeger.

DECATUR BOWLING

Pacing the G-E bowling league with three game victories, the Packers and Shells moved into a three-way tie with the Office team. The summary of the week's activities is as follows: The Packers defeated the Maintenance team three games posting a 2393 total to their opponents 2292. The Testers scoring the high three-game total of the week with a big 2493 ran rough-shod over the Rotors to win three games. The Shells' total of 2371 proved too much for the Bearings 2190, and they won three games. The Office team maintained their pace with a 2172 total to defeat the Shaft team two games, who posted the low score of the week with 2085 pins. The Assembly team won two games from Production by scores of 2385 to 2265. The Stators bettered their position in the league by winning two games from the Tool Room with a total of 2312 to 2092.

The Stator team paced by their captain scored the high individual game of the week with an 824 count and Captain Lindemann scored the high individual game with 226 and the high three games total of 560.

The standings of the teams following last week's play are:

Team	Won	Lost	Pct.
1 Office	8	4	.665
2 Shells	8	4	.665
3 Packers	8	4	.665
4 Maintenance	7	5	.640
5 Bearings	7	5	.640
6 Flanges	5	4	.550
7 Testers	5	4	.550
8 Rotors	6	6	.500
9 Tool Room	4	5	.445
10 Shafts	5	7	.415
11 Production	4	8	.330
12 Stators	4	8	.330
13 Assembly	4	8	.330
14 Rabbets	3	6	.330

This week's schedule brings the first and second division teams together in matches that might completely change the standings of the league and tighten the first place race.

IN THE ROUGH

By WALTER SUNIER

Last Saturday we checked to see what the temperature was but we could find darn little. In fact, all we found was one big drop. The 45 degrees F with a breeze had most of the boys shivering and hiking to the clubhouse. The hardy ones, those of the old pioneer stock, with the sturdy spirit battled it out and this applied not only to the men but to the women as well because we saw Mr. and Mrs. Cliff Matson, Mr. and Mrs. Pat Hayes and the Kronmillers.

Just to give you a breath of summer and the good old days, we are printing a picture of an intrepid golfer taking a swing (hope the printer doesn't drop the "n") in the good old summer time. Guess who he is. No can guess? It's Bill Fritz, the fastest golfer extant. You will never curse on account of slowness of play if you play behind Bill.

Mert Edgar had a remarkable round a week ago. He had a 7 on the first hole and then had eleven straight 5's. In other words, he played from No. 2 to No. 13 with a 5 on every hole.

Not so long ago, Boger laid out a long drive, the best of the group up to that point. Horning shot and outdrove Boger's best. Some guys are always horning in.

The rain softened up the fairways some and the balls are still rolling medium far but not like they were on August 12th when Hanson and Hanna drove to the foot of the hill on No. 4. Incidentally, Hanson had an eagle on No. 1.

Catching up with another item, Paul Noble, Jr., had an eagle on No. 18 in the annual tournament.

Iowa-Notre Dame Tickets On Sale

Employees wishing tickets to the Notre Dame-Iowa football game on Saturday, November 16, are advised that the Elex Club has a number of tickets for sale at the price of $2.20. Elex members are sponsoring a trip to the game and have reserved a considerable section for their members and friends.

Reservations must be made on or before Tuesday, October 29, and tickets must be paid for at the time of reservations. Tickets are to be secured from Margaret Suelzer, Bldg. 20-2.

NOTICE RIFLEMEN

The Rod and Gun Club has resumed small arms practice on the indoor range at Dehler-Hughes, and the outdoor range has been closed for the season. Practice to be followed later by matches which will be held every Tuesday evening on the Dehler-Hughes range, starting at 7:30 p.m.

NOTICE

Towels for shower bath accommodations will not be furnished by the Club after November 1, 1940. Shower facilities will continue to remain open but employees must provide their own towels and soap.

NEWS THROUGH THE PLANTS

(Continued from Page 5)

The Conveyor Gang Bldg. 4-4

George Miller, second trick, had to borrow a ladder and crawl in a second-story window the other night when he forgot his latch-key. We always thought George was tall enough to get in most second story windows without a ladder.

Wonder if the same mosquito that blacked Jack Bonkley's eyes, stepped on his toes.***Bob Arnett must think he has small hands. He was seen using a couple of strings for a towel.***Anyone wondering why Lulu Kline was limping around Monday, here is the low-down. She had to dance in the hog trough, Friday, at her brother's wedding.***Could it be superstition or why did Edith Fuller wear the sales slip in her new shoes last week?***Anyone wishing to use Band Aids to fix flat tires see Hilda Scott for instructions.***Berneil French never smiles. Ask Charley the wire boy.***Stella Fagan, always the willing helper, holds the door for Charley and then blushes.***Joe (Hiya Beautiful) Cline had the misfortune to break an axle on his car as he left the lot Friday evening. Sorry Joe, but sure glad you were not doing sixty per when it happened.***Chet (Whataman) Doegitz and another Sunday motorist produced a minature snow storm in the neighborhood of Convoy, Ohio. They also found out why a chicken crosses the road. It seems the other driver hit a large white rock chicken and knocked it into Chet's car and Chet finished the denuding process. Result, Chet got the feathers and no one got the chicken.***The conscription law affects only three men on the first shift in the assembly and test section. To wit—Forrest Grimm, Dallas Corson and Stan Marquardt. The first two will be reserved for late calls due to being heads of families. Stan prefers one big war to several little battles.

Maurice Paling, Bldg. 4-4, was exhibiting his Indian balancing act by carrying ten trays on his head. All went well until someone added another. Just a case of "the last straw."

Ed Tipton and Mike Sorgen, Bldg. 19-3, can give full description of what a skunk looks like for the boys got two hides in one noon-hour euchre game. Well, as they are only learning we offer our sympathy, and hope that experience teaches.

Goldie Mentzer of Bldg. 26-2 is going around with her head in a cloud, these days, and the reason is a cute little granddaughter, named Barbara Irene.

Vera Nelson, formerly of Bldg. 17-2, but who has recently married and moved to Toledo, was a visitor in the department the other day.

Otis Bender, Bldg. 19-5, said the wild ducks up around Lake of The Woods sure can take it. Otis says: "I kept pumping the shot into them, and they just kept flying. The only kind I can pick off are those big white ones. I can sneak up on them. They are a little slow to take off." Betcha you could herd those white ones right into the kitchen, Otis.

In her school essay on "Parents" a little girl wrote: "We get our parents when they are so old that it is impossible to change their habits."

Since Frank Archbold, Bldg. 19-3, became a member of the Quarter Century Club, his wife, realizing his welfare demanded some form of recreation, informed him she was buying him a "sea-horse." Frank, not realizing what kind of a horse he was to receive, started shopping for a full set of riding togs, including boots and spurs, and began constructing a stable in the back yard. Now he is wondering if he should move the stable into the fish pond or use it for the dog house—a building most married men are in the greater part of the time.

Frank is also amassing grey hairs trying to decide how to get his recreation without a bathing suit and a diver's helmet. He says the whole thing seems fishy to him.

M.B.A. PATIENTS

"Business Responsibility Three Fold"--Reed

For A Soldering Iron . . . $75!

Albert R. Oechsle of Bldg. 26-3 gets a check for $75.00 for a new and better way to solder wire used in multiple winding machines. Mr. Oechsle suggested that a 225 watt special type soldering iron with an attached roller which burned out frequently be replaced with a 130 watt standard type iron with a blunt end. Left to right in picture are Albert Oechsle, L. N. Sordelet, foreman and F. N. Banks, general foreman.

Accident Severity Hits New Low

First Nine Months Show 35 Per Cent Drop Over Best Previous Year

Accident severity in the major apparatus works of the Company for the first nine months of the current year was 35 per cent lower than for the same period of the best previous year, according to the monthly report compiled by George E. Sanford, chairman of the general safety committee. The figure is also 41 per cent lower than for the same period of last year.

On the score of number of accidents in September as compared with August there were 24 fewer

See **Safety** P-6

Elex Plans Pep Session Prior To Game Party

Monday, November 11, will see the Elex Club in gay form as it holds a pep meeting preparatory to attending the Notre Dame-Iowa game at South Bend on the 16th. It will be open house at the G-E Club House from 4:45 p.m. to 7 p.m., with music by the Journal-Gazette band, speaking by two special football guests and group singing by the entire assembly. Incidentally reservations for the Notre Dame-Iowa game must all be in by November 8.

G-E Generators For National Defense

As part of the program to build up the Tennessee Valley as a national defense industrial section, three large General Electric waterwheel generators, costing more than $1,200,000, have been ordered by the Tennessee Valley Authority for the Cherokee Dam powerhouse. Construction of this dam, which is located on the Holston River, near Jefferson City, Tennessee, will be rushed to provide power for new national defense industries in this section.

NOTICE

Prices for the Saturday night G-E Club dances have been increased a nickel, 20 cents in advance or 30 cents at the door, including tax. Dances will be staged every Saturday night throughout the month of November.

Election Day Dinner

An Election Day dinner at the Berghoff Gardens at 12 noon is being planned by the Elex Club Afternoon Bowling League. Tickets are 50 cents each, and reservations must be received by Monday, November 4.

Election Day Notice

Tuesday, November 5, is Election Day. Polls will be open continuously from 6:00 A.M. to 6:00 P.M. No change in factory working hours will be made on this day.

Supervisory and other employees on the day shift whose duties require them to work after closing time of the first shift, may take time out to vote at some mutually convenient time during the day.

Employees who are working on night shifts will probably wish to vote during the day and will begin work at the regular starting time of their shifts.

Offices will close at 4:00 P.M.

It is believed that the foregoing schedule meets the needs of the employees and will allow ample time for them to vote. However, if more time is needed, employees may arrange with their supervisors to take whatever time is necessary.

M. E. LORD, Works Manager.

Warns That Industry Must Be Freed Of Restraints If It Is To Carry Out Its Full Duties

That the three-fold responsibility of business—to its employees, to stockholders, and to the consuming public—cannot properly be discharged under the duress of hostile and unreasonable government regulation, was the theme developed in Chicago Tuesday night by Philip D. Reed, chairman of the board of the Company. In an address before the 53rd dinner meeting of the Economic Club of Chicago, he warned that with the inevitable tapering-off from the feverish activity of the rearmament program, business would find itself in a sorrier state than during the 1930's unless a change in its relations with the government were achieved.

"This is not a speech about national defense," Reed declared. "My own company will take a major part in building defense products and is in daily contact with the able and efficient officers of the army and navy who are handling this great program. In time of war, and to a lesser degree in time of rapid preparation for war, I recognize the necessity of vesting unusual powers in government in order that the production facilities of the nation may be mobilized, coordinated, and brought to maximum capacity with the greatest possible speed and with the least possible disruption of the normal production of useful goods. The distinction, between the temporary relationship that extreme emergency may impose, and the fundamental relationship that must exist between government and business in peace and in war, if American democracy is to endure, is vital and must be clearly recognized.

Freedom Needed

"For almost eight years, business has been under attack from government. Whatever the reason — and many are given—it continues to be circumscribed, restricted, and restrained. Laws continue to be passed, and what is more important, continue to be administered and interpreted, to deprive business of the freedom of action and incentive essential to its existence. Under these circumstances, the free enterprise system cannot support our economy and there will be needed, just as in the past eight years, huge government subsidies in the form of public works, relief payments, and the like, to keep unemployment from reaching new high levels. So long as the present program continues, government credit will be further impaired, private industry will be further seriously weakened, and unemployment will be no nearer solution."

See **Reed** P-2

Hunter Bags Bull Moose

Friends of Glenn Greek, foreman of the Wire Dept. in Bldg. 8-2 are glad he is a good shot with a Savage .300 rifle. Why? Because he knocked over a 1,300 pound moose last week up in the wilds of Canada, and he not only brought home the moose but he also tossed a moose meat dinner for his gang last night in the Works restaurant. Glenn returned Monday from a two weeks' hunting trip in the deep woods, 150 miles north of Port Arthur in the Province of Ontario with his brother-in-law, Robert Wolford, of Anderson.

Glen shot his moose, a big bull, at 125 yards, and got him through the neck. The moose had a 47-inch antler spread and in every way was a prize specimen of the deep woods. He also shot a deer at 200 yards from a canoe.

The dinner last night was a revelation to most of the boys attending. The moose meat was as tender as chicken and possessed of a flavor defying description. Yes, indeed, all in all, the boys are proud of the hunting prowess of their foreman.

FOR FAMILY HOUR

Arthur Bieberich, Decatur employee and his talented children will journey to Indianapolis Saturday, November 2, to participate in Block's Children Hour from 10:30 to 11.30. Donald and Eileen have entertained different club functions with their accordians and carry the well wishes of all their friends.

• Dare To Wear Your Badge

WHY? Because it is *your* symbol of America. It represents *your* job. It places *you* definitely as a man or a woman worthy of trust. It places *you* definitely as a man or a woman working for a company which has the greatest diversification of national defense work of any in the nation. It places *you* right out in front with all the other men and women in America who are doing their bit, day by day, to make America safe for today and tomorrow.

WHY? Because it is essential that everyone working within the gates of the General Electric Company in Fort Wayne be sure of his or her neighbor on the job. Because *your* badge worn every day in a conspicuous spot on *your* outer garments assures *you* that *your* neighbor has a right to be here just the same as *you* have. In brief, your badge is *your* protection for *your* job, *your* plant and *your* country.

• Safety In Shoes

Safety reports indicate that a foot injury can cost you full pay for weeks. In these modern times practically everyone believes in and does carry life insurance. They may carry accident insurance, too. All of these are very good and should be part of every worker's budget, but he should go even further and relieve himself of the pain, misery and expense caused by accident to the feet.

Workers should not be handicapped in this manner when safety shoes are yours for such a small amount. This is to you an insurance of another sort and you will be removing the cause for an accident. Thin soles are another source of trouble. Keep your shoes in good condition, and by all means wear safety shoes whether your work is hazardous or not.

• A Winner's Mind

Watch the average man in a poker game. If the chips are piled high before him, he's the picture of aggression. Try and bluff him out of a pot! He's got the winner's psychology, the winner's "edge". On the other hand, if his stack is way down he creeps into his shell. He plays 'em tight. He drops out of pot after pot. And every once in a while he exclaims, "Gosh, I'd have won that one if I had stuck!" He's in the loser's frame of mind. It's a cinch to bluff him out because he's convinced himself he hasn't got a chance.

The point is, that if you want to win you've got to be in a winning frame of mind.

You may do miracles by persevering.

"The line between failure and success is so fine that we scarcely know when we pass it—so fine that we are often on the line and do not know it."—*Elbert Hubbard.*

. . . REED

from P-1

The speaker admitted that there would not be too much worrying about cooperation or mutual trust between government and business while billions of defense spending are straining the productive capacity of American industry, but declared no one would seriously maintain that the spending of billions of borrowed dollars for rearmament was a solution for basic economic problems. Indeed, he said, to the extent that the production capacity of industry is increased to meet the short and urgent schedule of the defense program, the situation will be profoundly aggravated when the tapering-off process begins.

"If the tapering-off takes place under an administration hostile to business, competing with or threatening to compete with business, restricting the flow of private capital by burdensome regulations and unsound taxes, the prospect of business being able to take up in other directions the slack created by declining defense requirements will certainly be reduced to the vanishing point," Reed continued. "Even under the best conditions, with government and business seeing eye to eye and trusting each other, the task will be an enormous one. The fundamental problem is to get together on a set of standards, objectives, and principles, and to restore some semblance of faith and understanding before we are confronted with the tremendous task of readjusting our economy to a peacetime basis."

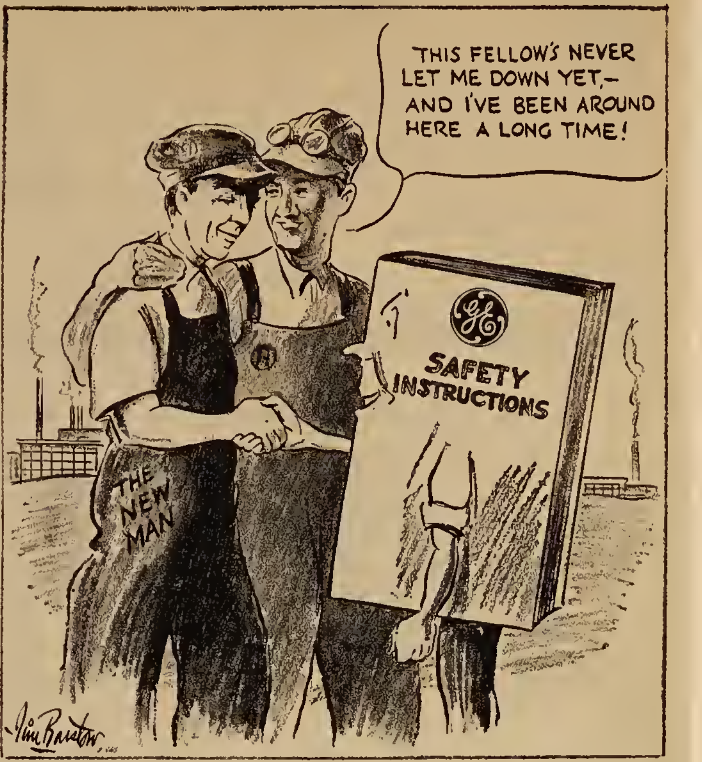
Management a Trustee

In discussing the function of government in relation to business, Mr. Reed recalled the concept of his predecessor in office, Owen D. Young, that management is in effect trustee for the benefit of employees, stockholders, and customers, and as such is under the duty to discharge that trusteeship fairly and equitably in the interest of those beneficiaries.

"This notion of trusteeship," he said, "though still applicable to a considerable degree, has been substantially modified by the rapid growth of unions, the enactment of wage and hour legislation, and the National Labor Relations Act. Today the position of management in respect to many of its employees is less that of a trustee and more that of a negotiator dealing with the duly elected bargaining agency. It should be noted that in carrying on negotiations regarding wages and working conditions, the objectives of each group should be identical. It is clear that high wages and the best working conditions are beneficial to the business and to the community as well as to the employees, provided only that they do not prevent periodical price reductions reflecting a fair part of cost savings and economies, and do not destroy stockholder interest and cooperation by reducing profits below a reasonable return. Wage levels having either or both of these undesirable effects would be damaging to employees and management alike.

"It is evident that if the company is to prosper and expand, and if it is successfully to raise new equity capital when required, it must have a satisfactory record of earnings and dividend disbursements to justify additional stockholder commitments. These stockholders include many small investors whose savings have gone into the company, and to them a reduction or discontinuance of dividends may mean a lowering of their standard of living.

A GOOD TIP



THIS FELLOW'S NEVER LET ME DOWN YET,— AND I'VE BEEN AROUND HERE A LONG TIME!
SAFETY INSTRUCTIONS
THE NEW MAN
Tim Barstow

Must Be Satisfied

"It is likewise evident that a customer of the company's products must be satisfied with their price and quality if the company is to endure. If this is not so, the employee will have nothing to build and the stockholder nothing to show for his investment.

"How can government," Mr. Reed asked, "operating as it must through thousands of men and women in government bureaus, be helpful either to management on the one hand, or to employees, stockholders, or customers on the other, in performing all these functions? Is it in a better position than management or the bargaining agency to determine the right wage level or the right working conditions for a particular company? Is it in a position to deal intelligently with earnings and dividend policy, or to advise on problems relating to production, quality, distribution, or price? Can government, better than management, determine whether and at what time to launch a new product that may be the basis of another American industry, or in raising capital for the company to determine whether it shall be done by the issuance of bonds or notes rather than common stock? It has been said that good will is the disposition of the customer to return to the place where he has been well served. Can government guard and preserve that invaluable asset of any business institution? Intimate understanding and continuous contact are needed to discharge the functions of management and to serve the best interests of employees, stockholders, and customers. This, I submit, government cannot do."

Government's fundamental job in relation to business is exactly that of a traffic officer on a busy corner, the speaker declared — to keep the channels of commerce and industry free, to encourage their use, and to assure their availability to all enterprises without discrimination. Legislation such as the anti-trust laws, the Federal Trade Commission Act, and more enlightened versions of the Securities and Exchange Act, he noted, if properly conceived and fairly administered, does not obstruct but simply defines the channels of economic intercourse.

Must Clear the Road

"But when these laws are badly drafted in vague and general terms, and when broad discretionary powers are delegated to the commission or bureau administering the act, we are completely in the hands of the administering officers", Mr. Reed concluded. "We no longer have government by laws; we have government by men—and not men elected by the people but by men selected by the executive branch of the government. If they are sympathetic to the world trend toward all-powerful centralized government, or if they reflect a hostile attitude of their superiors in office, reasonable regulation becomes unreasonable control, freedom of action becomes government regimentation.

"This is precisely what is happening here in America, and the trend will continue far more rapidly unless something is done to arrest it. No longer is government simply the policemen. It seeks to operate our business vehicles, to dictate where we are going, and how we shall get there. And so it slows us down and diverts attention from our job by imposing all manner of rules and restrictions having nothing to do with its job of regulation. It forgets that its real function is simply to see that traffic keeps moving. May those who live along the great economic highways of the nation pass the word back across the countryside, to the end that before we have exhausted our fuel by running in low gear for too long we may clear these dangerous obstructions from the roadways to a higher standard of living, and resume our thrilling journey toward a finer and happier America."

M.B.A. To Suspend Dues For First Time In Months

Payment of dues in the MBA will be suspended with the pay week ended Saturday, November 2. This is the first time in many months that this action has been possible and it means that funds on hand have once more reached the equivalent of $7.00 per member. The past year marked one of the longest periods that it has been necessary to pay dues, in the history of the organization.

During the first nine months of 1940, the Association paid out about $50,000, or an average of $12.70 per week to employees of the Fort Wayne Works. Of this total amount $27,349 was paid in sick benefits; $8,453 in hospitalization claims; $8,890 in accident claims, and $4,700 in death claims.

The last dues payment suspension period enjoyed by MBA members extended from June, 1939, to November, or a period of 23 weeks.

Do You Know

That unauthorized persons should keep out of substations, from behind switchboards, and all such areas around testing and power distribution points? Trouble suddenly developing may cause arcs and burning oil to shut off avenues of escape and shock or burn you.

Authorized operators or Test Heads will give clearance to employees required to work in these areas after careful check-up, blocking out with red tags and issuance of safety certificates. Use these means of guarding your safety if your duties require you to go into the dangerous zones, and at all other times stay away from them.

Vets Plan "Feather Party" On November 8

A "Feather-Party" is being sponsored by the G-E World War Veterans Association on Friday, November 8, in the G-E Clubhouse, starting at 7:45 p.m. Just what a "feather party" is, remains beyond the ken of the editor. However, Herschel Smith, No. 1 man of the Vets Association assured the editor it would be quite in order not to tell just what it is because folks will have lots of fun, and they might have a turkey to take home with them. Anyway it sounds good. Oh yes, Mr. Smith also said the public is welcome, too.

What Becomes Of G-E Exhibit At N. Y. World's Fair

Big Show Breaks Up And Takes To The Road And Far Corners Of The Nation

Even though the World of Tomorrow, nee the New York World's Fair is now but a dream of yesterday, it would still be possible to see the General Electric Exhibit. But, it would take a lot more traveling time than most folks have at their disposal. Let us see what is to become of the major items of the Company's exhibit and where they will eventually wind up.

Part of the lightning generator which entertained with crashing 10,000,000-volt strokes of man-made lightning will be in Washington, D. C., and part of it in the Pittsfield Works. The equipment of the "House of Magic" science show will be somewhere on tour in the East or Midwest. Harwa, the mummy, will continue to have his skeleton exposed by X-ray in Chicago, while another part of the X-ray exhibit will be in New York City. Rockwell Kent's huge mural of electric power will be sent to General Electric's general offices in Schenectady.

Motif to New Orleans

Negotiations are under way which may send the spectacular motif of the Exhibit, a 129-foot shaft of stainless steel representing a lightning bolt, to a New Orleans amusement park. There is a possibility that the exhibit's television studio will go to an even more remote corner of the earth. The "Magic Kitchen," which talks and operates itself, will also be somewhere on tour.

The 10,000,000-volt lightning generator, whose thunderous discharges startled in the neighborhood of 5,000,000 people during two Fair seasons in Steinmetz Hall, will be taken apart in sections. Twenty capacitors—the units which store up the electrical energy for the lightning discharges—have been sold to the United States Bureau of Standards. The Bureau will set these up in its new $350,000 high-voltage laboratory in Washington as a lightning impulse generator capable of 2,000,000 volts. The rest of the World's Fair lightning generator will be returned to the high-voltage laboratory at the Pittsfield Works, to replace equipment in use there.

To Go On Road

The "House of Magic" equipment, which entertained nearly 3,000,000 visitors in two seasons at the New York Fair, will go on tour in a science show to be presented by W. A. Gluesing, who was director of the show at both the New York and Chicago World's Fairs. On November 6 the first shows will be given in the Newark Evening News auditorium in Newark, N. J., remaining there for several weeks. The show is scheduled to go to Rochester, N. Y., December 2, and in January will begin a tour of Ohio for presentations before schools, clubs and the like.

The X-ray equipment and full-length fluoroscopic screen used to X-ray Harwa, the mummy, has been given by the General Electric X-ray Corporation to the Field Museum of Natural History in Chicago.

Cost Of Living Adjustment Remains At 3 Percent

The Secretary of Labor announced on October 26 that the cost of living index at September 15 stood at 100.4 compared with 100.5 on June 15 the last previous announcement. Therefore the cost of living adjustment remains at 3 percent.

From the schedules of index figures and adjustment percentages as printed in the WORKS NEWS of June 21 it will be noted that the adjustment will remain at 3 percent until the index figures reach either 100.9 or 99.8.

Treasure Hunt's End . . .

This gay group of girls, all eating fried chicken, are part of a group of 170 Elex Club members who planned a treasure hunt in Foster Park Tuesday. Rain deluged the countryside and so the girls had fried chicken at Bonnie Oaks. Were they downhearted? Not so it could be noticed, for when 170 girls pack into a place designed to hold 75 there's no chance for sad hearts. In the picture, left to right, are: Kate Armstrong, Daisy Mae Sweet, Alice Slater, Dot Zurbach, Mary Laughlin, Mary Snavely, Leona Brakamp and Jean Weikel.

»» NEWS THROUGH THE PLANTS ««

SANDY SAYS

One o' the easiest ways to argue is to find some one who won't talk back, and then ye can say anything ye want to. My argument with the Fem. Viewpointers seems to be like that. Joe also contested the statement, "Opportunity knocks but once," and now I feel like trying to disprove another famous quotation.

It is, "The Evil that Men Do Live After Them, The Good is Oft Interred with their Bones." Many o' ye have read that statement and feel about it like I do. It's just exactly backwards.

Let's take an example, and to make it more interesting, let's take one right on our own front door step. Let's even take men who are still very much alive, and whose "good," I assure you, will NOT be interred with their bones.

These men are Fred Hunting and Clark Orr.

What did they do? Develop a refrigerator unit which Schenectady Works is building. Well, a lot more than that. They are pioneers who for years kept plugging away with a certain ideal in mind. They planted the seeds that sprouted the Hermetically Sealed Refrigerator.

Now, nearly every manufacturer builds his electric refrigerators this way.

"O.K." ye say, "Sure, some guys, but how does that help us right here and now?"

Weel, I'll tell ye. Just take a look at our refrigerator motor business. In fifteen years, we have expanded from less than a hundred thousand per year to over a million per year.

Now, ye know, and I know, that it has taken a lot of good work and some very active cost reduction, to build up such a business. And we mean to keep it that big too! And ye know what we must do to keep it that big. Keep on doing the job better and cheaper, and we'll not only improve the business but we'll also improve our profit sharing bonus, too. Hoot Mon! 1,000,000 motors! Why, even 1c saving each means $10,000 per year.

Ten thousand dollars for a cent. Wouldn't that be a good slogan!

I tried it on Cousin Colin, and he said, "Weel, outside o' the night I tripped on a skunk, rolled down a bank o' stink weeds, and landed in a box of onions, that's the biggest cent (scent) I've ever heard of!"

Hazel Perry, Bldg. 26-5, wishes that if the GENTLEMEN in the office don't intend to pick her up, they wouldn't switch chairs without warning her.

The person winning the comforter being given away by Elex and not wishing to use it on the bed, could use it very nicely for a screen, eh Irene?

Ask Bill Rohe, Bldg. 8-1, what he thinks of the play "Professor Pepp" given by the G-E Apprentice Association.

Louise Roberts spent the weekend in Kentucky. Enjoyed the trip and scenery very much. Her husband reports no good looking women but the one he took along.

19-5 Office Chatter

"We're in the Army Now," is the tune we have heard in the office the last couple of weeks. It has always been known that women conceal their ages, now the fellows cannot. J. H. Stark, who is a captain, too, was demonstrating the fine art of rolling his own cigarettes. To top matters off he bought a pair of those new shell rim glasses, all for the army. Meyers, Shattuck, Ruble and Richards would be a good foursome to do guard duty as they all have recent experience in walking short distances. Ray O'Brien doesn't seem to think that he will come into any of the money his wife won.

The fellows have their football games, but it takes the girls to eat the taffy apples. In fact Jimmie was heard to remark that she ate two the other morning. Speaking of flowers see Agnes, she knows her nasturtions.

Ralph Mennewisch, Bldg. 19-5, is such a political fan, that he has it written all over his car, his hope for president.

Transformer News

A steak bake was held at Spencerville in honor of Marie Effell's birthday. The guests were: Helen Stahl, Angie Dribelbiss, Bertha Gruber, Loretta Bloom, Velma Meads, Golda Mentzer, Thelma Oswald and Virginia Mollett.

Marie Martz, Bldg. 19-5, said she had to go down town to buy a new hat because the old one she had fit down over her ears so far that she could not hear all of the political speeches that are going on.

Walt Kryder of Bldg. 17-2 had an exciting evening one night last week, first he could not find his keys so he hooked two wires together to start his car, then on reaching home he discovered that he had on someone else's coat.

Motor Salesman: "Can I show you something, sir?"

Pedestrian: "No, I'm not here to buy anything. But it's such a wonderful change to be in the midst of all these cars without having to dodge them."

Laura Starner and Gertrude Heckman of Bldg. 17-2, have really been making a raid on the mice, they corner them in a paper basket then scare them to death by screaming.

Famous last words: Rosemary Miller, Bldg. 17-2: Did you see my new wedding ring?

Fred Paul of Bldg. 19-3 sure got his dates mixed this week, must be the cigar scraps he smokes, anyhow when Fred went home Thursday night he dropped his clock card in the little black box indicating his week was finished, but he must have changed his mind for on Friday morning he was hunting for it.

Schoolmaster: "If Shakespeare were alive today, would he still be regarded as a remarkable man?"

Pupil: "I'd think so, for he'd be 376 years old."

Our inventor, Mike Sorgen, the dispatcher in Bldg. 19-3, is trying to get a patent on a turnip cutter. Mike must be looking for a hard winter, and a scarcity of other vegetables to go to all the trouble to cut turnips so fine or does he like the fruit that well? Try the dime store, Mike, they have bargains in fruit cutters.

A man's heart is through his stomach so they say. We Bldg. 4-5 girls know now why we have been sampling Marie Perry's cakes.

Slips And Chips

By Sir Vis,
Bldg. 4-4

We will greatly appreciate a report from any person informed or knowing the present status of The Edison A. Martin Dinner Pail Soldering School. The last report, Mr. Martin had just completed an excellent soldering job on his own dinner pail. He was very proud of his work until he realized that he had soldered his own pail shut. He closed the class shouting, "from now on, bring your own pails."

The art of being contrary usually falls on the women, but not where William Owens is concerned. On the return trip from the lake, Bill became very sleepy while driving and summoned his wife to take the wheel. Bill then prepared for a nice sleep that never matured. He didn't even nod the remainder of the trip.

Martin Hardwick exclaimed that no one ever tells him anything except his wife and then there are always strings attached; helping with the dishes etc., eh Mart? The first 100 years are always the hardest.

Nearly everyone knows that the easiest way to find something is to look where it is, but Gee. The other morning, Gee looked high, low, in cubby holes and drawers, for that visorless striped cap that is so becoming to his tall figure; that cap which brings out his personality, like his first badge, but to no avail. Then unconsciously he reached into his hip pocket, pulled out his cap and put it on with a smile.

While we were peacefully resting and enjoying our noon-day smoke, the sound of someone crushing a paper box vibrated through the air. As we looked in the direction from which the sound came, there was a large paper carton with two feet waving frantically in the air. Out of the box came the owner of those feet. It was none other than the Hon. Martin Brown, Mayor of Pucker Huddle.

Yes, it is true Dodges' are not seaworthy. At least Bill Skevington found that out. On the way home from work Bill, came to the underpass on Sherman Street. Seeing it was flooded, he decided to try out the Dodge. We don't know, but maybe he struck a sand bar; what we do know is, that he sent for a tug to pull him out. Happy sailing, Bill, better luck next time.

Yes, Donald Thomas wishes to become a messenger boy. Maybe he intends on working his way up to the top, and again he might wish to be near that new messenger girl. I don't know, but I rather believe it is the latter.

Walter Hazelett is becoming well known for his famous saying, "Just a picnic."

A minister was loud in his praise of the fat and juicy bird his colored host served for dinner, and finally he asked: "Where did you get such a fine goose as that?"

"Pahson," replied the host, "when you preaches a good sermon Ah doan ax you whar you got it. Ah hopes you'll hab de same consideration fo' me."

When Mildred Stonebraker, Mabel Beady and Loretta Aumann, all of Bldg. 4-5, go out again for a chicken dinner, they had better find out which church it is at, for there are several churches in town.

Last Sunday, Elmer Auman, Bldg. 4-3, reported that he almost got a sunstroke while fishing.

Flossie Davis, Bldg. 4-3, has her garage all Halloweened, and really she is afraid to go there herself.

Punch Press 19-5

By Slug

Whenever I am wrong I am always glad to admit it, and I must admit I am kept fairly busy admitting. This has to do with the old question: When is a man getting old? I used to think a man of 30 was getting pretty well along in years but as time went by I raised the ante to 40, finally I decided a man must first be a grandpa before I could even consider him as old. A distinguished member of our own group has not only blasted this theory but so completely changed it that now I actually believe a man becomes younger after entering the grandpa stage. Yes sir, Grandpa Louie Davis (by his actions) has seemingly thrown aside several moons and is now a youngster with plenty of zip. I was thoroughly aroused by this evident loss of years and in my own crude way decided an interview was in order. So up I steps, bold as brass, and asked: Louie, "how does it feel to be a grandpa." His face was immediately illuminated with a huge smile, but as he turned and noted his interrogator, it suddenly darkened into a mask of suspicion. He waved me away and with a growl told me to go to the usual place, which I have no desire of visiting. Oh, well, I always gotta learn the hard way, but until proven wrong I still claim Louie must feel younger.

19-4 Spot Jottings

Anyone having a perfect 36 figure can dispose of their vests with financial gain by applying to John Peper, Bldg. 19-4. John has just completed a deal with Lester Logan, for a vest with buttons and lining intact, and no gravy spots. The price is one dollar per. P. S.—We do not know where Logan got the vest. . . . Mae Lambright is trying out part of her Halloween costume by wearing two kinds of ear rings to work Monday. . . . It is now Captain Braun of Bldg. 19-4 and he wishes everyone to address him by the proper title. He has gotten this distinction by calling for the small fire scrion every Friday morning. Congratulations. . . . It is said that Brother Robin has been having quite a time with his toe, so he got the safety committee to put a drip pan to catch all the naphtha. Well he still is having trouble, so his fellow co-workers are thinking of buying him some new socks for Christmas.

It is with interest that your reporter in Bldg. 4-3 notes the different conversations and discussions that take place as the boys prepare for their noonday repast. We secretly suspect that we are harboring among us future economists, military strategists, and political experts.

Freddy is seven and very small for his age. His mother works in a downtown office, so when he contracted a sore throat she asked the colored maid to take him to the doctor.

Before examining him, the doctor said, "Freddy, how old are you?"

"Five, sir," Freddy replied promptly. Whereupon the maid shook her finger at him and cried, "Look-a-hyar, Freddy, you tell dat man how old you is! He ain't de conductor, he's de doctah!"

And Freddy admitted his seven years.

From the feminine VIEWPOINT

by Irene Perry and Hilda Berthold

Sandy, perhaps you should stick to subjects you know something about. Women and their achievements are apparently quite out of your line. We have given you plenty of time to retract what you said, but evidently you only write and not think. You didn't care to know how the score stands between the two sexes as far as suggestions go—but we did. Sure it is a beautiful sight to see written on paper, but we don't want to make you feel too badly. Some of our highest paid suggestions *also* have gone to the fair sex (fairly and honestly too.) We will be very happy to put one of our fair damsel's records, past, present or future, beside your record anytime you name. You may rest assured that the women in the Fort Wayne Works are a wide-awake lot, and don't intend to pass up any cash that calls for a little brain work.

You girls who are reading this needn't get too blowed-up on yourselves. The suggestion record may be good—but how about those little mannerisms that make you what you are? We all grow more or less careless during the summer season, but now the fall and winter session is in full swing it may do you well to check up on yourself. How many times a day do you give "OK" for an answer? It isn't even good form on a telephone. How many times today could you have said "thank you" or "please" when you didn't? It really doesn't take any longer, but the impression left lasts the whole day through. We'll bet there was at least once when you could have said "I'm sorry", but instead you just gave them a dirty look. What if it wasn't your fault? Did you ever try smiling as you walk into work on Monday morning? "Blue Monday" just isn't there. There is something about a smile early in the morning that brightens up the whole day. Did you get up and give that woman on the street car your seat? You may think she didn't have any business riding street cars during the rush hours, but she is probably someone's mother or perhaps even grandmother, and it isn't very easy for her to hold onto a strap while the car is in motion. Did you get in a hurry driving to and from work and toot your horn at some poor soul crossing the street when they were doing their best to get out of your way? Did you take off your hat in the theatre last evening? Even the men are finding it difficult to see over the funny creations you insist upon wearing.

As you go about your work tomorrow try wearing a smile and see what a boomerang it can be. We know you work hard, but what in the heck do you think the rest of us are doing? You have a long, hard winter ahead and you might as well make the best of it.

Speaking of a long, hard winter ahead—try a little relaxation—take in the Elex Party on the 11th and the Notre Dame-Iowa football game on the 16th.

Our rapidly rising pugilist, "Kid" Burke, Bldg. 4-3, after suffering many reverses in the field of fisticuffs, finally came home with a victory. This time his opponent was the kitchen sink. Bill successfully battled the old boy and came out victorious, suffering a minor scalp wound and the loss of five dollars.

NEWS THROUGH THE PLANTS

M.B.A. PATIENTS

General Purpose Motor: Dorothy York, 218 E. Packard Ave; Mary McCague, Lutheran Hospital; Ruth Papenbrock, St. Joe Hospital; Mildred Hoover, Ossian, Indiana; Harold Dalman, Yoder, Ind.; Bertha McLaughlin, 2819 Bowser Ave.; Erma Horine, 117 E. Pontiac St. Transformer: Bernice Rodermund, 937 Eckart St.; Helen Chapin, 318 W. Washington Blvd.

Apparatus: Dock Gordon, 801 Archer Ave.

Shipping Department: Frank Bendele, 422 Baker St.

Left the Hospital: Donald Eme.

Returned to work: Harold Axe. Mardo Tobias, Charles Price, Ruth Haugk, Erma Horine, John Grosjean, Gordan McDougall, Richard Watt, Mildred Mullen, Perry Shober, Olivia Preston, Carmeita Faugh; Lucille Gallmier, Eva Gault, Wilda Click, Otto Kammeyer, Clayton Schultz, Sylvia Baughman.

Bldg. 4-4

Was Ewald Stinsmuehlen's face red when he blundered in a door, plainly marked, OFFICE WOMEN.

Estel Grier we're surprised at you! To think you would bring messes of fish to your friends and lead them to believe they had been caught by yourself when in reality your father-in-law should have all the credit.

Darryl Daniels sure looks blue these days. We wonder if its because "Bea" is working nights.

Anyone interested in a new way to get rid of money please contact Joe Monahan. He just throws it away.

Walt Neimeyer got his political loyalties mixed up rather badly the past week. He was wearing a slogan on his apron that conflicted terribly with his politics.

Earl Greenlee enjoyed his first pheasant dinner of the season Sunday. It was legal though, his sister lives in Michigan and the law is in on upland birds in that state.

Guy (Doc) Coon is picking out his staff for his return to the colors. Doc would not be such a bad shave tail in spite of his aversions to the contrary.

Lucille Baker believes it brings good luck to have two shoes of different pairs repaired at the same time.

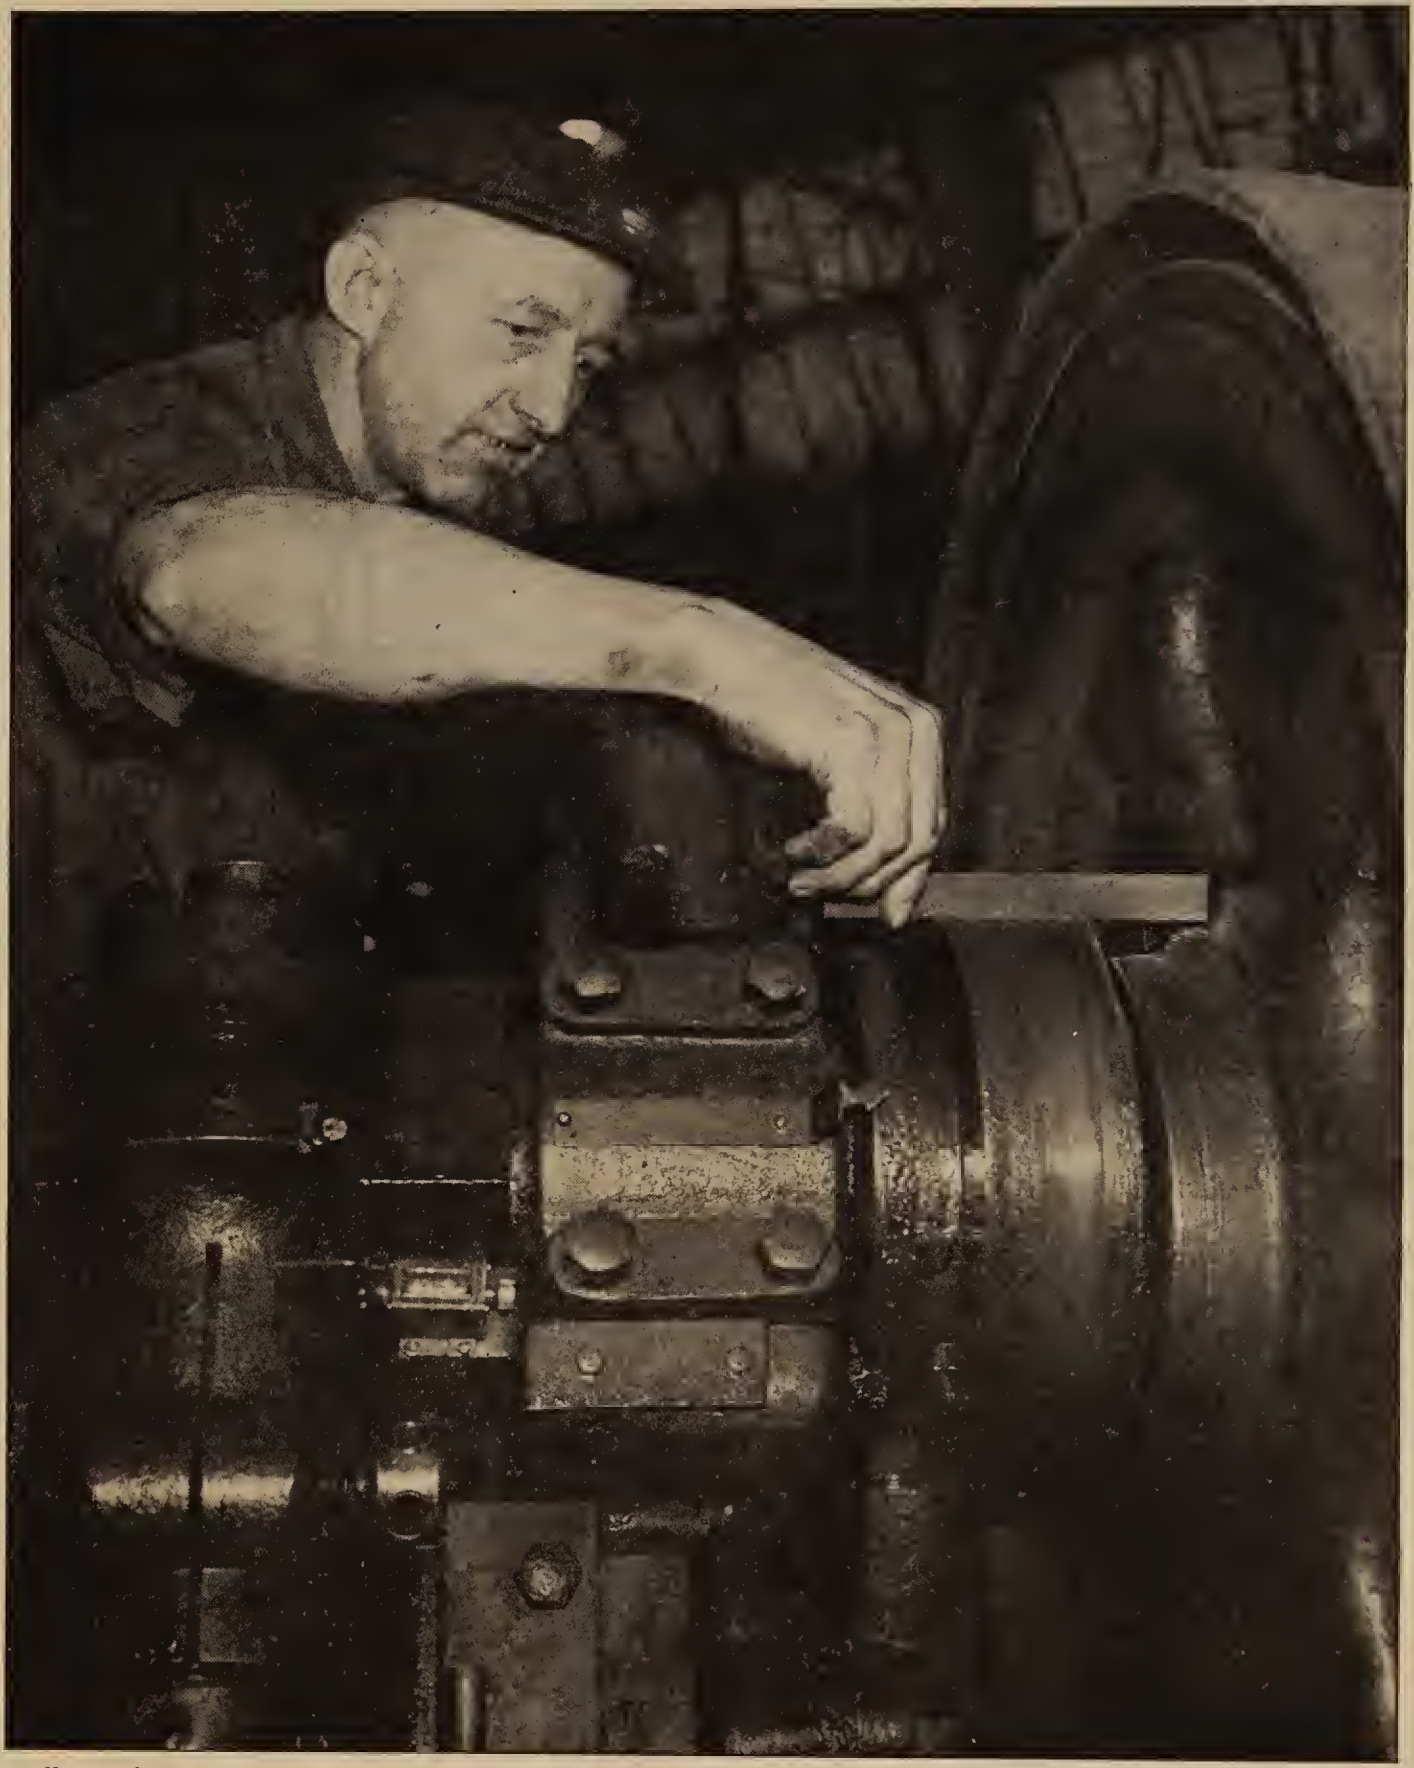
Victoria Rodenbeck tried the tumbling act in the park with Phyllis High's assistance. Those who saw the stunt reported it as good.

Anyone knowing some real thrilling ghost stories, save them for Berneil French.

Since Thanksgiving date has been changed, let's change the traditional menu. Here is one: Chili, Chocolate pie, Potato salad, Ice cream and Pickles. For further details see Lulu Kline or Lucille Baker.

Lloyd Garrison, Bldg. 19-5, feeds his chickens ham, he says it's good for them, it flavors the eggs, thus giving ham and eggs altogether. Lloyd, are those the eggs that were laid under your window every day for a week, and your neighbors had to tell you about it?

But The Guard Held It . . .



Here we have a striking example of the value of guards on machinery. August Busse, millwright in Bldg. 27 points to broken crank shaft on a punch press. The guard surrounding the flywheel held it although the shaft dropped two inches when it broke. Fred Vachon, setup man in the same department recalls a similar case many years ago, before punch press flywheels were guarded. In this case the flywheel left the machine and careened wildly through the shop, narrowly missing several men and finally came to a stop against a brick wall.

Lloyd Garrison, Bldg. 19-5, says he is not going to file suit as he intended to do against Ina Archbold and Hope Hatfield, Bldg. 19-5, for five cents they bet him and would not pay. Just because they bet Lloyd that he was too old to register for the draft, after making Lloyd produce his registration card he finally got his nickel. The girls claim they still don't believe him.

We are wondering why it is that Art Brandenberger, Bldg. 4-3, when walking along the street always pulls his cap so far down over his eyes. Perhaps he is studying to be a great detective or a second story operator, who knows. Please explain yourself, Art.

Racheal Beach, Bldg. 4-3, is wondering how soon she will get to drive Popeye's new car.

It looks like the Kruses will have to eat stew for Thanksgiving. Al of Bldg. 6-3 purchased a rooster to fatten up for one of the Thanksgiving dinners but has since found out that this bird's crows blend in remarkably well with his new opera singing role, consequently the barn yard fowl has been granted a reprieve 'till Christmas. Heaven help it if it develops a sore throat.

Will some one please tell Grace Ledbetter, Bldg. 4-3, when it is time to get off the elevator so she doesn't have to bother the elevator man. Seems as though Gracie just can't recognize the old place.

Eulalia Spath, Bldg. 4-3, answered the telephone one morning at 4:00 o'clock and was asked what she was doing. She answered "Washing my hose." Could it be she was just going to bed?

Volleyballers In Zooming Start Of Season

Champs Defend Their Position And Give Promise of Rugged Action This Winter

Four teams, Small Motor Drafting, defending champions, Main Office, Winter St.-Tool, and Small Motor Factory, all zoomed off to a flying start last week in their quest for the 1940 G-E Inter-department Volleyball championship by clean sweeping their three-game series with Small Motor Production, Apparatus-Transformer, Small Motor Standards and Apprentice, respectively.

All of the victors had an easy time chalking up their series sweep as none of their unwilling victims were able to garner over 10 points in any one game while Drafting enjoyed the lightest work of all, being a three-time winner on a forfeit basis.

Main Office paced by the exceptionally smooth offensive and defensive work of Tom and Jack Fox, romped over Apparatus-Transformer holding them to a total of 10 points and proclaimed themselves as definitely a team to watch during the current campaign.

Always a tough contender, Winter St.-Tool served notice that this year would be no exception as led by that always dependable spiker, Macy, then clipped the Standards 15-1, 15-10, 15-9, to get in the big first place tie.

In the other game on last week's opening card Small Motor Factory, who always seems to have a good team regardless of the sport, continued to keep their average up by organizing a powerful volleyball sextet who had little trouble running roughshod over the youthful Apprentice 15-6, 15-8, 15-1.

Schedule for next week which will undoubtedly break up the big tie is as follows:

Wednesday, Nov. 6

5:30—Apprentice vs. App. Transformer.

6:15—Main Office vs. Small Motor Draft.

Thursday, Nov. 7

5:30—Small Motor Standard vs. Small Motor Products.

6:15—Winter St.-Tool vs. Small Motor Factory.

REFRIGERATION BOWLING

That well-known telephone was ringing constantly last Tuesday night. One of those who heard that jarring jangling note which means you've crossed the line, was our league secretary, Mr. Raeger. Seems like the only one with a 200 count in his system is Geller, who topped the portals for a 204. Credit should be given to Benz, who although just a beginner, is doing all right for himself. He rolled a 176 count one of his games Tuesday night and for one who is just becoming acquainted with that game, that's not half bad. In fact, it's not half bad any way you look at it. By now, all the fair haired laddies should have the kinks out of their bones and settle down to some real bowling, but as yet, we haven't heard anything to make us let our hair down and rave over.

ON - - the Alleys

A little more dirt from the bowling gutters: Homer Meeker, secretary of the Transformer League requests that all bowlers be ready to roll when the pins are spotted, as some of the games carry on 'till 9:15 and some of the wives are beginning to wonder what their spouses are doing out so late and are asking embarrassing questions. . . . Bond of the Transformer League was bursting with pride after his first game of 231 Friday, but the second game made his clothes fit better, as he tallied a 131 count. . . . Out of the nine boys in Bldg. 6-4 who bite on new bowling balls this fall, G. Grauer seems to have got the only strike ball, as he grossed 606 to lead the Small Motor League. . . . "Cy" Seymour of the same circuit had a well wisher show him how to throw a hook—this must have been forgotten in one lesson as he can't seem to carry the ten pin. . . . Button Button, who's got the button was played at the Elex Afternoon League last week as Sue Cameron popped all the buttons off her blouse after getting a strike. . . . Doherty of the Office League set them up for his squad Monday after getting two difficult splits while Ulmer gave forth with some good enthusiastic groans when he missed a split that cost him a 600 count. . . . Southpaw Dick Hurst of the Office League had the old left hand working the other night for a count of 541. . . . Bill Doehrman made the pin boys work for their dough Wednesday as he clipped off a single game of 248 and a total of 659. . . . The coaches of the Major League are sneaking up on the Infielders, the three-game total leaders of the league as they now have 2,786, only 41 pins behind the leader. . . . Walter Best of the Tool Room League couldn't stand the prosperity the other night as he had 117 in the fifth frame but collected a total of 147. . . . What's the matter, Walt, trying to clean the debris out of the gutters? . . . Mildred Miller by request will again console.

. . SAFETY *from P-1*

DECATUR BOWLING

Decatur Bowling

Team—	W.	L.	Pct.
Office	11	4	.735
Flanges	7	5	.640
Packers	9	6	.600
Bearings	9	6	.600
Tool Room	7	5	.580
Shells	8	7	.530
Maintenance	8	7	.530
Rotors	8	7	.530
esters	6	6	.500
Stators	7	8	.465
Production	6	9	.400
Shafts	6	9	.400

Maintaining their lead of the Decatur G-E Bowling League, the Office team swept their three-game series with the Rabbits team scoring a 2,395 total to their opponents 2,107. Keeping pace with the league leaders, the Tool Room team scored a grand slam over the Shells totalling 2,373 pins to the opposing team's 2,205. Still in the running and bettering their position of the previous week, the Stators won three games by forfeit. The Production team with a total score of 2,327 defeated the Maintenance team two games with their total of 2,213. The Rotors scored a two-game victory over the Packers; the winners' total pins were less than their opponents, 2,395 to 2,432. The Flanges piling up a 2,378 total nosed out the Testers two out of three games. The Bearings moved from fifth to fourth place in the league by virtue of their two-game win over the Shafts, scoring 2,293 to their opponents' 2,205.

"Say, is your dog clever?"

"Clever! I should say so. When I say, 'Are you coming or aren't you?' He comes or he doesn't!"

IN THE ROUGH

By WALTER SUNIER

Do you know what the tee said to the ball?—"Im tired of sticking up for you."

Do you know what the club said to the ball?—"You go round. I'll stay here."

Do you know what the core of the ball said to the outside?—"Keep still. I've got you covered."

Do you know what the golfer said to the mashie?—"I'm going to get a little tourf with you."

Do you know what the No. 2 iron said to the golf course?—"I'm not going to take any more of your dirt."

Do you know what the club said as it missed the ball?—"I hope you got a whiff of that one."

Do you know what the club said to the ball?—"You're full of dirty cracks."

Do you know what the ball said to the creek —"I'm all washed up on you."

Do you know what the niblick said to the ball?—"That was your rubber."

Do you know what the putter said to the ball?—"I'm going to put you in a hole."

Do you know what the ball said to the driver?—"I won't stay 'round if you strike me."

Do you know what the golfer said to the ball?—"Here's the 'top of the morning' to you."

Do you know what the rock said to the club?—"I hope you keep your head on this shot."

Do you know what the turf said to the bunker?—"I want to be a'lawn."

News Through Plants

(Continued from Page 3)

All those familiar with the "Good Old Days" will remember Bill Walt, Bldg. 4-B, as a football player. It is even said that Bill was quite an amateur boxer. Later he was part manager of M. Patty, 2-1, during the old E.T.C. days. Now Bill is managing a wrestler known as "Sad Sam" Sappington who challenged "Bad Boy" Brown at the matches Wednesday night. Your reporter understands that "Sad Sam" was formerly a carpenter of repute, good or bad we can't say.

Some time ago Frank Kimble, Bldg. 4-3, was observed painting his bathroom attired in a raincoat and a broad brimmed straw hat. When asked why the peculiar raiment, he replied, "This is to keep the paint off of me in case the ladder slips, the like of which happened to me once before. So I am playing safety first."

Frank Barnd, Bldg. 19-5, says it is the time of the year that a fellow can make a little extra money if you know your stuff. Now any one that wants to wager on the coming election had better get in touch with Frank. He will call all wagers from one to five cents and put the money on the spot.

Congratulations to Mr. and Mrs. Wren A. Herbst on the arrival of a beautiful baby girl, with a beautiful name, Marcia Kay. She arrived on Monday, October 21. Mr. Herbst is employed in Bldg. 4-6.

Births

Mrs. Otis (Eileen) Zellers, formerly of Bldg. 4-3, a baby boy.

GENERAL ELECTRIC
NEWS
FORT WAYNE WORKS

RECEIVED
8 1940
PUBLIC LIBRARY
FORT WAYNE & ALLEN CO., IND.

Volume 24 FORT WAYNE, INDIANA, FRIDAY, NOVEMBER 8, 1940 Number 38

Plastic Heels For Milady's Shoes

Probably a little known fact among Fort Wayne Works employees is that plastic heels for women's shoes, rapidly becoming a vogue, are manufactured in the Plastic Division at the Fort Wayne Works. In the above picture Rosemary Fechner, Bldg. 12-3, is giving a smiling approval of the new pair of shoes with plastic heels worn by Evelyn Reiling, also of Bldg. 12-3 where final operations on the heels are completed.

General Electric is today producing thousands of these heels to meet the growing demand. Since they are available in such a wide range of tints and shades they are extensively used without any covering whatever. Some have been made in magenta, brown, gold, green and black. The luster of the material, and the fact that the color cannot chip or peel make the heels doubly attractive.

Chronic Forgetters "Hurl Monkey-Wrench"

With the badge identification system in effect at the Fort Wayne Works for a little better than three months your "inquiring reporter" determined on a recent Monday morning to check on its operation, for after all every employee must wear a badge and therefore every employee must undoubtedly be interested in the subject.

After loitering at the various gates the writer is forced to three conclusions. First, that several thousand employees fully appreciate the importance and necessity of the badge identification system. Second, that our plant patrolman must surely eventually suffer from eye strain because of individual opinion of where a badge should be worn—or carried. Third, that the matter of forgetting to wear the badge is just as much a habit as that of remembering to wear it.

The latter observation is borne out by the fact that many of the Monday morning "slip signers" go through the routine of claiming a temporary badge with an impressive—or should we say depressive—regularity. It is these chronic forgetters that offer the most hindrance to the smooth operation of the system; that hurl the proverbial monkey wrench.

(Continued on Page 3)

FREE MOVIES

G-E Club Free Movies will be inaugurated Sunday, November 17, with the "Long Shot," starring Marsha Hunt and George Stone,

There will be two performances, one at 2 o'clock and the other at 4. Admission will be on presentation of either this year's or last year's G-E Club membership card.

"Let Us All Stand By"

Philip D. Reed, Chairman of the Board of the Company, made the following statement on Wednesday following announcement of complete returns from the national election:

"The election is over, the results are known. Whether our preference was for Mr. Roosevelt or Mr. Willkie, we Americans know that the future of our country depends not on politics but on economics and national unity. The next four years bid fair to be the most critical and difficult ones within memory of living man. Profound wisdom, steadiness and vision will be needed to guide America through this war-torn world, preserving at once our integrity and ideals as a great democracy, and exerting at the proper time and place the full weight of our power and leadership toward a realistic, economic and therefore lasting world peace.

"And in the meantime the creation of an impregnable defense, the training of millions of men, and the building of millions in war machines is itself a herculean task—especially so when we recognize that the production of everyday useful goods must go on and up if we are to preserve our standard of living and avoid a wartime boom.

"Add to this the task of maintaining a united, confident and understanding people awake to the gravity of our problems, ready to serve and, if need be, to sacrifice to their country's interest, and we get some notion of the nature and enormity of the burden that yesterday's election placed upon the shoulders of our President. He will need the help of every loyal American—let us all stand by."

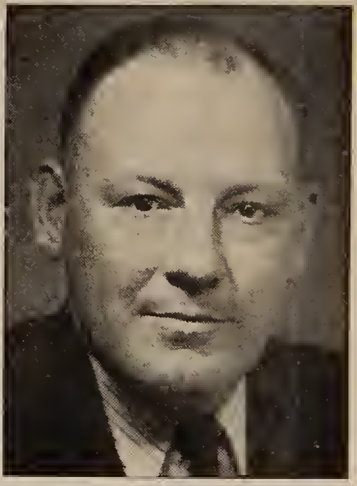
Supervisors' Club Names Candidates

Works Manager To Give Talk At Meeting To Be Held November 13

Candidates for the various offices of the G-E Supervisors Club will be nominated at the meeting of the organization to be held on Wednesday evening, November 13, it is announced by E. M. Stock, club president. An innovation will be the arrangement whereby any additional candidates may be nominated by the membership following presentation of the two slates by the nominating committee.

The meeting will be one of the most outstanding for the year. Following a turkey dinner, an address will be made by Works Manager M. E. Lord. Closing the meeting will be a vaudeville program. The meeting will open at 6 o'clock and will be held in Bldg. 16-2.

Given Promotion



C. W. HALE

C. W. Hale of the Planning Department of the Motor Generator Division has been appointed assistant general foreman in charge of

(Continued on Page 2)

Armistice Day Bulletin

On Monday, November 11, there will be a general observance of Armistice Day in commemoration of the ending of the World War and as a tribute to our soldiers who made the supreme sacrifice.

All ex-service men who plan participation in the Armistice Day observances will be excused from duty during such period of time as may be necessary. They will, however, make arrangements in advance with their foremen or supervisors.

All employees are asked to observe two minutes of silence at 11:00 A.M. To aid in this purpose horns throughout the factory will sound a warning signal at 10:55. Five minutes later at 11:00 sharp the signals will again be sounded, power will be shut off and all work will stop for the duration of two minutes during which employees are asked to maintain a respectful silence.

Foremen and others responsible will see to it that individual switches in and around the shop, switchboards, etc., are thrown out so that power may be restored at the expiration of the two minute period.

M. E. LORD
Works Manager.

• Little Wastes

In the Prisoner's Gate Museum in Hague, Holland, there is a stone torture bench. A large hole in the center of the seat excites a visitor's curiosity until the guide explains that drops of water falling on the seat for many years have worn away the stone.

Little wastes, like those drops of water, don't appear to be important at the time—but it's not long before they leave their mark. For that reason, we should always be alert to prevent little wastes that tend to hurt our company's business and in turn our jobs.

• History Of Our Flag

The American flag is the third oldest of the National Standards of the world; older than the Union Jack of Britain or the Tri-color of France.

The flag was first authorized by Congress, June 14, 1777. This date is now observed as Flag Day throughout America.

The flag was first flown from Fort Stanwix, on the site of the present city of Rome, New York, on August 3, 1777. It was first under fire three days later in the battle of Oriskany, August 6, 1777.

It was first decreed that there should be a star and a stripe for each state, making thirteen of each; for the states at that time had just been erected from the original thirteen colonies.

In 1794, Vermont and Kentucky were admitted to the Union and the number of stars and stripes was raised to fifteen in correspondence. As other states came into the Union it became evident there would be too many stripes. So in 1818 Congress enacted that the number of stripes be reduced and restricted henceforth to thirteen representing the thirteen original states; while a star should be added for each succeeding state. That law is the law of today.

The flag was first carried in the battle of Brandywine, September 11, 1777. It first flew over foreign territory January 28, 1778, at Nassau, Bahama Islands—Fort Nassau having been captured by the Americans in the course of the war for independence. The first foreign salute to the flag was rendered by the French Admiral La Motte Piquet, off Quiberon Bay, February 13, 1778.

The flag first rose over thirteen states along the Atlantic seaboard, with a population of some three million people. Today it flies over forty-eight states extending across the continent, and over great islands of the two oceans; and one hundred thirty millions owe it allegiance. It has been brought to this proud position by love and sacrifice. Citizens have advanced it and heroes have died for it. It is the sign made visible of the strong spirit that has brought liberty and prosperity to the people of America. It is the flag of all of us alike. Let us accord it honor and loyalty.—*Philadelphia Works News.*

• More For Your Money

Right now most of us are looking over the new 1941 cars and the more fortunate are trying to get a good trade-in allowance. There's no doubt you get more for your money than ever before.

Did you ever consider why this is possible? The answer lies in the new and better ways developed to do each job—ideas translated into action! Have you ideas that will help us give better value? Why not present them through the Works suggestion system?

Decrease In Accidents Marks Opening Of Safety Contest

One Hundred And Forty-Six Departments Qualify With Perfect Scores

A fifty per cent decrease in lost time accidents during October as compared with September marks the first month of the all-department safety contest being held at the Fort Wayne Works during the closing quarter of 1940. A total of one hundred and fifty departments are entered in the contest and all qualified during the first month with no lost-time accident with the exception of four.

The contest is based on the "Perfect No Accident Record," and not on severity and frequency rating of departments. Although the contest is for a three months period, it will be on a monthly basis. That is a department having a losing time accident during one of the three months is not eligible for participation in the cash award for that month but is not eliminated from competing the two remaining months.

The four accidents, which resulted in the elimination of four departments from the contest during October occurred in the Specialty Motor, Motor Generator and Switchgear and General Service Divisions. The first mishap occurred in the Specialty Motor Division when a screw machine operator received burns caused by the use of an improper cleaning solution. The second and third accidents were in the Motor Generator and Switchgear Division. In one of these accidents a helper received a fractured thumb when he attempted to position a drum suspended from a crane, so that the drum could be emptied into a tote box. The thumb was caught between the drum and the edge of the tote box.

The second accident in this division happened when a P. & J. operator was struck on the hand by the spinning crank on his machine. After using the crank to operate the machine manually he neglected to remove it before throwing on the power. Injuries consisted of fractured bones in the hand.

The fourth accident, which occurred in the General Service Division, resulted in flesh burns to a steel worker's helper while he was assisting a welder in repairing steel window frames. The helper was not wearing dark goggles but was attempting to protect his eyes from the arc by turning his face away.

Promoted

(Continued from Page 1)

night operations in Bldgs. 19-1, 19-2, 19-3 and 27, it is announced by R. M. Hartigan, superintendent of the Division. Mr. Hale is an Apprentice School graduate, completing the machinist-toolmaker course in 1922. He served as a toolmaker until 1926 when he was placed on planning work. He continued in this work until his present assignment. Mr. and Mrs. Hale and a daughter reside at 3812 South Anthony Boulevard.

Lockheed Orders $250,000 Worth Of Aircraft Instruments

An order for more than a quarter-million dollars worth of d-c Selsyn aircraft instruments has been placed with the General Electric Company, by the Lockheed Aircraft Corporation, Burbank, California. These instruments indicate engine condition as well as position of landing gear and flaps through the use of the d-c self-synchronous motor which was especially developed by General Electric for remote indication on aircraft. The instruments will be used on the Lockheed P-322 Interceptor Planes.

AROUND THE CLOCK WITH G-E

1940 has shown a decided trend on the part of the American housewife towards the purchase of an electric range. A recent survey of several hundred housewives — who own ranges, as to the reason for their preference for an electric range, showed that cleanliness was first in the importance of its appeal. When the same housewives were questioned as to what quality of the range appealed most after they had used it—the answer was again cleanliness, showing an electric range delivers what it promises.

Cleanliness with electric cookery means no messy, greasy, unsightly range, no soot, no smoke, odors of burning fuel, clean walls and ceilings free from a coating of greasy film difficult to wash.

The exclusive G-E, no stain vent located at the back of the range keeps the walls from becoming streaked and soiled by oven vapors. Hot vapors from the oven are cooled and condensed to moisture in this vent and dropped to the drip tray where they are easily wiped off.

Latest In Toaster And Coffee Maker Are On Display

Popular Appliances At Employees Store Have Many New Features

The first fully automatic coffee maker as well as a new fully automatic toaster that will keep the toast warm after making has been stocked at the employees' store it is announced by R. E. Perkins, store manager.

The Coffee Maker

The Alnico magnet, an exclusive development of the General Electric research laboratory which has been successfully applied to such uses as radio loudspeakers with outstanding results, is the important key to the first fully automatic glass coffee maker, which was just recently announced by the G-E appliance and merchandise department, Bridgeport, Conn. The new appliance, which has been placed on the market immediately, represents concentrated study over a long period by G-E appliance engineers. Embodying all the features of existing glass coffee makers — clean glass bowls, fascinating operation, and ease in making good coffee—the new device eliminates certain disadvantages which have been experienced by a maker of coffee. Chief among these has been the necessity for keeping close watch on the appliance and turning it off at the exact moment when the water passed to the upper bowl, and the fact that small amounts of coffee could not be brewed without sacrificing strength and quality. The new automatic coffee maker also keeps the finished brew at a desirable temperature

Your Identification Badge Is Your G-E Passport — — Wear It

Safety Shoes Save Toes A Second Time

Do safety shoes pay? For an emphatic answer see Ralph Leonard, Bldg. 19-B. Recently Mr. Leonard was handling the casting, shown in the photograph, with a chain hoist. He had it approximately two feet from the floor when it fell and landed squarely on the toes of one foot. The casting bounced and then fell to the floor having struck the steel protecting cap of Mr. Leonard's safety shoes.

Says Mr. Leonard, who has been wearing safety shoes for eight years; "If I had not been wearing safety shoes, I would surely have lost several toes, including the great toe, and been a cripple the rest of my life because the casting fell edgewise on my foot. Am I glad that I have been wearing safety shoes?"

Six years ago while rolling a 650 pound cast iron bracket Mr. Leonard had another escape from injury due to the fact that he was wearing safety shoes. The casting rolled over the toes of one foot and in his own words "I didn't even feel it."

The picture of the shoe shows how well it withstood the blow from the casting.

Bring The Tropics To Bridgeport To Permit Test For G-E Radios

Problems Of Testing For Effects Of Climatic Conditions Are Solved

People who go to the tropics on business or pleasure usually need a shot in the arm first in order that they may better withstand the climatic conditions to which they are unaccustomed. The same thing is true of radios, and more of them are heading south every day, to Brazil, India, Africa, and other regions where heat and humidity are more than casual expressions.

With a growing export business in radio, accelerated in recent years by the drawing-together of North and South America and the great strides made in short-wave broadcasting General Electric's radio engineers have found it necessary to test—at Bridgeport where the receivers are made—both the performance of the complete assembly and the resistance of the component parts to extreme humid conditions, and to duplicate in Connecticut the climatic conditions of the hot countries in an accelerated and controlled manner.

To perform this job they have constructed a humidity chamber, a self-contained proving ground specially built of wood and inner-lined with copper sheathing. This affords resistance to the extreme condensation which takes place every 24 hours, for not only do the extreme tropical conditions have to be duplicated, but the whole lifetime experience of a radio has to be compressed into a short period. A series of lamps under water tanks provides humidity by the vaporization process. The lamps also generate the heat to maintain the temperature at approximately 100 degrees Fahrenheit. Humidity and temperature cycles are controlled by time clocks mounted outside the chamber, which is sealed hermetically against outside factors. Uniform "weather" conditions are maintained throughout the chamber by circulating fans, and shelves are mounted inside on which components and chassis undergoing test may be placed.

Conditions during the life test are extremely severe. From 10 A.M. of a tropical morning in Bridgeport until 4 P.M. water is evaporated from the tanks and approximately 97 per cent relative humidity is maintained at 100 to 110 degrees temperature. From 4 P.M. to 10 P.M. "night" falls, and the lamps are turned off, causing condensation to take place at 100 per cent relative humidity. The temperature drops to about 85 degrees. For two hours during this time power is automatically applied to the receiver, which operates as if it were in a home below the equator. This cycle is repeated twice in a 24-hour period, the test going on day and night without interruption until failures occur.

Last Word

(Continued from Page 2)

until the time for serving, even though it be hours later.

In one sense of the word, each of the new General Electric automatic toasters (model T76) that is finding its way to the public is "used" rather than "new", since it has toasted satisfactorily four slices of wheat bread before leaving the factory. As part of the factory test, these toast slices are checked for uniformity between the first and second pairs, as well as for browning distribution.

The new fully automatic toaster handles one or two slices equally well, affords a wide choice of browning, and is able, through a new control, to keep toast warm until needed.

The general construction of the toaster body follows the wrap-over design created for a previous model, finished in chromeplate with embossed side panels and base, control knobs, and lifting handles of mottled mahogany plastics. The design features are the result of studies conducted last year among visitors to the New York World's Fair. The six-foot cord set with molded rubber plug is brown to match the plastic trim.

The toast browning control of the new appliance has been radically changed in design to improve and simplify its operation. The graduations are extended over a longer scale, making for easier adjustment. It is now possible to change easily and conveniently the position of the control knob so that successive pairs of slices will have different degrees of browning.

Magnetic Device Makes Shower Curtain Behave

How often has the shower curtain on that combination tub and shower of yours blown the lid off your temper by winding damply around your legs—or by waving knee high in the faintest sort of breeze and letting the fine spray from the shower drizzle out to the bathroom floor? In other words, how often have you mouthed asterisks and asked heaven why that curtain couldn't stay put against the side of the bathtub?

Well, maybe heaven didn't hear you, but the Artcraft Waterproof Products Company of New York City did! This company has brought out a tiny inexpensive device called the Hold-Rite Magnetic Attachment, designed to keep your shower curtain tight against the side of the tub, no matter how wet it may get or what breeze—short of a cyclone—may come along. The device consists of a small, Alnico, rust-proofed, magnet with an attached clip. To make your curtain behave, you clip the magnet to the curtain's bottom and place it against the side of the tub. The magnet will cling to the ferrous material of which the bathtub is made, no matter how thick the porcelain or enamel which covers it, and thus hold your shower curtain in place.

The long life of the device is assured by the permanent Alnico magnet, which is an alloy of aluminum, nickel, cobalt and iron developed by the General Electric Company.

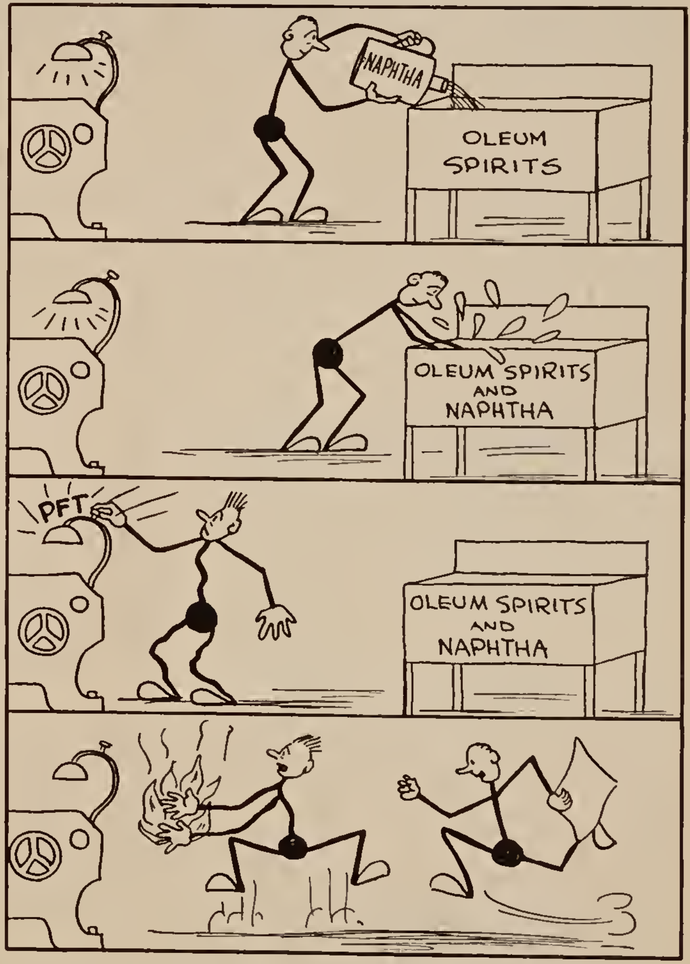
Forgetters

(Continued from Page 1)

Reasons for not appearing with badges do not vary to any great extent. Almost invariably it is a matter of having neglected to change the badge from one garment to another. There are of course instances where the badge has been lost but these are rare, and as a rule the badge is found and returned. One badge was recently mailed from Rome City where it had been lost by an employee while on a fishing trip.

With the importance of proper identification of all persons who enter our Works becoming greater each day serious consideration is being given the problem of "badge forgetters." It is pointed out that the identification system is for the mutual advantage of both employees and the Company, and that engaged as we are in the manufacture of materials for national defense it is the patriotic duty of every employee to wear his badge each and every day that he appears at work.

A Dangerous Mixture



By H. L. Smith, Safety Engineer

The accident illustrated above is similar to other burn accidents we have had due to improper or careless use of naptha for cleaning. An employee gets naptha on his hands then operates an electric switch. The normal operation of switch may cause sufficient arc to ignite the naphtha fumes.

The accident illustrated above occurred recently. This operator received second degree burns to both arms and would no doubt have been more seriously burned had not a fellow employee helped him extinguish the flames at considerable risk to himself.

This accident could have been avoided by using the proper cleaning solution which is provided for this purpose.

»» NEWS THROUGH THE PLANTS ««

Hoot Mon! At long last our Dear Sweet "Viewpointers" have thought up a comeback. I feel highly flattered that they wish to compare me with the Cream of their Crop! Now to ask ye, in all fairness, why not compare my record with that of their own Perry-Barthold machine, or let me select a man to match against their brainy wonder who is so "suggestive."

But how about the weeks and weeks we have waited to find out what they'd say? Is that the sign of a "dizzy dame," or is it an indication of a ponderous brain, weighing a deep question, and of necessity taking a long time to do it?

There is an element of time that we can't escape, and that's what I'd call the time between inception and achievement. How do you like those big words, girls? If ye don't catch on, here's as example.

It has taken an average of ten or twelve years between the time an invention is made and the day the practical result is ready for the public. Years of designing, planning, promoting and laboring are required, and they are not easy years by any means.

The time between a good suggestion and its acceptance and reward is often long too.

Naturally, no one wants these delays. No inventor wants to wait ten years to see his invention in production, and no suggestor wants to wait long to see his dream materialize.

Well here's one time delay that you can avoid, the time between the minute you get a good idea and the one when you fill out a suggestion blank. Don't let the old man with the scythe slip in between these two.

If you do, you are showing a disregard for time. That reminds me of a story. Don't stop me if you've heard this one:

A negro boy was driving a hog along the road.

"Where are you going with that hog?" a man asked.

"Atlanta, to sell it."

"Why don't you sell it right here?"

"Well, boss, they'd only give me three dollars here, but I can get five dollars in Atlanta."

"But Atlanta is a long ways off. How long will it take you to get there?"

"Oh, a week, I guess."

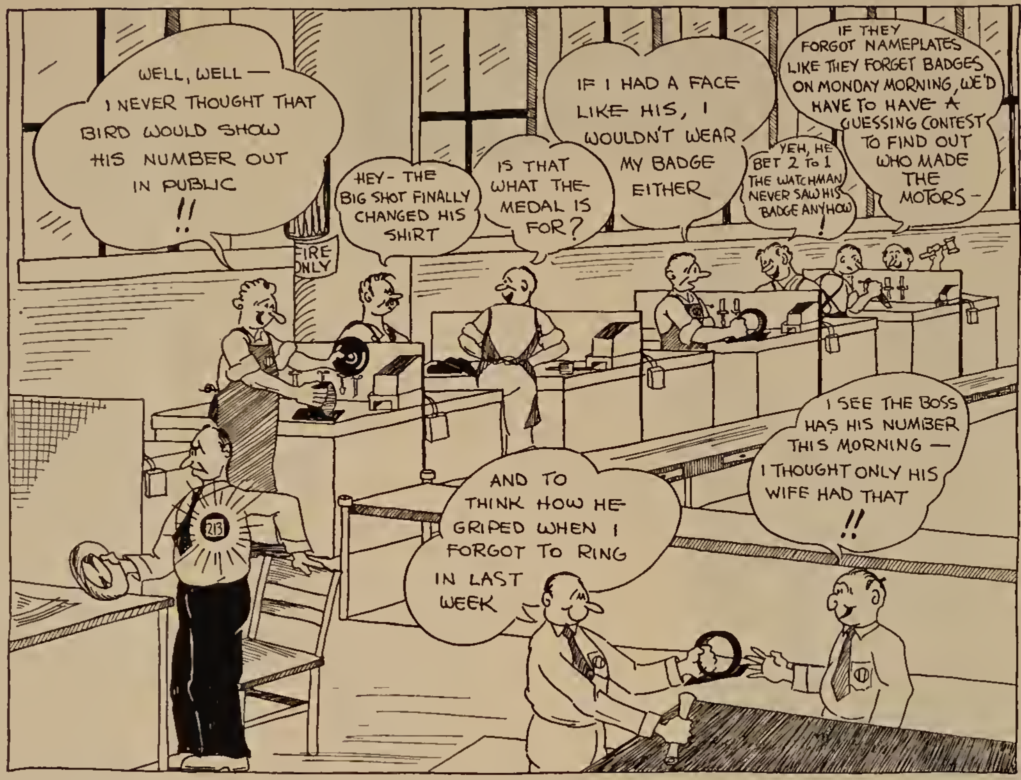
"A whole week! And for only two dollars! Isn't that a waste of time?"

"Well, boss, what's time to a hawg, anyway."

Helen Biddle of Bldg. 17-2 is too modest to tell the girls what she pays for her sweaters but she has a cute way of leaving the price tags on, for the benefit of anyone who wants to know.

Ray Kierspe, Bldg. 16-3, is still handling tickets for "Professor Pepp" given by G-E Apprentice Association on Nov. 13 and 14. Anyone interested, please see Ray immediately.

Monday Morning Blues . . . . by Bob Parker



WELL, WELL — I NEVER THOUGHT THAT BIRD WOULD SHOW HIS NUMBER OUT IN PUBLIC !!
HEY- THE BIG SHOT FINALLY CHANGED HIS SHIRT
IS THAT WHAT THE MEDAL IS FOR?
IF I HAD A FACE LIKE HIS, I WOULDN'T WEAR MY BADGE EITHER
YEH, HE BET 2 To 1 THE WATCHMAN NEVER SAW HIS BADGE ANYHOW !
IF THEY FORGOT NAMEPLATES LIKE THEY FORGET BADGES ON MONDAY MORNING, WE'D HAVE TO HAVE A GUESSING CONTEST TO FIND OUT WHO MADE THE MOTORS -
FIRE ONLY
213
AND TO THINK HOW HE GRIPED WHEN I FORGOT TO RING IN LAST WEEK
I SEE THE BOSS HAS HIS NUMBER THIS MORNING — I THOUGHT ONLY HIS WIFE HAD THAT !!

Punch Press 19-5

By Slug

At the time this is being written politics have reached a white heat and many a debate is being held in the cafeteria—although we don't believe many votes are being changed. The question is out of my line so "Shorty" Shultz has been taking the floor on my behalf. . . . So far Harold James has refused my 2 to 1 bet, which by the time this is printed, will probably be a good thing for me. . . . How come John Figley wears one button until lunch and then changes. We hear Clarence Scheiman didn't do so good when he tried it. . . . Bill Tennison and George Allen, whose names were drawn early for the draft are being counted upon to win a lot of honors in the army, as representatives of Bldg. 19-5. . . . Floyd Jacobs is busy decorating his home, but still has time to try to reform Everett Lindeman. . . . Heinie Kammer remains his usual charming self. We can't even get him mad enough to give us something to write about. . . . Dick Dornbush is confined by illness and would welcome a visit from the gang. We're pulling for a speedy recovery Dick, and we'll be seeing you.

Marion Patty's, Bldg. 2-1, precipitant action into Sylvan Lake and "Sap" Quinn's (17-1) explorable search to find a domicile that he might call "Home Sweet Home" is indicative of the explicable good fellowship encountered and enjoyed at Marion's summer palace at Rome City. These semi-annual gatherings are looked forward to by the boys in Bldgs. 17-1 and 2-1, and are as pleasing to the palates as well as the fun loving nature of those who attend.

Herman Hake, Bldg. 4-3, has been endeavoring to convert his Kitchen Setter dog into a retriever of game, but has given up in despair. He tells us that every time he takes his dog afield and releases him, he makes a bee line for the nearest farm house and perches himself upon the kitchen steps.

Geo. Kaade, Bldg. 17-1, blue rock blaster stepped into position at a Conservation Club shoot last Sunday, and called "pull". Away went his bird, boom went his gun, and wow went George as he lit on his haunches six feet away. With battered determination, George arose out of the dust to show the boys that he still knew how.

Buck Adams, Bldg. 4-3, tells us that we will have to retract the statement made recently in the WORKS NEWS regarding the ability of his wife to handle the family jaloppy expertly. The reason, well the other evening while out with the car, she proceeded to cave in beautifully the front end of said car much to Buck's disgust.

Honoring Frank W. Martin, Julia Martin, Bldg. 4-3, entertained with a surprise birthday dinner Saturday evening at their cottage at Silver Lake, Ind. The table was centered with a large birthday cake and baby mums. Frank was the recipient of many lovely gifts.

Alta Rybolt, Bldg. 4-3, has a real Believe It or Not. She just ties her goats down in the woods and when she can't hear them anymore goes down to see, and there they are hung up all ready for butchering. Some system.

George Clancy, Bldg. 19-3, must have run short of lumber while building his cottage on Jimerson Creek. At least he was seen carrying a box on his shoulders large enough to make a small room. Maybe that's what it was a portable addition.

Deaths

Adella Mary Benanti, 28, died suddenly at her home 827 Kinnaird Avenue on Saturday evening. Death followed a heart attack. Miss Benanti had been an employee for the past eleven years and in recent years was engaged in the office of J. H. Gargett. She was very active in the Elex Club and served as a contact girl for six years. Funeral services were held Tuesday morning at the residence and at the St. Paul's Catholic church. Burial was in the Catholic cemetery.

Slips And Chips

By Sir Vis, 4-4

"Egad! Meat by another name would have tasted just as sweet," quoth Edison R Martin on his arrival home. It seems that these two bird dogs Ed has been sheltering dug out of their kennel and killed seven of the neighbors chickens. Would a well-fed dog do such a trick? . . . Yes Doug, it is true. The best way to find something is to look where it is. Douglas Blessing pushed a loaded hand truck into the tool coop just before going home. The next morning he hunted for the truck up one aisle and down another, muttering he would like to get hold of the thief . . . Don't be alarmed at the appearance of a shingle "Watch and Jewelry Repairing" on Bill Owen's bench. He seems to have a knack for that sort of thing—particularly with ladies' watches. . . . Yes we have read about people standing on limbs and sawing them off, but we never expected to see one. Well, Forest Gei decided to remove his dock while up the lake, and not wanting to get his feet wet he stood on the dock and knocked out the supports. Betcha the water was cold . . . Worry, worry, worry. Don Niles worried and wondered how he could bush up a 0.384 inch hold so that he could screw in a ½ inch bolt. After deep thought he decided to scale the hold and remarked: "I'll just drill it out."

Ruth Lauer, Bldg. 4-3, was so dazed last Saturday afternoon when she saw the news reporter downtown that really she did not know who he was.

Marjorie Macke, Bldg. 4-3, wasn't wearing new shoes, nor was the floor slippery. So what other excuse could there be for falling down in the Employees Store.

The girls from Bldg. 4-2 are wondering where Sue Cameron and Irene Meyers learned the dance they did at the Elex party on Tuesday. How about teaching it to the rest of us?

We now know that cold weather is on the run as Harry Parker, Bldg. 4-3, now comes to work wearing his felt derby.

Uncle McWells Says

If we survive the rigors of editorial inspection and approval, the Works News will be henceforth graced by the observations and comments of Aunt Bella's counterpart, Uncle McWell, who observes that a lot of us are like the temperamental tattoo artist — can't work on an empty stomach!

For those of you who have undoubtedly been involved in arguments, especially during these tumultous days of political differences, we submit the following verse which we once read somewhere. Its implication is well taken—

"In moments controversial
My perception is rather fine,
I always see both points of view,
The one that's wrong—and mine!"

STRICTLY STUFF—The amazing speed at which George Murray of the Production Department travels during his day's work is, in itself, a serious charge against the waste labor thesis. If his excess energy could be converted into electricity and wired into our homes, we could all save enough money on electricity bills to purchase G-E Sun Lamps and spend our winter evenings in tropical comfort. . . . Which reminds us that "Toppy" Moffett, one of the Engineering Department's more rabid golfers, has just returned from a vacation cruise in southern waters and is not one shade more tanned! It's things like this which make it tough on the "See the Sunny South" travel agency boys. . . . Vaudeville and Minstrelsy are the poorer for never having shared the talents of the Planning Section's own Elmer Wagner. His fund of songs (Vintage—The Gay Nineties) ranges from the rollicking, "How's Everything Down in Dixie?", done with gestures, to the prohibition era favorite, "You Can Have Everything But the Key to My Cellar Door." His compatriot, Bill Meyers, is the only other man yet found who can accompany Elmer in his repertoire—and this in a superbly "vibrattissimo" tenor, also with gestures. . . . And while on the subject of musical talent, let's not forget "The Hi-Diddle Diddle Boys, on a B-Flat Fiddle," Frank (Pappy) Archbold and Boyd (You Said It) Fisher. After all, music lovers, tone isn't everything on a violin.

Nomination for one of the nicest dispositions that we've encountered in a lady—Jeanette Van Buskirk of the Production Department. Her infectious and unfailing good humor is an oasis for the blues.

A feature of this column (until the draft blows in) will be the personal answers given by Uncle McWell to all questions relating to any of the various fields of science, agriculture, world-affairs, romance, the "theatah" and what have you, that might be troubling our readers. Naturally there is no doubt in our mind as to our ability to answer your queries, inasmuch as we are the seventh son of a seventh son, born under the sign of Capricorn, when Jupiter was in the House of Venus—and quite a fine time he was having too, until her husband came home. But enough of this digressing. Send your envelopes to the WORKS NEWS, c/o Uncle McWell, Bldg. 18-3.

Uncle (Now you see it—
Now you don't) McWell

Their Last Words Dept.—"If I need you, Miss Blue, give me a buzz."

Your Identification Badge Is Your G-E Passport — Wear It

NEWS THROUGH THE PLANTS

Bldg. 4-4 Rantings

To anyone wondering at Walter Kritzeman's sudden lack of eyebrows, here is the answer. He joined Andy Gump's laugh club by lighting a loaded cigarette given him by one of his so-called friends.

Virgil Alderson, who recently attended the Barn Dance at Cincinnati, says the reason he didn't talk over the radio was that he didn't let them know he was coming; he wanted to surprise them.

Earl Griswold has taken up the boyhood art of ear wiggling. Some of the new girls in the winding section seem to enjoy it. Just a suggestion, Earl, why not use a little color-back and come to work in rompers—then you could really click.

Sam (Fire Chief) Hanes can really grind this here now—eating tobacco. Sam keeps everything in top shape so that we do not need to worry about fires. We have a good record so far—nice going, Sam.

August Summit really keeps his Pontiac looking like a new one. Gus is one of those quiet easy going fellows that likes to keep things looking their best.

While at the G-E Club Friday, Angie Filius was bowling and was heard to say, "Oh, there comes Harold, I can't do a thing now." Why Harold!

Anyone wanting to learn how to become embarrassed get in touch with Angie or Helen on the second shift.

What would we do without Bob (Smart-as-a-whip) Crosley's crooning on Bldg. 4-4 at night. By the way, Bob, we would like to know more about that bee sting on your neck.

Sophia (Fica) Bodigan calls her car "My Problem Child." It does get balky in some of the oddest places doesn't it, Fica?

Lulu Kline is in the habit of making trips to town without making the purchase she intended to make. We wonder if her mind could be on home furnishings.

Zella Sheehan thinks the way to a man's heart is through his stomach or why is she attending these aluminum demonstrations.

Cecil Shuler is wearing a new diamond.

Hilda Scott has found a new dish cloth. Anyone wanting to give something a little different for Christmas see Hilda.

Bernell French wouldn't miss riding to work as she makes wishes on all the grey horses she sees.

Russell Waters and Harry Karr, Bldg. 26-2 spent six hours on the lake - without getting a nibble. Harry thinks he knows why, only this cat never had a chance to cross their path.

Mildred Schoolcraft, Bldg. 4-3, spent the weekend trying to get out of the state of Michigan. Really, Mildred, we never knew you could get lost so easily.

It is interesting to note that we in Bldg. 4-3 have some exact counterparts of some of the leading characters in a few of our famous comic strips. Such as "Hap Hopper" Collins, "Judge Puffle" Brandenburger, "Superman" Gehl, "Dagwood" Pence, "Tarzan" Doehrman, "Snoff" Didier, "Old Timer" Adams, and "Pete the Tramp" Cutler.

Young Wife: "What is this ticket, darling?"

Hubby: "Only a pawn ticket."

Young Wife: "Why didn't you get two, then we could both go?"

Thisa And Thata — 19-5

If Dorothy Dunifon would explain why she doesn't want to be called "Toots" they might stop calling her that, and what's this we hear about you wearing "Toots?" . . . Irene Benner, formerly of white-armature has a new baby girl, congratulations Irene! . . . Connie Zollinger had a time with the Halloween pranksters, we're sure they didn't get a good look or they wouldn't have called you what they did . . . Girls, here is a good chance for you, "Silent George" is looking for a woman with a good job, he thinks he prefers that to the army!" . . . Ruth Reed may not be so funny just to look at her but when she got her heavy underwear and night shirt on she took the two dollars.

The Hunting and Fishing Club of the Bldg. 4-3 Inspection Department met recently and selected officers for the coming year, and distributed honors for notable successes afield and stream. Harold "Rabbit Slayer" Hart was chosen President. Earl "Snipe Hunter" Souers, Vice-President, and Ora "Moose" Goff, Secretary and Treasurer. Honors were accorded Jim Workman for making the largest catch of dog fish, Coony Hohnholz for bagging enough raccoon to make a fur coat. Kenny Betts took honors for chipmunks, and Louie "XIV" Hickernell won the gar fish trophy.

Congratulations to Mr. and Mrs. Bob Houser. They are the proud parents of a baby girl, Joyce Ellen, born Monday, November 4th. Bob Houser works in Bldg. 4-3 and Mrs. Houser will be remembered as Elizabeth Spaulding, a former G-E employee.

Congratulations are in order for Lena Wehr, Bldg. 8-2. She has survived another year to celebrate her twenty-first birthday.

We wonder just how "Slim" Herman Kuhn of Bldg. 19-3 was able to fold up his legs enough to ride a tricycle in the Halloween parade at Decatur. We would like to have seen that.

19-4 Spot Jottings

A cute little red headed boy was born to Mr. and Mrs. Glenn Bowers. Congratulations . . . Herb Braun cracked his great toe the other Saturday when he went into the back yard to repair some Halloween damage. Herb had on a pair of comfy house slippers and stumbled over a stump. We sympathize with Herb but think he had better ask Santa for a pair of those good old safety shoes. . . . Louie Sherer says that with Halloween and the election over we have nothing to worry about with the exception of death and taxes. The Test gang is cooking up a party for Saturday at Alva Powell's cottage up the river. We understand a pig, complete with all accessories is to be barbecued. We'll give you the lurid details later.

Ever since Helen Weinert of Bldg. 6-3 (better known as the Kendallville Kid) retreated to the country she has encountered all kinds of trouble. Her latest escapade included a barn dance two weeks ago and she came away with a "barked shin." Those farm boys kick a tough dance don't they, Helen?

Clarence Burke of Bldg. 6-3—a Notre Dame rooter from 'way back —invaded foreign territory last Saturday and certainly paid the price. Clarence, who from experience is familiar with the seating arrangements at South Bend, neglected to find out what side he was inhabiting Saturday at the Northwestern-Minnesota tussle. After Northwestern scored Clarence Clarence raised up to give his usual "Commanche yell" and an expertly and undoubtedly experienced pop bottle thrower let him have one across the eye. The only thing that gripes Burke is the fact that if it had happened a week sooner it would have saved him from buying a Halloween false face.

There are a few vacation stories still forthcoming. Among the missing is Carl Borchert's version of how his wife came to take an unexpected swim in Crooked lake.

General Service Family To Hold Annual Get-Together

The annual get-together family party of the General Service Division will be held on Friday evening, November 15, at the G-E Club it is announced by E. J. O'Neill, chairman in charge of arrangements. Probably no other Division of the Fort Wayne Works has so diligently furthered an annual gathering of employees and members of their families as the General Service Division and the popularity of the affair each year is attested by the wholehearted attendance.

As in former years a special program will be conducted for the youngsters while other entertainment is in progress for the grown-ups. Following a series of games a special vaudeville program will he presented.

Serving with Mr. O'Neill on the arrangement program are Florence Hayzlett, Edna Haueisen, Margaret Suelzer, Don Thompson, Roger Pierson, Walter Muhlenbruck and Ervin Huth.

COMING EVENTS

G-E CLUB FREE MOVIES at 2 and 4 o'clock, Sunday, November 17. Admission by membership card.

SUPERVISORS CLUB turkey dinner and nomination of officers in Bldg. 16-2 on Wednesday, November 13.

G-E CLUB DANCE on Saturday evening, November 9.

G-E WORLD WAR VETERANS "feather party" this evening starting at 7:45 at the G-E Club.

GENERAL SERVICE FAMILY PARTY at the G-E Club on Friday evening, November 15.

A weiner and marshmallow roast was enjoyed by the night shift of Bldg. 17-2 at the home of Mr. and Mrs. Claude Gill, Saturday evening. Attendance prizes were won by Lola McCague and Claude Gill. Dorothy Bentz and Bertha Witham assisted Mr. and Mrs. Gill. Others present were Grace May, Mr. and Mrs. Bob Repine, Dottie Forst, Dorothy Schmidt, Paul Hazelett, Eileen Doenges, Frances McCague, Walter Hart, Charlie Rice, Mary Jane Redding, Neva DeWitte, Helen Shaffer, Lois Heck, Bob Robertson, Esther Griebel, Ray Breimeier, Mr. and Mrs. Rolland Miller, Slug and Blanche Griffin Maude Goodrich, Betty Ann Gould, Aug and Stella Nichrash, Ada Broyles, Mr. and Mrs. Oscar Rietdorf, Irene Witham, Bob Ziegler, Dan Daniels, Herman Tarbeck, Ruth Greim, Bob Zollinger, Henry Wiegman, Grace Von Schmitton, Ruth Seifert, Mary Hoffman, Marcella Weise, Mr. and Mrs. Ralph Hoke, Jap Voirol and fiancee, Helen Schoppman. Games were played and an enjoyable evening was had by all.

The Wire Department members express their thanks to Glenn Greek, Bldg. 8-2, for the delicious moose dinner and the show following. It was certainly an enjoyable evening. Art Gardt gave an exhibition which should land him a joh with the new ladder unit of the fire department. Phil Ormiston was sure keeping that water cooler singing. Bill Glenn had to sit between the girls for protection? ? ? It was a dirty trick for the girls to eat ice cream after promising you their pumpkin pie, Bill. Ray Kierspe was noticeable by his absence.

"Do you know what one little toe said to the other little toe?"

"No, what?"

"Don't look now, but I think we are being followed by a couple of heels!",

---

Policeman: "How did you get up that tree?"

Tramp: "Ain't you got no sense? I sat on it when it was an acorn."

Credit Union Facts

by T. L. WALLACE

Once each month the Credit Union posts in its office a statement which indicates how the financial structure of the organization stands up to the time the statement was prepared.

In this statement, which, by the way, is posted for inspection by all the members, you can see in the shares items just how much the Credit Union is helping its members save. The loan items indicate a measure of credit extended.

One particular thing to remember in order to have money to loan, a credit union must have that much money in the shares account. So the Credit Union, it will be noted, is a thrift organization in principle and also a loan organization. These two factors are the basis of the Credit Union.

The Credit Union first of all wishes to promote thrift. Because a member has to borrow money this does not mean he is improvident. There are so many things which enter into the necessity for borrowing that no one can rest assured that while he is a saver today he may not have to be a borrower tomorrow. No one knows when they may be turned from a saver to a borrower.

For these two purposes the Credit Union was formed. Those who can continue to save will do so, because thrift is inherent to a marked degree in most people. On the other hand if one has to make a loan, while paying back the loan the instinct of thrift should still prevail and instead of attempting to pay back the loan in a very short space of time the recommendation is to take a while longer but still put some money in your savings account.

Don't forget while you are in the Credit Union Office to look at the monthly statement, it is the Treasurer's report to you. Have him explain those points you do not immediately grasp.

When Irene Myers was recently approached to serve on the newly formed Membership Relations Committee her words were "I'll be glad to. I'm for the Credit Union one hundred per cent." Thanks Irene.

Famous last words: "Rush into it girls", Virginia Ramsey, Bldg. 17-2. "That's my uncle", Dorothy Beerman, Bldg. 17-2. "I wish it was Friday", Elsie Shannon, Bldg. 17-2.

Help Protect — — Wear Your Identification Badge

ON - - the Alleys

A very few twists and twirls around the bowling circuit: Casselman of the Transformer League was certainly in a red hot hurry to get home last Friday—to speed up pin setting production he obliged by downing the grand count of 94 maples. . . . Arietta Coe could never qualify for a safe-cracker's assistant—forgetting her locker keys the other night she asked for lock busting volunteers, but was so nervous when Frank Matthews "Jimmy Valentined" the locker for her that she pointed out the wrong one. . . . Schrantz, G-E Club Major League, was hotter than a four alarm fire, Wednesday, as he rolled a new league single game count of 249 and a new high three game score of 684. . . . The Elex Afternoon League gals enjoyed a pre-election day dinner at the Berghoff Gardens Tuesday afternoon—political talk was banned, hence a nice peaceful time was had by all. . . . No wonder there's so many low league scores this year—Mildred Miller, retained by club officials, continues to dish out the beautiful sympathy that the boys really go for.

DECATUR LEAGUE

Team	Won	Lost	Pct.
Office	12	6	.670
Packers	11	7	.610
Bearings	10	8	.555
Maintenance	10	8	.555
Rotors	10	8	.555
Stators	10	8	.555
Flanges	8	7	.530
Tool Room	8	7	.530
Testers	7	8	.465
Production	8	10	.445
Shafts	8	10	.445
Shells	8	10	.445

The big upset of the G-E Bowling league happened last week when the Production team defeated the league leading Office team two games. The winners compiled a total of 2578 to their opponents 2449. The Packers came within one game of first place, when they defeated the Bearings two games. The Bearings scored 2362 points to their conquerors 2359. The Rotor team bettered their position in the league when their 2338 total was good for a two game win over the oppositions 2198 score. Maintenance moved into a three-way tie for third place by defeating the Testers two games with the total pins being 2459 to 2182. The Shafts 21 pin lead was good for two games when they defeated the Tool Room from the Shells by forfeit.

Many of the G-E keglers came close to double century counts, but only a few succeeded with Charles Weber leading the way with a 215 count. Others scoring with 200 scores were: Geo. Auer, 213; Edgar Steele, 206; Charles Langston, 204.

REFRIGERATION BOWLING

By Bob Ringle

A lot of wood was tossed around at the Club last Tuesday night. Blomenberg and Schwartz were both sizzling. Blomenberg had a total of 666, the games being 226-248-192, while Schwartz had a total of 646, the games being 190-253-203. They just didn't tap at the sacred portals of the elusive 200, they almost knocked them down. Cunningham came through a 216 count for a total of 588. Geller also stepped over the boundary for a 202.

Chess—Checkers

All G-E employees interested in playing chess or checkers are invited to attend the meeting of the G-E Chess and Checker Club next Tuesday evening, November 12, in the property room at the G-E Club. A special invitation is issued to retired employees interested in these two games.

The lights went out and the Club was in total darkness, except for a few flickering matches, for about 10 minutes, Tuesday night. After the lights came back on and the balls started rolling again, some were heard to say that it didn't do much good to have a rest, the pins still wouldn't fall. A few bright sayings heard during the time the lights were out, were, "Get your hands off my wife," and "Set 'em up on No. 1."

The old iron and junk man was trundling his barrow along a narrow English road. Behind him the impatient driver of a motor car was hooting and tooting impatiently for room to pass.

The old-iron merchant set his barrow down in the middle of the road, turned around and made a speculative survey of the car.

"Orl right, gov'nor," he said, "I'll call round for that tomorrow. I'm full up now!"

Kind Lady: "What are you crying for, little man? What's your name? Where do you live?"

Small Boy: "That's what's the matter. I don't know my name or where I live. We moved yesterday and mother married again today."

IN THE ROUGH

By WALTER SUNIER

By the time this goes to press the election will have faded into oblivion but at this writing we are so nervous from having twenty cents depending on the outcome that it is impossible to sit still. The dratted race has become so hot that one can not get away from it even on the golf course.

Golf did take a little respite last week when some of the boys spent part of their time hunting at Brookwood. At least eight or ten persons picked mushrooms. Les Didier did the best of all by getting out at six a.m. and filling a big basket half full. He completed the morning by playing golf. We hope his golf was as good as the mushrooms because the latter were exceedingly good. We know this because he gave us a nice mess of them and were they ever delicious? There are mighty few sports that you can enjoy and at the same time pick up a delicious meal.

Last Saturday morning turned out so windy about 10:30 that it was a job to push up the hill on No. 17 at Brookwood. One felt like a guy of about 90 climbing a long stairway. We don't intend to poke fun at those about that age. Why should we? They are capable. Didn't they recently elect a 94-year-old soldier as commander-in-chief of the G. A. R.?

We were glad to note that the golf courses had prepared for Armistice Day. Each one already has eighteen flags up.

Speaking of Armistice Day, makes us think of Herschel Smith, the safety man. There's a boy as should take up golf. With his pair of shoulders and iron bound muscles, he would really be able to make a golf ball disappear into the azure.

Club Boxing Card On November 12

An opening amateur card of 10 classy bouts will be staged at the G-E Club, Tuesday, November 12, starting at 8:30 o'clock with Bob Burns, popular Fort Wayne welterweight battler scheduled to go five rounds with an "out-of-towner" in the feature fight of the evening.

Matchmaker Newport has been scouring the surrounding territory for some scrapper who will push Burns all the way, but most of the boys don't care for five-rounds. Burns has been training strenuously during the last few months and is rapidly approaching a form that will seriously trouble fellow welters in the approaching Golden Glove tourneys.

So far four bouts have been definitely lined up for the evening with Doc Griffin, winner of the Golden Gloves sportsmanship award taking on Bill Penner, welterweight, who has moved here from Bakersfield, California, and has looked especially good in workouts; Lester Smith, popular Grabill lightweight, fighting Dan Nestel of Churubusco; Spider Shock going against Lial Gresham, two flyweights who need no introduction to local fans, and Tommy Taylor, Fort Wayne's Golden Glove flyweight champion, battling James Mott of Fort Recovery, Ohio.

Special G-E employee prices will prevail for this show but tickets must be purchased at the G-E Club before 6 o'clock Tuesday, and after that time all prices will be hiked to the regular sum.

Winter Street Strong Contender In Volley League

Upset Defending Champions Small Motor Factory And Main Office Winners

Winter Street, by convincingly clean sweeping their series with Small Motor Drafting, defending champions—a feat that had not been accomplished for five years—definitely established themselves as a strong contender for the 1940 G-E Inter-department volleyball title. This three-game victory, however, did not give Winter Street an undisputed hold on first place, as Main Office and Small Motor Factory both chalked up triple wins last week to maintain a share of the league lead.

With Macy's bullet-like spikes again pacing the attack the Refrigeration lads showed no respect whatsoever for the titleholders, running up the game winning fifteen counters in short order while holding Drafting to three points in two of the games and eight in the other.

Main Office continued to maintain their iron clad defense, limiting the youthful Apprentice to a three-game total of only 12 points, while Jack Fox and Kies combined their smart playing with the powerful blasts of Tom Fox and (?) to chalk up the necessary winning markers.

With their three powerful spikers, Kestner, Cowan, and Dent, taking turns in punishing the ball, Small Motor Factory trounced Small Motor Standards 15-6, 15-4, 15-9 to stay in the championship running. Although the Standards were not quite up to par, being without the services of their captain, Johnson, the Factory still displayed enough attack and defense that marks them as a threat that will grow more dangerous as the season progresses.

Small Motor Production, who last week had to forfeit because of lack of players, seems to have picked up 6 volleyball diamonds in the rough, as in the other games on last week's card, they ran roughshod over Apparatus-Transformer 15-2, 15-4, 15-4. Production, with Oman and O'Brien looking especially good, need only a little more practice together and then will be ready to give the league's best all it can handle.

GENERAL ELECTRIC NEWS
FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, NOVEMBER 15, 1940 Number 39

RECEIVED
NOV 15 1940
PUBLIC LIBRARY
FORT WAYNE & ALLEN CO.
IND.

• • • A Simple Idea? — It Paid $130 • • •

Paul Miser, Bldg. 27-1, explains the application of his idea to R. M. Hartigan, superintendent of the Motor Generator and Switchgear Division and L. D. Platt, foreman of tool supply.

That comparatively simple ideas may prove to be well worth-while suggestions is proven by the recent experience of Paul Miser, Bldg. 27-1, who was paid a $130 award this week through the Works suggestion system. Paul, as a welder, uses asbestos gloves, and he became concerned one day in the fact that the gloves wore out in a very short time. This led to a consideration of some means of prolonging the life of the gloves, and the thought occurred that a coating of Glyptol might serve this end.

Paul tried the Glyptol coating over a period of sufficient length to prove that his idea was practical and then reported through the suggestion system. The award of $130 is the second award Paul has received this year, $25.00 having been awarded previously.

New G-E Employees Will Be Asked To Declare Themselves

New employees are being asked to sign statements to the effect that they are not members of the Communist Party or of the German-American Bund. This condition of employment is in accordance with the terms of the Selective Training and Service Act of 1940 in which the Congress of the United States specifically says:

"It is the expressed policy of The Congress that whenever a vacancy is caused in the employment rolls of any business or industry by reason of induction into the service of the United States of an employee pursuant to the provisions of this Act such vacancy shall not be filled by any person who is a member of the Communist Party or the German-American Bund."

Recognizing the fact that it is difficult to forecast how many employees will be inducted into service or when such inductance will take place, the Company is asking all new employees to declare themselves on these two questions. The same statement calls to their attention the fact that they are temporary employees and may be released upon the return of employees whom they have replaced.

The order becomes effective immediately and applies in all Works and offices of the Company.

Fifty-Seven Year Service Record Ended

Company's Oldest Employee In Point of Service Retires

Back in 1883, the year the Brooklyn Bridge was opened and Jesse James was killed, when Chester A. Arthur was president of the United States, a young ambitious lad entered the employ of the Brush Electric Company of Cleveland, Ohio. His name is Charles J. Leephart.

In 1889, the Brush Electric Company was purchased by the Thomson-Houston Electric Company, which in 1892 merged with Edison General Electric to form the present General Electric Company. So this ambitious young man became

G-E Club Dance

There will be a dance at the G-E Club Saturday starting at 9 o'clock and continuing until 12. Admission is 20 cents before 9 o'clock Saturday and 30 cents afterward.

N.E.M.A. Elects Earl O. Shreve As Its President

G-E Vice President In Charge Of Apparatus Sales Is Honored

E. O. Shreve, vice president of the General Electric Company in charge of apparatus sales, newly elected president of the National Electrical Manufacturers Association, was born in Mapleton, Iowa, on October 21, 1881. His election to the Nema office came on his birthday.

He attended high school at Charter Oak, Iowa, and worked during vacations as telegraph operator on the Chicago, Milwaukee and St. Paul Railroad. In 1897, after graduating from high school, he continued with the railroad, holding

In 1900, Mr. Shreve matriculated at Iowa State College and was graduated in 1904 with a B. S. in E. E. He immediately joined General Electric as a "Test" man, or student engineer, and later was sent to the

(Continued on Page 2)

Firemen To Hold Feather Party

A "feather party" with turkeys as the chief prizes will be held by the Volunteer Fire Department on Monday evening, November 18, at the G-E Club. All G-E employees and their friends are invited to attend the affair which will start at 7:45 p.m.

Community Chest Support Appreciated

City Chairman Expresses Thanks For Help Given By Works Employees

Appreciation of the co-operation of Fort Wayne Works employees, who through their contributions have greatly aided the operation of the "Community Chest" by their contributions, is voiced by Donnelly P. McDonald, chairman of the 1940 campaign for funds, in a statement issued this week. Mr. McDonald states:

"As chairman of the nineteenth annual Fort Wayne Community Chest campaign I wish to express my appreciation of the contributions made to this great humanitarian organization by the people of the Fort Wayne Works of the General Electric Company.

"There is, happily, a growing appreciation of the spirit reflected by the Community Chest. For this reason hundreds of your fellow citi-

(Continued on Page 2)

Safety Supervisor Visits Local Works

George E. Sanford, Schenectady, in charge of the Company's safety activities was a visitor at the Fort Wayne Works this week. Mr. Sanford attended the regular Works safety meeting Wednesday, and gave an interesting outline of activities in his branch of work. He stressed in particular the great progress made by the Company during the past twenty-three years and pointed out that in 1917 the all-works accident frequency stood at 45.20 whereas today it stands at 4.71.

It was revealed at the meeting that the Fort Wayne Works has made reductions in accident frequency of approximately the same ratio, and that during the greater portion of the period between 1917 and 1940 the accident frequency rate for our Works has been better than the all-Works average.

G-E Club Band President Retires

Wm. H. Hatfield

William H. (Bill) Hatfield, Bldg. 4-3, was honored with a dinner in Bldg. 16-2 recently by his co-workers in view of his retirement from active service. Approximately twenty-five friends from Bldg. 4-3 were present, as well as a number of members of the G-E Club Band of which Bill is now president. Mr. Hatfield's son, Robert, who works in our General Service Department was also present.

The affair was a complete surprise to Bill until the minute he opened the door and was greeted by the G-E Club Band playing

(Continued on Page 2)

Thanksgiving Bulletin

Announcement has been made by the Governor of Indiana that his proclamation will call for the observauce of Thanksgiving Day on Thursday, November 21st. Fort Wayne and Decatur Works will close all day on this date.

Clock cards, time vouchers, etc., for the 46th week should be completed and forwarded to the Payroll Department one working day earlier than the normal schedule.

The plant will resume full operation starting with the first shift on Friday, November 22nd, and both hourly rated and salaried employees will receive their pay as usual on that day.

Volume 24 Friday. November 15, 1940 Number 39

• "Little Things"

The career of F. W. Woolworth, founder of the 5c and 10c store, shows the importance of "little things."

From small 5c and 10c sales, Woolworth built the largest chain store business in the world—the "Woolworth" chain of thousands of stores.

Attention to little things, always net *big* results. In fact, it is impossible to conclude any undertaking successfully whether it be a building, a machine, or a system of chain stores without paying attention to "little things."

And this is true of jobs, too.

To be able to hold a *big* job and be able to do *big* things—we must first learn how to do "little" things well and do justice to small jobs.

Being able to do small tasks well and attend to little details—avoiding "little" mistakes, as well as big ones—following "minor" instructions as accurately as important ones—are the foundation of all success—whether it be success in a large undertaking—or success on our daily jobs—*Armco-Operator.*

• They Trained

THEY looked ahead, far ahead.

THEY took advantage of every opportunity to learn how to improve their work and to make themselves more valuable to their employers.

THEY learned how to like their work and to take a genuine personal interest in it, with the result that they made a good job of every task assigned to them.

THEY worked for their employers' interests by preventing accidents and waste and by helping to keep production costs down wherever possible.

THEY understood how important cooperation is and trained themselves to work well with others.

THEY are the business and industrial leaders of today who started at the bottom of the ladder twenty-five years ago without any pull but with plenty of grit, determination and foresight.

Mere lack of success does not discredit a method, for there are many things that determine and perpetuate our sanctified ways of doing things besides their success in reaching their proposed ends.—James Harvey Robinson.

• Be "Safety Minded"!

What does it mean to be "safety-minded"?

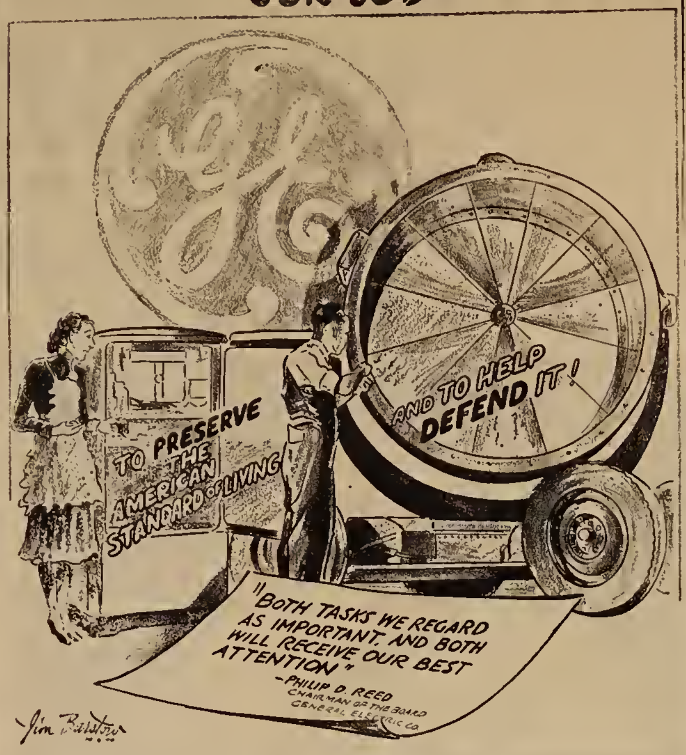
It means locking the barn door *before* the horse is stolen. It means to THINK AHEAD FOR SAFETY in everything you do.

It means, for instance, when you are getting ready to do some work on a ladder that you will think of what might happen to you if the ladder should slip or break, and that you will then make sure before climbing it that it is in safe condition to use, and that the way you plan to use it is safe.

In other words, to be safety-minded means to have the habit of always trying *to see an accident before it happens*, so that you can act in the right manner under the circumstances and thus avert a mishap.

This habit of always thinking ahead for safety is not hard to form and it is a mighty useful habit to have.

OUR JOB



TO PRESERVE THE AMERICAN STANDARD OF LIVING
AND TO HELP DEFEND IT!

Hatfield Retires

(Continued from Page 1)

"For He's a Jolly Good Fellow." John Deahl, Bill's foreman, delivered the invocation after which a hearty meal was enjoyed by all. Works photographer, Floyd Moreland, then recorded the scene for posterity through the medium of his camera, and Clue Ferguson, Master of Ceremonies, called on Wm. N. Wehrs, General Purpose Fr. H.P. Motor superintendent, H. G. Siebold, superintendent of Bldgs. 4-2 and 4-3, and P. A. Shober, director of the G-E Club Band, for short talks.

Gifts were presented from co-workers in Bldg. 4-3 by Dorl Feasel and Ray O'Neill, and from the G-E Club Band by K. W. McOmber. Those in charge of arrangements for the affair were Clue Ferguson, Dorl Feasel, and Ray O'Neill, all of Bldg. 4-3. Mr. Hatfield, who resides at 653 Archer Avenue, began work with the company in 1924 and during his entire service was engaged in fractional horsepower motor work. He is a Spanish-American War veteran and served for three years under General Henry W. Lawton in the Thirtieth United States Voluntary Infantry. He is much interested in music and has played in practically every band in this community.

Shreve Honored

(Continued from Page 1)

supply department. In 1906 he left for San Francisco as a supply salesman, covering all of the San Francisco outside territory for G. E. In 1907 he was given responsibility of the Nevada territory on all lines of G. E. equipment and supplies.

Back at the San Francisco office in 1909 as a turbine specialist, Mr. Shreve became an apparatus salesman the following year. In 1912 he was given charge of sales to the Pacific Gas & Electric Company.

From assistant manager of the San Francisco office in 1916, Mr. Shreve moved into the manager's chair in 1917. On March 15, 1926, he became manager of the industrial department of the General Electric Company at Schenectady, and in 1929 assistant vice president to J. G. Barry, then vice president in charge of sales. In 1934 Mr. Shreve was elected a vice president.

Community Chest

(Continued from Page 1)

zens like yourself are helping in this patriotic cause.

"In extending a helping hand to those in need, whatever the need may be, this inherent characteristic becomes the Golden Rule in action. It can be summed up simply: The Community Chest Way is the American Way."

Contributions from employees and the General Electric Company during the year constituted a substantial amount. The payroll deduction plan being in effect at the Fort Wayne Works no campaign is necessary in our Works but in the role of contributors and as representative citizens, employees have a distinct interest in the progress of the annual campaign.

Credit Union Facts

by T. L. WALLACE

Many people when joining a Credit Union do so as an experiment. They start their saving fund with a very small weekly payment. After continuing in this manner for a short time they find by increasing their weekly payments they can formulate a plan to use their Credit Union deposits, as a means toward budgeting certain sums for payment of definite obligations, such as taxes, insurance, and even monthly bills.

The General Electric Credit Union presents one distinct advantage which is enjoyed by few Credit Unions, that is the weekly payroll deduction. We have yet to meet a person in the General Electric Credit Union who does not speak well of this payroll deduction system.

By the payroll deduction system, each member is relieved of the necessity of visiting the Credit Union Office each week to make their deposit. The Credit Union in turn by virtue of the Accounting Department's deduction, does not have a rush of depositors at the week end.

The advantage of this system is reflected in the continued increasing number of applications for membership and the continuation of members once they have joined the Credit Union.

Our Credit Union records indicate the only time members withdraw is when they leave the immediate vicinity or the employ of the Fort Wayne Works.

In the words of many whom we personally know joined the Credit Union with a certain amount of skepticism "we never knew that saving money was so easy."

Bob Kallmyer immediately after joining the Credit Union over a year ago approached the writer and jokingly said "when do I get my money." However, Bob is a great booster for the Credit Union.

Help Give Them A Safe Start

By Herschel Smith
Safety Engineer

Our accident records show that there have been two lost time accidents this year in which fingers were crushed under material being handled on a crane. Both of these injured employees were "new men" on the job.

In the above picture Martin Marhenke, oven operator in Bldg. 17-1, a veteran employee, is demonstrating how the "old timer" on the job can help the new employee by explaining carefully the hazards of certain operations, and the numerous means provided throughout the plants to prevent accidents.

Remember To Wear Your Identification Badge Monday Morning

Pittsfield Girls To Be Elex Guests Over Thanksgiving Holiday

Cementing a friendship that began on the Elex trip to Yellowstone Park last summer four girls from the Pittsfield Works will arrive in Fort Wayne on Thanksgiving morning and will be guests of the Elex Club over the week end. The girls are Charlotte Stoessel, Dorothy Barraclough, Ida Lussier and Helen Ring, president of the recently formed girl's club at the Pittsfield Works.

A Thanksgiving Tea will be held for the girls from 3 to 5 o'clock at the home of Mr. and Mrs. I. H. Freeman, 4811 Old Mill Road on Thanksgiving Day. All Elex Club members are cordially invited to attend the tea and meet the honor guests.

Other activities centering around the visitors will be a breakfast on Saturday morning, November 23, at 10:30 at the Chatterbox and a dinner on Sunday, November 24, at Potawatomi Inn, Lake James. All Elex members are invited to attend these affairs. Tickets to the breakfast on Saturday morning are 50c.

Transportation For Iowa-Notre Dame Game

G-E girls wishing a means of transportation to the Iowa-Notre Dame football game Saturday are advised that the Elex Club has chartered a bus which will leave the interurban depot on Main street at 10 o'clock Saturday morning. The fare will be $2 and reservations must be made today with Irene Meyers, phone 555.

New G-E Building

The General Electric Company has announced plans for the erection of a second large building in its Schenectady factory, a brick and steel structure 560 feet long and 240 feet wide, to be used by the order and stores department. Offices will be located in a two-story section across the front, and the remainder of the building will be used for storage. It is estimated that about five months will be required to complete the structure.

Kindling Orders

Orders from employees for kindling will be accepted for one week, starting next Monday. Orders are to be placed with the Personnel Department in Bldg. 21 and payment must accompany the orders. A handling fee of $1.00 for a full load and 50 cents for a half load is charged.

The new double tub General Electric Washer—Number 1012—has a temperature dial in the control panel which indicates the way to adjust the hot and cold water supply to obtain the correct temperature for the proper washing of various fabrics. A timer dial makes it possible to set the washing time desired for various fabrics—you simply set the timer to the desired number of minutes and at the end of this period a bell rings indicating the completion of the proper washing time. The spinner basket holds a washerful of clothes and is especially designed to damp-dry the clothes efficiently. Further information at the Employees' Store.

It Is The Very Latest Thing

Viola Yaney and Ann Fox, Bldg. 12-3, inspect unique jewelry line.

Jewelry, cleverly designed from maple and other woods, and then impregnated with textolite is one of the latest uses to which plastic material has been applied. A display of the ornaments, which are manufactured by an eastern concern, has been placed at the Employees Store by R. L. Davis of the Commercial Department of the local Plastics Division. Employees desiring to purchase the articles on display may do so through Mr. Davis. The display includes necklaces, pins, bracelets, cigar and cigarette cases and other items.

Up to the present time the items have been sold only in the east.

Gecode Club Party

Dinner appointments for the "Betsy Ross" party being arranged by the Decatur Gecode Club to be held in the General Electric Club rooms Monday evening, November 18, at 6 p.m. will be carried out in patriotic motif. Guest night will be observed and special entertainment has been outlined for the program.

The committee in charge of the arrangements for the occasion include the chairmen, Helen Gerke and Elsie Brunnegraff, Juanita Noll, Rosemary Miller, Wanda Frye, Harriet Gilson, and Marcelline Lose.

G-E Club Band Program

Two radio broadcasts by the G-E Club are scheduled for November 28 and December 12 it is announced by K. W. McOmber, business manager. The broadcasts are at 8:00 P. M. over station WGL. The programs which were started early this fall have proved a popular radio feature, and there is every probability that they will be continued during the coming year.

FREE MOVIES

Don't forget to take in the free movie Sunday at the G-E Club. The program will consist of one full length feature entitled "The Long Shot" plus several good short subjects. There will be two complete shows; one at two o'clock and the other at four, and admission will be allowed on presentation of this year's or last year's G-E Club membership card.

Your identification badge is your symbol of America. It represents your job. Wear it.

AROUND THE CLOCK WITH G-E

With only six weeks ahead to Christmas and the Employees' Store well stocked with appliances, radios and the many other products made by the Company, it's a pretty good time right now to look around. Early shopping means a greater selection to choose from. It eliminates the last minute decisions, the worry and rush of getting in just under the wire.

Right now there's nearly everything to see, from refrigerators and ranges and radios to clocks and coffee makers. All the newest lines are on display.

Why not take a look at the new radio receivers. There's nothing better as a family gift than a good radio. Right now the Frequency Modulation sets are the sensation of the communications world. You can get combination receivers which handle both standard broadcast and "FM." You can get a translator to let you receive "FM" through your standard broadcast set. A trip to the store will tell you more than any words of mine. And of course all of these fine things which add so much to living you can get for your home and your family at substantial savings.

Alumni Dance

The Apprentice Alumni Association will hold a dance on Friday evening, November 29, at Zulu. The affair will be a "hard times" dance and all members and friends attending are warned that dress up clothes will be decidedly out of order. Tickets are 25 cents per couple.

Unbolting The Volts

Dismantling the 40-ton lightning generator in General Electric's Steinmetz Hall was one of the biggest jobs to get under way immediately after the close of the New York World's Fair. Each of the generators weighs 40,000 pounds, and the job of dismantling them and packing them for shipment is expected to take about two weeks. Part of the equipment, enough to make a 2,000,000-volt lightning generator, will go to the high voltage laboratory of the United States Bureau of Standards in Washington, D. C. The rest will go to General Electric's high voltage laboratory in Pittsfield, Mass., to replace equipment already in use there. Never again will the general public have the opportunity to see the spectacular lightning display seen by more than 5,000,000 persons in two seasons of the New York World's Fair.

WIN FIRST PRIZE

Word has been received here that Donald and Eileen, children of Arthur Bieberick, Decatur Works, received first prize in the Block's Children Hour held at Indianapolis on November 2. The first prize award entitles them to compete in the semi-finals to be held in January. If they are successful in this contest they will be in the finals to be held a week later.

They wish to thank all their friends who supported them and hope they will listen in over the same station to the semi-finals.

Your identification badge places you definitely as a man or a woman working for a company which has the greatest diversification of national defense work of any in the nation. Wear it.

The Public Likes Frequency Modulation

A sample poll taken among visitors to the General Electric exhibit at the New York World's Fair and just announced reveals that approximately 92 per cent of those who listened to frequency-modulation radio reception for the first time were enthusiastic about it and would be inclined to purchase FM receivers. Less than 10 per cent did not think they would purchase an FM set if given the opportunity.

Three questions among several asked in the survey were—whether the listener was hearing FM for the first time, whether he would be inclined to purchase a receiver equipped to receive it, and whether he favored a console set combining both AM and FM reception, or a translator — costing less — which could be attached to an existing set.

The FM demonstrations were carried out in the closing weeks of the Fair, through the joint co-operation of General Electric and FM station W2XOR, of the Mutual Broadcasting System, New York. A combination receiver, affording both types of reception, was installed in a small auditorium of the G-E building, together with such noise makers as an electric razor and a telephone dial. Twice each day, at 2:15 and 4:15, the staff of W2XOR broadcast special test programs from their New York studio.

Fifty-Seven Years

(Continued from Page 1)

a part of the largest electrical manufacturing company in the world.

Having reached the age of 70 years, Mr. Leephart retired from the Central Station department on November 1 with an all-time record of 57 years and 10 months in the continuous employ of the General Electric Company. Mr. Leephart has been a resident of Schenectady since February 9, 1897. In recalling old days, Mr. Leephart said:

"I well recall the old days. They were grand days. When I first began working at $3 a week, I was just another office boy running around the Brush Electric Company. We worked from 8 in the morning until 6 o'clock at night, six days a week, and no one thought anything about it.

"At that time the Brush Electric Company was one of the largest if not the largest manufacturing company in the world, employing between 500 and 600 men. Quite a difference now, with General Electric, the world's largest electrical manufacturing concern. It's quite a thrill to have been with one company such a long time."

* * *

With the retirement of Mr. Leephart, there remain but two employes with 50 year's of service, J. H. O'Brien of Philadelphia and J. D. Meyers of Schenectady. There are 330 with 40 years of service and 57 with 45 years of service.

NOTICE

Industrial Basketball practice will be held Tuesday, November 19, 7 o'clock to 9, and Friday, November 22, 7 o'clock to 9.

Remember To Wear Your Identification Badge Monday Morning

»» NEWS THROUGH THE PLANTS ««

Back when it was still funny, Cousin would call up some fair Elex girl and ask, "Are you the woman who washes?"

The reply was usually, "Why no!"

Then Colin would say, "You dirty thing."

When we mention wash day, some of us think of a poor old woman, bending over a tub, washing the rich man's clothes, and surrounded by poor, ragged kids. Others of us think of a pretty lassie in party dress reading a book, while a washing machine beside her does all the work, just like it shows in the ads.

Perhaps both pictures are true, but I'll bet an electric motor now relieves most of the poor woman's drudgery.

Ye all know that washing machines are about as common as radios or athletes foot now-a-days—four out of five have them—but did ye know that you can get a good washing machine today for less than its motor cost a generation or so ago.

Naturally, that means a lot more washers sold, and therefore more jobs in washing machine factories, and in contributing factories as well.

Take the motors for instance. Our whole Decatur Works, and some of our business in Bldg. Four might not exist at all, if it were not for the big sale of washing machines.

Now, to show you that we haven't been asleep, either, I might mention that our costs are about one third what they were twenty years ago. And I might also mention that if they hadn't been brought down like that, we would not be building them.

Which is one reason why we must keep plugging away at the "better way of doing it."

Which proves the old statement that now-a-days, you gotta run like Hades to stand still.

Which makes me wish we could find cost reduction as easy as a well known pink haired Scotsman, Elmer McBaade does in his smoking. I asked him what kind of cigars he smoked. "Oh", said he "any given brand.*"

*Ed. Note: Ten centers are preferred.

Many have been the tries in the past to persuade one of the most eligible bachelors of the Works in the direction of the altar. But all tries have been in vain. Bldg. 4-3, with all its charming charmers couldn't do it. But for all there is the one and only and it is now reported that the "one" has arrived in the life of our star reporter and that he has kept from us the one big scoop of the year. Let us in Art so that we may be able to extend our best wishes and luck on your journey.

Geo. Doll, Bldg. 12-B, comes forth with a helpful suggestion for withstanding "Old Man Winter's" icy blasts. It consists of seasoning one's soup generously with pepper. George practices what he preaches, too, as an empty pepper shaker he left at his cafeteria table one noon this week will give testimony.

Winter Street News

C. Miller mislaid his teeth and then accused his wife of hiding them. They may be a good set of false teeth, Clarence, but without good eyesight, "they just aren't worth a darn."

To secure beautiful blonde hair (what hair) like Eddie Heemsoth's, drink a quart of buttermilk each day.

WANTED: Escalator between Prod. and Planning Depts. to prevent Al Ralston from nicking the toes of his shoes (not to mention kicking the linoleum off the steps).

Claude Gettys was repairing the floor in his home and after driving three nails a voice cried out, "Hey, Dad, the water's leaking all over." With the three nails Claude had driven each into a lead pipe. That's what I call really hitting the nail on the "lead."

The striped dresses women wear these days have "Gabe" Barrick so confused he doesn't know stigmatism from stagnatism or vice versa.

In spite of the fact that the election is over and that things went in the right direction for him, Joe Comer, still has plenty to worry about. He spends most of his evenings in the basement sitting by the gas meter watching and worrying about how many "dollars" his new gas furnace is burning?

A few more parties at Pleasant View Cottage on the St. Joe and the government won't have to plow under so many innocent little pigs. The usual crowd consisting of Bennett, Blee, Braun, Brindle, Boedecker, Cade, Fagg, Haberkorn, Pumphery, Piper, Powell, Shepler. Sheets, Sorst, Steup, Ort, Roberts, Stolf, Wickliffe, Lair and May was there. Oscar Meyers attended for the first time and brought along his camera. Watch the NEWS for candid shots.

Thisa And Thata — 19-5

Well at last the election is over; Louie's going to keep on wearing his old suit. Flo says she is working harder. Ruth Rosenberry paid her bet to Mildred and Sarah and Ruth Hansel are also square with the board. A lot of people feel good...By the way has anyone noticed Irma Huhn's red hair?... Sorry George, you weren't so silent after all. Congratulations.

A very delicious chicken dinner was enjoyed by a group of Bldg. 4-2 girls at the home of Gay Huey. Those present were: Zella Wittmer, Iva Stephan, Vera Smith, Elsie Mooney, Frieda Kipfer, Betty Love and Esther Schladenhauffen. A pleasant evening was enjoyed by all.

Bob Houser, Bldg. 4-3, told the boys that the cigars he was carrying around in his vest pocket were on election bets, but we know better, as they were for his payment on a "Bundle from Heaven."

Walter Schelper, Bldg. 4-3, is so interested in his work that he does not even hear the whistle blow until someone tells him to stop and go home.

Ted Mullins, Bldg. 4-3, is champion pheasant hunter. After Ted purchased a swell gun and a lovely hunting suit to go with it, all Ted does is to go to some nice creek and fall in it. Ted, gun, suit and all, but no birds except one little sparrow.

Charlie "Time-out" Houser, Bldg. 4-3, tells us now that the election is over, he is anxiously awaiting the opening of the basketball season. He says he does not like this lapse of time between "whoop 'em up" periods.

Division Editor

Appointment of Paul Berlien, Bldg. 26-5, as WORKS NEWS division editor for the General Tool Division is announced by C. A. Brenner, superintendent of the division. Mr. Berlien succeeds Kenneth Sheehan and Walter Konow who have been serving as editors in the division for some years past.

The Disappearing Turkey

The spiel of the old army game barker "now you see it, now you don't," describes the feelings of Herschel Smith, president of the G-E World War Veterans Association, regarding a certain turkey. It all began when Herschel anchored two turkeys along Company property on Broadway as an advertisement for the Vets "feather party." The turkeys represented real money so Herschel personally stationed himself as guard. Unfortunately he turned his back for about ten minutes, and during the ten minutes both turkeys disappeared.

Began then a frantic search which was successful to the extent of locating one of the birds but the second one had apparently disappeared for good. Later, however, the turkey was located by a scouting party in Bldg. 21, and it was determined to hold the bird until evening and say nothing to Mr. Smith. In the meanwhile, however, someone informed the poultry house, who had loaned the turkeys as props, and they collected the missing bird, without in turn saying anything to members of the posse who had located it. Began then a second group of "worriers". However, it all ended happily when Bill Walt, who had the situation well in hand, explained the whole episode at the "feather party."

Oh! Pardon Me

Bertha Gruber, Bldg. 26-1, minds her p's and q's when it comes to politeness. She backed into a post at one of the five and tens last Saturday and promptly turned around and "begged its pardon."

Forrest Whonsettler, Bldg. 4-3, is surely becoming popular with the fair sex, in fact so much that he is receiving bouquets from the same. We must hand it to him though, he is not selfish. He lets us all take big sniffs at these bouquets.

George Cooper, Bldg. 4-3, claims to have a new and superior method of shaving. He has patented it under the name of the "Cooper System." He also claims that the old-fashioned shaving brush is the best thing to clean your teeth with. Anyone interested, see George for further details.

Ino, The Fly

Dear Editor:

Remember me? I'm Ino, the Fly, who would buzz hither and yon, bringing you flash news.

I've managed to escape the purge of my kin, this summer, and since the winter season is a good time for our species, I may be able to keep you informed of the latest developments in the Motor Generator Department.

A. R. Spencer, Bldg. 19-2, and Richard Hanson, Bldg. 19-3, are the new papas. Both have baby boys. Sure, they are mighty proud.

I. W. Butler, Bldg. 27, has a new model Oldsmobile with all the de luxe features, etc. He drove to work one day, parked, locked the car and came to the office. Behold! the motor was still running, the keys locked inside the car. Mrs. Butler, after a few hours, brought down the extra set. Now we wonder if it was forgetfulness, too much haste, extra gas to burn, or just the silent motor which caused him to do it. Ben says it was just the latter.

Richard Hartigan is still buying cigarettes for John Kaade—the reason, wrong doping on the college football scores. Even if John gives Dick what he wants, he still misses.

June DeWitt is sporting a new permanent—all men please take notice.

Have you seen Miriam Lemke's red feather. Yes, it's just a mite. Truly in keeping with its owner.

Next week, I'll tell you about the mystery of the missing plum tree.

Yours,
INO, THE FLY.

The Stubborn Thing

When Eve Lynn, Elex president, honored a turkey by purchasing it for a festive meal one would think the bird would appreciate the honor and co-operate. Such, however was not the case. Eve placed the dressed turkey in a freezer until ready to go home, and then discovered that the bird had frozen hard as a rock while in a sprawling position, and that the legs and wings protruding into the next compartment effectually prevented the turkey leaving the freezer. A thawing job was necessary.

Fred Fitch and Pete Deemer, Bldg. 26-5, got off to a fair start in the hunting season by bagging four pheasants and all the rabbits they wanted.

Rather a coincidence, wasn't it, that Art Thieme should forget his badge the day after the WORKS NEWS so brilliantly presented the "Monday Morning Blues" cartoon.

Henry Wittby, Bldg. 26-5, has upset his chest expansion since receiving several prizes on his stamp collection. Congratulations Henry.

Peace at last. Earl Lenz, Bldg. 26-5, finally laid down the cash and received the keys for that new car that he has been extolling for the past weeks.

Ed Stuart, Bldg. 26-5, had a taste of "blitzkrieg" this week when a large tree fell on his house.

Ever since "Dutch" Wilson of Bldg. 6-3 lost $150,000 on the election he has been reading every document over very closely with a high-powered magnifying glass given to him by one of his many admirers. "Dutch" claims that the contract he signed contained a clause of only a $15,000 bet, so from now on he is going to scrutinize every scrap of paper with great and deliberate care, so as not to foolhardily lose the price of another new suit.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

Probably there isn't a city, town, or village in our country or in Europe that hasn't a monument erected in honor of some half forgotten victory, local strong man, or more worthily to commemorate those who fell in battle. It is fitting and proper to honor men and women who died fighting for what they believed to be right, but there is only one monument in the world erected to Peace.

This monument stands high in the Andes Mountains between the countries of Argentina and Chile. For many years the people of these republics fought each other furiously for the boundary line between their countries, fought to gain access to this boundary line. At last they realized that for which they fought was not worth the lives of people who after all were brothers, speaking the same language and who held the same ideas. So they submitted their dispute to King Edward VII of England for arbitration and it was decided to their mutual satisfaction.

Then it was proposed to erect a monument to stand for Eternal Peace between the two nations, and from the armaments, which were melted, was cast a heroic figure of Christ bearing His Cross. The arm of the Christ is extended to bless both countries and at the foot of the monument is a beautiful inscription, taken from the oration of Father Jara on the occasion of the erection of The Christ of the Andes. It reads, "Sooner shall these mountains crumble into dust than Argentinos and Chilenos break the Vows of Peace sworn at the feet of Christ, the Redeemer."

Father Jara had worked tirelessly to bring about the peace so it was fitting that his words were chosen to be carved on the monument to Peace; and for nearly forty years the peoples of Argentina and Chile have kept their vow.

Glenn Cutler and George Collins, Bldg. 4-3, were recipients of brand new jackets in recognition of valuable services rendered in baseball activities this past season.

Kathryn Hepker, Bldg. 19-5, says the reason she doesn't take the election stickers off her car is because they may have a recount and then she will be all set.

Well, well! It is reported that a versatile young man in Bldg. 19-5 punch press has fully proved that he is "the boss." The story goes that our young man went out with a pal one recent evening and getting home much later than expected, removed his shoes. Unfortunately he left the shoes in the car, particularly since he got into the house without mishap. All efforts and luck were wasted a few days later when the pal returned the shoes. Names and locations will be sent upon request. Mail your queries to Slug.

All the girls that saw Thelma Pond playing bingo last Friday night are wondering if she finally bought a turkey. Thelma certainly did a good job of feasting her eyes on the sample turkey.

The reason why "Shorty" Becker of Bldg. 6-3 is getting so thin has finally been discovered. He gave his father-in-law one of those "campaign cigars" and has been afraid to go over there ever since, consequently he is missing out on those big home cooked meals.

Remember To Wear Your Identification Badge Monday Morning

NEWS THROUGH THE PLANTS

Bldg. 4-4 Rantings

It would not be the same around the assembly and test section without John Miller cussing the Republicans and the bankers...Clarence Shanebeck talking to someone without pointing and being in a hurry...Jack Payton cussing the Democrats and the Democrats cussing him back...Ernie Cutter trying his best to get someone's goat about his home town...Bill Swafford trying to convince Chet that he is right for a change...Harry Savage when he was not ready to choose Joe Cline...Herb Wise and his war whoops...Charles Braun without his sou'wester on a rainy day . . . Russ Scherrer in too big a hurry to stop and exchange verbal blows with Stan...Paulus Adams without an answer right or wrong...Ed Rodenbeck without an argument pro or con...Ezra Garringer when he wasn't ready to hear a new story...Maurice Poling conceding a point to Earl...It is a great gang when you learn how to take them.

Anyone needing a soprano singer for a glee club or choir see Joe Robach. If his voice keeps changing he'll be singing soprano before long.

Jesse Devaux has a new idea on repairing suspenders. A little piece of wire does the trick.

Tell us about that big roll of (money) you found Hank "Sugar Daddy" Epple. Oh well, you probably would have bought a treat anyway.

Anyone finding a stray hat near a church notify Virgil Foland at once. Virgil and Art Torbeck seem to have missed a very important meeting at a lathe demonstration because of it.

Cliff Witham likes his fish well aged. However, as surprise packages the machine girls prefer fresh fish.

Cecilia Saylor worked so hard that when the whistle blew at 11 o'clock Monday she thought it was lunch period.

Bob Arnett may rate a small Community Chest feather but he sure rates four big towels.

Watch your purses, girls, Lucile Baker was seen with two Friday night

Lenora Boone, one of our girl sport fans saw her first football game from her mother's upstairs window the past week. She thinks the next time she may get a little closer.

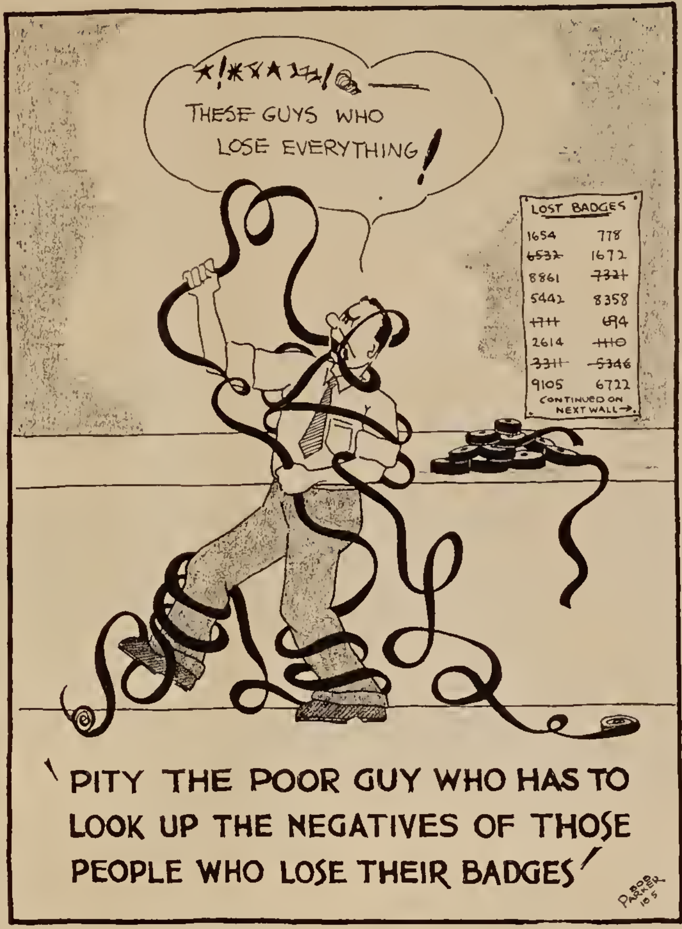
Whenever you see four fellows in the Flange section grouped together with a very disappointed look on their faces you will know it is Captain Al Harver, Admiral Dewey Erne, Chummy Bill Shreeve and Speed Borton discussing how it happened that the barefoot boy from Indiana got beat.

Fred Geisler of Bldg. 19-3 is the proud owner of an antique shotgun some seventy-odd years old. Fred is very proud of this gun and keeps it wrapped in burlap sacks so the relic won't rust. He has had some very flattering offers from gun collectors but refuses to sell. The gun can be seen at Mr. Geisler's house on Westbrook Drive.

Mary Abbot had better keep her word or the billing section is going to be disappointed on Christmas morning. Shoulder sweaters are expected in each and every stocking.

Anyone who would like first hand information about raising children see Marie Page, Bldg. 19-5. We understand that Marie is right there when it comes to taking care of children. Ask Marie about it.

Lost! Strayed! Or Stolen! — By Bob Parker



Slips And Chips

By Sir Vis, 4-4

It was very quiet on the Western Front this week. Probably the election caused it. I seemed to be the goat, or was I? Anyway I paid the bets. Just like Barney Google, my horse runs the wrong way.

Leo Blair became very blue when he learned that the telephone was no longer restricted and the wives could call in.

Mama didn't show up, retorted Forest Gee on being questioned why he and Arthur (Breezy) Stoll were standing out in the parking lot until 4 o'clock the other evening.

Don (Dagwood) Thomas is now getting up 5 minutes earlier. It is reported that he was seen waiting on his bus. Hope you don't have to explain this at home, Don.

Don Niles is happy again since his name appeared for the second time in the NEWS. Well Don, I would suggest a good publicity agent.

Congratulations to Virgil Asher for the success his offsprings are now making in the entertainment world. Maybe you can retire soon.

Walter Hazelett is still amazed at the perfect control Paul Hitzeman displayed the other night on the alleys. Paul threw the ball with such accuracy that it came within two inches of the pins.

Herman Lepper is still hunting the spot he left his hammer and punch lay. Any information will be appreciated.

Sympathy

Friends of Bldg. 4-4 extend their sincere sympathy to Hilda Rodenbeck in the death of her mother.

Employees of Bldg. 6-3 wish to extend their sympathy to Edna Carpenter on the death of her mother.

19-5 Office Chatter

This week the office force really put me on the pan for the misspelling of nasturtium, in last week's WORKS NEWS. . . . And to think that Webster was right at my finger tips. . . . Seems to me a lot of people in the office have been eating apples the last few days. Must be the "trick or treat" situation. . . . I learned that Mardo Tobias has it down to the bushel basket stage. . . . Received a poem about George Zollar's politics but am afraid that someone might take it as seriously as George does. . . . Gladys seems to have gotten some connections with the police department—only phone. . . . "Slug" seems to have a way about leaving his shoes in people's cars.

It must have been love at first sight. A certain young lady from the office went to the Chicago zoo to feed the monkeys some peanuts. The monkey liked the young lady so well that it started after her. Our heroine ran and the monkey ran. The monkey was recaptured but our heroine sustained a sprained ankle.

Marriages

Rosella Keokuk, of Bldg. 17-2, and James Romano of the Berghoff Brewing Co. were married in Hammond, Ind., on October 31. The newlyweds will reside at 704 W. Superior St.

Loretta Bloom of the cafeteria has a unique way of disposing of cracked dishes and it isn't in the ash barrel either.

Bee Stalter, Bldg. 19-5, says she remembers things that happened in 1793. Will you tell us a few things that happened, we would like to know, our memory isn't so good. Haven't you got you years all mixed up, Bee?

Punch Press 19-5

By Slug

Even the great disagree, although they occasionally get-together. Everett Lindeman was a very hard man to convince last week—that is convince him that our side was the right side. In fact he lost everything but his temper, and that was only hanging on by a few threads. Our argument on the Constitution was a gala event and opinions were backed by folding money as well as professional decisions from professors and lawyers. It appears that Mr. Lindeman was finally convinced for it is reported he was heard to say that if he could remember the school he attended as a boy, he would dash back and kick out a couple of bricks as a protest against the institution having harbored a teacher who left him with the wrong opinion...George Louthan was seen fingering the long green after the election. None of our cabbage was included...Some of the girls claim we have an information bureau on the floor. Please let us know what, where or when said information can be secured, will you gals?

M.B.A. Patients

General Purpose Motor—Helen Rehrer, 3518 Smith St.; Virginia Lutz, 3906 Piqua Ave.; Reba Huffman, 1605½ Wells St.; Herman Grote, Lutheran Hospital; Clyde Boyce, 324 Edna St.; Marjorie Heine, 1406 St. Joe Blvd.

Transformer — Lois Cashdollar, 736 Huffman St.; Donna Roe, 1622 E. Pontiac St.; Mary Trumpy, 2716 John St.

Apparatus—Wayne Marquardt, Monroeville, Ind.; Clarence Hambrock, Methodist Hospital; Mildred Blevernecht, 832 W. Wayne St.; Ruth Jennings, R. No. 6, city.

Left the Hospital—Carl Brokaw, Virginia Lutz.

Returned to Work—John Martin, Bernice Rodermund, Elemma Eisenacher, Agnes Landin, Anna Allen, Helen Dornish, Marian Bacon, Merritt Simmons, Agnes Malcuit, Ruth Mertins, Wilda Click, William Hohnaus, Walter Kritzeman, Grace Dafforn, Paul Broxon, Ruth Greim, Donald Klint, C. Saurbaugh, Merle Bachellor.

Borings From 4-4 Office!

Believe it or not, but some of the girls were reminiscing bringing up the good old days. Doris Roe told when she was just so high, her papa usta spank her and make her cry—We wonder why? One of the things she did was to put beads up her nose. Just for the heck of it. Some contest. If you ever see Virginia Sanders ask her where she hid her chocolates as a wee tot. It's good. I'm a warning ya! Why all the stuff they told was just too much for yours truly....Talk of the present days—Mike Braeyer was trusted to mail a letter to the beloved of Ardeth Hemp's. Somehow the letter was lost in the shuffle—or shovel; however, Mike, to clear things up for you—the letter was received in good shape. Some kind hearted fellow mailed it....Say, talking of Ardeth Hemp, she recently went on a party, celebrating the recent political victory, and the perfect hostess, Marjorie Boerger, sent her guests home, telling them she was tired and needed her shut-eye. (Something every growing girl needs). Now we ask you, Marge, is that the way to treat your guests? . . . Well this all smells, we all know that, but have to close for now. Till later, I remain, sincerely as ever—your ever nosey correspondent—Elmer—The Field Mouse—Rat to you.

Uncle McWell Comments In 19-3

Of course it may have been only a coincidence, but have you noticed that the leading merchandisers, for some few months now, have been featuring covert and khaki as the coming, smart colors for men's clothes?

* * *

STRICTLY STUFF—These nostalgic fall days drew forth from Mary Lankenau, in an unguarded moment, the yearning that she would like to take a hike in the woods . . . Although a sailor is, by both tradition and reputation, a Don Juan of the first water, equally adept with a sail or a frail, and entitled to a puella in every port, nevertheless the theme of his amours is always wholesome and gentlemanly. How then, may we ask, are we to account for the recent sight of Dorothy DeHaven, accompanied by a swollen jaw and a uniformed navy escort? Who laid that egg in Dottie's cheek? Was it the sailor—or was it a dentist? Gad, what a mystery! . . . All of which leads up to this classic little ad:

* * *

"Are you a dental cripple? Do your plates shake at the sight of a steak? Try - - - - - and get a real paste in the mouth!"

* * *

IT COULD HAPPEN TO YOU—Henry Lojek's linguistic ardor was thoroughly deflated one afternoon recently when, breezing by Mary Alice Herber, the flame-tressed planning secretary he nonchalantly tossed off what he thought to be a cordial greeting in Spanish, "Hasta la vista." Up 'till then life had been a pleasant affair for Henry, but in a twinkling all security vanished. His steady world did a flip-flop, along with his heart, because the young lady turned around and sweetly inquired if he was really serious in proposing marriage to her? And if so, could they dispose of Henry's wife, conveniently and quietly? Completely stunned, Henry did a neon sign and burst out in a bright, crimson flush. Not until Mary Alice took pity and explained, that his greeting was actually only an incorrect colloquialism of little or no meaning, did Henry stop being an autumn sunset. You can tell a lassy with a classy chassis—but you can't tell her much!

* * *

Dear Uncle McWell:

If the draft is going to take away all of our nice, young men, what will we girls do with our spare time?—Frieda (it will be a long) Winter.

Why don't you ladies form a "The Girls They Left Behind Them Auxiliary," and take up knitting socks? It will give you something to THINK about, while you're talking!—Uncle (Size 11½) McWell.

* * *

THEIR LAST WORDS DEPT.—"How could you have a soul, you heel!"

Remember To Wear Your Identification Badge Monday Morning

Winter Street In Lead Position In Volley League

Small Motor Factory And Main Office Loses Breaking Three-Way Tie

Last week's three-team tie for the leadership of the G-E Club Interdepartment Volleyball League was severely slashed by Wednesday's results to only one, Winter St., who chalked up their seventh, eighth, and ninth consecutive victories at the expense of Small Motor Factory, one of the co-leaders. Main Office, the other member of this triumverate, dropped two out of their three games with Small Motor Drafting, defending champions, and consequently slipped down to second place.

Winter St. had a terrific battle on their hands in racking up this three-game sweep over the Factory as the scores 15-12, 15-10, 15-13 plainly show, but whenever it was really necessary to get a vital point the Refrigeration lads always managed to come through. The match, typical of first-class volleyball anywhere, was thrilling to watch as the ball was always passed back and forth a great number of times before one or the other of the powerful spikers was able to put it away for the marker.

With that old combination of Hessert, set-up man, and Schlund, spiker, working to high-class perfection Drafting at least temporarily jolted Main Office's title hopes by taking the first and third games by the count of 15-5, 15-9 and dropping the second 15-6. Main Office was able to cope with everything Small Motor had to offer with the exception of Schlund's terrific spikes, that being the chief difference between the two clubs, although Sougham, Office's main spiker, also tucked away several points at crucial moments, especially in the second game.

Small Motor Production continued to stage a comeback by taking two of their three games with Small Motor Standards, the final counts being 15-0, 15-3, 13-15. Production started very fast, racking up a whitewash in the first contest, but Standards' attack slowly improved and then in the final canto, with Johnson and Horstman pacing the play, managed to turn the tables.

With the loser being forced to occupy the cellar position the Apprentice, evidently fearing this fate, played a type of ball that they have always been capable of to trim Apparatus-Transformer three times. The A's, fighting with everything they had, kept passing the pellet back and forth until it was set up for a good spike.

Elex Bowlers Party On November 25

Members of both the Friday and Monday Elex Bowling Leagues will hold a party on Monday, November 25, in the Hoosier Room of the Indiana Hotel. Bowlers wishing to attend are asked to make their reservations with their team captains by Friday, November 22. Tickets are 50 cents each and the party will start at 6 o'clock.

The committee in charge includes Helen Goddard, Ella Dietz, Helen Stahl, Helen Tieman and Olga Dreibelbiss.

ON - - the Alleys

A few incidents gathered while touring the bowling circuits: Walter "Boy Dagie" Mertz doesn't seem to be able to carry the amount of wood that he has done in the past and is carrying an average of only 162 . . . Put up high enough stakes and some people can really cut down the pins, Frank Matthews, after having only 29 in the second frame covered a quarter bet that he would finish closer to 269 than 129—Frank clipped off a 257 count, just 12 pins short of his goal... The Rotors and Dies of the Tool Room League tangled in three close games last week with the Rotors just squeezing in three wins, all games going over the 800 mark... The averages of the girls in the Elex Afternoon League took a severe tumble last Wednesday as most everyone was still concentrating on the election instead of strikes and spares...Bob Haslup of the G-E Major Club League was really in top shape last week, clipping off a neat three-game total of 674, a new league record...The Vaults by winning their last six games took over the G-E Club Office League lead...All of the members of the Order team in the Office League were tearing out their hair Monday as they lost one game by only one lousy pin.

Decatur League

Team	Won	Lost	Pct.
Office	15	6	.764
Packers	13	8	.619
Bearings	13	8	.619
Tool Room	11	7	.611
Shafts	11	10	.524
Maintenance	10	11	.476
Rotors	10	11	.476
Flanges	10	11	.476
Production	9	12	.429
Shells	8	13	.381
Testers	7	11	.389

Maintaining their position at the top of the heap, the Office defeated the Testers three games, accumulating a total of 2,452 pins to their opponent's 2,428. The Tool Room team made a grand slam in their three game series with the Rotors piling up an aggregate of 2,584 to the losers' 2,311. The Shafts defeated the Shells three games, totalling 2,388 to 2,209. The Packers dropped back into a tie for second place when they won only two games from Production. The winners scored a total of 2,338 to their opponents' 2,271. The Flanges defeated the Stators two games, winning one game on a forfeit and winning a second game to tighten the league race. The Bearings, by virtue of a three-game forfeit, moved into a two-way tie for second place.

Two hundred scores for the league are as follows: H. Kruekeberg, 233; G. Gage, 219; G. Auer, 212; H. King, 209; A. Schneider, 203; C. McIntosh, 202.

IN THE ROUGH

By WALTER SUNIER

Darned if we wouldn't quit for the season and maybe you would too if you heard the birdies tweet tweeting like Coy Brown, Winter Street, heard them two weeks ago come next Saturday. He birdied Nos. 16, 17, and 18 at Brookwood which is a very nice shooting feat.

Some of the boys are getting their golf and their football mixed. If they failed to gain ten yards in three trys they kicked. They are not quite as bad, though, as the guy who thought that if he used a half swing it counted half a stroke. Or the beginner who claimed two pars when he made a six on a par three.

We hope you are now at the point where you can concentrate on how you should swing because if you play any more or don't it is time to forget about the score and think only about the swing. There is a great point in what used to be considered one of Bobby Jones' strongest assets—namely his concentration on every shot. We think we concentrate but it is likely that the greatest obstacle to our concentration is actually trying to concentrate too hard. The person who drives an automobile expertly does not have to think of each separate move he makes. In fact, if he had to he would be in a collision or in the ditch before he had time to reason about what he should do. By habit through practice the act of shifting gears and steering becomes almost automatic. It is only after the reactions have become habitual that the driver can concentrate on enjoying the scenery. If you try to concentrate too hard on the golf swing by thinking about six different things, your concentration is wasted. You have to take only one or two things at a time and concentrate on them—for instance, concentrate on keeping the head still for awhile and then on keeping the left arm straight. But don't try to think about sixteen things in one swing.

Your identification hadge is your protection for your job, your plant and your country.

Club Fight Card Proves Popular

Bob Burns added the name of Don Bollinger to his already huge list of boxing victims by technical K-O'ing the Alvordton, Ohio, lad in the feature fight of the 10-bout amateur card staged at the G-E Club, Tuesday, November 12, under the management of Frank Newport.

This bout, scheduled for five rounds, was stopped in the fourth when Bollinger, who already had absorbed a great deal of punishment, came out on the short end of a toe to toe exchange. Burns had his opponent in constant trouhle throughout the encounter, flooring him once in the third for the count of nine and Referee Nick Little surmising that this jolt plus the fourth round battering was too much, consequently stopped the fight.

In another interesting contest Lial Gresham, prominent Fort Wayne flyweight, astonished the fans with the ease in which he handled Spider Shock of Defiance, always troublesome for brother flyweights. Gresham floored Shock once in the second and again in the final stanza.

Tommy Burns, brother of Bob, made it a perfect evening for the Burns family by knocking out Jack Ruch in the second, while Eli Randolph, colored scrapper, edged out a three-round slugging decision over Red Shull of Auburn.

Results of the other bouts: Bud Thomas decisioned Casey Love; Tommy Taylor, Monroeville, outpointed Jimmy Mott, Ft. Recovery; Bill Dowling outlasted Lamoille Lawrence; Doc Griffin beat Bill Penner; Therl Lawrence bested Dan Nestel, Churubusco; and Lester Smith, Leo, copped the decision over Bill Terry, Fort Wayne.

ROD AND GUN • CLUB •

By Glenn Seabold

League shooting by rifle teams of the G-E Rod and Gun Club is under way. Three leagues have been organized with Carl Morrolf, Bldg. 4-6; L. Bland, Bldg. 27, and H. Hyndman, Bldg. 19-5, as captains. League personnel has been picked according to the individual shooters averages so that each unit has an equal chance to win first place.

Results of the first match were as follows:

	Average	Score
C. Morrolf	96.	98
K. Griffin	96.	97
B. Tillman	100.	100
E. Leiter	91.	90
J. Lewis	89.	89
L. Bland	99.6	100
J. McComb	97.8	96
A. F. Bowers	96.	97
K. Casselman	89.8	78
H. Hyndman	95.7	98
E. Pion	98.5	100
J. Sowers	98.7	98
H. Seitz	91.3	91
R. Seitz	87.2	88

A number of rifle matches have already been scheduled for the season with the opening match on November 19, with the Waynedale Conservation Club as contestants.

SUNDAY BOWLING

The G-E Club will be open Sundays for bowling from one o'clock to five starting Novemher 17.

Last Six Months Profit Sharing $2,500,000

To Be Paid Dec. 20 With Five Year Employees To Receive 4.2% Of Earnings

Under terms of the General Profit Sharing Plan, 66,000 eligible employees of the Company will receive $2,500,000 on Dec. 20, it was announced today by Charles E. Wilson, president of the Company. This sum will be the employees' share of the last six months' estimated profit and will be distributed on the following basis: 4.2% for employees with 5 or more years of service; 2.8% for employees with 3 or more but less than 5 years of service and 1.4% for employees with 1 or more but less than 3 years of service.

Mr. Wilson's statement addressed to employees is as follows:

"Based upon an estimate of the Company's net income for the year, the Board of Directors last week declared a dividend of 80 cents a share for the fourth quarter of 1940 payable on Dec. 20 to stockholders of record on November 22nd. The payment of 80 cents per share for the fourth quarter together with $1.05 a share paid for the first nine months will make a total of $1.85 a share in dividends to stockholders for the year 1940 compared with $1.40 a share for 1939, an increase of 32%.

"Based upon the same estimate of net income used in determining the dividends to stockholders, approximately $4,500,000 will be available for distribution to employees as general profit sharing for the current year, compared with $2,566,000 for 1939, an increase of

Pittsfield Girls Guests Of Elex

Four members of the recently organized Pittsfield Works Womens' Club are guests of the Fort Wayne Works Elex Club this week-end. The Pittsfield girls arrived in Fort Wayne yesterday, and were entertained at tea at the home of Mr. and Mrs. I. H. Freeman. Irene Meyers, director of the Elex Club, was in charge of arrangements. A large number of Elex Club members attended the affair.

Today the Pittsfield visitors were escorted on a tour through the Fort Wayne Works. Plans for tomorrow include a breakfast at the Chatterbox at 10:30 and on Sunday the Pittsfield girls will be guests at a dinner at Potawatomi Inn on

(Continued on Page 2)

Will This Soon Be A Familiar Scene?

Top, left to right—R. F. Campbell, Fort Wayne Works Fractional Horsepower Motor commercial department, D. B. Gearhart, of General Electric's Grand Rapids office and G. H. Allen, president of the Allen Electric Equipment Company pose in front of Mr. Allen's plane. Below—Mr. Campbell wishes the two flyers a safe journey just before the take-off.

Customers are, of course, a necessary asset for any concern, and in an organization as large as our own customers are not unusual. However, a customer that flies to our plant for a consultation on apparatus we build for him, in his own plane and after completing business nonchalantly flies back to his own plant is unusual. Such a customer is G. H. Allen, president of the Allen Electric Equipment Company, who flew to Fort Wayne in his private plane Monday for a short consultation on progress being made on a new motor application in connection with the manufacture of automotive testing equipment. With Mr. Allen came D. B. Gearhart, of the General Electric Grand Rapids offices.

Mr. Allen did not consider his visit a bit unusual, although he is probably the first customer to employ private plane travel to visit us. As a matter of fact he intimated that before many of us join the Quarter Century Club it will be quite common for customers to arrive and depart by private plane.

End Long Service Records

E. H. Steinau

P. A. Neuman

Two veteran Fort Wayne Works employees, their combined service records totaling sixty-nine years, have retired on pension. They are Peter A. Neuman, employed in Bldg. 4-3, and Edward H. Steinau, employed in Bldg. 19-3.

Mr. Steinau first began his work under Henry Auman, foreman in old Bldg. 2, in 1904. The Fort Wayne Works was then building switchboards of hard wood and marble and Mr. Steinau's first work was to mount the meters on the wooden framework.

All these years Mr. Steinau has been engaged in switchboard work;

(Continued on Page 6)

Club Christmas Party To Be Held December 21

The G-E Club annual Christmas party, the one big event in the Club's social calendar as far as children of employees are concerned will be held on Saturday, December 21, it is announced by Paul Vogt, chairman of the Entertainment Committee. Five parties are scheduled for the day starting at 9 and 11 a.m. and at 1, 3 and 5 p.m.

The program itself, which will be devoted exclusively to the entertainment of the youngsters is being rounded out at the present time and will be announced in the near future. Tickets for the programs may be secured at the stand in the Club basement after December 9 upon presentation of G-E Club membership cards. Tickets will be issued only to children between the ages of two and twelve years. Tickets for each performance will be issued to correspond to the number of seats available, and requests will be filled in the order in which applications are made.

The annual Christmas party is probably one of the most popular events in the club calendar.

G-E Club Band To Broadcast Thursday

The G-E Club Band under the direction of Perry Shober will broadcast a program over WGL on Thursday evening, Novemher 28 starting at 8:00 o'clock.

The program will be as follows:

Theme Song................P. A. Shober
Stars and Stripes Forever..........
........................John Philip Sousa
Marching Along Together............
..............................Edward Pola
Cathedral In The Pines..Nick Kenny
(Vocal Solo By Harold Pilcher)
National Emblem........E. E. Bagley
Sons Of Tavistock....J. L. Verweire

The band started broadcasts some months ago and has been retained hy popular request.

Volume 23 FRIDAY, NOVEMBER 22, 1940 Number 40

• The Most Costly Waste

The most costly waste in all walks of life is the waste of time—failure to make the best use of time, whether at work, at school, at home, or at play.

No one has ever expressed this thought more forcibly than the speaker who said. "The greatest waste in my life is the difference between what I am and what I might have been, the difference between what I have accomplished and what I could have accomplished."

A man can work very hard and still waste time. He may be working hard at something not worth doing. That's waste. He may be working hard but using poor tools, unnecessary motions, or ineffective methods to do his work. That, too, is waste.

What counts on the job is the quality and quantity of work one turns out per hour or per day—not necessarily how many motions one can make. To prevent waste of time on the job is really a matter of *thinking*—using one's head—to get one's work done well and as speedily and easily as possible.

• Think!

The biggest word in the safe worker's dictionary is "THINK."

No matter how well trained a man may be, no matter how safe his work-place has been made, and no matter how capable a foreman he has to guide him, he can not hope to escape accidents to himself or avoid endangering others unless he makes use of his ability to think ahead for safety.

The man who thinks ahead for safety is also, and at the same time, thinking about his work, to do it right and to do it well, because nothing can be done right or well unless it is done safely.

Thus the more we THINK to prevent accidents, the safer we make our work, and the better we prepare ourselves to improve our performance on the job as a whole.

• Money Can't Buy It

During the past year we have seen nations fall merely because they lacked time—time enough to prepare adequately for their defense. Time was the one element in their preparations that money couldn't buy!

When time is so valuable don't you think we should exercise just as much care in spending it as we would money? As Edison said, it's the most valuable thing in the world!

• How Would You Like . . . .

TO go out to the woodpile every morning and whack up enough wood for the breakfast fire in the old range?

TO hike over to the ice house every morning and get a chunk of ice so ma could keep the milk sweet and the butter firm?

TO go out to the well every morning and fill up the water buckets so ma could wash and cook all day?

TO trim the wicks on a lot of kerosene lamps and polish the chimneys with old newspapers so you could read at night?

TO dance all night with your best gal and then walk home four miles through the snow swinging an old oil lantern?

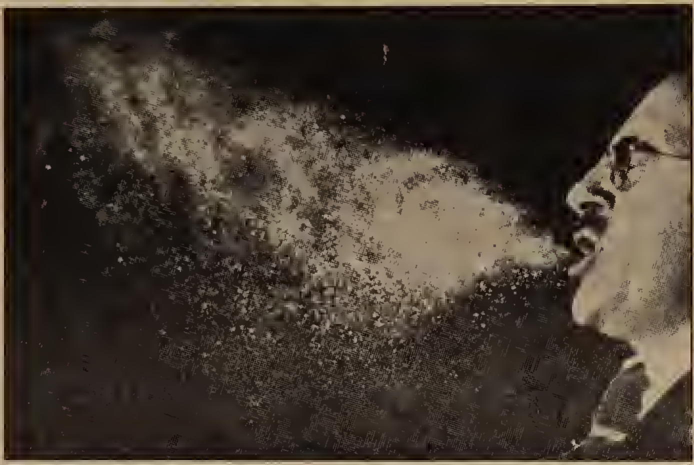
TO go to bed every night with the chickens because there wouldn't be anything else to keep you awake?

IF YOU DID, you'd like to live in the GOOD OLD DAYS they're always talking about.

Quality isn't something that can be argued into an article or promised into it. It must be put there. If it isn't put there, the finest sales talk in the world won't act as a substitute.—C. G. Campbell.

HEALTH HINTS

By Dr. H. W. Garton



The photograph accompanying this article is not that of a man suddenly blinded by the brilliance of the milky-way, or by a volcano in eruption. It is actually a 1/30,000 of a second "peep" at what comes out during an unrestrained and uncovered sneeze.

We are slow to believe what we cannot see or perceive by some one of the five senses. Droplets of saliva forcibly expelled during a cough or sneeze are not visible under ordinary conditions; therefore the average person has not fully appreciated the teachings of health authorities that common respiratory diseases are spread in this manner. The small "particles" shown in the photograph are really fine "drops" of saliva of various sizes. In medical parlance they are known as droplets, and any infection spread by means of such droplets is called "droplet infection."

These droplets actually carry germs—the kind and number depending upon the condition of the mouth, nose and throat at the time they are expelled. In a man sized sneeze like the one above there are thousands of droplets and the number of bacteria may be very large. The majority of droplets probably travel a distance of 2 or 3 feet, but it has been estimated that the speed of some of them as they leave the mouth may be as much as 150 feet per second, and that the larger ones may travel a distance of 10 or 12 feet.

Germs Love Life

Germs love life and some of them thrive for long periods even under unfavorable conditions. Droplets expelled with a cough or sneeze may suffer various fates: some may be expelled into the nose or throat of the fellow who happens to be in the vicinity of the sneezer; some fall to the floor or ground; others evaporate, leaving their germs suspended in the air, where they may be scattered by air currents. A conclusion of one group of research workers who investigated the question of bacteria in air was that "the sneeze almost seems to be a provision of nature for the survival of nose and throat parasites."

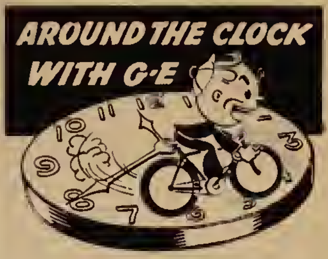
This subject is of vital importance to industrial workers, not only at work but at home or in crowds anywhere. Respiratory infections account for some 50 per cent of industrial absenteeism, and any preventive measure that will help reduce this toll means dollars and cents to all concerned.

To say "Pardon me" is polite but not protective to the person who "takes" your cough or sneeze. It is so simple to cover them and protect your fellow worker or your family or your bridge partner.

Supervisors Club Nominees Named

Al Konow, Bldg. 4-6 and Ralph Shoaff, Bldg. 19-5, have been nominated for the office of president of the Supervisors Club of the Fort Wayne Works. The two nominees will represent two parties and select running mates for the various other club offices. The two tickets will be placed before the membership at the December meeting to be held on December 11.

AROUND THE CLOCK WITH G·E



Daylight Saving Time is now but a memory and it's getting dark pretty early these nights. All that means is we must have more light and it earlier. So what better time of the year, pray tell, than now to check up. The children must study home at night and they need all the light they can get. Young eyes still growing, need encouragement lest they become strained. The I.E.S. Lamps are designed for this purpose.

Then how about some extra light for the back yard to light up the garage when you and the wife get home from a late night out? There are countless other places, too, in the house where extra lights can help make life more livable. Light is the cheapest form of eye health insurance you can buy and on top of that it's a cheerful way of letting the world know you believe whole-heartedly in the electrical age.

The Employees Store has all kinds of lamps and fixtures for you to look at, including the new lumiline lamps for shaving on dark winter mornings. It will pay you to check up on your lighting situation at home and then make your choices at the store.

To Regulate Parking On Streets Near Works

A communication calling attention to complaints received from residents in the vicinity of the Broadway and Winter Street Plants regarding parking habits of employees, and stating that rigid enforcement of parking regulations in these communities will be started on December 1 has been received from Traffic Lieutenant Custer A. Dunifon, of the city traffic bureau.

The letter, which was received by F. G. Duryee, supervisor of plant protection, is self-explanatory and reads as follows:

Dear Mr. Duryee:

"I am taking this opportunity to inform you that throughout recent months our Department has received numerous complaints concerning the parking habits of General Electric Company Employees in the vicinity of your Broadway and Winter Street Plants. It is not our desire to impose any undue hardships upon your employees, and with this thought in mind we earnestly solicit their whole-hearted cooperation by refraining from the practice of parking their cars upon the public streets around your industry.

"From a recent survey conducted around your Plants we have learned that off the street parking facilities are offered your employees, and we wish that they would use the same.

"As a matter of information I quote the following ordinance which regulates parking restrictions around any Fort Wayne Industry:

"The Board of Safety is hereby authorized to place upon any or all streets and alleys within one-half mile from any such manufacturing plant a sign or signs prohibiting the parking of any vehicle along any such street or alley for a period of time longer than three hours, and for the purpose of this ordinance the parking of any such vehicle upon any street or alley within said restricted district during any three-hour period shall be considered as one continuous parking."

"For your further information I would like to mention that the parking restriction on Broadway is one hour.

"We have only been enforcing these parking restrictions spasmodically, but, starting December 1st, 1940 they will be enforced daily."

Respectfully yours,
CUSTER A. DUNIFON
Traffic Lieutenant.

Are Elex Guests

(Continued from Page 1)

Lake James. The girls will leave Fort Wayne for Pittsfield Sunday night, arriving there early Monday Morning.

The Pittsfield girls are Helen Ring, president of the club, Charlotte Stoessel, Dorothy Barraclough, and Ida Lussier.

Alumni Dance

Members of the Apprentice Alumni Association and their friends are invited to the association's dance to be held on Friday evening, November 29, at Zulu. Old clothes will be in order since the affair will be a "hard times" dance. Tickets may be obtained at 25 cents per couple.

Transformer In First Place In Safety Standing

Four Lost-Time Mishaps In October Brings Works Frequency To 4.46

With two lost-time accidents during the first ten months of 1940 checked against it the Transformer Division tops the Fort Wayne Works safety standings with an accident frequency of 1.56. The all-departments accident frequency rate now stands at 4.46 as compared with 4.55 for the same period last year.

Four lost-time mishaps occurred in October, two of them in the Motor-Generator and Switchgear Division, one in the Series and Specialty Motor Division and the fourth in the General Service Division.

Standings of the various Divisions in accident frequency and severity at the close of October were as follows:

	Freq.	Sev.
Transformer	1.56	.03
Tool	2.72	.04
Series-Sp. Motors	3.33	.08
General Purpose Motor	3.56	.08
Decatur	4.20	.33
Motor-Generator	7.77	.09
Wire-Insulation	10.33	.92
Refrigeration	10.53	1.06
General Service	11.44	3.75
Distribution	13.39	.55

M.B.A. Patients

General Purpose Motor—Vera Fisher, Methodist Hospital; Francis Harter, Churubusco, Ind.; Ida Trenary, Medical Center Hospital; Barbara Macity, Garrett Hospital; Virginia Moran, 829 W. Creighton Ave.

Winter St.—Clarence Rothget, 1306 Scott Ave.

Motor & Series—Neoma Melcher, New Haven, Ind.

Transformer — Dorothy Haley, 3603 S. Harrison St.; Marjorie Heine, 1406 St. Joe Blvd.; George Holthaus, R. No. 3, city; Mary Jane Emrick, 1630 Howell St.; Alice Lasher, 525 W. Wayne St.

Plastic—Charles Harris, St. Joe Hospital.

Shipping—Howard Miller, 3806 S. Barr St.; Gus Mangles, 4401 Pembroke Lane.

Returned to Work—Dorthy York, Evelyn Pearson, Daisy Ford, Donna Roe, Alma Giem, George Siebold, Margaret Richards, Kathryn Zimmerman, Olive Lewis, Mary Trumpy, Lester May, Norma Krauskoff, Dorothy McCleary.

Industry Options Services Of Chicago Welding Students

Industry has already placed an option on the services of two-thirds of the men enrolled in the welding classes of the Lawson Y. M. C. A. Trade School, Chicago, which was opened recently to train workmen for industry and other fields important to national defense.

The art of welding is being taught to full classes in the school with the aid of fourteen 150- and 200-ampere General Electric arc welders, three G-E 200-amp a-c units and one 300-amp G-E motor generator, as well as G-E electrodes and accessories. Progress of the classes is being watched and planned by a "Welding Advisory Council" consisting of prominent Chicago welding experts. On completing the welding course, the graduates are qualified as welding apprentices, each having had 90 hours of electric and 90 hours of gas welding.

THE FLAG

. . . and what it stands for

WHAT'S A FLAG? What's the love of country for which it stands? Maybe it begins with love of the land itself. It is the fog rolling in with the tide at Eastport, or through the Golden Gate and among the towers of San Francisco. It is the sun coming up behind the White Mountains, over the Green, throwing a shining glory on Lake Champlain and above the Adirondacks. It is the storied Mississippi rolling swift and muddy past St. Louis, rolling past Cairo, pouring down past the levees of New Orleans. It is lazy noontide in the pines of Carolina, it is a sea of wheat rippling in Western Kansas, it is the San Francisco peaks far north across the glowing nakedness of Arizona, it is the Grand Canyon and a little stream coming down out of a New England ridge, in which are trout.

It is men at work. It is the storm-tossed fishermen coming into Gloucester and Provincetown and Astoria. It is the farmer riding his great machine in the dust of harvest, the dairyman going to the barn before sunrise, the lineman mending the broken wire, the miner drilling for the blast. It is the servants of fire in the murky splendor of Pittsburgh, between the Allegheny and the Monongahela, the trucks rumbling through the night, the locomotive engineer bringing the train in on time, the pilot in the clouds, the riveter running along the beam a hundred feet in air. It is the clerk in the office, the housewife doing the dishes and sending the children off to school. It is the teacher, doctor and parson tending and helping, body and soul, for small reward.

It is small things remembered, the little corners of the land, the houses, the people that each one loves. We love our country because there was a little tree on a hill, and grass thereon, and a sweet valley below; because the hurdy-gurdy man came along on a sunny morning in a city street; because a beach or a farm or a lane or a house that might not seem much to others were once, for each of us, made magic. It is voices that are remembered only, no longer heard. It is parents, friends, the lazy chat of street and store and office, and the ease of mind that makes life tranquil. It is Summer and Winter, rain and sun and storm. These are flesh of our flesh, bone of our bone, blood of our blood, a lasting part of what we are, each of us and all of us together.

It is stories told. It is the Pilgrims dying in their first dreadful Winter. It is the minute man standing his ground at Concord Bridge, and dying there. It is the army in rags, sick, freezing, starving at Valley Forge. It is the wagons and the men on foot going westward over Cumberland Gap, floating down the great rivers, rolling over the great plains. It is the settler hacking fiercely at the primeval forest on his new, his own lands. It is Thoreau at Walden Pond, Lincoln at Cooper Union, and Lee riding home from Appomattox. It is corruption and disgrace, answered always by men who would not let the flag lie in the dust, who have stood up in every generation to fight for the old ideals and the old rights, at risk of ruin or of life itself.

It is a great multitude of people on pilgrimage, common and ordinary people, charged with the usual human failings, yet filled with such a hope as never caught the imaginations and the hearts of any nation on earth before. The hope of liberty. The hope of justice. The hope of a land in which a man can stand straight, without fear, without rancor.

The land and the people and the flag—the land a continent, the people of every race, the flag a symbol of what humanity may aspire to when the wars are over and the barriers are down; to these each generation must be dedicated and consecrated anew, to defend with life itself, if need be, but, above all, in friendliness, in hope, in courage, to live for.—THE NEW YORK TIMES.

Insurance Plan Payments Near Eighteen Million

Three Claims To Beneficiaries Here Amount To $9,150 In October

Seventeen death claims totaling $60,000 were paid to beneficiaries of employees in six of the major apparatus works during October, according to the monthly compilation from the office of the secretary of the Company. All claims were paid under terms of the Group Life Insurance Plan of the Company.

Schenectady Works had the largest number of claims with nine for a total of $31,050. Fort Wayne had three for a total of $9,150 and there were two in Lynn River Works for $2,300. In Erie was one for $3,500 and the same in Bridgeport for $2,500. Philadelphia Works also had one claim for a total of $11,500.

Throughout the entire Company $152,452 was paid in claims during October. For the first ten months of 1940 the total amount of claims paid was $1,023,634.

Since 1920 when the Group plan was inaugurated $17,981,250 has been paid in death and disability claims.

Profit Sharing

(Continued from Page 1)

75%. The employees will also receive additional $3,500,000 as a Cost of Living Adjustment of their earnings for 1940 compared with $2,453,000 for 1939. Under these two plans, therefore, a total of approximately $8,000,000 will be added to the regular earnings of eligible employees for the year 1940 or 59% more than the corresponding total of $5,019,000 for the year 1939.

"In August, 60,000 employees received a general profit sharing payment of $2,000,000 from earnings under the plan for the first six months this year (plus $230,000 representing undistributed earnings under the plan for the year 1939) and on or about Dec. 20, 66,000 eligible employees will be paid the $2,500,000 balance of estimated earnings under the plan for the current year. The distribution to be made on Dec. 20 will be equivalent to the following percentages of regular earnings of participating employees for the last six months of the year: 4.2% for employees with 5 or more years of service; 2.8% for employees with 3 or more but less than 5 years of service and 1.4% for employees with 1 or more but less than 3 years of service.

"The regular earnings of eligible employees with 5 or more years of service will be increased 7.2% as a result of the combined payment of general profit sharing and cost of living adjustment for the last six months of this year.

Diesel-Electric Buses

Following use of three diesel-electric buses for a year on its Sinking Springs-Stony Creek line, the Reading (Pa.) Street Railway has ordered three more 35-passenger buses with such drive. They are to be supplied by the Mack Manufacturing Company, and are to have General Electric drive.

Help Yourself And Your Company — — Turn In That Suggestion

»» NEWS THROUGH THE PLANTS ««

Two weeks ago, just after the election, Philip D. Reed, chairman of the Board, said, "Let Us All Stand By."

Today, just after yesterday's turkey, cranberry sauce, pumpkin pie, and all the trimmings, we all say, "Boy, we're lucky to stand up at all."

Joking aside, I know ye all read Mr. Reed's eloquent statement, and were greatly moved by it just as I was. In fact, it made me ponder, "How can we, in the role of General Electric employees 'stand by' to lend our best efforts—what does the expression really mean to us."

To us, "standing by" means not just standing, but rolling up our sleeves, (as we have done), and diving in (as we are doing).

"Standing by" means taking on all the load we can carry.

"Standing by" means doing all we can to keep things moving.

"Standing by" means burning the midnight oil in the engineering, executive, drafting, manufacturing, production—in fact, in all the departments.

"Standing by" means planning our work to convert our every effort into usable output.

"Standing by" means working our heads as well as our muscles at every bench or machine, to do the job quickly and well.

If "standing by" means all this and then some, we are standing by Mr. Reed, and how!

O' course, being a Scotsman, I can't help mentioning another thought that's always on my mind. In all this rush, let's not lose sight o' economy. Let's not sacrifice economy for speed. Let's use our noodles and get both economy and speed.

The stuff that goes into the scrap pile never built a nation or defended it.

Now, don't ye say "O.K. Sandy, but that doesn't apply to MY job."

It applies to every job in the Company—to every intelligent person who can think—and ye are and can or ye wouldn't be holding a job, or reading this.

Changing the subject again, let me tell you what Cousin Colin said the other day. I asked him what he thought of the war in Southern Europe.

"Weel," he said, "from the looks o' it now, Sandy, it's all GREEK to me."

Fred Geisler, Bldg. 19-3, a famous ball player now employed at the G-E on Broadway played with the Columbia City Red Birds for ten years, some twenty-five years ago. He said, "The best game I ever played in was at Winona Lake, the score was 65 to 64 in our favor. I made three home runs in one inning." Mr. Geisler brought in a photograph of himself taken in full uniform. The large score was due to some spring water that later was found to be charged by a live wire. At least that was Fred's explanation.

Attention, Mrs. Schuster! Lawrence Schuster, Bldg. 26-2, went after rabbits but why was he seen at the market the same day. Here's trusting some of the farmer boys were more lucky.

Bldg. 4-4

After driving some distance into the country, Orvil Robinson, Bldg. 4-4 discovered that it wasn't his new car that was so tight; it was only his emergency brake.

Bernell French has a way all her own of falling up steps. Could we suggest an escalator.

Kathryn Gallmeyer has a dollar and a secret all her own.

Bad luck seems to come in threes for Al Harber. He went hunting last week and got nary a thing but big blisters on his heels. Then to make matters worse, the following night he locked himself out of his car and had to walk home.

Harold Amstutz has an explanation about that picture he has from the North Woods. What we're interested in is who took it.

Dallas "The Bird Man" Corson, while working on his garage recently, took a nose dive. Fortunately, he landed in a bush and didn't injure himself. But acrophobia is an awful thing.

Forrest Grimm surely can hold his temper under most any condition. He must have been an amateur politician in his younger days.

This Saturday work sure puts a cramp in the pheasant hunting this season. The air turned blue at a number of stations along the belt when the word was passed along.

Wee Willie Weber has to keep his hat and coat in the Bldg. 4-1 men's washroom because there's isn't room up here for his bear grease, hair oil, shoe polish, brush and rag and his automatic pants presser.

Lela Siebert, second shift, was really hungry for ice cream one night. Not only did she eat her ten cents worth, but also Marie Louden's. Oh! well, Marie is big hearted and anyway she says its fattening.

Phyllis Fosnaugh has an odd appetite. One night she brought in a quart of olives, and another night a box of cherry flips. But she always has a package of Tums (no commercial intended). We wonder why?

Rally Around Men

The Bldg. 4-3 Society of Bachelors are very much worried. The reason—well, it is whispered around that one of their charter members, Arthur Brandenburger is about to desert camp and become affiliated with the benedicts. One of their faithful scouts report the culprit was seen purchasing a glittering stone, the one that denotes, well you know what. Great consternation reigns in the camp of the Bachelors.

Archie Boren, Bldg. 4-3, our amateur horseman has turned professional. He plans on raising nothing but classy show horses. The reason—well, Archie tells us that he had a desire to become a first-rate exhibitor at horse shows.

Gerald Gehl, our stamp collector extraordinary, we learn is also a collector of campaign buttons. He has been making frenzied efforts to collect as many of this year's crop as possible. He claims to have buttons as far back as the campaign in which James K. Polk was elected.

Looking in garbage cans for pheasant heads is the latest hobby taken up by Ed Schaeffer, Bldg. 4-2. It is much cheaper than hunting for the whole bird.

Jim Truman, Bldg. 4-2, would like to have the hunting season changed to July or August because he nearly froze to death last Saturday.

Ralph Heminger, Bldg. 4-2, shot a tame rabbit in some one's back yard. He saw some wild ones but they ran too fast for him.

Slips And Chips

By Sir Vis, 4-4

It was our own Bill Johnson who was auditioned over WGL the other morning. The judge said Bill might make a success of radio. Bill was only a witness, so he says . . . The pheasant and rabbit hunters around here are very quiet for some reason. Virgil (Potts) Alderson came bringing in some feathers, and the rest stories. However, Eno Hursh was eating rabbit for lunch . . . Max Fielitz was a bit puzzled the other night when he couldn't find his new hammer. He painted a barber pole stripe on the handle as an identification, and someone washed it off . . . Virgil Asher told his wife that they were having turkey for Thanksgiving dinner. She very curtly replied, "With all the trimmings, I suppose." . . . If anyone happens to tune in on 1980 KC and hears "W90DW calling CQ, CQ" you can bet your last dollar it is Max Shaw trying to find some one to talk with about his antenna.

Bldg. 4-5 News

Check and double check should be the slogan of Pat O'Brien and Cleon Oyer of Bldg. 4-5 the next time they go hunting, for this is the way we heard it! Pat drove 40 miles to go hunting, only to find out the gun wouldn't shoot, then drove back home to get his son's gun.

Cleon drove all the way to Huntington, stopped to get gas, didn't have money and had to drive back home to get his pocketbook and hunting license. We didn't hear how the hunting was, guess it must have been dark by then.

Jimmie Wire of the wire dept. of Bldg. 4-5 went pheasant hunting. He had a double-barrel shotgun, saw a pheasant, let go both barrels and all he could find was feathers.

Hilda Knocke of Bldg. 4-5, now Mrs. James Wallace, was married Wednesday morning, November 13. Congratulations Hilda.

Mr. and Mrs. A. L. Foellinger, Bldg. 4-5 are on a vacation trip to Florida, not only as a vacation but also as a second honeymoon, this being their 24th wedding anniversary. Congratulations to both. Mr. Foellinger is general foreman in Bldg. 4-5.

From what we hear Kathryn Hepker and Eveline Best, Bldg. 19-5, sure do go for "chicken in the rough." It is alleged they ate everything but the napkins.

Will someone please take up a collection for Clyde Enslen, Bldg. 19-1 tester. Bill is getting desperate.

It seems Mary Frances Lauer, Bldg. 19-3, prefers to sit on the floor rather than on a chair. She says she slipped. I've heard that one before.

Harold Smith, Bldg. 27, went duck hunting. He promised to bring a duck to a welder in Bldg. 27. Monday when Harold came to work, he asked the man if he enjoyed his duck. The welder replied, "I didn't get a duck," to which Harold replied, "I remember putting one on your porch at a certain address." This poor welder had moved previously. Someone got the duck, eh, Harold."

Famous words as used by:

Floyd Buckmaster, Bldg. 19-3, "Now, ain't that the truth."

Claude Hurraw, "Now, where am I going?"

Gilbert Rose, "Oh, pshaw, I can't believe that."

Charles Strodel, Bldg. 19-3, "Oh no, you won't."

Otto Pflueger, "That won't work."

Borings From 4-4 Office

Most everyone in this office is looking forward to Thanksgiving a day of rest and stuffing. We are all thankful that we still are in peace and can be home on this day of "Thanks". However, Emmy Stock says, "I'm thankful that there is no one in the office twins. Yes, perhaps, they would be twice as ambitious". I still would like to know what he means by that crack . . . Since last Saturday's Notre Dame-Iowa upset, Bill Skevington cannot truthfully look anyone in the face and say, "Notre Dame has the best team in the Big Ten". See I told ya' Bill. Indiana beat Iowa and, therefore, Iowa had to beat Notre Dame. Mike Brayer's face is the expression of defeat. His faithful Purdue was beat something like 33-0. Gee that's pretty bad if anyone would ask me. But Mike still thinks Purdue is the best . . . Jean Bugert has made quite a hit with Val Walzer and Stanley Marquardt. Look here Jean, I thought I had a chance with you. Is that a way to treat a gentleman. Well anyway, what will Dick think? . . . As for Christmas suggestions or suggestions on love affairs, just consult Doris "Emily Post" Roe. She's good at 'em . . . Virginia Sanders, who was recently selected by a talent scout to model in a big department store in the big windy city, is still looking for the talent scout, George Wagner, to give her answer of regret to. She does not care to become a model—at the present time . . . So Don Niles likes to see his name in print. Well Don, here's number "3" now. Here's hoping all of this publicity doesn't go to his head . . . Charlene (Housewife) Snyder invites friends over to dinner Sunday evening. However, as guests arrive they find no host and hostess. Charlene and husband were out killing the rabbits for dinner. Going native on us, eh! What? . . . Ed Martin wants to know why his car is considered a bus, when McCulloch still lets Ivan Butler drive his around . . . Lisle Hodell is feasting his eyes on a beautiful picture of a turkey. He says he is going to observe Thanksgiving in the old traditional manner . . . 'Tis enough for now. Will sign off until another week. I remain—Sincerely as ever—your beloved

Elmer—The Field Mouse—
The Rat to you!

Bldg. 8 Tidbits

Emmett Rasor, Bldg. 2-E, shame on you, after playing euchre each noon-hour with us for years. You let your mother come from Lima to teach you a real game. Skunk is out of season, but boy, you got it just the same, again, shame on you.

Cleo Crowe, Bldg. 2-E, got his turkey early when he thought he was shooting at a pheasant. The farmer was doing some thinking, too, and charged $3.50 for the victim. Go to the zoo, sometime, Cleo, and learn the difference between these birds. Why not try "bingo," that's only two bits instead of $3.50.

"Peek-herr-oop-Johnny" is still throwing plenty "fur" in Carr and Truelove's laps during euchre sessions.

The Inspection Department in Bldg. 7 wishes to thank Miss Irene Perry, Bldg. 16-3, for the steady flow of second-hand pencils which she so kindly sends to us.

We hope there is a bumper bean crop for the next few years so that Marie Page, Bldg. 19-5, doesn't starve to death. Do you think that girl will eat chicken?

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

We came across such a good idea, or so it seemed to us, in a magazine not long ago that we are going to pass it along to you as a saver of time, temper, tired-feeling, and shoe leather. (Sandy, please take notice.)

The idea is just this, simplify your Christmas shopping by giving everyone on your list the same thing. Not the same identical article, of course, after all people do differ in their tastes, but select one general line and make your selections according to the individuals on your list.

Books are probably the first thing that comes to your mind, and it's certainly easy to pick out books for all the family from the three-year-olds to grandparents. Some of the books intended for the very young may prove so fascinating that you'll want to keep them for your own, anyway, buy them early enough to read yourself before Christmas Eve. For brides there are fascinating new cook books being written all the time, or for friends who are building or buying a new home, wouldn't they appreciate an up-to-date book on interior decoration?

You know how popular phonographs and records are just now, so why not consider the possibilities for gifts of music. There is as wide a range here as among the books, all the way from albums containing entire symphonies or operas to the latest releases on Bluebird or Decca records for any "jitterbugs" you may have on your list. We saw some albums containing three or four records each, some were favorite violin selections, another was labeled "dinner music," etc. Can't you picture one of these under someone's Christmas tree tied up with a wide red ribbon and huge bow?

Cosmetics are another "natural," and how delightful to spend a couple hours in this fascinating department of your favorite store, sniffing here and there and selecting an exotic perfume for one friend and a delicate flower-scented cologne for another. Don't turn grandma off with something in lavendar; sleuth around a bit, she may secretly be yearning for Sinful Soul or Indiscreet. You'll find smart new sets, or the old standbys, for the men in your life, too.

We could go on like this for hours, but we wouldn't want Sandy to feel that we were getting more space than he gets, so we'll sign off after a few general suggestions as to types of gifts—stationery, which includes such articles as playing cards, pens or pencils as well as the various kinds of letter paper; jewelry, costume and otherwise; glass, you know how many things are made from it nowadays, also plastics and leather. Finally if you are feeling unusually generous, flowers make superlative remembrances.

When Henrietta Deck, Bldg. 19-5, goes hunting rabbits there is only one piece left that is worth eating. Concentrate Henrietta and aim for the head or knock off the tail if you must, but please save them there thighs.

Hmm', and hmm! again. What was Irene Tresselt, Bldg. 26-3, looking at Wednesday while going to lunch. At any rate she stumbled right smack in the middle of the street. Irene, true to form, said, "I hope no one saw me."

Identification Badges Are Important — — Wear Them

NEWS THROUGH THE PLANTS

Punch Press 19-5

By Slug

Faces as a rule do not work us into a perturbed state, but when we noticed Richard Holmes walking down the aisle with his face marked as if someone had made a few passes with a tommy-hawk, we fell to speculating on what kind of an excuse he would be able to offer in his hour of need. Dick being a new man in our group, we expected something out of the ordinary in the line of excuses and we got it. When cornered Dick launched into a basketball story—how some big brute grabbed his head instead of the ball, and just as the big lug tried a one-handed shot, Dick's head slipped out of the brute's grasp leaving the marks. Well at that its something different than the usual open door story. * * * Paul Hendricks gave Louie Davis a terrific tongue lashing about some punchings which left Louie in a humiliated state of mind. Louie, on the spur of the moment whacked Paul across the chops with an imaginary glove demanding satisfaction (or something.) Paul's sword was a little dull so after a lengthy investigation he wishes to take this means of offering Louie a public apology. Better grab it quick Louie before he changes his mind.

Lloyd Garrison, Bldg. 19-5, would like to swap his laying hens for some good turkeys. They must have been the same hens that have been laying eggs under his window. Nothing to disturb sleep like a good cackling hen.

Bldg. 26-5 News

Woe is me—Walter Elliot and the Mrs. are going to bask in the Florida sunshine for the next two weeks.

Since the last heavy frost, Cary (Carnation) Baker is in the market for some long winter underwear.

Hearing is believing. Henry Gick is the best hymn singer in Bldg. 26-5.

You needn't doubt the legend of "Dutch Uncle" Eugene Dennig, Bldg. 26-5 has one.

Absent due to sickness:—Ross Cohagan, Bldg. 26-5.

Congenial Gordon "Mac" McDougal, Bldg. 26-5, Tool Division is still confined to his home on Nuttman Ave., recuperating from the past ten weeks' illness.

Deaths

Hiram Case Work, designing engineer in Bldg. 4-6, died November 16 following an illness of three weeks. He had been a Fort Wayne Works employee for the past 17 years. Funeral services were held on Monday afternoon with burial in Lindenwood Cemetery.

The Employees of Bldg. 26-5 extend their sympathy to Clarence Nussel in the death of his wife Mary.

Also to Tom D. Roberts, Bldg. 26-5 in the death of his mother.

Once you install a General Electric Sink, these five messy jobs are eliminated forever: (1) scouring out a greasy sink; (2) wrapping sodden garbage; (3) running out to the garbage pail; (4) cracked, reddened diswasher hands; and (5) laborious wiping of dishes.

Uncle McWell Comments In 19-3

While in a reminscent mood we fell to thinking about the "Brigham Young" screen show, and wondered perhaps if the Mormons didn't interpret the preamble to the Constitution as reading—"and to each man are guaranteed the rights of life, liberty, and the pursuit of a harem." But all joking aside, a collection of wives, such as was their belief, seems at best unwise, if only financially. And when you consider the probabilities of coming home at 3 a.m. from a session with "the boys in the back room," and having to figure maybe a dozen different alibis it becomes strictly a sucker game and pays off only in aspirin.

* * *

Our search for entertaining and unusual ads has led us often far afield; but even if we have to compose them ourselves we are usually rewarded by some little gem such as:

"Courtesy If It Kills You—

Have you ever met up with a Courtesy Cab? Take a turn in one of our Rigs . . . and get your hair bleached free. Don't tell the driver where you want to go, oh no. Let him guess and you'll get there twice as quick . . . What if you do feel only half as well afterwards? You can't live forever, you dopes!"

* * *

STRICTLY STUFF—In an essay, "The Lantern Bearers," from the pen of Robert Louis Stevenson, there is the following line—"for but to look at a man is to misjudge him." In other words, to get down to cases, who would believe that Jack Fyock, in his sublime moments, has the rudimentary flair and imagination for zestful, interior decorating? That Everett Keese can turn out very creditable smoking pipes and machine work in his home workship? That Sarah Jean Jones collects and hoards an array of recipes that, even though dating from adolescent days and labeled "delicious," would be the envy of many a culinary connoisseur? That Betty Baugham is reputedly a great grand niece of one of this country's illustrious statesmen, Henry Clay? That E. Jerome Frye is a wood sculptor and artist of much, much more than average ability? That Mary Munk is an excellent horsewoman, the art of which is not quickly mastered by anyone? That Helen Stahl can compose free verse with amazing subject material and spontaneity? That Jim Stouder does not support the cigar industry by himself, and has even been seen smoking cigarettes? That Don Shultz's capacity for intermittent nibbling is exceeded only by his skill with a camera? And that your Uncle McWell once danced a ballet number on the stage of a mid-western metropolis theater?

* * *

Dear Uncle McWell:

Who was that gal I saw you walking down the street with last night?—Jack (I Got'cha Now) Archbold, 19-3.

Dear (Sherlock Holmes) Archy:

That was no gal—that was your wife!—Uncle (It's a Small World) McWell.

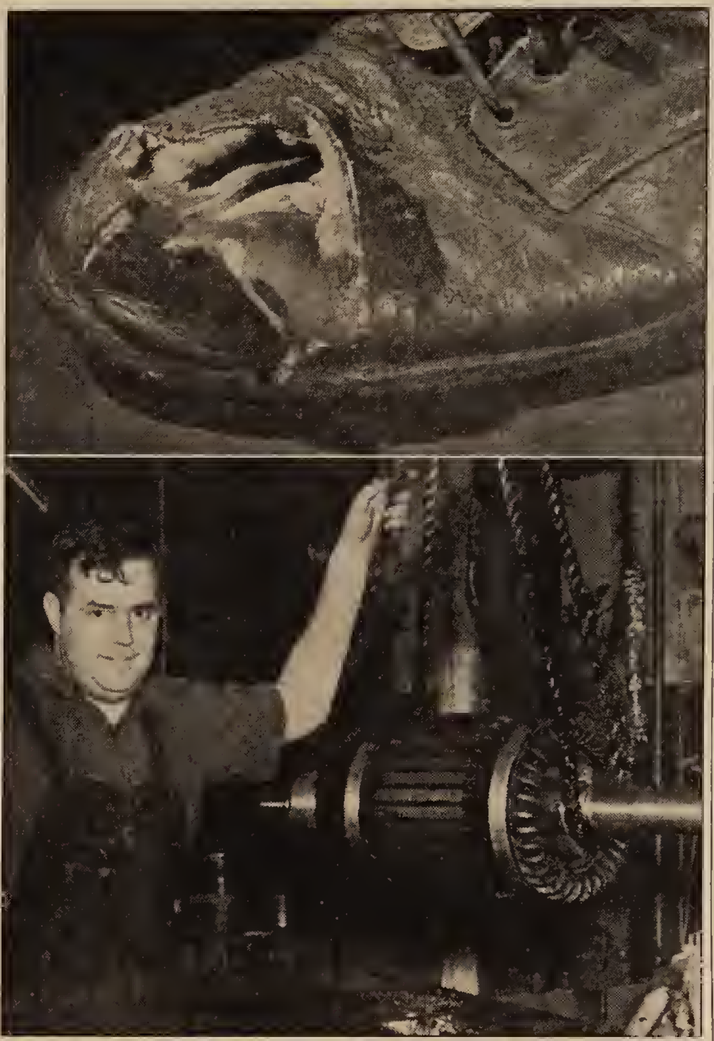
* * *

THEIR LAST WORDS DEPT.—"Honest, honey, from the moment I first saw you I knew that you were the only one!"

* * *

Don't forget—if you have any problems or questions of any nature, that you would like answered, simply send them to Uncle McWell, care WORKS NEWS, Bldg. 16-3. Please include your name and location. Hoo nose, maybe we can dig up two others and have a party?

The Safety Shoe Is Ruined But The Toes Are Safe



A glance at the toe of the safety shoe pictured above indicates what might well have happened to Glenn Felmlee's foot if he had not had the foresight to wear safety shoes. Glenn, who works in Bldg. 19-2, was handling the rotor shown with him in the above picture with one end of the heavy shaft on the floor and the coupling end on a platform, when the rotor suddenly started to roll. Before Glenn could retreat, the rotor struck his foot, but despite the heavy damage sustained by the shoe Glenn was uninjured with the exception of a very slight bruise. "It sure pays to wear safety shoes," says Glenn, "think what that shaft would have done to my foot without them."

Our Hero

Once in every generation there appears a man, who, although he lives in humble surroundings, completely outshines his fellow men and stands forth like the Rock of Gibraltar or Heddy Lamar. Such a man is Henry Lojek, fire-eating planner of Bldg. 19-3. Henry's particular duty on occasion when the fire bell rings is to rush down the stairs and swing open the front door that the fair sex may exit, unscorched. So great is love of duty that he has become allergic to bells. Came Friday morning and there arose a clatter of the bell on its weekly test at 8 a.m. Our hero sprang to his feet, raced down the stairs, and stood in a chilling November gale, performing his task of holding open the door. Late comers gazed with awe and admiration at what they thought was a door man (not yet furnished by the G. E.) of such fortitude and physical perfection that he braved the elements in shirt sleeves. After 10 or 15 minutes, Henry's associates missing him started a search which finally ended when one of the more hardy, donning overcoat and ear muffs, ventured outside. After much argument, Henry was persuaded it was all in fun, there were no girls to be saved, and that he was needed inside. His friends helped him into the building, leaned him against a radiator to thaw out and he is now leading his normal life—until the next clang of a fire bell. Such is the story of an unsung hero, who gave his all, who rose above surroundings, revered in the hearts of those who know of this glorious deed—a man among men.

Joe Burton of Bldg. 19-3 and Chas. Hughes of Bldg. 19-2, both inspectors in the Apparatus Division went rabbit hunting one day this week. Mr. Burton shot and crippled a rabbit. Then Mr. Hughes, who is quite a sprinter, caught the bunny, while Mr. Burton, who, by the way, always carries a supply of string in his pocket, tied the little rabbit's legs very securely and placed him in the auto. It surely seems that two mighty nimrods like Burton and Hughes could have tied the rabbit to a tree and then executed it in a proper manner.

Carl Weigman of Bldg. 19-3 had a strange experience one day this week. It seems Carl and a black and white hound were rabbit hunting, and the dog would not stay with him, so Carl secures a rope, ties the dog to his belt, and proceeds to continue his hunt, but the dog has different notions, and in the end, Carl and the dog wound up securely fastened in the brush. Not having a knife to cut the rope, Carl had to call for help.

Stranded

Frank Williams, Bldg. 17-1, decided to play peek-a-boo with the squirrels two weeks ago so he engaged Bill Fisher, Bldg. 17-1, to ferry him across Knapp Lake and then pick him up later in the evening. Bill agreed and soon forgot. Long after the shades of night had fallen Bill returned to find a frightened form pacing up and down the shore hallooing loudly for Bill to hurry before the squirrels would get him.

Employees in Bldg. 17-1 office and foremen in Bldg. 17-1 seemed to be wholly detached from the outer world as they gathered at the country home of Mabel Lieberenz last Friday evening to partake of an abundance of country fried chicken, cranberry sauce and all the trimmings. This annual event, originating three years ago, is one of the highlights on Bldg. 17-1's calendar of activity and is greatly enjoyed and anticipated by those who attend.

Now that the hunting season is on in full swing, readers in Bldg. 4-3 can expect a goodly lot of interesting stories of the hunt. Just as a starter, we give you a few events of the first day. George Collins went after pheasant, his car bogged down, he got no game. Ted Mullins fell into a creek with all the equipment. Buck Adams in search of pheasant got none, became disgusted and shot two field mice.

Ino, The Fly

Dear Editor:

Here is the dope I promised:

THE MYSTERY OF THE MISSING PLUM TREE

The Archibolds, they had a tree,
And it grew up and up,
—Till it finally got to be,
The friend of every pup.
But the "villain's" wife, she didn't like
That tree ahangin' round
So the villain, hero went, and
Chopped the poor thing down.
Now every man who has a wife
This story will find true
"The tree's now down; let's chop it up
But make the 'let's 'let's you'."
But being work for lily hands
The villain had a thought
On Halloween for trick or treat!
The neighbor kids got caught.
They said they'd take the tree away
For 50 cents a pound.
The tree is gone, but Archie's got
No kindling stacked around.

Melvin Faulk and Hans Anderson are now practicing for the speedway races. The other day I saw them going around corners on two wheels. Yep! and upset and out came the wrecker to clean up the mess. Car top heavy? Try a new design.

"Arkie" Rueswald would like an alarm clock. Especially for use at 7 o'clock on Monday morning.

Irene Courdevay will be Mrs. Benanti. The date—Thursday, November 21.

June DeWitt is working for the extra shekels by selling chances, Xmas cards, etc. The reason she says is a week-end in Ohio, but we still believe it's for two Xmas presents instead of one.

"Wahoo" Grothouse can't wait for cold weather. Ice fishing, he says.

Dick Gentis has a new coat. Is he proud. A regular Beau Brummel.

Yours,

INO.

Help Co-operate — — Wear Your Badge In Plain View

ON - - the Alleys

A little more gutter gab from the bowling circuits: It is rumored that "Sourball" Yahne of the Small Motor League, cleanup man deluxe, is to be traded back to the bush leagues very soon . . . Marriage seems to have rejuvenated Max Orr—bowling as a substitute Wednesday in the Small Motor League he clipped off a nice count of 592. . . Those Small Motor bowlers who will eat Thursday through the courtesy of the Club are Haugk, 101 pins over average; Walker, 84 pins and Wefel, 85 pins . . . Dick Kent must have had his "gal" with him Monday as he made a nice 4-7-9-10 split . . . Townsend of the Office League turned in six straight strikes but blew a seventh frame two pin, still finished with a nice count of 216. . . For the third time this season the high single game record score of the G-E Club Major League has been broken—this time Frank Matthews turned the trick with a 266 count . . . Looks like Lindemuth of the Major League has been laying down—he bowled 146 pins over his average to cop the Thanksgiving chickens . . . Seems as if Vivian Hickman and Ruth Reynolds of the Elex Afternoon League will have to eat Thanksgiving dinner together as they tied for the chicken—each rolling 198 . . . Evidently Arnold of the Transformer League thought they were giving chickens away as booby prizes last week as he netted the grand total of "87"—maybe somebody could make him a present of an egg . . . George Knaus of the Tool Room League invited all of the bunch out to his house Thursday to "Watch" him put away some of that 5 lb. chicken . . . George Glenn, Tool Room League hasn't yet made up his mind whether to be happy about winning a fowl Thursday or not—after being notified he was so excited that he guttered the next ball with a strike showing for the previous frame . . . They say Emily Lepper, the new Club candy girl is lowering Walt Mertz's bowling average and speeding up his heart . . . W. Dreyer seems to be the hungry boy of the Specialty Motor League copping the Club chicken on a 567 count.

DECATUR LEAGUE

Team	Won	Lost	Pct
Office	17	7	.710
Bearings	15	9	.625
Packers	14	10	.585
Tool Room	13	8	.620
Maintenance	13	11	.540
Shafts	12	12	.500
Stators	12	12	.500
Rotors	11	13	.460
Production	10	14	.415
Shells	10	14	.415
Flanges	10	14	.415
Testers	8	13	.380

The only team to score a three game win in the league was the Maintenance team, totaling 2390 to the Flange's 2234. The Shells tightened the race for first division by defeating the Packers two games out of three, the winners scoring 2306 pins total to the loser's 2222. The Office maintained their lead during another week of league play, defeating the Stators 2513 to 2254 for a two game win. The highlight of this series was the 977 game rolled by the Office. The tool room edged out the Testers two games winning 2361 to 2226. Bearings with a three pin edge won two games from the Shafts. The totals for the winners being 2262 to their victims 2259. Although low on total pins, the Rotors defeated the Production team two games. The winners totaled 2308 pins to their opponent's 2223.

George Auer led the way with a big 253 score. Other two-hundred scores in the league were T. Habold, 229; R. McDougal, 203; A. Buffenbarger, 200; P. Busse, 209; H. Cochran, 203; M. Hoagland, 201-203; C. Weber, 219; O. Fisher, 223.

Guns Are Deadly Weapons And Are Meant To Kill

Gunshot wounds are seldom slight. Remember this if you are one of the seven million or so persons who obtain licenses to hunt with firearms.

You would naturally think everyone who calls himself a sportsman would use common sense in regard to firearms—or is it that many so-called sportsmen really *don't* know how to handle a gun properly and safely? Perhaps that's it, for every year nearly *1,000* persons are killed in hunting accidents afield, while roughly *2,000* more are fatally wounded in firearm accidents of a non-hunting character. Thousands more are injured, some crippled and maimed for life.

You might be surprised to know that there are hunters (who ought to know better) who use their guns for hurdling fences, for hammering down a tent stake, for pointing out something to a fellow huntsman, or for rests when they get weary. They carelessly drag their guns behind them through fences or underbrush. They thoughtlessly lean their guns against trees. These are the "quick trigger" hunters who insist on carrying a loaded gun in the crook of the arm ready for instant firing at the first movement in the brush—be it man or beast. These are the kind who are always ready to blame an accident on a "faulty weapon."

The real hunters are careful hunters. They are careful of their companions, themselves and their weapons. Before starting out, they carefully examine the gun to make sure it is clean and that the trigger and hammers are free (many a hunter has been killed because a clogged barrel burst when the gun was discharged.) They examine the barrel from the breech—NOT the muzzle.

You can recognize the expert hunter because he always walks with the muzzle pointed toward the ground, with hammer uncocked and the safety catch locked (every year scores of people are killed because an "unloaded" gun goes off.) You won't find the real hunter climbing in or out of an automobile with a loaded gun; he waits until he reaches the scene of the hunt to load.

When in the vicinity of game, the real hunter either carries his gun butt against the right shoulder, muzzle up, or he holds it with muzzle down toward the ground—and he'll tell you he can shoot just as quickly. That is, after he's made certain of his target (once a hunter carrying a deer on his back was killed by a "quick trigger" man in another party.) Before the real hunter goes over a fence, he first puts the gun through, muzzle foremost, and lays it down on the ground. He's careful while climbing steep banks or walking on unsteady or slippery ground; he would rather miss a shot any day than risk an accident.

You'll also find the real hunter wearing bright red strips of cloth for his own protection. He knows that a white handkerchief has frequently been mistaken for the white flag of a fleeing deer. This hunter is not likely to hunt from a boat, unless he's alone, and then he rests the gun in the front of the boat, so that it cannot fall down and accidentally discharge, with the muzzle pointing up and out of the boat (hunters have been drowned when a gun has blasted a hole in the boat.)

Take a tip from the real hunter. Learn to think first, to control your impulse to fire at the first suspicious object. Choose your hunting companions carefully. The fellow who simply can't resist drinking should be left behind to keep company with the would-be "funny" type who must have his bit of horseplay with firearms (guns have no sense of humor). And last, but most important, AT ALL TIMES AND IN ALL PLACES, KEEP FIREARMS OUT OF REACH OF CHILDREN!

IN THE ROUGH

By WALTER SUNIER

From the high point of the fairway there is nothing to be seen now except the white clouds drifting on their course. The rough below is still and colorless against the bright vault above. Not a golfer, not a flying ball marks the emptiness of one of the busiest fairways. There is not a movement anywhere on the playing ground. The only indication that life moves on comes from the sight of cars scurrying along the distant highway. It looks odd with nobody in sight where the fun used to be.

The bunkers and traps are there yet as if they were the monuments of some folks long since gone. A search discloses a relic of the past—a golf ball. The man who lost it struggled here in the days gone by—in the good old pre-election era.

The drab color of winter lies over the course. Yet how lovely was the green of the fairway in spring and summer. There never was a more perfect scene with the putting greens setting like bright emeralds in the midst of the quieter surrounding green. Can it come again? It must because it always has.

We move down the fairway. Along the creek there are only signs of blessed tranquillity. Here have trod the feet of many men. Not only the feet of ordinary golfers have trod the spot but the feet of the mighty Hagen. The trodding must come into life again when the grass, the bushes and the trees come into life again. But times have changed. Men are murdering each other with all the force at their command. Perhaps some feet will trod the place again. Perhaps all will not.

In one last glance a bird wings lazily away in quiet undisturbed peace.

Named Chairman

A. F. Dickerson, manager of the General Electric Lighting Division at Schenectady, has been named chairman of the Street and Highway Lighting Committee of the Illuminating Engineering Society. He has served that organization as a director and as a member of various committees.

Club Drops Match

Making their debut in the YMCA Water Polo League last Wednesday the G-E Club sextet found the opposition Bethany Presbyterian Church too tough, consequently dropping a 7-3 decision.

The Club put up a good battle but the newness of the sport plus the lack of capable substitutes was too big a handicap to overcome. Goddard, Captain of the G-E team and a member of the YMCA swimming team for the last five years, played a beautiful game scoring all of his team's markers besides contributing several point saving defense plays.

The team is in dire need of several more players. Anyone interested should call Johnny Allen, 739, or see Max Goddard at Winter St. It is not necessary to be a good swimmer.

End Long Service

(Continued from Page 1)

he has seen the old wooden frames superseded by marble, then slate, then steel panels, and in the last few years by totally enclosed fabricated structures.

Foreman of the department for many years, Mr. Steinau was familiar with all the problems of switchgear manufacture.

Mr. Steinau has planned for some time to take his well earned pension and enjoy the opportunity to hunt and fish when he wishes without having to consult the time clock and factory whistle.

"I've always enjoyed my work at the G-E. Coming to the plant each morning has become second nature. I've found the people I worked with considerate, friendly and interested in what they were doing. I appreciate now, as never before, what the pension plan means. I can retire assured of an income, free to enjoy myself as I see fit. I want to say a good word for the M.B.A. It has been a great help at times when I needed help the most; my days in the hospital are too recent to be forgotten. I'm glad to retire, but sorry to be away from a job that I've enjoyed so many years."

Mr. Neuman, who plans to make his permanent home in Phoenix, Arizona, first worked for the Company in 1892, and then spent some years at other work. On February 4, 1907 he rejoined the General Electric organization, and he has worked here continuously since that time.

In 1910 he was made foreman of the winding department in Bldg. 16-3, and later he was transferred to Bldg. 17-4. Upon completion of Bldg. 4 he was transferred to that department as foreman of winding. He served in various capacities until 1934 when he was assigned to fractional horsepower motor assembly and he continued in this work until his retirement.

Mr. Neuman, affectionately known as "Pete" to his many friends, is an enthusiastic booster for the Company pension and other benefit plans.

Dispensary Service On Saturdays

Notification is given that the dispensary in Bldg. 21 will remain open on Saturdays for regular dispensary service. The dispensary will be open from 8:00 A.M. to noon and from 1:00 P.M. to 5:00 P.M. Employees are asked to use the north door fronting on the alley.

GENERAL ELECTRIC
NEWS
FORT WAYNE WORKS

PUBLIC L... FORT WAYNE ALLEN CO., IND.
561434

Volume 24 FORT WAYNE, INDIANA, FRIDAY, NOVEMBER 29, 1940 Number 41

A Happy Thought! — Worth $160

The old adage "it's the little things in life that count" is certainly justified according to the experience of S. J. Miles, Bldg. 4-2, who today has an extra $160 because he applied the adage in making a suggestion. Mr. Miles noticed that small switch covers used in considerable quantities in connection with certain types of fractional horsepower motors were costing, what seemed to him, entirely too much. He investigated and found his contention proven in order. Another source provided the covers at a much lower cost and the award of $160 followed.

It is interesting to note that Mr. Miles has received $260 in suggestion awards this year, two previous awards having been for $75.00 and $25.00.

Build Addition To Building 19

Work will be started in the near future on the construction of an addition to Bldg. 19. The addition will be used as shipping quarters for finished apparatus from the Motor-Generator Division and will entail approximately 3,150 square feet.

The structure will be added in the form of a wing at the east end of the building.

Start Enforcement Of Parking Regulations

Drastic enforcement of parking regulations affecting the streets near the Broadway and Winter Street Plants will be started on Monday, December 1, it is announced by Custer A. Dunifon, traffic lieutenant of the city traffic bureau. Many of the streets, now being used for all day parking, have three hour parking limits. Broadway, which is also being used has a one hour parking limit.

Safety Committee Holds Meeting Here

Representatives From Major Apparatus Works to Gather in Fort Wayne

The General Electric Safety Committee, including in its membership representatives from the major apparatus works of the Company will meet at the Fort Wayne Works on Monday and Tuesday of next week, it is announced by W. J. Hockett, Fort Wayne Works member of the committee. Activities of the committee are of the greatest interest and importance to all employees for the committee is responsible, to a great extent, for the promotion of the Company's safety program throughout the General Electric organization.

The meeting at Fort Wayne will be presided over by G. E. Sanford, chairman. Other members in addition to Mr. Sanford and Mr. Hockett are: W. M. Nelson, Schenectady; M. M. Chesney, Pittsfield; M. A. Gimbel, Philadelphia; M. C. Goodspeed, Erie; H. F. Gordon, River Works; V. C. Pendelton, West Lynn; R. A. Powell, New Kensington; J. Waddell, Bridgeport; H. N. Welch, Bloomfield; A. G. Sandford, Pittsfield Plastics and W. H. Burchett, Nela Park.

(Continued on Page 2)

FINAL BOND DEDUCTION WEEK OF DECEMBER 13

Final payroll deductions for G-E employees 4% bonds subscribed for in November and December, 1939, will be made the week ending December 13, the Bond Office in Schenectady has announced. This deduction will combine the 49th and 50th installment payments.

When the offering was made, it was provided that the final deduction or 50th payment should be made the week of December 21. However, as the 50th payment, less the amount of interest allowance, would not be more than 15 cents on a $50 bond, it was decided to combine the last two payments. Thus, no deduction will be made from the payroll distributed just before Christmas. The bonds will be delivered as soon as practicable.

Given Appointment

Peter A. Helmer

The appointment of Peter A. Helmer to the position of night foreman of the General Service Division is announced by J. B. Greer, superintendent of the Division. The appointment becomes effective immediately.

Mr. Helmer joined the Fort Wayne Works organization in 1924, his first position being that of lathe operator in the Meter Division. A year later he was transferred to the General Service Division and for eight years was in charge of night service for that Division.

Dispensary Service On Saturdays

Notification is given that the dispensary in Bldg. 21 will remain open on Saturdays for regular dispensary service. The dispensary will be open from 8:00 A.M. to noon and from 1:00 P.M. to 5:00 P.M. Employees are asked to use the north door fronting on the alley.

Employees Requested To Restrict Information On Operation Of Works

Because of the world conditions the Nation has embarked upon a huge program of National Defense, including the production of equipment for the Army, Navy and the Air Corps. The accomplishment of the objective of "making America safe from foreign aggression" has become the responsibility of industry along with other branches of our national activity. Within industry are the thousands of men and women who do the actual work and to whom is laid the direct assignment of producing accurate materials for vital purposes.

The General Electric Company has begun its part in this, the greatest peace-time program of preparedness. The patriotic privilege that is at hand and the importance of the assignment invites the full co-operation of every employee. Only through such cooperation and individual interest can the program succeed for the benefit of every American. We are all directly interested, we all can help.

The Fort Wayne Works has many orders for Defense work. The Identification Badge System has been instituted for the protection of the employees, their jobs, the work being done here and for the plant. The Federal Government is naturally desirous of eliminating any possibility of anti-American activity or any condition that would jeopardize the National Defense Program.

Therefore, employees are requested not to disclose information concerning the Works, the equipment manufactured here, etc., to anyone other than individuals directly associated with work within this plant. They are requested to think carefully before answering any questions or in any way disclosing such activity here.

(Continued on Page 2)

Safety Awards Good-Will Gifts

There has been some curiosity regarding the disposition of safety awards made during the contest being held through the final quarter of 1940 at the Fort Wayne Works. Two instances have been called to our attention during the present months wherein awards were applied to the best possible use. It is reported that the employees in Bldg. 4-5, Ed Klomp's department, gave their award to a fellow-employee who is confined to the hospital. In Bldg. 17-2 employees turned the award over to Irene Meyers, Bldg. 21, to purchase baskets of food for needy families.

Coolidge And Crocker Are Made G-E Vice-Presidents

Dr. Wm. D. Coolidge

Stuart M. Crocker

The appointment of Dr. W. D. Coolidge and Stuart M. Crocker as new General Electric vice-presidents has been announced by Charles E. Wilson, president of the company.

Dr. Coolidge will continue as director of the General Electric Research Laboratory in Schenectady. Mr. Crocker will relinquish his duties as manager of the company's air conditioning and commercial refrigeration department at Bloomfield, N. J., to make his headquarters in New York City where he will co-operate with and be assisted by all commercial departments

• Safety And Defense

These are days in which all loyal Americans are concerned about the defense of our country. With the world at war, we suddenly realize that forces are at work which threaten seriously the security and freedom of our American way of life.

To withstand these forces we must have not only wise and energetic public officials, but each of us must accept responsibility for that part of this national problem which comes within the scope of his personal life.

National defense and national safety are closely coordinated ideas. We must conserve man-power. Our country needs the utmost of productive work from each individual. It cannot spare through accidental injury a single mechanic or truck driver, engineer or teacher, business man or public official, farmer or homemaker. Even in time of peace our highways are taxed to the limit, and in time of war the congestion and confusion would be infinitely worse.

Therefore, any weaknesses that now impede smooth, rapid and uninterrupted flow of people and material from point to point must be corrected. To this end everybody must help. There would be a need for thousands and thousands of reliable, skilled and thoroughly safe drivers to move the men and material of war and wartime commerce.

As the nation goes about building its defense, each driver and every pedestrian should feel an added responsibility to help avoid wastage, either of raw materials or our human resources. —*An editorial by W. H. Cameron, Managing Director, National Safety Council.*

"You can't accomplish much just by sitting still and waiting for something to happen. So industry spends much of its time and much of its income in *searching for* new things, new ideas, new products. This process is called industrial research. Thousands of companies in every part of the United States maintain research laboratories, where inventors and scientists seek new products and perfect ones that we are using today. Last year, American industry spent over $200,000,000 in research work alone."—*Dr. John Richelsen.*

BULLETIN

Employees called under the Selective Service Act, receive questionnaires which must be returned to their Local Draft Boards within five (5) days.

The Payroll Department will gladly render any assistance possible in filling in these questionnaires and any employee desiring assistance may call on—

Broadway Plant—E. F. Waldschmidt, Payroll Dept., Bldg. 18-2; or L. J. Schnieders, Payroll Dept., Bldg. 18-2; or W. H. Fritz, Payroll Dept., Bldg. 18-2.

Winter Street—M. A. Smith.

Decatur—R. Leitz

When employees have been classified and have received card Form D.S.S. 57, they are required by the Act to notify their employer, therefore, employees upon receiving this form should immediately contact either of the above named.

Employees should arrange with their Foreman or Department Head for absence from regular work for this purpose.

J. W. CRISE,
Works Accountant.

No Indians! But They Did Have A Good Time

Perhaps a little disappointed because they found no buffalo or Indians roaming this "way out west" part of the country four members of the Pittsfield Works Women's Club who visited Fort Wayne over the week-end nevertheless had what they termed "one grand time." Two scenes taken at the Chatterbox on November 23 where they were breakfast guests of the Elex Club, are shown above. In addition many other gatherings were enjoyed by the girls during their four days stay. The guests were Helen Ring, president of the Pittsfield Club, Charlotte Stoessel, Dorothy Barraclough and Ida Lussier.

Free Movies At G-E Club Sunday

Headlining the G-E Club's second Sunday of free movies, December 1, will be the feature picture entitled "Panama Patrol" starring Leon Ames, Charlotte Winters and Adrienne Ames.

The picture, dealing with the United States, aerial defense of the highly important Panama Canal, is a vital topic at the present time and should please both young and old.

Employees Asked

(Continued from Page 1)

It is the privilege of every employee to assist in this Defense work and it is likewise the job of everyone to make it possible for the work to proceed without interference or delay. Through such cooperative effort and alertness there can be no question but that the Fort Wayne Works' employees will establish a creditable record in our National Defense Program.

COMING EVENTS

G-E CLUB FREE MOVIE at the Club starting at 2 and 4 p.m. Admission by membership card, Sunday, December 1.

G-E CLUB DANCE on Saturday evening, November 30, starting at 9:00 o'clock.

SUPERVISORS CLUB election of officers on Wednesday evening, December 11.

APPRENTICE ALUMNI ASSOCIATION dance this evening at Zulu.

Safety Committee

(Continued from Page 1)

The committee has been functioning since 1913 and at that time represented one of the first industrial organizations of its kind in the country. The meeting next Monday and Tuesday is the first in Fort Wayne since 1936.

During the two day session many phases of accident prevention work will be discussed and suitable recommendations made for various applications.

Low-Priced Midget "Handy" Floodlight

A new low-priced midget "Handy" floodlight has been announced by the General Electric Company. Designated Type L-65, the floodlight burns a 100-watt incandescant lamp. It has numerous applications wherever a small inexpensive unit is needed to produce a flood of controlled light, according to F. D. Crowther, lighting sales manager. Among some of these applications are parking and used car lots, in stores and show windows, at road side stands and in markets at delivery platforms, in gardens, and for home recreation.

The floodlight weighs 3 pounds and stands about 9 inches high. It has a 4½ inch steel mounting base which is of sufficient size to hold the light upright without permanent mounting. The base also is arranged for mounting on a 3- or 4-inch outlet box. Horizontal and vertical bolt adjustments make possible various positionings of the light.

Name Vice-Presidents

(Continued from Page 1)

in furthering the general interests of the company.

Noted for his own achievements with X-ray tubes, ductile tungsten and submarine detectors, Dr. Coolidge has been a member of the research laboratory staff since 1905 and director since 1932. He is a member of the National Inventors' Council recently created to encourage civilian inventions as part of the national defense program.

Mr. Crocker has been manager of the air conditioning and commercial refrigeration department since May, 1939, and a vice-president of the International General Electric Company since 1930. His career with General Electric dates from 1921 when, after work in the traffic and sales departments of the Radio Corporation of America, he became assistant to Owen D. Young, then chairman of the boards of both R.C.A. and General Electric.

In 1924, he accompanied Mr. Young to Europe as secretary of the American delegation to the experts' conference which resulted in the Dawes plan. In 1927, Mr. Crocker was elected vice-president and treasurer of the United Electric Securities Company, a General Electric subsidiary interested in foreign public utility financing. In 1929, he accompanied Mr. Young to Europe, for the reparations conference which formulated the Young Plan.

Mr. Crocker resigned the United Electric Securities posts in 1930 to become assistant to Clark H. Minor, president of International General Electric, and vice-president of that company. In January, 1938, Mr. Crocker was named assistant to Mr. Wilson, then executive vice-president of the General Electric Company, and held this post until named air conditioning and commercial refrigeration manager.

During the World War, Mr. Crocker saw service overseas with the North Sea mine fleet. He is a native of Cambridge, Mass., and a graduate of Harvard.

Dr. Coolidge is also a product of New England, being born at Hudson, Mass. He was graduated from the Massachusetts Institute of Technology in 1896. After earning his doctor's degree at the University of Leipzig in Germany, he joined the M.I.T. faculty and was an assistant professor of physicochemical research when he resigned to join General Electric.

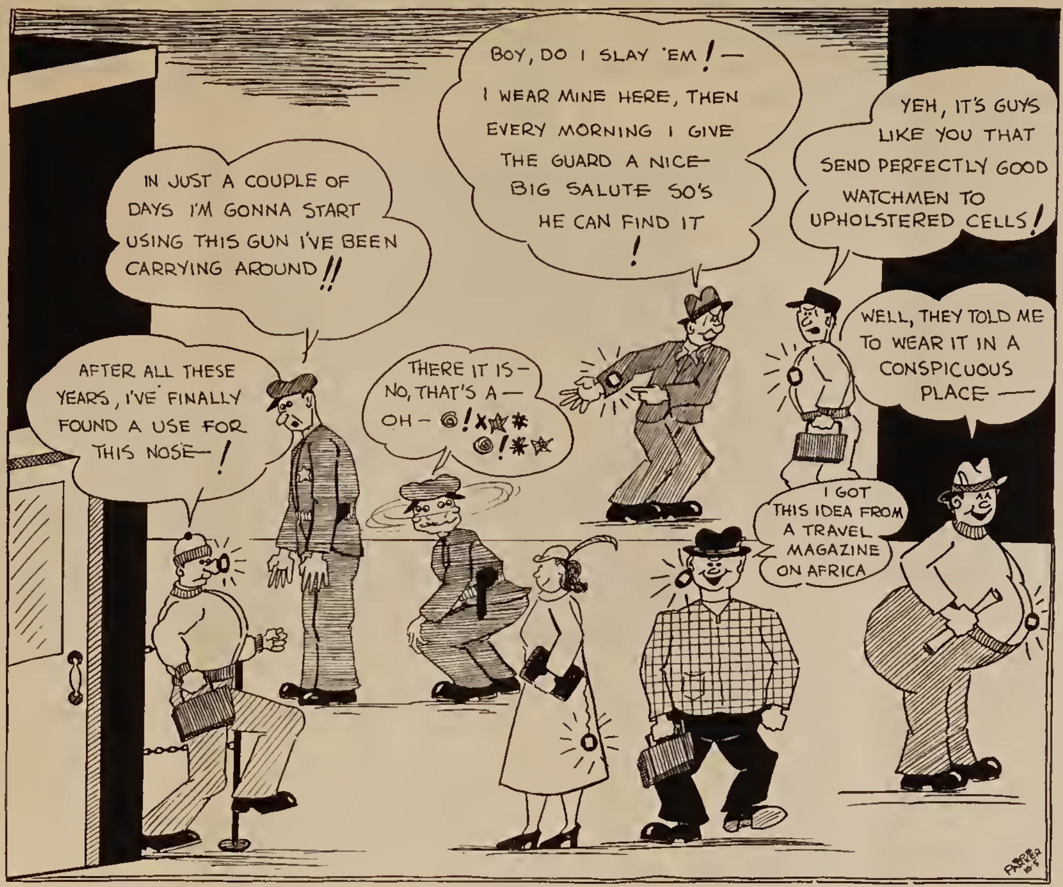
He received the Rumford Medal for the invention and application of ductile tungsten. This had its first use as filament material for incandescent lamps. His scientific developments also include the wrought tungsten target in the X-ray tube; wrought tungsten contact points for make and break devices as in automobile ignition; the hot-cathode type of X-ray tube, which bears his name; various types of X-ray generating equipment; the "C" tube, a listening device used for submarine detection and underwater signalling. He developed this during the World War and it was named in his honor.

Dr. Coolidge is one of the few men having the honorary degree of Doctor of Medicine, an honor accorded him in 1937 by the University of Zurich for his X-ray work. He also has honorary degrees from Union and Lehigh, and this year received a "Modern Pioneer" plaque from the National Manufacturers' Association.

His scientific honors include the Faraday Medal, the John Scott Award, the Washington Medal of the Western Society of Engineers, the Edison Medal of the American Institute of Electrical Engineers, Hughes Medal of the Royal Society, Louis Edward Levy Medal of the Franklin Institute, the gold medal of the American College of Radiology, and the Howard N. Potts Medal.

H. L. Andrews, General Electric vice-president in charge of the company's appliance and merchandise department, will add management of the air conditioning and commercial refrigeration department to his present duties.

Now You See It — Now You Don't — By Bob Parker



IN JUST A COUPLE OF DAYS I'M GONNA START USING THIS GUN I'VE BEEN CARRYING AROUND!!
BOY, DO I SLAY 'EM!— I WEAR MINE HERE, THEN EVERY MORNING I GIVE THE GUARD A NICE BIG SALUTE SO'S HE CAN FIND IT!
YEH, IT'S GUYS LIKE YOU THAT SEND PERFECTLY GOOD WATCHMEN TO UPHOLSTERED CELLS!
AFTER ALL THESE YEARS, I'VE FINALLY FOUND A USE FOR THIS NOSE—!
THERE IT IS— NO, THAT'S A— OH— @!x✯✱ @!✱✯
WELL, THEY TOLD ME TO WEAR IT IN A CONSPICUOUS PLACE —
I GOT THIS IDEA FROM A TRAVEL MAGAZINE ON AFRICA
PARKER

Although there has been a considerable reduction in the number of employees who are forced to sign for temporary identification badges on entering Company property there is still a considerable number who might well be classed among those individuals who sigh and quote, "I'd forget my head if it wasn't fastened to me." In the meanwhile the natural tendency to treat the innovation requiring the wearing of badges in a half serious, half humorous, manner has given way to an appreciation that the measure was instrumented for the protection of all of us; particularly for the safeguarding of work being done on the National Defense program, a program that is the concern of us all.

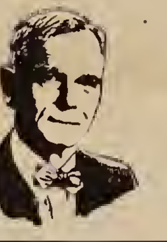
Second class offenders in the identification badge wearing program are those employees who insist on concealing their badges until under the very eyes of the gate patrolmen and then producing them from pockets, pocketbooks, wrist watch straps, belt chains, or what have you, upon being challenged.

Steps to curb both forms of violations are being considered at the present time. Employees are again asked to cooperate to the fullest extent by making sure before they leave for work that they have their badges with them, and second that they wear the badges in plain sight where they can easily be seen by patrolmen.

F. H. Craton Heads G-E Transportation

Forman H. Craton has been appointed Section Head of the Industrial Haulage Section of the General Electric Company's Transportation Department at Erie, Pa., effective November 18, it has been announced.

Mr. Craton has been with the General Electric Co. since 1924 when he joined the company's Factory Management Course at Schenectady after being graduated from Syracuse University with the degree of Mechanical Engineer. Following this he was a member of the regular G-E testing course.



SCIENCE FORUM

BY

L. A. HAWKINS

EXECUTIVE ENGINEER
GENERAL ELECTRIC RESEARCH LABORATORY

Q. Is cancer contagious?

A. Absolutely not. The reason for this is that cancer is not a germ disease, but a cell disease. These cells are easily damaged, and to transfer a cancer from one person to another would be a difficult thing, from what is known about animal cancer. It is often necessary to inoculate at least 100 other animals to obtain three or four growths from a primary tumor. Also, it has never been possible to transfer a cancer from a human being to an animal or from an animal to a human being. Such transference is strictly limited to animals of the same species, and often of the same strain. For instance, cancer of the white mouse can rarely be transferred to the wild black mouse.

Q. Are sharks of any use, or are they just destructive?

A. Sharks are of some use, because their skins may be used for leather; but certainly they do more damage than they do good. The smooth dog-fish shark is an important enemy of the lobster; the horned dog-fish shark is probably the most serious destructive agency with which fishermen have to contend. It devours valuable food fishes, drives away or destroys schools of squids used by the fishermen for bait, and robs and injures nets and other fishing gear. Experts estimate the damage from dog-fish sharks to marketable fish and fishing gear in Massachusetts alone at not less than a half a million dollars per year.

Q. What is the most plentiful metal in the world?

A. The most extensively distributed of the metals is aluminum. Aluminum never occurs free, but nearly all stones except sandstone and limestone contain aluminum compound.

Q. What is the meaning of units called mils?

A. A mil is simply a unit of angle, just as a degree is a unit of angle. A degree is 1/360 of a circle; and a mil is 1/6400 of a circle.

Q. Why do very cold objects, such as dry ice and liquid air, burn the skin when touched?

A. The word "burn" is really a misnomer. The damage done to the skin is really a very severe frostbite, which has somewhat the same appearance and feeling as a burn from a hot object.

Q. Is it possible to produce a perfect vacuum?

A. It is not possible to produce a perfect vacuum in the laboratory. We can produce a vacuum in which the pressure is only one-one hundredth billionth of an atmosphere; and for all practical purposes this may be considered a perfect vaccum.

Regular Schedule Is Arranged For FM Broadcasting

General Electric To Present Seven Hour Program Daily Over Experimental Station

Frequency modulation broadcasting, commonly called FM high-fidelity, staticless radio, was inaugurated by the General Electric Company Wednesday evening, November 20, when its experimental station, W2XOY, located in the Helderbergs 12 miles from Schenectady, began a regular schedule of seven hours daily.

The initial program featured the appearance of Phil Spitalny's famous all-girl orchestra. Short talks were given by Charles E. Wilson, president of General Electric, and Dr. W. R. G. Baker, manager of the company's radio and television department and chairman of the National Television Systems Committee.

After the formal opening, programs will originate in the new WGY studios in Schenectady and will be presented from 3 o'clock in the afternoon until 10 o'clock at night, seven days a week. Since FM has the characteristics of television in that the present-type wire lines will not carry the programs, a short wave transmitter will send the signals to the Helderberg station. The complete schedule of the daily programs has not yet been definitely arranged but will include several news reports, many of which will feature neighborhood news covering the area to be served by this new station. This will be within a radius of about 50 miles from the Helderberg antenna.

Standard broadcast receivers will not receive programs transmitted on the new system, but General Electric now has on the market a full line of sets built to receive the staticless programs, one of which also makes available standard American broadcasts, foreign and domestic short wave stations, as well as television sound programs, and which can be used in conjunction with a television picture receiver. It also has developed a translator, which can be attached to the present-type receiver for FM programs.

One of the outstanding characteristics of the new system is the elimination of interference between stations.

Place Your Badge Where You Won't Forget It Monday Morning

SANDY SAYS

Those of ye who read high class literature like the Rubaiyat of Omar Khayyam, and the WORKS NEWS, remember the couplet—

"Of all the sad words of tongue or pen, the saddest of these 'It might have been'."

Which means that we feel pretty sorry for ourselves when we've taken the wrong road or have had a bad break. I guess we wouldn't be human if we couldn't see greener across the fence and want to be there.

Most of us would like to be in someone else's shoes. We who work would like to loaf. Those without jobs would like to work. Comedians would like to be tragedians, and some Republicans would even like to be president.

Now I'd like to be something different, too. I'd like to write an intelligent column, full of deep, sombre thought, that would bring tears to ye gentle readers' eyes.

Naturally, the saddest things a Scotsman can think about are expenses and waste, so I'll tell ye about a trip Cousin Colin and I once took in his Model T.

Of course, we gave it the best of care. Only oil that had been drained from the finest cars was good enough, and we used only free gas —right out of the tank cars when they weren't sealed.

I noticed that Cousin Colin read the weather report every morning, and then decided which way we'd go that day. On the last morning he was very sad after studying the forecast.

"Sandy," he said, "I've been frugally planning the trip, day by day, but now if we want to get home, we'll have to drive all day today without the wind at our backs."

Weel, we lost plenty that day, but it would have been much worse. if we hadn't found a big truck to follow.

Sometimes losses can't be avoided, but I'm telling you they can be cut down. They say our manufacturing losses amount to millions, and that a fifth of it is scrap, and half of it is rework, something we must do over because we were wrong the first time.

I can't think of anything sadder than that. Maybe we should sit down each morning and plan our day's trip carefully, and figure how to do everything right the first time.

I hear that our manufacturing losses amount to one's hour labor in every five. That sounds like a lot to Old Sandy, and if our business gets better our bosses may have to say:

"Of all the sad words of tongue and pen, the saddest are these, 'I'm out of men'."

Loretta Bloom, Bldg. 16-1, will let you in on her secret. She's on a diet and all she eats in a day is a quart of ice cream and maybe a piece of pie or two.

Add Harvey Fisher, Bldg. 26-1, and Mack McCray, Bldg. 26-2, to the list of those who went hunting and returned with nothing save a wet skin and an empty stomach.

Well, well. Up pops the question of what happened to the refreshments the two bowling teams from Otto Roehm's department were supposed to have last winter. 'Tis said the chances look bad of ever collecting.

Borings From 4-4 Office

Carrying on with Elmer, the field mouse, we find, however, Elmer is at last getting some competition. The other mouse was found out in the telautograph. Vern Daseler was answering some inquiries, and the other vermin appeared on the scene. My honorable competitor caused just as much trouble as yours truly when I started. . . . Art Wedler came to work the other morning with a great big black and blue (deep purple to ya!) on his arm. He said he was hunting and the gun wore the skin to this beautiful color. Well, it was a good story while it lasted, and as sore arms go, it was good while it lasted. (good and sore). . . . Mike O'Grady is saving match book covers. So if you get some real interesting covers, just send them over to Mike and he will appreciate it a lot. . . . New interests in the recent football games. Notre Dame lost again to Northwestern. Now Bill Skevington, what do you think. Ardeth Hemp was plenty disappointed in the Ohio State game. Ardeth, it was just 40 to 0. Could have been worse. . . . Marge Boerger was plenty happy, however, as her Alma Mater came through. Indiana beating Purdue 3 to 0. Mike Brayer lost a bet to Marge on the game. Now I am warning you folks, don't ever bet with Marge. She never bets unless she knows she's going to win. Thomas(Quiet) Tom Staley, was seen by Elmer the field mouse in person at a dance last Thursday night. Tom you acted like a gentleman even while your contest continued throughout the night. . . . Snow flurries, sleet, hail, rain and more snow has increased the sale of boots and what have you. Ardeth Hemp was seen purchasing a beautiful pair of boots. She came back from town in all the slush with her new boots in the sack. Sbe says, however, that she is saving them until cold weather arrives. . . . Mary Bangert and husband were seen in the second row of the Palace Theatre. Some Hawaiian follies, eh what Ed. However, your place should have been in the first row. . . . Oh! and Virginia Sanders, at last smells a rat. Now who could that be? . . . 'Tis enough for now, I remain your ever nosey Bldg. 4-4 correspondent. 'Till next week.

Sincerely,

Elmer, the field mouse.
(The Rat to you.)

Unless Leo gets back on the day shift, we think Sadie Hawkins Day will mean tragedy for the Wire Department's most eligible bachelor.

Some weeks ago we reported the capture of a deer by Glenn Greek. We now report that it tasted swell.

Alvy Place, Winter Street, is the proud father of a nine and a half pound baby boy.

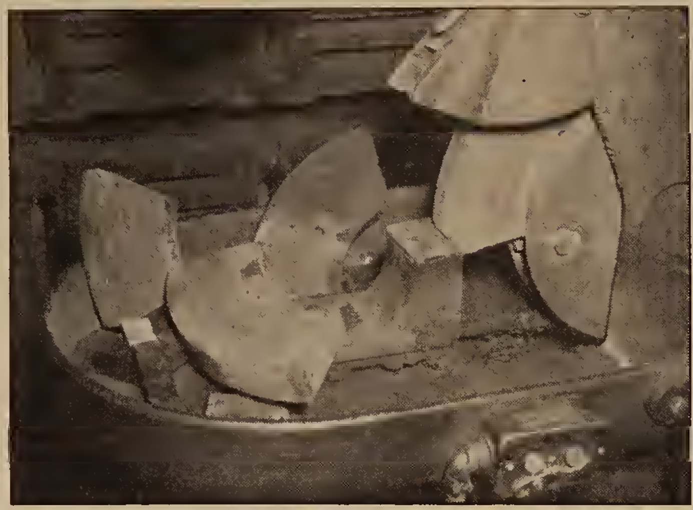
Did Virgil Bobay, Winter Street, actually go hunting all day Monday? He came back saying he hadn't seen anything worthwhile shooting. Mebbe he should have carried a mirror.

Sergeant Frank Martin will be sporting just what the well dressed man should wear in the line of ties. We feel certain of this because we saw some of them being selected for him last Saturday.

Mr. and Mrs. Wladyslaw Magsorski entertained with a 4:00 o'clock dinner at their home last Sunday. The honor guests were Mr. and Mrs. Don Voorhees and Mr. and Mrs. Ted Mullins.

Wear Your Identification Badge

It Lived Up To Its Name



By H. L. Smith, Safety Engineer

The guard pictured above with the broken emery wheel certainly lived up to its name. In the words of the employee using the wheel at the time it bursted "I would have shaken hands with St. Peter if the guard hadn't held."

The mishap, which occurred in Bldg. 19-2, was caused by the grinding of a tool on the side of the wheel. The tool jammed between the wheel and the water pan on the machine.

The wheel, with a 20-inch diameter, was, of course, never intended to be used for side grinding. Our safety rules for grinder operators specifically warn against grinding on the flat side of straight wheels.

This accident again proves, beyond the question of a doubt, the value of applied safety guards, and that its risky business to disregard safety rules and safety practices.

Bldg. 4-4 Rantings

Attention Bldg. 4-4 News fans, you like more news and gossip. So does your reporter. Let's all help for a bigger and better column. . . . Hank Epple had a chance for a radio audition last Wednesday morning, but he turned it down. He preferred to plead guilty. . . . Ivan Butler, our Ace Reporter, believes in Santa Claus again. Ivan lost his identification badge last week. He looked high and low for it, evidently forgetting his own sound advice, which is to look for what you lost where you left it. Santa Claus (or someone) found it and turned it in at the Watchman's shanty, from where it was returned to the owner. . . . What great disappointment has Everett Cox suffered that causes him to go around muttering, "I wish I was a Hermit." . . . Earl Greenlee has finally got his dog adjusted to hunting 'coon. When he bought said dog, he received a set of wrenches. He had one heck of a time finding the right notch or the right wrench to keep him from hunting field mice and hamburger. Now that he is on the right track, Earl can't shut him off. . . . Earl Griswold has been in the dog house for the past few weeks. He doesn't like the way his talents are appreciated. To have them reported for all and sundry was more than he could bear. It won't do you any good to get belligerent because you don't have any Axis to join. And too, we like your style, we were all boys a while back. . . . If some of the assemblers were the catty type, they would like to know why Walt Niemeyer received a G-E Club card for a Helen Niemeyer along with his own. That sister gag won't work because we know all yours are married. We are waiting for cigars, Walt.

It is quite evident that Ralph Dennison does not relish entrance qualifications to Bldg. 26-5. Why not carry some infra-gate reducer Ralph?

19-5 Office Chatter

Hello again: Maybe I can assemble a little dirt and strictly some news. * * * W. W. Dreyer has been doing some mighty pin dropping to get that score. * * * Haven't seen any of Schoaf's campaign propaganda for president of the Foreman's Club. * * * Now that Hollywood has celebrated the coming of Christmas by freezing, our thought turns to whatever happened to Carl Reidorf and his snow-plow. * * * Oscar Meyers reports that he knows the best place to get chicken, at least he always tells us about it at ten-thirty. * * * Georganna Meyers is never going to let anyone tell her age by her teeth. * * * Rea doesn't answer to the name of Pinky any more since Evelyn has taken that name over — Rea says "thank goodness." * * * The milk diet is still going in full force for a couple of the gals. * * * No, no, gals, not to lose weight but to put it on. * * * Dorothea is still traveling by the usual method—on a hayrack, but North Manchester is not so far. * * * Never will it be let forgotten Mardo Tobias' sleep walking act.

Ruth Fuller, Bldg. 4-3, has decided to eat and take life more easy in the future as she was told that eating so fast was the reason so many people are dying of heart trouble in the big cities.

Ted Mullins, our brave hunter of Bldg. 4-3, went hunting last Saturday. Ted very excited over sighting a pheasant, raised his gun and fired at it. Well when he saw the feathers start flying, Ted got so weak he just couldn't shoot at it again. "Poor little thing," he exclaimed, but we are wondering if it wasn't the pretty feathers that got Ted.

Rich Hall, Bldg. 4-3, the good composer of "Bachelor Yarns" drove all the way to Big Long Lake last Sunday just to get a story on the "News Reporter."

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

Perhaps there are a lot of things we should talk about (such as Christmas shopping), but we are still so thrilled over the visit of the "Pitts" that we'd rather talk about them. If you didn't meet them while they were here—you are the loser.

The tea given Thursday afternoon was a beautiful affair. Mrs. Freeman is a lovely hostess and we simply took the house over. (Even to driving the owner out of his own recreation room.) Mr. Lord brought his pictures out and the show was enjoyed by everyone. The only mishap was when Ceal Romary was afraid that Irene's mouth had become puckered from too many "torts."

Friday the girls enjoyed a trip through the plant. We know Dorothy Barraclough must have, anyway, since we just could not keep track of her. Luncheon was served in the private dining room by Elex girls to some of the officers of Elex and the "Pitts," and don't ever let it be said that Dorothy can't blush.

Friday night was the big night for the girls who went to Yellowstone. Better than 50 girls met at Mrs. Becker's to live once again the trip. Helen Stoessel brought along her colored movies taken on the trip and also some pictures taken in the east. Our guests were taken on a short sight-seeing trip after the party and shown things they can't see at home. One of them remarked that this sure is a hot place while they were helping to extinguish a fire in a car somewhere on the tour.

Saturday morning about 175 girls gave them a real welcome at the Chatterbox for breakfast. Our photographer said he didn't even recognize most of our girls with all their war paint and frills on. And those mammys we received for favors were the cutest little things.

Saturday afternoon some of our girls took the guests sight-seeing in the daylight and we gathered the girls rathered liked Fort Wayne except they sure miss the hills. Irene tried to favor them by showing them some of our hills north of here, but they failed to see why we call them hills.

Saturday evening Eva opened the doors of her home to the gang and it was a never-to-be-forgotten party. The "Pitts" even took a plane ride so they can say they saw Fort Wayne from overhead at night.

Sunday morning twenty-nine girls drove to Potowatomi for dinner. Then on to Waterloo where the girls boarded the train for home. There were many tears shed on both sides, as we loved having them here just as much as they enjoyed being here. Now we are waiting for the time they can return. We feel just a little closer to the "Gepitco" Club than we would have because of the goodwill brought here by their representatives. If these girls are a sample of Pittsfield girls—we will take more of them.

For the love of suffering humanity will someone arrange a meeting between Art and Willadine, Bldg. 6-B. Every time Willadine breaks forth into one of those eighteen-carat stem winding smiles of hers, Art's face takes on a shade that makes Calara Jeaston's waist a pale pink by comparison.

BIRTHDAY CAKE FOR 7000 . . .

President Charles E. Wilson flew 2100 miles from Texas in 14 hours to be on hand for G.E.'s gigantic party on November 1 in Schenectady marking the 15th birthday of WGY's Farm Forum and Farm Paper of the Air. There were 7000 farmers and their wives and children as guests of the Company for the day.

NEWS THROUGH THE PLANTS

Slips And Chips

By Sir Vis, 4-4

"Ah! Umph! Sput! Sput! I have made more champions than any other living manager, Umph!" quoth our own beloved Bill (Judge Puffle) Weber, of Weber towers. He boasts of having 20 championship jackets and a host of other valuable articles. If anyone is interested in seeing this amazing collection, I am sure a trip through Weber towers could be arranged. Two of the champions produced by the Judge are: Swinney Park Stahl (the only living champ who could kick a ball 100 yards high and 10 yards down the field) and Weisser Park Seymour, one of the dead end kids. . . . For 15 years or more Dallas Floyd Powers, alias Dave Powers has been known by his assumed name. Mr. Powers made this statement in a personal confession this morning. I didn't find out why he was hiding, he did say he didn't like his name. . . . Don Thomas has some pictures of his fish catch in 1937, however, the pictures were not shown until 1938 after all evidence was gone. These pictures are still going strong, with strangers only. I heard that Don went all around the lake borrowing all the large fish caught and had the pictures taken. Well he is now showing the pictures of his vacation trip (taken last August). It is a rumor (but sounds truthful) that Don borrowed the negatives from all his friends who enjoyed a vacation trip, had them printed, and now is showing them. The story he tells along with the pictures makes it sound almost real. Ed. Martin claims he loaned Don a Travelogue for such a trip. . . . To the girls in Bldg. 4-3 who wish to know how our most eligible bachelor (Walter Hazelet) is, well, Walt seems to be making it fairly well. He continues to talk about the fair sex, but that is all. He has started playing Euchre during the lunch period, and I do hope it won't throw the fair sex out of his life forever.

Betty "Baby" Snooks, Bldg. 18-3, wanted it broadcast that she wears two different brooches even though they do look somewhat similar.

It looks like the tables have turned. Virginia McCormick, Bldg. 16-3, came to work with her leg bandaged after attending a dance.

Paul Vogt, Chairman of the G-E Club Entertainment Committee, has certainly got himself in bad with several members of Bldg. 6-3 as he has been asking them all kinds of questions about what type of entertainment should be brought in, letting them read letters etc., but when it came time to pick out the Christmas party candy and samples were being passed around Paul was nowhere to be found.

The reason why there are so many shiny noses in Bldg. 6-3 recently is attributed to the fact that so many new girls have been employed lately and they packed around the mirror so tight that no one is able to decide whether they have powdered their own beaks or someone elses.

Dorothy Bengs returned to her desk in Bldg. 17-1 office last week to sit beneath the arch of marital bliss and to receive the congratulations of her associates and friends. Dorothy will reside on the Stellhorn Road as Mrs. Robert Buhr, and we sincerely hope that her future will be very happy. Congratulations, Dot.

Do you remember when Mr. Joe Swartzkopf of Bldg. 8 used to be the official eye doctor to the boys in the Purchasing Department?

Wear Your Identification Badge

Thisa And Thata — 19-5

Lillie Benz was seen hanging onto a lamp post the other day. Her story is that she sprained her ankle stepping off the curb. It's a likely story since she doesn't like beer. * * * Cora Rice was in such a dither after winning a duck that the next morning instead of bringing her glasses, purse and badge along with her, she brought a rabbit! She's playing the absent-minded professor. * * * We, of Series and Specialty, express our sympathy to Gretchen Webb on the death of her father and to Margaret Feaster on the death of her father. * * * What is it that Arnold Johnson has that the others haven't? He sure gets the candy. * * * Why is Rosie so interested in pulling leads? You ought to be ashamed of yourself since you've already got one tied to your apron-string. * * * Dorothy Dunifon was so disappointed last week 'cause her name wasn't in the WORKS NEWS, that I just couldn't leave her out this week. * * * When the men stop to see Clara Krudop they sure talk "Turkey" in more ways than one! * * * W. R. Danford of the Specialty Drafting room has a new safety idea which he claims is almost as important as safety shoes. It is the removal of all castors from chairs, stools, and the like. The reason is that the other day a castor-equipped stool zipped out from under him "with the greatest of ease." When Dan spent the rest of the day sitting down, we feared serious injuries, but we found out later that a good welding job on the "you can guess where" part of his trousers fixed up all the damage. * * * There are election bets and election bets. Some push wheelbarrows and some roll peanuts with their noses, but the screwiest bet in Bldg. 19-5 office was when dyed-in-the-wool, three-generation Republican Haifley bet, long before the convention even, that Roosevelt would be re-elected, and straight-laced Leo (Democrat) Warner takes the bet and pays off in a bill neatly folded to form a letter "W." * * * When the Bldg. 19-5 drafting gang came to work Monday morning they all wondered whether they had a "secret operative searching for Sonia the spy" in their midst. Their suspicions were stilled when the sinister stranger took off his hat and turned out to be their own Gene Martz. As this is the first hat Gene has worn since about 1920, the fears of the crowd were natural, especially since the disguise was made complete by a new overcoat and a new pair of shoes.

B. C. Girardot, Bldg. 10-2 foreman, returned this week from a hunting trip in the wilds of Northern Michigan where only the bravest of the brave venture. We haven't seen the results but understand Bert captured a 200-pound deer, with horns and everything. When's the big feed, Bert?

Now that the so-called summer fishing season is over, the hunting stories are starting to roll in. Clyde Helms, Bldg. 19-4, claims he killed four rabbits with three shots, but it seems most of the gang think it should be told five shots per rabbit.

Seems strange that Bertha Budd, Bldg. 19-5, is such a wizard on roller skates and yet has trouble standing on her own two feet. Yes, sir, Bertha, we saw you sitting on the floor the other day. Maybe it might be a good plan to wear your skates to work.

"The Termite" Or "A Boring Evening"

Starring Elmer Wagner, Bldg. 19-3 and Stellar Supporting Cast

Scene I.
The Termite's home.
TIME: 6:00 P.M.

Mrs. Termite: "Elmer dear, when are you going to install that new thermostat?"

Mr. Termite: "Right now, darling. Watch the wood pulp fly."

Mr. Termite exits to the rear. Mrs. Termite resumes darning Mr. Termite's socks. Soon one hears the sound of a bit eating its way through the floor. Curtain falls on first scene.

Scene II.
The Termite's home
TIME: 4 hours later

Mrs. Termite speaks: "But Elmer darling, you have been boring and I do mean boring for hours. Our floor looks like a punch board and still you are no ways near the spot where the thermostat is to go. What will we do? The draft is terrible. (There, dear folks, air conditioning was born). What will we do?"

Mr. Termite: "Ah, success, my dear, it is solved. We will throw the thermostat away and heat the house through the holes. Perchance we may insert pipes in some of them and have music as we ventilate. (Thus, dear folks, the pipe organ came into being).

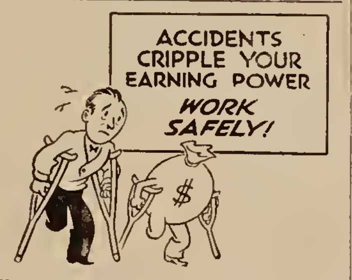
Mrs. Termite: "Elmer, precious, you are so masterful."

They embrace, the floor collapses, and the curtain falls.

THE END

Malcolm Bender, of Bldg. 19-3, sure picks out a good place to kill a pheasant. He was seen shooting one in the back yard and when it fell it landed on his back steps. Some luck, eh?

"Indian giver" Lewis (Bing) Fox, of Bldg. 19-3, gave a boat to George Clancy, also of Bldg. 19-3. As there are no fish in Crooked Lake and Lewis would have no use for it, he decided to let loose of it. Mr. Fox then advertises wood for sale or will take in on trade anything you might offer. Mr. Clancy, of course, needing firewood, decided to trade the boat for some wood and now Bing has his boat back again.



It won't be long now until the old gentleman will be coming around again. We hope Frank Brindle will be able to get his shopping done on time. He was seen taking time out to get his breath at a down-town store recently. Cheer up, Frank, it's still four weeks.

It must have been a very important telephone call to make Regmore Engeman, Bldg. 19-5, run down an alley and fall right smack into a nice big mud puddle. How fared the new-fangled pair of slacks?

In a rush to get on the elevator ahead of some other girls, Martha Jane Clark, Bldg. 4-3, tried her sliding act but didn't quite make it. She was found in a sitting position waiting for the next elevator.

Yep, here's one. Frank Przebindowski and John Schuckhardt melded twenty-five in a pinochle game and lost for the lack of a trick.

Lonnie Rockstroh, Bldg. 26-5, believes in celebrating early. Save the Fourth of July until after Christmas, please.

Famous first words of Jim Mitchel, Bldg. 26-5: "Hey, did you hear the one about—"

The appearance of so many loud and colorful woolen shirts worn by the apprentice boys in Bldg. 26-5 would suggest a contest is under way to dazzle the girls in Bldg. 26-5 (who wish to be dazzled.) A toreador would be in his glory having one as red and bright as that of Herbert Langer. Dave Lewis says every time he looks to the south he thinks the sun is rising.

Will someone please tell Viola Moore and Ruthmary Riedy, Bldg. 26-5, that they are liable to lose money betting on such terms.

Ask Kenneth Sheehan to tell you the story of Coon Hunter Al Rondot. The fellows that have heard it say it is tops and should be put in book form so that all can read it. The coon sure died fighting. P.S. Al has the battle scars to prove it.

Little Clifford Clapsattle took the family wash riding last week. It seems his new car wouldn't give it up. After several trips to different garages the trunk was finally opened by blasting.

Bob "Buck Tooth" Houser, Bldg. 4-3, has been showing everyone the tooth he had pulled. Are you going to have it framed, or do you think you will put it in the museum, Bob?

Deaths

The office and factory force of Bldg. 26-5 extends sympathy to Margaret and Earl Shaefer in the death of their grandfather.

Harold Bowker, Bldg. 4-3, sure has some system caring for his "Little Dog." The other Monday when the wind blew so hard, Harold tied the poor little fellow up in the doghouse so he wouldn't blow away. When Harold arrived home, the dog, doghouse and all had blown down the road. Now Harold is wondering if he should put a door on the doghouse.

LOST—One silk stocking. Finder please return to Viola Grover, Bldg. 4-3.

Art McMaken, Bldg. 4-3, has a new title. He is the official Dog Catcher of Harlan, Ind.

Elmer Aumann, Bldg. 4-3, really gives the family bus a good work out on week ends trying to find where all his friends are spending their time. We wish you better luck next time, Elmer.

Gene Fosnight, Bldg. 4-3, is having his worries since having to sit under that new spot light on his desk. His main worry is whether the girls can see in his ears. Well Gene, maybe you had better hold inspection before leaving home.

In the future Fred Betz, Bldg. 4-3, will stop, look and listen when informed by two hunters, in the field, that they found a pheasant someone just killed. "Not Mine" replied Fred as he moved along and failed to check the one he just shot. Upon his arrival home, he checked and double checked, no pheasant, just three rabbits, boy was he perturbed.

Ward Grim, Bldg. 4-3, spent Saturday hunting with good success. All he had to do was pay one farmer for a hog, and another for two Rhode Island Red roosters that he thought were pheasants. Better luck next time, Ward.

Note McOmber. Otto Meyers, Bldg. 26-5, is a loyal fan for the G-E Club band broadcasts.

(Continued on Page 6)

Uncle McWell Comments In 19-3

What with all of this surge of industry nowadays and the resultant work there is to be done—and quickly, too—we sometimes feel like the two cockroaches in the crackerbox. Every few moments the one, whom we shall affectionately name Clarence, would get up and tear down to the opposite end of the box. He would then turn quickly around and rush back to his companion, who for our purposes shall remain unidentified. Finally, our anonymous roach could no longer stand by and idly watch Clarence continue these frenzied round-trips to nowhere. On the next lap he succeeded in matching strides with Clarence, and as they rounded the turn for the return stretch, asked him what on earth he was accomplishing? Without a moment's hesitation Clarence pointed to the far end of the box which bore the inscription: "Tear up and down."

* * *

Strictly Stuff—During a particularly hectic siege of insomnia recently we found ourselves gazing into the one and only original magic crystal that formerly belonged to the Literary Digest. We understand that it has been out of circulation for a few years now and has undergone extensive repairs. Nevertheless, we were enraptured because it revealed the hidden natures of many we thought we knew, as they might have been: Bob Barnes as a big-time, gruff, hard-boiled executive, with 26 push-buttons and 10 telephones on his desk—the National Clay Court Tennis Championship trophy mounted on an oversize mustache cup full of suds in one corner of his office—and a letter hidden away in a drawer thanking him for his generous support of a worthy charity! . . . Alice Alringer, gorgeous as the season's No. 1 debutante, dazzling in her jewelry and sleek clothes, capturing the hearts of all the males with her beauty and sophistication—dunking her aching dogs in a pan of hot water and Absorbine, Jr., after winning the annual Ladies Invitational Golf tournament! . . .

* * *

Awful Ad Dept.—"If you want a thick, brown taste—we make it. When you get up feeling oozy-woozy, don't you worry; try one teaspoonful of Hurty's Hangover Heck-stract. Why feel normal when our heck-stract can make you feel lousy for so little!"

* * *

Dear Uncle McWell:
Do you think it is too early for me to write a letter to Santa Claus?
Elmer (I can hardly wait),
Wagner, Bldg. 19.3.

Dear Anxious,
If you mean—Is your corset here yet—the answer is yes!
Uncle (Down to the point)
McWell.

* * *

Their Last Words Dept.—I can't understand it. It used to be a perfect fit!

"You say you found a letter in a woman's handwriting in my pocket this morning. I'm sure I don't know how it got there."

"I do! I gave it to you to mail three weeks ago!"

Suggestions Pay Real Dividends

Amateur Boxing Card At G-E Club On Dec. 3

ON -- the Alleys

A little bit of bowling circuit gab: Evidently Hershfelder of the Transformer League has never heard of the slogan "two's company, three's a crowd as he rolled a neat 98 count Friday to join the other two boys in their exclusive "bonehead league" — Buckles, Office League bowler, had his fast one cannonading in Monday as he clipped off a nice 578 total—not bad for a little guy—Talk about the Alphonse-Gaston act—Vaults and Blue Print are working it to a perfection as first one grabs the Office League lead then the other zooms into the top spot—Vault, with Parent getting hot, took over the rarified atmosphere Monday—G. E. Club worries must be getting G. Waldschmidt down—average at present "124"—The Small Motor and G. E. Major Club throwers must have had a crowd" as he rolled a neat 98 too much turkey Thursday as both slipped up on those high scores—Now is good weather for Frank Matthews to give some of his famous hot-foots without the victim getting sore—would dry off his socks—Dorothy Baumbough, new kegler in the Elex Afternoon League, is kind of showing the old timers a few tricks as she clipped off 150 pins her first time out—Walter "Boy Dagie" Mertz must have given up the "gals"—he shot a big 267 score last week—It seems Ray White can't stand prosperity as he had a game in the bag last week but the bag ripped into that proverbial hole with Bill Glenn and Frank Matthews finally cornering it.

REFRIGERATION

By Bob Ringle

Attention: Clarence Lahmon, "those in the know" report that Geller is headed your way, something about a 94. Thanks, Wilson. The season's first snow didn't stop the boys from attending the weekly knock-down and drag-out, and we might also say it didn't hamper their bowling any, either. Ask Garrett how it feels to be a bowler now. He will probably give you a pretty good answer. Since acquiring a nice new shiny ball of his own, (with initials, too) he has been taking a lot more wood into his fold. Would-be purchasers of new bowling balls, the line forms to the right please.

Here are the 200 counts chalked up for the evening. Kreischer—200, Waltz — 201; Blomenberg — 203; Ringle—209; and Cunningham —211. The tapping was kind of light on those 200's though, just breaking through for the count, with a little to spare and that's all.

Decatur Bowling

Team	Won	Lost	Pct.
Office	18	9	.665
Bearings	17	10	.630
Tool Room	15	9	.625
Packers	15	12	.555
Maintenance	13	11	.540
Shafts	13	14	.480
Stators	13	14	.480
Rotors	13	14	.480
Production	12	15	.445
Shells	10	14	.415
Testers	10	14	.415
Flanges	11	16	.405

The office still has a slight margin for first place, but the Bearings are making a threatening bid for this berth by downing the Stators two games for a total of 2,098 to their opponents 2,041. The Tool Room also came through with a two out of three-game victory over the Office. Losing these two games jeopardized the league-leading team, leaving only one game difference between the first and second place. The Tool Room came through with a total of 2,507 pins to the Office's 2,398. The Testers with their two-game win over the Shafts boosted themselves out of the cellar, rolling a total amount of 2,404 while the Shafts only came through with 2,379. The Rotors nosed out the Packers two games with a total of 2,397 to 2,233. By defeating the Flanges two out of three, the Production team moved up one place while the Flanges dropped down into the cellar. Total pins were: Production, 2,403, and Flanges, 2,293.

A. F. DeLaGrange was league leader this week with a three-game average of 197 and a high one game total of 211. Close on his heels was Harry King with a 210.

IN THE ROUGH

By WALTER SUNIER

The course was not quite deserted last Saturday. Two groups were at Brookwood. However, conditions seemed to be somewhat tough for scoring well. This indicates that this is the season to begin practicing pitch shots indoors. The living room is the best place because there is more space there. If the rug is new, the nap serves to hold up the ball nicely. If the rug isn't new, it will be worth-while to buy a new one. Anyway a new one will be stronger and will stand the assaults of the niblick a couple of weeks longer than an old one. Sometimes a fancy pillow or an upholstered chair cushion can be used so that the clubhead can be carried on through and also in some cases to similate a sand trap condition. If you happen to pitch a ball through a window all you will have to do is put on a storm window which you had intended to do anyway. At times, then, you can remove the storm window and practice pitching through the hole. If you happen to hit the furniture on the backswing, that will please the little woman because then she can demand some new pieces.

Some of the boys had expected to play golf a couple of weeks ago but changed over to table tennis on account of the weather. Many of the golfers are table tennis enthusiasts — for instance — Allen, Hanna, Townsend, Hayes, Boger, Wallace, Kellogg, Ray Hamilton, Spiker, Mannan, Hart, Madden, Gompf, Smoley, Harris, Kronmiller, Whearley, Murray, Bushong, Orr and Formanek. Mannan was all set for table tennis a week ago Saturday, so he thought, when the G-E Co. decided that he should do a little work for them. Hart and Hanna had quite a duel at Hart's several weeks ago. Hanna is as tough at table tennis as he is at golf with the "quickies" that he shoots over. Spiker, Wallace, Hamilton and Sunier had a session at Spiker's last week.

NEWS THROUGH THE PLANTS

(Continued from Page 5)

The girls of Bldg. 4-3 wonder who the new "Corn Husking Champ" of near Hoagland is. Could it be Leona Scheumann?

Is Dorothy Schlemmer, Bldg. 4-3, going into the beauty culture business or is it that she just doesn't like to cook?

Does Laura Starner of Bldg. 17-2 like to do specials? She almost knocks the other girls down getting to them.

On making observations from the tower, your reporter happened upon an interesting bit of news. Bob Pence, Bldg. 4-3, is mama's dandy little helper. He was observed in the act of making up his divan of Morpheus in preparation for the evening siesta. All that we have to say is that Bob really slings a mean sheet.

Joe Cochoit, Bldg. 4-3, is very much perturbed over the reports that persist around these parts regarding his friend Art, whom it is claimed is about to desert the ranks of the bachelors. Joe is afraid that he is going to lose his berth at "Bachelor's Roost." Well Joe, we are afraid that you are going to have to find another place to spend your week ends this winter.

Newton Poland, Bldg. 4-3, claims to be an expert shot. He said, quote "I can ride a horse at full gallop, take my trusty rifle, and bring down a quail while on the wing." Shades of Buffalo Bill, such riding and shooting deserves exhibition.

To Ward Grim, Bldg. 4-3, goes the blue ribbon for this week's best story of the hunt. On a recent trip into the country, he claims to have bagged five rabbits. one pheasant, two Rhode Island Red roosters, one hog, and four pumpkins. Pretty good we say. Now let some of the other nimrods come up with a better one.

A very lovely surprise party was held on Ted Mullins, Bldg. 4-3, last Friday evening. Ted was the recipient of many nice gifts. Those present were: Mr. and Mrs. Don Voorhees, Edna Hoopengartner, Wilma Winegart and Art Brandenburger.

Since the installation of a water hose running directly from the water tap to his grinder, Ed McKering, Bldg. 4-5, has been so enthusiastic about filling his compound tank that he floods the floor in the department. It is known to be a fact that the floor is getting so swampy that frogs are croaking in the bull rushes around his machine. It was not until the other day that the situation really became serious. The overflow from Mac's grinder was in such volume that Dee Confer was seen quietly fishing in a white lagoon formed by the back-water from Mac's overflow.

Hazel Perry, Bldg. 26-5 is in the market for something to keep her feet warm these cold nights.

Frances McCauge, a bride of Thanksgiving Day, was honored with a surprise shower at the home of Irma Wade Barry. Those invited were Dottie Forst, Pauline Savers, Merie Chomey, Rosemary Miller, Lola McCauge and Mary Jane Redding.

Al Rondot and Kenneth Sheehan, Bldg. 26-5, gave us a little variety. Instead of rabbits and pheasants the boys went after coons. Ken found out that he could dispose of his dog for Al did the dog's work in good shape, excepting, of course, that he received a few bites.

If anyone wishes to learn yodeling or hill-billy songs get in touch with C. Helms, Bldg. 19-4.

We don't know whether the election suited George Schlemmer, Bldg. 26-5, or not, but at any rate he bought a new car three days later.

L. Boxell, Bldg. 26-5, done all right on his hunting trip. Five birds, plenty of rabbits and a pump gun.

We wonder. Was it an accident that caused David Lewes, Bldg. 26-5, to bend his spectacles or did he need an alibi to get downtown and buy his Thanksgiving turkey?

Anyone wanting to learn the art of working and eating at the same time should train his perspective on Kenny Doell, Bldg. 26-5.

It may be true or it may not. We repeat it for what it is worth. At any rate, it is reported that the boys in Bldg. 2-E have been worried about Slim Walters because he looked so tired and worn out, and that they finally investigated. The report states Slim and "Abe Lincoln" Wilson recently headed for the underbrush with bag and lantern to hunt snipe. Slim is said to be the one that held the bag and that Abe, barking like a snipe hound, caused the snipe to come so fast and furious that Slim was knocked completely out.

Ray Kierspe, Bldg. 16-3, was so disgusted because he had to park his car at the gate and walk in Sunday that he completely forgot where he left it and walked back to the parking lot for it when he left. Of course, he gave the usual excuse—he needs the exercise.

Ray White, Bldg. 16-3, prefers a LaFendrich when he wins a bet rather than a LaFendrich with a LaPalina band on it. Please note, Mr. Kierspe.

We don't know if the prospect of a visit from Santa in a few weeks caused the high spirits, or what, but Fred "Astaire" Zehendner and Dave Happel entertained the gang with a beautifully executed waltz down the main aisle in Bldg. 12-B one morning recently. Fred says he's going to order a pair of safety shoes before they try the rhumba, however. We wouldn't stand for that, Dave.

Harold Mosshammer started his hunting season right on the first day. He came in contact with everything but game—score—0.

When Fred Ketzler, Bldg. 19-4, stepped out of Bldg. 19-1 Monday afternoon, November 11, his cap went for a whirl down the street. Reminds one of the moving picture "Gone With the Wind."

Melvin Payne seems to have many shirts to wear. He was asked how many shirts can you get out of a yard. It depends whose yard you get into.

Schenectady Will Shoot It Out With Fort Wayne

A long range match with one team in Schenectady and the other in Fort Wayne will be held between the rifle teams of those two Works, it is announced by officers of the Rod and Gun Club. Actually each team will shoot on ranges in their respective cities and will exchange scores by mail. The Fort Wayne team registered their scores last Tuesday evening and the Schenectady team will try to beat them this evening.

G-E Automatic Light Weight Irons weigh one to two pounds less than ordinary irons, thus helping to conserve the strength of the older woman who has a large family wash to iron.

Five Exceptional Bouts Arranged For Glove Fans

Bob Burns to Meet Thompson Of Muncie For Feature Bout Of The Evening

Another 10 fight amateur boxing card will be staged at the G-E Club Tuesday, December 3, at 8:30 o'clock with five of Fort Wayne's most prominent "simon - pures" tangling with a quintet of champions from Muncie.

In the feature bout of the evening Bob Burns, local welterweight, will tangle with Duane Thompson, who represented Muncie in this weight at Chicago last year going all the way to the semi-finals before losing a close decision to the ultimate champion. Both boys have been working out frequently and declare themselves ready to step a fast and lively three rounds.

In what will undoubtedly turn out to be another whirlwind bout, Bud Thomas of Fort Wayne will take on Sammy O'Rourke, Muncie's flyweight titleholder. O'Rourke, a stocky Jewish boy, according to the Muncie manager has shown more improvement during the last three months than any of his squad and great things are expected of him in the future Golden Glove wars.

Considering the formidable opposition that the Summit City representatives will have to face Frank Newport, match maker, has declined to name his other three fighters until he can see which boy is in the best shape.

Supporting these five inter-city bouts will be five novice fights that will possibly lack the style and class of the other matches but will still give the fans plenty of thrills and will also give these lads training for Golden Glove fights to come.

Prices to G-E employees before six o'clock Friday will be 25c general admission; 45c reserved; and 65c ringside with a slight raise in price after six o'clock.

M.B.A. Patients

General Purpose Motor—Lucile Kaiser, Methodist Hospital; Ross Gebert, Yoder, Ind.; Dorothy Raber, 2117 Brown St.; Alfreda Gessler, 1027 Kensington Blvd.; Mary Bakle, 222 East DeWald St.; Virginia Morand, Lutheran Hospital; Ruth Seifert, 1317 Green St.; Donald Klint, 1505 Sinclair St.; Phyllis High, Ossian, Ind.; Esther Croghan, 2206 S. Anthony Blvd.; Charles Frances, 1314 Guthrie St.; Frank Graffee, 2524 Beechwood Circle.

Transformer—Orville Ellingwood, Lutheran Hospital; Virginia Gerber, R. 3, Wallen; Alva Wehrmeister, 427 E. Lewis St.

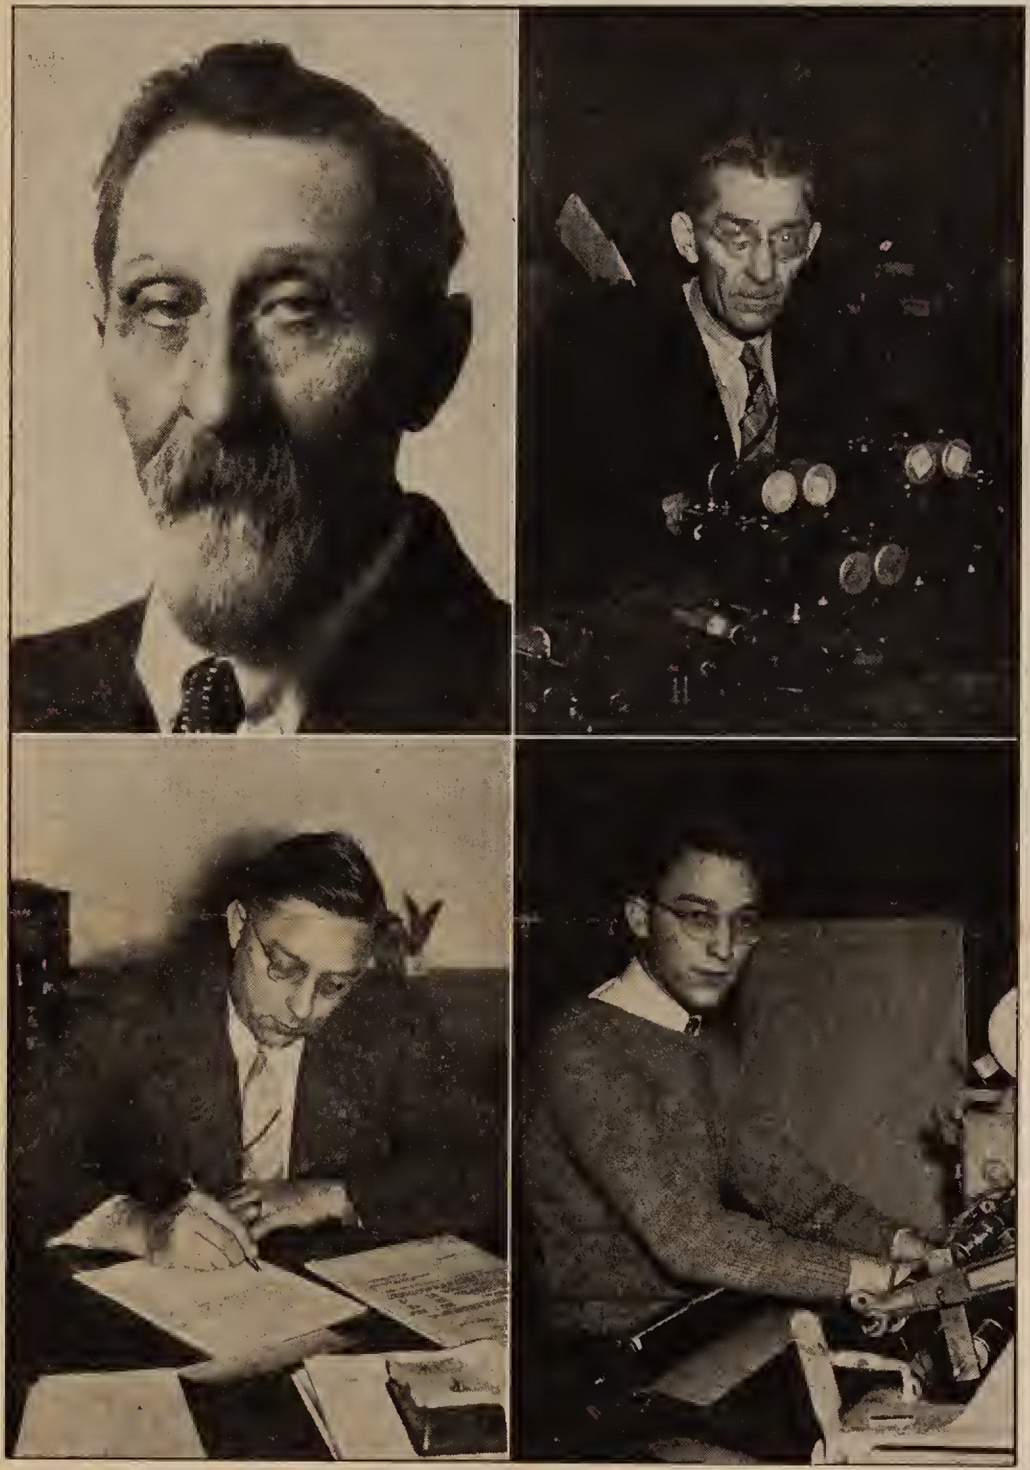
A Four Generation G-E Family



Four generations of the Leitz family. Top, left—the great-grandfather, Joseph P. Leitz. Upper right, the son, Edward Leitz, Bldg. 26-1. Lower left, Ray Leitz, Decatur, the grandson, and lower right, Darwin Leitz, Bldg. 26-3, the great-grandson.

When Darwin Leitz joined the General Electric organization a few weeks ago, he not only followed in his father's footsteps, but in those of his grandfather and great-grandfather as well. When a great-grandfather Joseph P. Leitz joined the Fort Wayne Electric Corporation, which later was to become part of the General Electric Company, he probably little dreamed that some day a great-grandson would be on the organization's pay roll. For that was back in 1894, just thirteen years after the Fort Wayne "Jenney" Electric Light Company was established.

(Continued on Page 3)

Stockholders Increase

General Electric stockholders on November 22, record date for the December 20th dividend, totaled 212,840, an increase of 3,105 over the number a year ago and 1,229 above the total of the last record date, September 20, 1940, President Charles E. Wilson announced this week.

G-E Club Dance

Pete Dannecker and his Musical Aides will again play for the G-E Club dance tomorrow night with admission prices remaining at 20c before six o'clock Saturday and 30c afterward.

The dances are proving extremely popular and according to present plans will continue indefinitely.

M. B. A. Officials Are Named For New Year

Annual Bond Offering

Bulletin boards in the Works and Offices of the Company this week carried formal announcement that installment subscriptions for G-E Employees 4% bonds for the year 1941 will be accepted until the end of December, 1940. Cash sales of bonds are being continued as in previous years, and will be accepted in 1941 beginning Monday, January 6.

Copies of the prospectus and subscription form have been distributed to all employees.

Appleton Retires As Vice-President

Official In Charge Of General Relations With Utilities Leaves Company

Charles W. Appleton, vice president of the General Electric Company in charge of general relations with public utilities, has retired because of ill health, Charles E. Wilson, president, has announced. He had been associated with General Electric for 21 years.

Mr. Appleton, a native of Brockton, Mass., was admitted to the bar in 1899. He became an assistant district attorney in the office of William Travers Jerome in New York in 1903 and served in that capacity until his appointment as a magistrate by Mayor William J. Gaynor in 1910. He remained on the bench until 1918 when he resigned to join the law department of General Electric. Later he became general counsel for the lamp

(Continued on Page 3)

Thirty-Three Sections Elect Officers—General Vice-Chairman To Be Named

One hundred and sixty-five employees were elected this week to offices in the General Electric Mutual Benefit Association of the Fort Wayne Works, and will represent the local membership, which includes better than ninety-nine percent of all eligible employees, during the coming year. There are thirty-three sections of the association at the Fort Wayne Works and each section is represented by a chairman, vice-chairman, secretary and two directors.

The newly elected section chairmen will hold a meeting within the next few days at which time a general vice-chairman and members of the special committee will be selected.

Newly elected officers of the thirty-three sections, in the order

(Continued on Page 2)

Night Shift Girls Christmas Dinner

A Christmas dinner for Elex Club members working on the second shift will be held on December 14 at the Fort Wayne Country Club. Reservations must be made with contact girls or Irene Meyers, Bldg. 21 not later than Friday noon, December 13. Busses will leave the G-E Club at 12:30 for anyone desiring transportation.

The committee in charge includes: Ruth Laney, chairman; Molly Shupe, Helen Wagner, Alvena Greber and Sue Cameron.

Distribute Tickets For Club Christmas Party

Employees wishing to obtain tickets for their children for the annual G-E Club Christmas party are advised that they will be issued at the G-E Club stand in the club basement starting next Monday, December 9. As in former years, tickets for each performance will be issued to correspond with the number of seats available. Choice for any one performance will be given until as long as seats are available, in the order that requests are made.

The party will be held at the G-E Club on Saturday, December 21. The programs will be at 9 and 11 a.m. and 1, 3 and 5 p.m. Tickets are available for children of employees between the ages of two and twelve years and will be issued upon presentation of membership cards.

The complete program has been arranged but Chairman Vogt, of the

(Continued on Page 3)

Membership Cards

Employees, who due to transfer or any other reason, have not yet received their 1941 G-E Club membership cards are asked to apply for them at the stand in the basement of the Club quarters. It is desirable that all cards be distributed within the next few days.

—K. J. Betts, secretary.

• An Old Truth

The greatest defense program ever planned by any nation in the whole of the world's history is now becoming a reality. Sometimes we wonder whether any man living—more directly, any American—can come anywhere near grasping certain fundamentals that are involved.

Right now the mightiest industrial system the world has ever known is being required to exert its maximum energies in two directions; the old one of providing for peacetime needs, and the new one of insuring the nation against attack.

American industry is big enough to handle both of these jobs at the same time, and to handle them magnificently. There is one qualification to this statement: Many individuals will need to gain a new understanding of, and a new respect for, industry. It cannot haul the double load planned for it if it is met with apathy and lack of understanding.

New emergencies have made an old truth suddenly far more evident—the truth that national security, in peaceful world times OR in a great national emergency, necessarily depends upon industry.

It is at once ironic and tragic that it should take a vast war covering nearly half of the earth to make this truth apparent to all Americans!

Hold yourself responsible for a higher standard than anybody else expects of you. Never excuse yourself. Never pity yourself. Be a hard master to yourself—and be lenient to everybody else.—*Beecher.*

• A Better Form

Early in the month of December—from the 11th to the 13th on this particular year—industry's biggest annual get-together is held in New York City. It's called the Congress of American Industry, and it brings together manufacturers from every section of the country to listen to experts on national and international affairs.

The theme of this convention this year is "Total Preparedness for America's Future." That word "total" refers to a rearmament not only for the purposes of national defense but also on the cultural, spiritual, and personal side. In other words, the thesis in back of this great meeting is that we Americans must rededicate ourselves "totally" to the principles that have made this nation the greatest on the face of the globe.

We have heard a lot about "totalitarianism" abroad. There it has meant total subjugation of the individual to the state, total darkness. In this country we stand for everything which is the opposite of the totalitarian spirit abroad.

And industry and all other patriotic groups in this country are arming themselves totally—physically, mentally, morally—to see that not one drop of the totalitarian poison reaches our shores.

• Keep Fit!

An important official recently stated, "All industries are vital to our National Defense program regardless of how remote they seem. For example, without tips, shoe laces cannot be supplied for army shoes and in turn delivery of these shoes would be held up."

As each of us has a responsibility to do our part toward the success of this program, we must keep ourselves safe and in sound health. For good health is necessary for the vigorous, efficient execution of the work on hand. Your country needs your skill, keep fit!

Elex Christmas Party To Be Held Monday Evening

The annual Elex Club Christmas party, which in past years has drawn a larger attendance than any other one Club event, will be held next Monday, December 9 at the G-E Club. The annual party is of interest to many more persons than Elex members for it is a custom to gather toys and foodstuffs at the affair for distribution to needy families. In keeping with the practice of former years those attending the party are asked to bring a toy, or a can of food to aid in the distribution.

Elaborate decorations are planned for the affair, which will start at 5:00 o'clock. It is open to Elex Club members only and reservations must be concluded this afternoon.

The program will reflect the Christmas spirit and will center around a playlet titled "The Christ Child." Characters will be portrayed as follows: Mary, Eva Lynn; Joseph, Dorothy Frank; Three Shepherds, Frieda Kramer, Margaret Koch and Mildred Schoeff; Angel, Dorothea Paul; Artist, Bess Brown.

One of the features of the program will be a number of Christmas songs sung by Harold Pilcher in the role of "The Singing Santa Claus." The fur coat and comforter award will be made at the party.

M.B.A. Officials

At The . . . EMPLOYEES STORE

CLOCKS—over a half-hundred models to choose from—

ORDERLY, 7H116, a neatly designed and compact alarm clock in walnut brown or ivory plastic case. TROUBADOUR, 7H118L, an exceptional value with luminous numerals and hands. TWEED, 7H120, richly covered with pigskin facsimile leather and cleverly cradled between base strips of figured walnut. ANNAPOLIS, 7H124, a nautically designed alarm clock that's as refreshing as wind-blown spray. True ship's-wheel design, tan plastic case, gold colored spokes. MORNING GLORY, 7H106, a brilliantly modern alarm clock in metal case of butler nickel, mahogany brown or gold-colored, also ivory plastic. MORNING STAR, 7H106K, is fitted with small Mazda lamp and translucent plastic dial.

SHERWOOD, 3H152, a skillful blending of old and new is this wood-cased occasional model in richly grained mahogany finish. SADDLE, 3H154, designed exactly as TWEED, but an occasional instead of an alarm clock. NARCISSUS, 3H156, exquisite mounting of genuine white onyx, gold colored bezel, housing and hands.

KITCHEN HOSTESS, 2F06, chrome-finished wall clock that matches, perfectly, the latest trend in kitchen furnishings. NEW HOSTESS, 2F02, gracefully designed in plastic case of Black, Green, Ivory, White, Red and Tan. GARCON, 2H08, a trim metal-cased wall clock in the same colors as NEW HOSTESS, also Blue and Bronze.

FESTIVAL, 400, Full Westminster chimes in a walnut finished clock of exceedingly graceful design. SERENADE, 402, attractively styled tambour chime clock of modified modern design.

Deaths

The employees of Bldg. 4-B and 6-B wish to extend their sympathies to Howard Wright in the death of his wife.

They Were Expensive Way Back In 1909

We have read much about the great reduction made in lamp bulb prices during the past years but the fact is brought to us in a most forceable manner by a copy of the Fort Wayne Journal-Gazette, dated October 1, 1909, which was discovered in use as an insulator in an old ice box which was being torn down by Ed Kallmyer, Bldg. 19-3.

In a corner of the paper an advertisement reads: "A further Reduction in Prices on Tungsten Lamps. We quote the following low prices on Tungsten lamps to our customers only." The prices are set forth as follows:

	Clear	Frosted
25 watt	$0.60	$0.65
40 watt (SB)	.65	.70
40 watt	.70	.75
60 watt	.90	.97
100 watt	1.15	1.25

Christmas Cards

The annual sale of Elex Club Christmas greetings is under way. The greetings may be obtained at the Employees' Store where samples are being displayed.

Appleton Retires

(Continued from Page 1)

department. To his hundreds of friends he has always been known as "the Judge."

As chairman of the company's New York World's Fair Committee, Mr. Appleton directed the preparation and operation of the General Electric Exhibit, one of the most successful and popular exhibits.

Mr. Appleton was graduated from St. Lawrence University in 1897, where, as an undergraduate, he became a friend of Owen D. Young, honorary chairman of the board of the General Electric Company. It was Mr. Appleton who brought Owen Young's successor as board chairman, Philip D. Reed, to work for the General Electric Company as a member of the legal department in 1926.

Before his retirement from the bench he was active in conducting investigations into the operations of land sharks who were operating under a defective law on Long Island.

Mr. Appleton is a director of Electrical Securities Corp., a trustee of the Rockefeller Institute for Medical Research, a member of the New York State and New York County Bar associations, the Association of Bar of the City of New York, The American Electric Railway Association, Committee on Criminal Courts, Charity Organization Society, Alpha Tau Omega, Phi Delta Phi, and Phi Beta Kappa.

Christmas Party

(Continued from Page 1)

Entertainment committee is keeping its exact nature a secret in order to give those attending a real surprise. Of course, for the assurance of the smaller youngsters, the appearance of Santa Claus in person is guaranteed.

G-E Family

(Continued from Page 1)

Great-grandfather Leitz lived to see the old Fort Wayne Electric Corporation through many ups and downs before it finally became a part of General Electric. He retired on pension in 1924 after thirty years of service, and died shortly thereafter. Before he died however, he saw his son and grandson become members of the General Electric family, for Edward Leitz, the son, became an employee in 1916 and Ray Leitz, the grandson, in 1915.

Fifty-Seven Forgot Their Badges Monday — — Were You One of Them?

»» NEWS THROUGH THE PLANTS ««

SANDY SAYS

In case you are all blind, can't see, can't read English, or don't take the Works News, you are missing some good reading matter now-a-days in Uncle McWell's column. Besides its breezy line of chatter, he now and then slips in some delightful scandal that shows he gets around and knows whereof he speaks.

Now since he has asked that we all send in some questions on any subject, here goes in an open letter to Uncle (I bet he's a Scotchman) McWell:

Dear Uncle,

What with four regular pre-McWell columns—"In The Rough" and "On the Alleys," and "From the Feminine Viewpoint", and "Sandy Says" does that make you a fifth columnist?

Old (there's Scotch in me too)
Sandy.

Now don't you think I'm trying to embarrass him. He'll think up a good answer.

I hope he knows the old timers like us (Sandy Says has been going since the first part of June) welcome him, wish him luck, and hope we can do something to help him out.

Anyway, he asked for it. When a newcomer asks for something, we should give it to him. And I don't mean a left handed monkey wrench or a bucket of juice.

Speaking of newcomers, have you noticed how many of them we have around lately? Of course you are trying to help them get a good start, and here are two things you can do.

The first is to keep watch of them out of the corner of your eye, give them a helping hand when its needed, some advice when its helpful, and a slap on the back when its deserved.

The second thing is to, above all do your own job so as to set a perfect example for them to follow. One of the best ways to learn a job is to see someone else do it perfectly. And the quicker they learn it, and the better we do it, the better off we'll all be.

That, if you can imagine it, reminds me of my Cousin Colin. One day I asked him where he ever got the inspiration to plant all the pop corn in his garden.

Ino, The Fly

Dear Editor:

Hunting and trapping season is on in all its glory for Henry Englebrecht and Milt Dennison of Bldg. 19-3 caught two skunks in a euchre game recently. Even amateurs have bad days!

What was it that made Thurman Liechty, Bldg. 19-2, jump so when John Kaade, Bldg. 19-2, turned on the water. Afraid of melting, or was his aim poor?

Ted Schlup, Bldg. 19-3, had oil line trouble and after priming the pump several times discovered the reservoir was dry. We wonder what he would do if the gas tank was empty?

Why does Al Hans, Bldg. 19-3, cut his rabbits in two pieces to remove the shot? At any rate he got the bunny.

We wonder why Ann White keeps the rotors covered while working. Could it be her motherly instinct?

Slips And Chips

By Sir Vis, 4-4

Edison A. Martin is driving a new maroon car to work. He and Mrs. Martin were at odds on the color, so they compromised. (Mrs. Martin's choice was maroon) . . . W9ODW will be back on the air soon. This statement was issued by the sole owner and operator, Max Shaw. He is increasing the power so that he can talk to people in Roanoke and Decatur about his antenna. . . . Joseph Matis (Joe to us) did not part his hair too deep. No, Joe rammed his head in the barb wire top of the tool crib while cleaning the shelving. However, Joe thinks this deep cultivation might help his hair to grow. . . . It is not Sherlock Holmes you see in our department. It is John Heine with his reading glass. . . . Dogs follow people carrying weiners and cats follow people carrying fish. Don Thomas was seen following a carpenter carrying some hard maple. Is it the smell that attracts Don? . . . We are wondering if Fred Stauffer of Bldg. 17-4 ever convinced the trolley coach driver to call out the streets. . . . It was a very cold day and the Judge's (Bill Weber) champions were playing a game in Detroit. Cy (Dead End) Seymour had purchased a new whistle to use while umpiring this game. The whistle shrieked once, but never again. There is some differences in opinion just why this whistle never shrieked again. The truth is, the sound froze and the judge has it in his collection of oddities.

Bldg. 26-B Lines

The gang swears it isn't the punch press racket that drowns out their voices—it's those loud shirts on Caley, Klotz and Sims.

If Roy Dierstein supervises all new punches and dies, does that make him chairman of the Dies committee?

Lt. Pohler at last has found a fluid that gets him places. It's in the drive of that new Chrysler. How about a ride Pohler, we'd like to know how it feels to ride in an automobile—we're just used to cars.

The Old-Timers in Bldg. 26-B enjoyed a Stag Party at the new home of Merle Morkoetter. The usual card games were enjoyed, and refreshments were plentiful. Merle has a very nice place and everyone wishes him much success in his new home. Of course this is just hearsay—but Johnny Hughes' eyes bear mute testimony to the hour at which the party broke up.

Bee Stalter, Bldg. 19-5, got so hungry the other night at a bridge party that she had to take time out and eat a hamburger. After devouring the hamburger she resumed her game. Bee remarked, "now I believe I could go for a hunk of fish." What we would like to know is, does playing cards give you an appetite and what is a "hunk of fish"?

Kathleen Moran, Bldg. 19-5, put her order in early to Santa Claus this year. She was seen talking to Santa last Saturday. We overheard Kathleen tell Santa she wanted a sled and an outing flannel nightgown—the biggest one he could find. Santa told Kathleen he could get her the sled, but he did not know when he could find the outing flannel nightgown.

Safety suggestion. Please get rubber bowling balls for these boys who insist on hitting their ankles. Aaron Schonefeldt, Bldg. 26-5, should be interested.

Dear Editor

Dear Editor:

We all admire your wonderful pictures showing the troubles of our watchmen in locating the elusive badges we are now required to wear.

But did it ever occur to you and to them that maybe we would wear them in a different place if these badges did not have nails to fasten them with? These heavy nails spoil any light garment to which the badge is fastened.

Who designed these "pins" anyway? Whoever it was should be made to wear his on his nose as in your picture until he learned to use better judgment.

Answer this in your next funny picture!

RUINED CLOTHES.

DEAR RUINED CLOTHES:

I have read with considerable interest your searching dissertation on the matter of the fasteners for the identification badges.

I appreciate your point of view as to the hazards to diaphanous articles of apparel when these badges are attached thereto.

I wonder whether the difficulty lies with the badge fastener or the texture of the clothing.

My mind cannot go back to a personal experience but I have observed on numerous occasions, the first piece of wearing apparel was held together by a pin. I believe said pin was about as sturdy as the pins on our identification badges. I never heard any complaints from the wearers, possibly because of the fact that the article of wearing apparel was also sturdy.

It is obvious that to insure stability the pin must be able to take it and I imagine that the designers of these badges, who have made a wonderful success of them, felt first that they must insure that the badge keep in place as you know a lost badge costs a half a buck which is some money even in a penny ante game.

My suggestion is to wear the badge on your coat where the watchman will be able to see it without too much eye-strain and where I believe the garment will not be damaged to any material degree. After you get in the shop, the badge can be worn at the belt or some other place where the material will not be very much affected.

YE EDITOR.

YOUR SAFETY DEPENDS on HOW CAREFUL YOU ARE not how LUCKY!

Hello Lou

We are in receipt of a letter from Lou Koehlinger, you know formerly of the Employment office, in which she expresses her appreciation to everyone for the many kindnesses shown her during her long streak of bad luck. If you are ever in Preble, by accident or otherwise, be sure and stop in and see Lou.

Giggling Gerties has nothing on 26-5. Just wait until you hear Pauline Hugenell and Virginia Rummel at noon. We'd like to know what it is all about so we could laugh too.

"Air Raid"

No, children, the sound as of several great explosions that rattled your ear drums was not a blitzkreig, but just Jim Stouder, Bldg. 19-3, slapping at mosquitoes in his bath room—and while this is not news in itself, (Jim has slapped a lot this year) the date December 1 adds that touch of human interest. Now Jim by nature is a peace loving man, but even his patience is limited and mosquitoes in near zero weather is going entirely too far. The existence of a mosquito is supposed to be only a day, but Jim feels the pests discovered a fountain of youth in his bathroom as some were flying around with full beards. He says: "there should be a law against such carrying on."

To John Kaade, assistant foreman in Bldg. 19-3, goes the grand prize of the 1940 hunting season. It seems John and a buddy of his were out hunting one day last week and while walking through a woods John saw a rabbit near a tree, he took a shot and the bunny peeked out from the other side of the tree,—then John took aim and again he shot. This time, he finished the poor little rabbit. But why not, the rabbit was fast in a trap.

Winter Street News

We have heard many stories of how big the fish were, and how many rabbits got away, but the one that takes the cake is Harold Hartman's famous:

Last Saturday Harold prepared for a very busy day. He was going to get his limit in rabbits. After tramping around all day he finally shot one of those poor defenseless animals. After placing it by the barn he proceeded to go inside the house for a knife, to clean his Sunday dinner.

When he returned the rabbit was gone. As he looked across the field, there ran a cat with Harold's only rabbit in its jaws.

Thus, Harold ate hot dogs for his Sunday dinner.

Lawrence "Louise" Kramer is now in his second childhood. If "Louise" isn't playing "Tarzan" on his trapeze, he is knocking people down trying to get to the Candy Lady to make sure he gets his daily quart of milk. Oh! to be a child again.

Matt Krebs should let his friends know about his new hiding place for his rule. Rumors say Matt believes in keeping the plumbers busy by "hiding it in the ? ? ? ?" Result—rusty rule.

Here's a good one—

Although Mr. Bauman has a "Town Car" when he comes to the big city, he'd still rather be alone. At least that is the impression we get when smoke from his exhaust gets into our eyes.

Congratulations to Leo Houser, proud father of a baby girl, born last week.

Now that the football season is about over, our two expert dopesters, Leo Persing and Louie Hickernell, Bldg. 4-3, can heave a sigh of relief. It seems that both of them picked a fliver for their favorite, and all their doping came to naught. However they have not lost heart. Both of them are very busy getting out early dope on basketball. Better luck this time fellows.

One of the outstanding attractions of the day was to see Adele Kuckuck, Bldg. 4-3, trying to put on some other girl's coat that did not fit.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

Many of our cherished Christmas customs have come to us from different races and nations. We have adapted and blended these traditions and rites until they are as much a part of our American heritage as Plymouth Rock or the Fourth of July. The time-honored hanging up the stockings for Santa Claus to fill with gifts is an adaption of the French or Netherland's children leaving their wooden shoes outside the door for St. Nicholas's visit. And St. Nick himself has long since discarded his robes and miter and become the jolly Santa Claus all American children know and love.

The Christmas tree came to us from the Germans, who in turn perhaps borrowed the idea from their Scandinavian neighbors, and the custom has since spread to all parts of the world, but we believe that Americans were among the first to adopt it and make it their own.

The beautiful Christmas carols are mainly English in origin; of course Adeste Fideles is of ancient Latin origin and the ever-loved Silent Night was written by an Austrian, Joseph Mohr back in 1818 and has been translated into many languages. The triumphant Hark the Herald Angels Sing was written by Charles Wesley and the music was composed by Felix Mendelssohn; Joy to the World too was written by an Englishman, none other than Isaac Watts and its music was composed by the famous German composer, George Frederick Handel. God Rest You Merry, Gentlemen, We Three Kings of the Orient Are, and I saw Three Ships are all old English songs.

America has contributed to the world's store of Christmas songs for in 1868 Phillips Brooks wrote the tender and lovely carol, O Little Town of Bethlehem, and it was an American, Edmund Hamilton Sears who wrote, It Came Upon the Midnight Clear.

Truly "Christmas is a crossroads where all the world shall meet."

19-4 Spot Jottings

Otis Uran, Bldg. 19-4, has complained about the excessive amount of coal his furnace consumes, even though he had a stoker installed. Now the boys learn he closes up all the rooms except one during the winter months, and then the Missus nearly freezes. Ote, we really think you have a beef coming, and suggest you consult a heating engineer.

Great excitement prevails in Bldg. 19-4. They are planning Christmas parties, all over the place. We'll tell you about them later as we are really planning some doings.

Nola Dicker, Bldg. 26-5, has steadfastly denied all "boy friend" rumors. But those who know Nola know this impossible unless the gentlemen have all gone blind. Besides it is so near Christmas and Nola does have that twinkle in her eyes when she enters denials.

The other day a certain popular make car failed to negotiate the slight grade west of the plant. The car only had 700 miles on it, and its owner had made wonderful claims for it. Will someone please interview Ozzie Nahrwold, Bldg. 26-5.

The Suggestion System Is Open To All — — Why Not Use It?

NEWS THROUGH THE PLANTS

Borings From 4-4 Office

Hi Ya' all, 'tis Elmer, the field mouse, back on the scene for another week. Don't tell me, I really lasted this long? I have had plenty of nibbles, gobs of bites, and still haven't been caught. But am I the popular little rat around the office. Now to get on with the gush, the shush, and of course, the news. It is characteristic in our office that all the men know all the dope on what goes into this to make that. I mean the complete manufacturing of our motors. Well, in our office, the girls know just as much as the men. Want me to tell you how and why. Well here's the story. The office girls were taken through the factory and were shown all the technical details of the motor from start to finish. This all happened last Friday afternoon. 'Twas all under the direction of Lisle Hodell, Clifford Uncapper and Thomas Staley. . . . Boys, here's a tip for you all. The girls in the office are going to stage their annual Christmas party (the great stag) December 17th at the Catholic Community Center. Get there early for free food (that's what I'm going to do). Last Friday the girls in the office gave Evelyn Meyers a small birthday party. She received lots of nice presents from different ones in the office. One present was a small baking set including the rolling pin. (Boys you had better watch out now for Evey). . . . Then Monday Dorie Roe decided that it was her turn to have a birthday, so again presents were presented. Doris wishes to thank everyone for being so thoughtful to remember her birthday. . . . Mr. Melvin Warner was seen putting his big old galoshes in the girl's lockers. Now Melvin, is that the thing to do. We realize the men object, but please think of what the girls have to go through to endure such a sight and what have you. . . . My honorable competitor, the other mouse that has its station out with Vern Daseler, is still thriving. He gets the best of food. Some of the edibles include caviar, anchovies, and sweet meats, and even orchids. Nothing but the best for this lovable little rat. Its trainer is Frank "Buck" Snyder and he has had contracts to sign up with Barnum & Bailey Circus. Some Rat! . . . Well 'tis enough for now, remember there are only 15 shopping days until Christmas. So do your shopping early. So until later, I remain, sincerely, as ever, yours

Elmer, the field mouse.
The Rat to you.

Help! Help! Police

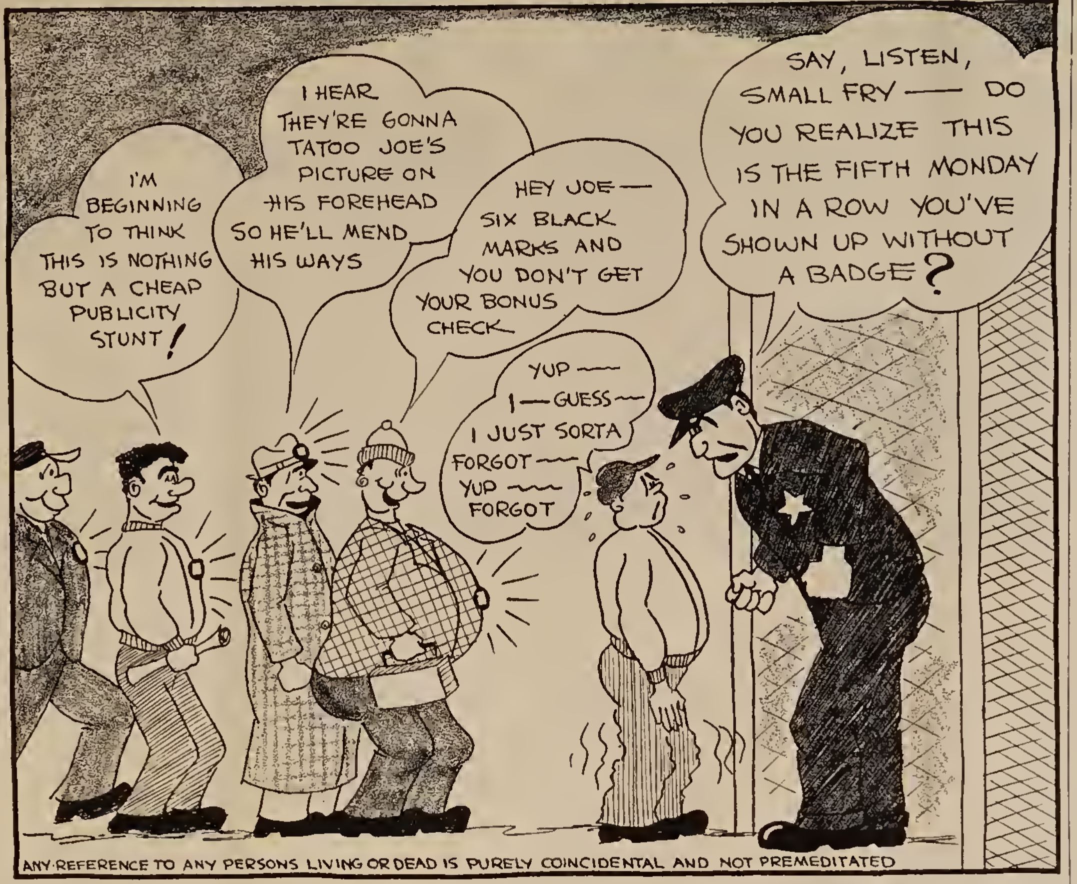
Harry Karr, Bldg. 26-2, is undoubtedly a mighty hunter and his collection of muskrat skins testifies to his skill. Meeting a muskrat and meeting a supposed stick-upper, however, are two different things. At any rate when Harry approached his car the other evening he could see the faint outlines of someone in the vehicle and visions of a fur thief rose before him. To cut a long story short, Harry discovered the visitor to be a member of the weaker sex who had mistaken Harry's car for her regular ride home.

Convict—"Be careful of these advertising slogans. I took the advice of one of them and got five years for doing so."

Friend—"Which one was that?"

Convict — "Make money at home."

It Must Be A Gift — — By Bob Parker



I'M BEGINNING TO THINK THIS IS NOTHING BUT A CHEAP PUBLICITY STUNT!
I HEAR THEY'RE GONNA TATOO JOE'S PICTURE ON HIS FOREHEAD SO HE'LL MEND HIS WAYS
HEY JOE— SIX BLACK MARKS AND YOU DON'T GET YOUR BONUS CHECK
SAY, LISTEN, SMALL FRY — DO YOU REALIZE THIS IS THE FIFTH MONDAY IN A ROW YOU'VE SHOWN UP WITHOUT A BADGE?
YUP — I — GUESS — I JUST SORTA FORGOT — YUP — FORGOT
ANY REFERENCE TO ANY PERSONS LIVING OR DEAD IS PURELY COINCIDENTAL AND NOT PREMEDITATED

"A New Game"

Wally Clayton, high pressure draftsman of Bldg. 19-3, has invented a new game called "squash the ball". To play this game one must have an infant son, the offspring's large rubber ball and a little extra weight. Wally was playing with Junior on the floor the other evening, (and to show the influence of youth upon the aged) he decided it would be a swell idea to set on the ball and bounce up and down, thereby amusing young hopeful much as the monkey in a cage amuses throngs at Trier's Park. But, alas, and alack! Wally forgot his "figger" ain't what it used to be, two bounces and there came a resounding bang—no more ball, no more bounce, half the basement fittings jarred loose. Next day Wally limped to a toy store, purchased a new ball and swore never again, but claims this one time he really had something on the ball.

The crane crack-up was really a minor affair compared with the sensation made when Ross Vaughn's two hundred and thirty odd pounds (estimated) crashed down the stairs in Bldg. 26. We are happy to report that Ross escaped with only a sprained ankle.

Would you take a look at Ruthmary Reidy's finger. All of Bldg. 26-5 is agog. It must be settled.

Attention girls! Do you, too, want that schoolgirl complexion? We know a man who has it and he buys a certain kind of chocolate bar by the box. For further details see Frank Fann, Bldg. 26-5.

Mike Lowe, Bldg. 26-5, has pet names for most people. Why, however, does he dub one person "Lotus Blossom" and in the same breath dub another "Skunk Cabbage."

Whenever we hear some one say "that makes me so-o-o mad," we needn't turn around to see who's there. Of course it is Viola Moore, Bldg. 26-5.

Bldg. 4-4

At last Bldg. 4-4 has its own "Wrong Way Corrigan." Lloyd Runyan, who lives just six blocks away from work got a ride to within two blocks of home. For some unknown reason, he turned to the right instead of the left. Before finally reaching home he had fully done his six block stint for the night. . . . If anyone notices Leona Scheuman in a deep study, it is because she is wondering if a certain Santa Claus will give her everything she asked for. . . . May Schnett reports a fine Florida trip. On returning home, May said, "Indiana was the best place for her." But she has probably changed her mind by now, as she hunted up her stocking cap to wear to work that first real cold day. . . . Victoria Romanick has changed her mind since she was Maid of Honor at her girl friend's wedding, and thinks it will not be bad at all. . . . Maxine Dunoway must be saving her new shoes. She was seen standing in her stocking feet while working the other day. . . . Wilbur Poehler must have an extra job. He takes a checkup every morning to see if everyone is in. . . . Sam Altman really believes in doing his Christmas shopping early. . . . A certain group of K placers seem to be working the wrong shift to be included in any one of the current Christmas parties, so they decided to have a potluck of their own. Here is the menu: Josephine—paper plates and napkins; Mary L.—paper knives, forks, and place cards; Berneil—paper poinsette centerpiece; Hilda—toothpicks and water; Mary R.—paper table cloth and indigestion pills; Frances—paper cups and other paper; Betty—dry ice and doughnut holes; Elta—finger bowls; Clara—garbage pail. . . . Hilda Rodenbeck, "You Hoo! Cecilia, do you want to ride up town with me?" Cecilia Saylor, "Oh! yes, I will ride if you are going up town, so I can try out your new car."

Thisa And Thata — 19-5

Charlie Cline likes meat so well that he eats it right with his candy. . . . We of white armature extend our sympathy to Connie Zollinger in the death of her mother. . . . Edna Rohrbach is well advertised, be sure to see the sign over her place. . . . Margaret Bennett thought Dorothy May was getting all the limelight so decided to chisel in. She too fell on the ice. . . . Speaking of falling on the ice, our friend Maud Erhardt fell last Friday, and is at home with a broken wrist. Hurry and get back, Maud.

Infamous expressions of Bldg. 19-5: H. Balz—"We'll have to ask Yehudi about it." W. R. Danford—"I've got to pin this on somebody." J. Martz — "Quiet please." H. Reitz—"What frame size is it." O. Warner—"I didn't do it, what is it?"

Edith Williams, Bldg. 26-5, is reported to be studying up on the difference between a hatchet and a mallet.

Little Hood Riding Red of Bldg. 26-5, the one who apparently has set out to out-dazzle the apprentice boys is none other than June Logan. Boy is that dress red.

Art Nord, Bldg. 26-5, has such a delicate sense of touch that he can assemble a motor with a five pound sledge and not damage it (the sledge) very much.

Mart Walsh, Bldg. 26-5, put a marcelle in his front fender by contacting a light pole while driving on the parking lot. Mart's 1920 Chevrolet seems just too fast for him to handle.

Will somebody tell Viola Moore, Bldg. 26-5, that when you bowl you throw the ball forward instead of behind you? She seems to be in doubt about the direction.

Ralph Heminger, Bldg. 4-2, is wearing a large cut under his left eye. His alibi is that he bumped it on a table leg. We always can take a hint before she throws the table.

Punch Press 19-5

By Slug

It grieves me no end to write this, but information so received must be passed on to the worst of my ability. One of our closest friends has again entered into the limelight. We are speaking (in case there be doubt) of Everette Lindeman. It seems that Everette and another character known as Charles "Bottles" Cline were busily engaged in an argument, which didn't amount to a tinkers dam other than it was decided that Everette should take Bottles home in order to continue it.

So arm in arm, with a scowl blotting out their finer features, the two men proceeded to the parking lot where a small looking buggy was singled out as their chariot and Everette immediately set to work cracking her open. The lock being of sturdy metal would not budge, so it was decided they would melt her off All available matches were used before the windows and floor boards came in for attention.

Finally Everett decided to dash up town for more keys. It was while he was gone that Bottles (who by the way claims innocence) began to smell a rat, and having no desire to spend his winters in Michigan City—as well as spring, summer and fall—he wiped the car clean of finger prints and faded into the shadows. When Everette returned with his new batch of keys the car was gone, so there was nothing else to do but take his own. Of course Everette explains this as a casual mistake, but he can't make Bottles believe it and the Dinner Club has been casting suspicious looks at him all week. It's such a pity.

Anyone wanting to buy a donkey trained to haul cinders is asked to get in touch with Hastings or Landis, Bldg. 9.

Some hunter we've got in Bldg. 12-B! George "Dead Eye Dick" Doll modestly admits bagging five rabbits with four shots, using a 22 rifle! That night coon-hunting sure sharpens the old eyesight, eh, George?

When Bill Glenn, Bldg. 12-B, gets tired of the design in his shirts he changes them slightly with his fountain pen. We suggest you save the shirt, Bill. An autographed shirt would sure make a nice Christmas gift for some "lucky" fellow.

Grace Ledbetter, Bldg. 4-3, is having her troubles since she got that new clock number. Last week she turned the corner back so that she could tell it. This morning a note on her card read, "Please do not turn corner back," and at noon poor Gracie just couldn't find her card. Do you suppose a different colored card would help, Grace?

Bldg. 4-3 wishes to congratulate Alta Rybolt for making the WORKS NEWS, even if the goat didn't belong to her.

Honoring Opal Bates on her birthday, the girls in the Field Dept., Bldg. 4-5, enjoyed a three-course luncheon of beans. The capacity of these girls is remarkable because two gallons of beans were consumed. Others who participated were: Ethel Zollinger, Hilda Walda, Magie Slagle and Grace Dafforn.

Carl "Pudge" Clevenger, Bldg. 4-3, our self-proclaimed champion of the hunt on his Thanksgiving day hunting trip, claims to have won the Blue Ribbon in the rabbit slaying contest. From reliable sources, we learn that he did not go hunting at all but was out back of his home shooting alley cats that were bothering his chickens.

The Suggestion System Is Open To All — — Why Not Use It?

Department Cage Schedule To Open Thursday Evening

Six Teams To Strive For Basketball Honors During Coming Season

With six teams "ready and rarin'" to swing into action, the race for the G-E Club Inter-department Basketball title will start Thursday, December 12. The schedule for the opening night will match Main Office against West Side at 7:45, Small Motor Factory and Apprentice A will tangle one hour later and Apprentice B and the Squares will wind up the card at 9:45.

League play will as usual be divided into two halves with every club mixing in five games per half with the winners of each meeting at the end of the season in a two out of three game series for the final title.

Caliber of ball shown in the circuit this year will undoubtedly be a great deal better than heretofore as several youngsters have been added to every club, consequently a more aggressive, faster and brilliant type of ball will be displayed plus a more balanced league.

Fight Card Results

Vic Kramer's severe attack of stomach cramps at the end of the second round gave Bob Burns, popular Fort Wayne welterweight, a technical K. O. in the feature match of the 10 fight amateur card held at the G. E. Club, Tuesday, December 3.

Burns, staging a hard two-fisted attack, especially in the second canto, had already piled up a big lead and would have undoubtedly won the decision, Kramer's only hope being a knockout.

Results of the other nine bouts are as follows: Casey Love decisioned Lial Gresham; Dick Weaver edged out Bill Cook; Woodrow Pierce got the judges nod over Bill Dowling; Bud Thomas bested Ted Sponard in three rounds; Mike Jarague took a narrow edge over Harold Kramer; Bob Crosley outboxed Tommy Taylor; Eli Randolph captured a split decision over Thurl Lawrence; and Jimmy Houser knocked out Steve Torres, Decatur.

Rod-Gun Club Riflemen Given Awards

Top, left to right—Hyndman, Pion, Casselman and Bowers. Seated—Morrolf, Leiter and Bland. Absent—McComb.

Eight members of the G-E Rod and Gun Club have been awarded medals from the National Rifle Association following qualification scores on the club's outdoor range. Ratings were headed by Lester Bland, Bldg. 27, who qualified as expert; Harry Hyndman, Bldg. 19-5, J. McComb, Bldg. 19-5, A. F. Bowers, Bldg. 4-3, C. Morrolf, Bldg. 4-5, and Elmer Pion, Bldg. 4-3, were given sharpshooters medals. Ratings of marksmen were given to K. Casselman, Bldg. 26-2, and E. Leiter, Bldg. 17-2. Officers of the rifle team were assisted in the presentations by Captain J. Houck.

Classes are being held by the rifle team at the Dehler-Hughes range each Tuesday evening for all shooters who wish to improve their marksmanship.

Winter Street In Line For Volley-Ball League Title

Chalk Up Fifth Straight Victory In March For First Half Championship

Last week's results in the G-E Club Inter-department Volleyball League practically wrote "finis" to the first half title race as Winter Street strengthened their leadership holdings by chalking up their fifth straight clean sweep of the season at the expense of Apparatus Transformer while Small Motor Factory, second place occupants and chief title threats, lost one game to Small Motor Production and consequently dropped a few more percentage points away from the payoff spot.

Although Winter Street substituted frequently throughout all three contests they were still much too powerful for the game, but not quite able, Apparatus-Transformer outfit. Consequently the Refrigeration outfit, scoring when and how they pleased, chalked up their thirteenth, fourteenth and fifteenth straight wins by the count of 15-1; 15-3; 15-4. With their big spikers Motter, Lamimun and McLean blasting the ball the Refrigerator club easily looks the class of the league and need to win only half of their remaining tilts with Small Motor Standards and Small Motor Production to cinch the first half title.

Small Motor Factory and Small Motor Production tangled last Thursday in what was the best match of last weeks card with the Factory, winning the first and third tilts 15-1; 15-13; and Production salvaging the middle encounter 15-4. The Factory with Dent and Cowan playing nice ball started out as if to make a rout of the match holding their opponents to only one point but Small Motor Production rallied their forces and turned the tables in the second game. The payoff tilt was a real battle with each club taking turns holding the lead but Small Motor Factory uncorked a final burst of power that brought them through to the deciding win.

In the other match on last weeks schedule Small Motor Drafting, defending champions, displayed a great deal of their 1939-40 form and consequently swept their series with the Apprentice, the final scores being 15-13; 15-6; 15-12. The Apprentice, continuing to improve with every game, put up their best battle of the season but Drafting's experience plus Schlund's always dependable point getting spikes was too much.

Winter Street	15	0

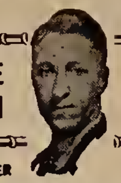
IN THE ROUGH



By WALTER SUNIER

Let the winter be a bore
Let the wind come out like "Fore"
When the snow is on the course
It is nice to stay indorse.

During these cold, wintry days, we have been thinking seriously about writing a book on golf or maybe on goofs. It would be printed on the finest male cowhide. The printing would be in red because golfers are always in the hole. The covers would be made of old golf bags. We figure the price should be about $2.50 each net and a special price of $3.00 each net with the cover set off with Willkie for President buttons.

Another idle thought we had was to look in the dictionary to find whether there was another possible meaning of the word par than the ones commonly thought about. We found it. The definition is: "A young salmon or the young of certain other fish." However, it is spelled "parr." Now we know why they call golfers "poor fish."

In what respect does the average golfer of ten years experience differ from the average beginner? His alibis are louder and funnier.

The snow does not always keep the boys off the course but the ice of the last week really makes it bad. The bad conditions really threw the activities towards table tennis. Micheals would like to play all winter but is doubtful whether work will slow up enough in tool making to give him a good chance. Fox has moved in from Churubusco and hopes to get in some good sessions. He and Micheals and Madden belong to the Pirate's Club and play there.

If you are one of those husbands trained to wipe dishes, emancipate yourself by installing a General Electric Sink in the kitchen. Budget payments are on very reasonable terms.

Dennison To Be Head Of New Magneto Department

Ralph C. Dennison

The organization of a new department for the manufacture of magnetos, not previously manufactured at the Fort Wayne Works, and the appointment of Ralph C. Dennison as superintendent of the department is announced by C. H. Matson, general superintendent.

Mr. Dennison, the new superintendent, is a graduate of the General Electric Apprentice School of the Fort Wayne Works. He entered the school in July 1924 shortly after graduating from Central High School. He graduated as a machinist-toolmaker and served in this capacity until April 1928 when he became a tool engineer in Bldg. 17-4, later serving as a model maker, also in Bldg. 17-4.

In 1936 Mr. Dennison was appointed supervisor of planning and wage rates in the Wire and Insulation Division and served in this capacity until January, 1939 when he was transferred in the same capacity to the Series and Specialty Motor Division. He continued in this work up to the time of his present appointment. Mr. and Mrs. Dennison and their son reside at 1003 Nuttman Avenue.

G-E Research Laboratory Founding To Be Observed

Forty years ago E. Wilbur Rice, Jr., at that time vice-president of General Electric in charge of engineering and manufacturing, received a visit from two men, one an engineer and the other an attorney. They suggested the company should have a laboratory. There had been a problem in Mr. Rice's mind since Edison's famous lamp patent expired six years previously that something should be done to improve the lamp; but how to go about it had not been decided.

Perhaps here was the answer. So Mr. Rice listened as Albert G. Davis, then head of the patent department, and Dr. Charles P. Steinmetz explained their idea of a laboratory where scientific investigations might go forward on the incandescent lamp and other problems. "But these things can't go on without research," Mr. Davis declared.

Research! It was what Mr. Rice himself had been thinking of. Yet hardly another executive in the country in those days had considered such a step. In the discussion that followed all three men agreed that the laboratory should be entirely separate from the factory

Cards Necessary For Christmas Party Tickets

A plea that all employees wishing to obtain tickets for the G-E Club Christmas party be certain to present family membership cards at the time tickets are requested is made by Paul Vogt, chairman of the entertainment committee. It is evident that strict adherence to this rule is necessary to secure ample accommodations for the five programs, which will be held on Saturday, December 21.

Tickets may be obtained at the stand in the G-E Club basement. The programs are scheduled for 9 and 11 a.m. and 1, 3 and 5 p.m. Tickets are available for children of employees between the ages of two and twelve years.

More elaborate decoration than for many years past are being planned for this years party, and Chairman Vogt announces that the stage programs will be decidedly outstanding. As in previous years each program will be concluded with the appearance of Santa Claus who will distribute candy to the youngsters. It is anticipated that the ticket distribution will be concluded early next week.

It is believed that in excess of five thousand children will attend the party.

NEW STORE HOURS

Beginning Monday the Employees' Store will remain open from 8:00 a.m. until 5:00 p.m. This schedule will be observed until Christmas.

NOTICE

Christmas and New Year's Closing

To give employees ample time to make their personal plans, the following advance announcements are made of the closing hours to be observed for the approaching holiday season:

With the exception of continuous operations, such as Power House, Patrol Service, etc., which will work their regular shifts, no shift will work on Christmas Day and New Year's Day.

Regularly scheduled night shifts will not work on Christmas Eve and New Year's Eve after 8:30 P.M. The second shift will start at the regular starting time and quit at 8:30 P.M. The third shift will not report.

M. E. LORD.

More Than Two Hundred Profit By Ideas

$1,600 Paid For Suggestions During Period Covering Eight Weeks

Two hundred and fifty ideas from employees, ideas to do certain things better than they have been done in the past, were accepted through the suggestion system during a period of eight weeks it is announced by S. E. Palmer, chairman of the suggestion system. The fortunate suggestors, whose ideas were found practical and adaptable, received awards totaling $1,608.50 during the period.

High awards, already published, included in the latest list are those of Donald Poland, Bldg. 26-3, amounting to $50.00 and Russell Kryder, Bldg. 24, amounting to $75.00. In addition there are five awards of $25.00 each made as follows: Arthur C. Kruckeberg, Bldg. 26-2; Harold C. Gillian, Bldg. 17-4; Arthur E. Swain, Bldg. 19-2; Louis A. Shattuck, Bldg. 19-5 and Donald Poland, Bldg. 26-3.

Other awards ranging from $5.00 to $15.00 were made to the following employees:

Elex Bowling Party

Members of the Elex Club afternoon bowling league will have a Christmas party on Saturday, December 21, at Gunnar Elliott's restaurant. Reservations must be concluded today. The committee in charge of the affair includes Sue Cameron, Mazie Greek and Marie Loudon.

To Distribute Profit Sharing On Dec. 20

Distribution of vouchers to employees of the Fort Wayne and Decatur Works under the terms of the General Electric Profit Sharing Plan will be made next Friday, December 20, it is announced by the Payroll Department. The distribution will be made through foremen and supervisors following the same routine as in the distribution of pay vouchers.

Employees who have signed orders for accumulation of Profit Sharing payments toward the purchase of G-E Employees Securities Corporation Bonds will receive a statement showing the amount credited to their accounts.

A total of $2,500,000 in profit sharing will be distributed to General Electric employees. This sum will be the employees' share of the last six months estimated profit. A distribution of $2,000,000 was made in August from earnings under the Plan for the first six months this year.

The distribution to be made next Friday will be equivalent to the following percentages of regular earnings of participating employees for the last six months of the year; 4.2% for employees with five or more years of service; 2.8% for

New G.E. Concert Instruments Are Placed On Market

Custom Built Model Will Be Constructed Only Along Most Exacting Standards

Combining the experienced efforts of craftsmen in fine furniture and modern radio-phonograph engineering, a new series of de luxe instruments bearing the name "Musaphonic" has been created by the General Electric Company, Bridgeport, Connecticut. The first three models of the series—a small table cabinet and two console types—were introduced to invited groups of decorators, dealers, and general magazine and trade editors during the week of October 7 at special showings at the Manor House, the display rooms of the Baker Furniture Company, in New York City. The instruments are to be displayed further and demonstrated in various parts of the country as samples become available.

The design and production of the Musaphonic series marks the be-

A New Employee Enters Our Gates

(Pictures on Page 3)

In the above picture Howard Reinking (left), typical of the many new employees who have joined the Fort Wayne Works organization during the past weeks, is shown swinging through the gates on his way to the new job. On page 3 of this issue the Works News has attempted to give a pictorial outline of the steps involved in becoming a member of the big General Electric family.

• A Better Way

Do you remember, when you were a kid and made your first cart and you thought it was just the berries? And you took it out proudly and whizzed down the hill with it and all the other kids in the neighborhood who liked to make carts looked at it and liked it too . . . all except one kid who said, "Yep, it's a good cart, but here's something that'll make it better." And then he showed you a new wrinkle you hadn't thought about. And you tried it out and found that the other kid was right, that it did make your good cart better?

Well, that's just the way the Suggestion System works. For example, we do make good motors, good transformers and good turbines, but there's some one around who can tell us how to make better ones. Our products, we think, are the best in the world, but just the same they can be better and there's someone around who can tell us how. There isn't any law about using ideas. There isn't any way ideas can be used unless you talk to other people about them. So, if you have any ideas about how to make our products better, whether they be coffee makers or motors, washing machines or turbines, remember they will be of no practical value unless you place them to work.

Nobody is going to laugh at you if your idea doesn't turn out to be a world beater. All you need do is set your idea down on paper—the Suggestion System boxes have plenty of blanks—then send it in, and don't forget that the Company pays good money for accepted ideas.

• Would You?

IF YOU WORKED WITH GOLD:

You wouldn't cut the end off a piece of wire and let it fall on the floor for the sweeper to get.

WOULD YOU?

IF YOU WORKED WITH GOLD:

You wouldn't go home at night and leave scraps of the precious metal lying on your work bench.

WOULD YOU?

IF YOU WORKED WITH GOLD:

They wouldn't have you around very long if you did your work or left your job in such tough shape.

WOULD THEY?

YOU DO WORK WITH GOLD:

Your materials are the gold of other men's work. Your time is the gold of your life. By wasting both, you throw away the riches of the ages . . . never to be found again.

• To The New Man

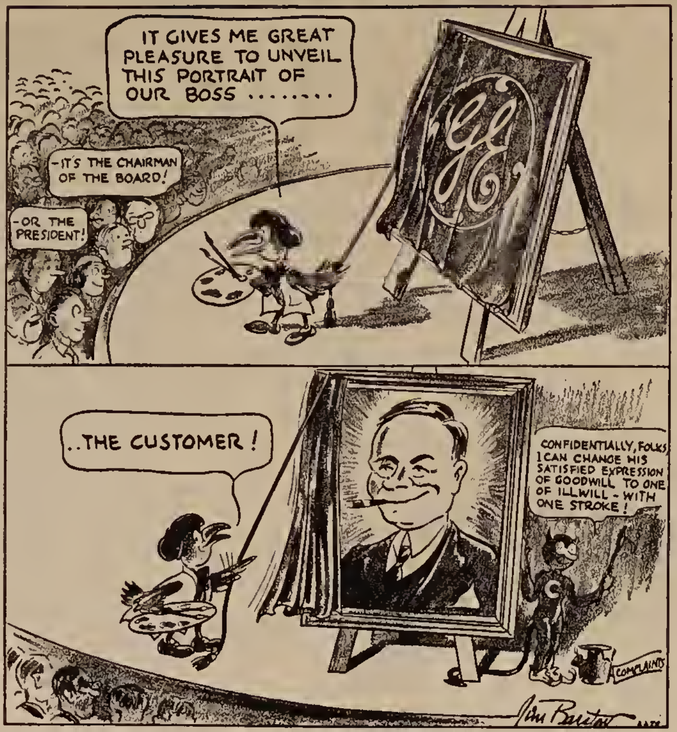
When some more experienced fellow employee cautions you or takes you to task for some unsafe action on your part, don't "get your back up".

The chances are he has given you some good advice because he doesn't want to see you hurt. He is not trying to impress upon you how much more he knows about the work. He is looking after your safety and welfare, so pay attention to him.

Don't take chances! The company does not expect it of you. There is a safe way and an unsafe way to do your work. Find the safe way and stick to it. When in doubt, inquire of your foreman or an experienced fellow employee as to the safe way of doing your work.

A moment of thoughtlessness on your part may mean months in the hospital for you or a fellow employee. Be sure you are right before going ahead. We want you with us and we hope you will be here for a long time. You may not be unless you learn to work safe. The careful workman is the best safety device known. MAKE UP YOUR MIND TO BECOME ONE.—From The Bulletin, Youngstown Sheet and Tube Co.

LEST WE FORGET



IT GIVES ME GREAT PLEASURE TO UNVEIL THIS PORTRAIT OF OUR BOSS ....
-IT'S THE CHAIRMAN OF THE BOARD!
-OR THE PRESIDENT!
..THE CUSTOMER!
CONFIDENTIALLY, FOLKS I CAN CHANGE HIS SATISFIED EXPRESSION OF GOODWILL TO ONE OF ILLWILL - WITH ONE STROKE!

Assume New Responsibilities

Top, left—H. E. Kohlinger. Right—M. J. Harrigan. Below—J. W. Lavine.

Designation of new responsibilities to H. E. Koehlinger, J. W. Lavine and M. J. Harrigan are announced by F. H. Campbell, section superintendent of Bldg. 4-1 and Bldg. 4-5. Effective immediately Mr. Koehlinger will serve as general foreman in Bldg. 4-1, Mr. Lavine as foreman of aircraft castings and Mr. Harrigan as foreman of inspection.

Mr. Koehlinger started work with the Company as a messenger in 1914, and entered the Apprentice School a year later. Following graduation as a machinist-toolmaker he was assigned, some time later to the General Superintendents office. In 1923 he was transferred to the tool planning department in the Fr. H. P. Motor Division. In the succeeding years he held various supervisory positions and in 1939 was made general foreman in Bldg. 17-4.

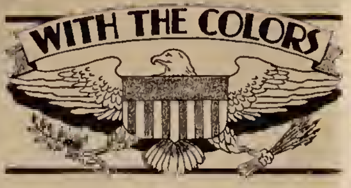
Mr. and Mrs. Koehlinger and their three children reside at 4217 Fairfield Avenue.

Mr. Lavine is also an apprentice school graduate, having completed the machinist-toolmaker course. Following his graduation in 1932 he was assigned to the arbor department in Bldg. 4-3 and continued in this department until August, 1934 when he was made foreman of winding in Bldg. 17-3. Mr. and Mrs. Lavine and daughter reside at 445 Rose Lane.

Mr. Harrigan was first employed at the Fort Wayne Works in 1920 in the work of inspecting and testing motors in Bldg. 4-4. Two years later he was given the inspection of all fractional horsepower motor castings in Bldg. 4-2, and in 1926 when the KSA line of motors was started he was made foreman of inspection and test. He continued in this position when the KSA line was discontinued and the 10, 20 and 30 frame motors were started in Bldg. 17-3.

At the beginning of 1940 he was given charge of the assembly of motors in addition to the inspection and test duties in Bldg. 17-3.

Mr. Harrigan, who served as president of the Foremens' Association in 1931, resides at 807 West Wayne Street.



The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

WILMER J. BARDONNER, 4323 John Street, Electrical engineer in the Refrigeration Division. Captain FA. Res. 325th Regiment Quartermaster Corps assigned to Washington, D. C.

HAROLD B. GOODWIN, on the Production Manager's staff. Ensign. E-V U.S.N.R. assigned to Navy Yard, Boston.

RICHARD A. POWELL, 3712 Arlington Avenue, Production Department, First Lieutenant Ord. Res. assigned to Washington, D. C.

RALPH D. HODGES, 4827 Montrose Avenue, Works Laboratory. Captain 535th C. A. Reserve. Assigned to Fort Monroe, Va.

LLOYD J. DOCKAL, 4612 Arlington Avenue, electrical engineer in the Refrigeration Division. Captain 325th Field Artillery. Assigned to Fort Sill, Oklahoma.

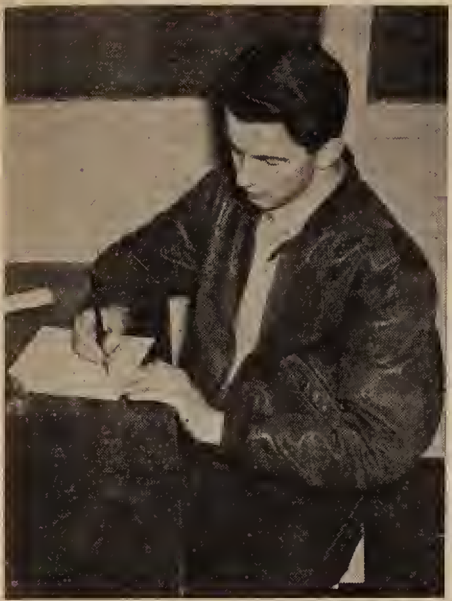
Night Shift Elexites Christmas Dinner

Elex members working on the second shift will attend a Christmas dinner at the Fort Wayne Country Club tomorrow. Busses will leave the G-E Club at 12:30 to carry members who have made reservations for transportation.

The committee in charge includes Mazie Greek, Marie Loudon, Irene Forest, Molly Shupe, Helen Wagner, Alvena Greber, Sue Cameron and Ruth Laney.

"It's Swell To Be A General Electric Employee"



Howard Reinking, 3220 Oliver Street, filling out a questionnaire in the Employment office is one of the many who daily visit the office with the ambition to become a member of the Fort Wayne Works organization.

The questionnaire properly filled out, Howard is summoned into the office of Ray Zook, assistant to the employment supervisor, for an interview regarding the qualifications listed on the questionnaire. Howard is twenty-two years old, and a graduate of Central High School. The interview ended, he is assured he will be notified when an opening appears, and that his application will be kept on file.

The opening, for which Howard is qualified does appear, and his mother, Mrs. Julia Reinking receives the call asking Howard to report at the Employment Office.

The next step is an interview with foreman or supervisor in which it is determined whether Howard is suitable for the job, and whether the job is suitable to Howard. In the above picture the interview is taking place in the office of N. G. "Pete" Prince, Motor-Generator Division. Accepted, Howard is ready for his physical examination.

The physical examination, under the direction of Dr. Garton, is one of the most thorough of its kind, and by passing it Howard is assured that he can well fulfill the job contemplated as far as his physical ability is concerned, for not even the smallest detail is overlooked.

A fairly recent step in employment routine is photographing for identification badges. The picture, being taken by Nurse Margaret Nash will be delivered to Howard in badge form when he reports for work.

Howard next joins a group of accepted applicants to listen to a talk, being given by W. J. Hockett, in which he learns about the policies of the Company and receives important instructions in safe working methods and information on employees plans such as Insurance, MBA, etc.

Ready to report for the job, Howard is issued various forms and booklets by Irene Fox which will give him thorough information on the subjects outlined at the informative meeting.

On the job. Howard has completed the important steps toward becoming a General Electric employee. Does he like the job? In his own words "It's swell to be a General Electric employee, and I sure like my job." At the present time Howard is employed in Bldg. 12-2.

»» NEWS THROUGH THE PLANTS ««

Hoot Mon! Here it is, Friday the thirteenth again. Is there an Irishman in the crowd? If there is, I'll bet he's just getting over the one we had in September. Of course being a Scotchman, I'm not so very superstitious. But two of them in three months is plenty.

Now did you ever consider what would happen if we went to the new calendar, with four weeks in each month? Every month would start on Sunday, there would be thirteen months in each year, and a Friday the thirteenth in each month. Well, we could get used to the bad luck, which we seem to have anyway, but we would get so tired of seeing news pictures every month of people chasing black cats, and walking under ladders.

Speaking of luck — of course there's luck, good and bad, but did you ever think how much you control your own luck? So many things you have done, maybe years ago, affect your luck right now. Have you observed that so many people wail about their bad luck when they really deserve it? And have you also observed that a lot of people work hard and think straight, and then when they get ahead, everyone says, "My, My, isn't he lucky."

They tell me that spoilage is above the average on every Friday the thirteenth. Whether or not that's true, or merely a superstition, I can say without fear of honest contradiction, that I don't know—but don't quote me.

Anyhoo, there are some superstitions that I do believe in. Here are a few for instance:

It's bad luck to wear yellow shoes in the factory — because safety shoes are black.

Always look over your left shoulder when you start walking down an aisle—to see if there's a truck coming.

It's bad luck to do the same job twice—IF it means that you spoiled it the first time.

It's good luck to work like a horse, but bad luck to "horse play" except in a pasture with other horses.

It's bad luck to drink with Colin, his cousin Sandy or *———— on Friday the thirteenth (or any other day) because if you do, you'll no doubt be paying for the drinks.

*Censored by the editor. You know the fellow.

The new groom in Bldg. 26-2, is none other than Melvin Kiesling.

Best wishes to Alice Kirk, Bldg. 26-3 and Carl Snyder, Bldg. 4-3, who were married last Saturday.

Punch Press 19-5

By Slug

Habits, good and evil, make an interesting subject on which much could be written. However, rest at ease for far be it from a humble punk like myself to dwell on any of the baser instincts which, for instance, create an irresistable desire for chasing street cars every morning for a hundred feet or more, and then shouting at it as it gradually pulls away. I won't put a name on this culprit, but rest assured he really exists. . . . We will name a few habits to demonstrate our point, knowing full well that they can be used against us. Lloyd Jacobs has a habit of making one eyebrow dash up and down real fast while the other remains motionless. I often try it in my spare time—but no success. Johnny Figly is developing a swell habit of calling out a cheerful "good morning" every evening. Someone's perpetual grin is fast developing into a perpetual scowl. No its not Santa Claus, is it Heine? We could name a tubful of these but time and space wait for no man (or something). So the blue ribbon will be awarded to Avery Spayde, who every day at noon rushes for his hat before he realizes that he is not going anyplace. Sure looks funny to see him grab his hat just to eat a couple of sandwiches.

Thisa And Thata — 19-5

We welcome back to our fold Esther Ehle, who has been ill for several months, here's hoping you stay awhile. . . . The contortions Avinell Gailey evolved were not jitterbugging. She was just trying to annihilate a bug. . .Margaret Hilgeman is reported back from a motor trip to Florida. . . . The white armature department extends sympathy to Arnold Johnson in the death of his mother and to Bill Wickliffe in the death of his father.

Here we have the season's first snow and Carl Wiegman of Bldg. 19-3 has not worn his spats yet. What's wrong, Carl, are you waiting for Santa Claus to bring you some new ones?

In the course of any average week, many strange sights are to be seen, but the one that has the Bldg. 19-3 Planning Section guessing is the reported presence of four or five large rocks on Don Shultz's front porch. Is it the nucleus of a prize winning Christmas display, the start of a new style rock garden, a trap for pesky magazine salesmen, some new method to prevent the porch floor from warping or merely a few tokens left by the Halloween celebrators? It has even been rumored that Don has forsaken the camera for the prospector's pick and shovel.

Dear Editor

Dear Darling Editor:

You're a boon to mankind and, yes, womankind too; you're a preserver of health, happiness, and the urge to live. But, you could be a bigger boon, and everybody likes a big boon. How about all this? Well, you published a large sneeze in a recent issue of the WORKS NEWS. Drop for drop, drip for drip, germ for germ, there it was—the ugly thing—the devastator of woman's beauty, the humbler of man's ego. Everybody sat out the rest of that Friday with handkerchiefs in hand for fear of giving birth to a flock sneezy fifth columnists.

The following Monday caution subsided a bit and a few blitzkriegs wafted into the "luft", but the wafters were stared down, like the microbe spreaders they were. Here 'tis December 13 and the lesson of that picture of that sneezy sneeze is already forgotten by a few germ generators; more will forget—UNLESS you as a big boon post, yes enlarge and post, that fountain of contagion picture as a perpetual rebuke, perhaps a caption "Want Your Picture Taken?" would become a by-word to cure all of us.—Anonymous.

Dear Anonymous:

Your familiarity with "our darling" editor is refreshing, if not fresh; otherwise I liked the tone of your comments. I suspect our editor has been called everything but a boon, and I am glad you stopped right there.

To shift from the editor to the sneeze. Anything that devastates woman's beauty or humbles man's ego is indeed serious, but we couldn't quite decide—what does the devastating and the humbling, the act of sneezing or being sneezed at?

Would you suggest that we post enlarged photographs of the sneeze on the bulletin boards as a sort of super-propaganda campaign against the common enemy? Our Works Physician advises me that these are available.

In our opinion these "germ generators", as you impolitely but correctly dub them, should be besieged by continuous propaganda—in other words, by revolution. At any rate if the picture of that "sleezy sneeze" helped to signal out the salivary broadcasters, it accomplished something beyond a demonstration of the marvels of speed photography.

Why don't we of the kerchief brigade take these offenders into a (*concentration) camp?

Yours for bigger and better sneeze cover-uppers.

Anonymous the Second.

P.S. Dear Editor you're welcome
***Censored by the editor.**

19-4 Spot Jottings

Our euchre players must have Santa on the brain, but that's allright for everyone gets skunked once in a while. The players, John Piper, Harry Burnett, Alva Powell, and Johnny Ormiston will probably play a better game after Christmas. . . . Ray Soest is in bad again. It seems that after fixing a punch press Friday he walked off with some of the necessary fixtures. On Monday, Johnny had to make a collecting trip to recover his fixtures. Now Ray is that nice. . . . We all enjoy the cheerful warbling done by Veron Amans in the Tool Room, but you can hardly say he is a bird in a gilded cage—or can you? . . . Dear Santa: Please bring Jay Rippe an apron for Christmas (a nice white one). . . . Ruth Haugh made it in nothing flat the other day when the noon bell sounded early. It took the combined efforts of the whole punch press gang to convince her that she still had a half hour to go before lunch.

What Men

Two ice fishermen from Bldg. 19-5 surely proved the old saying: "you don't have to be crazy to fish through the ice but it helps." Paul Cooper and Ben Metker were seen fishing through the ice not more than a stingy inch thick last Sunday. Paul was holding his breath, and Ben was standing in two inches of water. A third man was seen sitting in a boat on top of the ice—probably ready for emergencies. 'Twas said that Russell Rose was not invited to fish with our heroes because of his opposition to plain suicide.

Planning Department associates are curious as to what Don Shultz, Bldg. 19-3, is so secretive about? Every day or so he is seen writing on a pad of paper carefully covered so that only one line is exposed at a time. Can he be the unknown author of such literary gems as "Our Hero" and "The Termite?"

Henry "Fire-eater" Lojek, Bldg. 19-3, is now looking for some one to translate the recently received post card from Washington. He reports that it is written in Spanish.

It seems that the wires in "Dagwood" Fisher's, Bldg. 19-3, alarm system must be crossed. At least he missed the bus twice last week. It is reported that on one occasion he arrived at the bus line with a coffee cup in his hand and had to return home for a new start.

Heard one day as Mary Alice Herber, Bldg. 19-3, was delivering G-E Club membership cards:

Henry: Where's my dependents?

Mary Alice: If you can't keep track of them how do you expect me to!

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

The poor girls who are worn out from working so hard Monday night are probably heaving a sigh of relief that the Elex Annual Christmas Party is over, but we hate to think of it as gone for another year. It is the one party that nearly all Elex girls look forward to as the number (nearly 900) attending proves. The women serving weren't used to a gang like that, but if they will all turn out for every meeting, the women will master the art in practically no time. They really deserve a big hand for the way they took care of us.

Our singing Angel, Dorothea Paul, surely seems like an Angel to most of us. It seemed so natural to have her singing for us once again. She may be an ex-president to some, but to most of us she is "our" Dorothea.

The Pittsfield Girls were with us in spirit even though they couldn't actually be there. They sent us a telegram, wired a huge basket of roses and sent a Christmas present for each girl. The pictures were beautiful and so very unexpected. The girls all send their "thanks" to them and best wishes for the holidays.

The fur coat was given to Luella Ray, Bldg. 17-2, as first prize and the comforter was won by Vera Berning, Bldg. 26-5. They were so happy they couldn't even talk.

There is nothing that Elex could have given to the girls that could mean more than the gold Elex pins they received. There is no other organization that does as much for its girls as Elex and yet there isn't any other group who do more for charity than our girls. The girls came in with their arms full of toys and food for the needy.

All in all—the party was a great success and we want to give three big cheers for the officers and committees in charge for making it such. It is wonderful to work for a Company that gives us the opportunity of having an ELEX.

Nimrods Beware! Why does Harold Federspiel, Bldg. 19-3, don all his hunting paraphernalia (boots and all) then go riding up and down the street on his son's bicycle?

Winter is here—at least Jack Tool, Bldg. 19-3, has started wearing the "Red" flannels with lace bottoms already.

One man talking to another asked if he knew anything about the lie detector the papers talk so much about.

The other replied: "Yes, I married one."

NEWS THROUGH THE PLANTS

"Dear Santa"

This being the season that all children walk up to Santa Claus in the department stores and ask for Santa's coming favors, your inquiring reported donned the old red suit and white whiskers and made the rounds of Bldg. 19-5, finding out what the boys and girls wanted for Christmas. The results were startling—no end.

J. Starke: "Just a few new magic tricks."

Rhea Kuhn: "Just make those mugs in the drafting department stop calling me pinky, carrots, tomato, blonde, etc., and I'll be happy."

W. R. Danford: "Just a nice peaceful Christmas day — without Eddy Horstman."

L. Haifley: "Another house to remodel."

Larimore: "Let Gossman lose all his 1941 football and baseball bets."

Gossman: "Let Larimore lose all his 1941 football and baseball bets." (Somehow Santa detects a note of discord in the Christmas spirit here!)

O. Warner: "A nice cement-floored, steam-heated garage, just across the street from the Union street gate." (Nothing like being specific while you're just wishing.)

Chuck Rieger: "If I could get all outlines done in advance of the rest of the drafting, I'd be satisfied." (How about substituting a jug of Arkansas mountain dew for that one Chuck, or don't you trust Santa?)

J. E. Martz: "A fire truck. If Santa feels generous, a fireman's helmet, too." (How about an extinguisher?)

Frances Fitch: "Just a little news occasionally (and less tripe like this?")

Helen Conrad: "Just something for my spare moments at the office." (That's the old Xmas spirit, Helen!)

We wonder what would happen if Margaret Ryan, Bldg. 26-5, were compelled to ride a street car and had no one along to blow the whistle and tell her which door to use.

Frank Mason is still trying to attract the public eye, and sooner or later get into the funny papers.

We understand, upon good authority, that Congressman "Dr." Gillie, of Washington, D. C., inquired as to the good health of Helen Kelsey's dog, "Pluto".

If one had to pay for only the birds that were broken at the skeet field—Harold Federspiel would sure get off cheap. It looks like the Dennison-Federspiel feud is still on with Fed still bringing up the rear.

Carl Clevenger, Bldg. 4-3, made all arrangements for an early start last week-end for lots and lots of fish. What became of them, Carl?

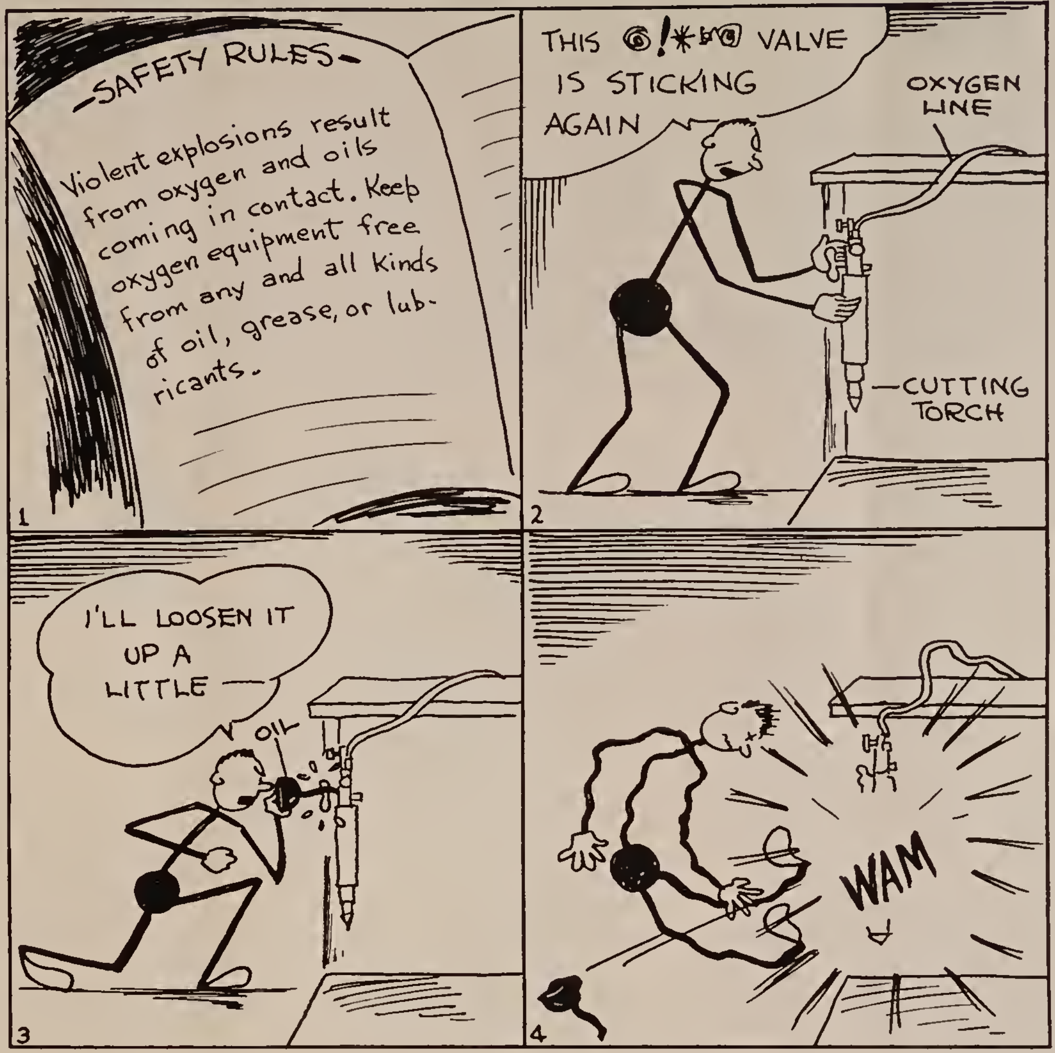
Safety Rules Win Again



SAFETY RULES
Violent explosions result from oxygen and oils coming in contact. Keep oxygen equipment free from any and all kinds of oil, grease, or lubricants.
1
THIS @!*#@ VALVE IS STICKING AGAIN
OXYGEN LINE
CUTTING TORCH
2
I'LL LOOSEN IT UP A LITTLE
OIL
3
WAM
4

By H. L. Smith
Safety Engineer

The above illustration shows how an accident occurred in Bldg. 27 last week when safety rules were violated. The illustration is self explanatory, and is typical of the outcome of safety rule violation—excepting that in this case no one was injured.

Safety rules are reliable because they are based upon experience. If we knew the circumstances leading up to every one of our many safety rules it is fair to say, we would be astounded at the large number that were made after an accident occurred. Established to prevent a similiar accident from ever occurring again.

M.B.A. PATIENTS

Series Motors: Maude Ehrhardt, 2507 Oliver St.

General Purpose Motor: Ruth Rasp, St. Joe Hospital; Rosella Stout, 1306 Sinclair St.; Herbert Springer, 1212 Elm St.; Faith Egolf, Churubusco, Ind.

Transformer: Glenn Hobbs, 1316 Marion St.; Uriah Blackburn, 422 Elmer Ave.

Left the hospital: Lucile Kaiser, Virginia Morand, Jack O'Brien, Eileen Meyers.

Returned to work: Edna Voirol, Mary Bakle, Norman Biddle, Ella Mayo, Esther Ehle, Albert Powell, Mable Murray, Mary Jane Emrick, George Hilthouse, Roy Lawrence, Margaret Schuller, Cleo Wilson.

Carl Borchert, Bldg. 16-3, has celebrated another birthday. It would have probably passed unnoticed but for those perfumed pink envelopes which came through the mail.

Orville Hollingworth, of Bldg. 19-3, must be a weight guesser at some street fairs, and it seems that Orville must be pretty good for he only missed a pretty Miss by twenty pounds one day last week, and that is not bad, but why do you blush so red when you over estimate, Orville?

Walter (Winchell) Histed, enterprising news scout of the Apparatus Dept, Bldg. 19-3, has proven that love of duty can transcend even precedent established by generations of Scottish ancestors. Walter, so loves the job of news sleuth (ye scribe has it on good authority) that his Saturdays, Sundays, and holidays are spent driving the family car throughout Fort Wayne's residential district looking for juicy bits to frighten the pages of our Works News. Perhaps leaning over the back fence disguised in sunbonnet and apron might produce comparable results but it would lack the broadening influence which comes with extensive travel.

Have you noticed the handsome young man in Bldg. 19-3, who wears the missplaced eyebrow? Well, we will let you in on a secret. That good looking fellow is Edwin Gambrell and Eddie's wife thinks it makes him look more mature and it also saves razor blades.

GETTING BUSY DOESN'T MEAN GETTING HURT!

19-5 Office Chatter

It has been learned from a reliable source that Ed Robin, Works News reporter is taking up shorthand to read his fan mail. Bernie Parent seemed to be having a lot of difficulties the other day with the telephone but after some talk under his breath he got the right end up. . . . We hope that Art Knoll is feeling fit as can be before long and will soon be back to work. . . . Al Ruble and George Zollars had a little game of who fell on top of who in the snow. Poor George got the worst end of the deal.

Congratulations to Frank Taylor, the shaft grinder in Bldg. 19-3, on the baby girl. Frank seems pretty proud, and we want to thank Frank for the good cigars he passed out. That's the real spirit of a proud Daddy and we wonder why some other new fathers in Bldg. 19-3 don't pass the smokes? Well, it could be they are waiting for the girl to grow up, get married, and pass out her own cigars. Maybe?

Mike Sorgen, the curly headed dispatcher in Bldg. 19-3, surely had some bad luck one day last week. It seems Mrs. Sorgen gave Mike a job of putting away some dish ware and warned him to be very careful, but then it happened. Mike dropped a high class pyrex dish. We asked: "Then what did you do, Mike?" Mike said, "I took a long walk."

Shorts From 6-B

Leo Heersche came in the other morning with an Alpine sunset over his eye. He says he received it at a roller skating rink. . . . "Shorty" Arthur, the political oracle of Bldg. 4-B, whose vocabulary is inexhaustible, now abridges his orders by such symbols as these—50 lbs. of plus or minus—4 lbs. of nothing over six strips. Figure it out for yourself. . . . Wanted—To exchange a good second hand worn out memory for a job lot of brains left over from some female seminary. Apply to Wilma Kress, Bldg. 6-B. . . . Mrs. J. Sappington has maneuvered one of the old time clocks and now Jake has to punch in and out at home, too. Vulcanized luck, I call it. . . . "Leo the Lion" Heersche has a son who goes out and wins the medals and Leo wears them. . . . "Red" Renbarger—"Roses to the Ladies" and "all day suckers." Pretty heavy levy for only 31. Happy birthday to you. . . . When Floyd Brown goes fishing, the rabbits run him off the ice, and when he goes hunting, the fish steal his gun, or was it his pole?

Ted Mullins, Bldg. 4-3, took Everett McKee to his first lesson in bowling. But the student really gave the teacher a good old merry chase backwards.

Mildred Schoolcraft, Bldg. 4-3, has a new way all her own in keeping her Christmas packages at a certain number. All she does is just let a few of them lay around on the different counters.

Anyone interested in some good looking oil paintings, just consult Martha Ruhl, Bldg. 4-3. as she really has some very nice ones.

What the boys in the flange section would like to know is why Harry Parker, Bldg. 4-3, was in such a terrific hurry last Friday noon to get to the outside.

John Trim, Bldg. 4-3, was playing the role of Santa last Saturday, but who in the world gets all the license plates, John?

Art Brandenburger, Bldg. 4-3, our art connoisseur, has given up the idea of establishing an art gallery, so is closing out his collection of pictures at bargain prices. His new hobby is that of collecting pictures of railway rolling stock.

Carl "Truck" Clevenger, Bldg. 4-3, our champion rabbit bumper-off-er, comes forth with the story that he does not have to go out and hunt them anymore. He said that the rabbits after hearing that I was an excellent shot do not wait for me to come out after them anymore. They come right up to my front door, and all I have to do is go out and kick them over." All right Gunga Din, you win this round.

The boys of the flange section, Bldg. 4-3, are breathing a little easier now that Buck Adams has made the promise that when it is possible to go ice fishing he will keep meat on the table for all the boys whose names are on his list. Anyone whose name is not on this list better get busy and contact Buck. He said that he is really going to bring them in this winter.

Basil Bowley and Louie Hickernell, Bldg. 4-3, our extraordinary huntsmen, have been experimenting with a new type courser and retriever of game. Instead of the traditional dog, they use a Poland China Hog and report phenomenal success. They say that the grunting of the hog does not frighten the game as does the barking and yelping of the hounds, in fact the results are far more gratifying than when a dog is used. This coming summer they plan on raising and training more hogs for field work.

News Through Plants

(Continued from Page 5)

Winter Street News

Famous Last Words

Louie Kramer—"It sure is great to be a kid again."

Clarence Kreischer—"Oh, I always get 10 or 12."

Bob Meyers—"I'll match you for it."

Milt Bryan—"You can have a party at my cottage—anytime."

Wm. Mueller — (Assisting M. Koehn in parking the car) "Back up a little more, then swing a little this way!"

The younger generation seems to be gradually slipping and losing their sense of memory (result—absent-minded). Bob Benz invited Vern Gingher to ride home with him from work one night last week. After "traipsing" up and down the aisles of the car lot looking for the car, Bob finally remembered that he had left the car home in the garage, and rode to work on the trolley bus.

Dorothy Crawford sure likes to be in the red. Saturday, while boarding a street car with an arm full of groceries, including a bottle of catsup, her hat blew off and was "gone with the wind." Trying to catch it she spilled her groceries and midst the hustling and bustling she broke her bottle, spilling the catsup all over herself from head to foot. Who wants to balance the budget—anyhow?

Al Ralston was caught on the rebounds by the sidewalk Monday night while practicing his famous stumbling act. Result — skinned shins, kneeless trousers.

When the lights went out at Winter Street Mary Presbyndowski wasn't in the right office—was she—or was she?????

The Bldg. 26-5 gang was delighted when Art Singleton received the benefits of his election wager from George Karns, Elmer Sauerwine, and Henry Frey. The group then cashed in on the award at Ed. Tennison's home. Bob Moyer was also invited, although he still is wondering why. Perhaps this is due to the fact that it wasn't exactly Bob's lucky night.

Johnny "Boat Anchor" Ebert, Bldg. 26-5, has placed a tub of water in his back yard. After it freezes he will be enabled to practice chopping holes in the ice.

Henry Wittber, Bldg. 26-5, has installed a telephone. Is it because the depression is over or because he wants to listen to the "pot of gold" program.

Congratulations to Ralph Martin, Bldg. 4-2 and best wishes to Bess Bailey, Bldg. 19-5. They were married on December 7.

Attention! Don't throw away your short pencils. Anything around one to one and a half inches will be appreciated by Hank Gerdom, for he says he never learned to write with a full length pencil.

It belongs on the sports page but here it is. The aircraft super bowlers' best efforts to win over the tool wizards last Sunday were promptly short circuited by a 2376-2345 count.

Lost — One sixty-fourth of an inch. Finder please return to LaMar Brant. No reward.

For an entirely different definition of "clouds" see Kathrine Kilgore, Bldg. 26-5. It is very unique.

Someone should tell Lulu Bodle, Bldg. 26-5, that she really is not supposed to sit on the sidewalk and try to slide to work, even though the ice is slippery.

We wish to announce that Eulalia Spath and husband and Everett McKee, of Bldg. 4-3, also attended the party for Ted Mullins. Seems as tho Eulalia was very disappointed at having her name left out of the society news.

There are two sides to all questions. For instance it's an advantage to be tall for then you can see all over the room when you stand up. But on the other hand you are farther from the slippery pavement. And remember Mart Kimble, Bldg. 26-5, graceful single point landings are an art.

It is not uncommon for women to have combs to suit the style of head and hair, but it was an innovation when Frank Hoffman, Bldg. 26-5, received a comb last Christmas with all the center teeth missing. This year break out a few more teeth, Bob.

Arthur Brandenburger, Bldg. 4-3, our Gay "90" Romeo is also somewhat of an actor. He is to be the star in a play now in rehearsal. The title of which is "To the Brave Belong the Fair." We herewith quote some of his lines in this forthcoming attraction. "Ah fond one, I lay me down upon the divan of Morpheus, clasp my hand in thine, and let a cooling draft descend upon my fevered brow." Nice going, Art, we all shall be on hand at the grand opening of what promises to be the greatest play of the season.

Joe Burton, the inspector in Bldg. 19-3, took a trip to the capitol city of Indianapolis over Thanksgiving, intent on having a good time with his former friend of that town. As Joe spent some years as a business man on the circle square he looked forward to meeting some of his old cronies. But Fate dealt him a cruel blow, when within some thirty miles from his destination, the turning gear of his jaloppy broke and Joe had to call for help. When the gears were replaced with new ones and the bill was presented, Joe investigated and found it came from a shop he knew quite well. Such is Fate. We must travel a long way to learn something we have passed up at home.

Conditions causing eyestrain vary but the Bldg. 26-5 girls have decided that it is the glare off the boys' plaid shirts.

The Bldg. 26-5 gang wants to be in on Irene Thimlar's secret. What in the world makes her so happy all the time. Must be a gift.

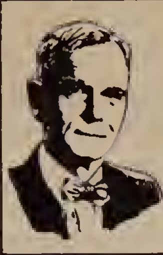
"What makes you so wide awake on coming to work Monday morning?" someone asked Lonnie Rockstroh. The reply, "That's what comes of being a she hermit."

Strange thing that two men hunting in different localities come to work with the same stories about kicking poor little innocent bunnies because they wouldn't roll after they were shot. They both came home empty handed because the bunnies didn't like to be kicked and ran away. Carl Borchert or Ray White can go into detail without much persuasion.

Nellie Williams, Bldg. 4-3, really does a good job running an elevator all by herself.

The girls in Bldg. 26-2 have been wondering who the fellow is that Betty Hawk and Mary Leslie give their attention to at noon. Even though it is not Sadie Hawkins day it seems to be the opinion that the girls should pass him around.

Harold Bohde, of Bldg. 19-3, just returned from an extended (dear) hunt up in the far north, just a hunt, no deer. Harold says, he likes the north woods, the snow and cold weather and he didn't want to kill the little deer anyhow as they looked so innocent. Couldn't you have bought a calf from some farmer or a sheep, Harold, and that would have saved the long drive.



SCIENCE FORUM

BY

L. A. HAWKINS

EXECUTIVE ENGINEER
GENERAL ELECTRIC RESEARCH LABORATORY

Q. Has the war in Europe affected weather conditions in this country?

A. Mark Twain said that the last thing man will learn to control is the weather and the forces which control our weather are so enormous that they can not be affected materially by any means thus far at the disposal of man. It is quite certain that the war has nothing to do with the unusual spring and summer.

Q. Is it true that we never completely forget anything we have once learned?

A. Something of everything we have learned stays with us.

Q. What is the difference between a crocodile and an alligator?

A. They are very similar but the crocodile has a triangular head, becoming very narrow toward the snout; while the alligator has a broad, blunt snout, and is stouter, less active, and less vicious than the crocodile. There are nine different types of crocodiles while only two different species of alligators.

Q. What is the difference between a billion in England and a billion in the United States?

A. When we speak of a billion, we mean a thousand million, but when an Englishman says "billion," he means a million million, or a thousand of our billions.

Q. How hot is the center of the earth?

A. The exact temperature is not known, but it is probably higher than 6,000 degrees Centigrade. This is four times white heat, and hotter than the surface temperature of the sun.

Q. Is it true that there is one part of the moon which no one has ever seen?

A. Yes, nearly half of the surface of the moon has never been seen by the human eye, because the moon rotates on its axis once in exactly the same time as its revolution around the earth; and it keeps the same side always toward the earth. In other words, we see exactly the same part of the moon which was seen by the earliest cave men.

Q. If a quart jar were placed on a pair of scales, weighed accurately, and then a bee placed in the jar, would the weight of the jar with the bee in it be more than without it, even if the bee kept flying continuously without touching any of the sides?

A. Yes, the bee must exert a force to hold himself up in flight; and this force is exerted downward, through the air in the jar, to the bottom of the jar and its support. If the scales were exactly balanced, and then the bee dropped into the jar, the jar side of the scales would sink, even if the bee never touched the jar.

Q. Why do we feel so much colder on a cold, damp day than on a day of the same temperature but with dry air?

A. First, the damp air is a better conductor of heat than the dry air; so heat is taken away from the surface of the skin more quickly by damp air. Also, the skin itself becomes a slightly better conductor of heat when it is moist; dry skin is an excellent insulator, and keeps the body heat in better.

Q. According to a newspaper story, the world is due to have another serious outbreak of influenza in 1940 and 1941. Is this true, and if so, why?

A. Doctor Douglas Webster reported in the Edinburgh Medical Journal that he has analyzed all the outbreaks of influenza since 1890 and finds that these outbreaks regularly recur according to a "two-phase" theory, which accounts perfectly for all of the outbreaks which have been observed. On this basis, there will be a minor epidemic in February, 1940, and a major epidemic in February, 1941. As to whether this prediction will be realized, time alone will tell; but it seems very reasonable to expect the epidemics to break out on schedule, especially since many of the nations of Europe are at war. War always favors epidemics.

Q. What is soapstone and why does it feel soapy?

A. Soapstone is a rock made up chiefly of minerals like serpentine. It feels soapy to the touch for the same reason that soap feels soapy. The surfaces of both substances are soft, and when they are rubbed, small amounts of the surfaces cling to the rough cuticle of the fingers, providing a thin, almost imperceptible lubricating film of very fine particles. Other minerals, such as talc and graphite, also feel soapy, and for the same reason.

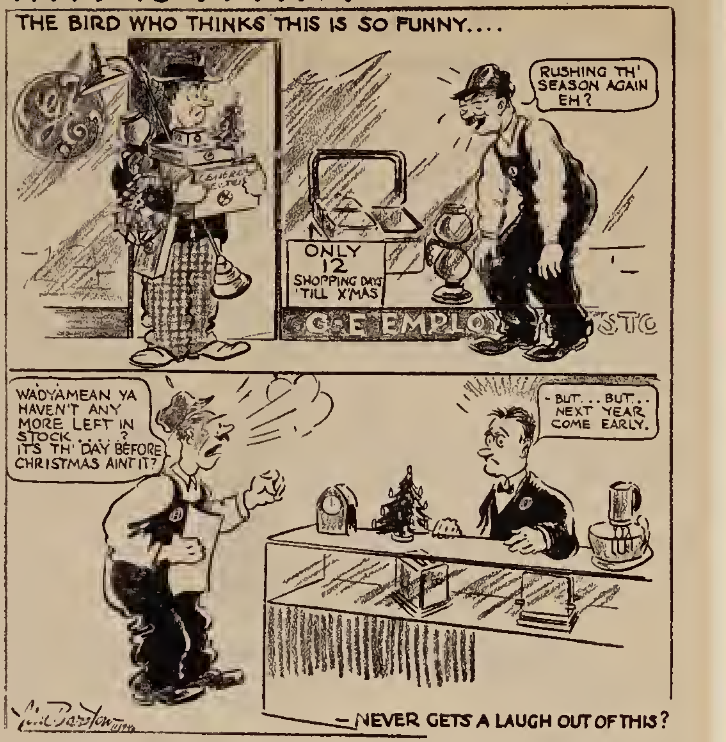
Q. How big do whales grow?

A. The largest whale, known as the sulphur-bottom whale, reaches a length of 100 feet and a weight of about 150 tons. It lives, appropriately enough, in the largest ocean, the Pacific, anywhere from California to Central America.

Q. Of what material is the earth made?

A. The outer shell of the earth, about 1,000 miles thick, is composed of a silicate material, a substance of which our ordinary rocks are composed. Next, in a layer about 800 miles thick, is a shell of silicate mixed with iron. The core of the earth, in volume about one-sixth of the whole, is composed of metallic iron, alloyed with a small proportion of nickel and other materials.

WHY IS IT....?



THE BIRD WHO THINKS THIS IS SO FUNNY....
RUSHING TH' SEASON AGAIN EH?

—NEVER GETS A LAUGH OUT OF THIS?

Borings From 4-4 Office

Another week gone by and still am here with the rest of the population at the G-E. Having a wonderful time and stuff. That is, getting in the way of others, having to work overtime, and nosing into everyone's business. Ah, this week we find Mike Brayer seated at the ediphone dictating a letter. At last he has completed his epistle. However, when he tried to put the thing in reverse, he found that he had forgotten to put in a cylinder. He told Mary Hile of his embarrassment, and Mary said she wouldn't tell a soul. But you know little Elmer, the field mouse, misses nothing, absolutely nothing. . . . Bill Skevington is at last happy. Notre Dame won last Saturday. He even had enough confidence in them that he placed a cigar on the team. Oh, well, after losing two straight games, 'tis about time for 'em to win. Why just look at Indiana U. (you look, I'm tired). They beat Purdue, after losing two games.... Gee, Saturday night is the big Bldg. 4-4 office party under the direction of our own Emmy Stock. In fact he is Master of Ceremonies.

(Continued on Page 8)

At The . . .
EMPLOYEES STORE

G-E Waffle Irons make delicious golden-brown waffles. Finished in enduring Chromeplate, they are smartly designed with wide tray bases and rims to catch batter overflow. Expanding hinges help insure even baking. Cool lifting handles for easy carrying. Quick-heating, glow-coil units distribute heat evenly over die-cast aluminum grids. Scratchproof fiber feet.

WESTPORT, Cat. 149Y194, has accurate heat indicator to show when to pour batter. CASTLEGATE, Cat. 119Y198, makes twin waffles of generous portion. DIANA, Cat. 129Y199, automatic easy-to-operate heat control and signal light bake control.

* * *

G-E Cookers will toast sandwiches, grill and fry, in fact, prepare complete meals conveniently and economically. Removable aluminum grids, wide tray base, easy-grip front handle and side lifting handles. Grease drain and cup. A La CARTE, Cat. 119G37, attractively designed. AUTOMATIC, Cat. 129G38, has thermostatic control dial—signal light will tell when to place sandwiches in to toast. Interchangeable waffle grids available. MYSTIC, Cat. 149G37, equipped with removable aluminum grids and interchangeable waffle grids. Recipe booklet included with each cooker.

* * *

G-E Automatic Roasters cook whole meals, bake cakes, pies, biscuits, roast meats, fish and fowl, and pan broil or fry. TEL-A-COOK, Cat. 123C17, is accurately controlled by an automatic thermostat, and the Tel-A-Cook lights in various colors tell at a glance at what degree the control has been placed. Available in white enamel finish with heat-resistant glass utensil set. 18 liquid quart capacity and large enough to roast a 20 pound turkey. Broiler-Griddle attachment, ideal for broiling, cooking pancakes, sausages, etc., has newly designed hinge arrangement.

Three Embark On Careers

Earl C. Morrell

Wm. P. Tanner

Wm. C. Nickerson

Three young men have completed the General Electric Apprentice School courses of the Fort Wayne Works and are ready to embark upon their careers. Two of them, William Paul Tanner and Earl Charles Morrell, completed the draftsman courses and William C. Nickerson, the machinist-toolmaker course. Mr. Tanner and Mr. Morrell graduated from the Central High School in 1936 and Mr. Nickerson from the South Side High School, also in 1936.

Concert Instrument

(Continued from Page 1)

ginning of an entirely new but long-planned activity of General Electric's radio and television department. The new models differ in most respects from ordinary instruments, with exacting standards of precision, tonal fidelity and convenience of operation as uncompromising inherent requisites. The G-E engineering staff was requested to design units devoid of the usual restraints and limitations imposed by mass production on an assembly line and by the necessity of meeting popular price brackets. Each instrument is fully custom-built and must undergo rigorous individual testing before its release. In respect to the design, material, and finish of their cabinets, the Musaphonic models are likewise subject to none of the usual manufacturing and marketing dictates. Each is a separate piece of furniture craftsmanship, created to appeal to discriminating individual tastes, according to Fred A. Ray, who has been designated as manager of the section. The models **will not be merchandised through the usual G-E radio distribution channels, but will be sold and invoiced direct to selected dealers by the manufacturer.**

The entry of General Electric into the de luxe radio market follows an extended survey of this field. Every effort will be made to create and protect a limited number of quality dealerships, and it is probable that the first of these will be confined to larger cities. Specialty music shops, department stores, interior decorators, and purveyors of authentic custom-built furniture are important outlets.

The three models just announced by General Electric to comprise the Musaphonic line will be augmented later by several additions including a combination FM radio-phonograph-television instrument. One of the present series provides for the reception of frequency-modulation broadcasting in addition to standard amplitude-modulation programs.

Profit Sharing

(Continued from Page 1)

employees with three or more but less than five years of service and 1.4 percent for employees with one or more but less than three years of service.

Flag Refuses To Be Lowered

When members of the Plant Protection Department attempted to lower the flag from the memorial flag pole on Broadway at sundown Monday they were confronted with a problem that had never occurred before in the sixteen years that the pole has been in position—the flag could not be lowered. Investigation revealed that rapidly changing directional winds had wrapped the flag tightly around the pole.

After many fruitless trials to untangle the colors an appeal was made to the city fire department which responded by dispatching the hook and extension ladder apparatus to the spot. A few minutes work on the part of the firemen and the flag was lowered, a little late, but with regulation ceremony.

Research Laboratory

(Continued from Page 1)

and sales branches of the company.

"The company spends thousands of dollars and its best brains in trying to add one-half of one per cent to the efficiency of the generator and transformer, yet this current so carefully generated, transformed and transmitted is sent into a lamp with an efficiency of something like five per cent or less," Mr. Davis told Mr. Rice.

The ultimate result was that Mr. Rice's recommendation to the board of directors was approved without comment other than that Mr. Rice should exercise care in getting the right man to direct the laboratory. Dr. Willis R. Whitney, at that time a professor at Massachusetts Institute of Technology, was engaged. That was 40 years ago, and on Tuesday, December 17, this notable anniversary will be celebrated by General Electric, with a program beginning in the afternoon and culminating in the evening with a dinner at the Mohawk Golf Club. Speakers will be Dr. Karl T. Compton, president of M.I.T.; Charles E. Wilson, president of General Electric, and Samuel Ferguson, president of the Hartford Electric Light Company who was the first engineer of the G-E laboratory.

The laboratory had its beginning in Dr. Steinmetz's barn in the rear of his Schenectady home. The house still stands, but the barn was burned soon after its use as a laboratory. Dr. Whitney came over from M.I.T. three days a week to carry on experiments with Steinmetz and the "staff" which at that time consisted of one man, J. T. H. "Tom" Dempster. After the fire, the laboratory was moved to a one-story frame building in the G-E plant which had been built two or three years earlier for a standardizing laboratory, but which had been discarded when this work was moved into a newer building. The structure was used until the spring floods in 1901 when the research laboratory was moved again, occupying the front part of the new standardizing laboratory. In 1904 it moved to a building of its own, adjoining, and later into its present home, two massive brick buildings.

From Dr. Steinmetz's barn to its present two large buildings in forty years—that is the story of the growth of research in General Electric.

Volley League To Open Second Half

Winter Street Champion For First Half With Main Office In Second Place

Needing to win only two more games to become first half champions of the G-E Club Inter-department Volleyball League, Winter Street, last Wednesday, was "handed the title on a great big silver platter" as Small Motor Production, one of the champs remaining two opponents, forfeited their series to put the Refrigerator club beyond mathematical reach of the circuit's remaining seven teams.

Winter Street is without a doubt the class of the league as they have yet to lose a single game, having swept six straight series. Out of their six man first string lineup five of the six can deliver a point winning spike and all of the sextet are very able set-up men, consequently their attack contains plenty of power plus finesse that in turn makes the power useful.

In the most thrilling match on last weeks card Main Office and Small Motor Factory, fighting for second place, put up three swell battles, with Main Office, after dropping the first encounter 9-15, copped the last two 15-13; 15-12; to get the deciding edge on the series. Main Office played through two thirds of the match with only four players but with Kies, Sougham and the two Foxes, Tom and Jack, covering the court in remarkable style Office managed to keep the Factory's sextet subdued.

Small Motor Drafting, last years title holders, continued to display rapid improvement that forbodes no good for second half pennant contenders by racking up another clean sweep, this time at the expense of Apparatus-Transformer. Although Apparatus had signed up several new players Drafting did not encounter much trouble as the scores 15-8; 15-7; 15-3 indicate.

In another short handed match, Small Motor Standards, having only four men, outplayed six Apprentice to chalk up three victories 15-7; 15-8; 15-13. The Standard used every bit of guile, cunning and volleyball skill picked up in their five years of competition to stay ahead of their younger opponents throughout all three matches although they were weakening towards the last.

News Through Plants

(Continued from Page 6)

I wanted the job, but Lisle Hodell gave it to him, so I'm not going to the party. (To tell the truth, I couldn't get a date and I didn't want to go stag, 'cause I might fall for one of the guys' wives and that would never do). Oh, well, if I feel up to it, I might go just to break the monotony of the usual Saturday night dates with my girl in Bldg. 26-1. I just betcha all my whole week's check that the party will be wonderful. Gee, I wish I could get a date, I know I'd have a good time. . . . Betty Mougin and another girl from the office got a new pair of bunny mittens. Mr. Warner asked them if they knew what kind of fur it was. Of course, they said, "bunny fur." Mr. Warner replied, "No. Uncapher." And do you know, Mr. Uncapher was standing right back of them. But 'twas alright, 'cause he's a good sport—just like me. . . . LaVon Price is getting an evening wrap for Xmas. So if any of you had thought of getting her that, you can just cross it off your list and think of something else... Charlene Snyder is hiding her husband's Xmas presents in the stationery cabinet so he won't be able to find them. They include: ties, socks, overcoat, pajamas, Stetson Play Boy Hat, electric train and a new Buick. But don't any one tell him what it is. Charlene wants to surprise him. . . . Will have to close for now and remember folks don't forget to send my Xmas presents right to Bldg. 4-4 office. I need some cheese, 'cause that's what makes life more binding. 'Tis enough for now. Remember Xmas is coming, or it isn't very far off. So I'll see you all next week, I remain

Sincerely as ever,
Elmer, the Field Mouse,
The Rat to You.

She: "Did anyone ever tell you how wonderful you are?"

He: "No, I don't think anyone ever did."

She: "Then I'd like to know how and where you got the idea."

Teacher: "Can anyone tell me what causes trees to become petrified?"

Bright Student: "The wind makes them rock."

"Why is the little fellow crying?"

"B-b-cause he can't have a holiday."

"Why can't he have a holiday?"

"Because he don't go to school yet."

ON -- the Alleys

A trifle bit of gutter gab from the bowling circuit: R. Haslup of the Small Motor League really had the patrons sitting on the edge of their seats Wednesday as he clicked off a miraculous 299 count in practice. . . . Art Ulmer, Office League kegler, certainly has a grudge against a certain pin . . . ask him about it. . . . Newcomers in the Elex Afternoon League are still showing the old ones new tricks—with Mary Laughlin's 159, doing the job last week although Vivian Hickman's 203 helped remove some of the blushes. . . . Mohler of the G-E Club Major League bowls just like the weather—in his first game Wednesday he shot a very cool 97 and then followed that with a hot 236. . . . Talk about your good, tough, consistent bowling—Herb Koch rolled six league games Wednesday night and every single one was above that magical 200 count—Fred Sheridan of the Small Motor League is again holding a nice average since Ray "Brooksey" Lindemuth was traded back to the minor leagues. . . . Evidently George Waldschmidt's G-E Club worries have been solved as he connected for a 235 total Monday. . . . Wedding bells seem to be trying to break up that Elex Afternoon League as two more victims bit the dust, namely, Frances McCague and Ruth Reynolds. . . . What became of "Angel" Seymour's hook that he so generously paid $10 for. . . . Should have seen the long face on C. Schneiders of the Office League when he netted a grand count of 90 in the first game but the third tilt total of 210 once again wreathed his face in sunny smiles. . . . Hagadorn certainly wasted a few strokes Monday—four strikes and a spare ending in a 197 count.

Refrigeration

By Bob Ringle

Oh, Happy Day! With their most ardent rooter pulling for them, Kolmertens' "Untouchables" lost two out of the three games to Fans last Tuesday night . . . When you step over the foul line and hear the jangling, jarring note of that well-known telephone once in an evening, that's enough; but when you hear it twice in the same game, that's too much, and if you think I'm going to tell you I'm the one that heard it, guess again... The winter cold spell hasn't as yet really opened up, but Ralph Billings has finally started to. He cracked down Tuesday night for a 219, 226, and a 192 for a total of 637. We thought Ralph was waiting 'till after the holiday rush to open up. Cunningham also tapped at the sacred portals for a count of 221. Not far behind were Rineheart with 214, Kreischer with 212, Castle with 203, and last, but not least, our own League Secretary, Mr. Roeger, (Bless his little heart) who tapped very lightly for a 202.

IN THE ROUGH

By WALTER SUNIER

The records covering the attendance at the annual blind bogey tournament show a decided increase in the attendance of players shooting higher scores. This is definitely a trend in the right direction. We have emphasized strongly that the tournament is not for the better golfers only and that the golfers who shoot high scores have just as good a chance to win something as the golfers who shoot low scores. The figures for the last three years show:

Scores	1938	1939	1940
70 to 87	25	25	22
88 to 95	24	30	44
96 and above	24	30	52

It is also time to dwell again on the average score of G-E golfers. The last three years averages are:

1938	50.20	36,542 strokes
1939	51.00	33,696 strokes
1940	50.70	32,955 strokes

This shows that you are as good as the average if you shoot 100. The total strokes which have been struck in the nine years of league play now total 280,245 which is a lot of strokes to cuss.

On Friday it appeared as if Saturday would be a golf day but a strong wind blew over the playing plans. There might have been several of the hardy ones who did play but we know some who hied for the warmth of basements to play table tennis. Hubert Myers, Bldg. 17-3, moved into a different house and has already had it fixed up and has had some real T. T. battles there. Mrs. Myers won the women's singles in the G-E Club table tennis tournament last spring.

A minister, traveling on one of those way-trains that stop at every station on a side line, was reading his Bible.

"Find anything about this railroad in that book?" asked the conductor, as he reached for the minister's ticket.

G-E Club To Have Industrial League Basketball Team

Rare Free Entertainment Is Offered Fans Starting On Wednesday, January 8

Plans and preparations have been made to once again have the G-E Club represented with an Industrial Basketball team. This season the Club team will operate under an entirely different set-up as their opponents will consist of strong Fort Wayne teams such as Zollner's, Harvester, Rea, etc., plus a few outstanding clubs from nearby towns. There will be no charge to witness these contests—just the presentation of a G-E Club membership card.

This type of entertainment is scheduled to start Wednesday, January 8, with the main game beginning at 8:30 o'clock preceded by a preliminary one hour earlier between one of the G-E Club Inter-department teams against an outside opponent.

Missing from the G-E roster this season will be such familiar names as Holmes, Evard, Slack, Quinn and others but to take their place the Club has picked from their members such youthful stars as O'Brien, Kent, Lauer, Starkel, Rabus, Schultz, Scherer, Deffendorfer — just to name a few.

Although the quality of ball seen wouldn't quite be able to compare with that shown by the Celts, Renaissance, and Globe Trotters still the speed, fight and close competition will make all the games just as interesting for the G-E Club fans to see.

A five-year-old girl was prone to use swear words and the mother, after trying in vain to break her of the habit, told the child that the next time she used a bad word she would have to leave home.

Everything went well the first day but on the second, the little one was over-heard swearing at her doll. So her mother packed a toy suitcase and told the little one to take it and go.

The youngster sat on the porch for a while and presently a neighbor woman came. "Is your mother home?" she asked.

"Damn if I know. I don't live here any more," was the reply.

Science Prof.: "What happens when a body is immersed in water?"

Coed: "The telephone rings."

RECEIVED
DEC 20 1940
PUBLIC LIBRARY
FORT WAYNE &
ALLEN CO.,
IND.

Christmas Greeting

Fellow Members of the General Electric Family:

As my first year as President of our Company draws toward its close, it becomes my privilege to convey this Christmas greeting to you. This I do with a heart filled with gratitude for the good will and loyal support you have all so helpfully granted me during this most challenging year.

In this spirit of good will which, as a family and as a nation, we share together, lies our strength to meet together the serious challenge of these difficult days—the challenge of those who would substitute in the world, force for friendliness and hate for harmony, and thus destroy the Spirit of this holy and wholesome Season.

Certain, that with the strength this Spirit gives us, we shall fulfill our dual duty of promptly providing our full share of the materials needed for national defense while at the same time we make every effort to maintain the normal needs of our beloved nation, I confidently and cordially wish each one of you, as well as the members of your families, a very Happy Christmas and a Healthful and Satisfying New Year.

Sincerely,
C. E. Wilson

New York, N. Y.
Dec. 20, 1940.

Elex Club Ready To Distribute Happiness

Hundreds of families will be made happy at Christmas through the efforts of the Elex Club. In the above picture, left to right, Eva Lynn, Eileen Morris, Veora Habig and Irene Meyers are shown sorting some of the gifts contributed by Club members for underprivileged children. Distribution of the packages will be started tomorrow. Baskets of food will also be distributed to needy families.

Defense Commissioner Warns Against Failure Of Industry And Labor In Defense Effort

Decatur G-E Club Christmas Party Plans Complete

Annual Affair For Children Of Employees To Be Held At Club Tomorrow

The annual Christmas party for children of Decatur Works employees will be held tomorrow afternoon. The party will start at one o'clock and will be staged in the Decatur G-E Club. All children of employees of ten years or under have been invited to the affair.

The program this year has been arranged to reflect the true Christmas spirit. A high light of the program will be the appearance of Santa Claus in person.

G-E Club To Close

The G-E Club will be closed on Christmas, December 25 and New Year's Day, January 1.

The club will close at 6:00 o'clock on Christmas eve and New Year's Eve. The regular schedule will be resumed on Thursday, January 2.

W. S. Knudsen Sees Burden Of Load In Heavy Industries As Greatest Production Problem In History

BULLETIN

The Fort Wayne Works will be closed on Wednesday, December 25th, in observance of the Christmas holiday, and Wednesday, January 1st, for the observance of the New Year's holiday.

With the exception of continuous operations, such as Power House, Patrol Service, etc., which will work their regular shifts, no shift will work on Christmas Day and New Year's Day.

Regularly scheduled night shifts will not work on Christmas Eve and New Year's Eve after 8:30 P. M. The second shift will start at the regular starting time and quit at 8:30 P. M. The third shift will not report.

M. E. LORD,
Works Manager.

Asserting that week-end factory shut-downs tend to defeat defense production aims, William S. Knudsen, defense commissioner, in a recent speech given wide publicity, said:

> **"Friday night has become the big night in most of our industrial pictures. It used to be Saturday night . . . we have cut 20 per cent off our machine time. Can we afford to do this?**
>
> **"Can't we stop this blackout, this lack of production from Friday to Monday, and get more use out of the equipment? We can train the men to operate it. Isn't it possible to put the defense job on a war basis even if we are at peace?"**

Warns Against Failure

Mr. Knudsen warned his audience that any failure on the part of industry and labor to cooperate for the utmost speed in defense production might have grave consequences for the nation.

"Frankly," said the commissioner, "we are not doing anything compared to the forecast by the

Impressive Yule Program Features "Hour Of Charm"

To Present Christmas Message Written For Broadcast By Bruce Barton

One of radio's most popular shows—General Electric's "Hour of Charm"—will come to listeners completely stripped of commercial announcements on Sunday night, December 22 at 9 o'clock, when the sponsors present instead, against a musical background by Phil Spitalny's all-girl orchestra, a brief but significant Christmas message written especially for the broadcast by Bruce Barton, author of the beloved book "The Man Nobody Knows"!

Entitled "The Meaning of the Star", Barton's original message is a poignant plea for peace in the world . . . a lasting peace founded upon the teachings of the Christ child. It is a simple timely editorial

(Continued on Page 2)

G-E Club Movies

There will be no more free movies at the G-E Club this year. The next picture is scheduled for January 5, 1941.

Additional Insurance Revision Completed

The semi-annual adjustment of Additional Insurance of employees passing from one classification to another, has been completed, it is announced by the Payroll Department. The rate of contribution for an employee passing from one classification to another has also been adjusted, and the revised rate will be effective with pay received December 27.

The official statement follows: "As set forth in Article No. 5 of Booklet GEQ-59A entitled "Group Life Insurance Plan," additional insurance is based upon the employees' annual wage or salary. The amount of additional insurance is automatically adjusted on the first day of January or July next following the date of increase in the employee's rate of annual wage or salary.

"Employees affected by the foregoing will note that premiums will be adjusted in accordance with Article No. 8 and that payroll deductions at the revised rate will start with pay received December 27.

Christmas . . .

The season of Christmas draws near. The tired old world brightens. The pursuit of selfish interest slackens. For once, at least, in the twelve-month, we stop to think of others. Not what we shall get, but what we shall give becomes the uppermost consideration.

Christmas! The thoughts of most of us go wandering back through our lives, to remember the Christmas days of our youth—days that seem to hold all the wonder and all the gladness of the world.

How far away are they? They are no so distant as we may think. Is not the oldest among us still very much a boy or girl at heart? Surely, in every heart there lurks something of the spirit of youth.

Christmas! It is the annual housecleaning time when we sweep out the dust and dirt of self and selfish interests—and are better for it. Whoever celebrates Christmas in this spirit is still a child at heart and will be able to fully understand the true meaning of "Peace on Earth, Good Will Toward Men."

And so in keeping with a time-honored custom we extend to each and every reader of the WORKS NEWS our sincere wishes for a Merry Christmas and a Happy New Year.

• Suggest Your Ideas

It is possible for a man to get himself into the habit of working like a machine so that finally he becomes nothing more or less than a human machine.

But a man should work in a manner that befits a man, not a machine.

A MAN CAN THINK! A MACHINE CAN'T.

The man who thinks about his work is bound to have ideas for better ways to get the work done, to prevent accidents or waste, to improve quality, and to keep down costs.

Such ideas should always be put into our suggestion box or passed on to one's foreman, because then something can be done with them. Good ideas won't do anybody any good until they are put to work.

In bringing out your ideas you will get full credit. You have nothing to lose and everything to gain.

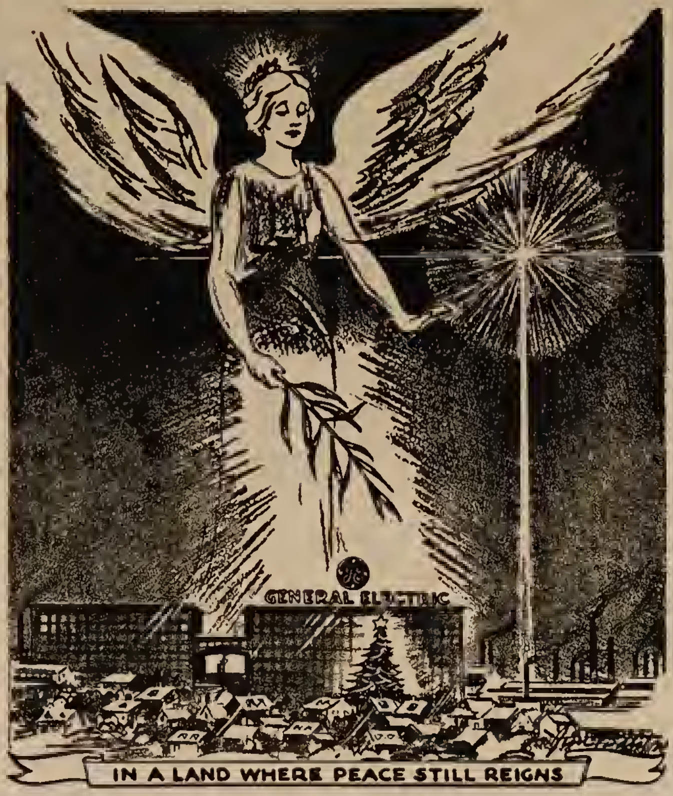
• As Common As Fleas

You've heard the expression, "as common as fleas." We might change it to, "as common as rush·orders"; for today, plants without rush orders are few and far between.

In the effort to get the work out we must not forget *quality.* When the customer says "Rush," he means standard quality work at the best possible speed. And it's up to us to do that job!

Democracy's concept of freedom must never include the freedom to destroy democracy; never must it give its deadly enemies that much freedom.—THOMAS MANN.

CHRISTMAS 1940



IN A LAND WHERE PEACE STILL REIGNS

Electric Blanket On Special Sale For Employees

An opportunity for employees to obtain General Electric Automatic Blankets for personal use or gift purposes at an unusually attractive price has been established for a limited period in the Employees Stores. Complete details of the offer may be secured from the Employees Store manager.

Stocks of the blankets are available in all stores. The Automatic Blanket is one of the sensations of the industry devoted to sleeping comfort. It has many novel features which have been described in detail on many previous occasions in the WORKS NEWS. The blanket is 72 by 86 inches and weighs only five pounds.

Employees interested are urged to visit the Employees Store on Monday or Tuesday of next week so as to get the best selection of available colors.

Decatur M.B.A. Elects Officers For 1941

Aloysius Schnider was elected chairman of Section 1 and Kenneth Beard of Section 2 in the annual election of officers for the Mutual Benefit Association. Other officers of Section 1 are: Hilda Gaunt, vice chairman; Ann Murtaugh, secretary; and Frank Bohnke, director. Donald Gage is the hold-over director. Officers elected for Section 2 are Bilos Ballinger, vice-chairman; Iva Teeple, secretary and Robert Miller, director. Hold-over director is Lohnas McClure.

Distribute Booklet

A booklet titled "Cold, Influenza, Pneumonia" has been issued by the Metropolitan Life Insurance Company and will be distributed to employees next week.

REMINDER

Employees eligible to subscribe for G-E Employees 4% Bonds are reminded that installment subscriptions (by payroll deductions) for the year 1941, will not be accepted after December 31, 1940.

Defense Commissioner

(Continued from Page 1)

manufacturers and the commission in July, and our hoped-for production for January 1, 1941, of 1000 planes per month will have to be scaled down hy 30 per cent to be correct."

Heavy Industry's Burden

Mr. Knudsen gave an inventory of defense materials for which orders have been placed, and said it would require about 18 billion man hours to complete. Continuing he said:

> "When we consider this addition to the regular production in the United States and realize that the larger percentage of this load lies in the heavy goods industries, we are confronted, due to the time element involved, with the greatest production problem of any country in modern times."

The defense commissioner expressed faith in "labor's acceptance of the spirit of fair play and the necessity of avoiding discrimination against industry equally as unfair as discrimination against labor." At the same time he said he had doubts whether "we have done a job yet in helping labor to get the proper understanding of what this defense job means to their future and their country's future."

> "When I look over the trend in the occupied countries in Europe," Mr. Knudsen said, "America is about the only spot left where law prevails and where the man at the bench has a chance to make his way without clicking his heels."

At The . . . EMPLOYEES STORE

G-E Automatic Irons offer the utmost in ironing performance and dependability. All equipped with Calrod, practically indestructible heating elements cast right into the soleplate close to the ironing surface. "Dial-the-Fabric" control provides easy and positive selection of correct temperature. Double button nooks permit ironing under and around buttons. Heel rest saves lifting. Comfortable moulded handles have integral thumbrest. Permanently attached cords have G-E moulded-rubber plugs. MODERNE, Cat. 119F113, Lite-weight, 3 pounds, has safety light, a new feature which makes this the first iron with a light that tells when to start ironing. Combined soleplate and pressure plate cast from a hard aluminum alloy, retains its natural brilliant finish. ROCKET, Cat. 119F108, weighs 4 pounds. STREAMLINED, Cat. 119F114, 4½ pounds, has large size ironing surface. CLIPPER, Cat. 119F101, weighs 5 pounds. FIFTH AVE., Cat. 119F107, another 5 pounder. Cat. 119F112, weighs 6 pounds and has removable cord connector. TRAVEL IRON, Cat. 169F68, handy 3 pound, equipped with mica core unit; simulated leather carrying case, will conveniently fit into a corner of traveling bag.

Heating pads are comfortable and convenient to use. Equipped with two accurately operating non-radio-interfering thermostats. New, rubberized, waterproof cover makes it possible to use wet packs. Furnished with three-heat switch with an "off" position, and eight-foot rubber cord with G-E moulded plug. VOLUME OF COMFORT, Cat. 136Q27, has a soft-wool eiderdown cover. VEL-ZIP, Cat. 136Q28, provided with a removable cover of soft, thick velour, which fits over the muslin heating pad and is fastened by a slide fastener. Pads are packed in attractive container convenient for storage.

Yule Program

(Continued from Page 1)

based upon the meaning of the Star of Bethlehem . . . a meaning which "once revealed to mankind, can never be blacked out"!

In the true Yuletide spirit, the "Hour of Charm" all-girl orchestra, under Mr. Spitalny's baton, will offer an unusual musical interpretation of the season's most familiar poem, "'Twas The Night Before Christmas"! With bows and fiddles, trumpets and drums, the orchestra will musically visualize Christmas as seen through the wondering eyes of a child.

Selections for the broadcast, most of which have been especially arranged by Evelyn of the Magic Violin, are:

1. The Night Before Christmas (A Spoken Song)
2. Parade of the Wooden Soldiers .... Orchestra
3. Nursery Rhymes
   Twinkle, Twinkle Little Star
   Farmer in the Dell
   Lazy Mary
   Mary Had a Little Lamb
   Rosa Linda and Lola at the Grand Pianos
4. Me and My Violin........................Evelyn and her Magic Violin
5. Three Toy Trumpets........................Trumpet Trio and Drummer
6. Dancing Tambourine..Orchestra
7. March of the Toys......Orchestra
8. Toyland..........Vivien and Violins
9. Silent Night, Holy Night................................Violins and Voices

Transformer In First Place In Safety Standing

Complete Eleventh Month With Frequency Of 2:05—Tool Division Second

Completing the eleventh month with an accident frequency of 2.05 the Transformer Division has an excellent possibility of leading the various Fort Wayne Works Divisions in safety standings for the year 1940. The Tool Division, in second place has a frequency standing of 2.42.

Six lost time accidents are recorded for November, two in the General Purpose and one each in the General Service, Specialty Transformer, Motor Generator and Tool Divisions bringing the total for the first eleven months up to fifty-four. The all department frequency at the close of November stands at 4.49 and the severity at .28.

Standings of the various Divisions in both frequency and severity are as follows:

	Freq	Sev.
Transformer	2.05	.04
Tool	2.42	.03
General Purpose	3.70	.07
Decatur	3.80	.30
Series-Specialty	4.11	.04
Motor-Gen.	7.57	.11
Wire-Insulation	9.27	.82
Refrigeration	9.50	.95
Distribution	12.01	.49
General Service	12.36	3.39

News Through Plants

We often wonder what would probably happen to Charlie Houser, Bldg. 4-3, if the cherry crop should fail some year, and he could not get his cherry pies. He tells us that one time he entered a pie eating contest, and would have won had they not run in some of the other varieties on him. It would have been a push over if they had all been cherry, says Charlie.

Workmen in the neighborhood of "Vic" Leakey's stockroom in Bldg. 6-B are asked to bear up patiently with the "Tyrolean Yodeler," heard continuously in that vicinity, as it is only Bob Moore and his exuberant exhaust valve.

Ruth Franzdorf, our smiling time clerk in Bldg. 6-B, purchased a G-E Sun Lamp to acquire a Mexican complexion for her vacation in Mexico. However, either her Spanish lessons didn't take or else the sun lamp wasn't hot enough, as Ruth spent the past two weeks in Florida instead.

Nice going Herbie Landstoffer, Bldg. 4-5. Of course you are a good golfer. As evidence we submit that you were a member of the team that won the tournament. Then, too, you admit you're pretty good, and that does make it rather conclusive. Naturally, you were very proud to receive that golf jacket as a trophy, but how could your wife share your elation over it when you took the neatly wrapped box home and dumped the contents, a bundle of rags, on the table before her expectant eyes.

Best wishes to Bess Bailey, Bldg. 19-5 and Ralph Martin, Bldg. 4-2, who were married on December 4.

Ross Vaughn, Bldg. 26-5 to C. Ahlersmeyer: "Is that egg on your face?"

Ahlersmeyer: "Naw, I haven't eaten any eggs for three weeks."

Sympathy

Sympathy is extended to Golda Mentzer, Bldg. 26-2, in the death of her brother.

Registering Ideas Proves Highly Profitable

Included on the latest suggestion award list are five men whose ideas netted them $25.00 each. They are: Top left—Arthur F. Swain, Bldg. 19-2 and right, Harold Gillian, Bldg. 4-3. Lower row, left to right—Don Poland, Bldg. 26-2; Art C. Kruckenburg, Bldg. 26-3 and Lewis C. Shattuck, Bldg. 19-5. As reported previously Mr. Poland also received an award of $50.00 during the same period.

All In Readiness For Club Christmas Party

General Electric youngsters can go to bed tonight with the assurance that all is in readiness for a big event in their lives, the annual G-E Club Christmas party to be held in the Club gymnasium tomorrow. This year's program promises to be one of the most elaborate in recent years with each feature of the program selected with the one thought of pleasing the young guests.

As has been previously stated, children are asked to be certain to attend the party for which their tickets are issued. The time is designated on each ticket. This ruling is necessary to prevent any one performance from being overcrowded. The programs will start at 9:00 and 11:00 a. m. tomorrow morning and at 1:00, 3:00 and 5:00 p. m. tomorrow afternoon. To prevent confusion, close observance of starting times of the various programs is asked.

KINDLING ORDERS

Orders for kindling will be taken for one week starting next Monday. Orders are to be placed at the Personnel Office, Bldg. 21 and remittance must accompany the order. The charge is 50 cents per half load and $1.00 per full load to cover handling.

Lighting Scientist Publishes New Book

Matthew Luckiesh, director of General Electric's lighting research laboratory at Nela Park, author of 21 books on lighting and all its phases is now the author of another volume, "The Torch of Civilization". The book, just off the presses, is published by G. P. Putnam's Sons of New York and has received very favorable comment in the current book reviews.

New Manager In New York District

T. F. Barton, for the past two years assistant district manager of the New York district of the General Electric Company, has been appointed district manager, effective January 1, according to an announcement by E. O. Shreve, vice-president in charge of sales.

Mr. Barton in his new position becomes administrative head of the apparatus sales organization for the states of New York, Connecticut, and northern New Jersey. H. H. Barnes, Jr., for many years commercial vice-president of the New York district, will continue in that capacity.

Christmas Dance

Contrary to usual custom a pre-Christmas dance will be staged at the G-E Club tomorrow night with Pete Dannecker's orchestra providing the music. Prices will remain at their usual low levels, 20 cents before 6 o'clock, 30 cents afterwards.

Credit Committee Meetings Scheduled

A change in schedule of meetings of the credit committee of the Credit Union is announced. The committee will not meet on December 24 and December 31 because of the holidays. A meeting will be held, however, on December 26. Regular meetings of the committee will be resumed on January 7, 1941.

Come To The Right G-E Club Party

Children holding tickets to the annual G-E Club Christmas party to be held tomorrow are urged to be certain to come to the particular party for which they have tickets. The tickets have a large number printed on both sides to designate the party. The schedule is as follows:

No. 1	9:00 a. m.
No. 2	11:00 a. m.
No. 3	1:00 p. m.
No. 4	3:00 p. m.
No. 5	5:00 p. m.

Family Shopping At The Employees Store

Families of employees who wish to visit the Employees Store are advised that the store will be open from 8:00 a. m. until 5:00 p. m. on December 23 and 24. Admittance will be made at the Lindley Avenue gate. It will be necessary that the visitors present proper identification cards showing that they are members of an employee's family.

Slips And Chips

By Sir Vis. 4-4

Here I am after a week's absence. I do hope you feel refreshed, I do. . . . The other day I saw Walter Hazelet doing an expert bit of casting shadow caricatures by the manipulation of his hands. Walt might be persuaded to give a full program for the kiddies and grown ups too. . . . You should have seen Maxie Shaw holding his foot and crying "It ain't funny M-Gee." With apologies from Gee to Shaw and vice versa, they have been happy ever since. . . . Thomas came to work all steamed up (as enthusiastic as a boy with a new electric train) about his short course in farming. Don is ready to try his hand at tilling the soil. He says, "There's nothing to it boys with a tractor." . . . Woof! Woof! and there goes Forest Gee to the doghouse. The other evening while he was perusing the evening paper, Mrs. Gee was completing a beautiful piece of crochet work. Gee arose, his shoe catching the crochet cotton, and proceeded to the kitchen. Mrs. Gee's handiwork was just about to the beginning again. . . . "We are going hunting," said Herman Lepper and his friend, to his friend's 13-year-old son who wished to go along. Herman, his friend and the dogs, tramped over hill and dale, through underbrush and marsh, for hours, and returned with one rabbit. The son shot five just a little ways from the house. There is a difference between hunting and finding. . . . Commander Arthur "Breezy" Stoll was a great committeeman. This was before he was a committee of one to set up and put back chairs and tables for 600 card players. Breezy was seen going home about 2:30 a.m. all hunched over like the Hunchback of Notre Dame. . . . We are very sorry that William "Bill" Weber is absent because of illness, and sincerely wish him a speedy recovery. We miss that whistle, Bill. . . . I will be back next week, in the meantime, I wish you a very Merry Christmas.

Wear Your Identification Badge

19-5 Office Chatter

F. Steinbacker has been attending the games at North Side so regularly that the gang is wondering if he gets free tickets. * * * W. Caston wishes to state he is not the W. Caston referred to in the newspaper. * * * The singing was fine and the refreshments finer at Ralph Dennison's stag party. * * * Virginia Klopfenstein has another familiar expression. Ask her. * * * Captain Houck is back to work all stitched up. We are anxious to see Otto Roehm back on the job. * * * That's all, excepting of course, A Merry Christmas.

The men sniffed and sniffed next morning after the Christmas party held at Avis Burnett's new home. . . . After a tour of inspection with all the "Oh's and Ah's" the girls could wait no longer for the Christmas exchange. Georgianna Meyers acted as Mrs. Santa. . . . Rea Kuhn put on all the different kinds of cologne and then wondered why she had a headache. . . . Then suddenly someone discovered that Agnes Frieburger had been forgotten, and a rush trip was made back to town. . . . The games were exciting and made everyone ready for the arrival of the fried chicken. . . . Yes, a very good time was had by all—and we did learn to jitterbug.

Soap Summers, Bldg. 12-3, was seen going into a furniture store carrying two very elaborate porch chairs and looking very glum. The boys were wondering if he was taking them back because the season was over or whether he was just taking them back.

The Missing Plum Tree

It is rumored, but as yet not confirmed, that Frank "Pappy" Archbald, Bldg. 19-3, has recovered the plum tree which has been missing since Halloween. Dame Rumor says that the tree now holds the place of honor in the Archbald living room, gayly decorated as a Christmas tree. It is even said that Frank has deceived his son to the extent of passing off the dried up plums as pine cones.

It certainly is getting bad when jewelry shops start sending advertisements and cash credit coupons to hurry Eugene Miller, Bldg. 6-4, into getting married.

Clint Newman of Bldg. 6-4 has been blessed with a new nickname —"Joe College." Ever since he came back from visiting Alabama University on his vacation he has been running around minus a hat. What happened to that classy lid, Clint, did you include that in a "Bundle for Britain" or did it blow off and go floating in a mud puddle?

On next Wednesday we so-called slaves of Democracy and the capitalistic system will feast and make merry, groan from much food, gloat over many presents, and gravitate to little boys' trains or little girls' doll houses.

We may even have time to think of the real meaning of Christmas, and of "Peace on Earth, Good Will To Men."

We may also try to forget how we hear from all sides how unpeaceful the whole world is, and how much ill will there is between men.

Well, here's some thoughts for you to think about next Wednesday afternoon, when you can hardly get your breath from feeling like a Kroger truck and semi-trailer.

Food rations per month in Europe:

Germany: Sugar, 32 ounces; butter, 18 ounces; meat, 70 ounces; bread and cake, 78 ounces.

Poland: Same, except a little more meat and less bread.

Holland: No meat available; fats, 35 ounces; cereal, 28 ounces; bread, 70 ounces.

Norway: Sugar, 28 ounces; bread and flour, 35 ounces.

Denmark: Butter, 50 ounces; cream, 35 ounces; cheese, none.

Occupied France and Belgium: About the same as Germany.

England and Allies: Some better but far from good.

Now suppose we, as companies and individuals, acted like nations in Europe. Suppose that in meeting competition, instead of continually striving to build better products at less cost, and thereby benefiting everybody, we decided to shoot it out with (insert your favorite competitor here). Can you imagine what a mess this country would be in, even as Europe is today? Well, I'll take the cost reduction method every time.

Which shows how Old Sandy can start on any subject and end with "cost reduction."

But it takes Cousin Colin to apply it to Santa Claus. He told his children that Sandy McClaus sold his sleigh and will ride one of his reindeer this year, and that by the time he gets to Fort Wayne, he won't be able to get his knees close enough together to get down the chimney.

Harry Parker, Bldg. 4-3, really can compose good poems, but as a package carrier, he just let's them all go "Boom."

Punch Press 19-5

By Slug

Whenever a pair of micrometers are mislaid or lost it is generally reported immediately, and well it should be for the price of these babies is not found on bushes. So it came to pass that when Charley Horstmeyer reached for his "mikes" and found only an old chewed up toothpick, he raised a hue and cry that could be heard throughout the building. Duryee and Staley searched every nook and cranny but to no avail. Staley claims it is easier to find tools if some one follows you around to yell "hot or cold". The mikes were about to be entered on the official record as having performed an extra good job of disintegrating when Lem Clouse, who has a keen pair of eyes and a quick mind, spied them nestled in a container which was never meant for delicate tools. At any rate they were restored to their rightful owner who was duly apologetic for causing such a search. We would never apologize for worrying about $8.00 or $10.00 worth of micrometers, so don't feel too bad Charley. . . . Having consulted my legal battery and ill advisors in lengthy discussions, they have at last handed down their decisions that: whereas no one ever reads this thing to the end, it will be perfectly safe for me to wish everybody who has the misfortune to read this stuff, and those who haven't—A MERRY CHRISTMAS.

Thisa And Thata — 19-5

Margaret Feaster enjoys riding in a taxi so much that she forgot her Elex ticket just so she could ride home in a taxi to get it. . . . One way of getting waited on is taking your groceries straight to the manager. Isn't that right Frieda? . . . Margaret Benet may be little but she sure has a mighty right. . . . Would someone please tell your reporter why Evelyn Archibold wanted so much fresh air the other day? . . . Dorothy May Creigh sure had the cards stacked. She got the radio.

Gerry Foerster, Bldg. 16-5, threatens to quit subscribing to the WORKS NEWS unless he can see his name mentioned once in awhile. I was taught never to say anything about anyone unless it was good.

Anyone interested in seeing some "classy pipes" should note those that often jut from the lips of Bill Gerhard of Bldg. 6-3. Bill could give everyone in Bldg. 6 a "sewer" for Christmas and still have enough left to pacify all the Indians in North America.

Merry Christmas To Winter Street Employees

We have enjoyed this year's increased business and look forward to an increased volume for the year 1941.

With the fine cooperation and interest shown by you in the past year, I am sure that we will succeed in our efforts.

I extend to each one of you my personal greetings and best wishes for a Merry Christmas and a Happy and Prosperous New Year.

A. W. Wennerstrom.

This is the time of season we exchange our felicitations, and we as Americans have much to be grateful for.

At this time, I wish to thank you for the fine cooperation given me during the past year.

I take this opportunity to extend to you my personal greetings for a Merry Christmas and a Happy and Prosperous New Year.

O. L. Weitzman.

This Christmas season we can appreciate more than ever before the fortunate fact that we are Americans and can fully enjoy our freedoms and advantages.

We still can and do wish to all a Merry Christmas and Happy New Year with the knowledge that we can realize these wishes, even though most of the world cannot.

F. T. Grothouse—W. Knaus.

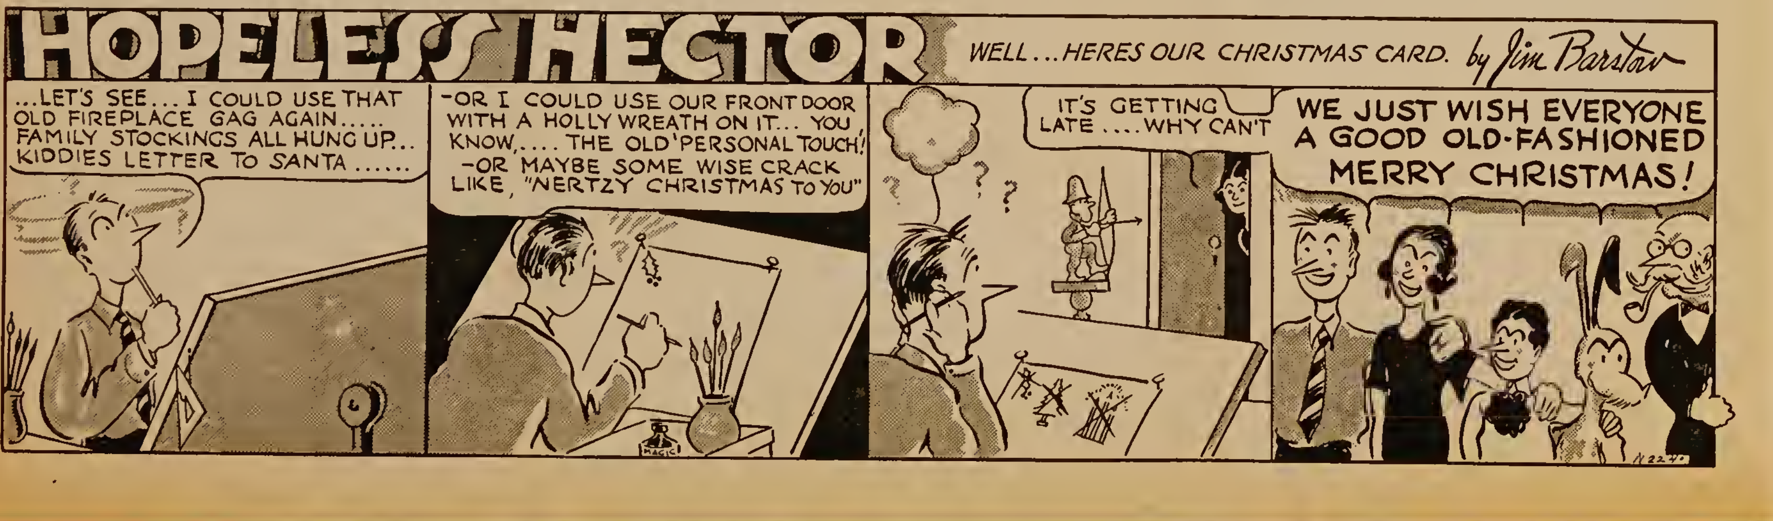
Ever since Vern Sliger of Bldg. 6-3 got that job in the Cafeteria, accidents in Bldg. 6 have dropped to a surprising minimum. When Sliger used to make his customary Friday noon mad dash for the Fairfield gate bodies were propelled in the air two and three at a time but now seeing he is only hurrying to more work, a snail could spot him 20 paces and still edge him to the door.

Where did Helen Gearhart, Bldg. 19-5, get those perfumed dinkusses she passed around.

After wondering for several days our curiosity finally overcame us and we asked Adele Johnson, Bldg. 26-5, why she was wearing that key around her neck. It seems that her Christmas presents are locked in her suit case. One solution for keeping a secret.

The great hunter of Bldg. 26-5, Jim Mitchell, decided his hunting knife was too dull, so he decided to sharpen it. Somehow before the day was over the words, "Never skinned a rabbit," were found on the blade. Is it the truth, Jimmie?

It seems when the Traction Company is good enough to send out a special street car just for Rufus Niblick, Bldg. 26-5, he could at least refrain from using somebody's pass. (Not much profit on that trip).



HOPELESS HECTOR
WELL...HERES OUR CHRISTMAS CARD. by Jim Barstow
...LET'S SEE... I COULD USE THAT OLD FIREPLACE GAG AGAIN..... FAMILY STOCKINGS ALL HUNG UP... KIDDIES LETTER TO SANTA ......
-OR I COULD USE OUR FRONT DOOR WITH A HOLLY WREATH ON IT... YOU KNOW,.... THE OLD 'PERSONAL TOUCH'! -OR MAYBE SOME WISE CRACK LIKE, "NERTZY CHRISTMAS TO YOU"
? ? ?
IT'S GETTING LATE ....WHY CAN'T
WE JUST WISH EVERYONE A GOOD OLD-FASHIONED MERRY CHRISTMAS!

THE EMPLOYEES STORE IS READY FOR XMAS

NEWS THROUGH THE PLANTS

Bldg. 4-4

We know of one husband who is not waiting until December 24th to buy his wife's Christmas present. Yes, Nual, your hubby was seen in the very act. . . . We hear that Mae Kline has gone on a diet since she came back from Florida. We wonder why. . . . Hilda Rodenbeck says she hopes Santa will bring her a new pair of shoes instead of grapefruit juice this year so she can throw sway her white shoes after Christmas. . . . Most people think that having the parking spaces numbered is a great convenience. But this is not enough for Marie Louden. She is waiting for them to install hitching posts, too. . . . Cliff Witham has concocted a new refreshment called ice cream pudding. He buys a Dixie cup of ice cream, leaves it on his desk for half an hour then stirs vigorously. Some chef. . . . June Juday has the men falling for her. Especially during the Christmas rush. It was in the basement of one of our leading department stores too. June's sister was with her, and between the two girls the man was assisted to a standing position. . . . This little item may be passe by now but is too good to omit. The Elex Club Christmas program was greatly augmented by Dorothea (Stogdill) Paul's rendition of Silent Night, Holy Night. It was so soothing that Louise Roberts calmly dozed off to sleep during it. . . . Marie Louden was seen not long ago waving a flag of truce on Calhoun street. The flag pole was her umbrella. Remember, Marie? . . . It must have been Hilda Scott who said, "When winter comes, can spring be far behind." At any rate she has started her spring house cleaning already. . . . Fatigue, it seems, is not always caused from over work. Edith Fuller's comes from chewing gum so actively. . . . Clarence Seslar must be out after big game by the looks of that bright red hunting cap he was seen wearing at work. . . . After all these years of determined bachelorhood, Walt Niemeyer finally gave in and passed the cigars last week. Good luck to you, Walt. . . . The following girls held a Christmas party at the Berghoff Gardens last Friday night: Oma August, chairman; Margaret Thompson, assistant; Nora Roser, Louise Roberts, Martha Kruse, Lenora Boone, Ethel Poorman, Edith Fuller, Mary Voirol, Zella Sheehan, Grace Boegli, Berneil French, Hilda Rodenbeck, Lillian Meeker, Evelyn Hofer and Catherine Gallmeyer. The table was attractively centered with a bowl of red roses and flanked by candles. Matching corsages of roses marked the place of each girl. After dinner, a gift exchange was held. Everyone had such a grand time that they are all counting the days until next Christmas. P. S.—Zella Sheehan asked for a man in her fifty cent exchange, but met one down at the Berghoff Garden's for nothing.

Ruthmary Riedy, Bldg. 26-5, wants everyone to know that the ring on her right hand was a graduation present from her parents.

At first we thought it might be Santa Claus on an early morning delivery, but when the patrolman lifted one of the big boxes off of the pile to see who was carrying them, found that it was only Ralph Steward, Bldg. 26-5.

Bill Rohe, Bldg. 8-1, wants to know why he never makes the Scandal Sheet anymore. If you really want to know—it's because Elmer won't print what is turned in.

Winter Street News

"Red" Miller definitely needs glasses—a couple of weeks ago, he couldn't find his false teeth, and last week he laboriously tried to get in some fellows car for a half hour before he discovered it wasn't his.

The Winter Street girls held their annual Christmas party Monday evening, December 16, at the YWCA. When the dinner bell rang, all the girls were off their diets, during the serving of the turkey dinner. Santa Claus, (Rita Wagoner in disguise) brought gifts for all present which included besides the employees of the Winter Street plant, Angela Hankee, and Veda Orff, former employees.

Frank Mason, the absent-minded "professor" hits the news headlines again this week. Frank parked his car on the street Tuesday, and when dinner time came, he diligently combed the parking lot for his "Lizzy", only to be informed by the watchman that he parked on the street.

Anyone having any extra paint around the holidays, see Glenn Macy, who prefers to kill "colored" chickens rather than white ones. His neighbors are already preparing their shot guns, to be in readiness when Glenn starts chasing the chicken for his Christmas dinner.

No! You are wrong—'Twas not Santa attracting the large crowd at Broadway and Wall Streets. Just Walter Elliott, Bldg. 26-5, on his knees retrieving parts for his horseless carriage.

Art Johns, Bldg. 19-5, left last Friday afternoon for Clear Lake. Art was not so sure he would make it for he did not have his old faithful to drive. It was more or less of the well remembered brass radiator type, with side crank. But Art was awful brave about it after seeing there was no snow. So he loaded the old bus, took an extra gallon of oil, two flares, gauntlets and goggles—and last but not least he packed a big lunch and was off. About ten relatives were there to see him off. Starting at 3:30 Art's estimated time for the trip is set at nine hours.

Watch next week's NEWS for a special feature by Joe Doakes. It is listed under the heading of "Feminine Viewpoint."

Anyone wanting information on how to do your Christmas shopping and be able to avoid the jars in a crowd, just talk it over with John Deahl of Bldg. 4-3.

A group of Main Winders of Bldg. 4-2 held a Christmas exchange at the home of Jerry Gerard. Those present were: Loretta Wynekan, Gene Weikel, Agnes Ditlinger, Mazie Greek, Lucinda Fitch, Rita Zuber and Sue Cameron.

Vicki Fuhrman, Bldg. 4-2, wants some ideas on how to make gravy. One night she thought she would surprise her husband and make him some gravy. Vicki had gravy all right. Her husband couldn't even cut it with his knife.

Paul Newmann of Bldg. 4-2 went to Indianapolis to take his examination for Second-Lieutenant in the army.

When Herb Siebold, Bldg. 4-3, emerged from W&D's last Saturday afternoon, all he needed was a Santa suit to complete it all.

Visitor: "Sonny, what's the noise upstairs?"

Sonny: "Ma's draggin' pa's pants across the floor."

Visitor: "That shouldn't make that much noise."

Sonny: "I know; but pa is in 'em."

19-4 Spot Jottings

Oh, for the life of a pampered pet. Thelma Court just bought a bassinet for her little cat Buchie. . . . Paul Noble is spending a week's vacation in Schenectady, New York and Washington, and is getting in a couple of days skiing—the lucky fellow. . . . Yes that would-be mustache of Ed Cade's is no more. What a pity. . . . Bob Hermley and Clyde Helms entertained the die cast boys Saturday evening at the home of the latter and judging by the time the party broke up, Sunday morning, it was a grand success. . . . Merry Christmas.

The girls in the field department, Bldg. 19-5, gave their annual Christmas party recently at the Berghoff Gardens. Following dinner, a gift exchange was enjoyed. Those present were Malinda Gehle, Amelia Yovan, Helen Gerhart, Bee Stalter, Kathryn Hepker, Emily Nierman, Lorinda Beyerlein, Ella Hartnett, Martha Scherzinger, Hillis Wearley, Regmore Engeman, Kathleen Moran, Bess Martin and Jeanette Ryan.

The General Purpose Motor Production Department, Bldg. 4-6, will hold its annual Christmas dinner-dance party Friday evening, December 20, in the Garden Room, Community Center. Plans include Santa Claus' presence, and Magician Sam Stearns, who will offer his delightful deceptions after the dinner. E. J. Horstman will preside as toastmaster. Miss Marjorie Hegerfeld, assisted by Dorothy Banks, Dorothy Mueller, Vera Berning, Gladden Grauer, Charles Gable, Elton Throndsen and Glen Willits are in charge of the evening's arrangements.

REPORT ACCIDENT HAZARDS
NOW IS THE TIME TO PREVENT the ACCIDENT WHICH MAY OCCUR NEXT WEEK

Well, well. The Bldg. 26-2 gang is sure looking to Santa to do his stuff. Lawrence Shuster says, "If I don't get an electric shaver for Christmas, it's going to be too bad." Harry Karr has submitted his list which includes a new set of uppers, a garter belt, an undershirt and a pint. Alber Noir wants a red woolen suit of underwear to help him "take it" in the army. John Leith wants a new cuspidor; and please, Dear Santa, send Rolly Wickliffe the biggest cake in town, cause Rolly loves his cake.

Julia Scheumann, Bldg. 26-2, doesn't care to hear anymore about the mistake she made at the G-E Club.

We are wondering who the pretty girl is that Clarence Whonsettler, Bldg. 4-3, buys so many 5-lb. boxes of candy. We suppose by '41 it will be just Mr. and Mrs.

When the Safety Award money was won in Bldg. 4-2 it was agreed by all that all of the members would get three pieces of candy with the money. Jim Truman hurried and ate two of his candy bars and put the other one in his dinner pail, explaining that he would have the Missus cut in it four pieces, for her and the two kiddies, and he would still get another bite of it.

Borings From 4-4 Office

The annual Christmas party is over, and all is well. We are full of the turkey and the dressing—mostly the dressing. It was truly a gala affair. I joined the stag line, and had more fun than I would have had, had my best girl been there. She's the one that works in Bldg. 26-1. Don't tell her, but I had a date with a dream from our own office. Oh, now to go on with the party. First we had our eats, and then Emmy Stock, acting as master of ceremonies, opened the program with the carols, and did we ever sing. I sang so loud that I can hardly talk now. Well then we got to open our presents. Do you know what I got? A snake, do you suppose they could attach any significance to that gift? We next heard from Lisle Hodell, and then Mary Hile introduced Marjorie Boerger. She spoke in behalf of the dean of women of our office. Melvin Warner introduced Mrs. Walter Holloway as Mrs. Bill Skevington. Now Mel is in the doghouse with both Bill and Walter. We all got a big laugh out of it. Art Wedler was highly complimented by Kenny Alterkruse as being the author of "The Koran." We also played Professor Quiz and a lot of the scholars in the office did not know who wrote the shortest book in the Bible, and they also missed many of the easy ones. Ardeth Hemp, Mrs. Ewald Stinsmuehlen and Mrs. Walter Holloway won first prizes for the women, and Messrs. Lisle Hodell, Martin Voltz and John Burnett won the prizes for the men. I bet you didn't know there were so many smart people in the office. The remainder of the evening was spent in dancing. Gosh, you should have been there, it was truly wonderful, the table looked so nice, and the flowers and appointments were so wonderful. I wish we could do it again. Bob Spitler looked cute at the party with his six-shooter at his side. Emmy Stock let the cat out of the bag and almost got poor Elmer, the field mouse. He announced that we are going to lose two of our girls from our office. Mary Bangart and Ardeth Hemp. They have decided to put all of their time in keeping house. Nice going, girls. We will all miss you very much, but hoping that next year at our annual Christmas party you will be back as guests instead of employees. . . . And there is the girl in Bldg. 4-4 office that says she goes steady. However, she also states that she is free on Friday and Saturday nights. Now I, Elmer, wonder if that is a subtle hint to ask her for a date? . . . Glen McAtee won't accept candy from the girls because he's afraid of spoiling his girlish figure and getting that middle age spread. . . . We have a nice tiny girl as a new addition to our office—in the corner called "accumulation"—her name is Va Plummer and hails from Huntington. . . . Glen McAtee says he's too old to make the WORKS NEWS. This is just the beginning, Glen. We want you to know we think of you and intend for you to get around. . . . Ask Ewald Stinsmuehlen what kind of care he gives to his roses. If you ask me, the basement is no place to preserve them, especially without water. They will die every time if you don't watch them. . . . 'Tis enough for now 'cept I forgot to thank you all for the lovely Christmas presents. I appreciate them a lot, I remain. Sincerely, as ever.

Elmer, The Field Mouse,
The Rat to You.

Wear Your Identification Badge

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

As we approach the Christmas season this year, we feel that we can better understand Holmes' poem which begins, "I heard the bells on Christmas Day, their old familiar carols play." That poem was written during the Civil War, and Holmes questioned in his heart the truth of the promise, of "Peace on earth, Good Will towards men."

War and discord on the face of the earth is no new thing; yet always in the midst of strife and alarms when the Christmas season rolls around once more, people everywhere remember the birth of the Christ Child at Bethlehem, and gather together to express in carols and hymns of praise, by exchanging of gifts and greetings, their joy and gladness at the coming of the Savior. So it has been in the past, and it will be in the future.

There is no need to despair for "God is not dead, nor doth He sleep"; are not all our Christmas songs expressive of triumph and victory, the victory of Good over Evil?

We quote from an editorial by W. D. Moffat regarding the spirit of kindliness and good-will that reigns at Christmas: "Can anything that happens every year be a miracle? Life itself, when we reflect on it, seems a miracle—and love the greatest miracle of all. And Christmas is its festival—a joyous festival of full-hearted, generous outgiving of good will and good wishes to others. . . . That this festival spirit, surviving through twenty centuries of human struggling, striving and self-seeking, should return each year to lift us out of material affairs and bring us in that "untellable fashion", a generous and overflowing happiness—that surely is the Annual Miracle."

Once more we'll repeat Bob Cratchit's and Tiny Tim's greetings: A Merry Christmas to you all, my dears—God Bless us, every one.

The Bldg. 4-3 Men's Choir, under the direction of the old singing master, Walter Schelper, are busy getting ready for the Christmas season. Walter said they have extreme difficulties when practicing due to the fact that all the dogs in the neighborhood gather around his home and bark and howl while the boys are singing. They plan on putting on a concert from the Lincoln Tower.

Wm. "Beezer" Burke, Bldg. 4-3, our genial flange hustler, tells us that he is to play Santa Claus for the neighborhood children this year. Bill said that the only difficulty he might have would be getting a false face to fit him.

We hear that Eveline Best, Bldg. 19-5, goes for Joe E. Brown, the movie star, in a big way. What is the attraction, Eveline?

Santa Claus must have been looking around, because we hear that Kathleen Moran, Bldg. 19-5, received her outing flannel night gown she asked Santa for.

Elmer "Roaring Sneeze" Harshman, Bldg. 4-3, our champion sneezer, will have to look to his laurels now that George Cooper has become quite a sneezer. George's technique and tonal qualities excel those of Elmer, but when it comes to volume, Elmer has them all backed off the boards.

To You And Yours. The Works News Wishes A Merry Christmas

NEWS THROUGH THE PLANTS

(Continued from Page 5)

19-3 "Grittings" And Stuff

For some time past, there has appeared on the pages of our WORKS NEWS, articles by some unknown master of the poison pen, setting forth minor little happenings (we wished kept quiet) that have arisen in the lives of the undersigned victims. But being of a kind and forgiving nature we do wish this literary genius a Merry Christmas and hope Santy brings him a fine box of cigars each loaded with 40% dynamite.

Signed:

Henry "Our Hero" (Save the gals) Lojek
Donald "Pay Rock" (Gold in them thar hills) Shultz
Elmer "Termite" (How I love trees) Wagner
Walter "Winchell" (Just one more peep) Histed
Boyd "Dagwood" (What a man) Fisher
Jim "Mosquito" (I slay them) Stouder
Frank "Junior" (Oh, for a horse) Archbold
Jack "Stepins" (I'll get by) Toole
Bob "Curious" (I hear you calling) Archbold

Henry Ludeke of Bldg. 19-3 found himself in difficulties one evening last week. Henry went out of the shop for some lunch, and after consuming some quantities of hamburger, pie, and coffee, they discovered he had no money to pay the bill and the proprietor insisted he pay or wash dishes. Henry removed his coat in preparation to wash the said dishes when a friend came in sight and in Henry's words, "Boy, was I glad to see him!"

Floyd Mutton of Bldg. 19-3 must be in the money now, we see he has a colored auto driver that brings him to work.

The girls in the Cost Dept., Bldg. 19-3, held their annual Christmas Dinner Party and Exchange December 17 at the Berghoff Gardens. Those present were June DeWitt, Miriam Lemke, Eugenia O'Connor, Irene Benanti, Mary Alice Herber, Nadine VanHorn, Annabelle Haines, Lavern Englebrecht, Mary Frances Lauer, Rachel Luellan, Mary Rottman, and Raydeen Miller.

For the past two weeks, Frank (Junior) Archbold, Bldg. 19-3, has suffered from an overdose of Yuletide spirit and in keeping with the season, drew forth from his desk a paper sack containing, so he said, the best of hard Christmas candy. The report of the generous act spread like wild fire from Planning to Production, Production to Service Bureau. Now enter the villains: While Frank was home toasting his feet by the fire a raid was made on his bag of candy. Next day reports circulated reflecting discredit on the quality of the goods. Ozzie "Frenchy" Lacerte reported a piece marked "1939." "Winchell" Histed hesitated long enough to show "Termite" Wagner one sweet with "1938" moulded in its middle. Some of the boys complained that the candy seemed hard. Examination revealed the sack filled with a mixture of candy, nuts, (steel) bolts, washers, etc. now known as "Dentists' Delight." Henry "Fire Eater" Lojek made a dental visit a few days later. Don "Rock Garden" Shultz who for other reasons passed out a high grade of candy and cigars denies any sabotage on his part or any knowledge as to the source of the nuts, bolts, and washers.

Gus Kruse, Bldg. 26-5, is expecting so many presents that he is taking a vacation Christmas week so that he can enjoy them.

M.B.A. PATIENTS

Apparatus: William Auman, St. Joseph Hospital.

Transformer: Robert Hull, 938 W. Dewald St.; Edna Martz, 1415 High St.; Betty Pequignot, 665 Huffman St.; Eileen Lipp, 731 Taylor St.

General Purpose: Elva McMaken, 438 E. Creighton Ave.; Dorothy Raber, 2117 Brown St.; Catherine Foley, 802 W. Wayne St.

General Service: Harold Roche, 309 W. Williams St.

Winter Street: Viola Mestamaker, 515½ E. Jefferson St.

Left the Hospital: Ruth Rask; Eileen Meyers.

Returned to work: Glenn Hobbs, Vera Fisher, Altha Miller, Virginia Davis, Clarence Rothgeb, Esther Croghan, Ross Cohagen, Herbert Springer, Edna Mertz, Waldron Brunner.

What do you suppose Paul Weaver, Bldg. 26-5, will promise his little girl for Christmas this year? We understand that last year she was promised a pony, later changed to a wagon, and ended up with a bull terrier.

The employees in Bldg. 4-6 wish to express their sympathy to Zoa Didier in the death of her mother.

With everyone so busy doing Christmas shopping it is awful hard to relax. It doesn't seem to be much of a job for Viola Moore for we are told she was seen riding a scooter around in one of the toy departments.

Lillian David and Loonie Rockstroh, Bldg. 26-5, can do a perfect Dagwood when they make their eight o'clock dash for the clock.

It should be about time for Ralph Steward, Bldg. 26-5, to drive to Terre Haute to get his car greased. Ralph says he saves a quarter by going there.

Alyce Roesner, Bldg. 26-2, has joined the ranks of the married gals. She is Mrs. Carl Vizitum.

Better wear your goggles when you ask about David Edward because the buttons sure will let loose. Little David already has a pair of boxing gloves, and it won't be long until we see him in the Golden Gloves.

Golda Mentzer has been barred from riding her niece's pet goat. Golda's niece says her aunt makes the goat bow-legged. So no more rides for Golda.

Here's wishes for a speedy recovery for Orville Ellenwood, Bldg. 26-1 from the gang. Come back soon, and have a Merry Christmas.

The gals in Bldg. 26-1 demand to know what sort of a thrill the males in the department get by looking over the girls hats.

Euchre Headquarters, Bldg. 2-E. The old saying "I haven't been skunked in forty years" is not so good. Robert Truelove and Kenny Carr finally got the fur.

It is rumored that Ray Lindemuth, Bldg. 4-6, will take the last day of his 1940 vacation, and will stay home Monday to bake his annual Christmas cookies.

Well, well, well. Louise Schwartz, Winter Street, won't find it necessary to "sock up" since the Christmas party. Is it true or false that one of the packages carried the card of a prominent Winter Streeter?

We are wondering what happened between the time Garland Roby, Bldg. 19-4, put the chicken on to fry, and an hour later when he came home and found it fried to a crisp.

What kind of a clock was it that Walter Elliot bought for the group in Bldg. 26-5. It is reported no one could tell the time by it and that five minutes after it was hooked up it caused a complete black-out.

ON -- the Alleys

Stray bits of G-E Club gutter gossip. . . . Begins to look as if maybe somebody is putting glue on the bottom of the Club pins, as high scores have been dropping off considerably. . . . Tool Room League bowlers especially are pulling out their hair by the roots, as they seem to be unable to carry enough wood. . . . Even President Schele only netted 100 in his first game. . . . Proehl of the G-E Club Major League doesn't seem to have any trouble, as he garnered 265 for the second high single game of the season, while the Coaches quintet of the same league establishes a new record for a high single game, 1,044. . . . Cy Seymour of the Small Motor League had a little trouble in remembering his house number the other night, consequently had to look it up in the phone book—this rather amazes Chas. Schild as he can't figure how Cy has found his way home if he doesn't know where he lives. . . . There is still a couple of vacancies in the popular Transformer League, contact H. C. Meeker. . . . Ray White, secretary of the G-E Club Major League, issues the warning to his circuit keglers that it won't be long before the City, State and ABC tournaments get under way, consequently some of the boys better start serious practicing.

REFRIGERATION BOWLING

By Bob Ringle

Last Tuesday night's session of the hardwood circle ended the first half of the Refrigeration League with every team battling for a win.

The telephone was ringing off and on during the evening. Notice to Wilson (now at Broadway) if he still reads Winter Street news. That black line* at the beginning of the alley isn't anything to fool around with. He who crosses over boundary line is apt to hear the sweet music of bells in his ear. Take heed from this day forth. Four of the boys, and only four, tapped at the sacred portals of the elusive 200. They were Bell, 215; Houser, 210; Kreischer, 205; and Blomenburg, 201.

There were a few good splits made during the evening, among them, a 4-10 combination by Stanbery, and also a toughie by Glenn Castle, but as yet, we haven't been able to get straightened out on just what it was.

*For your information, that black line is the foul line.

Decatur Bowling

Team	Won	Lost	Pct.
Office	21	12	.640
Bearings	21	15	.585
Tool Room	19	14	.575
Rotors	20	16	.555
Packers	19	17	.525
Maintenance	17	16	.515
Production	18	18	.500
Shafts	18	18	.500
Flanges	18	18	.500
Testers	14	19	.425
Stators	15	21	.415
Shells	12	18	.364

With only one night remaining to bowl in the first half of the G-E Bowling League, the race tightened down to a close finish. The Flange team scored a grand slam, defeating the Testers 3 games by piling up 2368 pins to their victims 2254. The Stators won 2 games with a 2393 total to the Packers 2190. The Rotors matched 2 high games with one low game to win 2494 pins to the Bearings 2233. The double loss dropped the Bearings a little more out of first place. The Shafts nosed out the Production team 2 games and scoring only 21 more pins in the three games. The final score on total pins was Shafts 2428 and Production 2407. The Maintenance team won 2 games from the Tool Room team, but were short of their opponents in total pins, having only 2441 to the defeated Tool Room's 2439.

Paul Busse led the double century bowlers this week with a 212 count. Other two-hundred scorers were Ray Leitz 202, Oran Schultz 200, Paul Reynolds 202, Roma Breiner 200, John Beery 201, Harry King 200, Lister 206.

Department Cage League Openers Provide Thrills

Apprentice A, S.M. Factory And Main Office Take First Blood

Displaying better than point a minute offenses, three teams, Apprentice A, Small Motor Factory and Main Office, started the 1940-41 G-E Club Inter-department basketball season off in fine style by chalking up initial wins over West Side, Squares, and Apprentice B, respectively.

Apprentice A, the defending champions, had the hardest time of the three in racking up their win, as West Side remained right on their heels up to the last quarter but here the "Champs" put on a final spurt that gave them a 50-32 win. The first half, as has been stated, was the most thrilling of the two, as with Offerle, a newcomer, providing a 12-point scoring punch first, first West Side would be ahead and then the Apprentice would counter with a couple of buckets to assume the lead. The last half, although, was a slightly different story as Lauer, Apprentice center, who had made five fouls in five shots during the first quarter, started to can field goals with the same amazing accuracy to get 12 more points, enough alone to win the game.

With three new recruits, Rabus, Clawson and Voirol providing plenty of spark to their attack Small Motor Factory, after getting off to a slow start also turned on the heat during the final stanza to bag a 41-18 win. With Clawson using his speed and shiftiness to make ten points, Voirol cashing in on long shots for nine more and Rabus flipping in thirteen markers via the one-hand method, Small Motor Factory completely reversed their last year's form to gain an easy win, although the Squares, with Barney pacing the attack, kept in the heat of the battle until the third stanza.

Main Office, the new recruit of the league, declared themselves as a team to watch by scoring almost at will to defeat Apprentice B by the count of 38 to 18. This game started out as if to be the best battle of the evening as the quarter score was 10 to 7, but Main Office started guarding, rebounding and scoring in championship style and ran the score up to 16-7 at the half. They continued to display this same brand of ball in the next half and consequently had an easy time garnering their initial league win. All of Main Office's squad of 10 men are about equal in ability, speed and aggressiveness although Bender seemed to be more effective in scoring last Thursday, getting eleven markers. The games are proving very popular and an increasing attendance throughout the season is anticipated. No admission charge is made.

IN THE ROUGH

By WALTER SUNIER

It is a darned good idea if you are having trouble with some particular club to play an entire round with that club. If you want to make it still easier, you can use the same club for putting, thus leaving you with only one club to carry. When you have finished the round either that club will be finished with you or you will be finished with it. Generally you will find that you have gained some skill in handling it. The next time you won't be afraid to use that club.

The surprising thing about playing a round with one club only is the score that can be made. The score will be within very reasonable limits of the score made using all clubs. In August, the Kirkes, Reinhart and Didier tried it. W. Kirke and D. Kirke used No. 2 irons only for every shot including putts and scored 48 and 51 respectively on the second nine at Brookwood. Reinhart and Didier used No. 3 irons for every shot and scored 51 and 43 respectively. Why carry a whole bag full of clubs if you can shoot 43 with a No. 3 iron? Freddy Link shot the second nine in 34 using nothing but a mashie.

Some of the boys are dolling up their table tennis outfits with fluorescent lighting. We understand that Kronmiller has 100 foot candles on his table with fluorescent lighting. Gompf is putting in fluorescents and Wilbur Warner has his fluorescents up. Wilbur couldn't get away from motors in his set-up so he used an old motor in the circuit of part of the part of the fluorescents to eliminate stroboscopic effect. Smoley, the lamp salesman, should have fluorescent lighting but perhaps he and we do not need it because we can't see over the table. Anyway it's more fun to play under the table—especially in mixed doubles.

Merry Christmas

Officers of the G-E Club and Elex Club wish to take this opportunity of expressing appreciation of the many kindnesses extended their organizations during the past year and to wish all members and friends a very Merry Christmas.

Best wishes for a Merry Christmas and a prosperous New Year are expressed to all Fort Wayne Works employees by members of the Volunteer Fire Department.

Book On Company's History Published

"Men and Volts" is the title of a history of the General Electric Company written by the late John W. Hammond of the News Bureau at Schenectady. The volume, edited by Arthur Pound, widely known author, is published by J. B. Lippincott Company and is available to employees through the Employees' Stores at a special price.

The volume covers in detail the story of the Company's pioneer days, beginning with the parent companies and continuing down to the present day.

Volume 24 FORT WAYNE, INDIANA, FRIDAY, DECEMBER 27, 1940 Number 45

A Happy New Year

To All Fort Wayne Works Employees:

We may all feel happy in the fact that 1940 has been a year of increased activity in the Fort Wayne Works, and that many former employees have been offered employment in recent months, and have been re-engaged.

During the past year there have been many changes throughout the world. The effects of these have, to some degree, reached us, requiring adjustments in our current operating plans, additions to our personnel, changes in facilities and the operation of new projects.

Many of these changing conditions have resulted in complex problems.

These, I am happy to say, have been met with a fine spirit of co-operation and mutual understanding which, if continued, will result in increased security and prosperity for all of us.

In the hopes that this spirit may grow and further cement our friendly relations, I extend to every member of our Fort Wayne General Electric family, greetings and best wishes for a Happy and Prosperous New Year.

Superintendencies In Fractional Announced

T. L. Staley

L. D. Hodell

The appointment of L. D. Hodell as superintendent of Bldgs. 17-2 and 17-3 and of T. L. Staley as superintendent of Bldg. 4-4 to succeed Mr. Hodell is announced by C. H. Matson, general superintendent. Both appointments are effective at once.

Mr. Staley graduated in 1929 from Sheffield Scientific School of Yale University as the first recipient of the Jack Merrillat Griffin Scholarship. Following graduation he joined the General Electric organization, being employed in the Motor-Generator Division in connection with the factory training course.

In 1931 he was transferred to Motor-Generator test in Bldg. 19-1 and continued in test work until 1935 when he was transferred to the Plant Engineering Department in Bldg. 20-2. He continued in this work up to the time of his present appointment.

Mr. Hodell joined the Fort Wayne Works organization in 1916 when he was employed as a meter in-

REMINDER

Employees eligible to subscribe for G-E Employees 4% Bonds are reminded that installment subscriptions (by payroll deductions) for the year 1941, will not be accepted after December 31, 1940.

Famous Band Gives Program At G-E Club

Freddie Fisher's World Famous Recording Group To Appear Here

Freddie Fisher's world famous "Schnicklefritz Band" will appear at the G-E Club, January 16, 17, and 18 putting on four shows and two dances, according to an announcement made by Paul Vogt, chairman of the entertainment committee.

The four shows will be free of charge to G-E Club members but only fifteen hundred tickets will be issued for each performance.

Tickets for the two dances will be put on sale to the general public at a price to be announced later and this supply will also be limited.

The Schnicklefritz Band, a six-piece group of personified fun and laughs has attracted huge crowds to engagements, which include cities in every point of the United States. Their Decca records are reported to run second in popularity to Bing Crosby's. They have also had motion picture experience, appearing with Rudy Vallee in "Golddiggers of Paris."

Freddie Fisher's crew not only puts on a great show but is also able to produce danceable music that rivals such big band names as Lombardo, Dorsey, Shaw, etc.

As the tickets for every performance are limited, it is urged that employees take advantage of the opportunity by acquiring their passes as early as possible.

The volume covers in detail the story of the Company's pioneer days, beginning with the parent companies and continuing down to the present day.

Plan Preview Of New G-E Appliances Here

Employees To Be Given Opportunity to See 1941 Lines Before General Distribution Is Made

An opportunity for Fort Wayne Works employees to inspect the new 1941 lines of General Electric appliances before general distribution to sales agencies is promised by joint action of the H. G. Bogart Company of Toledo, General Electric appliance and merchandise distributor and local dealers, it was learned this week. Although definite arrangements have not been completed it is planned to stage the "preview" in a suitable auditorium for a period of two days, and with hours so scheduled that employees of all shifts will be enabled to attend.

The undertaking will be the first of its kind ever staged here and will be unique in that employees will be enabled to see the practical application of many products, manufactured at the Fort Wayne Works, in the completed appliances.

The display will include the various models of General Electric washer, ironers, refrigerators, ranges, electric sinks, disposals and other appliances.

An active part in the preview is being planned by the Fort Wayne Works and will be announced as soon as arrangements have been completed.

Given Appointment

W. K. Williams

W. K. Williams, for the past six years supervisor of planning and wage rate in the Specialty Transformer Division, has been appointed assistant superintendent of that Division, it is announced by C. H. Matson, general superintendent. The appointment is effective immediately.

Mr. Williams enrolled in the Apprentice School in 1925, completing the machinist-toolmaker course in 1928. On completion of the course he was assigned to wage rate work and later was transferred to the

(Continued on Page 3)

Employees Store To Close For Inventory

The Employees Store will be closed on Monday, December 30 for inventory. Regular store hours of from 12:00 o'clock noon to 4:00 o'clock will be resumed on Tuesday, December 31. The store is open Monday through Friday.

Kindling Orders

Orders from employees for kindling will be taken for a period of one week, starting next Monday, it is announced by the Personnel Department. It is anticipated that the supply will be exhausted in that time. Remittance of $1.00 for a full load and 50 cents for a half load to cover carrying charges must be made with the order.

Atom Smashing Beam Will Melt Brick As Though It Were Butter

General Electric announces receipt of an order for the electric equipment to operate the University of California's new 100,000,000-volt cyclotron, which engineers say will be so powerful that its atom-smashing beam of electrons will melt an ordinary brick as quickly as a blow torch would melt a pound of butter.

Prof. E. O. Lawrence, Nobel prize winner and among the first to perfect an atom smasher, says this machine will be 16 times greater than his present outfit and will require about three years to build. It will be housed in a specially constructed building on the flats back of the university at Berkeley, California.

The electrical equipment, including transformers, capacitors, rectifiers and switchgear, will occupy the space of a two-story house. For lack of a better name it has been called the "finishing school" for 2,500,000 watts of electric energy, since its chief function is to make ordinary electric current capable

• With Pardonable Pride....

We call the attention of all employees to the following unsolicited editorial which appeared recently in leading newspapers all over the country:

When Defense Comes First

> **Among many, many offers to co-operate to the fullest extent in defense measures, that of General Electric Company in its October dividend report to stockholders stands out. GE says:**
>
> **"Certainly your company has no thoughts or intention of profiteering from the defense program. We believe that when risks are normal and of a nature which promise reasonable profit, the company should undertake these risks.**
>
> **"Where the risks are extraordinary, but the project is essential to national defense, General Electric is prepared to undertake the task on any basis that provides reasonable assurance that it shall not emerge with a net loss on the material produced or on the amount invested in special plants and equipment . . . "**
>
> **After all the talk of guaranteed profits, this attitude is like a clean sea breeze. It is the kind of an attitude which was not to be found in France in 1938-1939. It is the kind of an attitude which forestalls and makes unnecessary the centralized controls nobody wants.**

• "The New Year"

Another year has passed—to some it dragged an interminable length of days through seemingly endless months, to some it has been unbelievably brief. To all it represents another milestone in our lives, marked with events that will in some way influence us in the years to come.

The old year is dead. But there is a New Year before us and as we stand on its threshold it is fitting that we give some thought to the reasons for the success and failures of the past. By so doing we can draw immeasurable profit, for the failures of yesterday are not failures when they act as guides for tomorrow. They are guides, not failures.

The wise man will face the New Year with new hopes, and new ambitions. Aroused hopes and ambitions inspire courage and when combined with thinking, planning, vision, and work bring happy results.

The WORKS NEWS expresses the wish that these hopes and ambitions aroused by the dawn of a New Year will be realized in full for every one of its readers, and that 1941 will be richer in its bounties than any year in the past.

• Whom To Satisfy?

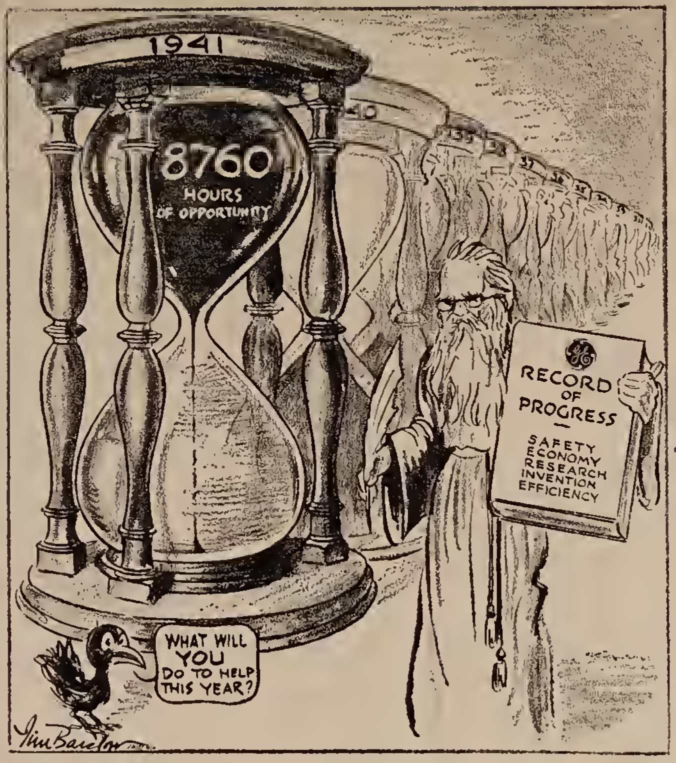
According to the employment specialists, there are two kinds of workers: those who aim to *get by*, and those who aim to *get ahead.*

The man who is concerned chiefly with "getting by" works just well enough to satisfy his foreman, but the person who is determined to "get ahead" works to satisfy himself. And what it takes to satisfy himself, if he has the right slant on his job, is always a great deal more than it takes to satisfy his foreman.

"Most people," say the employment specialists, "claim they want to get ahead, but they don't. They only think they do. They don't want to work hard enough. They simply won't put forth the effort that is necessary."

Isn't there a thought in this for everybody who is looking toward the future?

ANNUAL CHALLENGE



SCIENCE FORUM – by L. A. Hawkins

Q. How is it possible for a cat to see in almost complete darkness?

A. Simply because its eye is so constructed that it can gather light from a large area and focus it on the retina. The eye might be compared to a camera lens; like the camera lens, the eye gathers the light which falls on it, and focuses it into an image on a sensitive surface. Some camera lenses are "faster" than others. These faster lenses collect light over a larger area than the slower lenses. In the same sort of way, the cat's eye is a "wide-aperture" lens; and, like its camera counterpart, it can form a good image of sufficient intensity for seeing when there is relatively little light.

Q. Since the rays from radium are so penetrating, what kind of a container is used in keeping radium?

A. Radium is kept in thick lead tubes.

Q. If a radio receiver works better when the ground wire is disconnected, why does this happen; and is it harmful to operate the set without a ground connection?

A. Grounding a radio set does two things. It provides better personal protection against any high-voltage current which might accidentally become connected to the frame of the receiver. It also provides a direct path to the ground for the radio waves from the aerial. The effect that the inquirer has noticed usually results from using a poor ground connection. If a good ground is not available, it will not harm the set to operate without it, for the radio waves can pass to the ground through the set power supply.

Q. Could a short-wave set be used successfully in the city limits with the usual tangle of street and telephone wires?

A. Yes, under normal conditions short-wave sets can be operated in the midst of city wires. These answers may seem too simple, because there have been times when poor operation or even failure of short-wave sets have been observed under conditions like those mentioned in the question. A neighboring line may be connected to a machine which arcs badly or there is a nearby faulty ignition system. However, these illustrate cases which may be troublesome but which can be corrected.

Q. Should the water in a hot water or steam furnace be changed every year, or should it be changed every four or five years, or not at all?

A. The four or five year figure would be more nearly right in most cases. The only reason for changing the water at all would be that rust and sediment might collect in the bottom of the furnace, and it might need to be cleaned out once in a while. Run out some of the water from the bottom of the furnace; if it seems to be heavily loaded with rust and sediment, let it run until it clears up fairly well. But there is no point in changing water in a furnace simply because it looks rusty.

Q. Is there any other commercial use for carbon dioxide besides its use in carbonated soft drinks, soda fountains, etc.

A. Yes, there is. To give one example, the Solvay Process of making sodium carbonate and sodium bicarbonate requires more than 500,000 tons of carbon dioxide annually. Another big use of carbon dioxide is in the manufacture of carbon dioxide snow, or "dry ice." It is also used in fire extinguishers. Another widespread use of carbon dioxide, which we normally do not think of, is in the baking of bread. Carbon dioxide which is generated in the dough by the action of yeast is the chief leavening agent used by the baker.

Credit Union Facts

by T L. WALLACE

1. **Who Can Join:**
   Any employee of the Fort Wayne Works G-E Co., and members of their families.
2. **Purposes of Membership:**
   To promote thrift by systematic saving, to enable members to build up a cash reserve, and to provide a source of credit for members who may need it.
3. **How to Save:**
   Saving is accomplished by purchasing "Shares" in the Credit Union at $5.00 per share. Shares may be purchased outright for cash or on weekly payroll deductions of 25c or more. No share certificates are issued. The term is merely a unit designation, on which dividends are figured.
4. **How Much May Be Saved:**
   Any amount up to the maximum, $1,000.00, in multiples of 25c per week may be saved. The payroll deductions may be changed at the will of the member at any time.
5. **How to Join:**
   Fill out and sign application for membership card, and two payroll deduction cards showing how much per week, in 25c multiples you intend to save. Deliver these cards to the Credit Union Office, Bldg. 21. There is a 25c entrance fee which covers the cost of your pass book, opening ledger account, etc. No further charges for membership are made.
6. **Passbook:**
   When your application is accepted, a pass book is issued to you, similar to a bank pass book. It has separate sections for recording share, loan and interest payments. No entries are to be made except by officials of the Credit Union.
7. **Collection or Payments:**
   Can be made by payroll deductions or by cash at the Credit Union Office during the office hours: 7:30 to 8 a.m.; 12 noon to 1:15 p.m., and 3 to 4 p.m.

(To Be Continued)

$400,000 Expansion Of Plastics Department Manufacturing Facilities

Plans for the expenditure of approximately $400,000 for the expansion of the eastern facilities of the Plastics Department of the General Electric Company have been announced by G. H. Shill, manager of the department. The expansion will include new buildings and equipment in Pittsfield, Mass., and at Meriden, Conn., and additional equipment in the Lynn, Mass., plant.

At Meriden, a new building will permit the installation of more than 40 additional hot molding presses, giving the equivalent of a 25 per cent increase in industrial molded parts from that plant. The expansion also will include further modernization of the cold molding section of the factory and allow additional room for storage.

Completing the program will be the installation of a new press at Lynn which will substantially increase the output of laminated Textolite for industrial purposes, and help answer a heavy demand for this material.

General Electric is the only company in the country engaged in all phases of the plastics industry, with plants at Fort Wayne, Ind., as well as Lynn, Meriden and Pittsfield. Its molding operations are the largest in the country.

Start The New Year Right. Wear Your Badge

Low-Cost Searchlight For Protective Lights

A new low-cost 18-inch 1000/1500 watt incandescent searchlight, designated Type S-5, has been announced by the General Electric Company. It is particularly adapted for use in protective lighting systems now being installed by industrial concerns to prevent night sabotage. Some of its other lighting applications are railroad yards, construction projects, dams, locks, canals, and prisons.

The new searchlight is equipped for pilot-house or hand control, and comes with either a low or high pedestal. With the pilot-house control, the searchlight can be mounted atop a guard house or lookout tower and controlled from within the house with the aid of a hand lever connected by a steel rod to the light above.

A highly efficient silvered glass parabolic reflector provides accurate control of the light beam. A spherical auxiliary reflector in front of the lamp eliminates stray light and builds up beam intensity.

The searchlight casing is made of sheet aluminum, similar to that used in modern sports floodlights. This has enabled a substantial reduction in the cost of the unit. A door glass, clamped over the face of the searchlight, makes the unit weatherproof.

Given Appointment

(Continued from Page 1)

Specialty Transformer Division on work of this nature. In 1931 he was appointed supervisor of the wage rate section in the Specialty Transformer Division and he continued in this position until 1934 when he was named supervisor of planning and wage rate in the division. He continued in this work up to the time of his present appointment.

Mr. and Mrs. Williams reside at 4221 Buell Drive and have two children.

Decatur G-E Club Plans 1941 Program

Regular activities will be resumed by the Decatur G-E Club after the New Year's holiday.

This week brings to a close the schedule for the first half of the bowling season and schedules will be made immediately for the second half starting the first month of the New Year.

The regular monthly party which was to have been held December 20 but postponed due to Christmas programs will be held January 10.

Plans are already being made for a club banquet during the month of January to which all club members and their families are invited. Menu for the banquet will be announced later.

These plans along with the bowling tournament to be held in January and February promises a busy time for the club during the first weeks of 1941.

Club To Close

The G-E Club will close at 6 o'clock New Year's Eve and remain closed on New Year's Day. The regular schedule will be resumed on January 2.

It Must Have Been An Interesting Program

It is apparent from the rapt expression on the faces of some of the children pictured above that the G-E Club Christmas program last Saturday "hit the spot." Approximately seven thousand attended the programs.

Atom Smasher

(Continued from Page 1)

of operating the giant 184-inch atom smasher. It will take more than a year to build the equipment at the company's Pittsfield, Philadelphia and Schenectady factories.

Formal description of the electric machinery is "2,500 kva power rectifying equipment for oscillator of cyclotron." General Electric engineers explain that this equipment will take "2,500 kva supplied at 12,000 volts, 3-phase, 60-cycle, alternating current, at constant voltage and will rectify it to 25,000 volts, direct constant current, which will be fed into the oscillator of the cyclotron, operating at 10,000,000 cycles." But for the layman, "electrical finishing school" tells the story better.

The new giant cyclotron will be capable of producing 100,000,000 electron volts and will generate energies of atomic rays greater than any now in existence except in distant stars or somewhere in cosmic space.

Dr. Lawrence, who designed and developed the cyclotron, explained the new machine will weigh 4,900 tons and contain a magnet 56 feet long, 30 feet high, and 15 feet 4 inches wide. The working part is a circular chamber, into which atomic particles are fed. Here they receive successive "kicks" which cause them to whirl around the chamber in continually widening circles until finally they reach a window or port on the side of the chamber. Any element the scientists wish to bombard will be placed over this window where it will receive the full force of the atom-smashing beam of atomic particles.

Construction of the supercyclotron was made possible through a $1,150,000 grant by the Rockefeller Foundation, to be swelled by an additional $250,000 from other sources.

The Employees Store will be closed for inventory next Monday but regular hours from 12:00 noon until 4:00 p. m. will be resumed next Tuesday.

Superintendencies

(Continued from Page 1)

spector. He became chief inspector and in 1917 he was assigned to the work of formulating operation layouts for the Meter Division. The next year he was transferred to the Fractional Horsepower Motor Division where he continued this work. Following World War service Mr. Hodell was installed as a methods man and in 1920 was made supervisor of this work. He continued in work of this nature until 1937 when he was made assistant superintendent of that division. In July 1939 he was made superintendent in Bldg. 4-1 and a short time later was made superintendent of Bldg. 4-4.

A short time ago frequency modulation on a radio set was simply an idea—today it is a reality. If you enjoy music, or speech, without the annoyance of background static, ask for a demonstration of a General Electric frequency modulation radio.

G-E Oil Burner Gives You An Extra Half Hour's Sleep

Crawling out of bed to fix the furnace on cold winter mornings is an ordeal that automatic heat, as provided by the new General Electric Oil Burner, has relegated to the past.

The new G-E Oil Burner has many exclusive features. Its improved motor-compressor unit, smaller in size than last year's burner, contains an adjustable damper air regulator for fine adjustment of combustion air. Motor windings are insulated with Formex—a G-E development which is impervious to fuel oil and heat—assuring long life and dependable operation.

Practically any type of heating plant—steam, hot water or warm air—can be modernized by installation of a G-E Oil Burner. It can be purchased on easy, monthly payments. Ask at the Employees' Store

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

As we come to the end of another year it is interesting to look back over what has gone by. There are many things we would do differently if we had the opportunity to do it over again. One of these things could be the asking of a male to write a Feminine Viewpoint—but wanting to finish the old year with a clear conscience—we may as well print what the opposite sex thinks should be in this column. We really do thank you for your contribution, Joe.

"Now I have always prided myself on my record for keeping promises. In fact I have some old promises around the house I have kept for years without ever doing anything further about them. It seems that some months ago while under the influence of Coca Cola, seven ounce bottle five cents at the candy stand in 12-B (Adv.) I absent-mindedly promised half of the Feminine Viewpoint Department of this publication that I would some day do a guest column and although neither of us guest at that time, if you can stomach the pun, that I would and this is it.

"If there is any one thing that all women share in common it is the feeling that they would like a home of their own in which to play house for keeps so they would no doubt be interested in a few housekeeping hints which I have picked up in my six years of domestic servitude and I hereby offer them to you ladies gratis as follows:

"If you live in an old house without a clothes chute to the basement the bathroom furnace pipe can be used as a substitute. Your kitchen can opener can be used to cut a hole in the furnace jacket on Monday morning to get the clothes out. Of course the furnace can not be used as a heating plant under this plan, but the great advantages to be secured from a clothes chute more than offset the slight inconvenience of no fire in the furnace.

"G. E. Disposal Units are mighty handy gadgets to have in the kitchen but if you cannot get one right at this time a good substitute is an ordinary food grinder.

"Old paper towels rolled in cracker crumbs and fried in deep brown fat are considered exceptionally good in some parts of the country—for starting fires.

"Ordinary glass tumblers are considered quite useful for drinking water out of.

"The life of silk stockings can be greatly prolonged by not wearing them.

"Since I am not getting paid for this, in fact I will lay you two to one I am not even thanked for it, I will keep any further suggestion to myself."

By Joe Doakes.

And that girls is his idea of a column. We want to wish you a very happy and prosperous New Year—and we will do our best to make it just a little more cheerful for you.

Correction: In last week's column we credited "The Christmas Bells" to Holmes instead of Longfellow. We're sorry.

Christmas Parties

A group from the white armature department enjoyed a Christmas party at Miller's Tea Room. Following dinner a gift exchange was made. Alma landed two dried herring while Edna got the car she had asked Santa for. Those present were Clara Krudop, Hilda Seiler, Marjorie Quackenbush, Alma Lexrman, Geneva Worden, Margaret Wittmer, Ruth Reed, Margaret Hilgeman, Pauline Klopfenstein, Frances Smith, Edna Rohrbach and Anna Ruth Clemmens.

Employees of the fan motor line held their Christmas party on December 20 at the Turners. Highlights were the good time enjoyed by Irmagard Gehle and Susie Wagner; Esther Pape losing her hat and V. Donahue her purse—or rather her sister's; Betty Minard's brother Jim; Fred Castor's big peppermint cane and the dance music program by Ruby Stoops. Everybody had a good time helping the others enjoy themselves.

Employees of F. Castor's department enjoyed a pot luck dinner and gift exchange on Monday. Music was furnished by Edgar Eylenberg, Naoma Melcher and Howard Such while the rest of the gang sang. Art Weisengrueter received his annual Christmas present of shirts and ties and also wool lined gloves. He seems to be set for the cold weather. Harry Bennett received a novelty ash tray and T. Court an atomizer. Other gifts are too numerous to mention but we must not omit M. Miller's bottle of Evening in Paris. A Happy, Happy New Year to all from the Works News reporters of Bldg. 19-4.

Several weeks ago this reporter entered an item which stated in effect that "Art Nord, Bldg. 26-5, could put a motor together with a 5-pound sledge hammer and not damage the sledge much." It is with genuine delight that we repeat the rumor that Mr. Nord has been awarded a navy contract. His mission is a carefully guarded secret, but he has intimated to close friends that he has been chosen as chief riveter on a new battleship. A delicate mission entrusted to the right man, say we.

Schnicklefritz Band Appears Here

Engagement of Freddie Fisher's famous Schnicklefritz Band at the G-E Club has been announced. The band will give programs for club members and their families and will play at two dances.

19-4 Spot Jottings

Louie Steup was so imbued with the Christmas spirit that he broke forth with the following: 'Twas the Friday before Christmas, and all through the shop, The P & J's were spinning, just like a top—and then it happened. One of those lovely P & J's broke down right under his very nose.

We have heard much of hobbies, but we think Adele Wheatfeld has the most unique, that of saving the wish-bones of all the various fowls she has had the pleasure of eating. We hear she has a really fine collection.

The Inspection and Test Department held their annual Christmas party Thursday night at the Indiana Hotel. Twenty-five enjoyed the dinner and an evening packed with entertainment. Walter Fagg still can't understand how he got his Stetson back as good as new after seeing the magician pour milk and flour right into it.

The Assembly Department held their party Friday night at Turners Hall and from all reports it was a first class party.

Ike Earnst has a tender gleam in his eyes at this holiday season. What or who is it?

Anyone having any odd packages that they are not quite able to account for should contact Ed Joseph of Bldg. 6-1 as he wound up his Christmas shopping this week with a parcel that he is not quite able to account for.

As far as Art Walda of Bldg. 6-3 is concerned Canada could lose the war and he'd never cry a bit. All these Canadian shipments caused by the war boom are driving him crazy.

Wm. Irwin, Bldg. 4-3, our enthusiastic through-the-ice fisherman, can hardly wait until the ice gets thick enough on the lakes to go fishing. If this does not happen soon, he is going to get himself a gigantic piece of dry ice, bore a hole in it, launch it on one of our lakes, and proceed to enjoy this most fascinating of winter sports.

Here's a Christmas party with a new turn. Loretta Loring, Lillian Winkler, Virginia Ayres, Lillian Hegerfeld, Maxine Druhot, Sadie Francis, Virginia Miller, Amanda Wiegman and Dorena Roe had it at the Berghoff, and Tom Brown, the Hollywood guy, had a cocktail with them. What's he got that we haven't got.

SANDY SAYS

Hoot Mon', now with the holiday season in full swing, and the Elex girls establishing residences under the mistletoe, it's almost time for us to start getting ready to write some New Year's resolutions.

I'll bet I can guess what you're saying to that. "Sandy," you are saying, "why bring that up?"

Well, I'm answering, don't read this now, just stop here and detour to where the little fellows have their say, like "Bright Sayings of the Children" or "In the Rough."

Then next Wednesday afternoon, when you have slept off the headache, and can pry your eyes open, just get out this list of mine, and see if any of it can be worked into yours.

List No. 1, Series 1941.

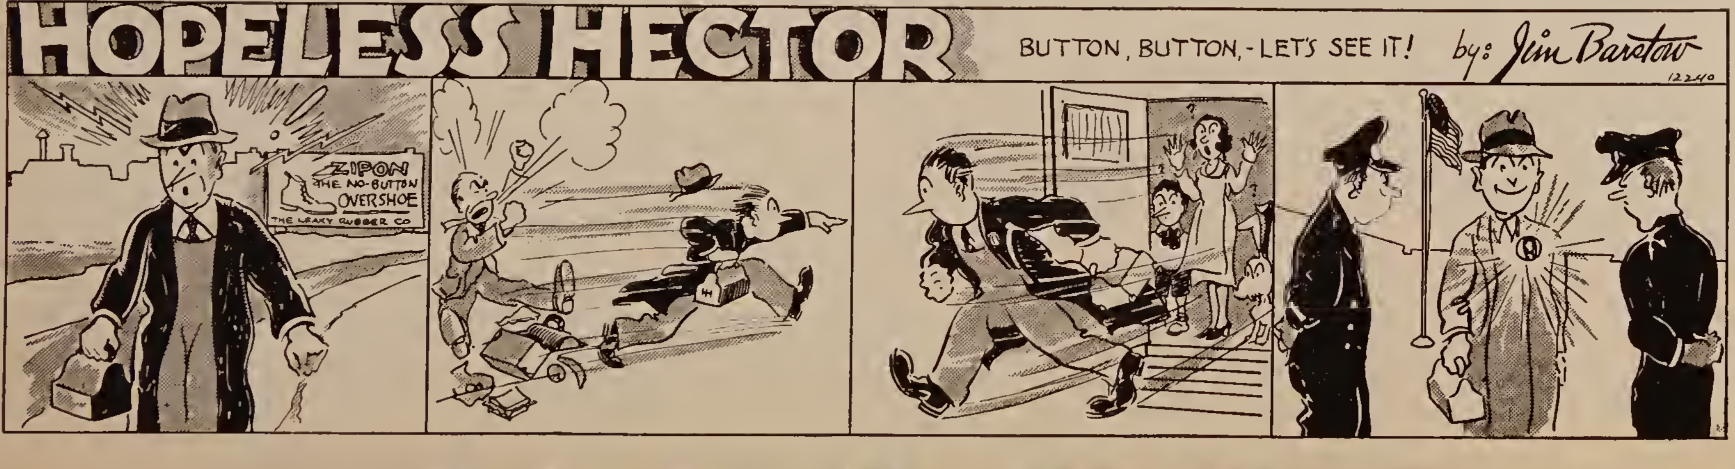
Subject To Revision Without Notice. Not Responsible for Breakage.

I hereby solemnly resolve:

1. "To limit myself to one quart of Duggins Dew of Klintilloch next New Year's Eve.
2. "To settle down to business on January 2 and keep that way through 1941.
3. "To help prices from skyrocketing by (a) living sanely, without blowing my money for many foolish things. (b) Reducing spoilage, and (c) constantly looking for ways of making our products cheaper and better, thereby helping General Electric to keep prices down.
4. "To keep an eye on newcomers near me to see that they don't increase spoilage, and that they DO learn to look for ways of making better products at less cost.
5. "To get two piano stools for Cousin Colin and myself for next New Year's Eve, so we can whirl around and get into the proper mood in typical Scotsman fashion by whirling around until dizzy.
6. "To carry a pair of scissors with me, and then mooch only king size cigarettes so I can get two good smokes out of each one of them."

Thank You

C. F. Hambrock wishes to take this means of extending his sincere thanks and appreciation to his many friends throughout the plant, and especially to those in Motor-Generator Department, for the flowers and the many acts of kindness extended to him and his family during his recent illness.



Start The New Year Right. Wear Your Badge

NEWS THROUGH THE PLANTS

Borings From 4-4 Office

'Tis Elmer, the field mouse, bringing you once again, the Rat of Bldg. 4-4. 'Tis nigh on to Christmas and all are very elated as to their presents. Jean Bugert especially. She is now flashing a diamond and it is the real McCoy with Dick Johnson. Nice going Jean. Plenty of luck to you both, and I suppose Evelyn Meyers will soon be paying off a bet. Gosh, I suppose so, then I'll have something else to put in the WORKS NEWS. . . . Bob Reardon, Jr., or Cassinova to you all, sent our little Esmardelia Heinie a beautiful Christmas card (well that isn't all) so she wishes to express her appreciation to Bob and wants to wish him the same. He used to be a messenger boy on our floor. Ah, he's some boy. Bldg. 4-4 is now housing a new superintendent, Thomas Staley. He took over the job of Lisle Hodell, who now is in charge of Bldgs. 17-2-3. We all miss Mr. Hodell a lot and wish he was back again to our great big happy family, but he has a bigger and better job than before in Bldg. 17, and so now we have Mr. Staley. We wish you good luck and plenty of happiness in your new job, Mr. Staley, and we all promise we will start with our right foot forward and cooperate in every way possible in order to make Bldg. 4-4 one of the best in the G-E. And also good luck, Lisle Hodell. . . . Do you all remember last week I said a certain girl was going steady, but she was free on Friday and Saturday nights. Well she just jumped at conclusions and I had to run and hide in my little hole. Well to tell the truth, I thought it was some one else and here this other person jumped all over me. I didn't know, well, only what Vern Daseler told me. . . . Ardeth Hemp had company Friday night and her company went to bed, and she had an awful time trying to get her up. Now Marge, how many times have we told you to get your sleep at home. I suppose that is what a college education does for one. Gee, I almost told who it was, didn't I? . . . Ewald Stinsmuehlen has been sick in bed with a terrible awful cold. I'll tell you all how it happened. Our office had its Christmas party and all the windows were open while he was dancing and then he would sit a few dances out, and he got in a draft. Gee, now Ewald, that's too bad. . . . 'Tis plenty for now, almost everyone has been on his good behavior, 'cause they think Santa will remember them just a little better or a little more. When they break down after the holidays, I'll have plenty of news then. Perhaps I'll soon get something about Betty (Isa) Mougin and LaVon Price. But right now all is well and I got everything I wanted for Christmas, so why shouldn't I be happy. I remain, sincerely as ever,

Elmer, the Field Mouse,
The Rat to You.

The Bldg. 26-2, lead department Christmas party proved a big success. Harry Gargett had a good time with his toy cat; Charley Penn evidently could not get off his chair while Velma Meads went to town with a special elevated seat. Those there included Margaret Andrews, Loretta Holt, Golda Mentzer, Helen Arner, Stephany Hilker, Mary Leslie, Charley Penn, Louie Sordelet, Elmer Berger Ruth Lahman, Betty Griffith, Jim Voirol, Betty Hawk, Fred Banks, Rollie Wickliffe, Herbert Driftmeyer and Mr. Gargett.

Sergeant Frank Martin certainly looked like Santa Claus last Saturday. All he needed was a reindeer or two in front of his car.

Shorts From 6-B

The boys from Bldgs. 4 and 6-B have finally reached the conclusion that "Leo the Lion" Heersche must have belonged to the Rainbow Division in the late war, as he is almost constantly wearing its insignia—of course, he is a little original and wears it usually over his right eye instead of his coat sleeve.

"Scotty," from the Bldg. 4-B spray room, inadvertently furnished the background for a new version of "An Apple for the Teacher." While reaching for his "45" he laid an apple from his 8:00 o'clock snack on Bill Walt's desk and "Walrus" William innocently picked it up and threw his upper lip over about two-thirds of it. A chorus of Bronx cheers greeted this procedure and the embarrassed "Scotty" hied himself to the seclusion of his paint parlor.

Anybody who thinks that Clarence Roth is not an acrobat should **have seen him** write his initials in the air with his feet a week or so ago before a fair-sized audience at the Fairfield Avenue gate.

The scenario for a first class Christmas skit was presented in Bldg. 6-B last Tuesday.

Place—Bldg. 6-B packing room.

Time—Tuesday afternoon.

Players—"Red" Rensbarger and any number of girls. The room was profusely decorated with Christmas bells and green and red streamers with a twig of mistletoe hung appropriately right at the edge of a large gondola.

It is rumored that there is a movement on foot to promote a race between Fred Senz, Perry Shober and George Coplen walking backwards. The idea is not bad and should draw a fair-sized gate. The boys have plenty of practice passing the gang at the clock at ringing in and out time.

Dorothy—Say, Dallas, does three eights and a pair of five's beat four nines?

Dallas—Certainly not.

Dorothy—Well, I'm not in the pool anyway and I declared myself last week, so remember I won't pay.

Dallas—That's all I wanted to know. Of course three eights and a pair of five's beat four nines.

Dorothy—Gee! Can't you take a joke?

Art Brandenburger, Bldg. 4-3, made a trip to the country last week-end. While there three white turkeys proceeded to roost upon Art's car. He had extreme difficulty in dislodging them and also was unsuccessful in capturing one for his Christmas dinner.

"Is this the hosiery department?" said the voice over the phone.

"Yes," replied the weary saleslady.

"Have you any flesh-colored hose in stock?"

"Yes," replied the weary saleslady. "Whadda ya want—pink, yellow or black?"

Frank Phillips, Bldg. 4-3, our rising politician, is desirous of becoming a member of the U. S. Senate, and is planning to run for Senator, or in case he should fail to gain a seat in the upper house. He said, "Well there is always the Senate on Broadway."

19-5 Drafting System?

Stapleton: "Have you got my green pencil, Reitz?"

Reitz: "What color is it?"

A Headliner At The Club Party

Of course the children of G-E employees enjoyed the program at the Club Christmas party, but as usual Santa stole the show. The youngster is one of the hundreds who took the opportunity of telling Old Santa what was expected of him on Christmas.

Thisa And Thata 19-5

Well, Christmas is here and gone, and last week was just filled with parties, and more parties. * * * We hear that the party at Flo Gilmore's home was a swell one. * * * Edna was certainly surprised, for after giving all her old jewelry away she received a gift of junk. No one present seemed to know anything about it and Edna later discovered she had brought it herself from home by mistake. * * * Esther Ehle received a tarnished brass wedding ring and a third Liberty Loan button. * * * Frieda got a pair of worn-out fishing gloves. * * * Ruth Reed likes jewelry, too—any kind, old or new. * * * Lewis Clark was so intent on getting the peanut brittle delivered that he forgot his lunch. * * * I know you had a Merry Christmas and here's a Happy New Year for you.

Mike Schmidt's time is divided between showing his balancing machine and hunting lost prints.

Ozzie Nahrwold, the hurricane bowler of Bldg. 26-5, is richer by $5.00 because someone thought he couldn't bowl a 200-point game.

Grace Biedrzycki, Bldg. 26-3, is starting a new fad. She came to work with one patent leather shoe and one suede one. Poor Grace was so put out that she wouldn't go out to lunch.

Those Polar Bears who jump into the icy waters of the St. Joe on New Year's Day have nothing on Walter Starke, Bldg. 6-B. Walter nearly froze his hand retrieving a billfold with $70.00 which disappeared into the briny deep.

Everything But Bones

Mel Bucher, Bldg. 27, brings home the bacon when he goes hunting—in this case a deer. Mel rented a hall at Zulu and invited all the fellows and their wives to help finish the deer. Following a dance the deer arrived steaming and in a short time Mel had nothing but the bones left. A feature of the evening was the presentation of the deer's tail (with a pretty red ribbon) to Oscar Beatty, who swore he would never believe Mel shot a deer unless he saw the tail. A hundred and fifty guests were present and the committee helping to make the affair a big success included Pat Christle, Sam Henline, Chris Theele and Oscar Beatty.

It Could Only Happen Here

Jack Cochrane, Bldg. 4-6, phoning to Wilbur Boltz, Bldg. 19-5:

"Just a minute, Wilbur, there's a train going by, I can't hear a word you say."

Boltz: "OK, I'll wait a minute . . . Hey, wait a minute yourself, the darn train is over here now. . . . OK, go ahead, it's gone now."

Horseman Archie Boren, Bldg. 4-3, tells us that he made a trip to Kentucky last week-end in the interest of his horses. He plans on putting his plugs on pasture in the Blue Grass State this winter so as to have them sleek and fat for next year's horse shows.

Art Blume and Lester Myers really put in the work so that they wouldn't get behind Christmas.

Wear Your Identification Badge

Slips And Chips

By Sir Vis, 4-4

Here I am with very little to write. It seems that everyone is trying to be at his best because Santa Claus is coming to town. The dog houses are all open for dogs, yet, of course. I don't know how long this spell of good behavior will last. . . . Walter Hazelet is a perfect bowler when Anga is watching him. The reasons for this spurt of strikes differ. Some say he wants to make an impression, while others believe it is due to his shyness. . . . According to a recent report, Forest Gee is trying to track down that person who tells me of those slips he makes. Good Luck, Gee. . . . Don (Dagwood) Thomas is just about ready to compete with anyone in dressing. He arose from bed, dressed (or should I say partly dressed) and was in the car ready to go to work in three minutes. Ed Martin knows just when Don (Daggy) is about to emerge by the formation of Don and Mrs. Thomas. One on each side of the door . . . "swish' . . . Hot Zoup! That's just what they wanted and quick, too. So Don and Gee decided to heat it up quick by using the cutting torch. Now they are in a quandary whether aluminum will melt before soup boils. In this case the aluminum melted. . . . This is all for this time, but I will be back next week. So until then I wish you a Happy New Year.

In Hibernation

No, Charles Weber was not hibernating for the winter in the ante-room of the heat treat department. It is to be admitted he was angry as a hibernating bear but that was because he accidentally locked himself in. He would probably be there yet if Barney Weber had not rescued him.

Reverberations from the Wire and Insulation Girls' Christmas party. Walgreen's management was preparing to post a standing room only sign on the door when the last straggler showed up and the girls moved on to the Berghoff and the evening's festivities. Marj. Degitz reported the dance floor to be in excellent condition. Irene Perry was particularly thrilled with her loot in the gift exchange. She said that she'd always wanted a rubber doll. Alice Friedman just couldn't resist trying her luck with having her future told. We hope the lady's prediction comes true, Alice, but was it our imagination or did you have a little difficulty in making up your mind which heart interest to concentrate on?

It's the old, old story—we're regretfully bound to report it again. Bill Glenn, Bldg. 12-B, accompanied by his regular ride home, were discovered searching diligently over the parking lot for the Chevvy that wasn't there. The foolish look on Bill's face when he suddenly remembered leaving it at the garage for servicing would have been a catch for a candid camera fiend.

"Son, why don't you play circus? It's great fun. First you make a sawdust ring."

"But where would I get the sawdust dad?"

"Here's the saw. Just cut some of the firewood into fireplace lengths. And you can have all the sawdust you make."

The dreadful golfer made a fierce swipe and cut up a divot.

"Never mind," said he, putting it in his pocket, "I'll send that to Joe—he was asking what the course was like."

Exciting Game Marks Battle For Basketball Lead

Main Office And Apprentice Fight It Out In 43 to 40 Encounter

Main Office and Apprentice, battling for the lead in the G-E Inter-department Basketball League, displayed a brand of ball last Thursday at the Club, before only a handful of spectators, that would have been a credit to professional teams.

Jumping into an early lead Main Office maintained a very slight advantage throughout the entire contest and consequently emerged victorious 43 to 40.

Both clubs employed different types of attacks as Main Office utilized a fast break plus some accurate long shooting on the part of Scherer, Immel and O'Brien. The Apprentice were content with bringing the ball down slow and then shaking Reynolds loose for his favorite left handed tries or a short shot by Louden although Weigand, Apprentice center, garnered a couple of important buckets on fast solo dashes. As has been stated the outcome of this important game was continually in doubt until with only twenty seconds to go Kent, Main Office forward, coolly stepped to the foul line and made a free throw that gave his club a three point lead and cinched the final verdict.

With Offerle, five foot, seven inch forward, supplying practically two-thirds of his teams points West Side, by trouncing Small Motor 28 to 21 dropped the Factory out of a tie for the circuit leadership. As Motter and Horstmeyer, tall Western players controlled both backboards Small Motor had to be content with only short possession of the ball while West Side players were able to garner three or four shots at a time. As has been mentioned Offerle supplies his teams scoring punch raking up five one-handed field goals and seven free throws for seventeen points while Clawson and Voirol with six points apiece paced the Factory attack.

In the other game on last week's card the Apprentice B and Squares tangled in a close guarding low scoring duel with the Apprentice coming out on top 18 to 15. This was another contest in which the lead kept changing hands but the youthful Apprentice finally managed to run down their older opponents to gain the decision. Langenberg led the Squares in scoring with seven points while Apprentice talleys were split up seven ways.

There is no charge to witness these thrilling games and it is not even necessary to be a G-E Club member to gain admittance.

League Standings

	Won	Lost
Main Office	2	0
West Side	1	1
Apprentice	1	1
Small Motor Factory	1	1
Apprentice B	1	1
Squares	0	2

A man in Chicago was grumbling about the heat. Said another, who had just returned from a trip through the South:

"Hot! Boy, you don't know what hot is. One day this week in Alabama I saw a dog chasing a cat and they were both walking."

Automatic Gate Part Of Plant Protection System

Of considerable interest to car drivers entering the yards by way of Lindley Avenue is the new automatic gate recently installed as part of our plant protection system. The gate, motor drive, opens, closes and stops at the touch of a button. One set of the buttons is installed in the gatehouse and the other on the outside. The buttons, being operated by a patrolman, are shown at the right.

ON - - the Alleys

Decatur Bowling

The final standings for the first half of the Decatur General Electric Club league is as follows:

Team	*Won*	*Lost*
*Office	23	13
*Tool Room	22	14
Bearings	22	17
Rotors	21	18
Packers	20	19
*Maintenance	20	16
Shafts	20	19
Flanges	20	19
Production	18	21
*Testers	15	21
Stators	15	24
Shells	14	19

*These teams have postponed games to roll.

The second half of the current schedule will be posted shortly after the first of the year. League games will start the second or third week of January for the second half.

No "Blackouts" Necessary

You won't have to pull down the shades or turn out the lights if the blackout of war ever comes to America.

For General Electric scientists, concentrating on United States defense problems, are working on a combination of light and glass which will allow daylight in through your windows during the day but keep light from shining out

By pitting one color against another, the G-E lighting experts are working on the problem confronted by war-torn Europe: the danger of lighted windows guiding enemy planes.

H. A. Breeding, physicist at the Schenectady lighting laboratory, disclosed today that a combination of blue-painted windows and sodium lighting in homes and factories is one answer to this particular defense problem.

The paint to be used, Breeding said, is ordinary paint treated with a special blue dye, experiments on which are still proceeding. Windows treated with this special blue paint will admit daylight. But, more important in war time, homes and factories can be lighted inside with sodium lights, not one flash of which will escape through the blue windows.

Of course, people might not like the yellow of sodium lights in their homes and factories as well as incandescent or fluorescent lighting; but, Breeding points out, this would be a minor inconvenience in war

Do You Know

That you should stay away from all wires, bare or insulated, connected to sources of power in the shop and in testing sections? Bare wires and conductors are easily seen to have dangerous possibilities, but insulated conductors may be misleading. Insulation may become damaged and present a hazard even though it looks dependable, hence the importance of keeping at a safe distance. Unless an insulated conductor is run in lead or other metal covering or—as in the case of welding cables—in a tough resistant casing, the safe way is td keep clear of it. You'll be protecting yourself that way.

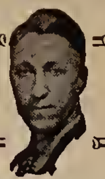
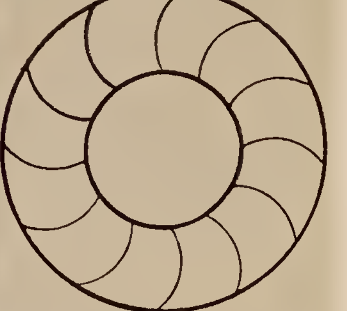
IN THE ROUGH



By WALTER SUNIER

We are sure you noticed the little surprise that we arranged for you about the Christmas greeting. We knew that President Charles E. Wilson could write a better Christmas greeting than we could, and that it would mean more to you than one coming from us. Then too we figured that a greeting on the front page would detract from anything we could pen for position on the last page. No hard feelings you understand—just a matter of saving ourselves useless effort.



However, we have not entirely forsaken our public for we have arranged a nice New Year's greeting. The picture shown above may look like nothing more than a whirligig to you, but it is more than that. In fact it is a doughnut—not truly a doughnut, but a symbolical doughnut—symbolical of a hole-in-one.

Therein lies our wish for you for a snappy New Year—the wish that you get a hole-in-one. Going back to the doughnut, we could add that we hope you get the dough in 1941 and that we stay nuts.

G. E. Now Offers Portable Factory-Built Substation

A line of factory-built, trailer-mounted, portable substations, complete with protective and switching equipment, has been announced by the General Electric Company. The new line is expected to provide power companies with a convenient means of supplying service quickly at any point on their distribution circuits where emergency service is required or where temporary loads demand increased capacity.

To give the desired balance between size, weight and output, two are provided—one using a self-cooled transformer and the other a forced-cooled transformer. The self-cooled type is especially suited for the smaller sizes and, as it requires no attention, is ideal for duty that may include extended periods of continuous service. The forced-cooled type is an extremely compact, high-capacity unit which provides minimum weight and size for a given rating, and thus is well suited for rapid emergency service.

Installation of the new unit is merely a matter of parking and grounding the unit in a convenient location, elevating the retractable high-voltage disconnecting-switch structure, and running conductors to the high-voltage and low-voltage lines.

Dates Are Set For G-E Appliance Show

Employees Invited To Special Preview At Shrine Club House On January 15 and 16

Wednesday, January 15 and Thursday, January 16, have been set as the time when Fort Wayne Works employees may inspect the new 1941 lines of General Electric appliances before general distribution is made to sales agencies. Headquarters for the appliance "fashion show" will be the Shrine Club House.

Interesting attractions are being planned in connection with the preview, including presentation of a "House of Magic" program by Howard Miller of the Fort Wayne Works Laboratory assisted by Claude Summers and E. G. Downie.

(Continued on Page 2)

Outlook For 1941

By Charles E. Wilson, President, General Electric Company

The year 1941 will be one of the most crucial in world history. In this critical period, as in 1940, the chief concern of the General Electric Company will be to serve our country well. To this end, we will make every effort to meet every demand placed upon us for men, materials, and facilities needed for national defense. This we shall do with a clear comprehension of the urgency of these needs and of the grave responsibility which rests upon us to fill our full share of them with all possible speed.

To the extent that it is entirely consistent with the full performance of this first duty, we shall also endeavor to do our share toward maintaining the supply of goods which meet the normal needs of our nation. In this manner, also, our aim will be to serve our country by adding to its wealth and well-being. These aims we confidently expect to attain.

It is my belief that these are the 1941 objectives of American business generally, and I am also confident that, by the exercise of all of its experience, energy, and resourcefulness, American business will wholeheartedly contribute its full share to the preservation and maintenance of our American way of life.

For these reasons, it seems certain that most industrial operations during 1941 will be maintained at full present and planned capacity, and that general business activity will surpass, by a substantial margin, that recorded for any previous year in the history of our country.

• The Times

What we see today is not History, but the interruption of History. A bull in a china shop is a very distracting and stubborn fact, but he is not History. He is not symbolic of a time when bulls shall be general managers of china shops. Nor is this war prophetic of a militarized future when family firesides will be bomb-proof holes in the ground. Its meaning is that evils we have let to live and grow by common consent, or at least without effective common protest, have simply given effect to the law by which one evil breeds another evil to be its nemesis. That is not History, it is "time out" from History to pay the penalty of our fault. The fire now burning, and that on which it feeds, shall both sink in ashes. But that is not progress. There was a point where we stopped making History and began to make disorder. No country is an exception to this. We had neither the courage nor the decency to put away by civilized means the disorder that accumulated—hence the present conflagration. We now approach the point—more rapidly than we think—where that disorder shall have consumed itself. And then we shall resume, if we are wise, the making of proper History, which is the record of human advance toward that morality whereon is built the Just and Good Society. Among the free peoples this is the view that gains ascendancy; this is their firmly announced intention for the immediate future.—From a talk by W. J. Cameron, Ford Motor Company.

"How is character obtained? Character is developed by the responsible use of freedom, and our blessed country, above all countries, is today giving the opportunity of freedom to you and to me and to all citizens."—Aurelia Henry Reinhardt, educator.

• Near-Accidents--Warnings

By "near-accidents" we mean accidents that just missed resulting in personal injuries.

"A miss is as good as a mile," it is said, and from one standpoint this may be right. But we should not dismiss a near-accident from our minds by thinking simply of the fact that it was lucky no one was hurt.

What we should do, of course, is to find out what caused that near-accident, because next time the same thing happens it may be not a near-accident but an accident in which somebody does get hurt.

• Happy Landings

Guesswork has no place in commercial and military flying today. Before a pilot takes off he carefully plans his flight to make sure he will arrive at his destination on schedule.

For the ambitious person careful planning is just as necessary for success as any plane flight. "To go places" in a company a person should study the job ahead and plan to secure the *training* to fit himself for that job. Then when a vacancy occurs, it's "happy landings!"

The following quotation was found among some old papers belonging to Dr. Steinmetz:

"The man who is hard to satisfy moves forward. The man who sits back comfortably and is contented with what he has accomplished moves backward. If I were able to bequeath to every young man one virtue, I would give him the spirit of divine discontent, for without it the world would stand still."

Lichtenstinger Leads Suggestors During 1940

Left to right—Russel Owen, section foreman; Elias M. Lichtenstinger, and E. W. Lankenau, Decatur Works superintendent.

When Elias M. Lichtenstinger, Decatur Works, conceived an idea to conserve the life of tools used in his work, he not only made a worth while contribution to a lower cost product but placed himself as leader of suggestors during 1940 for his idea netted him $225, the largest award paid during the year. Mr. Lichtenstinger suggested to change our die grinding practice, enabling the life of the die to be doubled by a single replacement of the punch.

J. J. Kline Retires

(Continued from Page 1)

sity of California in 1900 with the degree of B.S. in electrical engineering. He followed his profession for an interval in California and in October, 1901, went to Pittsfield, Mass., to spend about a year in the shops of the Stanley Electric Manufacturing Company. In 1902 he accepted a position in the New York office of the Stanley Company, and became engineer of that office just prior to the purchase of the Stanley Company by General Electric. He was then transferred to the Stanley Company general sales department as assistant to the Vice-president in charge of sales.

The general sales office was later moved to the factory at Pittsfield and combined with the G. I. Arc Lamp Company to form the Stanley G. I. Electric Manufacturing Company, and Mr. Kline, shortly thereafter, was stationed at the company's Chicago offices as engineer.

The Stanley G. I. Company was consolidated with the General Electric Company in the latter part of 1905 and following service at Pittsfield and New York Mr. Kline was assigned to Fort Wayne to help the Fort Wayne Electric Works to develop the sale of multiphase apparatus. He reported in Fort Wayne in 1907 as assistant to General Manager F. S. Hunting. In recent years Mr. Kline has been engaged in following engineering activities, Underwriters' Laboratories contacts, etc.

Mr. Kline has been active in many Works projects and helped organize the suggestion system. He remained a member of the central suggestion committee up to the time of his retirement. He was also active in the sale of G-E bonds to employees, the sale of Liberty Bonds and similar projects.

Mr. Kline is a member of the American Association for the Advancement of Science and is a past chairman of the Fort Wayne Section of the American Institute of Electrical Engineers. Mr. and Mrs. Kline reside at 521 West Wayne Street.

Re-elected Head Of Quarter Century

E. L. Simpson

E. L. "Jerry" Simpson, Bldg. 18-1, was elected president of the Fort Wayne Works chapter of the General Electric Quarter Century Club this week, for the eleventh consecutive term. J. W. Crise, Bldg. 18-3, was also elected as treasurer for the eleventh consecutive term.

Other officers elected were Charles L. Johnson, Bldg. 19-1, vice-president; George H. Waldschmidt, Bldg. 18-2, secretary and R. H. Chadwick, Bldg. 26-2, trustee. L. P. Persing, Bldg. 18-1, served as chairman of the nominating and election committee.

Band Program

(Continued from Page 1)

The band, under the direction of Perry Shober, will play the following selections:

Theme Song	P. A. Shober
Dunbar	J. L. Verweire
Trooping Days	K. L. King
Our Joe	F. A. Panella
News Sentinel	J. L. Verweire
University of Idaho	K. L. King

Total Claims On Insurance Over $18,000,000 Mark

During the month of November $51,250 was paid to beneficiaries of 19 employees in six works under terms of the Group Life Insurance plans of the Company.

Schenectady Works had seven claims for a total of $20,800. There were four claims in Lynn River Works for a total of $10,650; three in Fort Wayne for $7,650; two in Pittsfield for $5,650; two in Erie for $5,500 and one in Bloomfield for $1,000.

Throughout the Company claims paid during November totaled $88,174. Since January, 1920, when the plans were started, $18,069,425 has been paid out in death and disability claims.

Erlicher Named Vice-President

Harry L. Erlicher, purchasing agent of General Electric since 1931 and an employee of the company 40 years, has been elected a vice president at a meeting of the board of directors in New York. He will continue to be in charge of the company's purchasing activities.

Mr. Erlicher's first job with General Electric was as a messenger boy. He was 14 years of age at that time. Purchasing interested him and when he was advanced to office boy he asked if he might be assigned to the purchasing department. He did not remain long as office boy and soon was given a clerical position. In 1910 he was named a buyer, in 1923 was promoted to assistant purchasing agent and in 1931 was named general purchasing agent, when L. G. Banker retired.

It has often been said that Mr. Erlicher, or Harry as he is best known by his wide host of friends, can call more people by their first name than anybody else in the company. He is a native of Schenectady.

Appliance Show

(Continued from Page 1)

This program, patterned after the one presented at the New York World's Fair has been shown before numerous organizations during the past year and has proven exceedingly popular.

The preview will open at 12:00 noon on January 15 and continue throughout the evening, and will be resumed the next day at 10:00 a.m. The "House of Magic" program will be presented twice on each day, starting at 1:00 p.m. and at 7:30 p.m.

Tickets will be made available for employees and their families within the next few days.

The attraction is made possible through the cooperation of local General Electric appliance dealers in conjunction with the Fort Wayne Works.

G-E Club Dance

G-E Club dance as usual Saturday night with Pete Dannecker and his boys again providing the music. Prices remain at 20c before six o'clock Saturday and 30c afterward.

Foremen Appointed

(Continued from Page 1)

Four of the men are graduates of the General Electric Apprentice School of the Fort Wayne Works and the fifth appointee, Mr. Hemrick, is a graduate of Indiana Technical College.

Mr. Casselman, who is married and resides on R. R. 6, entered the Apprentice School in 1929 and was graduated as a machinist-toolmaker. He was employed immediately after graduation in the developmental department in the Transformer Division. In 1939 he was made assistant foreman which position he held at the time of his present appointment.

Mr. Holloway entered the Apprentice School in 1928 and completed the machinist-toolmaker course in 1932. He was assigned to the toolroom and later transferred to the arbor coop in the General Purpose Fractional Horsepower Motor Department. After two years he was placed on production and spent some time in final assembly and inspection. Mr. Holloway is married, has three children and lives at 3009 John Street.

Mr. Hunt was graduated as a machinist-toolmaker from the Apprentice School in 1933, having entered the school in 1929. He was employed in the Bldg. 17-4 tool room immediately following his graduation. In May 1940 he was made assistant foreman in assembly in the Fluorescent Transformer Department and he was engaged in this work at the time of his appointment. Mr. and Mrs. Hunt reside at 1114½ Dearborn Street.

Mr. Hemrick became an employee in May 1934 and was assigned to the work of inspecting castings, cases and flanges in Bldg. 4-4. Later in the same year he was assigned to white stator test in Bldg. 4-3 and Bldg. 17-3. During the next several years he was employed in black stator test and inspection in Bldg. 4-3. In July, 1940 he was transfered to transformer test continuing in this work to the present time.

Mr. Fletter enrolled in the Apprentice School in 1923, completing the machinist-toolmaker course in 1927. On completion of the course he was assigned to time-study work in the Specialty Transformer Division. He continued in this work until 1936, when he was assigned to the tool and equipment planning section. He remained in this work until the time of his present appointment.

Mr. and Mrs. Fletter and two daughters reside at 1019 Delaware Avenue.

Theater Party

(Continued from Page 1)

membership cards. In case cards have been lost the owners membership will be checked at the door from the enrollment list.

The performance will start at 8:00 o'clock and doors will be open at 7:00 o'clock. There will be no reserved seats.

If you have a son whose room is ship shape with bunk and other suggestions of the sea, you will want to make him a gift of "Annapolis," nautical G-E alarm clock in ships' wheel design. Companion model is a G-E "Weather-Caster" which foretells the weather instead of the time.

Wear Your Identification Badge In Plain View

»» NEWS THROUGH THE PLANTS ««

Of course you know how January got started, and so do I, and to prove it, here's how.

Once upon a time in Roman mythology, there was a two face lad named Janus. He was a combination "official starter" and gate watchman, where I suppose his two faces were kind of handy if they wore badges in those days.

Engineers might say that his two faces were in diametric opposition, which is one way of saying that when he was following one nose, his other pan scanned the land he had just been over.

This was supposed to be his best trick as he could see what was coming and at the same time look back on the past. And between these two mugs, in his brain, he could co-ordinate these two views. He could work the benefit of past experience into the new ventures he saw coming.

Now, what did he have that we haven't got? Don't take that to mean that I am calling you two faced. But we can look back and remember what we did in 1940 and use this experience for all its worth in 1941.

If we really were Janus, would we feel like blind-folding our rear eyes? Would we be ashamed of the view from our rear porch?

I know that the answer is NO.

What if we did make a few mistakes in 1940? What if we did pull a few boners or left a lot of stuff undone?

That's all over now. Its Done, Finished and Sock-dologered.

Sad to say, all those good things we did are likely to be forgotten too. But lets remember good and bad only as experience to help us do our stuff better in 1941.

We've got a nice clean slate to start with, and lets fill it with the right kind of figures (Old Sandy's kind are X% saving here, Y% saving there, Z% spoilage reduction yonder and AA & % INCREASE IN GOOD COST REDUCING SUGGESTIONS everywhere, and so on, far into the next twelve months).

"Ah, Weel," Cousin (Bobby Burns) Colin says:

"Sandy, from the way you pan us,

Ye're a bi-puss like old Janus."

A very nice Christmas dinner was enjoyed by the employees of the offices of Bldg. 4-2 and Bldg. 4-3 at the West Creighton Church recently. Willadean Rathert was General Chairman. George App got right into the spirit of the game and won five prizes.

Borings From 4-4 Office

'Tis Elmer, the field mouse, the ever lovable little Rat of Bldg. 4-4 Office bringing you once again news from hither and yon. This week marks the coming of a new year and the passing of the old. Can I stand it all? Gee, a markable change has come over us all. For instance, Elmer's appetite has been fulfilled. I didn't tell you all but I had quite a cheesy Christmas, and I got enough cheese (including limburger) to last me 'till the coming of another Christmas. I won't be writing for any more cheese or anything until another year. So thanks all for the lovely presents, including the rat trap from the so and so in Bldg. 26-1. Me thinks it was from my girl, 'cause she has been trying to catch me ever since this leap year thing started. (Nope it just won't work.) . . . Bob Reardon, Jr. is tough because he got his name in this column last week. Well, I did forget to tell that he also received a card from the girl he sent one to. I guess it was sorta a belated one, but it did answer the purpose of a Xmas card. So there! . . . You should see LaVon Price as the new matron of the wash room. I didn't see her, but one of the girls was telling me that she broke her powder case all over the floor, so she was so kind and condescending to be so low and so bending, as to sweep up the mess she made. Now Martin, what better proof can we give for her cleanliness in keeping a house tidy, or in other words, a nice woman to be around the house about 23½ hours per day. . . .Gee, all you can see around the office is red now. Charlene Snyder got a powerful loud red sweater for Christmas. Gosh she sure looks pretty in that sweater. What more can I say about such a beautiful present. . . . All the girls just float around the office, 'cause they all got bubble bath from Santa. Ardeth Hemp received it in the liquid state, and she almost drank it by mistake. Now I ask you wouldn't that be a calamity? Well, anyway, she probably would be forever blowing bubbles, or perhaps people might think she had hydrophobia, or just plain foaming of the mouth. Betty Mougin takes a delightful bubble bath every night now, but remarks that the bubbles on top are cold. I don't know if I would like anything like that, it sounds too clean for me. . . . Doris Roe got an electric train from her husband and she has it around the tree. The other night she had 12 people over, and LaVon Price and Martin kept playing with it all night. I guess they had more fun with it until it went 60 miles per hour, and the train had a wreck. Now isn't that a sad ending for such a beautiful story, . . . I'm just going to tip you all off, that is to say, if you like care and stuff like that. Well, Mary Hile and Doris Roe received Electric Mixers for Christmas. So I just might suggest that one week you can go to Doris' house and have her help fill the feed basket, and then the next week go to Mary's. And then folks, I might also add if you have some fool-proof recipes, just send them over to our office and let these two girls try them out. I know they will appreciate it a lot. . . . Art Wedler has been such a good boy during 1940. I just wonder how he's going to behave in the new year. I guess a person can be good for just so long, and then watch out.

I must close for another week, and all I can say is to wish each and every one of you a very Happy and Prosperous New Year. I remain, sincerely as ever,

Elmer, the Field Mouse.
(The Rat to You.)

Slips And Chips

By Sir Vis, 4-4

Here we are started on our way in 1941. Resolutions remain to be broken and many other exciting moments to come. By the way, Gee has not been in the dog house for a week now. How long will his good behavior last? I place my bet on two weeks. . . . Douglas Blessing and Don Thomas are now driving new cars. This makes three new cars in our section now. Do not be alarmed to have either Ed, Don or Doug invite themselves out to your house for dinner sometime soon. Don says, "We have to pay for them some way." . . . Don't you think Ewald looks becoming with his new cheaters. He wishes you to know that they are for protection, but they will come off. . . . Does anyone have any information concerning Herman Lepper's hunting trips? I have often wondered how he is succeeding as a hunter. . . . Everyone is so busy here and at home, that interesting news items are as scarce as hen's teeth. Ivan Butler makes a good wedding usher, especially on Christmas Eve. His only requirement is that he be furnished a quart of black coffee, and a good hot bath one hour before to change him from the Christmas spirit to a wedding mood.

It looks like wedding bells will soon be ringing for Marie and the boy friend. He's wearing her Elex pin now.

Bill Bailey, Bldg. 4-3, gave several of his friends a lovely Christmas gift. They were hand paintings of themselves. None of them could imagine that Bill was such a good painter.

Does Nellie Williams, Bldg. 4-3, ever do a good job loving the life out of a Pekinese pup.

19-5 Office Chatter

Capt. Houck is noted for keeping everything in his desk from candy to fish hooks, because he believes everything can be used sometime or other. He proved his point the other day when he produced a big black safety pin and closed a big rip in his trousers. . . . Virginia Klopfenstein is being addressed as Miss Klopfenstein since that diamond appeared because the gang don't know how much longer she can carry the title. . . . Larry Hemphill has always been greatly interested in magic and it is reported he did his bit in fine style to help out the magician at the G-E Club Christmas party.

Miss Leora Carpenter, Bldg. 4-3, entertained the girls of the Mechanism Group with a Christmas Exchange party at her home. Games were played and novelty prizes were awarded to Adelle Kuckuck, Caroline Hans, Myrtle Bennett, Charlotte Stanford and Vera Dull. Others present than those previously mentioned were: Fern Truelove, Irene Martz, Gladys Brown, Mildred Raymond, Nellie Williams and Gladys Balyeat.

Larry Rupert and Henry Graffe, Bldg. 4-3, were seen last Saturday ambling down Calhoun Street both sporting a new sky piece. We noticed that the both of them were very careful to steer clear of the Court House square. We wonder why. Perhaps they can enlighten us.

We notice that Newton Poland, Bldg. 4-3, is letting the fur grow long on his upper lip. He tells us that if this is successful, he will let his beard grow. The reason for this, he explains, is to cut out the cost of razor blades, also the wear and tear on his face.

Forrest Whonsettler, Bldg. 4-3, sat on the end of a bench looking on with envy at all the Christmas gifts being passed out in the Small Lot section, and wishing that he had the privilege of playing Santa. In fact he became so engrossed in thought over the situation that he finally found himself sitting on the floor.

Louie Hickernell, Bldg. 4-3, tells us that he feels all run down, so some one told him that he needed more iron in his system. So Louie is now partaking of large quantities of hair pin soup. He says, "I believe it is going to do the work." Why bother to stew hair pins, Louie, when we, of the Flange Section, can furnish you with cast iron dust by the bushel.

To Isabel Screeton, Bldg. 26-5, we offer our congratulations. He's a lucky fellow we'll admit, and it sure is a beautiful diamond.

Farm Bureau—See Rosco Platt, Bldg. 26-5.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

Probably the second-oldest alibi in the world (you'll find the oldest in Genesis), certainly the one most frequently heard is "I don't have time." Sometimes we're inclined to feel that what people really mean when they say that they haven't time for something or other is that they don't want to be bothered.

What do you think? How about that letter you've owed for so long and that you haven't "had time" to write? As likely as not it could be written while you're glibly explaining how busy you are, and hate to write letters anyway. For we have observed that people can always find time for the things they really want to do.

The essential thing in having enough time in which to do the things you want to do, is to know just what it is that you'd like to accomplish; from then on spend some time each day on that project, even if its only a few minutes they'll add up, and you'll be surprised how much you have accomplished by using time instead of wasting it.

It's mostly a matter of the use we make of our time, whether it's at work or some leisure activity. John Kiernan of Information Please fame acquired his vast fund of knowledge by using his spare time. He could have spent his leisure hours in strange cities sitting in the hotel lobby reading the comic strips, instead he visited points of interest in various towns, observed birds and plants, or he'd spend an hour or two at a museum or art gallery if the city had one. This was in his leisure hours, for Kiernan had an exacting job to perform too, that of sports writer.

In the new year that's just beginning, each one of us will have twenty-four hours each day, the President will not have more, nor the hobo less, so lets resolve to use our time, not fritter it away and then weakly protest that we hadn't any.

We are all wishing Helen Head, Bldg. 4-3, a lot of success in her new position of housewife that starts with the New Year.

Joe Cochoit, Bldg. 4-3, reports that he received his white shirt for Christmas again this year—person unknown.

Adelle Kuckuck, Bldg. 4-3, almost forgot that Tuesday was Christmas eve after making so many party plans.

Carey (Carnation) Baker seems to be receiving some very attractive post cards considering the group standing around waiting to see them.

NEWS THROUGH THE PLANTS

26-5 News

Aircraft Dept. Bldg. 26-5, is now sporting three sets of brothers. Mike and Bob, George and Frank, Ozzie and Fuzzie.

All bowlers who aren't satisfied with their scores should do as Lonnie Rockstroh, Bldg. 26-5, does. She bowls in her stocking feet. It raises your score 20 points, so she says.

Virginia Rummel, Bldg. 26-5, you cannot flash a diamond around like that and then tell us it's your Grandmother's. It just doesn't hold water.

The Steward boys of Bldg. 26-5 were sporting new bill folds with some real green bills in them. Ralph couldn't help but show all the boys his secret place for hiding his sinking funds.

Some of the boys of Bldg. 26-5 wonder if Ray Renfrew can tell the difference between possum and raccoon meat.

If you notice Gordon Diver sneezing, it may be because he got caught in the Draft.

Ask John Roeble if he has seen the Big Bear at the State Park near Bluffton.

Did Ed Schafenacker, Bldg 26-5, find the Battery he was looking for last week?

Herschel Odier and Ralph Steward, Bldg. 26-5, say that between themselves they ought to be at least a fair news reporter.

Just imagine—a very cold lake, a thoroughbred collie sitting 15 feet out in the water and Jim Mitchell Bldg. 26-5 standing on the shore beseeching the dog to come out. After so long a time, Jim decided it was useless and waded in cold water after him. Nice work, Jim.

Art Walda, head of Bldg. 6-3 Billing Section, certainly has the last laugh on his boss, Dick Kirk of Schenectady. Kirk sent Art a congratulations card on the addition to the family but Art claims that he doesn't even have a nodding acquaintance with the stork. What kind of Winchells do they have at Schenectady?

Anybody interested in learning how to make cookies that will even tempt Santa Claus to hitch up his reindeer to a post and stay for a bite to eat on his busiest evening should contact Addie Levenberger of Bldg. 6-3. Those babies have what it takes. Is that why you always fare so well every Christmas Addie?

"The early bird gets the worm" fable proved a reality for Mark Hennigh, Bldg. 26-5. He had the first opportunity to demonstrate the symbol of the mistletoe.

The Aircraft Christmas party, Bldg. 26-5, was a howling success insofar as the participants were concerned. The girls exchanged valuable gifts and there was a general 10c gift exchange enjoyed by all.

Even the Blessed Old Saint Nick himself was there in person to pass out the gifts. He was so natural that none of the younger girls were disappointed or thought him a Salvation Army replica.

Even your writer isn't exactly sure who he might have been. Everybody, however, is sure it wasn't Mike Lowe.

A lovely tree, completely decorated, and crested with a miniature plane, symbolic of our department, was very much in evidence.

Kenneth McCague thought of buying a new Nash car and changed his mind. Instead he bought a new bicycle and field glasses. Ken said that if he got tired of riding he could climb a windmill and see the sights.

Shorts From 6-B

The other morning Jake Sappington came to work cooking a large fragment of last years lettuce with a San Felice cigar band on it but closely resembling a shaving brush—a few minutes later Jake was seen lying face down over an oil drum—couldn't have been your annual Christmas cigar, could it Jake?

Whenever Bill Walt goes fishing he always brings back the largest string of fish and moreover, pictures to prove it. This mystery has finally been exploded. It was learned that Bill has a magnifying lens in his camera that makes a couple of chub minnows look like muskellunge. If any one ever took a picture of Bill with that same camera—shades of Opie Dilldock!

It is rumored that Ed Myers was the recipient of a new double-barreled shot-gun for Christmas. Ed says he doesn't hunt but that it is not a total loss as he can cut off the stock and use it for a pair of pants.

Lester Durbin is back on his old job in the repair and return section after pinch-hitting a couple of weeks for one of the boys on the conveyor station in Bldg. 6-B. Lester says he lost eighteen pounds and has a bicep muscle that looks like a loaf of Vienna bread.

Betty Griffith, Bldg. 26-2, is supporting a nice new diamond. "How soon, Betty?"

Fred Castor, Bldg. 19-4, should join the eight-day bicycle races. His little sister got a bicycle for Christmas and Fred rode it more than she did.

Wm. Milledge wishes to express his appreciation of the fine gift given him from the office and factory workers of Bldg. 26-5. Bill says that this Christmas was the merriest and happiest he has ever had.

Charles Spencer, Bldg. 5, his heart filled with the Christmas spirit, offered to sing over the loudspeaker hook-up at Waynedale on Christmas Eve, it is reported. Undoubtedly Charlie thought he had really made everybody's Christmas, within hearing, a great success. 'Twas a great blow, therefore, when Walter Spencer reported that his much prized dog had left at the first note and that he would give Charlie his choice of never singing again or buying a new dog.

Ina Archbold, Bldg. 19-5, had a belated Christmas dinner this year. When she went out in the yard to get her duck on Christmas morning the bird was gone and so Ina had eggs for dinner. The next morning on her way to work Ina met the duck taking a walk. Christmas dinner was served Sunday.

In Appreciation

"More than words can express I am grateful to all the people for the lovely Christmas gifts and cards that have been sent to me in the past few weeks. Also for your kindness and loyalty through the entire past year. I sincerely hope that each and every one of you have A Most Happy New Year."—Sue Maddox, Bldg. 17-1.

What was it Luella Doehrman, Bldg. 4-2, turned in at the Main Office to be called for later.

There's dirty dealings going on
around these parts
When one guy beats another guy
that's when it smarts
Seems how you can't trust no one
to keep what you sold
So Dan you keep your rifle and
leave Karl keep his gold.

THE POET'S CORNER

The following poem, the first to grace this column, was written by James J. Neuman, Bldg. 17-1, and drew much favorable comment when it appeared on the Bldg. 17-1 bulletin board. Mr. Neuman, who has a service record of 28 years, has been in screw machine work during almost his entire period of service.

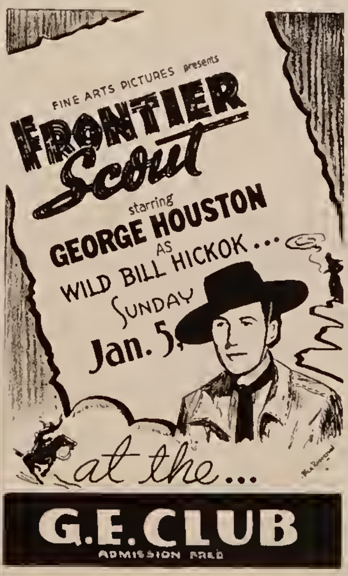
To Messrs. Wm. Franke, B. Gausepohl, F. Quinn, Bldg. 17-1 Office Force:

Although the year of nineteen forty,
At times was a hectic one,
Through it all we acted sporty,
With our work, we still had fun.
There is no use denying,
We've had our ups and downs.
But, there's no use in crying,
When SANTA comes to town.
The gang on the Automatics,
Cold Header and Hand Screw too,
We all say without static,
MERRY CHRISTMAS to all of you.
Let's hope through the year that's coming,
We'll all be here on this floor,
And our business keeps on humming,
And all work together once more.

THE GANG.

The Drafting Party

'Twas the day before Christmas and the Specialty Motor Drafting celebrated its usual impromptu Christmas party. The success of this affair is probably due to the fact that there is no program, no preparation, no chairman, no committee and everyone brings refreshments as the spirit moves them. Haifley led in this respect, at least as to quantity as he brought a peck of apples. Hemphill officiated as a somewhat lean but otherwise very satisfactory Santa Claus and distributed gifts to the ladies. Comedy relief was supplied by the "fan mail" Feiertag received at intervals through the afternoon. For details about this fan mail just ask Warner or Martz. Jennings can now relax from his difficult task of measuring the girl's foot prints as the gifts are now delivered. The final "menu" was a wonder to behold and included, besides the above mentioned apples such items as candy, cookies and salted nuts. The girls took their kidding seriously and turned up with a huge box of cup cakes which were very good indeed. In spite of the fact that we called on others to help finish the "eats" we all went home feeling like an over-inflated balloon.



M.B.A. PATIENTS

Transformer: Josephine Lee, 1310 Green St.; Ann Bishop, 3104 Thompson Ave.

General Purpose: Charles Brown, Lutheran Hospital; Elva McMaken, St. Joe Hospital; Edith Fuller, 2015 Broadway; Margaret Fall, 1714 Simon St.; Esther Hauke, R. No. 1 City; Phillis Thomas, 532½ Prospect Ave.; Janet Ferguson, 1430 W. Wildwood Ave.

General Service: John Martin, 1302 Dodge Ave.; Ben Wiley, 2435 Gay St.; James Sullivan, 132 E. Lexington Ave.

Apparatus: Ralph Klaren, 1103 Swinney Ave.

Wire & Insulation: Harry Beltz, 924 Cottage Ave.

Left the Hospital: William Alleman, Lillian Ferguson, Betty Pequignot, Vera Sessler.

Returned to work: Harold Roche, Orville Ellingwood, John Fulton, Rosella Stout, Leona Weller, John Vollink, Clarence Hambrock, Romeo Jewell, Mary McCaque, Daniel Yoder, Faith Egolf, Eileen Lipp, Viola Mentzenmaker, Frank Druhot, Charles Harris, Clara Watson, Charles Kerns, Russell Jones, Paul Martin, Herbert Dornte, Sarah Wolf, Willard Hull, Albert Shaver, Carl Browshaw, Mildred Bleivernicht, Virginia Gerber, Evelyn Goheen, Wilma Garringer, Irene Stier, Charles Adams, Mary Brown.

Thisa And Thata 19-5

Only one new sparkler appeared after Christmas. Congratulations Rosie. . . . They tell us that Dorothy May Craig is returning to childhood days and that Santa brought her a pair of three-quarter red socks. . . . Thelma Purdue is on our sick list. Hurry and get well Thelma. . . . We have royalty in our midst. Marjorie Quackenbush reigned as queen at a dance held last Saturday.

There are a lot of strange stories come from the Navy—but Art Fryklind, Bldg. 8-2, takes the prize this week. He claims after he got out of the Navy and tried to sleep in a bed his wife had to go out and splash water on the window every night so he could get to sleep.

Amelia Yovan, Bldg. 19-5, must have had visions of big bad policemen the other day when she remembered she had parked her car in the wrong place. She certainly made time through the gates.

Mr. Buckles, Bldg. 8-1, not to be outdone by Glenn Greek, tried his luck in gaining admittance to rooms not marked for him in Bldg. 12.

Gerry Foerster, Bldg. 16-3, spent Christmas sleeping out in a field waiting for the rabbits to come and sit in front of his gun.

It is a good thing the holiday dances are over. June DeWitt, Bldg. 19-3, wouldn't be able to stand the strain much longer what with giving special exhibitions at each dance. Just to prove she isn't worn out she winds up the evening with an Indian dance and war whoop.

Two drunks were babbling about cradle days as they leaned heavily against the bar.

"You know," said one, "when I was born, I only weighed a pound and a half; and that's a fac'."

"You don't shay," said the other. "Did you live?"

"Did I live," exclaimed the first. "Shay, man, you ought to shee me now."

WITH THE COLORS

The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

Glenn Earl Elder, R. R. No. 3, Fort Wayne, chemist in the Fort Wayne Works Laboratory, Second Lieutenant CA Res., 535th C.A. Assigned to the 70th Coast Artillery at Savannah, Georgia.

«« It's a Joke »»

"How did the Dulan wedding come off?"

"Fine until the minister asked the bride if she would obey her husband."

"What happened then?"

"She replied, 'Do you think I'm crazy?' Then the groom, who was in a sort of a daze, answered 'I do.' "

* * *

The professor had bought a new car, and was demonstrating it by taking a spin with his wife. After a while he hurrumphed deprecatingly.

"My dear," he said, with a note of apology in his voice, "I'm sorry, but—er—I'm really afraid I've forgotten what one does to bring this machine to a halt."

"Oh, Enos," shrieked the lady, "what shall we do?"

"Now, never mind dear," consoled her husband. "We'll just stop at the next garage and ask a mechanic."

* * *

"How come you write so slow, Mose?"

"I gotta, mah girl can't read very fast."

* * *

We were sitting in a dentist's office the other day when some guy looked up from the paper he had found on the table and said brightly. "Well, I see there's been some fierce fighting around that Argonne forest."

* * *

He: "How's your companionate marriage coming on?"

Him: "Not so good. I lost my wife's address."

* * *

Rag Merchant: "Any beer bottles, lady?"

Woman: "Do I look as if I drank beer?"

Rag Merchant: "Well, any vinegar bottles, lady?"

* * *

Policeman: "Hey, you, where yuh going with nine buckets of water?"

Boy: "I'm going to drown a cat."

* * *

She: "Where did you learn to kiss like that?"

He: "I eat spaghetti."

* * *

He: "What's the idea of dating this letter the 14th, when it's only the 10th?"

She: "I'm going to ask you to post it for me, dear."

Wear Your Identification Badge In Plain View

Industrial Cage League To Play Opener On Friday

G-E Club To Play St. Mary's CYO. Main Office To Meet Essex In Preliminary

St. Mary's CYO quintet will oppose the G-E Club Industrial team in the opening night of Invitational play scheduled for Friday, January 10. This contest, which will start at 8:30 o'clock will be preceded by a preliminary an hour earlier, matching Main Office, current leaders of the Inter-department Basketball League, against Essex Wire.

The Industrial Club has been practicing faithfully for the last few weeks and should be more than a match for St. Mary's who up to now have not had a highly successful season. The G-E manager, Mert Edgar, will probably start Marquette and Clawson at forwards, Voirol in the center slot, and Allen and Weigand will be at the guard posts with Miller, Starkel, Rabus, Bobay and Schultz held in reserve.

Main Office is sure to run into plenty of trouble when they tangle with Essex Wire as they have been making things tough for all the members of the YMCA Industrial League and just last week lost a one point heartbreaker to Zollner, the circuit leaders. Included on the Essex roster are such well-known performers as Kuleza and Stanski, former Central stars and Stanzak, bulwark of Central Catholic's two time national champions.

Several other fine teams such as Zollners, Harvester, Rea Wire, St. Hyacinths, St. Joe A. C., Bethany Presbyterian to mention a few have been signed up to appear at the Club at a later date.

There is no charge made to witness these games and anyone may attend whether a G-E Club member or not.

McTerney Appointed

P. A. McTerney has been appointed manager of sales, large motor and generator section of the motor division, in General Electric's Industrial department, it was announced today.

Mr. McTerney is a native of New York City. He studied civil and electrical engineering at New York University and at the College of the City of New York, and entered the employ of General Electric's then power and mining department—now the Industrial Department—in May, 1918. In March, 1929, he was transferred to the motor division of the Industrial Department.

In his new position, Mr. McTerney will be in charge of sales of large direct-current motors and generators and motor generator sets, as well as synchronous motors and A. C. engine and belt-driven generators.

Courteous To The End

A saloon keeper had a parrot. One hot day a bunch of men came in and all yelled what they wanted at one time. The saloon keeper said, "One at a time, gentlemen, one at a time." A few days later he hung the parrot's cage on the porch and after a while heard a commotion, and the parrot was screaming at the top of its voice, "One at a time, gentleman, one at a time." There was a swarm of bees after it.

Credit Union Facts

by T L. WALLACE

(Continued from Last Week)

8. Withdrawals:
   Unless pledged as security for a loan, amounts paid in on shares may be withdrawn at will. If necessary the Treasurer may require 60 days' notice of withdrawal, but this has never been required. Notice of withdrawal should be given 24 hours before needed. As the credit Union is primarily a savings or thrift organization, frequent withdrawals are not encouraged.
9. Loans:
   Loans are granted for many purposes at a reasonable interest charge. For information see Committee members or inquire at the Office. Loans granted only to employees with more than one year service.
10. Earnings:
    Dividends, based on the Credit Union's net earnings for the calendar year, are paid at the end of each year on all fully paid shares which a member has as of December 31st. Shares paid for during the year draw dividends from the first of the next following month to the end of the year. In other words, as soon as you have $5.00 paid in to the Credit Union, that $5.00 or 1 share, will earn dividends for you from the first of the next following month to the end of the year. Withdrawals of shares during the year automatically cancel dividends on same. Many members prefer to borrow, if necessity arises, using their shares as security or collateral, rather than withdraw from their share accounts.
11. This Credit Union is owned and operated entirely by the members for the benefit of the members, subject to supervision by the Farm Credit Administration, Washington, D. C., by whom our charter was granted. Certain fundamental rules governing the handling of money and the granting of Credit are to be observed, but it is always the desire of the officers to serve the members to their best advantage. Any suggestions or comments are always welcome.

T. L. WALLACE.

Free Movies

Don't forget to attend the G-E Club free movie Sunday, January 5 featuring the picture "Frontier Scout" starring George Houston and Beth Marion. Shows will be put on at two and four o'clock and admission will be permitted on presentation of a G-E Club membership card.

Herb Koch received a nice "Post-Christmas" gift last week when he bowled a perfect 300 score in a tournament at Scott's. Congratulations, Herb.

First Half Volleyball Champions

Chalking up a remarkable record of twenty-one victories without a defeat, Winter Street, represented by the men depicted above, had a comparatively easy time winning the first half of the G-E Inter-department Volleyball League. The Refrigerator Club, being forced to play their most dangerous opponents, Small Motor Factory and Small Motor Drafting, during the first month, practically cinched the title before the race was half over but was forced to wait until two weeks before the finish to become mathematical champs. Members of the team are as follows: Front row, left to right—Burtzner, Rodenbeck, Macy; back row, left to right—McLain, Lammiman, Goodman, Motter.

Decrease Shown In Mishap Rate During November

Good Record Despite Addition Of Many New Employees On Payroll

Despite the fact that many new employees have been added to Works payrolls, the accident rate, according to George E. Sanford, chairman of the general safety committee, has taken a tumble. During October there were 54 accidents listed in the several apparatus works while November turned up with only 43 recorded. Part of this low record can be discounted because November, according to the official fiscal calendar, had but four weeks while October had five weeks.

The complete record by Works is as follows:

	Nov.	Oct.
Erie	2	11
Bridgeport	2	4
Philadelphia	2	0
Pittsfield		
Main Works	5	3
Plastics	0	0
Bloomfield	5	4
Fort Wayne		
Main Works	6	4
Decatur	0	0
Refrigerator	0	0
Plastics	0	0
Lynn		
River Works	7	7
West Lynn	0	0
Everett	0	0
Plastics	0	0
Schenectady	14	21
	—	—
	43	54

Curtin Appointed

(Continued from Page 1)

in Schenectady, was transferred to the wire and cable division of the Central Station department at Fort Wayne, effective January 1, it was announced here today. He will be in charge of magnet wire sales, replacing B. F. Ilsley, who is moving to Schenectady to be general assistant to the division manager of wire and cable.

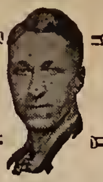
O. F. Vea, of the G-E Industrial department, will take over the work formerly handled by Mr. Curtin.

Mr. Curtin, a native of Lynn, Mass., received his A.B. degree from Dartmouth College in 1916, and his master's degree from Amos Tuck School of Finance there in 1917. After service in the World War, he was employed by General Electric in February, 1920, in the motor division at Lynn. In January, 1930, he was transferred to Schenectady where he was placed in charge of sales promotion and publicity in the motor division of the Industrial department. To his new position at Fort Wayne, Mr. Curtin brings his wide acquaintanceship with industrial customers.

Mr. Ilsley has been magnet wire specialist at Fort Wayne since November 1, 1939. He attended Harvard University, the Roya Technology College in Glasgow, Scotland, and Glasgow University before joining General Electric in 1929. After doing special work in the office of the Schenectady works superintendent, he was made general foreman of the wire and cable section in 1930, and became assistant superintendent of that section four years later. In June, 1937, he was appointed magnet wire specialist of the cable section of the G-E Central Station department in Schenectady. Two years later he moved his headquarters to Fort Wayne.

Mr. Vea was born in Stoughton, Wisconsin. He was graduated from the University of Wisconsin in 1932 with the degree of B. S. in electrical engineering. In March, 1936, he entered the employ of General Electric and was placed on student "test" at Erie, Pa., and at Schenectady. He also took the sales engineering course, and in November of 1936 he was transferred to the motor division of the Industrial department, Schenectady.

IN THE ROUGH



By WALTER SUNIER

Life is a serious thing. As Mark Twain says, it is so serious that there are very few get out of it alive. But then again it is a funny thing. This column tends to run to light, humorous things. Sandy's column runs to heavy thoughts. When we plugged for him on saving labor and material we wrote seriously. When he mentioned us last week, he wrote humorously. Funny, isn't it? He relegates us to the corner with "Bright Sayings of the Children." We are glad, at least, that we got into the "Bright Sayings" group. However, regardless of this, "In The Rough" has a purpose and since it is serving that purpose, we are satisfied.

Merry Christmas proved to be extra merry for golfers. Not only was Santy good but also the weather man. Many of the boys were able to get in eighteen holes of golf under comfortable weather conditions. A few golfers played last Saturday although conditions were not so favorable as they were Christmas day.

This is a good time of the year to replace your pivot.

The interest in table tennis is still growing. Frank Fleischer has a table and is studying the problem of lighting and table reflections.

The International Harvester table tennisers have two tables in Sappenfield's basement on Calhoun Street. They hold their league matches there and also tournaments with other teams. Their number one man is Enno Franke who is also a number one golfer. They have had many lively matches there and have invited G-E boys to play several times.

It is regrettable that the G-E Club has no place where matches can be played regularly nor any facilities for a league.

Brochure Of Prize Ads Issued By G-E

Calling attention to the part played by American industry in creating higher living standards for the American people, a large brochure entitled "More Goods for More People at Less Cost" has been issued by the General Electric Company, Schenectady, N. Y. This brochure contains reprints of 16 advertisements published by G. E. in about 30 national magazines during the last two years. The series was awarded a national medal in 1939 for "contributing most to advertising as a social force."

Tickets Ready For Appliance Preview

Will Be Available For Employees And Families

"House of Magic" Programs And Other Features Arranged For Affair To Be Held Next Wednesday And Thursday At The Shrine Club House

With all preparations completed for the preview of 1941 General Electric appliances at the Shrine Club House on next Wednesday and Thursday, January 15 and 16, employees are urged to obtain their tickets to the affair just as soon as possible. The tickets have been placed in the hands of foremen and supervisors and will be issued on request for both employees and their families.

The preview, which is being sponsored by Hahn Incorporated and Schueler Radio Sales of this city and the H. L. Lankenau Company of Decatur in conjunction with the Fort Wayne Works is exclusively for Fort Wayne and Decatur Works employees and members of their families.

The project is in no way in the form of a sales campaign, and no solicitations or sales will be made.

The review is the first of its kind ever held in Fort Wayne and will enable employees and their families to inspect General Electric new lines of appliances before general distribution is made. It should

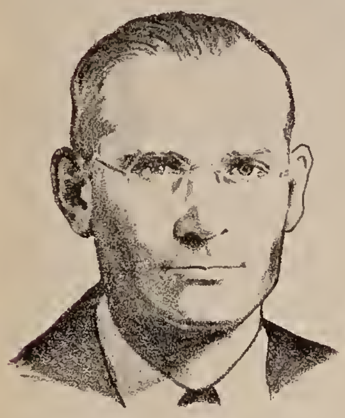
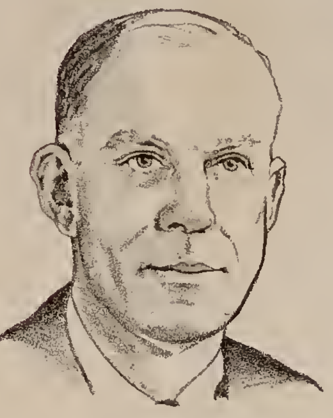
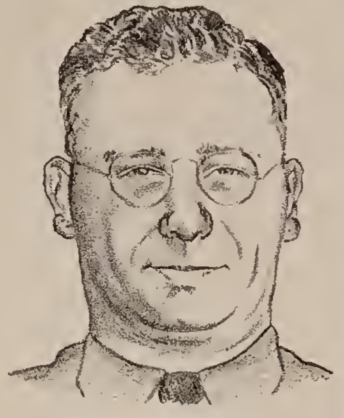
Your Hosts At The G-E Preview



George W. Hahn



Herbert Schueler



Herman Lankenau

George W. Hahn, of Hahn Incorporated; Herbert Schueler Radio Sales, Fort Wayne General Electric appliance distributors and Herman Lankenau, Decatur Electric appliance distributor, in conjunction with the management of the Fort Wayne Works will be hosts at the preview of 1941 G-E appliances to be held on January 15 and 16 at the Shrine Club House. All employees and their families are invited.

G-E Official To Serve With Defense Body

Asst. Comptroller F. B. Cliffe To Be Connected With National Defense Commission

Frank B. Cliffe, an assistant comptroller of the General Electric Company at Schenectady, has left for Washington to serve with the National Defense Advisory Commission. Mr. Cliffe's connection with the Commission will be for an indefinite period, it has been announced.

Mr. Cliffe, a graduate of the University of Pennsylvania, received his Master's Degree in 1917. After serving with the War Department and the Statistical Branch of the General Staff with the A.E.F. in France during the war, he returned to Pennsylvania to teach for a while and then entered public accounting work.

(Continued on Page 2)

Alumni Association To Hear Capt. Cornish

Captain Clarence Cornish, of the municipal aviation field, will be guest speaker at the Apprentice Alumni Association meeting to be held on January 21 at the Moose Hall. Captain Cornish will speak on "Aviation" and "National Defense."

Dinner will be served at 6:30 and following the talk by Captain Cornish a program of entertainment will be presented.

G-E Advertising Man And A.B.C. Founder Dies

Fred R. Davis, a founder of the Audit Bureau of Circulations and advertising space buyer for the General Electric Company at Schenectady for 35 years, died Dec. 26 at his home in Schenectady after an illness of two years. He was 64 years old. For many years he supervised the expenditure of more than a million dollars annually for newspaper and magazine space.

A man of scientific training himself, Mr. Davis was a pioneer advocate of accurate measurement in advertising and helped found the Audit Bureau of Circulations in 1914. He served as a director from that date until his death and since 1927 had also been first vice president of the organization.

Plastic Leader In Safety In 1940

Completing 1940 without a losing time accident, the Plastic Division holds first place in Fort Wayne Works safety standings. Although all other divisions had one or more losing time accidents during the past year, one hundred and seven departments out of one hundred and fifty made perfect scores.

These departments and their foremen are as follows:

Miscellaneous Division

G. Doehle, Bldg. 18-1; E. Yahne, G-E Club; W. Wolf, Bldg. 12-2; R. Reardon, Bldg. 28; H. Zimmerman, Bldg. 16-1.

Motor-Generator

L. Larenitis, Bldg. 19-2; J. Kaade,

Fifteen Complete Special Works Drafting Course

Graduation Follows Intensive Training—New Class To Be Opened Within Short Time

Fifteen men have completed the special drafting course conducted in Bldg. 19-4 during the past thirteen weeks, and organization of a new class to open within a few weeks is underway. Qualifications will include from two to three years attendance at a recognized college or university.

Graduates of the class just ending are W. Anderson, John W. Chipko, Frank Dubanowisch, Peter

(Continued on Page 2)

CHANGE STORE HOURS

Employees' store hours have been changed starting this week. The store will now be open from 10:00 a.m. until 4:00 p.m. Mondays through Fridays.

To All Employees: January 10, 1941

It is a distinct pleasure for the Fort Wayne Works management to be enabled to invite employees and their families to the preview of our Company's 1941 line of appliances.

It is felt certain that this opportunity to inspect General Electric's latest appliance models will be of interest to everyone of us, not only because they have been designed, and produced by our Company, but also because many of the parts that make them possible are manufactured at our Works. Thus an opportunity will be afforded to many of us to see the practical application of the things we make.

The preview will not, in any sense of the word, be a sales campaign. No sales will be solicited or made. It is a rare opportunity for G-E people to preview our products—products in which they have, I believe, a pardonable pride because of their own contribution and association.

In behalf of our local Works organization, Hahn Incorporated, Schueler Radio Sales, The H. L. Lankenau Company of Decatur and the Fort Wayne Works of the General Electric Company, you and your families are cordially invited to this preview of our 1941 lines.

G-E President Will Address Utility Heads

C. E. Wilson To Speak On "National Defense—And Afterwards" At Chicago Meeting

"National Defense — And Afterwards" will be the subject of a talk by Charles E. Wilson, president of the Company at a dinner meeting of western utility company executives at the Stevens Hotel in Chicago tonight.

The dinner is being arranged in connection with the 13th annual Central Station sales conference sponsored by the General Electric Company on Friday and Saturday. About 350 representatives of utilities in the mid-west and far west are expected to attend. Another dinner speaker will be Thomas H. Beck, president of the Crowell-Collier Publications.

Speakers at the morning and afternoon sessions on Friday will include: H. M. Bosworth, General Electric central station appliance sales; L. A. Hawkins, executive engineer of the G-E Research Laboratory; H. F. Smiddy, chief op-

• Teamwork

Years ago practically all business was conducted by single individuals. The shoemaker, the locksmith, the ironmaster all owned little shops of their own. Their individual success was entirely dependent upon their individual effort.

The march of years has brought changes. Today we have stockholders, management and employees—all dependent upon the great industries which grew out of the one-man shops, and all dependent upon one another for the successful operation of these industries. That is why teamwork is so important in modern industry.

This matter of working together for a common good has often been likened to the operation of a baseball team. The pitcher may claim he is the important factor for success because he holds the opposing team to a few scattered hits. The first baseman may think the credit should be his because he has made more putouts than anybody else. And so it goes with all the rest of the players on the team.

But when the whole situation is analyzed it is found that the manager has some part in winning the games because he has gathered the team together and given coaching and instructions. The owner of the team has some claim to the success because he has furnished the grounds upon which to play, has paid the salaries of the players and has advertised the games. In the end it is found that several thousand fans are also interested because the dollars collected at the gate made the games possible.

This mythical ballteam offers the whole story of what is meant by cooperation in business relationship. It is only through cooperation of the employees—that is the players; the management—representing the manager, and the stockholders—the owners of the team, that the final product can be perfected and made available for use. And finally just as the fans at a baseball game demand a good game or they will not pay to see it, so do the customers of a business demand a good product or they will not buy.

Many people think of success as they think of a four-leaf clover. If they are the chosen favorites of fortune, they think they will find it. But success is not luck. Success is playing the game; playing on the team. Organized effort will produce a more far-reaching brand of success than individual work. It is a curious contradiction of nature that the greatest help towards the success of one's self is unselfishness, and he who works best for all certainly works best for himself.—*L. M. Boomer.*

• Stealing The Show

When Shakespeare wrote:

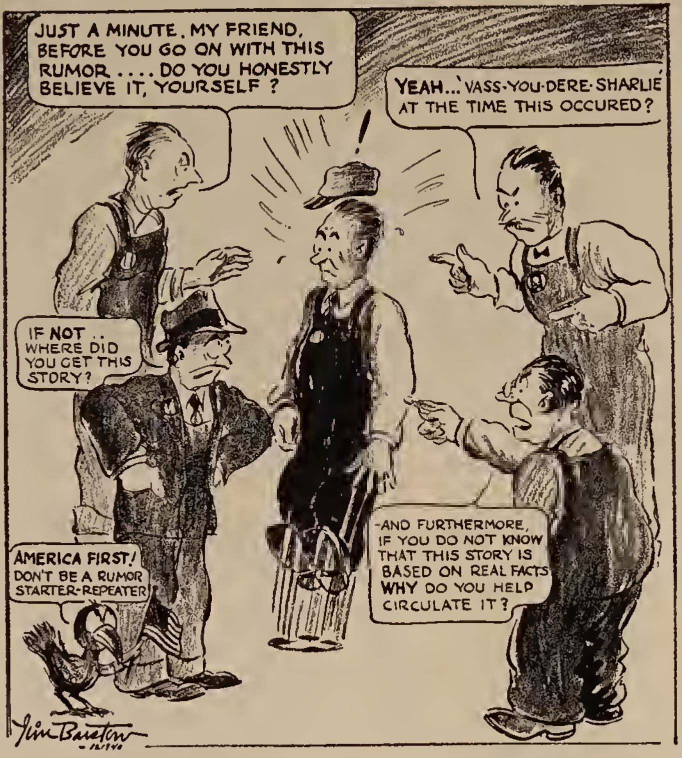
> "All the world's a stage,
> And all the men and women merely players;
> They have their exits and their entrances;
> And one man in his time plays many parts."

he certainly called the turn on life. How true it is that man in his time plays many parts. But the strange part is that none of the roles are assigned to him. He, and he alone, chooses his part and he alone wins the right to play them. Further, he does not have to be what he does not want to be.

Every player on the world stage has his chance to "steal the show." Whether he does or not depends solely upon himself.

The humblest job in this Company offers to the man holding it, a challenge undreamed of 50 years ago. It is true not alone of this Company but of any other. We live in times which move so swiftly that the dream of yesterday becomes the accomplishment of today and the chances to "steal the show" are greater than ever before.

CHECK AND DOUBLE CHECK



JUST A MINUTE, MY FRIEND, BEFORE YOU GO ON WITH THIS RUMOR.... DO YOU HONESTLY BELIEVE IT, YOURSELF ?
YEAH...VASS-YOU-DERE-SHARLIE AT THE TIME THIS OCCURED?
IF NOT .. WHERE DID YOU GET THIS STORY?
-AND FURTHERMORE, IF YOU DO NOT KNOW THAT THIS STORY IS BASED ON REAL FACTS WHY DO YOU HELP CIRCULATE IT?
AMERICA FIRST! DON'T BE A RUMOR STARTER-REPEATER

Fifteen Graduate

(Continued from Page 1)

J. Eberhard, Everett K. Houser, John A. Kapsamus, Jerome H. Lieblich, Wade Philpott, Wilton M. Ramsey, Paul M. Ryder, Charles Shore, Arthur F. Tebbe, Richard W. Weaver, Harry Richardson and Rudolph Alexander.

The course includes not only training in drafting but also technical training with special emphasis on algebra, trigonometry, and mechanics.

If you have children of school age with home study work to do at night, it is important that you check to determine that each room is adequately lighted—paying particular attention to the area used by the children for study purposes.

M.B.A. PATIENTS

General Purpose—Mazie Greek, Yoder, Ind.; John Shea, 536 Kinnaird Ave.; Arthur Sorg, R. 310, city; Gertrude Beekner, 1040 Columbia Ave.; Ross Gebert, Yoder, Ind.; Rachael Beach, St. Joe Hospital; Sarah Wolf, 426 W. Butler St.; Louise Walker, 2245 Pittsburgh St.; Herbert Springer, St. Joe Hospital; Robert Taylor, R. 6, city; John Shady; Esther Snyder, 924 W. Washington St.; Dorothy Dressler, 1403 Vance St.; Howard Wright, 801 Huestis Ave.

Transformer — Earl Fitzwater, 1027 Swinney Ave.; Emma Bradford, 2222 Reed St.; Emma Meyers, Lutheran Hospital; Shiela Stehly, 3629 Shady Ct.; Marcia Stier, 2442 Hoagland Ave.; Ann White, 2021 Webster St.; Revella Shepherd, 306 E. Foster Parkway; Frank Clibon, 313 W. Main St.; Mary Jane Taylor, 2222 E. Washington St.; Ann Gehrig, 2635 Fox Ave.

Power House — Sam Mastromarco, 1230 Eliza St.

Plastics—Eleanor Plock, St. Joe Hospital.

General Service—James Sullivan, 132 E. Lexington Ave.

Returned to Work—Eileen Meyers, Ben Wiley, Edith Fuller, Lydia Whitney, Lewis Passon, Lucile Kaiser, Ruth Jennings, Wade McCutcheon, Clyde Boyce, Theda Berberich.

Defense Duty

(Continued from Page 1)

Since entering the General Electric Company in 1920 some of his duties have included the design and supervision of operation of employee benefit plans; service as an instructor and special lecturer in Company's Business Training Course for new employees; actuarial responsibility for Company's group life and pension plans; supervision of the Company's contribution and information returns under all Federal and State Social Security Legislation (Company operates in nearly every state).

By invitation Mr. Cliffe has assisted the Joint Legislative Committees and Governors of various states in drafting unemployment compensation bills, and at the request of certain states he has studied the internal administration of unemployment compensation laws.

He is a member of the Business Advisory Committee to the Social Security Board. He is now serving as Chairman of the Amendments Committee of the New York State Employers Conference.

G-E Warm Air Conditioner Reduces Colds In Winter

One of the greatest benefits of air conditioning is the improvement in health in winter, especially is this true for those people whose sensitive mucuous membranes of the nose and throat are easily irritated by air which is too dry or otherwise discomforting.

G-E Warm Air Conditioners (for oil or gas) are designed to provide all the healthful benefits of winter air conditioning: positive, gentle circulation of air throughout the house, cleaning the air by passing it through filters, humidification of air by injecting a controlled amount of moisture into it, and of course, automatically controlled heating.

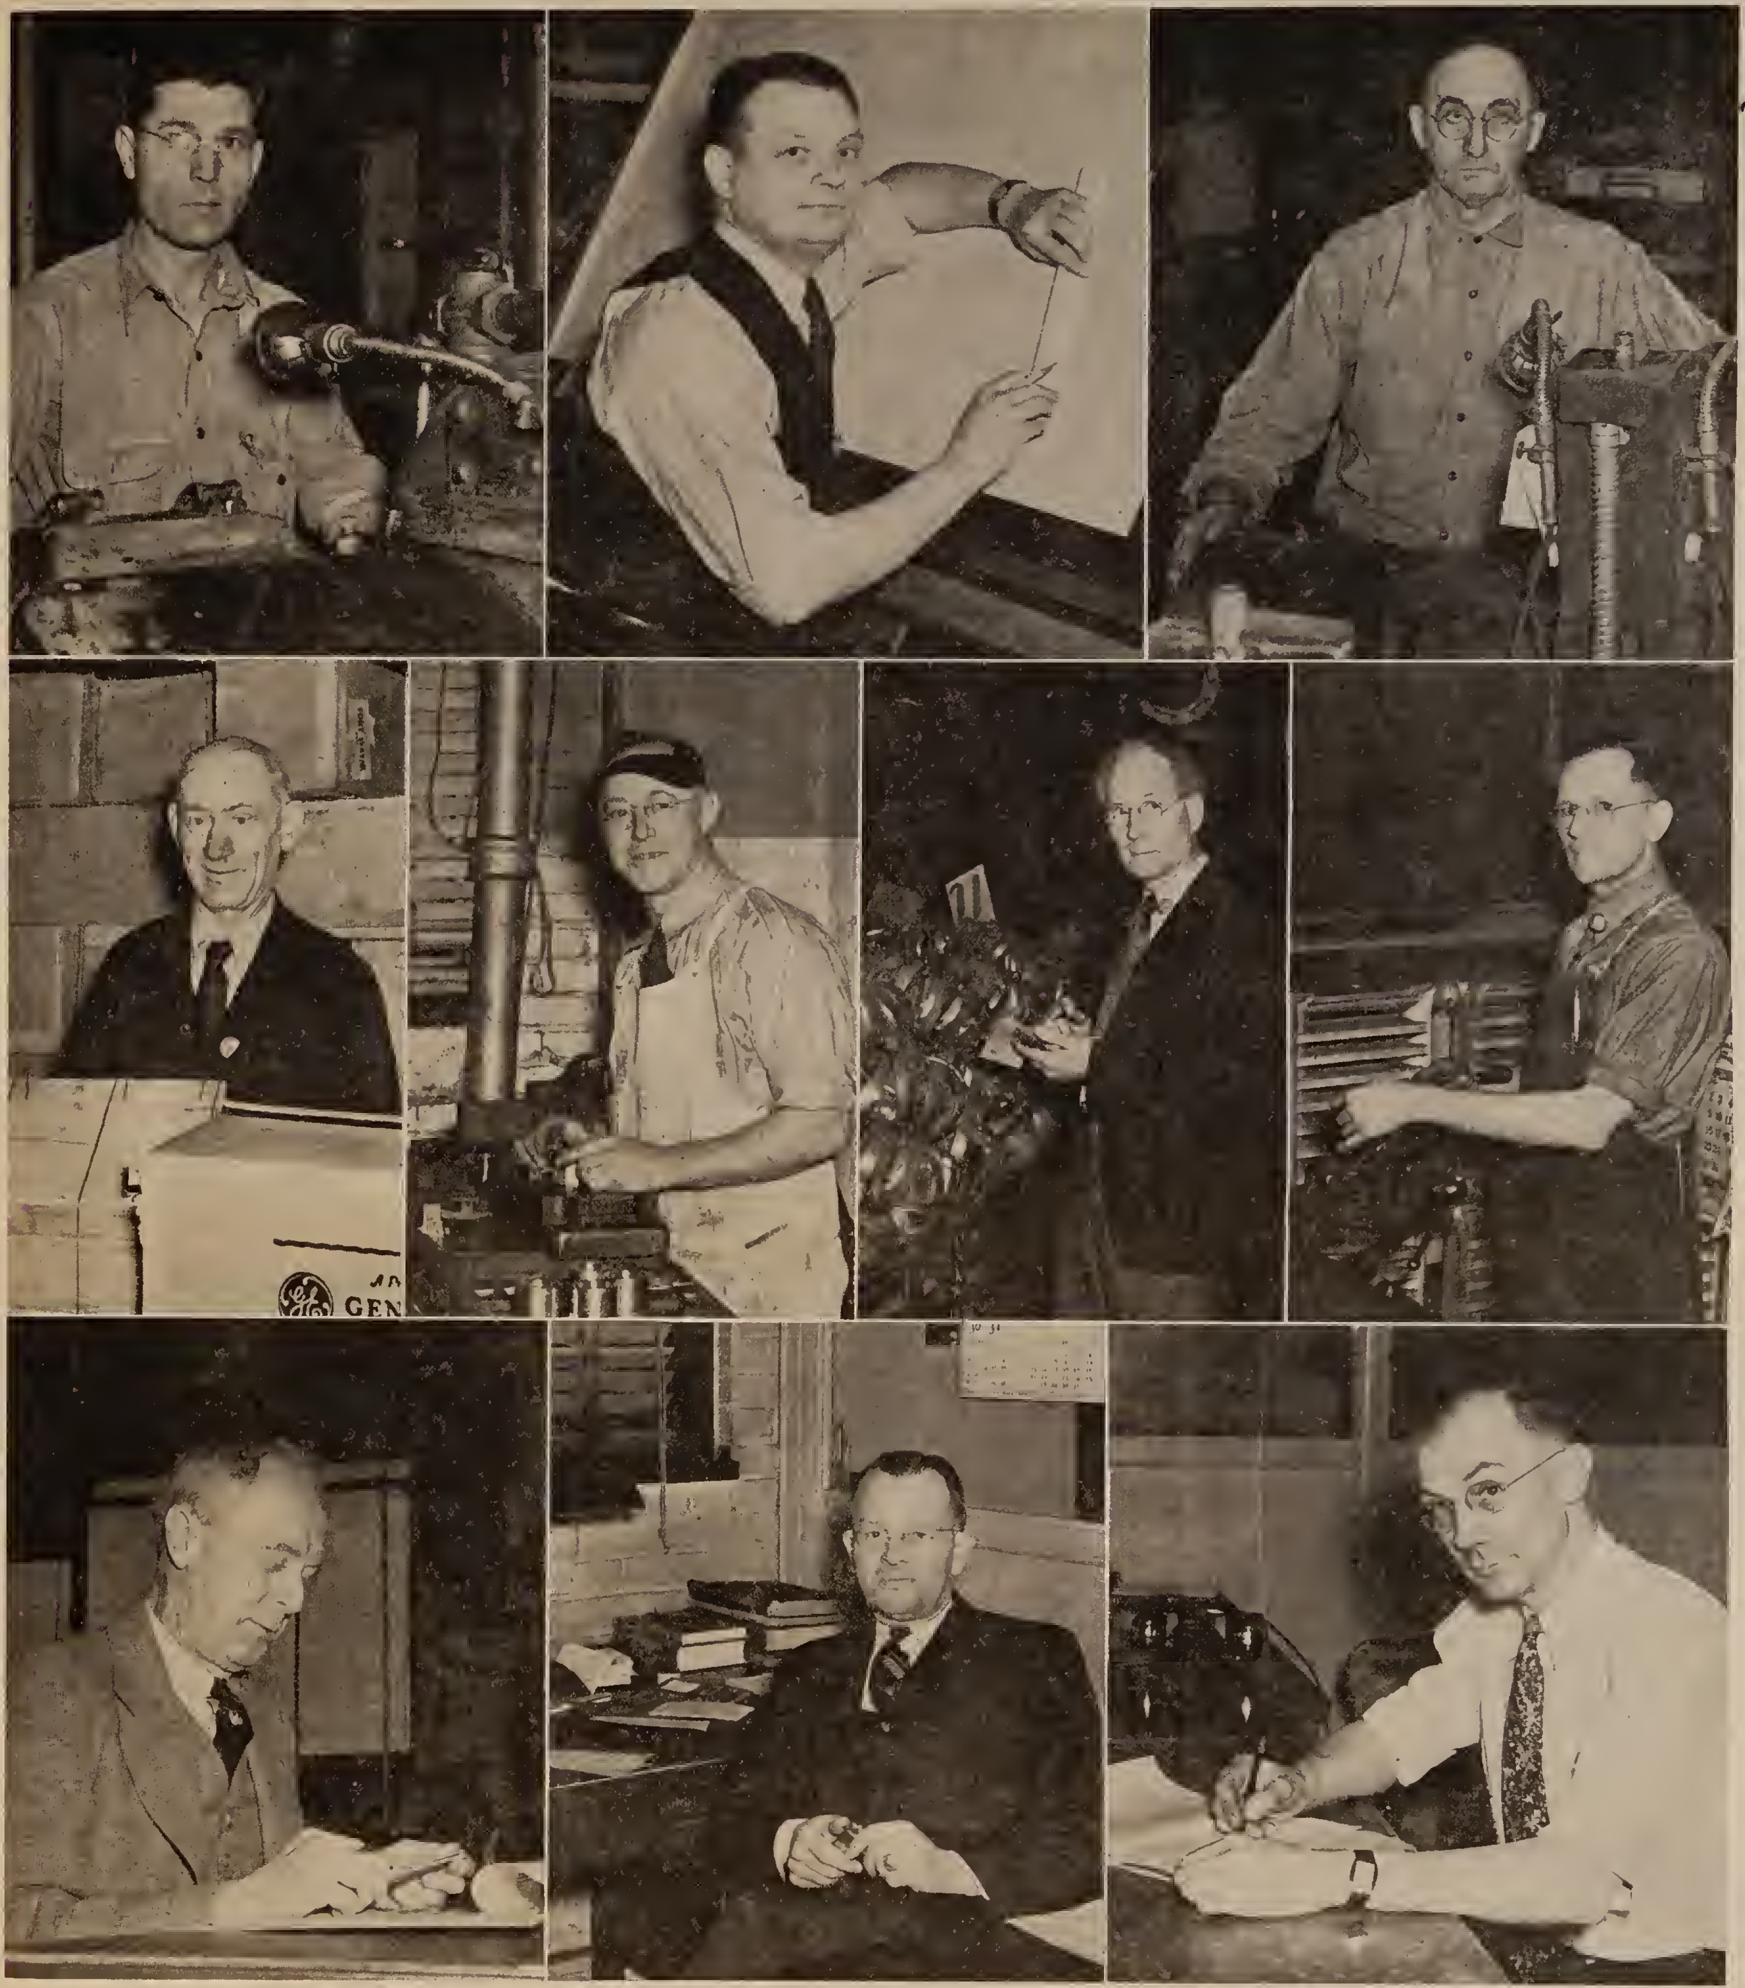
Ten Become Members Of G-E Honor Organization



Ten Fort Wayne Works employees have completed twenty-five years of service and have been admitted to membership in the Quarter Cntury Club, the honor organization of the General Electric Company.

The new members are: Top row, left to right—George J. Ludeman, Bldg. 19-5; Erwin F. Rechter, Bldg. 19-4 and Charles J. Gebert, Bldg. 4-B. Second row, left to right—Wm. Schafer, Bldg. 6-1; Joseph J. Hartman, Bldg. 26-5; John F. Blakely, Bldg. 6-B and Aug. J. Wiegand, Bldg. 26-5. Bottom row, left to right—J. F. Formanek, Bldg. 19-3; G. Ray Lindemuth, Bdlg. 4-6 and George App, Bldg. 4-3.

A total of fifty-one Fort Wayne and Decatur Works employees became eligible for membership in the Quarter Century Club during the past year. It is anticipated that 1941 will show the largest membership gain in the Club's history for it is estimated that more than one hundred and eighty employees will become eligible during the year.

NEWS THROUGH THE PLANTS

THE POET'S CORNER

ICE FISHING

I'd rather not expose a friend
Who claims to know his stuff,
But since my faith has reached its end
I'm forced to call his bluff.

It started back three years ago
When I was in his fold,
He pumped me full from head to toe
With how to slay 'em cold.

He laid it on so thick and fast
I became a firm believer
And e'er another week had passed
I meekly caught the fever.
Now I am not one to complain
'bout what's passed o'er the dam
But I surely must have been insane
To listen to that ham.

I still recall the way I sweat
In torrid summer sun
Because he said I had to get
My winter tackle done.

Three months went by, and winter came
And we fished both day and night;
I cut holes till my back was lame
But didn't get a bite.

I tried his every new device
But never did I hit
Until I questioned his advice
Then did the opposite.

He told me not to use a bead—
To fish so far off bottom,
And yet I couldn't help but heed
We missed while others got 'em.

He told me to get out at dawn,
To use a certain bait;
I changed each thing he said was wrong
But all I got was wait.

He tried to bolster up my hope
I tried hard to be game
Until I learned he was a dope
And was making me the same.

I've watched him many times since then
And it finally pierced my dome
The only time he hit was when
He went fishing all alone.

Of course I wouldn't say he lies,
To doubt is not my wish
But it does seem strange none of the guys
Have seen him catch a fish.

So far as I'm concerned, I'll state
The truth just plainly put
The only thing I've seen him take
From the hole is one wet foot.

Experience is a teacher slick,
But with it I'll agree;
That if you want to learn the trick,
Stay away from Bldg. 16-3.

I-Was.

Heroine (frantically) — Is there no succor?

Voice from Audience — Sure; I paid two bits to see this show.

Shorts From 6-B

The writer suggests that "Billy" Overmeyer take a course in resuscitation at the Y. W. or buy a first aid kit. . . . It is really a pleasure and a joy to tell Fred Thompson a funny story. He just throws his upper lip back over his forehead and gives you a full view of his wide expanse of bi-cuspids. . . . We understand Perry Shober was uneasy all the way home on New Year's Eve for fear of being arrested for retailing his breath without a license. . . . The arguments between Vic Leakey and Ed Arthur should really be umpired by a referee armed with a four foot club to announce who is up to bat and who on deck.

Earl Lenz, Bldg. 26-5, is reported to not only fish at Rome City but also to fish for stories handed out by the grinder gang.

Otto Rodenbeck, Bldg. 26-5, was kept busy on his way to work the other day trying to see if he were being shadowed. No wonder for he had a roll in his pocket with which to buy a G-E Employees Securities Corporation bond.

Remember the Chinese ritual of breaking the "golden bowl" when one is gathered to his ancestors. Frank Hoffman is reported to have given an illustration the first day he used the golden cuspidor presented him by the Bldg. 26-5 office gang.

We hear that Earl Lenz, Bldg. 26-5, wanted to lay off an hour earlier to get his car washed. Must be some car to require personal supervision in the bath.

Well, we all change our minds. After registering his dislike for a green car, Dave Lewis, Bldg. 26-5, appeared with a new buggy that certainly looks green unless you happen to be color blind.

Bill Milledge, Bldg. 26-5, lived quite a ways from work for a long time and was never late. Last week he moved closer to the Works and was nine minutes late. Somebody figure it out.

June Logan, Bldg. 26-5, stated that she knew exactly what she was getting for Christmas. But was she astonished when one package contained a baby doll.

We're not positive whether it's catching or not but Katherine Kilgore, Bldg. 26-5, also has a diamond. Again we say congratulations!

Employees in Bldg. 6-3 wish to express their sympathy to "Dutch" Wilson on the death of his mother.

Since Paris, France, for years the originator of fashions in women's, men's, girls' and boys' clothes, has ceased to do business, Vern Sleger, Bldg. 6-3, evidently has decided to take over the job. Ask him about his latest concerning boys' footwear.

Borings From 4-4 Office

'Tis Elmer, the field mouse, the ever lovable little rat of Bldg. 4-4 office, bringing you news behind the news. News that is scooped out, over and under. Yes, the latest news is almost stale for us, so will now let you in on some of the newest news.

Gee, I griped for over a month for Jim Gargett to get his hair cut and when he did—oh me. I don't think he will need another for months and months to come. Personally, his pig-shave is too close, or perhaps his wife gave him a close shave.

Say, gents, I'm inviting you all over to see the beautiful picture that was presented to Emmy Stock from Bill (never a hair out of place) Weber. George Petty's drawings have nothing compared to this one. So come one, come all and see this beautiful picture.

Bill Skevington is constantly thinking of cost reduction. Well anyway he dumps a box of toothpicks on the lunch counter every noon—yes, every noon. Mike Brayer was telling me all of this on Bill.

Friend: "Why is it that your son rides in a car, and you always go on the street car?"

Father: "Well, he has a rich father and I haven't."

We also have another new girl in our office—Pauline Young. Well I'll just tell you how we got her. We were looking in our Sears, Roebuck catalog and discovered the latest methods in seeking or getting secretaries. I think I'll see if I can't pick myself a new girl friend out of Sears.

And I'll tell you something else about people being mad at me. That is Ivan Butler. I didn't know that he went to a wedding until I read the WORKS NEWS last week. Bob Spitler was telling me all about it.

Virginia Plummer is constantly bragging about her wonderful heritage and I.Q. Some laugh. I like her in spite of all that.

'Tis enough for now, so will close, I remain

Sincerely as ever,
Elmer, the field mouse,
The Rat to You!

Story Of The Week

It is just a story of the week to us, but to Elizabeth Genthner it is money out of the old pocketbook. She sneezed so hard that she hit her head on her desk and broke her glasses.

The "Bird Boy" of Bldg. 6-3, Herb Grueb, certainly doesn't have to worry about violating the Music Union's rule which prohibits the playing of modern pieces. For one thing the newest piece included in his repertoire is "Jingle Bells" and even if he did know a new one you wouldn't be able to recognize it.

Bldg. 4-4

We wonder why Maggie Lepper was nicknamed "Rabbit". Could it be the way she leaps when she bowls? . . . Mary Ellen Butler goes all the way to Van Wert, Ohio to test the horn on her car. She didn't honk it very long before she found out that it was in good condition. For further details, see Mary Ellen . . . Dear, dear, what next! The girls in Bldg. 4-4 have picked a new fad of wearing their skirts shifted 90 degrees to the left. Could it be the L.H.S. wall mounting motors that started this? . . . We have a Frank Buck in the making on our floor. Virgil Snyder has caught and tamed a ferocious animal. He keeps it carefully caged and always feeds it at 7:45 every evening. The animal? Oh! just a wee mouse . . . The great indoor sport of the second shift is playing tit-tat-toe. For further details, see Chauncey Tucker. He of the great laugh . . . Boys will be boys won't they? Madge Thompson bought her husband an electric train for Christmas. And do they have fun. . . . There is a yawning contest going on between the assemblers and the connectors. One side starts it and the other side unwittingly follows suit. "Doc" Coon and "Gappy" Stucky are the captains of their respective teams and really lead the field.

Tribute To A Champion

Charlie Marshal of Bldg. 19-5 automatics,
Is just full of doubtful static,
He clinched the 1940 trophy
For things he says are so goofy
But don't stop with your line
A good laugh makes us feel fine
Your home grown strawberries on New Years
Your corn of three foot ears
And Charlie 1941 is another trophy year.

We dislike very much to chronicle this, especially after Henry Lojek received such a build-up as a fire eater some weeks ago. At any rate it is reported that Wally Clayton and Ossie Lacerte were having a heated discussion at Ossie's desk when the odor of burning cloth was noticed. No one was alarmed for Henry was nearby. Finally, with no Henry appearing on the scene, Wally yanked open a desk drawer and extinguished a burning dust cloth. In the meanwhile Henry worked on in tranquil ignorance of a lost opportunity.

Floyd Mutton, Bldg. 19-3, is cherishing a little "pickaninny." It came all the way from Florida and we hope Floyd will give it a good home.

No wonder Carl Borchert, Bldg. 16-3, is wearing such a broad smile these days—the way the reports are flying in about the lakes being frozen over.

Dear Editor

Dear Editor:

You caught on a week before I thought you would, and we would suggest that we post enlarged photographs of "The Sneeze" all over the joint as a super-propaganda campaign against the common enemy.

In addition, let the picture bear Dr. Garton's recommendations for a healthy office temperature to settle once and for all the question of whether man should wear less or women more to keep goose pimples on gooses, and perspiration in the gymnasium. In addition to the addition, provide an accurate thermometer for every office.

Respectfully yours, with a code in my hed started by a germ generator in an eighty degree office incubator.

Small Boon.

Dear Small Boon:

The editor should award you the 1941 prize of something or other for including the most suggestions and requests in the fewest lines. Surrounded as you apparently are by germ generators, and dispensers, and subjected to office temperature at least ten degrees too high, this writer feels that your crusade is a just one, and hopes that all your requests will be granted.

Anon.

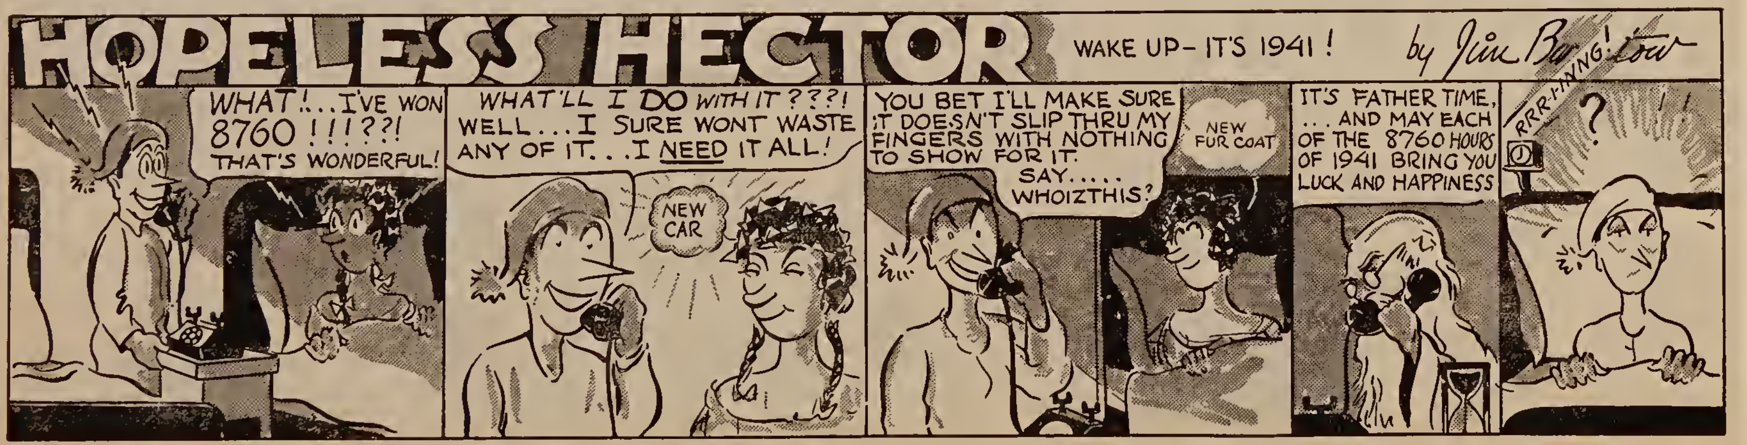
Some of the girls in Bldg. 4-3 are wondering who their secret admirer was when they received Christmas greetings with no name signed. Perhaps Fern Gilliland, Bldg. 4-3, could solve the problem. She admits she forgot to sign her name to hers.

We will have to retract that statement made a year ago in this paper in which we referred to Geo. Cooper, Bldg. 4-3, as being just a Teddy Bear because he did not enter the water with the other Polar Bears during their annual New Year's day swim. Well, your reporter witnessed this year's swim, and George was right there with all of the "Big Growls" cavorting in the icy waters. George reminded one of a sportive otter the way he cut capers in the icy drink.

Deaths

Charles F. Braun, 2604 Oliver Street, employed in Bldg. 4-4, died at the Lutheran Hospital following a week's illness. Funeral services were held last Saturday at the home and the Zion Lutheran Church with burial in the Greenlawn Memorial Cemetery. Mr. Braun had a service record of twenty-six years and was a member of the Quarter Century Club.

The Essig family wish to thank their many friends for the flowers for their mother who died December 18th.



HOPELESS HECTOR
WAKE UP– IT'S 1941 !
WHAT!...I'VE WON 8760 !!!??! THAT'S WONDERFUL!
WHAT'LL I DO WITH IT ???! WELL...I SURE WONT WASTE ANY OF IT...I NEED IT ALL!
NEW CAR
YOU BET I'LL MAKE SURE IT DOESN'T SLIP THRU MY FINGERS WITH NOTHING TO SHOW FOR IT. SAY..... WHOIZTHIS?
NEW FUR COAT
IT'S FATHER TIME, ...AND MAY EACH OF THE 8760 HOURS OF 1941 BRING YOU LUCK AND HAPPINESS
RRR-I-NNG!
?

Don't Miss The G-E Appliance Preview January 15-16

Appliance Preview

(Continued from Page 4)

drain for the careless user who pours in liquid without first inserting the cooker itself.

Beneath the surface units and underneath the cooking top of the new ranges is a protective lead channel, extending from the front to the back switchboard, and which is front serviceable. The direct-flow no-stain vent, of solid brass, has a leak-proof asbestos gasket, and the drip trough delivers condensation to the drip tray, keeping both walls and floor clean.

Drawers on the new ranges have invisible lock-stops, can be readily withdrawn without disturbing drawer contents, and glide on pre-lubricated terne plate steel guides. On an inside panel, below the surface units, is a surface cookery chart, while the porcelain drip tray contains permanent fired-in oven instructions.

Oven insulation has been increased to a point where baking efficiency has been improved and heat losses reduced by as much as 13 per cent. All ovens are 16 inches wide, 15 inches high, and a full 20 inches deep. Oven terminal blocks are front-serviceable, and oven doors are counterbalanced with a broiling stop. The fit between the oven door top and the oven lining is held to within ten-thousandths of an inch, and is the closest fit ever accomplished between two porcelain-enameled surfaces.

Consumer demand for a larger broiler pan and rack has resulted in a pan having 30 per cent greater area, permitting the broiling of two good steaks or 20 lamb chops at once. The pan is a full two inches deep, has ears for lifting, and the rack overhangs the pan for easy removal. Slotted perforations in the rack keep small foods from dropping into the pan. For the larger pan and rack a new broiler unit was also designed, with an aluminized baffle sheet. The unit consists of twin coils assembled to reflectors to increase broiling intensities and insure uniformity of operation. The "speed broil", with both units on for large quantities of foods and using the full area, is 48 per cent faster than in previous units, while the "slow" broil, using only the center unit, is 25 per cent faster, and can be used for small quantities.

The new oven units have staggered terminals for easy entrance into the terminal block, assuring contact because the units will not operate unless pushed in all the way. In all but top models of the new line, Calrod units are used in the lower oven position and open coil units in the top, while in the top models all oven units are Calrod. The Calrod oven units have been redesigned also and increased in size to improve heat distribution under all kinds of loads. A new porcelain enamel baffle is employed, and the units have glass-sealed terminals which are sturdy, safe, easily cleaned, and immersible. There are four oven switch positions—preheat 4000 watts; bake 2800 watts; broil; and off. Baking has been simplified with but one position, the 2800 watts of scientifically distributed heat assuring uniform browning of all quantities of baked goods, an outstanding engineering achievement.

Minute-chimes and timers have been built into certain of the new models, instead of being available only as accessories. A new 7-quart thrift cooker for de luxe models employs an oven temperature cut-off and a Calrod unit, making for the first all-Calrod ranges ever produced, while the Calrod broiler unit and Tel-a-Cook lights for switches are additional features.

Three Graduated From Apprentice School

Max Goddard

Roy C. Weaver

Richard F. Wagoner

Three recent graduates of the Apprentice School of the Fort Wayne Works are Roy C. Weaver, Richard F. Wagoner and Max Goddard. Mr. Weaver, who completed the draftsman course is a graduate of Central High School, Mr. Wagoner, who completed the machinist-toolmaker course is a graduate of Huntington High School and Mr. Goddard, who also completed the machinist-toolmaker course is a graduate of South Side High School.

SCIENCE FORUM – by L. A. Hawkins

Q. What causes an echo?

A. An echo is simply a reflected sound wave. Sound travels in the form of waves in the air; and when these waves strike a solid wall, they are reflected back, just as water waves are reflected back from the edge of a swimming pool.

Q. Is there any danger of carbon monoxide gas in highway tunnels? Are these tunnels equipped with ventilating fans to carry off the exhaust fumes emanating from automobiles?

A. Highway tunnels, if they are long and carry heavy traffic, are equipped with huge supply and exhaust fans that are large enough so that the air in the tunnels can be completely changed every four minutes. For light traffic, ventilation is sometimes obtained by cutting the tunnel on a grade to give a chimney effect. Some heavy traffic tunnels are also equipped with instruments known as carbon monoxide recorders, which give a continuous indication of the amount of carbon monoxide gas in the tunnel at all times. Furthermore, they signal the operator long before the amount becomes dangerous. As an additional precaution, the operators of the tunnels are in communication with each other by radio at all times, in order that they can be forewarned of any unusual surges of traffic.

Q. How high and fast can a helicopter fly?

A. According to an aviation authority, "The helicopter can easily have an altitude performance up to 15,000 feet or more. The airplane will always be faster than the helicopter; say, five hundred miles an hour against a potential three hundred miles an hour for the rotating wing craft." However, the helicopter has an advantage because it is capable of taking off and landing vertically, and it can also hover in space, or stay poised in the air over any desired spot.

Q. Why do the eyes of certain animals shine when light falls on them?

A. The eyes shine because light is reflected from them, and not because they possess the ability to radiate light themselves. In the eyes of some animals, the amount reflected is small and hardly noticeable; but other animals, including the cat, have opposite the pupil an iridescent membrane called the tapetum. It is this which causes their eyes to shine so brightly when facing a bright light source like an automobile headlight.

Q. Can you give some directions for treating evergreen tree cones to burn in a fireplace to produce different colors when burned?

A. Dip the cones in a solution of:
Borax, for green.
Copper sulphate, for blue.
Strontium nitrate, for red.
Use ahout a pound to a gallon of water. Dip a couple of minutes and lay out to drain and dry.

Q. Is it true that the earth is being continuously bombarded by cosmic rays and if so, could these rays possibly have any effect on the length of human life?

A. Yes, the earth is being constantly bombarded by cosmic rays, but there is no evidence to indicate that they have any effect upon the length of human life. Cosmic rays are very penetrating and probably would not be absorbed by the body.

Q. Is there any material that will not transmit heat?

A. Strictly speaking, there is no material which will not transmit heat. Even a vacuum will transmit radiant heat, and any solid, liquid, or gas will conduct heat.

Q. What are sun spots?

A. Sun spots are gigantic tornadoes on the surface of the sun.

Parking Regulations Must Be Observed

The Plant Protection Department calls attention to the necessity of employees complying with parking lot regulations, made doubly important because of the greatly increased number of employees using the lots. At the present time approximately 1,200 cars are being parked daily on the Company lots.

Common violations that are causing great inconvenience are parking cars at an angle and parking in the driveways.

It Functioned In The Days Of Mack Sennett

Back in 1896, when Curtis was still working on the development of his turbine in the Schenectady Works, a G-E motor-generator set was sold in San Diego, California, for supplying power to elevator circuits. The set consisted of a 150-hp motor driving two 125-volt generators.

In 1914 the set was acquired by the Mack Sennett Studios. The 150-hp motor was removed, and a 200-hp motor was installed in its place.

In 1928 the present Republic Productions organization bought the set from the Mack Sennett group, and it was removed to its present site in North Hollywood. From 1928 to 1936 the set was operated on 50 cycles; the remainder of the time it was operated on '60 cycles, the only changes being in the shunt.

Paul Guerin, chief of the customer's electrical department, has been responsible for the performance of this equipment since it was acquired by Mack Sennett in 1914. From then until the present time, Mr. Guerin states, it would be safe to say that the outfit has operated ten hours a day continuously and that the set is in its original shape; i.e., it has the original commutators, bearings, etc., the only item to be replaced being the brushes.

Although each generator is rated 360 amperes, the set has been continuously carrying 1400 to 1500 amperes. This is why the larger motor was installed in 1914.

News Through Plants

(Continued from Page 6)

The girls of the night shift in the Small Lot Section, Bldg. 4-3, planned a New Year's surprise for Bessie Goins. They decorated her place of work with exquisite rolls of glistening copper wire and other bits of beautiful equipment necessary in the production of motors. Viola Grover loaned them an egg out of her dozen of prized country fresh eggs. They broke this egg into a glass, garnished it with crackers, and labeled it, "The start of a Tom & Jerry". Bessie failed to show up for work the next day and missed this beautiful spectacle, but John James furnished the fun by making off with said egg and consuming it.

Marjorie Hargraves, Bldg. 4-3, was seen the day before New Year's doing a combination tail spin and nose dive in the cafeteria with a tray loaded with food. She was greatly embarrassed, and said she slipped on some water.

Sam "Sweep 'Em off their Feet" Allmandinger, Bldg. 4-3, has a strange glint in his eye these days. We secretly learn that Sam is about to take the nuptial vows. If this keeps up, the Bachelor Club of Bldg. 4-3 will have to disband. One by one the old boys are falling before Cupid's onslaught.

The visitor to the village was talking to the oldest inhabitant.

"May I ask how old you are?" he said to the aged one.

"I be just one hundred."

"Really? Well, do you suppose you will see another hundred?"

"Well, I be stronger now than when I started on the first hundred."

Anyone wanting a real piece of he-man candy, just get in touch with Josephine Faulkner of Bldg. 4-3 as she just passes candy to all the girls but always misses ever giving a piece to the boys.

Mildred Schoolcraft, Bldg. 4-3, still writes 1940. Maybe she was too sleepy over in Ohio to know a new year had dawned.

Harry Parker, Bldg. 4-3, is getting to be quite a pharmacist these days, but still he does not know what a bottle of Vicks is for.

Ward Grim, Bldg. 4-3, is really some good cook. After inviting several of his friends over, he just served them a good bowl of cold soup.

George Collins, Bldg. 4-3, can give anyone any information they might want on "How to keep out of an Invasion." George says all you do is just stay clear of the spoils.

The girls in the Blank Armature section would like to know what that thing was that Peg Bowers, Bldg. 19-5, was wearing on her forehead last week. They would like to know whether it was a headlight, or what the well-dressed girl will wear this spring, or did something get caught in your hair?

Clarice Fyork, Bldg. 19-5, sure remembers things that happen a long, long time ago. Clarice said the day that George Washington was born she fell down and broke her arm. We didn't know you were that old Clarice.

The Just Us Club held a party at the home of Ina Smith. Following dinner the evening was spent at cards. Those present were Elsie Bucheisen, Kathryn Gallmeier, Margaret Doctors, Catherine Jones and the hostess.

Columbia City To Meet Club Team Wednesday Night

Fast Cage Quintet Will Meet Locals In Invitational Basketball Series

Heading the G-E Club's second week of invitational basketball will be a game between the Columbia City Merchants and the Industrial team which is scheduled for 8:30 o'clock Wednesday, January 15th, at the Club gym.

For their first taste of out-of-town competition the Industrial team has been matched with one of the best outfits within 50 miles of here. The Merchants enters a team, with the exceptions of one, which consists of former high school players all of whom were outstanding stars during their prep school days. Holding down one of the guard posts is Bud Lee, ex-performer from South Side and one of the cities high scorers during 1936. Teamed up with Lee will be Overdeir, Columbia City's best bucket baller for the last ten years and also a well-known figure to Fort Wayne fans as he always caused the local schools trouble. In the forward slots will be Schumacher and Herd, both graduates of Columbia City, while Williamson, a former professional with the Paterson, N. J. Panthers will handle the center slot.

So far this season this club has maintained a scoring average in twenty games of forty-five points which certainly indicates that they must play a fast break type of game which is most thrilling for fans to see. Out of the twenty contests played this season they have won sixteen, consequently the G-E outfit will have all they can handle to win this one although they have added Handley, Central player, and Vanderhaar, prominent independent star to their roster, in anticipation of trouble.

In the preliminary starting one hour earlier Small Motor Factory will take on the Ranger A. C. Both teams consist of youthful players consequently action should be fast and furious.

There is no charge made to see these games and anyone may attend whether a G-E Club member or not.

Attachment Plugs Given New "Hold Tight" Virtues

General Electric has built an "anchor" into attachment plugs to promote closer relations between convenience outlets and cords. A new "Anchor Loop" contact prong, with all the virtues the name implies, has been announced by the G-E construction materials division in Bridgeport, Conn. It's designed to increase holding power in both old and new convenience outlets without distortion of outlet contacts. "Hold tight" is its motto.

The new prongs can be supplied on several types and sizes of General Electric molded-on, all-rubber attachment plugs. The prongs are designed to eliminate excessive stress on outlet contacts, and tests indicate that outlets retain their original ability to hold standard solid prongs after long use of plug caps with new "Anchor Loop" contacts.

Pin Boys Resplendent In New Uniforms

CLUB PIN BOY

No longer do G-E Club bowlers identify their pin boys by "brown sweater," or nondescript garments for all boys were recently furnished with uniform sweaters to be worn while at work on the alleys. The group is shown above resplendent in their new outfits

Color Television Looms As Possibility Of The Future

G. E. Scientist Gives Demonstration With Use Of Simple Equipment

Color television, using a standard type receiver with no additional equipment other than a revolving disk, has been demonstrated at Schenectady to members of the National Television Systems Committee by Dr. E. F. W. Alexanderson, consulting engineer of the General Electric Company. George Henry Payne, member of the Federal Communications Commission, was also present.

The demonstration was staged at Dr. Alexanderson's home, where he had installed a two-color 24-inch revolving disk about a foot in front of the picture end of the cathode ray tube of his standard type receiver. As this whirled about at 1,800 revolutions per minute, its transparent field of orange-red and greenish-blue reproduced the studio program in realistic colors. To do this, Dr. Alexanderson explained, a similar colored disk revolved before the iconoscope pick-up tube of the transmitter. Other than the two disks, everything was the same as with black-and-white television at both studio and receiver.

"In our early experiments we tried both two- and three-color disks," Dr. Alexanderson said. "With two colors and a speed of 1,800 r.p.m. of the disk, the same color succeeded itself 30 times per second. With three colors, they succeeded each other 20 times per second, producing a color flicker. So that is why we decided upon the two colors for the present. We found it did not detract much from the three-color picture. This gives very good results without flicker, and we feel it is most practical with standard commercial receivers."

The demonstration is still of a developmental nature, and General Electric has no plans for introducing color to its television programs for the present.

Prominent among members of the committee which attended the demonstration was Dr. R. C. Goldmark, in charge of television engineering for the Columbia Broadcasting System which is also interested in adding color to its programs. While in Schenectady the members of the NTSC visited General Electric's television and new FM stations in the Helderbergs and, after the demonstration at Dr. Alexanderson's home, met with G-E scientists for a conference in the company's research laboratory.

ON -- the Alleys

By Bob Ringle

'Twas the night before New Year's and all through the house, not a creature was stirring, not even a, but wait, what's this object figure kneeling in reverence. Let's listen in, "I hereby promise not to make any splits, or cross the foul line during the coming year, also not to rant and tear my hair and yell, 'what's holding them up' when I don't get a strike." Ah yes, New Year's, a beautiful time of the year to make resolutions, but along comes Tuesday night and you hear a yell, "What's holding them up?" Overheard the morning after our little session: "If Lahmon would have worn that beautiful green shirt he wore to work Tuesday he might have gotten more pins. They probably would have fallen over from fright.

Tapping at the portals—Billings (hot as usual) 238; Rinehart (just a little cooler) 227; Roeger, 202; Ringle (that's me) 202; and Lomiller, also a 202.

SCHEDULE CHANGED

International Harvester will replace St. Paul in the 8:30 o'clock game tonight against the G. E. Industrials.

IN THE ROUGH

By WALTER SUNIER

If you have good golf clubs, you're egotistical and your clubs are better than your game.

If you have poor clubs, you're dumb, as how could anyone play with that junk.

If you talk a lot, you don't understand the etiquette of golf.

If you don't talk, you're a sourpuss.

If you win, you're poor at arithmetic.

If you don't win, you're a sucker and you had better learn how to play the game, and where were you last night?

If you talk a good game, you're bombastic and a liar.

If you say nothing about your game, you're concealing something just to warp someone on a bet.

If you swear and throw clubs, you're not fit to live with pigs.

If you don't swear and throw clubs, you are fit to live with pigs.

If you concede putts, you're a peach.

If you don't concede putts, you're an egg—(ancient.)

If you play too much, you're a golf nut and people run from you because you will talk golf.

If you play occasionally, you're no good and people run from you because they fear you will ask to play with them.

If you don't smoke while playing, you're a sissy.

If you do smoke while playing, you're liable to inhale a camel.

So what's the use—if you do or don't, you're a good soul or a bad heel.

«« It's a Joke »»

"Mandy," said that dusky woman's mistress, "I've heard about your hard luck. I'm terribly sorry."

"Deed, ma'am, Ah ain't had no hahd luck."

"But, your husband; wasn't he killed in an accident yesterday?"

"Yes, ma'am; but dats his hahd luck, not mine."

* * *

Mrs. Gadsby—I think that Mrs. Sedder is the meanest woman I know.

Gadsby—What's wrong with her?

Mrs. G.—I rode downtown with her this morning and I listened to her tell all about her operation. And when I started to tell about mine she got off the street car.

* * *

The teacher had written 92.7 on the blackboard, and, to show the effect of multiplying by 10, had rubbed out the decimal point.

"Now, Alfred," she said, "where is the decimal point?"

"On the duster," replied Alfred, without hesitation.

To Institute "No Badge No Admittance" Rule

Enforcement Will Go Into Effect March 3

Employees Forgetting Identification Buttons Will Be Required To Obtain Them In Order To Gain Admittance

In a statement made today, Works Manager M. E. Lord announced that starting on Monday, March 3 no regular employees of the Fort Wayne Works will be admitted on Company property without proper display of identification badges, and that all employees, without exception, who fail to have their badges with them will be required to obtain them before entering the plants.

This ruling is in accordance with the strict regulations made by the General Electric Company to protect the jobs of its employees and its property.

Mr. Lord's statement reads as follows:

"Beginning Monday, March 3 all employees of the Fort Wayne and Decatur Works will be required to present their identification badges before being admitted on Company property. Employees who do not have their badges with them will be required to obtain them before being admitted. This ruling supersedes the present arrangement whereby an employee who forgets his badge is issued a temporary badge. In cases where badges are lost, the losers will be required to report the loss at once and arrangements will be made for the issuance of a new badge.

"The badge identification system has been instituted for the benefit of both employees and the Company. Its main purpose is to prevent entrance to our plants of unauthorized persons—a situation which in years past created more or less of a problem.

"The beginning of hostilities abroad and the announcement of our own country's National Defense program has made the problem more acute in view of the fact that we are engaged in National Defense activities. Our contracts require us to restrict the areas where this equipment is built and tested, and to follow certain restrictions as to who shall work on National Defense equipment.

(Continued on Page 2)

Not A Bread Line — Just Another Meal

(Pictures on Page 3)

Most of us are familiar with the above scene, the beginning of the noon-day line-up in the Works Restaurant, but probably very few of us realize the extent of service rendered by the restaurant to Fort Wayne Works employees. This is brought home in a forceful manner when it is revealed that during 1940 not less than one hundred and eighty thousand meals were served during regular meal hours.

(Continued on Page 3)

$8,836 Paid Local Suggestors In 1940

Substantial Increase Shown In Number of Suggestions Submitted And Adopted During Past Year

A substantial increase in suggestions, not only in the total number but in the number per employment, was noted at the Fort Wayne Works during the past year over 1939. During the year a grand total of 3,537 suggestions were submitted by employees compared with 2,464 for 1939. The amount of the awards made during the year total $8,836 compared with $5,385, an even higher ratio than that of the number of suggestions submitted. The average award increased to 111 percent of 1939.

It is interesting to note that not only were more suggestions submitted last year than the year before but they also were of more practical value for of the suggestions acted upon a total of 1,280 were adopted compared with 873 in 1939.

In the matter of the number of suggestions adopted per the number of employees in the Division, the Wire and Insulation Division leads with 169.4 percent. Second place goes to the Specialty Motor Division with a percentage of 69.8 and third place to the General Purpose Fractional Horsepower Motor Division which had a percentage of 64.3.

(Continued on Page 2)

Additional Pension Plan Deductions

In accordance with the terms and provisions of the Additional Pension Plan, deductions are based on earnings. The deductions for the first half of 1941 will be based on the earnings for the last half of 1940. These deductions are now undergoing semi-annual revision and the revised rates will become effective with pay received on January 24, 1941.

Wallace Elected To MBA Office

T. L. Wallace, Bldg. 19-3, was elected general vice-chairman of the Mutual Benefit Association at a meeting of the Special Committee held this week. At the same time Sam Baumgartner, Bldg. 27 was named special signer. At an earlier meeting the various section chairmen elected the members of the Special Committee as follows: Ed Gebhart, Bldg. 4-5; Sam Baumgartner, Bldg. 27; Alvin Powell, Bldg. 19-4; E. Zollinger, Bldg. 17-4 and Clarence Hueber, Winter Street.

Elex Holds Splash Party At Y.W.C.A

A "splash" party for Elex members working on the second shift will be held on Monday, January 20 at the Y. W. C. A. Swimming will be from 11:00 to 12:00 a.m. following which the girls will attend a luncheon. Tickets will be 50 cents and reservations will close this afternoon.

The committee in charge includes Ruth Laney, chairman; Marie Louden, Mazie Greek, Molly Shupe, Sue Cameron, Helen Wagoner and Irene Forest. Those attending will meet at the Y. W.

G-E To Construct Most Complete Television Unit

Building Of Ultra Modern Station Is Under Way In Schenectady

Construction has been started on General Electric's new television station W2XB to be located in the old Edison club hall on Washington Ave. at the Western Gateway Bridge in Schenectady. Remodeling of the structure to accommodate the station's new equipment is now in progress. As soon as the necessary physical changes have been completed, installation of equipment will begin and it is hoped that the station will be in operation by late spring or early summer.

When completed the station will be the most complete unit of its kind

• You Must Wear It

"Must" is a strong word, and to most of us its use is more or less like thrusting a red flag under the nose of a bull. However, there are instances where the word is necessary, and we are confronted with just such an instance in the matter of wearing our identification badges. This is definitely a "must".

An article, starting on the front page of this issue of the WORKS NEWS carries a statement by our Works manager setting forth a ruling that after Monday, March 3, no employee, regardless of position, will be admitted to our Works unless he wears his identification badge. The statement also clearly outlines why such a ruling is necessary, and it is obvious therefrom that our badge identification system is not a "crank" idea but has a definite and serious purpose.

Appreciating the purpose of the system there is not a single employee in our organization who can conscientiously ignore the call for co-operation. Therefore let's all for once and for all, co-operate and thereby save unnecessary loss of time and annoyance in arriving at our daily work, as well as comply with the requirements of the system.

• Sentenced To Death

Suppose, that after a day's hard driving, you sat down at night with your favorite newspaper, and the first headline that caught your eye was one which showed that a certain driver had been sentenced to death for careless driving. Such a headline would arouse strong indignation. The punishment would seem all out of proportion to the deed.

But—have you ever stopped to realize that there are thousands of people who sentence themselves, and others, to death every year because of the careless operation of their motor vehicles? A little mistake, or a slight miscalculation is made, which is paid for with a life.

This is a horrible penalty to pay for a moment's inattention, for trying to save a few minutes with unsafe speed, or for driving a car or truck not in good mechanical condition. There is no good reason why any penalty should be paid for such reasons. The rules of the road, the rules of safety, are simple and easily carried out. One must know them to get a driver's license, and a good driver can usually avoid an accident even when the recklessness of the other fellow makes it seem almost inevitable.—*Bridgeport Works News.*

"Sympathy is a thing to be encouraged apart from humane considerations, because it supplies us with the materials for wisdom."—*R. L. Stevenson.*

• The Superior Man

As a general proposition, the value of a man to society is in proportion to his ability to work with other men.

He should be willing to give and take.

He should be slow to anger, patient in spirit, and not quick to give or take offense. He should have faith in Nemesis, and have no time to act as her agent. Superiority is shown in this one thing—the ability to meet and mix with those of different temperaments and tastes, high or low, on a basis of equality. A man should be at home in any society.

To be frank, open and full of good cheer, keeping a civil tongue; to refrain from interfering in affairs that are none of his; and to know that personal difficulties usually right themselves if left alone; these mark the superior man.

Elbert Hubbard.

Given Recognition By Monogram

C. W. Kronmiller

Among four General Electric men honored in the current issue of the G-E Monogram on the page devoted to Company engineers whose achievements merit recognition is C. W. Kronmiller, of the Fort Wayne Works Specialty Transformer Engineering Department. The Monogram carried the above picture with the notation that Mr. Kronmiller has made outstanding contributions in the development and design of the complete line of ballasts used with the new fluorescent Mazda lamps.

Mr. Kronmiller graduated from Purdue in 1927 in electrical engineering and joined the Fort Wayne Works organization immediately thereafter. After three months in transformer test he was transferred to the engineering department. Since 1934 he has been associated with the design and development of transformers for use with mercury vapor lamps and with auxiliaries for operating fluorescent lamps. Mr. and Mrs. Kronmiller reside at 1119 Nuttman Avenue.

FIT HIS CHURN

With our extensive activities in the manufacture of fractional horsepower motors, the following letter to the General Electric Company published in the G-E Monogram is of particular interest to Fort Wayne Works employees!

"The City Councilmen of West Point, Ga., during the summer of 1914 gave this (a G-E) fan to the Hon. John T. Johnson, who was at that time mayor of the city. Later Mr. Johnson . . . went to France and died in service over there. The fan remained in the city office until 1930, giving perfect service each year. A son of the late Mr. Johnson was informed that the fan belonged to his father, and the city graciously offered it to him. He placed the fan in his office at his drug store during the summer of 1930, and it ran almost day and night until this present spring, and I offered him a very nice little fan in exchange for this one, realizing that the motor would exactly fit my connections for my churn. This motor has given perfect satisfaction until recently it became sluggish, so I wrote the Fort Wayne Works making inquiry. And during the interval of letters, I took the motor to a young mechanic, and he fiddled around and cleaned it up, charging me 50 cents. I have a three-gallon churning every day, and this motor does the work in about 20 minutes. . . ."

A. D. F.

Suggestions Paid

(Continued from Page 1)

All but three Divisions showed increases in the number of suggestions submitted per employment.

The largest award for the year, amounting to $225.00 was made to Elias M. Lichtenstinger, of the Decatur Works.

The percentage of suggestions adopted and the total number submitted in each Division during 1940 were as follows:

	Adopted	Submitted
Tool	56.3	65
Specialty Motor	44.1	367
Motor-Generator	43.8	275
Decatur	43.3	112
Plastics	39.5	73
Refrigeration	37.4	198
General Purpose	37.2	1,530
Wire-Insulation	36.6	205
General Service	36.1	159
Distrihution	35.9	43
Transformer	33.3	343
Total Works	36.8	3,537

G-E CLUB DANCE

Dancing with Pete Dannecker's band providing the music will be enjoyed Saturday night at the Club from 9 to 12 o'clock. Prices remain at 20 cents before six o'clock Saturday and 30 cents afterward.

Volume Of Business Greatest In History

Identification

(Continued from Page 1)

"Therefore setting up a system of recognizing employees is a necessary step toward meeting the government's stricter requirements of secrecy. The badge system is the result.

"It is to be distinctly understood that there are to be no exceptions to the ruling 'no badge, no admittance'. It is to apply to members of every branch of our organization including, of course, the management.

"I fully appreciate that the successful operation of the identification plan requires the co-operation of all employees, and I am asking for this co-operation. Further, if you notice anyone wandering through your department or the plant without a badge or a visitor's pass, or with a badge that indicates he's out of place, call the matter to the attention of your foreman or supervisor at once."

Elex Bowlers Plan Chicken Fry Monday

Members of the Monday and Friday nights, Elex bowling league will have a chicken fry at the Bungalow Inn on next Monday evening, January 20. Tickets are 50 cents and reservations must be made with the league secretaries not later than today. There will be a short business session and prizes will be awarded.

The committee in charge includes Helen Dammeyer, Hazel Sommers, Vera Berning, Louise Schwartz and Velma Kruse.

Orders For 1940 Over Previous Year Show Increase Of 81 Percent

Orders received by General Electric Company during the year 1940 amounted to $654,190,000 compared with $360,748,000 for 1939, an increase of 81 per cent, it is announced by President Charles E. Wilson.

Orders covering equipment for National Defense purposes amounted to approximately $250,000,000, with the result that the total volume of business in 1940 was greater than that for any other year in the Company's history.

In the final quarter of 1940, orders received reached the all-time record three-months' total of $256,380,000 compared with $112,166,000 for the same quarter of 1939, an increase of 129 per cent.

By quarters, the orders received in 1940 and 1939 are shown in the following table:

	Orders Received		
	1940	1939	Per Cent Increase
1st Qr.	$ 97,490,000	$ 86,883,000	12%
2nd Qr.	115,163,000	82,189,000	40
3rd Qr.	185,157,000	79,510,000	133
4th Qr.	256,380,000	112,166,000	129
Year	$654,190,000	$360,748,000	81%

The results of the Company's financial operations for the year 1940 will not be available until the latter part of March.

G-E Night

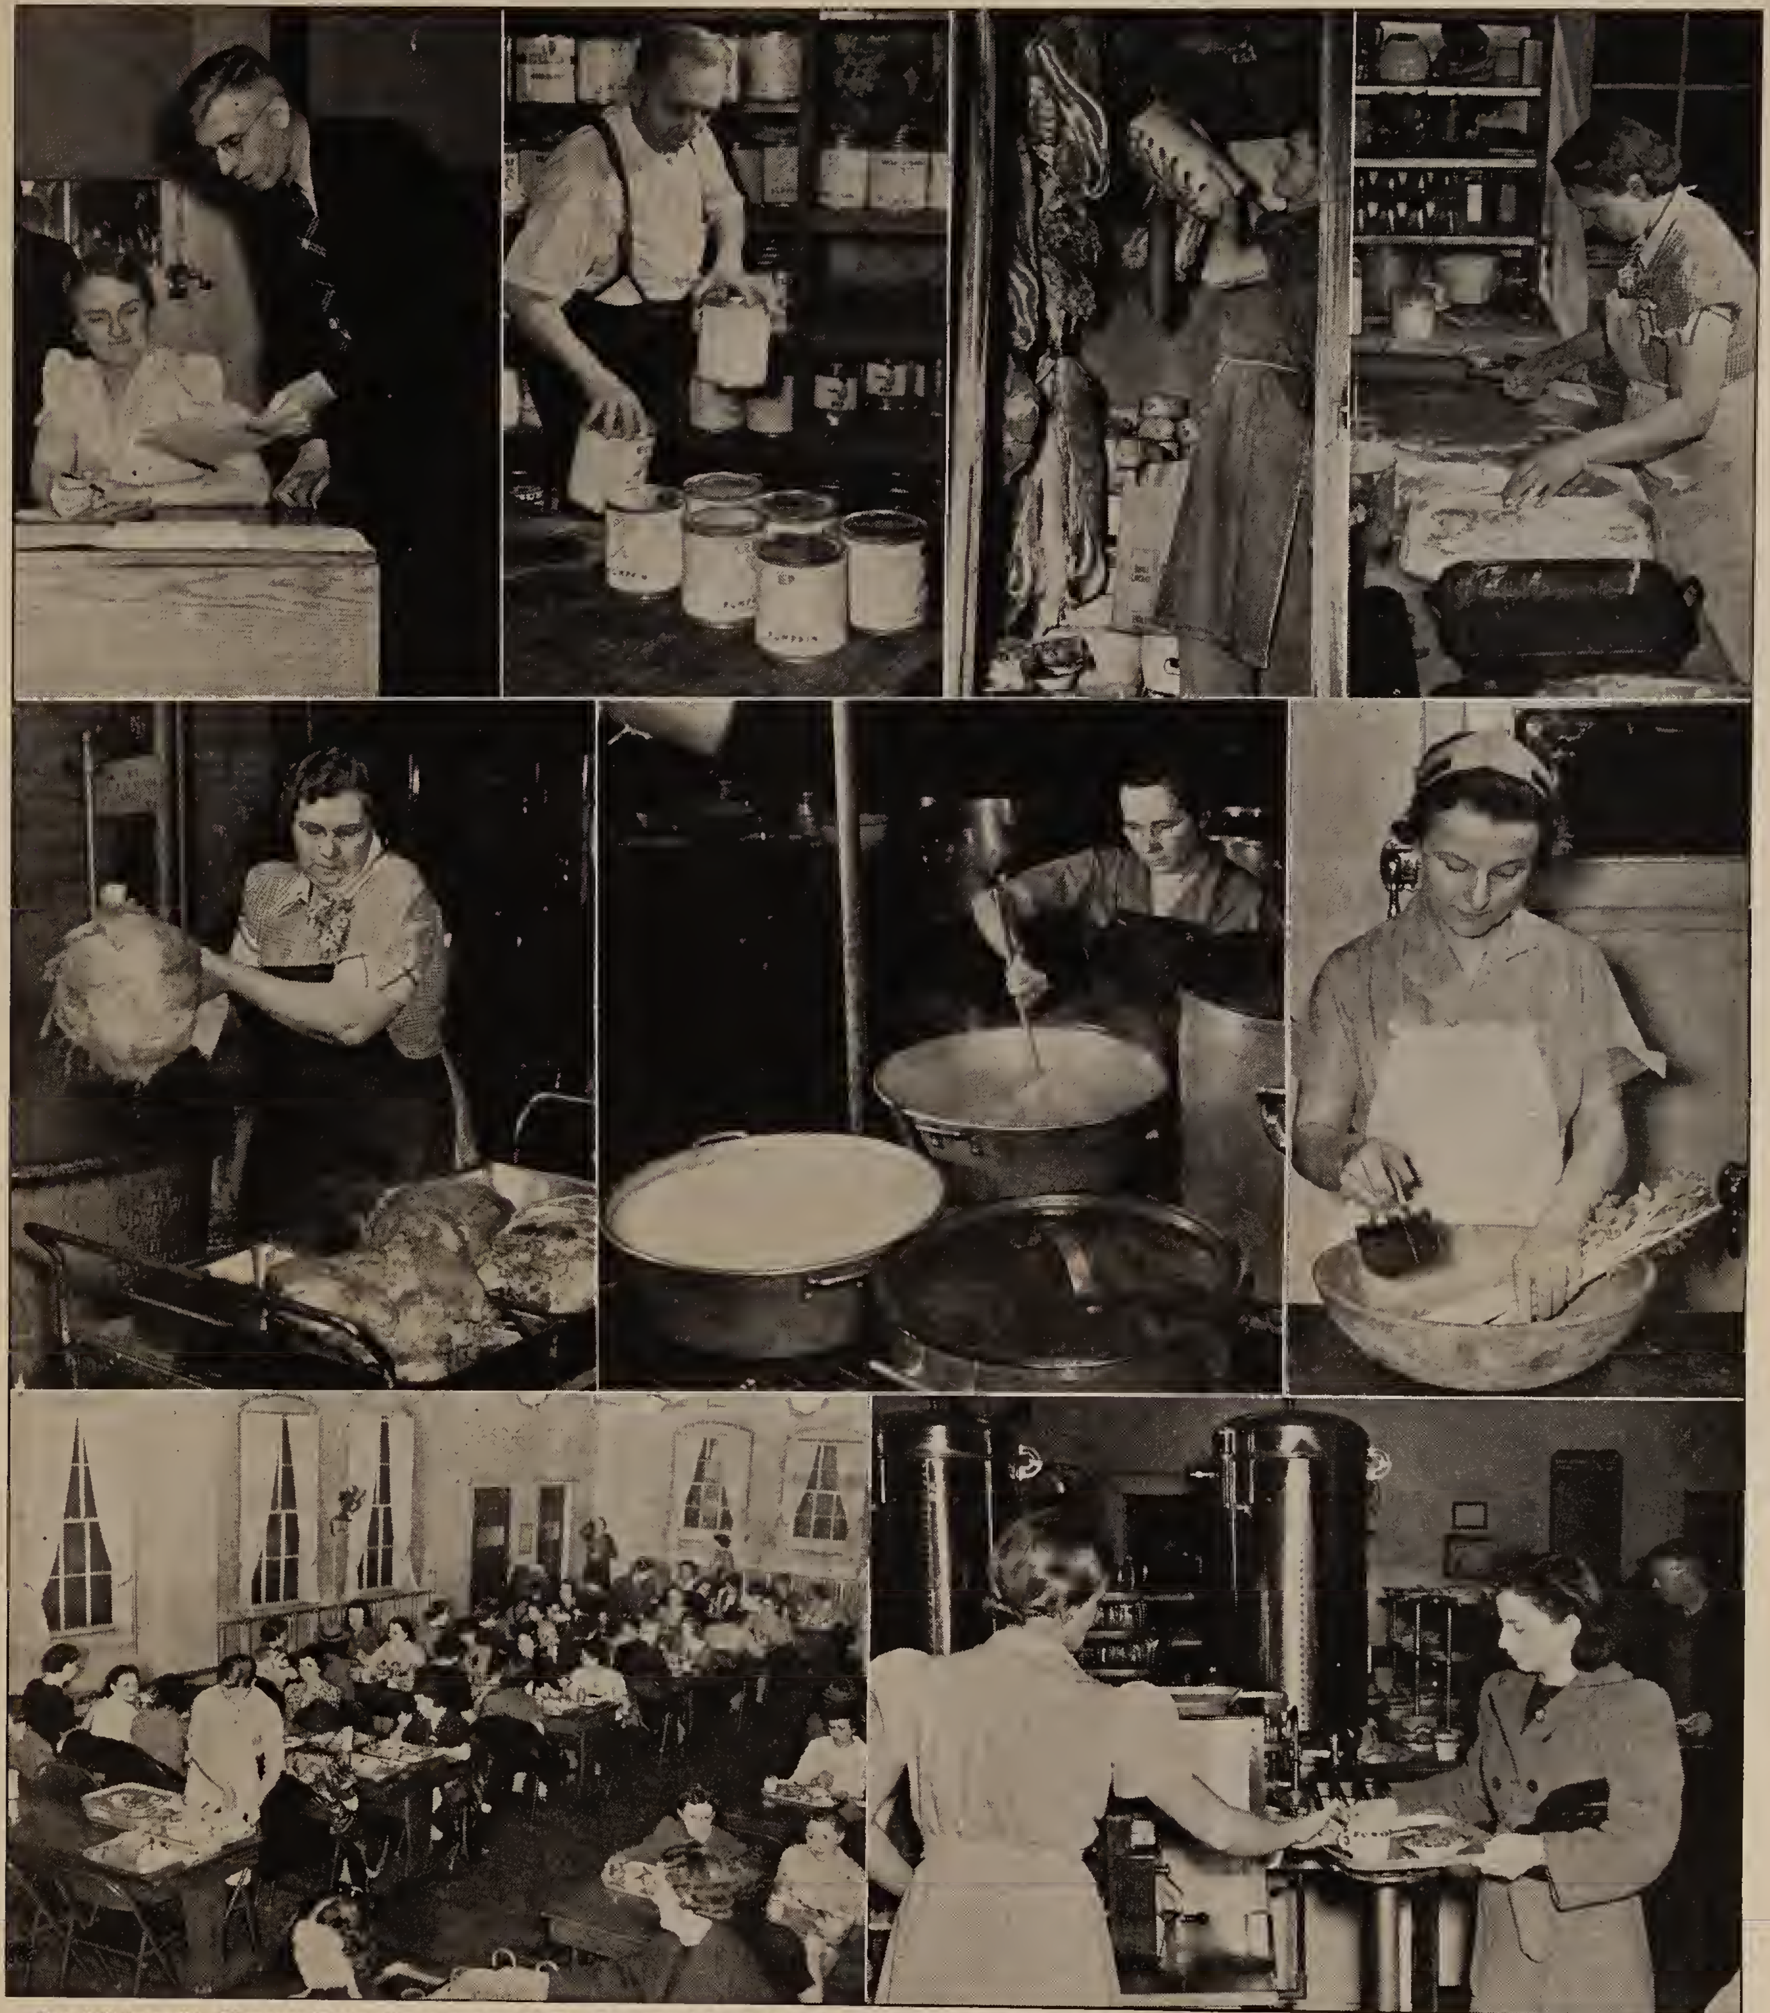
(Continued from Page 1)

Chapter of the National Association of Cost Accountants. Mr. Farrar will speak on "Accounting for National Defense Projects."

The meeting is designated as General Electric Night and a special feature will be a display of General Electric products and the showing of a G-E motion picture entitled "World's Largest Electrical Workshop." The meeting will be held on January 21 at the Chamber of Commerce and will be preceded at 6:30 o'clock with a dinner.

Wear Your Badge — — Remember Its Significance

• Works Restaurant Serves Thousands Of Employees •



Top, left to right—Manager Harry Zimmerman and Eva Lynn, assistant, plan the days menu; Chris Koble unpacking and arranging a supply of canned goods in the commissary department; Brooks Marble placing meat in the coolers where thousands of pounds are stored each year; Loretta Bloom, pastry cook, preparing a batch of doughnuts. Second row, left to right—Amy Whitley, chief cook, removing hams averaging twenty pounds each from the huge caldrons; Violet Anacher, assistant cook, busy in the preparation of rice and chop suey; Nettie Bruer, salad cook, starts her days work of preparing hundreds of salads. Lower left, a view of the south dining room during the noon hour. Lower right, a fair patron receives her check from Miss Lynn. In addition to the regular staff extra help is employed during meal times.

(Continued from Page 1)

In addition more than 200,000 sandwiches were dispensed and hundreds of meals served at dinner meetings of various Works organizations. Despite the heavy patronage at meal times the excellent facilities of the restaurant prevent any unreasonable waiting period for its patrons. A staff of thirty-five people are on duty during meal times and employees are served at a rate of between six and seven a minute at each serving table, making approximately six hundred servings in thirty minutes.

Serving such a huge family the commissary department is necessarily maintained on a wholesale scale and the well-stocked shelves

NEWS THROUGH THE PLANTS

"Cousin Sandy" said Colin the other day, "Y'eve been mighty generous to me (for a Scotsman) and just to show ye how I appreciate it, I'm going tae give ye a special treat. I'm going tae take ye to a swell show at the Shrine."

Well now Cousin Colin, that's very magnonomus of you. What show is it, 'Hellzapoppin'?' I asked, wondering how he could be getting free passes to that show.

"No, Sandy, 'tis a bigger show, and one that ye'll remember longer than that one, and I'll give ye just one guess as to what it is."

Now, Colin's motto has always been, "The best things in life are FREE," so I was pretty sure he had in mind the big General Electric Appliance Preview.

Well, it was, and we went yesterday. What a show! Hoot Mon, I believe his motto still holds.

We were especially interested in the Disposall unit (electric pig to you) because it is Fort Wayne born and bred. It's something we've done right here at home.

Colin seemed just as proud of it as if he'd had something to do with it personally, and maybe he had for all I know.

"Colin," I said, "Do you know that the cost of this little device is only a third of what it was a few years ago when it was started?"

"Now ye are talking my language, Sandy," he said. "If we could reduce it that much, don't ye think we'll go right on reducing it still more?"

"Why yes," I said, "Just a few more bucks off of the price and lots of people can afford it that think they can't now. That means thousands where we build hundreds now. That means really big business, and lots more labor than now. Why, some day even I have hopes of owning one of them myself."

"Well, Sandy, I don't know," Colin said, "Ye might, but I'm thinking ye'll nae be satisfied ontill ye can have them rig it up tae grind your sausage, mash your potatoes, and shred your home-grown tobacco for your home-made cigarettes, without having tae run down tae the corner manhole to catch the output."

Our G-E Band enthusiast, Otto Meyer, Bldg. 26-5, commenting upon the WGL broadcast, says—"It sure was a swell concert, even with Pete Dannecker to Glenn Miller playing in it, etc., etc."

Back to work again is our Rotor Die mainstay, Gordon McDougal. Greetings, Mac, from the boys of Bldg. 26-5.

The newest idea in spelling is "donit" for donut and it's all Lillian David's (Bldg. 26-5) idea.

The girls of Aircraft, Bldg. 26-5, would like to know whether Gordon Diver found his whistle in a box of crackerjack or whether it's a product of years of hard labor.

Deaths

Louis R. Ormiston wishes to thank the employees of the Transformer and Tool Divisions for their kindness, sympathy, and the beautiful floral offerings sent in his bereavement.

We wish to extend our sympathy to George Houser, Bldg. 26-5, in the death of his sister.

Punch Press 19-5

By Slug

We were all set to start the year out with a mammoth review of 1940. In fact we were up to October but the best we could dig up for that month was "Man looses mind. Searches parking lot for car left at home." Now a fellow can't write a thing like that about his boss, so we just decided to call the review off. . . . Three of our most worthy notables, namely Arlie Pence, John Figley and Ward Staley were homeward bound, and completely engrossed in sprightly conversation. It is to be admitted that when they neared Fairfield Avenue they stopped, looked and listened, and then proceeded. They had, however, overlooked a minor detail in the form of a boy on a bicycle. The kid on the drivers seat saw the jig was up, set his teeth, closed his eyes and made a perfect strike. Arlie, John and Ward and the bicycle tangled. Now, 'tis said, Figley and Staley claim they were not hit by the bicycle but that Pence was the man hit and that refusing to fall alone, he calmly knocked down his two pals for company. . . . Our honorary four star award for the year goes to Mrs. Griffith on her cake baking. The cake she baked and presented to the gang in token of their wisdom and foresight in not tearing her house down was indeed a masterpiece. Walter portioned it out with a hungry look, and we don't believe he got a bite for the rush quickly developed into a stampede. . . . George Louthan had the look of a man who is utterly dejected the other morning. Inquiries were made and it was discovered that he had indeed experienced a tragedy—he rang in late for the first time in 19 years. Under the circumstances we will pretend it never happened George so keep up the good work.

19-4 Spot Jottings

Ed Cade, Bldg. 19-4, was pleasantly surprised by his fellow workers last week when presented with a beautiful Kresge Special watch with a non-breakable crystal. Ed came to work Friday morning carrying his old Swiss stop watch in a paper sack and said he had enough pieces to make two watches.

Recalling his boyhood days in Peru, Ind., he made his way to the ice rink at Franke Park on the night before, and apparently Ed and the ice met with considerable impact, with the watch in between. When asked why he was carrying his watch in his hip pocket he said he did not light that way.

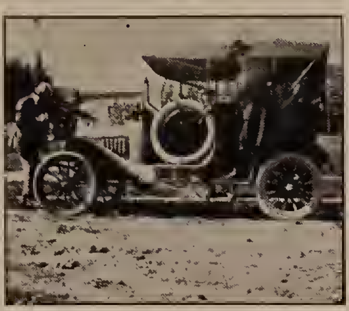
The new watch has a lapel chain and will be secure so long as Ed doesn't light on his chest.

Helen Muehlmeyer, expecting the boy friend, and hearing a noise rushed down to open the door—found it was only the pet nanny goat eating the shrubbery. Life is just full of disappointments.

Rumor has it that Rachel Luellen, Bldg. 19-1, came limping into work the other morning and reported she had visited the doctor but gave no explanation. It so happens the family had moved some furniture around and in the hurry of completing their labors, forgot to place the slats in Rachel's bed.

Harold Bowker, Bldg. 4-3, was seen down town looking in the store windows of Palm Beach display. We are wondering if he was interested in going down south, or what was underneath the big straw hat.

Young Lochinvar



What a thrill Mrs. Clarence Amones must have had when Clarence came a courtin'. The high-powered vehicle shown above certainly put the horse and buggy to shame. We don't know why Clarence is standing on the side unless it is to test out the three inch tires.

Borings From 4-4 Office

Here we find, once again, your ace traveling reporter on the job with Walter Holloway and Frederick Wilcox, and will bring you the latest happenings of the day. . . . Once again Bldg. 4-4 Office introduces a new girl, another Marge. However, her name is Marjorie Brown. And Emmy Stock once said, "And there can only be one Marge." Ah, he's wrong. But I'll bet my last cent (if I had one) that there will never be another Elmer, the field mouse. . . . Esther Allar has been caught unaware by the flu (or it caught her). Here's hoping for her quick recovery. . . . And we also miss our own Doris Remmy Roe who also has the flu. Me thinks I'm getting it too. . . . Mike Brayer received a suggestion the other day without a name. You have probably all heard of a "Man Without a Country," well this is a suggestion without a name. However, after much searching and re-searching, Mike found the guilty critter. It was none other than my friendly competitor, Ivan Butler. . . . Lillian Magner is going to toss a party in honor of Mary Kay Bangert and Ardeth Hemp tonight. Of course, we men are not invited, So Mike O'Grady and I are going to sneak up on them just about the time for them to serve the lunch. . . . Different people in the office miss our dry cleaning establishment. Thus far we haven't had any applicants for the position left vacant by Mr. Lisle Hodell. . . . Betty Mougin went up town last Saturday to a beauty shop to make herself alluring. The beauty operator had shoveled all the mud on her face, when in walked LaVon Price. The stuff was dry and Betty couldn't answer any of the fast remarks that were tossed by LaVon. Now she knows when she has a chance to get even, when LaVon has her appointment to get beautiful. (I'll just stick to baths in pure milk and cheese). . . . Ardeth Hemp got a new pooch to keep watch over her 40 acre ranch. A Great Dame I'll let you know. Pardon me, I mean a Great Dane. Well, it's some dog, and it has so many characteristics of the Hemp. 'Tis enough for now, I remain.

Sincerely as ever,
Elmer, the Field Mouse.
(The Rat to You).

Ann White, Bldg. 26-5, is still confined to her home with influenza but hopes to be back soon.

Dorothy Zeigler, Bldg. 4-3, is wondering if she is so little that people can't see her. She tells us Byrl Miller and Marcel Gaut are always stepping on her feet.

Shorts From 6-B

From the evidence the writer has on hand, Wilma Kress' offer to trade off her second hand memory a few weeks ago was "no sale" since the other morning she drove her new Chevrolet to work, left it in the parking lot with the headlights on and the doors locked so no one could get to the switch to turn them off. The result was that at 5 o'clock her battery was as dead as the proverbial mackerel. Cliff (Good Deed Doty) Hosier did the "Walter Raleigh" and pushed her all the way home, entered his "that's that for today" in his deed book and called it a day. The next morning his radiator was leaking and our assumption is that he made a "New Year's Resolution" of some sort right there. We suggest, Wilma, that you buy a "Crosley" and then if anything goes wrong you can pick it up, put it under your arm and carry it home.

George Coplen's tournament bowling scores last week looked like "Lefty" Gomez' batting average the last three years. 127, 139, 141, or something like that. George said the ball weighed 47½ lbs.

If someone of a mercenary nature would drop a tent over that seven-handed checker game in Bldg. 4-B every noon and charge admission, he should realize a neat sum on his investment.

"Clyde Beatty" Renbarger had a tigress in its cage on exhibition last Monday. The large crowd that gathered remembered the slogan that "the female of the species is more deadly than the male" and kept a safe distance from the bars. Dorothy is not a very ferocious name for a tiger.

Thisa And Thata 19-5

Edna Harkenrider went to the butcher shop and bought a collection of meats. Thinking the butcher had wrapped them all in one bundle she picked it up and started for the cashier. Just as she was nearing the booth the butcher yelled "Lady you forgot one of your packages." Said Edna, "What's in it." "Why," replied the butcher, "Your liver, heart and brains." We cannot believe that Edna carries 'em around in a package.

Edith Shriener is a patient at the St. Joseph's hospital and Gretchen Webb at the Lutheran hospital. A speedy recovery girls.

It looks as if Orta Whysong has fallen hard for J. J. Curtin. At any rate just as Mr. Curtin was leaving the office Orta made a beautiful dive from her chair. The landing was perfect and Orta escaped broken bones and the usual "cuts and bruises."

Gloom and despair will descend on Bldg. 6-3 Monday as that perpetual ray of sunshine and dispeller of bad humor, Ruth Bormuth, has decided to quit being a "woiking goil." When anyone needed a little pepping up or to get a laugh out of a "corny joke" they always talked to Ruth which in itself is quite a job. The best of luck, Ruth, we'll miss you and some other people are going to miss you more than they realize right now.

Tom Dent of Bldg. 6-1 is without a doubt a modern "Jekyll and Hyde." Around the office he is a quiet, hard working industrious man but at a party he is what is commonly called "the life."

Helen Schoppman and Loretta Wyneken, Bldg. 4-2, need some football padding when they go ice skating. Both are black and blue from head to foot. They were trying Sonia Henie technique.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

When we were very young we spent or rather wasted much time worrying over etiquette, or our lack of knowledge on the subject. We consulted the books that were advertised as being certain to make one a social success overnight, and thereby learned a little that was useful and much that was of no value to us.

Courtesy is, or should be, the cornerstone of all codes of behavior, and we believe some knowledge of the basic rules that govern social life is an asset. For example, there is the etiquette of using doors, they should neither be opened nor closed too hastily. Doors indicate privacy; if there is any doubt as to whether you may or may not open a door, don't do it, not without knocking. "Respect of privacy is one of the marks of a fine person."

It is, we hope, unnecessary to remind you that it is not polite to push heedlessly through a door, jostling anyone who may be in your path aside. A hostess, or secretary, of course, leads the way always, she does not shrink behind visitors and wave them on toward the door. A man and woman going to a theater or concert walk together through the lobby, if tickets must be bought she stays beside him unless she becomes conspicuous by doing so, in that case she stands aside until he has bought the tickets, when they go together if possible to the door of the theater. The usher takes their tickets and leads the way into the theater proper and the woman precedes her escort down the aisle.

In groups of women it makes no difference who goes through a door first or gets off or on an elevator first. The exception to this would be in the case of giving precedence to a very old lady. A lady not so old, probably would not appreciate a deference that was shown because of her years.

Nick Penick, Bldg. 4-2, is leaving the gang to take up his new job in Bldg. 26-B. Nick will be missed very much.

John Driver, Bldg. 4-3, reports that he is all set to go to the lakes now as he has one of the famous special Buicks that he just knows will never give up like his old car did so many times.

Anyone interested in the fine art of home building, see Harry Mumma, Bldg. 4-3, for expert advice. He will also discuss with you the merits and de-merits of both gas and electricity. He holds classes daily from 12:00 to 1:00 on these subjects. And when it comes to inside dope on basketball, he is a wizard. But when it comes to playing with the neighborhood boys out back of the house, well, not so hot.

Does anyone in Bldg. 4-3 know the whereabouts of Harold Patterson's car? Is is lost, strayed or stolen? Or could it be that he has stored it for the winter? Popeye says the icy streets make him so nervous.

"My dear," said the husband, "if you hadn't taken so long dressing we shouldn't have missed that train."

"If you hadn't made me run all the way to the station, darling," replied the wife, "we shouldn't have had to wait so long for the next."

Crime Wave Broken

The "Phantom" is going into retirement, his deeds seem so inferior when compared with the accomplishments of that new sleuth "Sherlock" Histed. In Tuesday afternoon's mail were two envelopes, which, when delivered changed the normal course of several lives. One envelope was addressed to Don Shultz, the other to Walter Histed, both of Bldg. 19-3. One contained a card appointing Don press representative of the Bingtown Bugle and the other a card appointing Walter a private detective, with full license to do plain and fancy detecting. Walter, realizing the full duty set forth by his commission, set out to track down the senders. By a series of deductions he found the alleged culprits within 24 hours and put the finger on Frenchy Lacert and Dagwood Fisher. When Walter announced his findings cries of "double cross" were heard, the two suspects claiming they were framed. Friends who complimented Walter on his success received the modest reply "elementary my dear." However, Don refused to exercise his rights as a reporter so, we his friends are reporting it—the naked truth.

It is reported that the daily papers carried an article a few days ago telling how some unknown man attempted to snatch a purse from Sarah Jones, Bldg. 19-3, but was frightened away when she screamed. It is said that Sarah denies screaming which leads some of the old meanies to wonder if the purse snatcher did the screaming.

The Beeler boys from Bldg. 19-5, Herb Bauer, Ed Glenwith, and Tubby Rochy invaded Blue Lake one night last week and took advantage of the half starved fish. We will have to admit that the boys know their winter fishing and seldom get skunked. They have a special kind of bait that is three years old. Maybe if it were five years old they would get bigger fish, or at least more bites.

Phil Tilford, Bldg. 4-3, sure had his troubles reading "No Visitors" signs or else he just can't see them.

For the correct use of a finger-bowl see Viola Moore, Bldg. 26-5. Was any one looking, Vi?

Carl Clevenger, Bldg. 4-3, is spending most of his time getting ready for a new set of molars. We really don't know why he wants them as he surely can eat all of the boys English walnuts.

EXILE EXPRESS

G.E. CLUB

Winter Street News

C. Peden waits for the coldest day of the year for putting up his storm windows.

Fred Ellinger takes his "after Christmas" chicken to Walters to be warmed for his meal.

It seems that everyone has at one time or another had the desire to put their hand and foot prints in wet cement like the movie stars do. Fortunately most people do not yield to their impulses, but Maitland Smith, alias John Barrymore, plowed ankle deep right through a wet section of cement on his way to the candy wagon (the same section that all the girls were able to jump). The poor workman kneeling beside his just completed job that had been ruined looked up and said "What worries me is just how could you manage to get both feet in such a little spot?" Whereupon Smith said unabashed, "There is still room for the imprint of my profile if you would like to have it."

When Frank "Cleve" Mason went for an ice boat ride Sunday, he must have had a close shave because Monday he came to work minus a mustache. He feels he will be safe without it now that leap year is past.

John Schwartz received a new pipe for Christmas. He's still so used to using his old one that he doesn't even notice when his new one is missing until the messenger delivers a package containing his pipe neatly packed and wrapped.

There are few new employees that stay clear of the Winter Street column and Betty Hambrock, this includes you too.

The day before Christmas the Refrigeration Engineering Department was a scene of much hilarity. The reason—the annual Christmas party and the antics of Al Ralston and Ed Misegades. Several days before the party the decoration committee, Bea Livingston, Oscar Mensch, Hal Staley, and Cliff Leegard decorated the office for the occasion with the aid of the department's two human step ladders, Kolmerten and Brown. The high light of the party was the "Who Am I" dramatizations put on by those comics, Al Ralston and Ed Misegades. Happenings of the past year and impersonations were given, much to the embarrassment of some. Dean Rinehart, Chet Engleman and C. Winchester were prop men and stood on the side lines furnishing signs, red wigs, pink bloomers and whatnot while the audience furnished the guffaws and boos. Later gifts were exchanged and what gifts, all the way from a pound of hot dogs to a set of toy dishes.

The girls of the commutator department in Bldg. 19-5, entertained at the Berghoff Gardens Saturday in honor of Louise Bertch who is leaving to take up a full time job as Mrs. Carl Roger. She received a beautiful gift from Mary and Matilda Bertch, Ernestine Johnson, Lucille Felts, Doris Gessler, Irma Roby, Julia Lennert, Jerry Kromy and Elsie Petrie.

Art Brandenburger, Bldg. 4-3, is bemoaning the fact that he and his bucket of water were late for the fire the other morning. The reason for this, he tells us, was the immense amount of birds flying around his place. They were so thick he could barely make his way through. We wonder what all the attraction is for the birds around Art's place. Perhaps Art will enlighten us.

SPECIAL EMPLOYEE'S PRICE

$1.00

Men and Volts

THE STORY OF GENERAL ELECTRIC

BY J. W. HAMMOND

To older G-E employees this book will recall familiar names and scenes. To the younger generation it tells, for the first time, the inspiring story of the pioneer days of the Company. A book that every employee will want to own.

NOW ON SALE AT THE EMPLOYEES STORE

Sunbeams From 17-4

Bess Geller says that the chili she ate at a near-by restaurant, was so hot that every time she opened her mouth a neon sign appeared.

Well, well and well, we have with us again, our old friend Dave Slater, how do you like being this close to heaven, Dave?

Beryl Kolkman says, that some things frighten her and somethings don't, depends on the things and the place.

Famous last words: What on earth are all these things—Ruth Lemert.

Aldine Bell and Alvena Zwick, Bldg. 4-3, have started a bird sanctuary of which they are very proud. They have sent Art Brandenburger a note of warning to keep away from said sanctuary, because they want their birds to stay home.

After Ward Grimm, Bldg. 4-3, sent the boys home last week with all the soup that they could drink, Ward starts to fry himself some pancakes. But the next time we hope you don't burn so many of them so that you will have at least one to eat and enjoy.

Agnes Ditlinger and Loretta Wyneken, Bldg. 4-2, gave a surprise shower Sunday afternoon at the home of Sue Cameron for Gene Weikel, who will be married in the near future. Those present were: Mazie Greek, Martha Arnold, Jesse Coombs, Alvena Greber, Bernadine May, Helen Schoppman, B. A. McLaughlin, Effie Bremer, Erna Roembke, Rita Zuber, Margaret McMaken and Lucinda Fitch.

Leora Carpenter, Bldg. 4-3, spends her week ends just playing with her tiny Pekinese pup, Sadie Wolff making new hats, Sylvia Bowers designing new sweaters, Mary Hake cleaning up the new home.

Bldg. 4-4

As I was walking through the Shaft Section the other day, I noticed that we had a new handsome looking man working there. At second glance (for, of course, I looked twice) I saw that it was Clarence Seslar with his mustache shaved off. A nickel to know the whys and wherefores of this sudden transformation.

Since Phyllis High has been wearing a diamond, she thinks she is quite grown up. Anyway she has stopped wearing her hair bows.

If anyone wants to know the effects of bowling, they might acquire the information in the KC winding section.

Was it for her own information or someone elses that Mary Kleber asked Tommy if he was married.

Val admits that he likes Boston Cream pie, but he wishes Vic Romanick would serve it some place besides in his eye.

Anyone wishing to have their fan cleaned or repaired, see Leona Scheuman. She is quite an expert fan cleaner-upper or fixer.

Sol Andorfer has started a little business on the side. If you are afraid to wash your dog these cold days, take him to Sol for a cornmeal bath. I hear it is very successful.

For instructions on training pups, see Hilda Scott. She named her puppy "Pepper" but says it may have a couple more names unless it continues its good manners. And speaking of dogs, there is a girl in the office who just bought a new little puppy-dog. Won't Mrs. Hemp be surprised when her little Great Dane puppy grows up to be a big 125 lb. dog.

There was an awful traffic jam down town last Saturday. The cause of it was Glen McAtee walking down Calhoun Street with a large clothes basket under his arm.

Television Unit

(Continued from Page 1)

in the United States. It will be devoted exclusively to television and will embody many special features, impossible to undertake in buildings previously used for such purposes.

Features of the installation will include an antenna 125 feet high at the southwestern corner of the property for relaying programs to the main transmitter in the Helderberg mountains. This antenna will be heated electrically in wintertime to prevent ice formations which might interfere with the successful operation of the station.

All windows of the main studio will be blocked off and illumination for the room will be provided by three phase water cooled mercury lights using the midget cigarette type of lamp newly developed by General Electric. These lights will provide 1000 foot candles of illumination at any point within the room where action is going on during the televising of a program. When it is considered that the average number of foot candles used in producing a modern, well lighted motion picture is between 300 and 400 and that 60 foot candles is held to be excellent ordinary office illumination with fluorescent fixtures, it can be appreciated what a tremendous amount of light will be produced in the new studio.

The ground floor of the station will be occupied by the staff offices, scenery shop and modern heating equipment. The entire building will be air conditioned and equipment for maintaining this feature will also be installed in the basement. There will be a large rehearsal room also and adequate dressing room facilities for men and women.

Work's Restaurant

(Continued from Page 3)

and refrigerators are equal to that of a fair sized grocery. More than forty thousand pounds of meat pass through the commissary department each year and all other food stuffs are in proportionate quantities— for example more than 12,500 pies are baked each year in addition to doughnuts and other pastries.

The restaurant is operated on a non-profit basis and is under the managership of Harry Zimmerman with Eva Lynn as assistant.

We hear that Guy Coon has been having twin troubles.

Earl (I betcha) Griswold had better know his basketball teams better. It's a losing game the way he plays it.

If I had as much male attention as those two self-avowed old maids Zella Sheehan and Marie Wichelman, I wouldn't worry.

Florence Shaffer, Bldg. 4-3, appeared for work last Monday morning in a sort of dazed condition caused, no doubt, when she walked smack dab into a lamp post. We suggest that she see an eye specialist, or perhaps this dazed condition was caused by a letter she held in her hand.

The boys tired of C. Huegenard's continued crying and craving for baked beans, so they brought him several large cans. How did that particular brand taste, Clem?

Locals To Tangle With Zollners In Free Cage Contest

Strong Team To Be Matched Against Club On Wednesday Evening, January 15

Zollner Pistons, regarded as Fort Wayne's toughest bucketball quintet will tangle with the G-E Industrial aggregation at the Club gym, 8:30 o'clock, Wednesday, January 15 in the feature contest on the third "free basketball card" sponsored by the Athletic Committee of the G-E Club.

Both teams have been enjoying highly successful seasons with Zollners performing with exceptional brilliance in the last two weeks having annexed the first half title of the YMCA Industrial League and severely trounced the House of David, touring professional troupe, in an exhibition encounter at the Central Catholic gym.

By just glancing over the names that appear in the Piston lineup it is easily understood why they have been chalking up so many victories. Dale Hamilton, spark-plug and high scorer of South Side State Champions, holds down one forward position and his running mate is "Racehorse Red" Gatton prominent North Side basketballer. Jack Keller, outstanding rebound artist of North Side's team for the last three years handles the center post. One of the guards is Don Beery, also a member of South Side's State Champions, and regarded by many experts as the most improved player in the city since high school graduation. The other guard—Jim Hilgeman—needs no introduction to G-E fans as he played with the Club team during their last season of league basketball.

Although this lineup looks very formidable, the Industrials by dropping International Harvester last week 38 to 34 gave indications that they might be able to cope with the situation. Coach Mert Edgar has not named his starting lineup as yet but it is sure to include Weigand, Starkel, and Marquette who paced the scoring in the Harvester fracas.

Fans should also make it a point to be an hour early Wednesday as an outstanding preliminary has been scheduled with the South Side Barbers a team consisting of Kitzmiller, Bolyard, Glass and Hall, all members of South Side's titleholders going against the Apprentice A. These boys are all members of various other prominent city teams but wanted to play together once again so consequently formed this independent organization. The Apprentice can also present a lineup studded with several stars so consequently this should be a real game to see.

As has been stated there is no charge made to witness these games and anyone may attend whether a G-E Club member or not.

Office Maintains Top Position In Basketball League

After a three week layoff for the spreading of Peace, Goodwill and Cheer, six G-E Inter-department teams returned to the "basketball wars" last week with Main Office continuing to maintain their hold on first place by completely subduing the Squares 27 to 11 but Apprentice A and West Side remained right on their heels by dropping Small Motor Factory and Apprentice B respectively.

Main Office, using their superior youthfulness and speed to a great advantage, had very little trouble in garnering their third league victory. Both teams used a fast break type of offense but Main Office's, as the score indicates, was very much more successful. Kent, drum-majored the winners attack with eleven points although clever ball handling and smart playing of Bender and Scherer had a great deal to do with the final outcome.

In the closest game of last weeks card Apprentice A put on a last quarter spurt that earned them a 35 to 29 win. It had been a nip and tuck battle with first one team holding the lead then the other but the Apprentice finally supplied the push that put them over. Reynolds, a forward, continued to sink his favorite left handed shots getting a total of 11 points while the Factory's big offensive guns were Voirol and Clawson with 9 and 8.

With both teams stressing defense West Side finally managed to break through for the buckets that gave them a 22 to 14 victory.

West Side Strong Contenders

Left to right: Offerle, Feaser, Barker, Yoder, Schultz, Motter, Starkel, Hoch; with the ball, Miller; guarding, Horstmeyer.

By Art Maxham

"Always a bridesmaid but never a bride" is a statement typical of teams representing West Side whether in basketball, volleyball, softball or baseball but depicted above are a group of boys that are seriously threatening to break this "runner-up jinx."

At the present time these lads occupy second place in the G-E Inter-department Basketball League and need only a win over Main Office next week to move into a top spot tie.

West Side, for point making, relies mainly on the fast break type of offense but does have a consistent set system that is always good for several buckets.

Horstmeyer and Motter, both over six feet in height have a great deal to do with the team's success as they always get over fifty per-cent of the rebounds during the game. Offerle, five foot, seven inch forward, has been supplying a good share of the teams scoring punch averaging 12 points in three games and is closely followed by Yoder, team captain, who specializes in set shots from way out on the floor.

The other forward, Schultz, has not seen much action as yet being benched by a bad knee but is sure to be a big help when he is ready to go.

Two of the guards, Starkel and Miller, play with the G-E Industrial club and that in itself testifies to their ability. Paul Feaser has been playing in the Inter-department circuit for several years and is respected for his great defensive ability. Hoch is putting in his first year of league play and consequently has not had a chance to show his ability although he was one of the best players to graduate from Central Catholic. Barker, Leo High School product, is one of the fastest boys on the team and consequently, coming from a school that uses the "fire wagon" system fits right into the scheme of things.

Given their share of breaks it is highly possible that West Side workers, this spring, will be treated to the shock of seeing new blue and gold jackets with the word "Basketball" on them. This is just a warning and will soften the blow for those old timers whose last view of victory spoils were belt buckles.

BOWLING COLUMN

Open Letter to Ed Horning—
Dear Ed:

We were certainly surprised and from a selfish angle disappointed when we received your resignation as Secretary of the Small Motor Bowling League.

For more than two years you have spent a great deal of time and effort in helping to develop and organize our League.

We know it's been a tough job to keep us all satisfied but you have and we thank you for the fine job you have done. We hate to see you go but wish you good luck and rapid promotion in the new position you are assuming when you leave our Company.

Thanks again for the swell job you have done.

Small Motor Bowling
League Members

Ed Horning on his last night as an active member of this league was given a gift paid for through donations by his fellow bowlers which goes to prove that bowlers as well as golfers have a heart.

The holiday layoff certainly helped Buckles of the Office League—he bagged a neat 600 total—Hughes with a 76 game has had his name engraved on the Transformer League fur lined loving cup. F. Gamec is taking over the secretary's job in the Small Motor League Pratt, of the Elex Afternoon League, started the new year with a score of 220.

Volleyball League Opens Second Half

Small Motor Production, Main Office and Winter Street all got off to a perfect start in the G-E Inter-department Volleyball League by sweeping their three game series with Apparatus-Transformer, Apprentice and Small Motor Drafting.

Winter Street, who won the first half title very easily by winning all of their 21 games, extended their victories to 24 by dropping Drafting 15-3; 17-15; 15-8. The first and last games were rather one-sided but the middle contest was a real thriller that lasted 25 minutes. First one team and then the other held the lead but Macy and Motter connected for two successive spikes to cinch the verdict.

Scores on the Main Office-Apprentice game were 15-11; 15-13; 15-9, while Small Motor Production defeated Apparatus-Transformer 15-8; 15-6; 15-10.

In the other match on last week's schedule Small Motor Factory copped the first two contests 15-13; 15-7; but dropped the last one 10-15.

IN THE ROUGH

By WALTER SUNIER

Who won the following bet? Jack and Bill each bet that he could outdrive the other when they stood at the first tee. Jack's ball hit a tree and ended up three feet behind the tee. Bill swung mightily at his ball and missed it completely.

If all the golf balls manufactured last year could be hit at the same time there would be 19,500,000 flying down the fairways. However, not all of them could be hit at the same time as there are only approximately 2,000,000 golfers. Each golfer would have to hit his allotment of nine and three-quarter balls. Allowing five minutes for each golfer, the year's supply would be gone in five minutes and there would be 2,000,000 balls in the air at one time.

Little Benny Hogan scored a record 62 for 18 holes in the $5000 Oakland open golf tournament last week. He went out on the first nine in 30 and came home in 32. He sank his shots from all directions and sank 25 and 30-foot putts with ease. This is a reminder of one of the finals between Snead and Runyan when Snead was even par for 27 holes and still was beaten 8 and 7. Runyan was using No. 3 and No. 4 irons to the greens and Snead was using No. 7 and No. 8 irons but Runyan had 47 putts in 31 holes and Snead had 58. Snead had 2 birdies and was 23 under par in 194 holes and Runyan had 9 birdies and was 24 under par. All of which goes to prove that in such tournaments that it is the man who is hot around the cup that wins.

A British inventor has developed a device to help perfect the swing. It is a flashlight affair which is clamped to the shaft of the putter. If the swing is true, nothing happens but if there is any slight deviation from a true arc a red light flashes. Perhaps Hogan practiced with one of these.

Rod-Gun Club Opens Season

The G-E Rod and Gun Club opened its 1941 program with a meeting at the Dehler-Hughes range. Many activities are planned for the year and a general program was outlined. During the social session which followed, Sam Stilwell presented some interesting motion pictures of hunting and fishing.

It was announced at the meeting that the club's match rifle team had been entered in the William R. Hearst national shooting tournament.

Announcement is made by club officers that an increased membership is very much desired for the coming year. A membership campaign will be launched within the next few days. Anyone not contacted and interested in joining the organization is asked to apply to E. Pion, Bldg. 4-3, the organizations secretary-treasurer.

An invitation is also issued to all persons interested in rifle and pistol shooting to attend the weekly matches held every Tuesday evening at the Dehler-Hughes range.

Observance Of Safety Record By Transformer Group

Completing a thirteen month period without a lost-time accident and a winner in the December safety awards, the above pictured Transformer Division group held a short meeting this week in observance of their record.

Talks were made by L. A. Bond, foreman, and J. H. Gargett, superintendent of the Division.

"American Initiative Facing Greatest Test"

"Maximum assistance to embattled Britain, Greece and China is part of the task of defending the American way of life," Philip D. Reed, chairman of the board of the Company, declared. Mr. Reed spoke Saturday, January 11 on "Our American Initiative," giving one of a series of talks sponsored by the National Council of Women of the United States during an intermission of the radio broadcast of the Metropolitan Opera by the NBC-Blue Network.

Initiative and love of freedom are the characteristics which have made America the greatest and strongest nation in the world, Mr. Reed said. American initiative is today, he added, facing its greatest test and, he predicted, would win its "greatest victory."

Candidates Named For Bond Director

Stuart J. Head, Bldg. 19-1; Walter F. MacGinnitte, Bldg. 20-1 and Elmer G. Sauerwein, Bldg. 26-5, have been named as candidates for bond director of the General Electric Employees Securities Corporation. Returns will be tabulated the latter part of this week and the successful candidate announced.

Members of the election committee are C. F. Braun, G. F. Rogge and W. C. Buuck, all former bond directors.

Close Of First Year Of Office Is Observed

In Address To Nation-wide Meetings President Wilson Emphasizes Company's Part In National Defense Program

The successful conclusion of Charles E. Wilson's first year as president of the company was celebrated Wednesday night by 2,000 members of the company's sales organization with dinners in 41 cities throughout the country. Two telephone networks were set up to permit Mr. Wilson to address all of the dinners from New York City.

Mr. Wilson pointed out that General Electric had volunteered a large share of its services in 1940 to national defense orders which "add up to many millions of dollars — but, when translated into

Safety Organization Is Named For Coming Year

All Employees Asked To Participate In Movement To Make 1941 Record Year In Works History

A united effort to make 1941 the outstanding year in accident prevention work at the Fort Wayne Works is asked of every employee with the announcement of the new safety organization for the coming year. The success of the movement will depend directly upon the cooperation of all employees who are aptly termed the stockholders in the movement.

The advisory committee of the new organization with Works Manager M. E. Lord as chairman will include P. C. Morganthaler, C. H. Matson, I. H. Freeman, R. M. Har-

• With An Eye To The Future

Whatever life may be like fifty or one hundred years from now, we may be sure that the comforts, conveniences, conditions of labor and of recreation, in short, all that determines the standard of living, will depend on the engineering developments that will have occurred in the meantime.

Now engineering is simply applied science. Just as the engineering of today sprang from scientific researches of the past, so the engineering of the future is being shaped by the scientific researches now in progress. That is why the best guess as to the future may be formulated only by a study of recent scientific developments and their possible applications.

There are two things that must strike any student of current scientific progress; the constant acceleration of that progress and the closeness of its approach to the fundamentals of the universe.

In each generation there are those who think that so much has been accomplished that the end of progress is near. I believe it was more than fifty years ago that a Commissioner of Patents resigned because all worthwhile inventions had been made and the Patent Office would soon be useless. It was less than fifty years ago that an eminent physicist said that all fundamental discoveries had been made, and yet, almost as he said it, a series of discoveries was beginning which has resulted in far greater progress toward an understanding of fundamentals than had been made in all the previous history of man.

It is true that the most obvious things have been discovered, but the army of scientific workers has enormously increased and new weapons of marvelous range and accuracy have been developed for attacking the unknown, so that, although the terrian grows more difficult, the forward drive is steadily gaining in momentum. Great as has been the progress of the past fifty years, we may be sure that it will be far surpassed in the next fifty.—William D. Coolidge, Director of General Electric Research Laboratory.

Education does not consist in mastering languages, but is found in that moral training which extends beyond the schoolroom to the playground and the street, and which teaches that a meaner thing can be done than to fail in recitation.—Chadbourne.

• Remember?

Remember your first days with this company? If you were like most of us you probably felt a bit lost.

Things were new and the job was strange.

Remember how the slightest help from an experienced employee was most sincerely appreciated?

A new person is now in the "same boat" as you were then
Offer a helping hand and make a firm friend!

There ought to be a system of manners in every nation which a well-informed mind would be disposed to relish. To make us love our country, our country ought to be lovely.

NOTICE 4-1 EMPLOYEES

Bldg. 4-1 having been declared a restricted area, employees entering the plant at the Fairfield Avenue gate will be unable to use this floor for entrance, to board the elevators. Starting on Monday, January 27, the north center entrance will be the only access to this floor.

F. G. DURYEE,
Plant Protection Dept.

Safety Committee

(Continued from Page 1)

tigan, J. H. Gargett, H. E. Hire, Clarence Brenner, W. N. Wehrs, J. C. Grosjean, J. B. Greer, R. J. Hoffman, E. W. Lankenau, O. L. Weitzman, O. J. Mettler, J. C. Miles and W. J. Hockett, secretary.

The General Safety Committee will be composed of twenty-seven members. With this organization there will be at least one representative on the Departmental Committees for every twenty-five employees.

It is expected that Departmental Committee members will be well informed on all safety matters that pertain to the work in their particular group, keep in close touch with all safety activities and disseminate necessary information. In this manner every employee should be fully informed in all matters pertaining to the movement.

With one or more representatives for every twenty-five employees it is felt that elimination of existing hazards and prevention of new hazards and unsafe practices will be entirely possible.

Employees are urged to work closely with their representatives, for by doing so they will not only insure a safer place to work for themselves but they will also help their fellow employees.

The new organization is founded on the supposition that no one wants to get hurt. An analysis of the accidents that have occurred shows that most of them could have been avoided with just a little more thought and attention on the part of the victim or of his associates.

Celebration Held

(Continued from Page 1)

normal commercial profits, may mean little or nothing—and that's all right with us."

"As we closed 1940 with the record-breaking figure of over 654 millions of dollars in orders received," Mr. Wilson said, "none of us was unmindful of the fact that circumstances beyond the control of any of us, were responsible for the creation of a substantial part of this business. As a good corporate citizen, our company was among the very first to place its full facilities at the call of our beloved country, and to make ourselves ready to render any service we could in supplying the materials needed for national defense. This was a volunteer enlistment which subordinated commercial considerations, and because our facilities are many and varied, the services we have been called upon to provide have been many and varied—services which, when translated into orders, add up to many millions of dollars—but, when translated into normal commercial profits, may mean little or nothing—and that's all right with us."

Mr. Wilson spoke from the Metropolitan Club where he was host to the advisory committee of the company. Members of the company's New York District office heard his talk at a dinner at the Engineering Societies Building. He spoke first over a telephone network connecting 25 cities in the East and afterwards to 16 western cities.

Under the new organization plan every employee is given the opportunity to help "hold down Old Man Accident."

The general works committee is as follows:

W. J. Hockett, Chairman; H. L. Smith, Secretary; Gordon Smith, W. I. Pribble, R. L. Kierspe, L. V. Baker, N. O. Leedy, A. F. Thieme, Sid Ramel, Lane Breidenstein, Reinhold Frede, F. R. Hemrick, R. Houser, W. H. Skevington, L. O'Brien, B. Gausepohl, Robert Dent, Paul Menze, Geo. Doehla, W. McKinney, Wm. Hale, P. Helmer, H. Fletter, E. Greer, F. C. Graffe, Wheeler Porsch and Geo. Prince.

WITH THE COLORS

The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

Dusting Off the Family Album

Many new employees (and perhaps a few who have been in the G-E family for some time) see the Company as it exists today, without knowing how the Company grew or how our various factories came into being. To clear up some of the questions regarding our family tree, we now dust off the family album for a quick review of the Company's history.

The history of the General Electric organization begins in October, 1878, when Edison founded the Edison Electric Light Company to enable him to begin experiments on an incandescent lamp. Edison developed his incandescent lamp in 1879, and during the next few years started a number of small companies to make lamps, dynamos, and other equipment. One of these, the Edison Machine Works, moved to Schenectady, N. Y., in 1886, marking the beginning of the present **SCHENECTADY WORKS.** Edison consolidated these small companies in 1889 to form the Edison General Electric Company.

Back in 1880 another small electrical manufacturing company—the American Electric Company--had been started at New Britain, Conn., to make arc lamps and dynamos invented by two professors—Thomson and Houston. In 1883 the company moved to Lynn, Mass., changing its name to "Thomson-Houston Company." Elihu Thomson was the company's chief engineer, and Charles A. Coffin was its leader. The factory which the Company built at that time was the beginning of our present **WEST LYNN WORKS.**

In 1892 the Thomson-Houston Company and the Edison General Electric Company combined, and the name "General Electric Company" was adopted. Soon afterwards, the **RIVER WORKS** was built at Lynn to supplement the facilities of the West Lynn Works.

PITTSFIELD MA (PLASTICS) BUILT - 1937

FT. WAYNE became part of G.E. in 1899. The Ft. Wayne Works traces its history back to the Ft. Wayne Electric Light Company, started in 1881 by James A. Jenney, his son Charles, and a group of Ft. Wayne business men, headed by Ronald T. McDonald, to manufacture an arc-lighting system which the Jenneys had invented. In 1888, McDonald sold a part interest in the company to the Thomson-Houston Company. James J. Wood, another pioneer, joined the Ft. Wayne organization in 1890. In 1898 McDonald died, and the following year the remaining stockholders sold their shares to the General Electric Company. Later an old lamp works was taken over on Winter Street and is today a part of the Ft. Wayne Works.

BLOOMFIELD WORKS became part of the General Electric Company in 1902, when Frank J. Sprague, who had pioneered in developing electric motors and electric elevators, sold the Sprague Electric Company to G.E. His factory at Bloomfield, N. J., became the Bloomfield Works of General Electric. This was the second company that Sprague had sold to the G-E organization—back in 1890 he had sold the Sprague Electric Railway and Motor Company to the Edison General Electric Company.

PITTSFIELD was added in 1903. William Stanley, J. F. Kelly, and C. C. Chesney had formed the Stanley Electric Manufacturing Company in 1890 to make transformers, after Stanley had demonstrated the first practical transformer at Great Barrington, Massachusetts, where he transmitted alternating current for several miles. Stanley and his associates soon became the country's leading transmission engineers.

In 1903, General Electric purchased the Stanley Electric Manufacturing Company, thereby obtaining the services of Stanley and Chesney. The Stanley plant retained its own name until 1907 when it became the Pittsfield Works of the General Electric Company.

On the next page of our family album we find that the increase in business soon necessitated further expansion in our plant facilities.

The land for the **ERIE WORKS** was purchased in 1907. Construction of the first building, the locomotive shop, was begun in 1910 and operations started a year later. This marked the beginning of the activity for which the Erie Works is now famous—manufacturing transportation equipment. The present building No. 18, where refrigerator cabinets are now manufactured, was also among the first buildings erected.

In the period from 1912 to 1914 the manufacture of mining and industrial locomotives, air compressors, and air brake equipment was begun.

PHILADELPHIA has long been identified with electrical progress. It was here that Benjamin Franklin performed his history-making kite experiment. Here, too, Elihu Thomson began his career.

In 1917 General Electric established a plant in Philadelphia, at 7th and Willow Streets, for the purpose of manufacturing switchgear. A new plant was built in West Philadelphia in 1926 and the 7th and Willow Street Works became the present Philadelphia Service Shop.

BRIDGEPORT Works was bought in 1920 to provide increased working space. The Merchandise Department was formed soon after and given the responsibility of producing and selling fans and wiring devices. Within the next few years G-E engineers and research workers pioneered dozens of new electrical appliances and accessories, which Bridgeport began to produce.

Our present Appliance and Merchandise Dept., at Bridgeport resulted from a consolidation of the Merchandise Department and the Specialty Appliance Sales Department in 1935. Four years later, all operations and personnel of the Specialty Appliance Sales Department were transferred from Cleveland.

NELA PARK was built at Cleveland, Ohio, in 1910 as a division of the Lamp Department. Even though Edison developed the incandescent lamp, he was not the only one to manufacture and sell it. In the early days many small independent lamp factories sprang up in and around Cleveland, Ohio. A consolidation of these small lamp factories took place in 1901, forming the National Electric Lamp Association. The initials of this association provided the name "Nela." General Electric has twelve lamp works situated throughout the country.

In addition to the major Works, G.E. has the following smaller factories:

DECATUR, built in 1920 about 20 miles south of Ft. Wayne, at Decatur, Indiana, to make small motors.

OAKLAND, built about 1923, when it was decided that better service could be extended to G-E customers by setting up a West Coast factory.

ONTARIO, purchased in 1928. This factory had been started about 1900 by A. H. Richardson to manufacture the electric flatiron which he had invented.

PITTSFIELD PLASTICS, set up in 1937 about a mile from the main Pittsfield Works, is the headquarters of the Plastics Department. Other plastics divisions are situated at Lynn River Works, Ft. Wayne Works, and at **MERIDEN**, Connecticut.

YORK and **NEW KENSINGTON** are operated as divisons of the apparatus section.

SANDY SAYS

Did you ever think wild thoughts that you would not care to mention, like wondering how flat a fat man would look after being pressed by a steam roller, or what you would say if you found yourself in the middle of Calhoun Street dressed only in your underwear? Well during one of my wild moments, I got to thinking about brains, and wondering if a man's brain was worth any more per pound than a cow's. I suppose they look about alike, and have about the same kind of stuff in them. If you saw them both in a meat market you might not be able to tell them apart.

Well, there must be some difference. Men can think and they say cows can't. Now I'm not sure of that, never having done much thinking and never having been a cow, but I've watched cows and men, and I can't say that man always shows so much advantage.

Now, if you have a brain at least as good as a cow's, it would be worth at least 50 cents at the meat market.

But once you collected the 50 cents where would you be? One good thing about keeping your brain and using it, is that like a good violin, it improves with use. But if you just set it aside and don't use it, I can't say it improves with age as much as "Duggins Dew of Klintilloch".

Speaking of using brains, what did ye think about the dope in last week's WORKS NEWS about suggestions in 1940? A total of $8,836 was paid for 1280 suggestions. That's about $7.00 apiece, which shows that lots of brains are worth over 50 cents apiece.

I wonder how long it took to think up these suggestions. Do you suppose it would average an hour? If so, that's $7.00 an hour for using your brain. Hoot Mon! not so bad.

Now, here's another thing. These 1280 suggestions were adopted, but in all, 3537 were turned in. That's one good one in every three (still $2.00 per hour) Not bad either!

It may interest you—of course it interests a Scotsman like me—to know that our cost reductions for 1940 were better than expected of us too. In fact we were 5 per cent above par, and that's going some as par in cost reduction work is usually one of those things just out of reach, like the stick you hold up to tease the dog with.

And speaking of dogs, Colin says, "A dog without a nose would still smell, and Sandy, if ye were a dog ye'd smell very bad, because a dog smells worse when he's all wet."

Bldg. 19-3

'Tis said that the coming midget auto race between (Barney Oats Field) Pflueger, of Bldg. 19-3, and Frank (Artie Shaw) Rueswald, of Bldg. 19-3, will be well worth seeing. Each racer is confident of his prowess as a race driver, and each driver equally confident of his car. Anyone interested can get full particulars as to dates of the meet from the racers in Bldg. 19-3.

We wish to extend our sympathy to Helene Blauvelt, Bldg. 19-3, at the death of her mother.

Geraldine Bevon, Bldg. 26-5, have you taken up the barber trade on the side? Does she do a good job, Adele?

Irene Thimlar, Bldg. 26-5, was seen walking on air one afternoon last week. Does it really do all that to you, Irene?

We swear that this will never cease. Enita Snavely, Bldg. 26-5, appeared with a diamond. Congrats, Enita.

We've heard of people buying the Brooklyn bridge and the Empire State building, but the latest one is Frank Morgan, Bldg. 26-5, selling Louis Gauge a 1939 lottery ticket.

Russel Dunten, Bldg. 26-5, wonders why he didn't get his name in the paper as the Steward boys did about their billfolds. He says he had a gold watch and key chain to show off besides a new billfold. We're sorry, Russel.

Sunbeams From 17-4

Wanted: a nice soft pillow, for Mary Bishop, who bought herself a pair of ice skates and is going to learn to use them.

Dorothy Wilhelm has a new sparkle in her eye, and it is a perfect match for the sparkler on the third finger, left hand.

If we find that a hound dog in this vicinity has lost its howl, then we will know where Russ Berkheiser got that awful noise that he lets loose.

What the connectors want to know is, who was playing hide-and-seek with Mary McAdam's thermos bottle, she didn't mind losing the bottle so much, but think of all that nice hot coffee she didn't get.

Bernadine Yacky says, she doesn't care if the new boy friend does have red hair, she likes him and that is that.

Famous last words: "That is ten out of one"—Mary Bishop.

It is a fact that a certain girl in Bldg. 19-5 got "red in the face" when she fell the other day—no, not on the ice.

INCOME TAX

Employees wishing notarization service in connection with their state gross income tax returns are advised that such service will be available every day next week between the hours of 3:30 p.m. and 5:30 p.m. in Bldg. 21.

Is Zat So?

The gang from Bldg. 17-1 is rather proud of its Harold Fisher. 'Tis rumored that he has been offered a job as chief of salesmen for Buick automobiles since his recent broadcast on the "Hey! Mr. Motorist" program. We wonder if Mr. Wehrs had anything to do with it? . . . Harold Hoffman certainly enjoys his job working close to the tool coupe, as he gets to watch all the adorable little blondes they are hiring to work in Bldg. 17-2, when they come to get their tools. It's a great life, isn't it, Harold? . . . Lillie Haley of Bldg. 17-1 office has been receiving hearty congratulations and best wishes as she is now Mrs. Elmer Pion. Best of luck, Lillie! . . . Henry Gollmer and Wally McKay had the best time recently when the two of them enjoyed a "bachelor dinner." Henry says that was his first experience at frying eggs. Wally agrees that they sure looked like it. . . . One of the new employees of Bldg. 17-1 is Bill Hanley, who was one of Central High Schools star athletes. The gang welcomes you, Bill. The red-headed Irishman, Ernie Riley, who has been on the sick list, was a welcome visitor one day last week. We hope you will soon improve enough to return to work, Ernie. . . . Barney Gausepohl had a good time recalling the days of his apprenticeship when he ran across his picture in an old issue of the WORKS NEWS. . . . Frank Quinn, Bldg. 17-1's most eligible bachelor, has kept a file of all the WORKS NEWS editions for nearly 15 years. Our most ambitious and hard working man is Bill Fisher. It sure is terrible the way he slaves away. He works so fast that he makes the smoke fly.

Guess that's all from Bldg. 17-1 this week, but you'll be hearing more from this gang. Be sure to watch for it next week.

THE QUESTION MARK.

If anyone has seen a pin stretcher floating around any place, let Loretta Wyneken of Bldg. 4-2 know. She is looking for one. It may be that she doesn't know what it is, or else there isn't such a thing.

19-4 Spot Jottings

The machine shop boys were entertained at the home of Mr. and Mrs. B. Parent last Friday evening. The boys wish to thank their host and hostess for a very enjoyable evening. Arno Sprunger did a real job of harmonizing and the one ill rumor has been effectually spiked. This rumor had it that Ed Robbins gathered up the folding chairs at 10:00 o'clock and took them home, but Ed has proof that he was there 'till after midnight. We believe him because the ham was not served until after midnight. . . . Ruth Tutweiler is having hat trouble. She is wearing a little black number with red feathers and the boys just can't leave it alone. . . . We certainly miss Vern Pray and Paul Noble. But what would the National Guard be without these two boys, and so good luck to them both.

For rent: Two rooms for single male employees at 1111 Maple Avenue.

Girls interested in wooing a rich bachelor should see Fred Volmerding of Bldg. 4-6. He has just closed a contract with the Government to provide his pigeons as a means of transportation for these rush motors that the G-E is building.

19-5 Office Chatter

This week my column is dedicated to all the captains, lieutenants, and the many privates that have left the Fort Wayne Works, for army service, and especially to our own fellows from the Series and Specialty Motor division; Capt. Houck, Capt. Stark, Lieut. Pray and Private Noble. . . . Capt. Houck came in Friday to say goodbye and he certainly does look fine in his uniform with all the medals. He is going to Atlanta, and we hope that he gets lots of southern fried chicken and corn pone. Of course the other fellows, Capt. Stark and Lieut. Pray will do all right too in Mississippi. Just hope that Stark did not forget his bag of little magic tricks. Well fellows we hope you all will be back soon working at a desk and punching a time clock with the rest of us.

A group of girls from Bldg. 4-2 spent the week end at Rita Zuber's cottage at Rome City. They enjoyed skating and tobogganing. Those present were: Vivian Hickman, Lucinda Fitch, Loretta Wyneken, Agnes Ditlinger and Ardus Trazinka.

If, as Elmer the Field Mouse might say, Wilma Kress' memory is as bad as we know it is, Cliff Hosier should use a Crosley, as we understand that that car can also be locked but it doesn't have a radiator.

From the feminine VIEWPOINT

by Irene Perry and Hilda Berthold

We want to thank all of you who write in and tell us what you think of our column. We are sorry that we cannot publish more of your letters than we do. We intended to tell you a little more about etiquette this week, but the following letter was too good to let slide by —so here 'tis:

Dere edider feme Viepint: Am not much learning as you but am much sad about edicat story your colum last week friday.

Wats matter with you, crazy? You says open door slow. Am open door slow as you says and husband thinks it wind and push door shut on my face. People says "Where I get black eye" and when am tellum, people says phooey. I'm say phooey you too.

Says you, not push through door. two phooey says I'm. You try get on elevator Building 4 with not shove. Maybe if am no push I get up to work as all rest start come down for dinner. Who do my work if am does edicat like says you.

Much more, am no like you says not to stay conspickus when man buy tickets. I'm should move over and let man put change in own pockets? 3 phooey to viepint feme edider. Sure man walks by me through show hallway. I'm no let him loose to stop and squint front of nice girl pitchurs.

Times as is, edicat aint nothing —necessarity is everything. Me talk strength — you take flippy frills your colum write about. Take flip too if who cares.

Phooey Joe Doakes two. Excuse pencil if please—Am not spell rite with pen and aint got no ink.

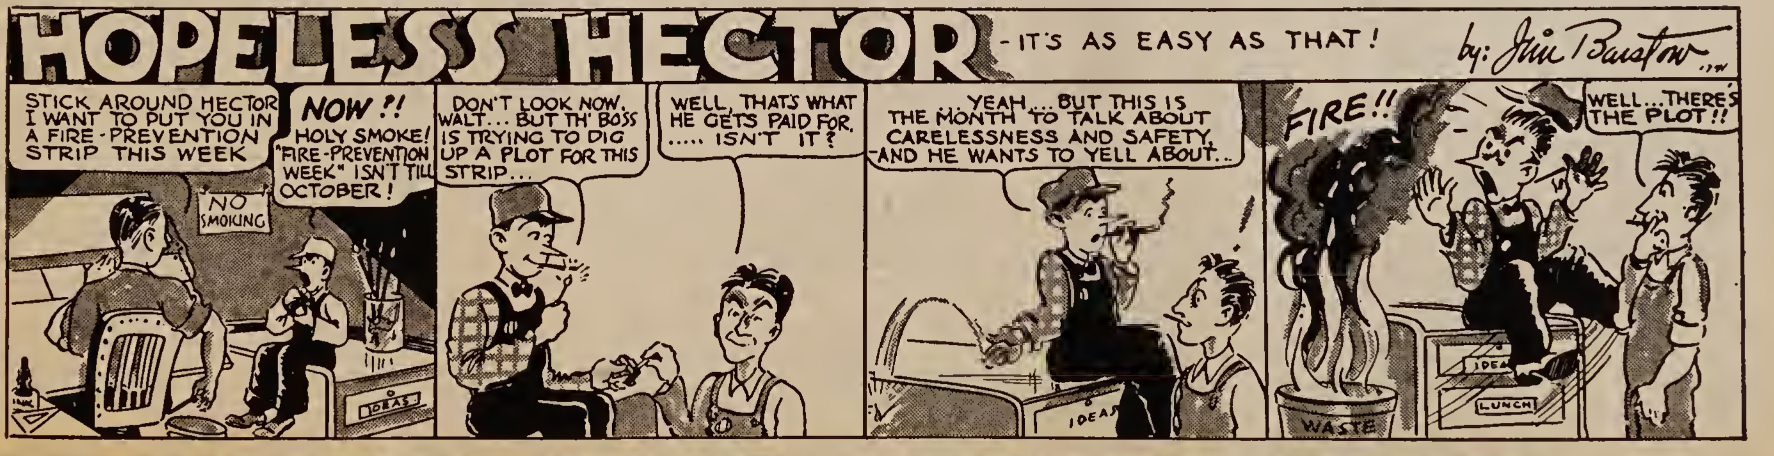
Sicnuchur
Sally-Mae

If we have mispelled (or misinterpreted) any of the above, our apologies; it was just a trifle difficult to keep up with the writing.

Mr. and Mrs. Elmer Pion, Bldg. 4-3, recently made a trip to their new home out in the Jungles one evening. After Elmer burns up all the matches he has to see, he just goes home, calls up the electrician, and finds out that all he had to do was merely close one tiny switch.

One noon recently our friends Mildred Mullen and Ruth Feller, Bldg. 4-3, were doing a lot of good singing. Your reporter will do his best to have these voices amplified from the Lincoln Tower.

Ray Kierspe, Bldg. 16-3, would like to know the magic words used by Martin Kunstmann, Bldg. 18-4, to open a steel desk drawer when it seems hopelessly locked.



HOPELESS HECTOR - IT'S AS EASY AS THAT!

Identification Badges Represent Security — Wear Them

NEWS THROUGH THE PLANTS

Punch Press 19-5

By Slug

Otto Helmrick put the cigars on the conveyor for the gang last week and not a one was muffed or missed along the line. The occasion was one that caused Mr. Helmrick to be a very happy man, a new girl had arrived in the Helmrick household. Congratulations, Pop... We heard a rumor that Jake Kugler swore off spitting tobacco for a drier brand, now for an old nicotine eater like Jake the gesture carries with it a lot of suspicion, so he has been placed under the watchful eye. If his friends keep on telling he carries his money around like stove wood, we are afraid he will wind up behind that bad little sphere that is so neatly stamped with a figure 8. . . . Horses were changed in the middle of the stream at a full gallop last week, Stocks going to the new division in Bldg. 26-4, and Geo. Prince taking the wheel for us. We wonder how much of this stuff George can take before his gears start to mesh. . . . Heard Louie Davis was in a big rush to get home the other night as he was going to bake a cake, and by gosh he must have done it to because the next day he was on the absent list. It's O. K. to bake a cake Louie, but we fear a grave error was committed in eating it.

When two of our erstwhile wisemen brought milk for their lunch, one of them happened to get buttermilk by mistake, not noticing it at the time they were sorely put out, when it came time to set the table and the mistake was discovered, as usual in such cases, a colossal argument was underway without further ado, both men being absolutely positive his purchase was sweet milk. While this argument was fomenting into the more classical stages of intellectual controversy, who should happen by but Heinie K. (a very retiring and timid soul) who, noting the cause of the argument, decided that neither man cared much for buttermilk, and as he did, he calmly proceeded to drink it. Avery Spayde turned just in time to see the last drop trickle down Kammers throat, so he whirls and grabs the other bottle, by the neck, ups off the lid and swishes 'er down in one mighty gulp. This gesture left the other contestant, namely Walter Griffith completely flabbergasted, out in the cold, holdin' the sack, or any other phrase so coined for the unlucky. He is now resigned to his ill luck but watch out 'Carey'. Walt's pointing his finger at you. He is beginning to think that buttermilk dial was all a frame up.

The Punch Press men from Bldg. 17-2 are now located in this group but we dassint comment on them by name until we first jib and jibe to see if their mental attitude will conform with our crude sense of revelry. Must also test their running power before we pour it on. Welcome thar boys pull up chairs and place all cannon in plain sight.

Dave Lewis, Bldg. 26-5, claims the world's record for driving sideways down the street. Some of the boys of Bldg. 26-5 wonder if these new cars are getting too complicated for him.

Willie had returned from his first day of school.

"What did you learn at school today?" asked his father.

"I learned to say 'yes, sir' and 'No, sir,' 'No, ma'am' and 'Yes, ma'am'."

"You did?"

"Yeah."

Borings From 4-4 Office

Here sits a ratty little substance, as Nate Porter would call it, bringing you the hidden facts of the Bldg. 4-4 office. Clayton Culver is looking for any old cast off furniture for his new lake cottage. We don't know exactly what he will give in return, but it has been discussed that the one giving the most furniture will be given the use of the cottage for the summer. . . . The current topic of today is how to get a monophone. Virginia Sanders and Evelyn Meyers are now sporting one. We know how they got theirs, but the question is, do we have to do what they did to get one? So if it is as easy as all that, we will all appreciate a monophone. Now personally, I would just settle for a phone. . . . I spied on the girls of the office out at Lillian Magner's the other night as she was giving the farewell party for "Always Happy" Ardeth Hemp and "Mama's Baby" Mary Bangert. The theme of the party was farewell and old paper napkins were used as crying towels. A treasure hunt, contract bridge and whist were the prevailing games. I saw the girls as they really live, and what a time! I got a good taste of Angel Food cake and coffee. I managed to get in just as everyone was leaving. Lillian told me the girls drank 80 cups of coffee, and all the food! Me thinks everyone ate too much. Bob Spitler and Mike Brayer were seen making favors for the party. Just the human question marks, just ask them. . . . Thomas Staley and wife were seen ice skating at Lakeside and boy are they ever good. Almost as good and graceful as Sonja Henie. Say, did you ever see our little Asmaraldia Heine gliding across the ice? Not on skates, but constantly falling down. She just can't stand on 'em. (Old age creeping up). . . . Our usher, Ivan Butler, finally admits he is in the dog house because no one will give him any news since he came out in his own column. And, of course, it is said that he is afraid of your own little Elmer, the field mouse. Ivan, I'll let you know that you aren't in the dog house with me. . . . Cliff Bowman is now in Bldg. 4-4 Office to replace Jim Gargett. You will probably all hear a lot about him in the near future. Right now he is entirely too quiet. Will have to sign off until another week—until then, I remain

Sincerely as ever,
Elmer, the field mouse.
(The Rat to You!)

The co-workers of the commutator department, Bldg. 19-5, wish Louise Bertch as much happiness and success as the most successful person ni the world in her new role of Mrs. Carl Rager.

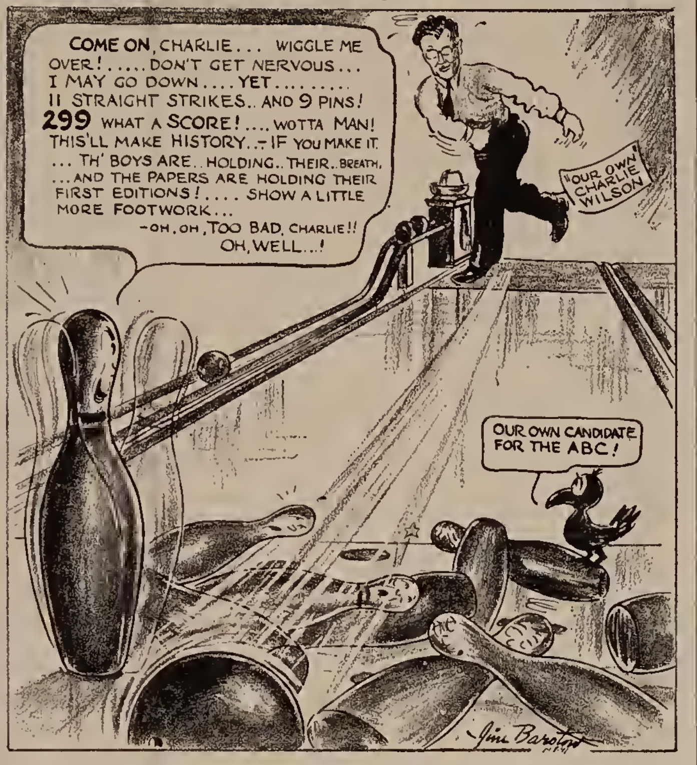
Virginia McCormick, Bldg. 16-3, wants it known that the picture of her on last week's front page, really didn't do her justice. She is just a skinny little girl.

June DeWitt, Bldg. 19-3, has been down-hearted all week and just because this punk reporter couldn't find anything to write about her last week.

The Wire and Insulation Office sure rates. Two new victims all at once. Here's hoping they can take it. Welcome to Bernard Byanski and James Gargett.

Marie Page is very happy again. Marie is reported to have lost a slightly used pair of hose in the street car and six months later got them back again. The report states the hose were a bit over slightly worn when she got them back.

A SECOND *that was* A LIFETIME



COME ON, CHARLIE... WIGGLE ME OVER!..... DON'T GET NERVOUS... I MAY GO DOWN.... YET......... 11 STRAIGHT STRIKES.. AND 9 PINS! 299 WHAT A SCORE!.... WOTTA MAN! THIS'LL MAKE HISTORY.. IF YOU MAKE IT. ... TH' BOYS ARE.. HOLDING.. THEIR.. BREATH, ...AND THE PAPERS ARE HOLDING THEIR FIRST EDITIONS!.... SHOW A LITTLE MORE FOOTWORK... -OH, OH, TOO BAD, CHARLIE!! OH, WELL...!
"OUR OWN CHARLIE WILSON
OUR OWN CANDIDATE FOR THE ABC!

Charles E. Wilson, President of the Company, accustomed to seeing his name in the newspapers in connection with the many interests of the Company, saw it the other day in a purely personal way. For, the president, in a bowling match on his home alleys of the Scarsdale Golf Club at Scarsdale, N. Y., rolled the nearly perfect score of 299 last week, just escaping admission to the bowling "Hall of Fame" by one pin.

Said the "Evening Dispatch" of White Plains, N. Y.:

> "Heartbreak item . . . Charles E. Wilson of Hampton Road, Scarsdale, missed a perfect game when the 10 pin wavered and refused to drop after he had rolled 11 straight strikes. Wilson had to be content with a 299, the third highest score rolled in the 16 years the Scarsdale Golf Club alleys have been in operation."

Bldg. 4-4

For information about how to get two meals for the price of one, see Freddie Bergman. He knows just how to drop them.

Catherine Pohling looks broken hearted since she and O. D. have been arguing about women drivers.

We aren't so sure about Cliff Witham's excuse for being late the other morning. He blamed it on his car for not starting, but we know it is only a seven minute walk from there to here.

Mary Kleber bought a new fur coat and has been making numerous appointments to meet her friends down town on Saturday so they can see it.

Louise Roberts must be telling a continued story to Martha for they stop at the corner and talk every night.

Don't think it's the first spring robin you hear when you walk through Bldg. 4-4. It's Clarence (Elmo Tanner) Shanebeck practicing.

That was a pretty close call when Stella Fagan almost went home with the keys to the drawer in which Martha Kruse had put her pocketbook.

Glen McAtee and Ed. Graham had a good time pushing their cars around the parking lot warming up their rear axles. Mac, perhaps you had better explain the technique of starting a car to Mr. Graham one of these days.

Any one knowing of a four spindle drill press for sale notify Mike Brayer.

Notice: Why not tell your reporters the gossip. They have a better way to circulate it.

"Is your Alma Mater's football team having a good year, Senator?"

"The best yet! So far they have won seven straight moral victories."

Thisa And Thata 19-5

The other day Bill Wickliffe and his wife took their young son over to Franke Park to go skating. Bill drove his car up and parked it and left the motor running, so they wouldn't get cold. After awhile Bill decided to get his son and go home, so he opened the car door and stepped out—right into some water, imagine his dismay when he saw that his car was sitting in water up to the running boards! Next time Bill you better get out and chop a hole in the ice to make sure you're on land.

Annabelle Dunlap was quite lucky the other day. Her husband won the Garbage Disposall at the "House of Magic." Too bad we all can't be lucky!

Some of the people want to know what park Arnold and Charlie take a walk around. It must be an awful big one to leave Arnold weak in the knees.

I have been informed that Hitzeman and Hazelet have qualified (by their recent scores) for the girls' bowling league.

Don Essig was a little bit color blind or absent minded the other day. He was seen bending over the time clock as if to take a drink. He looked about then dashed for the fountain.

Winter Street News

They asked Jimmy Vestano how his bicycle operated during the recent icy spell. Responded Jimmy, "The ?!*?!* fall me down — Too Slicky." . . . Winter Street friends of Wilbur Stocks are glad to find out that he still belongs to the Boy Scouts as they must "be prepared." During the recent icy spell Wilbur had a well worn coal scuttle filled with extra fine ashes ensconced in his rumble seat, just in case. That's what he gets for getting rid of his Essex. That car was so well trained it wouldn't start in cold weather, and he wouldn't have needed his scuttle and ashes.

Some time ago, Rita Wagner and her big "moment" attended a Sunday evening dance. Next morning Rita came to work limping, the result of her dancing partner stepping on her toe. The temptation was pretty strong, as Rita had on a pair of toeless shoes to begin with and following the accident, she was almost toe-less.

Bob Scherer is quite popular with the Army these days. He recently received a letter concerning his property which is in the area designated as the new Army base southwest of town and the following day he received his questionnaire for the army draft. I suppose they thought if he had no place to live he might just as well be "In the Army now."

Eddie Heemsoth is now Winter Street's "Scarlet-no-hair-a."

Royal Keen's record is finally broken. After ten years of a perfect clock card, (a man didn't know when to stop talking last week) "Teenie Weenie" was fifteen minutes late.

Jack Hermie went ice fishing last Saturday and returned almost without his new lantern and minus some clothing which caught afire while trying to keep warm.

Jim Johnson, Bldg. 6-B, who is usually alert to any errors in the reporting of the Inter-department Volleyball standing, made no comments on the omission of the name of the team that S. M. Factory defeated, as per last week's WORKS NEWS. Your reporter finds that it was the team Jim plays with. It is peculiar he didn't remember.

"When it rains it pours." At least for Max Fielitz. He took his wife to the hospital for an appendectomy and the next day he came down with the flu. Better luck next time Max, and we wish your wife a speedy recovery.

Alvena Zwick, Bldg. 4-3, recently purchased a large sack of bird seed to feed her lonely canary, but said sack had one lonely hole, and all the birds in the town just followed Alvena around.

We learn that Bessie Goins, Bldg. 4-3, has a desire to become expert at boxing and is now taking instructions in pugilism. At the present time she is taking on all comers as sparring partners. More power to you, Bessie, and why not enter the Golden Gloves.

We are greatly pleased to see that our conveyor acrobat Ward Grimm, Bldg. 4-3, has again made the cover page of a certain popular weekly magazine. He surely will land a place in a circus or a Zoological garden before long.

Ray Kitchen, Bldg. 4-3, is a wizard when it comes to figuring the cost of a man's attire. He can look at a man and estimate the cost of his clothing to within 75c. But when it comes to estimating the cost of all new attire, he has it figured right down to the penny.

(Continued on Page 7)

"Hang Your Clothes On The Hickory Limb — —"

WILLIAM. E. MOSSMAN

Part of the group that enjoyed the Elex Club Splash party last Monday for members of the second shift are shown in the above picture. Following an hour's swim the girls enjoyed an informal dinner at the Y.W.C.A.

New Officers

(Continued from Page 1)

Newly elected directors are Lee Cupp, Bldg. 19-5; Leo Wallace, Bldg. 19-3; Al Phillips, Bldg. 19; Clarence Hueber, Winter Street; Irene Meyers, Bldg. 21 and Veda Orff, Bldg. 2-1. Hold-over directors are Loyal Decker, Bldg. 17-1; F. H. Lemper, Bldg. 17-3 and Gayle Griffith, Winter Street.

Members of the Credit Committee were elected as follows: Carl Vondran, Winter Street; Roy Berdelman, Bldg. 4-5; Adam Pfleuger, Bldg. 4-1; Florence Case, Bldg. 27 and Alvin Powell, Bldg. 19-4 are hold-over members.

John Howard, Bldg. 17-4; Karl Stahl, Bldg. 17-4 and Al Olson, Bldg. 4-4, were elected members of the Supervisory Committee. Business transacted included the declaring of a four and a half per cent dividend. Old and new officers will hold a meeting in the Credit Union offices on Monday evening starting at 7:30 o'clock.

News Around

(Continued from Page 6)

Slips And Chips

By Sir Vis, 4-4

Last week Bill Owen came to me inquiring about my write up for the WORKS NEWS. When he learned there wasn't going to be one, he heaved a sigh of relief. He surely must have slipped some where and I bet it was a dandy.

Did you ever notice how John Heine stays close to his bench while Charlene is waiting for my WORKS NEWS column.

Don Thomas claims that apples are all right for teachers but bosses need fish. Don brought in several fish all fried, etc.

Zella Sheehan says, "Leap year or not, I can propose." Well, Zella, there are several eligible men around. Let's see you do your stuff.

Marie Wickelman informs me she now has resorted to bubble baths, etc. I wish you luck.

Ewald is in search of an instructor of Morse code. You see, it is quite embarrassing to get prepared for Bill Weber and turn around to face Bill Skevington. Both Bills come up behind Ewald to peck on his shoulder.

Don (Daggy) Thomas in a typical Dagwood manner approached Ed. Martin's car the other morning, his feet high in the air and his back where his feet should have been.

Could it be that Ralph Cohagen, Bldg. 26-5, and his sickness had anything to do with the promised appearance of Sally Rand the following week.

Old Lady (to little boy standing on his head)—"Don't you know that if you do that, you'll never get to be president?"

Little Boy — "That's all right, lady. I'm a Republican."

Sabotage ? ?

'Twas a cold and frosty morning of the past week when Alfred Theodore Rebber who resides on a farm in the vicinity of New Haven, arose with the crowing of the first rooster, did the chores and made ready to come to the city in pursuit of his daily duties here in Bldg. 19-5. In due time Teddy arrived at the corporation limits where he stopped to pick up his regular passengers, two of whom opened the rear door and entered. Immediately there followed protestations of a vehement and unprintable nature. Teddy, who is ever on the alert (being an ex-deputy sheriff) turning about to ascertain the cause of this unexpected outburst was no less surprised than the complaining passengers. The entire rear seat and upholstery had been entirely consumed by fire leaving nothing but the coil springs for the passengers to relax on. Al claims sabotage. Mrs. Rebber confines her suspicions to sparks from Al's barnyard meerschaum pipe.

The many friends of "Vic" Leakey in Bldg. 4 and Bldg. 6-B join in wishing him success and good luck on his new job. We hate to lose him but Bldg. 4-6 will gain an able workman and a good sport.—Bon Voyage "Vic."

One of the slickest things we know of is Fred Thompson's dinner pail. Someone playfully lubricated the handle with "Spry" or "Crisco" the other evening and Fred juggled it all the way home.

Farewell stag parties were held last week for M. Z. Brown, power house and Kenneth Carr, Bldg. 2-E, who are leaving for Mississippi with Uncle Sam's forces. The gang hated to see the boys go but you would never have guessed it from the good time enjoyed by all.

LaVon Campbell, Bldg. 19-5, is wondering what became of the doughnuts she bought.

Shorts From 6-B

Persons working in Bldg. 6-B or 4-B should be careful not to wear overcoats or jackets resembling Charlie Gebharts or they are liable to reach in their pocket some evening and find a battle-scarred briar pipe with the strength of the English navy and the odor of the bottom of a bird cage. When the whistle blows at one o'clock Charlie just parks his oil-burner in the first coat in the rack that looks like his and then spends the next few days trying to remember where he put it last. Ask Joe Johnson—his wife wouldn't let him in the house the other evening, she thought he had a goat with him.

We wonder why George Coplen jumped about two-thirds out of his skin last week when Virginia Drummond passed him from the rear in the aisle by the coat rack. I wonder if Sam Heer couldn't tell us.

Allison Van Wormer of the Bldg. 26-5 tool crib plans an art display in the near future. All sketches and paintings by Van Wormer, ask to see them.

Art Brandenburger, Bldg. 4-3, after hearing that Sally Rand was in town, went down to renew old acquaintances. He had not seen Sally since the days she put on her sensational fan dance at the Century of Progress in Chicago. Art was rather disappointed and said, "Sally is like the old gray mare, she ain't what she uster be."

Gust Wiegand, Bldg. 26-5, broke his record to ring in promptly at 8:00 o'clock. Gus started from home with the customary "push-push" of the pedals but his progress was impeded by not being able to run the red lights as per usual. He put on a little extra speed and managed to wheel into the yard, hang up his bicycle and reach the elevator just as the klaxon sounded. The elevator was not there, however, so Gus took the bull by the horns, or whatever it is you do in full five flights to ring in at 7:32.

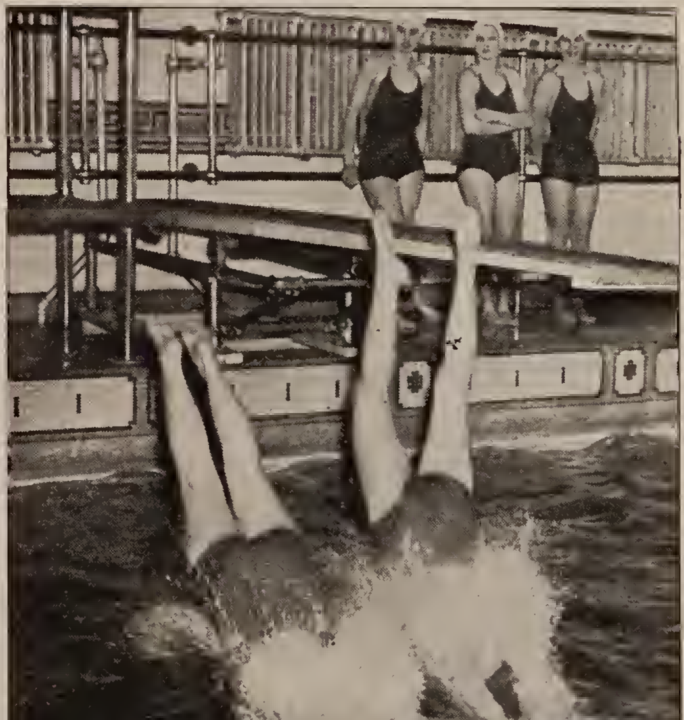
Violet Monroe and Amelia Yovan, Bldg. 19-5, are reported to be pondering over forgetting the boys whose numbers were called early by Uncle Sam and shop around a little or waiting for them.

The Steinbacker House, managed by our Bldg. 19-5 Steinbacker, got an emergency, and dashed up the a real break last week during the fog. A bunch of fellows didn't want to take a chance driving home so put up for the night at the Steinbacker House on the banks of the beautiful St. Marys. All was well until daylight when a strange noise was heard. On investigation it was found that the carp in the river were trying to get through three inches of water to get on their way. Next time boys, insist on inside rooms, they have showers, radio and heat.

Leo Blair suggests that stirrups be installed on Thomas' bench. These stirrups (according to Blair) would come in mighty handy when Don is tightening up the bull ring of a stator die. It seems Don's feet are too far away from the bench to get enough leverage.

Marjorie (going to bed): "Mother, need I brush the tooth the dentist is going to pull tomorrow?"

"But They Did Go Near The Water"

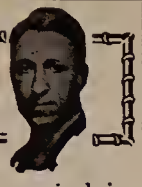


Diving proved an attraction for the Elexites as the above photograph indicates. An unusual fact was revealed in that practically every member of the group proved to be experienced swimmers.

Identification Badges Represent Security — Wear Them

Golden Gloves To Open On January 27

IN THE ROUGH



By WALTER SUNIER

Some of the stiffness is being taken out of golf. The true etiquette of golf is being retained but the old condition where you would be hung, drawn and quartered if you took a deep breath when some one was making a stroke, is passing. It is being realized that many of those who blamed a bad shot on some insignificant noise or action are simply being tempermental.

At the Indian Canyon Golf course in Spokane, Wash., an annual firecracker tournament is held and all hell breaks loose over the course during play. A thousand dollars is spent for over a million pieces of fireworks. Sky rockets whiz, Roman candles are shot at the tee, cannon crackers explode at the feet of the players and smoke screens float over the balls. In addition fire sirens shriek and locomotive bells clang. Even caddies get their chance to do a little shooting. Salute bombs crack out to a total of 5000. An ambulance is stationed at the clubhouse and a dozen nurses are on hand to render first aid. The tournament is arranged with the definite idea of teaching the golfers not to take their game too seriously.

The Palma Ceia Golf Club in Tampa, Florida, holds a Tampa Golf Jamboree with goofy golf as the main idea. Firecrackers also explode here and the band plays. Golfers try to hit a ball from horseback, from a moving automobile, from a platform two feet from the ground or in a hole three feet deep. Cockeyed costumes of all kinds are worn. Any failure to perform a prescribed stunt means a penalty of five strokes. One favorite stunt is to drive a golf ball resting on a half dozen eggs.

Hunting Films To Be Shown At Club On February 9

Eight reels of motion pictures depicting various types of hunting will be shown at the G-E Club, Sunday, February 9 by Sam Stillwell, prominent local archer and huntsman. There will be two shows one at 1:30 o'clock and the other at 4 o'clock with no charge being made for either performance and anyone may attend whether a G-E Club member or not.

Two reels will consist of hunting several species of animals with a bow and arrow and two more will depict the actual tracking down and killing of a mountain lion in the Grand Canyon.

The exciting sport of hunting the fast moving Canadian deer with a bow and arrow will also be shown and the climax will portray the dangerous feat of killing a bull moose from a canoe.

These pictures have been shown to various organizations and are always favorably received. All G-E Club members should make it a point to attend and bring their friends who might be interested.

Hoagland Five To Meet Locals Wednesday Night

Free Basketball Card At G-E Club With Squares And Lincoln Bank in Preliminary

Another strong out-of-town organization, Hoagland Independent's will appear on the G-E Club's fourth free basketball card, taking on the Industrials at 8:30 o'clock, Wednesday, January 29.

Hoagland, as has been their custom for a great number of years, is having a very successful season, coming out on the long end in 19 of their 23 contests and two of those losses being by a margin of only one point. The Independents draft all their players from the Hoagland High School and as the school is always a top contender for the county and sectional championship it is easily understandable why the Independents enjoy such a remarkable record.

Oldest in point of service on the Hoagland roster are two standbys, G. Reynolds and C. Reynolds. These brothers have been playing together for years and make a formidable combination. Paired with these two boys on the starting lineup are Hisner, Perry and E. Emenhiser. All three of these lads have been out of high school for two years and were members of Hoagland High's county champs of 1938. Perry, a boy of only five foot, six inches in height, is extremely tricky, fast and able to score from any position on the floor. He was named "most valuable" to his team in the 1937 county tourney and was put on many "all-county teams" during his three years of competition.

This game should develop into a real battle unless the G-E Industrials get hot as they did against the Columbia City Merchants. Jumping into a first quarter lead of 21 to 0 the Industrials, with Weigand, Voirol and Allen pacing the attack, kept pouring the leather through the hoop finally slowing down in the last stanza to let the visitors get a few buckets. Coach Edgar is expected to start his usual lineup of Marquette, Weigand, Voirol, Starkel and Allen with Clawson, Handly, Figel, Miller and Schultz sure to see action.

A preliminary matching the Squares against the Lincoln Bank will start one hour earlier. The Bank, led by Fredrich and Gunkler, has a youthful team that like to run and run fast so consequently will give the Squares plenty of trouble.

G-E Club members should make it a point to come out and root for their teams. All of the games this year have been well worth seeing and the fact that the Club representatives so far have been winning most of the time should make it doubly inviting. There is no admission charge and anyone may attend whether a G-E Club member or not.

Refrigeration Bowling

By Bob Ringle

The age of miracles hasn't passed. With a count of 204, Staley, you have at last crossed the threshold of the elusive 200 portals. You are now a member in good standing. Long and loud have you tapped at the portals and now your persistence is rewarded.

For the information of those interested, the officers of the league and other interested persons are trying to get regular bowling shirts for the league.

Those interested in seeing the league have league shirts see Mr. Roeger, Mr. Cunningham or Mr. English and give them your comments. . . . Tapping at the portals, and a few did tap in last Tuesday night's little jam session. Haggenjos, 218; Cunningham, 214; Houser, 208; Staley, 204; Lomiller, 204; and Geller, 201. Rockhill's playboys tossed the pins around the same night for high three game total, the count, 2486.

NOTICE

Rod-Gun Club officers announce that employees interested in rifle or pistol shooting are offered indoor and outdoor range facilities through the club, as well as aid in buying shooting equipment and instructions in marksmanship. For membership those interested should see E. Pion, Bldg. 4-3 or attend one of the meetings held each Tuesday night at the Dehler-Hughes range.

Defeat Of Office Throws League In Three-Way Tie

Inter-Department Basketball Takes New Impetus With Upset Game

They might just as well start the 1940-41 G-E Inter-department Basketball League all over.

Main Office, the only undefeated team in the circuit, was knocked from their lofty perch, Wednesday, by a red hot and vastly improved Small Motor Factory club. This unexpected decision, plus Apprentice A and West Side's wins over Apprentice B and the Squares, throws the league lead into a three-way tie between the Office, Apprentice A and the Westerners, all having three wins.

Small Motor Factory, using a revised cast and hitting the greater share of their shots, was, as the score of 43 to 16 indicates, far too much for Main Office who were sadly off their game. Using their superior height to a great advantage the Factory scored most of their points on tip-ins by Bill Hanley or fast cuts down the middle on the part of Marquette followed by a one-hand push shot. Voirol, big Factory center, also aided his teams scoring cause by hitting four nice long shots from way out.

Seeing a chance of getting back in the running for the championship West Side really turned on the heat to down the Squares 43 to 17. Always a fast-breaking club the Westerners found the slower Squares very easy to maneuver around and consequently with Yoder's seven points leading the attack jumped into a half-time lead of 30 to 5. West Side slowed it down somewhat during the last two stanzas but still was sure to maintain a safe margin. All of West Side's players contributed markers to the total with Motter's nine pacing the attack while Langenberg, Square guard, tallied over half his club's points getting four field goals and a foul.

In the most exciting game of the evening but still rather one sided Apprentice A, crashing in on two good quarters, the first and fourth, defeated their fellow students, Apprentice B, 45 to 26.

Classic To Be Held At Club Twelfth Year

For the twelfth straight year the Golden Glove Boxing Tournament will get under way at the G-E Club, Monday, January 27. This tourney has always been popular with fighters and fans alike and this year judging by the number of entries and requests for tickets will be no exception.

Fights for the first two nights, Monday and Tuesday, January 27 and 28, will be staged at the Club while the semi-finals and finals will be moved out to North Side High for the accommodation of a greater number of people.

The tourney this year will give a greater opportunity for novices to garner a title as most of last year's champs have abdicated their title either because of weight, army, professionalism or two new rules "that a boxer may only compete for five years or hold a championship twice.

To qualify for competition a boy must be over 16 years of age, in sound physical health and, if a minor, have his parents' consent.

Tickets for these various nights may be purchased at the G-E Club, Main Auto Supply or Gunnar's with prices ranging from $1.10, ringside; $0.85, reserved; or $0.50, general admission.

This type of sport was pioneered way back in 1930 and the present president of the G-E Club, George Waldschmidt, was one of the chief instigators. It is with rightful pride that Mr. Waldschmidt can this year set back in his chair and witness how this one time "acorn has grown into a mighty oak."

Motor Factory Finally Stops Ice House Gang

Refrigeration Bows To Contenders In Volleyball League 15 to 13

Winter Street's enormous string of volleyball victories has finally been halted. After seeing them chalk up successive wins numbers 25 and 26, Small Motor Factory stopped the Refrigerator lads 15-13 to throw the second half lead of the G-E Inter-department League into a three-way tie. The first two games were not even close, Winter Street breezing through on 15-6, 15-3 scores, but in the last contest the Factory really staged a magnificent show to come out on top.

Main Office joined Winter Street and Small Motor Factory in the No. 1 slot by beating Small Motor Drafting 11-15, 15-10, 15-12. Small Motor Standards revenged their first half setback by edging out Small Motor Production 15-8, 15-13, after dropping the first one 4-15.

With the loser being forced to share the cellar with Drafting, Apparatus-Transformer and the Apprentice put on a great battle with the Apparatus-Transformer staging a comeback after dropping the first game 15-6 to win the last two and sixth positions in the league.

Wearing Your Badge Regularly Is A Matter Of Habit

B&T

GENERAL ELECTRIC NEWS
FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, JANUARY 31, 1941 Number 50

Fifteen Employees Don National Guard Uniforms

Front row, left to right: Second Lieutenant Frank D. Taylor, Second Lieutenant Paul M. Neumann, Captain Mitchell Z. Brown, Captain Julian H. Stark, First Lieutenant Willis B. Noll, First Lieutenant Donald R. Thompson, First Lieutenant Harold J. Longsworth, Second Lieutenant Arthur J. Blume.

Second row, left to right: First Class Privates Evan E. Brady, Miller S. Makey, Warren B. Hawley, Paul V. Noble and William H. Kronk. Absent when picture was taken: First Lieutenant Walter E. Pohler and Second Lieutenant Vern O. Pray.

When the final Fort Wayne units of the Indiana National Guard left for a year's intensive training at Camp Shelby, Miss., yesterday morning The Fort Wayne Works was well represented for fifteen of the guardsmen are employees. Of the fifteen, ten are commissioned officers including Captain Julian H. Stark, commanding Company M. and coordinator of the Fort Wayne Units. Captain J. F. Houck, also a member of the National Guard left some time ago for special training.

Securities Nominee

Elmer G. Sauerwein, Bldg. 26-5, has been nominated for the office of a bond director of the Employees Securities Corporation. Mr. Sauerwein, who is a toolmaker, served in this capacity during the past year.

The nominee has been an employee since 1917 and is a graduate of the Apprentice School.

Members of Divisional Safety Committees Named

Complete organization of the 1941 divisional safety committee has been announced, and the newly appointed members have taken over the campaign for the establishment of a new low record during the coming year. As in previous years the organization is headed by an advisory staff and a general works committee, the membership of which has been previously announced.

In making the announcement of appointments it is pointed out that the organization can function successfully only with the cooperation of all Fort Wayne Works employees, and that the committees will be direct representatives of all employees in the project.

The committee members are as follows:

Staff

E. W. Witte, Statistics-Compensation; H. L. Smith, Safety Engineer; Dr. H. W. Garton, Works Physician; Geo. Dochla, Fire Chief.

Divisional Committees
Decatur Division

Bert Gage, Chairman. L. V. Baker, Secretary. R. Owens, B. Lengerich, J. Steele, D. Neidigh, C. Smith, D. Kimble, J. Omlor, R. Jackson, G. Buckley, G. Acheson, W. Kleinknight, D. Bogner, A. Owens, D. Foreman, E. Case, R. McDougal, E. Kelly, M. Hoffman, A. Buffenbarger, A. Hilton, R. Crist, Mary Merriman, Sylvia Ruhl.

Motor, Generator and Switchgear Division

C. L. Johnson, Chairman; N. O. Leedy, Secretary. Bldg. 19-1—George Zeis, Claude Bickhart, Ed. Petrie, Wm. Behm, Clyde Kiess, Ed. Palguta. Bldg. 19-2—Fern

(Continued on Page 2)

Cost of Living Remains Unchanged

The Secretary of Labor announced on January 25, 1941, that the cost of living index on December 15, 1940, stood at 100.7 compared with 100.4 on September 15, 1940 therefore the cost of living adjustment remains at 3 per cent until the index figure reaches either 100.9 or 99.8 as announced in the Works News of August 9, 1940.

KINDLING ORDERS

Orders for kindling are again being accepted by the Personnel Department, Bldg. 21. The kindling is offered free to employees but a charge of $1.00 for a full load and 50 cents for a half load is made to cover handling. This fee must be paid at the time orders are placed.

Final Wage Rate Survey For 1940

Company Wage Rate Policy Maintained At Fort Wayne

The Personnel Department has announced the completion of the final Community Wage Rate Survey for 1940. This survey is regularly made at least three times a year, with special surveys being in order when conditions or changes seem to indicate their necessity.

The regular surveys for the Company as a whole include over 200 leading firms in the communities throughout the United States where the Company has manufacturing plants and service shops. Some 220,000 employees normally work for such contributing firms. Firms selected to be included in all surveys are of reputable high standing and well established in their communities.

The Fort Wayne Works survey included 21 firms within the city of Fort Wayne which have been contributing to these surveys for a number of years, thus insuring that the local comparisons are on a stable basis.

The number of employees engaged on the surveyed occupations total approximately seven thousand, which insures a wide coverage, as well as including a wide range of activities. Where jobs are encountered for which no exact counterparts can be found in the companies surveyed, the comparisons of rates paid on such jobs are established on the basis of the skill, application and responsibility involved by a system of job evaluation in use in all General Electric Works.

In making the survey, our investigator, who is thoroughly familiar with the jobs in our own Works. visits each of the firms included in the list of contributing firms. He is also familiar with the jobs in their plants. A detailed study of the jobs, as well as careful descriptions of the duties involved is made to be sure that the jobs compared

(Continued on Page 3)

Indian Chief To Address Elex Club

A rare treat is in store for members of the Elex Club on Monday evening, February 10, for a no lesser personage than Chief Standing Deer of the Cherokee tribe will be guest of honor at a meeting to be held at the G-E Club. Chief Standing Deer will appear in native costume and will give a talk on Indian lore.

An excellent menu has been prepared for the dinner to precede the talk to be given by Chief Standing Deer. Tickets will be available at 35 cents each and reservations must be made by noon on Friday, February 7.

The attraction is an unusual one and it is anticipated that there will be a large attendance. Early reservation is therefore asked.

"Take Over The Good Work, Mac" Says Joe

The appointment of the 1941 safety organization sees the voluntary resignation from this body of Joe Fox after more than fifteen years of active safety work either as chairman or secretary of the General Service safety division. In the above picture Joe is turning over his safety material to Walter McKinney, foreman in Bldg. 10-1, who is Joe's successor.

Schnickelfritz Band To Give G-E Club Programs

Postponed Appearance For Free Performances and Dances Scheduled

Arrangements have been successfully completed for the appearance of Freddie Fisher and his famous "Schnickelfritz Band" at the G-E Club for six days starting February 18th and ending February 23. The engagement follows a previous postponement.

Original plans called for only a three-day engagement of this popular troupe but the apparent interest and subsequent demands for tickets forced the Entertainment Committee to extend this to six days.

Seven Free Shows

Seven free shows for only G-E Club members and their families will be put on: Two on Tuesday, February 18th at 7 and 9 o'clock; two more at the same times, Thursday, February 20 and three on Sunday, February 23rd at 1, 3, and 5 o'clock. The Sunday shows will be limited to second and third shift employees only.

Three Dances

Three dances, scheduled for Wednesday, February 19th, Friday, February 20th, and Saturday, February 21st, will be open to the general public with tickets selling at $0.55 a person including tax.

The "Schnickelfritz Band", which had been scheduled to appear here earlier in the year but because of popular demand was forced to extend their engagement at the Palm Gardens in Milwaukee, has been one of America's favorite rhythm and show bands for years. Wherever they have played, and this includes practically every large city in the United States, the "S.R.O." sign has had to be hung out.

Passes for each free show has been limited to 1500 and only 800 dance tickets will be sold. G-E employees should make it a point to get their tickets early and to obtain these passes they must not only present their own Club membership card but also the cards for each member of their family who wishes to attend. Free show passes will be available at the G-E Club February 3rd while dance tickets may be purchased at either the Club or Gunnar's place after this date.

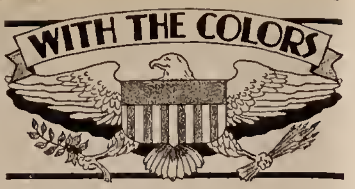
SAFETY SUGGESTIONS ARE ALWAYS WELCOME
Let's have yours
IDEA



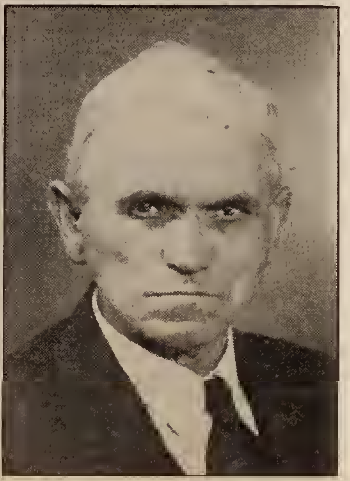
The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

CHARLES ROLLING McAFEE, Machinist—Motor Generator. Private, January 23, 1941, Fort Benjamin Harrison, 818 Runnion, Fort Wayne.

PAUL V. NOBLE, Electric tester—Series and Specialty. Private, 152nd Reg. Co. M, Ind. National Guard, January 17, 1941, 932 Kinnaird Ave., Fort Wayne.

RICHARD B. OLSON, Inspector—Frac. H.P. Mot. Private, January 23, 1941, 318 Edgewood Drive.

Charles Bouillon Ends G-E Service



Charles Bouillon

Charles Bouillon, employed as an elevator operator in the Receiving Department retired on his seventieth birthday after 24 years of service. Mr. Bouillon has a continuous service date since March 7, 1916. At that time he was employed in the General Service Division where he spent several years. Later he was transferred to the Receiving Department as elevator operator and he continued in this work until the time of his retirement. Mr. Bouillon resides at 3323 South Clinton Court.

Trolley Coaches For Dayton, Ohio

The City Railway Company of Dayton, Ohio, which three years ago placed nine trolley coaches in operation on its Richard St.-Lexington Avenue route, is obtaining seven more trolley coaches, to be built by the Pullman-Standard Car Manufacturing Company with General Electric equipment, but differing from the earlier coaches in that they will have electric braking in addition to the standard air brakes. The new coaches will have compound motors and MRC control. Four independent transit companies in Dayton handle all but a very small part of their traffic with trolley coaches.

Whether the available space in your kitchen is 40 inches, 36 inches, or 20 inches, there is a General Electric Range in a size to fit your kitchen plan.

Now Is The Time To Cultivate That Habit — Wear Your Badge

Wage Rate Survey

(Continued from Page 1)

actually require the same relative skill, application and responsibility.

While we do not disclose to any person or organization the rate structure of any of the contributing firms, the survey itself and the analysis made after obtaining the figures are recorded in such detail and with such accuracy as to stand the test of public opinion or critical audit of any fact finding investigation.

This survey is not for the purpose of comparing overall averages, but rather the comparison of the average wages paid on individual jobs, since our wage rate policy deals with jobs and not overall averages. Should the survey disclose that our average is out of line with the average community wage on a single job or occupation, voluntary adjustments to bring that particular job in line are made, even though we are above the average overall rates in the community.

With the completion of the December, 1940 Survey, it was found that in general, our wage scale compared very favorably with the going rates in the community. However, it was also found that on a few jobs our position was not quite up to our standard. As a result, there have been voluntary upward adjustments in the rates of several hundred hourly rated operators.

This action insured the maintenance of the Company's wage rate policy at the Fort Wayne Works which provides that the Company will pay wage rates equal to or higher than wage rates paid in community industries for comparable work requiring the same skill and efficiency.

News Around

John Altekruse, Bldg. 19-3, will appear soon on Hobby Lobby. John collects broken milk bottles for a hobby and it is said he has a fine collection.

To learn the plasterer's trade one must spend several years as an apprentice, but Fred Reinking in Bldg. 19-3 has been taking lessons watching the plasterer who has been working on a new wall in Bldg. 19-3 and now thinks he will change his vocation to that of a plasterer from his present vocation as a tinner. Well, good luck, Fred, in your latest venture.

It seems as if Milton Dennison gets a big kick out of putting articles in the WORKS NEWS about the girls in Bldg. 19-3. We suggest that Mil would have better success with the girls in Bldg. 19-3 if he would buy an Indiana model car instead of a Florida car. Ask Milt to show you the pictures he took down in Florida. Boy, is he a pip in that fishing get-up.

Irvin Koontz, Bldg. 19-3, has been having a bad case of lumbago. We would suggest a change in the model of car as the new cars ride more comfortable than the old models. And then again it may not be the car's fault. In either case, you have our sympathy.

Harold Federspiel, Bldg. 19-3, doesn't mind his wife offering him her chewing gum to help him stand up on the dance floor, but when he has to yell for help while standing on one foot at his ice hole—it sure is embarrassing. It is a good thing that Milton Dennison didn't let that spud slip as he was cutting Harold's other foot out of the ice hole.

They Drove Safely During 1940

Front row, left to right: Wm. McKinzie, Sam Henline, Leo Boitet, Art Schueler and John Lamle. Top row, left to right: Wm. Grush, Chris Thiele, Melvin Beauclair, Ted Raypoole and Oscar Beaty. Abent when picture was taken, Raymond J. Moser and Edward J. Kelly.

Thirteen motor vehicle operators, representing the complete force that operates motor vehicles inside as well as outside of the Fort Wayne and Decatur Works property were given recognition this week for a no-accident record during 1940. The men drove a total of 153,820 miles during the year.

Elmer Wagner, silver voiced crooner of Bldg. 19-3, has broken fourth in a new type of song. His rendition of "Boogie Woogie" is especially charming. The "Hawaiian War Chant" as rendered by Elmer, creates the illusion of palm trees swaying in the breeze, dark skinned warriors, and maidens clad in grass skirts dancing to the music of native drums and guitars.

Wonder why Eddie Gambrell, Bldg. 19-3, took a train to Chicago over the week-end. Is he losing his confidence in the automobile or was he just too exhausted to drive. In either case, it was pretty tough on the budget, wasn't it, Eddie?

When "Pappy" Archbold, Bldg. 19-3, came in late the other morning and reported he was held up by a Nickel Plate train, we began to wonder if he arrived by the way of Columbia City. You see, "Pappy" lives in the south side of our city.

Talk about big time gamblers. "Dagwood" Fisher and "Baby Snooks" Kelsey, Bldg. 19-3, bet a cake on South Side's basketball game. Came Monday morning and Helen (the loser) arrived with a cake which was enjoyed by all who tasted it, but "Snooks", who ate one small piece of her own cake, was off work for a day and a half. Could it be she got the wrong piece?

By the way—have any of the employees in Bldg. 6-3 heard that Freddie Fisher and his Schnickelfritz Band are coming?

As if the girls in Bldg. 12-B office aren't "nutty" enough, Fred Zehender appeared almost every morning last week with a large sack of squirrel food, which he generously shared with everyone he could force it upon. The girls harbor the suspicion that they are helping to clean-up the left-overs from the holidays. However, no one suffered any ill effects.

Ray Mutton admits that he likes snow, but not the kind that lets you slide into the middle of another man's car.

Man Bit Dog?

Mary Lauer, Bldg. 19-3, came to work the other day with a cut lip. She reports her dog stepped on her. How and for what good reason? One need not be surprised at anything these days.

Slips And Chips

By Sir Vis, 4-4

Our department seems to be in tip-top shape now that Asher and Owens are back to work. We are all looking forward for that Stag party to be held at "Daggy" Thomas' home. Will we have fun! Oh Boy! Daggy has scheduled his wife out to her sisters', so boys, come early and stay late. Of course, the girls in our department are cordially invited, however, they must come stag.

We all have heard of people becoming unbalanced while in a precarious position. Ife Holmes needs only a swivel chair to fall off of. The other day Ife leaned over to reach his desk drawer and "flop" Ife went to the floor. Maybe a saddle or just a pair of stirrups would help.

"Being in the dog house" in my way of thinking is, that humiliation brought about by your wife, fiance, or girl friend because of some clumsy, stupid and foolish slip. If my definition for this term is right, Elmer needs to run a correction for last week's statement. As for being in the dog house, youse gals and yousc guys just can't do it.

That bruise on Enoch Hursh's head was really and truly caused by his running into a door. It seems that this door never latched. It became a habit for Enoch just to push it open. His father repaired the latch. Enoch, not knowing the latch was repaired, struck the door, his head taking the rap. Enoch now knows what door knobs are for.

All right, all right, and then off the stage went "Daggy" Thomas and John Heine. Yes sir, boys, they really and truly are competitors in the juggling world. They were just about even in juggling ability when John pulled an extra stunt (he has had the stiff neck ever since). To see these two boys in action is most entertaining and exciting because the air is filled with die lifters and die springs. Enoch Hursh was a little surprised and humiliated when he found the hardening tanks empty. Enoch had heated a piece of steel red hot. He dashed for the hardening tanks, only to find them empty.

A late report came in that John Heine would not attend the Stag party. We all would like to know the reason, but only he and Mrs. Heine know it. We can always depend on Leo Blair for a story. He always has one on tap. I will be seeing you at the party. Come early and stay late.

Theodore Schlup, Bldg. 19-3, the money bowler, stepped out of his class when he tried to pick the winner in basketball. The result is Ted has lost some of his folding money. Ask Eddie Hines.

Rachel Luellan, Bldg. 19-1, is very proud of her wrist watch. Ask her about it.

Hunting Pictures On February 9

Plans are rapidly being completed for the handling of two crowds at the showing of eight reels of game hunting motion pictures at the G-E Club Sunday, February 9.

Sam Stillwell, chairman of this program, states that all of the films have arrived and are in very good condition. It is thought possible that two more reels might be obtained showing some trick archery feats but this as yet is not certain.

There will be two performances, one at 1:30 o'clock and the other at 4:00 o'clock. There is no charge for admission and anyone may attend whether a G-E Club member or not.

Deaths

William E. Soest, an employee for the past thirty years, died on January 24. Mr. Soest was employed in the Refrigeration Division. Funeral services were held last Monday at the St. John's Reformed Church with burial in Lindenwood Cemetery.

Sympathy is extended to David Lewis in the death of his mother.

Sympathy is extended to Louis Joseph, Bldg. 6-B, in the death of his mother.

We think it is all right for Dorothy Zeigler, Bldg. 4-3, to play in the snow. But don't believe it is necessary for her to sit in it.

Rish Hall and George Arnold, Bldg. 4-3, brought a map to work with them the other day. After marking off all the places they had been, they couldn't even see the map. Now Rish will have to bring another map.

Fishing was good over the week end, so we hear. At least that's the way we understand the conversation of Joe Burton and Ted Schlup, both of Bldg. 19-3, when Joe said to Ted, "Well, you were fishing I hear." "Yes", said Ted, "We were both suckers once more."

The Schnickelfritz Funsters

Announcement is made of the appearance of the famous Schnickelfritz Band for both free performances and dances at the G-E Club starting February 18.

»» NEWS THROUGH THE PLANTS ««

SANDY SAYS

There is an old saying in Scotland, or at least around Cousin Colin's house, that you should dip into the tobacco pouch as lightly when it is full as when almost empty. I asked Cousin Colin the other day if he always followed that advice.

"Weel, Sandy," he said, "I used tae make a New Year's resolution every year to that effect, but I don't anymore. It's one resolution I never broke. It's no fun tae make one ye don't at least want tae break. Of course I'm speaking of my own pouch."

"I take it from that hazy explanation that you always live up to the saying", I said.

"Yus, what Scotsman doesn't?"

"Weel, my tobacco pouch is always nearly empty anyway, Colin."

No doubt people think Scotsmen talk and think of nothing except being tight, like a Scotsman. Well knowing ye expect it, most Scotsmen emphasize that phase of their lives when you are around.

Of course you might wonder—suppose the tobacco pouch was always full, and never was in danger of being empty. Would you still be careful not to waste any?

Well, a Scotsman would from habit.

It's a good habit too.

Which reminds me of something else. Suppose we compared the pouch to the stuff that goes into the General Electric products we build. In 1932 it was pretty empty. In 1940 it was about full. Next year, it looks as if it is going to be bulging.

Let's don't waste it just because there's a lot there. Its human nature to be careless with stuff when there's lots of it.

And with the rush of shipments, big production, and lots of people showing signs of hysteria about getting things built at any cost, let's not forget economy.

Lets just remember—what we waste never gets into our profit sharing checks.

So let's all do what we're supposed to do in the place we're supposed to do it.—In other words:

"When in Rome, do as the Greeks do."

Robert Benz, Winter Street, would be better off if he would hire someone to do his shopping for him. Being a bowling enthusiast he decided to invest in some shoes to help improve his game. He purchased a pair and immediately set off to the alleys to roll a game. When he opened his package and went to put his shoes on he had two shoes for the left foot, one oxford and one shoe. We don't imagine his score improved any that day.

O, yes, I almost forgot, John Schwanz, Winter Street News Editor has an 8¼ pound baby boy. More power to you as it's really a thrill to have the fellows smoking good cigars.

Roy O'Brien and Bill Gallmeyer have retired from active participation in the noon hour euchre games after acquiring three of the well known "pelts" in two-days' competition. Ray claims the games have an odor similar to that of the little "animal" who bears the pelts.

Virginia McCormick, Bldg. 16-3, sure raises a fuss when she finds her name in the dirt column, but confidentially, we believe she really likes it.

19-4 Spot Jottings

Walter Chaney, our electrician, thinks the stair door is too close to that other door and that there should be a law about it. . . . Martha Woodward recently had a curler demonstration on her hair. Unfortunately the operator did the front but left the back straight—and that my children explains Martha's eccentric hair do. . . . The fan motor line girls gave a pot luck luncheon for Leona Lauer Egts, who has taken on a full time job as a housewife. She was presented several gifts for her home including an electric heating dish, relish dish and tea tools. Best wishes Leona. . . . Melvin looked badly messed up after something went "pop" in his face the other day. . . . This is the sad story of the girl desiring to hear the Mills Brothers who went to the wrong theatre and after buying a ticket threw it away and sought out the right theatre. Adele says, however, that although this may be a costly way to hear the famous quartet it was well worth the money and time involved. You all remember Adele. She is the girl who collects wishbones.

19-5 Office Chatter

George Prince says he even had to show his badge over the phone to talk to someone in Bldg. 4. . . . Carl Rietdorf has been droopy all week because he missed the accident last week. It happened while he was out of town. . . . Gene Pussey reports that everything is under control in Detroit. . . . The only talk around here is basketball. Frank Brindle really seems to take it hard when his favorite team loses. . . . We are very angry with the Ed. for leaving the word pink out of our chatter last week. . . . Next Monday the reporters of the Series and Specialty Motor Division are to be the guests of our superintendent, O. J. Mettler and Mrs. Mettler. Boy, do we rate!

Bldg. 19-5 is proud of their Eleanor who must certainly get an NBC contract after her test last Saturday on the "March of Dimes" program. Eleanor did right smart until her heart jumped up into her throat and she had to wait for it to settle back into place. Don't worry about that, Eleanor, we know a man that sneezed out his false teeth while he was taking his test, and he got a job sneezing for a soap company.

We got over it when Regmore Engeman, Bldg. 19-5, reported she found one of her pay checks she had lost a year ago, but now she reports that the diamond ring she lost last week was found in her back yard. We would like to know just where you bury your valuables. If you don't tell us you are going to find your whole back yard dug up some of these mornings.

Why does Edna Martin, Bldg. 12-B, keep heckling Bill Glenn? Surely not because of the chocolate pies and the five pound box of candy Bill seems to be supplied with.

The present frigid temperature is expected to prevail for quite sometime, we have been informed by Henry Grepke, our weather prophet, who has changed the oil in his wife's washing machine to a grade of lighter consistency.

Ed Glenwith returned from his weekly fishing trip with his usual report of the bag limit, but we have information from reliable sources that he was seen shopping at two different fish markets Saturday p. m. Let's hear your story, Ed.

Is Zat So?

WANTED a super-sleuth to detect the vagabond who took the beautiful calendar of 1941 that was the pride and joy of the Bldg. 17-1 gang. See the inspectors for particulars. . . . Helen Papenbrock of Bldg. 4-5 office insists that husband Henry, Bldg. 17-1, trade in the pile of junk he is driving for something that more resembles an automobile. "Pat" used to be a "Used Car Salesman" so maybe he is afraid he can't drive a bargain! . . . Loyal Decker (the Credit Union President) is a regular pie eater. Don't he know he can't lose that waistline on a diet of pies? . . . To explain that tired, worn-out expression Russell Gibson says that he has been working day and night. He works days here at the plant and at night he works on the railroad. We wonder who Santa brought the train for—Russell or his son? . . . Evidently Bill Fisher likes his food well seasoned. He was seen the other noon at the Cafeteria covering his food with salt. Or do you suppose that was because Harold George loosened the top on the salt shaker? . . . Why doesn't someone warn Garland Meyers before it is too late? He purchased some Copenhagen from the candy lady and is going to try to master the stuff! . . . John Junk is the proud papa of a new baby girl, which is as yet without a name. Suggestions will be appreciated! Congratulations, Johnny. . . . Argen "Ten-point" Denny and Harry Kessler are trying to come to terms so they can bet on the Sectional Basketball Tournament. We hope they settle the argument before March. . . . Clyde Crabill sure is a trusting soul. He leaves part of his lunch on the inspector's bench—or maybe he knew that Veora Habig doesn't like candy! . . . A last minute entry into the Golden Glove Tournament should be Ed Brosche and Henry Papenbrock. All proceeds are to be used to instruct "Pats" relatives in the art of referceing basketball games, according to Ed.

The Question Mark.

A bridal shower was given in honor of Marietta Enderle at the home of Jane Hahn Sunday evening. Other guests were Wanda Carl, Wilma Schamerloh, Eileen Stienburger, Shirley Cunningham, Hilda Mertz, Bonnie Asies, Helen Nahrwold, Marjorie Shrock and Virginia Ostriski. The girls are all from Bldg. 19-2.

BIG FEATURE RIGHTS
PRESENTS

"In Old Santa Fe"

G.E. CLUB

Where: G-E Club.
When: Sunday, February 2nd.
Time: 2 o'clock and 4 o'clock.

Free to anyone producing a G-E Club membership card.

Sunbeams From 17-4

Anyone interested in perfumes, should ask Jack Winebrenner to demonstrate his "Evenings in Van Wert."

What's new: Bonnie Shoner without a headache.

What we want to know is, what part of the pie Mildred Werling likes the best, the crust or the filling. She usually gets the crust.

Bea Roach, Mildred Werling, Florence Hayzlett, Elsie Shannon and Elizabeth Gay report that they all had a lovely time at the China Inn, the other night, except Florence, who seemed to have difficulty with a young man who kept chasing her down the street, insisting that the cigarettes he had found were hers.

At last it's out: Why Agnes Fortney waits around every night. The reason was seen walking down Calhoun Street with her.

The Tall Story Club

Homer Davis, the sailor from the Commutator Dept. in Bldg. 4-5, has a remarkable V-8 according to his own version. Homer filled the gas tank on the Ford in Fort Wayne, drove to Cincinnati and returned to Fort Wayne, stopping only once, that time to remove a milk can full of gas from his tank to prevent it from bursting. After the Sailor had finished his yarn, Jim Wire, of the Black Armature Dept., Bldg. 4-5, sat looking rather dejected. He always thought his Olds was a good car but he never had to draw out any gas. Finally Jim started to grin. He'd tell the boys of his invention. He told what a good manifold heater his car had. It was so hot in fact that he piped the unused part to a spot just in front of the rear wheels and used it for a pavement de-icer. Jim swears its very effective. These stories originated on a sort of Liars Club formed by smokers in the stairway lobby in Bldg. 4-5.

Burt Hardendorf, Bldg. 4-5, seems to be having very bad luck. First, his number was called for the draft and he was to leave last Thursday. He took sick and was operated on Saturday. But he is getting along fine and we are all wishing you a quick recovery, Burt. Better luck in the future.

That enlarged chest expansion of Vier Johnston, Bldg. 4-1, is caused by his having won 1st prize in the Agricultural Show at Van Wert last week, on "Soy Beans Grown On The Back Forty." We know little about soy beans but think they must have been as good as he claims as he competed with entries from all over the United States. So Vier can well be proud of the blue ribbon he displays. We expect to see him wearing it on his coat any day now.

How unfortunate. These apprentice boys of Bldg. 26-5 are in a sad, sad way since the damsels in the aircraft have moved.

Earl Lenz cannot kid the gang about working overtime. They can tell by the size of his lunch or should I say grub stake?

It has been suggested by some of our co-workers in Bldg. 4-3 that the parking lot east of Fairfield Avenue, which contains a goodly amount of land, be turned into an all G-E Conservation Club for the benefit of all employees who cannot afford to take trips into the country. It has wonderful possibilities. Fish rearing ponds could be established, and in the fall of the year, wild duck shoots could be conducted there. Think it over, boys, and whoop it up.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

We have the word of a married man that stockings are the most expensive item in a woman's wardrobe. From our own experience, I feel sure that most of us gals agree with him. Runs are the main cause for the short life expectancy of our silk or nylon stockings, and hosiery manufacturers state the 90 per cent of runs are due to carelessness in handling and could be avoided.

Hangnails and rings are a great source of snagged and pulled threads. Also women are careless about where they throw their stockings. The careful person will have a special box or bag for stockings.

One of the worst ways to torture hosiery is to put it on your foot and pull, as one might pull on a boot. The stocking is apt to break in the corner of the ankle. This strain is responsible for about 75 per cent of the stocking runs. Hosiery should be worked on the foot like a glove, by rolling the stocking down to the foot, fitting the toes into the toe of the stocking, then working the leg up carefully. This guarantees a straight seam line.

Hot water, strong soap, too much muscle and too little rinsing are mistakes women make in washing their stockings. They should be washed immediately after every wearing to remove the perspiration before it damages the silk. Use lukewarm water, neither cold nor hot, with a good pure soapsuds. Don't soak the hosiery beforehand, nor apply soap directly to the silk. Do not rub or twist. Rinse in three clear, lukewarm waters and squeeze out the water, but do not wring the stockings. Stockings should not be dried on top of a radiator or in a dryer, nor should they be hung to dry in the direct rays of the sun as intense heat has a damaging effect on the silk fiber.

Buy stockings the right size, the right length, put them on carefully, wash them often, and they will give you better service.

Mary Coggeshall, Bldg. 2-2, enjoys free gum but it is reported that red pepper does not improve the flavor.

Louis Meier and Bing Englebrecht of the wire department were observed the other morning playing "yard dicks" along the Wabash tracks. Like the Northwest Mounties they got their man. Warning, it ain't safe no longer to hop trains near the plant while these two boys are on the job.

Paul Kampf, former cyclone of Bldg. 8-1, keeps repeating to his fellow workers that his baby is as smart as her dad. He should wait until the young lady is old enough to defend herself.

What's all this about Harry Parker and Art Brandenburger, the Brown Saddles, and squirrels?

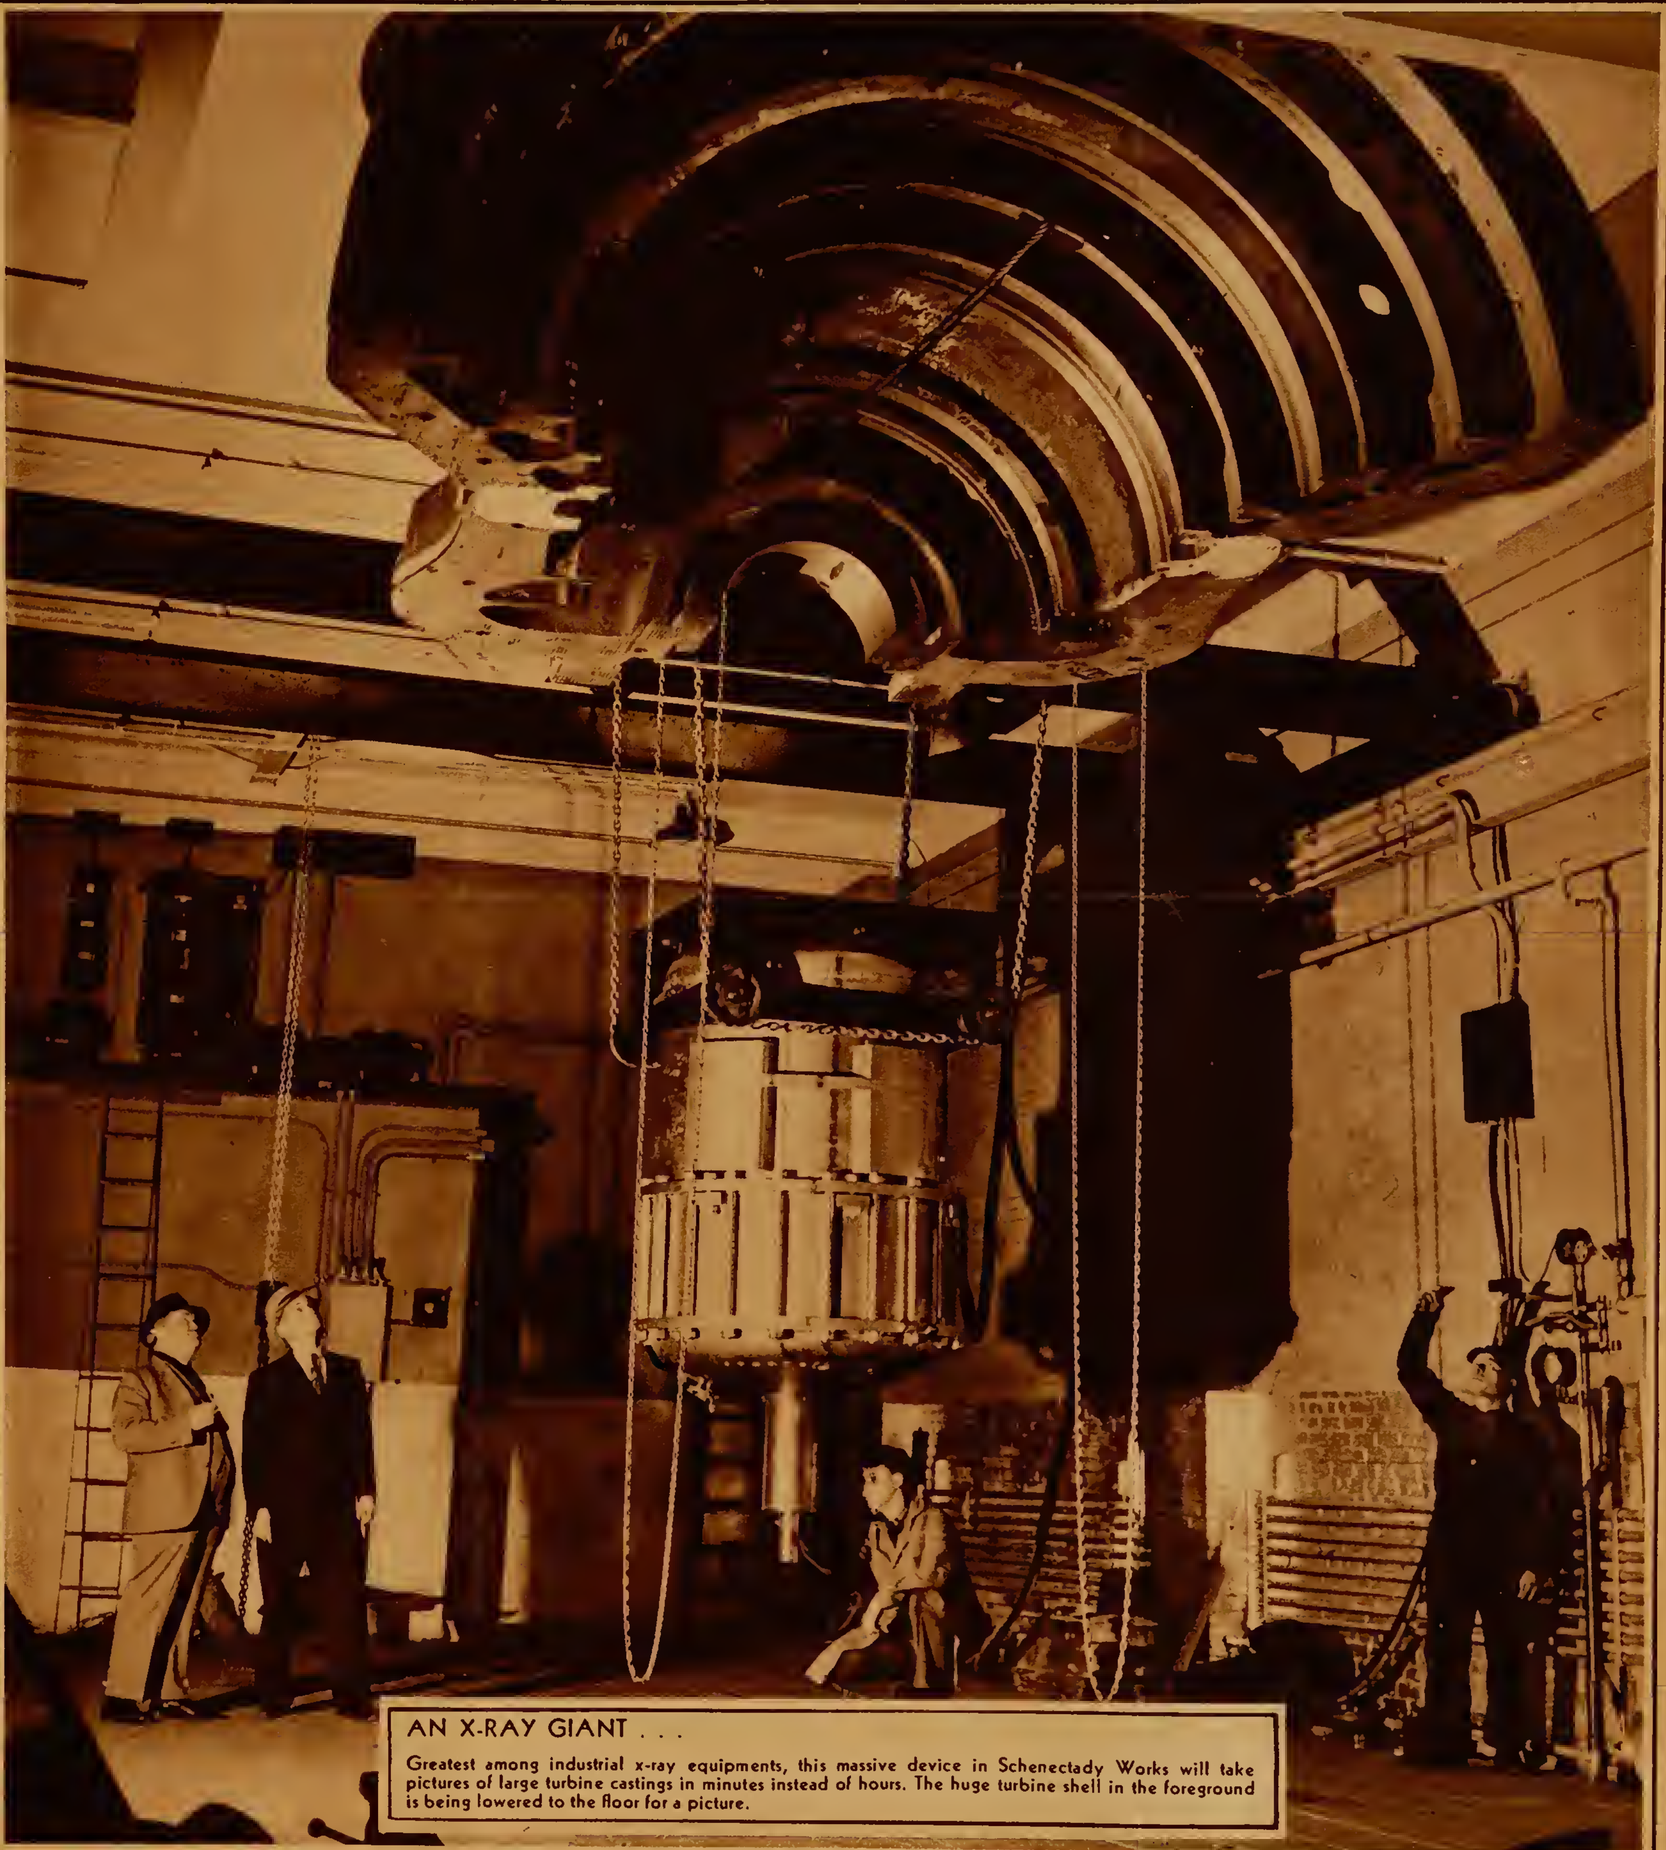
It's a long story about Otto Roehm, yes, it happened about Christmas time. Otto went shopping for his wife and quite naturally forgot sizes. So he called home, but no answer, and no nickel back. Otto promptly called the operator and back came the nickel—by mail.

Carl "Pudge" Clevenger, Bldg. 4-3, sure is becoming one tough hombre. He wears a cement apron and chews his food with cast iron molars. The first thing we know he will be parting his hair with a six shooter.

GENERAL ELECTRIC

CANDID CAMERA CAPTURES

VOL. 6 January 31, 1941 NO. 1

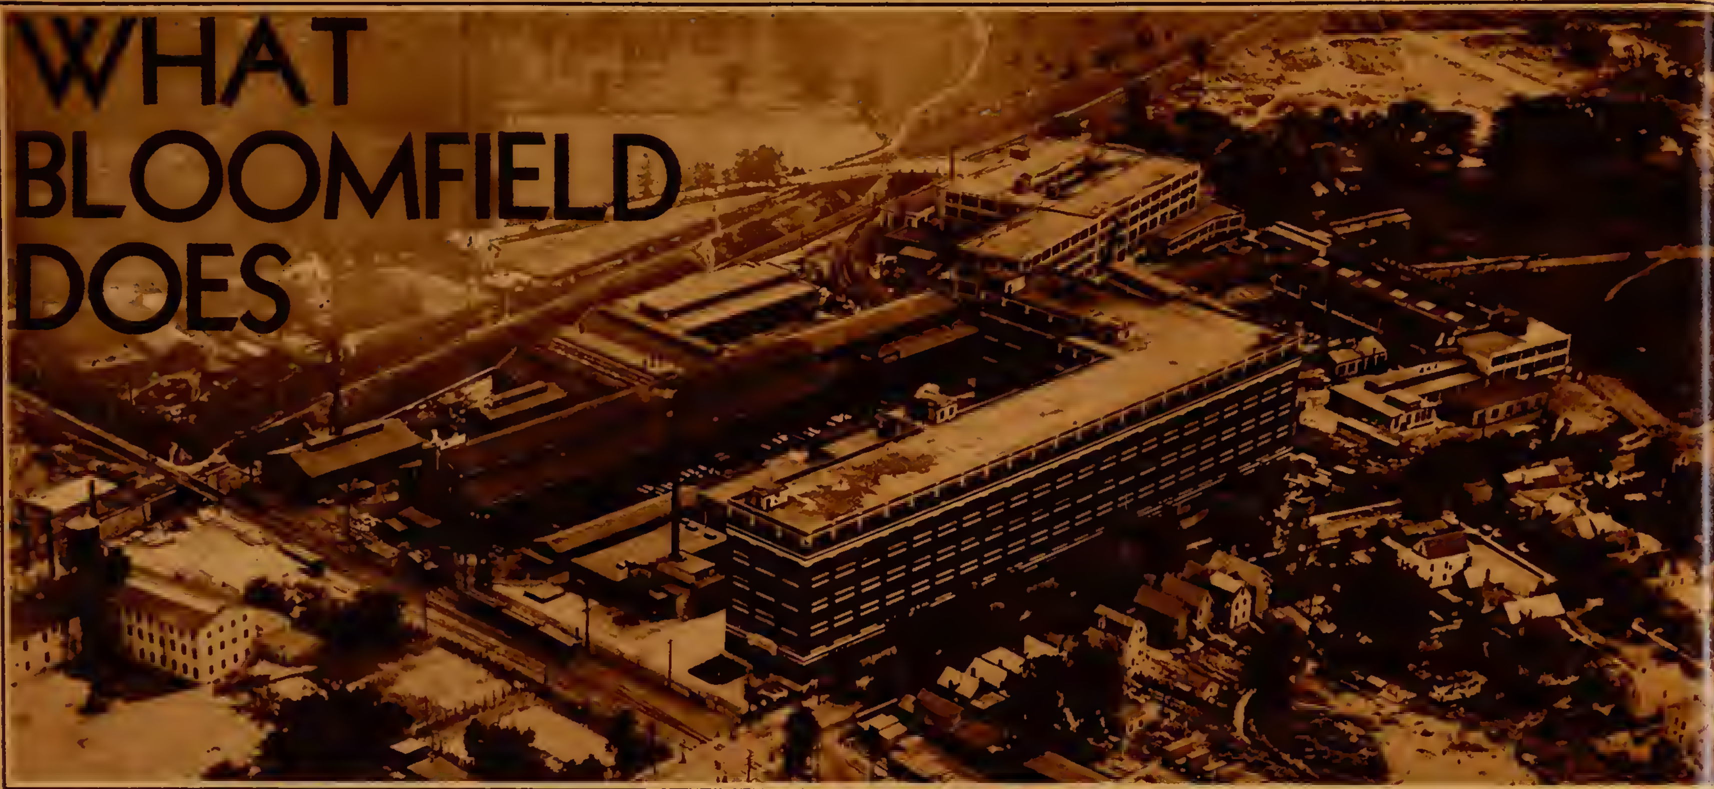


AN X-RAY GIANT . . .

Greatest among industrial x-ray equipments, this massive device in Schenectady Works will take pictures of large turbine castings in minutes instead of hours. The huge turbine shell in the foreground is being lowered to the floor for a picture.

DEFENSE, Our Big Job This Year

WHAT BLOOMFIELD DOES



IN OUR BLOOMFIELD WORKS . . .

we make air conditioning and domestic heating equipment and a wide variety of intricate control apparatus used in thousands of applications throughout the industrial world. Here are few pictures taken recently in the Works showing the work being done by Works employees.

MORE SWITCH ASSEMBLY . . .

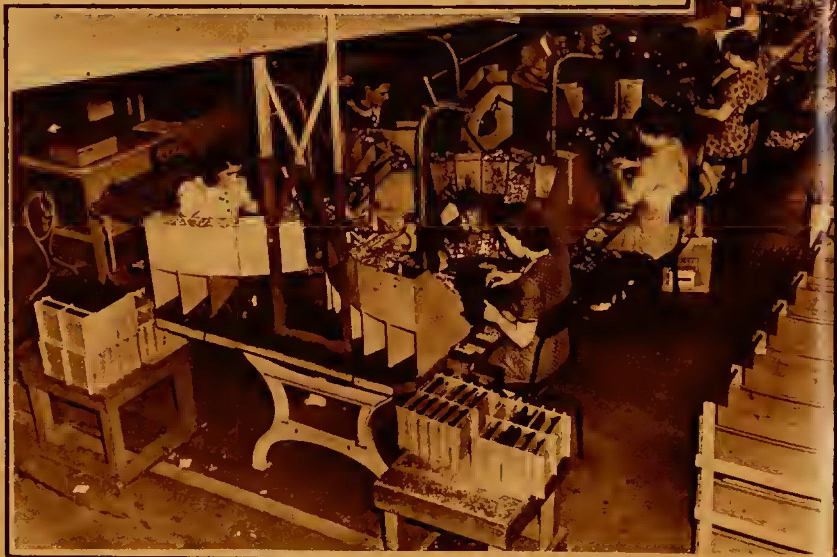
keeps the nimble fingers of these young ladies flying. Right, Alice Etzel, Grace McDermott and May Mulcahey. Left, front to back, Catherine Henry and Alice Neilson.

JOAN McCOMBIE CHECKS . . .

magnet coils as they come off the winding machine. Coils are widely used in various industrial control devices.

SWITCHES WITH 300 . . .

parts and more are being assembled progressively by these girls in an ultra-modern set-up. Right, front to back are Emma Gielen, Anna Genetski, Catherine Caulfield. Left, front to back are Jean Miller, Doris Eby, Dorothy Cohen.



STORE COOLER GETTING . . .

its final touches from Mike Rizzo as it ends its journey down the assembly line.

HUGH HANLEY BRAZING . . .

large coils used in air conditioning apparatus.

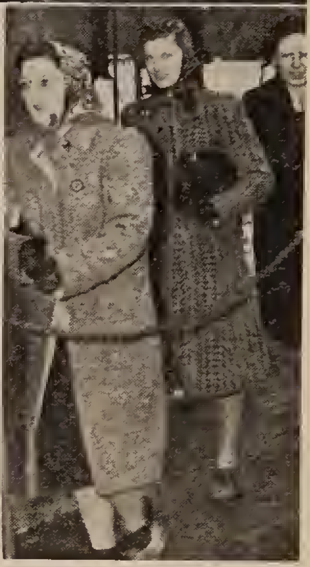
Time Wasted Is Time Lost

Identification Badge Consciousness Increases As Deadline Nears

With the enforcement of the "no badge, no admittance" ruling set for Monday, March 3, a spot survey indicates most employees are happily forming the habit of wearing their badges every day and wearing them in a conspicuous place. A few random "shots" taken at the Main Gate by the WORKS NEWS photographer show that for the most part employees are wearing their badges as they should be worn. In the pictures are upper row, left to right: Margurite Steward, Bldg. 17-3; Mildred Oyer, Bldg. 12-3; Dale Romy and John Snyder, Bldg. 12-2; Esther Shannon, Bldg. 8-2. Lower left, G. R. Plummer, Bldg. 6-4 and lower right, Elinore Gilbert, Bldg. 12-1, all with their badges in positions where they can easily be seen.



Thisa And Thata 19-5

We have been told on good authority that Bill is taking his son skating at the Reservoir so that he can park on the street. Careful, Bill, you don't get a fender ripped off. . . . Dorothy May Craigs' picture was taken the other day at the gate because she was wearing her badge in the right place. Too bad we aren't all bright. . . . While Frieda Knoche was getting in her car last week, the wind blew her hat off. After the hat went Frieda, and down went Frieda before she grabbed it. . . . Frances Smith is our new safety committeeman. Give her all the help you can to make our department the safest in the plant.

Carry On - Carry On

A phantom writer has just begun,
To write the news in seventeen one,
So, in order to keep that column
there,
I think it proper to declare.
That my immediate resignation,
Can be the only explanation.
Now send your manuscript
To Mildred Gertz, four six.
Who, I am sure, will prevail upon
You to carry on, carry on.

Attention married men: If you want a story to give the little bundle of love, by all means see Spike Poorman in Bldg. 17-2. After watching and hearing him during the past season use his great imagination and uncanny ability to stretch things, his fellow workers claimed him the winner of a very fine medal.

Friday was "Field Day" for Ray Kierspe. Cigars, cigarettes, and chewing gum; nothing escaped him.

Bldg. 4-4

Everett Cox drives his late model car part way to work and walks the rest of the way. Must be the Scotch in him.

Merle Dukes and Buck Sesslar must have been after the same big game as they both have the same kind of cap.

Ed. Klausing has had visions of being a policeman or a fireman, but the best he has been able to do so far is an appointment on the Safety Committee.

We'll bet even Judge Schannen hasn't heard anything more original than Walter Doctor's alibi for the damaged front end of his car. . . . He ran into a snow storm.

At the last meeting of the Dirty Dozen Club, Leslie Richter and Norbert Gase were prevented from saving their meld three times in a row by Fred Wilcox and Walt Holloway. Some playing, I'll say not. The meeting was held at "Ife" Holmes' new home which Merle Dukes tried his best to burn down. The best he could do was three holes in the card table, though.

We hear that Bob Kissinger is giving up smoking. She must be a beauteous damsel, Bob, to promote such a sacrifice.

How long do you suppose Johnny (we have it in stock) Burnett will have to be married before he stops blushing when the office girls come out to talk to him? Lela Sieber says she got a taste of her own medicine when Bill Travers, Bldg. 20, who rides to work with Lela and her hubby, and who has to listen to her version of back seat driving, gave her parking instructions on Washington Street the other day.

We are all glad to know that Mary Klever's shoulder is improved.

We wonder if Kathryn Poeling really likes to sweep or if she just wanted to help Paul.

Angie is on days again. We certainly hope she has good luck this time.

Well, Cliff, we won't tell your wife how graceful you look with a broom. Also the KC girls are looking forward to the big cake they were promised. Some like chocolate, while others like yellow cake. What I am wondering is, will I get a piece of cake too?

We would like to know the brand Carl Borchert smokes now that makes the girls stop him and tell him he smells good.

Borings From 4-4 Office

'Tis only your own dear little Elmer, the field mouse, snooping here and there to bring you news behind the news.

Vern Daseler's little mouse died January 27, 1442. I'll bet you know that he was my honorable competitor, and I'll miss him a lot. Vern and the boys were quite broken up over losing the other little rat.

Mrs. L. Hampton Rehm Roe, Doris Roe to you, makes the best candy, so she says. You can't prove it by us 'cause she has promised to bring us some for two weeks. Doris, the proof of fudge is in the eating.

The annual meeting of Bldg. 4-4 girls was held Tuesday at 1:15. 'Twas quite a conference and we have selected two new girls to take the place of Mary Bangert and Ardeth Hemp, who are both leaving to take up the duty of household tasks. Good luck girls, we'll miss you a plenty.

Jean Bugert and Betty (Isa) Mougin have been seen around town kibitzing a bit together.

Evie Meyers and Virginia Miller, Bldg. 18-5, were seen talking to Evie's one and only the other noon at Washington and Calhoun. Gee—heck.

Saturday night is the Indiana-Purdue game at Lafayette. Of course, Marge Boerger will say Indiana will beat the socks off Purdue, and Mike Brayer will, of course, stick up for his Alma Mater (or Pater). So folks, the bets are on again.

Ralph Fishback could hardly wait until the WORKS NEWS came out last week so that he could gaze gracefully at his picture that he knew would be shown. He had attended the G-E House of Magic and he sat in the front row so he could be seen better in the picture.

Johnny Burnett has an executive title at the present time. It's J. B. Now doesn't that sound aristocratic?

LaVon Price said the other day when I was talking to my best girl, "What well known Rat was seen talking to another well known Rat?" Of course, it didn't break any ice with me 'cause I did not know to whom she was referring.

Bill (never a hair out of place) Weber was telling the boys he now is wearing his $12.00 clod hoppers, (shoes to you) and Joe had to tell him the floor had been clean and waxed for weeks before. But he was just wondering how long they would remain that way.

'Tis enough for now.

Sincerely as ever,

Elmer, the Field Mouse.
(The Rat to You.)

Apparatus: Carl Wiegman, 2210 Oliver St.

Winter Street: Murvil Cranfill, 3305 Broadway; Guy Carnes, 518 E. Creighton Ave.

Motor Generator: Clarence Horstman, 2724 Weisser Park Ave.

General Service: Ralph Van Auken, 472 Penn Ave.; Elmer Hatfield, 2925 Euclid Ave.

Left the Hospital: Ortha Sexton, Carrie Menges, Elva McMaken, Edith Schreiner, Florence Merriman.

Returned to work: Ruth Rasp, Eleanor Plock, Margaret Steward, Mary Linder, Betty Roesner, June Lambert, Addie Boone, Franklin Clubon, Marvin Diehm, Martin Blakley, Paul Schermeyer, Harry Beltz, Harry Savage, Mary Bakle, Gertrude Beckner, Bonnie Hart.

Effie Wyatt, Bldg. 4-3, hates to take a few steps through the snow. But she sure loves to ride miles on an elevator.

Attention Girls

Amelia Yovan, Bldg. 19-5, has been coming through the park on her way to and from work. The other morning she appeared with a beautiful diamond and is quoted as saying "that's what I get when I go walking in the park." All we ever got was a warning not to cut across the grass.

Anna Pearson, Bldg. 19-5, has returned from a trip to Florida. She reports that while there she saw an ostrich lay an egg. Now Anna don't tell us you went all the way to Florida to see that! You can see the same thing on any farm on a smaller scale.

We hear that the collection of striped kittys Bill Gallmeyer, Bldg. 19-5 is being handed in the noon-day euchre games is really getting him down.

Lost

Virginia Sanders lost her good black kid gloves last Friday. They are size 6¾. If anyone should happen to find them, please return them to her in Bldg. 4-4, Office.

Warning — Martha J. Clark, Bldg. 4-3, is learning how to ice skate at the Reservoir. With the aid of her brother and a big pillow, Janie thought she was doing fine. She also says, we quote, "My outfit sure is a humdinger" unquote.

Mildred Harber, Bldg. 4-3, really gives the chair manufacturers a lot of business. But we hope in the future that she won't land underneath her desk again.

Harry Parker, the "Candy Kid" of Bldg. 4-3 had all the boys believing he was the king of the dopes as Harry certainly likes his white peppermint candies.

Now Is The Time To Cultivate That Habit — Wear Your Badge

Rea Magnet Will Meet Club Cagers Wednesday Night

Bolyard and Glass of South Side Fame Will Appear With Opposition

Rea Magnet Wire, another one of the city's top-notch basketball teams, will take on the G-E Industrials Wednesday, February 5 at the Club gym at 8:30 o'clock. There will, as usual, be no admission charge, anyone may attend whether a G-E Club member or not.

Showing no partiality to any high school Rea's roster includes star players from five different schools. Probably the most prominent on the list are two members of South Side's State Championship five, Bob Bolyard, cat-like, high scoring forward and Jim Glass, skyscraper center, Ivan Barclay and Ross Leakey, both remembered as better than average North Side ball players, also do their bucket balling for Rea's. Central's only representative, but a worthy one, is Joe Celarek.

For the other three members of their aggregation the Rea managers picked out three out-of-town boys, Hoover and Bell of Ossian and Dienelt of New Haven. Hoover and Bell will be remembered as the two Ossian boys that did the most damage in side tracking South Side's bid for a second successive championship by beating the supposedly invincible Archers in the final game of the Regional tourney at Huntington. Dienelt was the high scorer for the New Haven Bulldogs for three successive seasons and that in itself testifies to his ability and consistency.

Both the Rea Magnet Wire and G-E Industrials have tasted defeat this year but nevertheless both clubs are still regarded as two of the city's finest. They are about equal in height, weight and speed but as to equality in ability that must be decided Wednesday.

A preliminary matching the Wayne Knits against the Apprentice B will start at 7:30 o'clock.

Winter Street Heads Volleyball

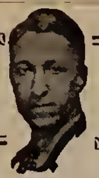
Winter Street after having their consecutive winning streak snapped at 26 games last week by Small Motor Factory, started another one Thursday by dropping Main Office three times 15-3, 15-12, 15-7.

Main Office, seeming to be dead on their feet, did not play their customary heads-up ball, consequently Winter Street had an easy time scoring their sweep.

These three wins plus Small Motor Draftings two out of three triumphs over Small Motor Factory once again elevated Winter Street into undisputed possession of first place in the G-E Inter-department Volleyball League.

In the other two series of last week's card Small Motor Production trounced the Apprentice 15-6; 15-8; trounced the Apprentice 15-6, 15-8, 15-1, and Small Motor Standards after dropping the first encounter to Apparatus-Transformer 13-15 took the last two 15-0, 15-6.

IN THE ROUGH



By WALTER SUNIER

I think that I shall never see
A man refuse a game that's free.
A man whose hungry eyes are fixed
Upon a match that's being mixed.
A man who doesn't always wear
A golfing cap upon his hair;
Upon whose bosom snow has lain;
Who intimately cusses rain.
Golf is loved by men like me,
But, gosh, who wants to hit a tree?

The wind is no respecter of trees. The Brookwoodites will miss the old gnarled tree that stood to the southwest of No. 9 green as it was blown down by the big blow that blew in November. A big branch was blown off the apple tree that stands at the northwest corner of No. 18 green. The worst catastrophe was on No. 4 where one of the large corner trees in the group on the right-hand side of the fairway was blown down. Or was it a catastrophe to golfers? There are some that have been tempted to sneak out with an axe some moonlight night and cut down the tree that stands farthest toward the fairly way on the left side.

Now they have self-finding golf tees. A little flourescent powder added to Plastacele and you have that which makes Flor-s-Ent Plastic Golf Tees. They shine sufficiently under the light of the sun to render them easily findable.

The field representative of the General Electric Home Bureau in Philadelphia tells a powerful story about a woman who was so struck by a new home she looked at, one Sunday morning, that she went to the golf course and persuaded her husband to leave his Sunday foursome. She led him, spikes and all, to the home. Still wearing his spikes, he bought the house. The G-E all-electric kitchen and other electrical equipment played an important part in the sale. They must have played a whopping big part to ever make him buy under such circumstances.

Main Office And West Side Battle For Cage Lead

With a crack at the first half championship of the G-E Inter-department Basketball League at stake West Side and Main Office tangled in a "rip-snortin'" battle Wednesday with the Westerners coming out top team in a 20-19 decision. Apprentice A, the other contender for the title, trounced the Squares 44 to 22 to become eligible to meet West Side, Friday, February 14th, in a playoff for the championship.

Both West Side and Main Office concentrated on defense consequently good shots were few and far between. A great number of personal fouls were called but neither club seemed to be able to take advantage of their charity tosses, the Office missing eleven and the Westerners muffing eight. West Side, with Adams and Matter providing most of the markers opened scoring festivities and maintained a slight lead of 4 to 5 points through the entire game. Leading 20 to 15 with only a minute to go, the Westerners attempted to stall out the last sixty seconds but Dick Kent, who had already tallied eight of the Office's points, broke up three passes, two of them he turned into scores and on the last one he just missed a long shot that would have turned the tide of battle.

Apprentice A, sensing a chance to successfully defend their last year's title, really turned on the heat in the last half to down the always hard fighting Squares 44 to 22. The A's started out rather slow, having only a 20-13 half time advantage but from then on they poured in the buckets running up a 35-18 third quarter margin, and then managed to maintain this lead throughout the last stanza. Lauer and Lowden, with nine and ten points respectively, led the Apprentice attack while Langenberg's eleven and Han's eight gave them top honors for the Squares.

Zollner's Pistons Take Club Cagers

Convincingly displaying to an overflow crowd of fans why they are considered the best basketball team in Fort Wayne, Zollner's Pistons swamped the G-E Industrials 52 to 30 at the Club gym Wednesday.

Zollner's fast, accurate passing attack time and time again shook a man loose for either a long try or an under bucket cinch shot and the few that they did miss were quickly turned into two points on sensational rebounding on the part of Hamilton or Keller.

The Club team in the early stages of the game seemed to have trouble making effective passes and this fault gave way during the last half to rebound lapses.

Getting nine points in the first three minutes Zollner's took over a commanding lead that they never relinquished. Hilgeman and Hamilton continued to hit every possible type of shot during the second quarter to give the Pistons a 33-17 half-time lead. The Industrials, although hopelessly behind, kept on battling with everything they had but Zollner buckets continued to pour in.

Hilgeman, former G-E Club star, celebrated home-coming by leading Zollner's attack with 14 markers closely followed by Hamilton's 13. The majority of the Industrial scoring punch was provided by Weigand and Marquette with 12 and 7 points respectively.

With Bill Hanley, Small Motor Factory center, feeding accurate needle-like passes to Rabus and Dent, who then turned them into buckets, the Factory had a comparative easy time trimming Apprentice B as the score of 35 to 14 indicates. Dent was the Factory's whole offense during the first half, getting ten markers and Rabus took over the scoring burden during the last two cantos, tallying nine. Rolfing's four field goals made him high for the A's.

Refrigeration Bowling

By Bob Ringle

That little black line is going to reach out some day and scream out loud "what do you think I'm here for?" You shouldn't rant and tear your hair, Benz, when you step over the foul line. We saw your toe peeping over the edge. Schwartz and Geller rolled up their sleeves and proceeded to chalk up a few high counts. Schwartz got 242 while Geller got 246-202 and 149 for a total of 590—some bowling. During a recent session Floyd Leitz saw he was going over the foul line so he did a tight rope act and jumped for the gutter. The telephone rang nevertheless, but Floyd still claims he didn't deserve the foul, maybe because of the tight rope act. Before we forget we must mention Beaty's 220, Waltz's 219, Rineheart's 203 and Blomenberg's 201.

Dust and dirt from the bowling gutters: Homer Meeker, secretary of the Transformer League, had to combine "prayers and body english" Friday to break a hundred—clipped off 20 pins in the last frame for a magnificent 101 total . . . Clickers and Gophers of the Elex Monday Night League put a great three game battle with the second ending in a deadheat 686 apiece—Gophers won the roll-off . . .The Pitchers in that tough G-E Major League established a new high single game Wednesday with a 1060 count and also a new high three game total, 2735 . ·. . Doehrman, G-E Major League veteran, is sure showing the youngsters how to bowl, getting a new high single game of 245 and also coming through with a record breaking second half three game total of 663 . . . R. Walt, of the Small Motor League, also had a red-hot night Wednesday, batting off a three game mark of 663 . . . Very pretty traveling kit the Small Motor League gave Ed Horning, secretary, as a going away gift.

Special Classes Are Offered By Rod-Gun Club

In an effort to improve the G-E Rod and Gun Club's rifle team off-hand shooting a series of special classes are being held at the Dehler-Hughes range on Tuesday nights. The class on January 21 was conducted by Guy Raymond, prominent local rifle and pistol shot. The class was unique in that but two bullets were issued each contestant with the instruction to fire ten shots. Thus the contestants were entirely unaware when actual scores were to be made.

Some unusual scores were made. Elmer Pion, Bldg. 4-3, and J. Lenis, Bldg. 20-1, tied with a total of 18 each. Pion won the final shoot-off with a final score of 19. Excellent scores were made by many newcomers.

The class on January 28 is being instructed by Burl Tillman, Bldg. 19-1, who is a veteran of Camp Perry and has received a number of championship medals. These classes are open to all members of the G-E Rod and Gun Club. All persons interested are invited to visit the Dehler-Hughes range any Tuesday evening.

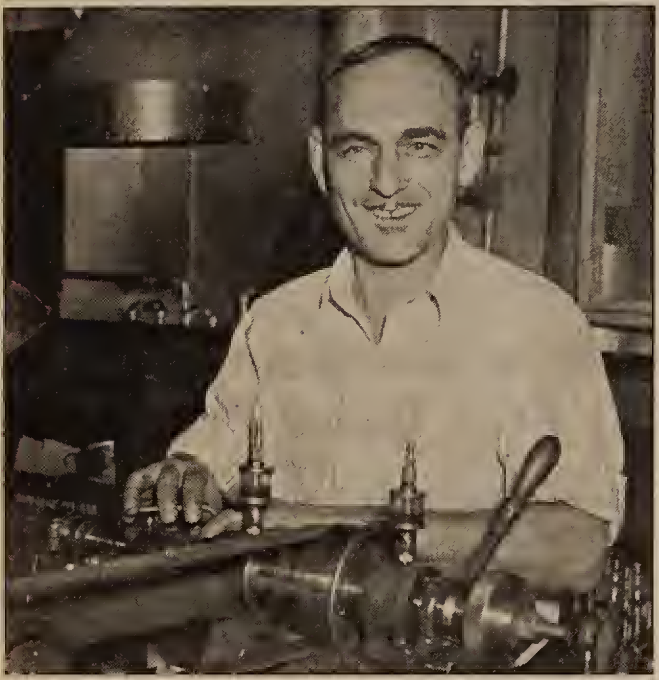
M.B.A. Pays $63,415 During Past Year

A New Idea Nets $100.00



Ronald G. Tobias, Bldg. 19-5, leader in the latest suggestion list had an idea for changes to commutator turning operations. The idea clicked and a suggestion award of $100.00 resulted.

Hundred Fifty-Seven Profit By Suggestions

Total Of $1,262 Is Paid To Fort Wayne Works Suggestors During Four Week Period

A total of one hundred and fifty-seven suggestions submitted during a period of four weeks netted Fort Wayne Works employees $1,262.50, it is announced in the latest suggestion award list released by the Suggestion Committee.

Leader in the list is Ronald G. Tobias, Bldg. 19-5, who in evolving changes to commutator turning operations earned for himself an award of $100.00. Second on the list is George F. Huber, Bldg. 12-B, who received an award of $70.00 following his suggestion to increase the limits of width material on automatic cutters.

Eldon L. Braden, Bldg. 26-3, devised a new method for checking coils and received an award of $50, and Art E. Swain, Bldg. 19-2, cashed in to the extent of $40 on his idea for improvements to equalizer forming fixtures. A suggestion for changes in certain transformer coils in construction netted $30 for Donald B. Poland, Bldg. 26-3, and a suggestion to provide special crane hooks for frames brought $25 to Clayton Wilt, Bldg. 27-1.

Five awards of $20 each were made to the following employees: E. Hans, Bldg. 19-3, changes to operations at cover handles; E. H. Hagadorn, Bldg. 18-5, special printing on tracing cloth; Wilbur B. Putt, Bldg. 6-B, installing name plate stamping equipment; E. Lindman, Bldg. 19-5, salvaging commutators, and Charles D. Castle, Bldg.

(Continued on Page 2)

Elex Club Plans Theater Party

Although it will be under the auspices of the second shift executive board of the Elex Club and designed for members of the second shift, all Elex Club members are invited to attend the play "Our American Cousin" at the Civic theater on Sunday, February 16. It will be recalled that this is the play attended by President Abraham Lincoln at the time he was assassinated.

Noon luncheon will be served at the Chatterbox following which the girls will attend the play. The tickets for the luncheon are 75c, which includes the admission to the theater. All seats will be reserved

Safety Prize Added To "Mile o' Dimes"

When the Transformer Division group, operating under the foremanship of L. A. Bond, won a prize for their safety record during December the question was raised as to the best use to which the prize money could be applied. It was unanimously decided that the money be contributed to "The Mile o' Dimes" campaign conducted to raise funds to fight infantile paralysis. An expression of appreciation was tendered members of the department for their generous action.

$77,477 Netted By Suggestors In Past Year

Fort Wayne Works Fourth In Suggestion Awards During 1940

During 1940, employees of the Company contributed 23 per cent more in the way of new ideas, by way of the Suggestion System than they did in 1939, according to the annual report of the Suggestion Committee just completed. In 1939, 26,901 workers came through with ideas and in 1940, 33,409 set down their thoughts upon paper for the various Works committees to study. As a result, 11,510 employees received $77,477 for their efforts or 21 per cent more than 10,121 received in 1939 when the total amount of awards paid was $63,909.

Totals of awards paid in various Works during 1940 are as follows: Schenectady, $16,519; Lynn, $14,709; Pittsfield, $7,181; Erie, $7,727; Fort Wayne, $8,836; Bloomfield, $1,015; Bridgeport, $16,925; Philadelphia, $2,030 and Oakland, $96.

Henry Moyer Retires After Long Service

Henry Moyer, an employee for the past twenty-three years, has retired from service. Henry started work in the Transformer Division, Bldg. 27, on June 7, 1917, and he remained in this division associated with the same group during his entire period of service.

A reception was held for Mr. Moyer on his final day of work during which his many friends extended their best wishes for a long life of health and happiness and presented him with a beautiful lamp and an easy chair. Mr. Moyer lives at 1023 Home Avenue and invites his friends to visit him.

More Than $1,200 A Week Paid Members

$40,450 Paid In Insurance In December

Death and Disability claims under the Company's Group Life Insurance Plan totaled $40,450 during the month of December in seven of the major apparatus Works of the Company, according to the monthly report compiled in the office of the secretary. Claims are paid on the terms of the Free and Additional provisions of the Plan.

Schenectady Works had three claims for a total of $10,500. There were three claims from Pittsfield Works for a total of $10,300. In Lynn there were two claims for a total of $5,500. Likewise in Bridgeport were two claims for a total of $5,000. West Lynn had one claim for a total of $2,150. Fort Wayne Works had one claim for a total of $3,500, and Philadelphia had one claim for a total of $3,500.

The total of death claims paid during December, 1940 was $75,279 throughout the entire Company, including district offices and employees who had been retired under the Pension Plans of the Company.

That the Mutual Benefit Association performed a great and far reaching service during 1940 in the instances of death and illness among Fort Wayne Works employees is demonstrated by a report just completed which shows that during the year a total of $63,415 was distributed during the twelve months. This compares with $55,900 during 1939.

Sick benefits, the largest item, totaled $35,918, while accident claims totaled $11,039. Hospitalization payments made during the year amounted to $11,146 and payments to beneficiaries upon the death of association members totaled $5,600.

Almost without exception every eligible employee of the Fort Wayne Works is a member of the Association. Dues collected during the year amounted to $88,020. Dues are being collected at the present time, but the method of operating the association permits exceptionally long periods during which no dues are collected. These periods usually extend for more than one-half year at a time.

The many advantages to membership have made the Association an extremely popular one. The fact that all the money collected as dues is paid back to members makes the organization a most inexpensive form of protection.

New Checking Idea Brings Check

Eldon Braden, Bldg. 26-3, discovered a new way for checking coils. It sounded practical and so he presented it in the form of a suggestion. His checking suggestion brought him a check for $50.00.

Volume 24 Friday, February 7, 1941 Number 51

• Experts At Home

A man never is a hero in his home town, they say. And it might be added that an expert and careful workman often is no such thing in his own home, either.

For instance, you probably know an expert automobile mechanic who won't repair his own car.

How about the master plumber who tolerates leaky faucets in his own home? Or the lawyers who die without making wills and leave their estates in a mess?

Whether a man wants to take his safety home with him or not, is, of course, his own business. If he doesn't, it's apt to be hard on the home folks, and not quite fair to them. It doesn't make sense that accidents should occur in the home of a man whose training and experience have taught him to prevent and avoid accidents at the plant.

But occur they do, and in great numbers.

Safety work in industry has progressed steadily through the years, actually saving lives every day. Home accidents, on the other hand, continue to kill and injure people at an almost unchecked rate.

Approximately two persons are killed in home accidents for every one person killed in an industrial accident. And for every person injured non-fatally in industry, approximately three are injured in home accidents!

Home accidents are second only to automobile accidents as killers.

If you are a safety expert at the plant, try your hand at being one at home.

It Was Worth $70.00

Lots of people could have figured it out but George F. Huber, Bldg. 12-B, actually did. George suggested increasing the limits of width material on automatic cutters and as a result received a suggestion award of $70.00.

Suggestion Awards

(Continued from Page 1)

27-1, improvements to welding operations.

Five awards of $15 each were made as follows: Ruth Hollman, Bldg. 18-4, make certain changes to log sheets in duplicate. This was an additional award to an award of $5.00 previously made; Louis Maier, Bldg. 8-1, improvements at capstans; Ralph R. Heminger, Bldg. 4-2, omitting shaft heights check; Layton High, Bldg. 6-B, changes to stop a loweration station, and Verne E. Pray, Bldg. 19-4, revising tests on certain small motors. This award was in addition to an award of $25 previously made.

Other awards ranging from $5 to $12.50 were made to the following employees:

P. H. Vorholzer, Bldg. 10-1; Herbert W. Schwartz, Bldg. 11-A; Harry J. Stahl, Bldg. 4-4; Jean Fell, Bldg. 6-4; L. McClure, Bldg. 4-2; Joe H. Cline, Bldg. 4-4; Eugene C. Boyle, Bldg. 4-2; Clair A. Wiebke, Bldg. 26-B; Ethel Evans, Bldg. 4-4; Robert J. Arnett, Bldg. 4-4; Ralph Sample, Bldg. 5-1; Guy K. Crabill, Bldg. 4-4; George H. Selby, Bldg. 12-1; Marcella Davis, Bldg. 26-3; Leonard Jenne, Bldg. 4-2; J. Schoppman, Bldg. 26-B; Chas. H. Gordon, Bldg. 4-2; Louis A. Gocke, Bldg. 4-2; Wm. Doell, Bldg. 4-2; Arthur F. Sorg, Bldg. 4-2; Edward C. Leitz, Bldg. 26-B.

Irma M. Roby, Bldg. 19-5; Mary Agnes Dresen, Bldg. 19-5; Grace Beck, Bldg. 19-5; Harry P. Hyndman, Bldg. 19-5; C. Pfeil, Bldg. 19-4; Frank Brindle, Bldg. 19-4; Edward J. Cade, Bldg. 19-4; Clarice M. Fyock, Bldg. 19-5; Elmer E. Hazelett, Bldg. 26-3; Melba Adamski, Bldg. 19-5; Arthur Luessenhop, Bldg. 19-5; Wilbert B. Putt, Bldg. 6-B; Clarence Scheiman, Bldg. 19-5; John G. An Extra $30.00 For Don Poland

Donald B. Poland, Bldg. 26-3, is interested in transformer coil construction. Don saw an opportunity to make changes in the operations, placed his idea on a suggestion blank—and received $30.00.

Tickets Are Being Issued For Free Band Program

Famous Schnicklefritz Troupe To Perform For Club And Family Members Starting February 18

The popularity of the program to be presented to G-E Club members and their families by Freddie Fishers' famous Schnickelfritz band is attested by the fact that hundreds of free tickets were requested on the opening day of the ticket distribution. The tickets are being issued at the stand in the G-E Club basement. An additional attraction to the band is being arranged at the present time.

G-E employees who wish to obtain passes for one of the seven free performances must present their Club membership card as well as the cards for each member of the family who wish to attend. Attendance for each of the shows will be limited to fifteen hundred.

All three of the dances will be open to the general public with tickets selling at 55 cents a person including tax. Only 800 tickets will be sold for each dance and they may be purchased at either Gunnar's or the G-E Club.

A testimony as to the popularity of this band is certified by the fact that Paul Vogt, chairman of the entertainment committee, has already received requests for dance tickets from several small towns surrounding Fort Wayne, both in Indiana and Ohio. Praising press notices from practically every paper and magazine in the United States could be quoted here but they all boil down to one thing: "Exceptionally pleasing entertainment."

Employees who wish to take advantage of the opportunity to see this famous organization should act quickly. The schedule of shows and dances is as follows:

Feb. 18—Two free shows, 7 and 9 p.m.

Feb. 19—Dance, 9 to 12 p.m.

Feb. 20—Two free shows, 7 and 9 p.m.

Feb. 21—Dance, 9 to 12 p.m.

Feb. 22—Dance, 9 to 12 p.m.

Feb. 23—Three free shows, 1, 3 and 5 p.m.

NOTICE

Make it a point to attend the Golden Glove finals at North Side Tuesday, February 12. Ringside seats sell at $1.10; reserved, 85c, and general admission, 55c.

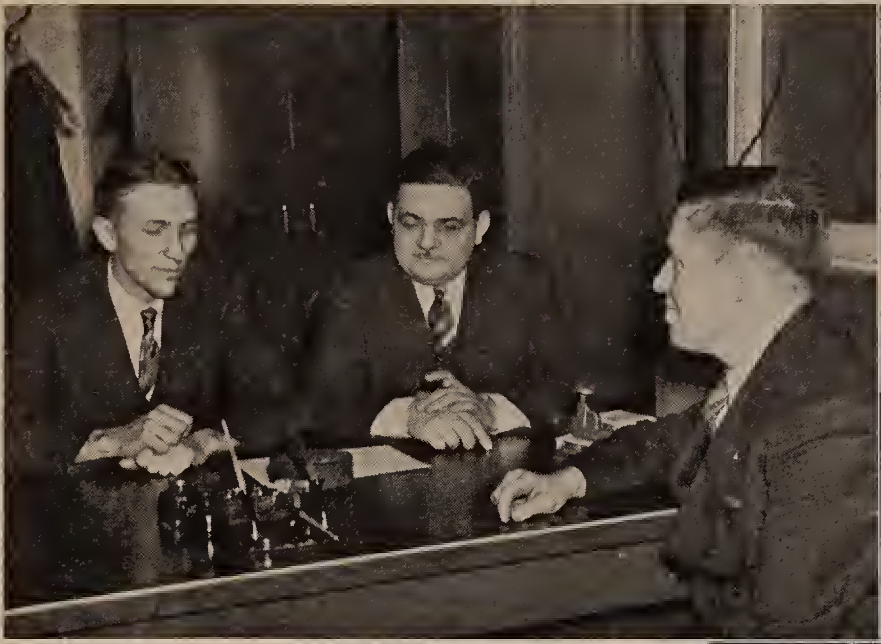
Credit Union Performs Outstanding Job During 1940



Very few of us probably realize the rapid growth and the important part played by one of our very youngest Fort Wayne Works employees organizations, the Credit Union. With approximately 30 new members being added every week and with total assets of $154,629 at the close of 1940, it is quite evident that although only four years old our Credit Union is, indeed, a lusty infant.

To give a picture to employees not members as well as members of the Credit Union of what the organization is doing we are presenting herewith an interesting resume prepared by W. B. DeHaven, assistant treasurer.

Pictured with this article are the financial statements and statistical report of the Fort Wayne Works General Electric Employees Federal Credit Union, No. 1427, as of December 31, 1940. One of the first things a person notices as he looks over the statements and charts is the organization's size—over a Hundred and Fifty Thousand dollars in assets—why, it is as big as some of the smaller loan companies and busier when share withdrawals are taken into consideration. The financial statement shows that the Credit Union has lent almost a Hundred Thousand Dollars to eleven hundred and thirty different members. This is an increase of 85% over last year.

The source of money for the loans comes from the shares or savings of the 2,519 members in the amount of $147,953.92, an increase of 118% in the last year. The increased shares mean more withdrawals and more withdrawals call for a larger cash reserve. The reserve as shown in cash in banks is $46,199.40, this is an increase of 160% over the previous year.

However, the cash on hand increased more rapidly than the demand for loans and withdrawals so $10,000 was placed in the First Federal Savings and Loan Co. of Fort Wayne, as an investment. This amount can be made available for loans if required to meet the demand.

Our reserve for bad loans account was likewise increased 142% to a total of $1,925.92, thus keeping the financial condition sound. The undivided profits at the end of the year were $4,749.19. From this amount a dividend of 4.5% has been paid to the share holders as of record on December 31, 1940.

Minimum Expenses

An increase as shown in the above accounts, naturally would show an increased expenditure for expenses, however, the expenses for 1940 have been held to a minimum. Extra supplies have been necessary, not only because of the 796 new members which were added to the Credit Union the past year, but to keep additional records on the old members as well. The depreciation charged to expense is 20% of the cost of the furniture and fixtures. A good business practice, and along lines followed by all companies, is this writing off of part of the furniture and fixtures out of each year's income. The treasurer and assistant treasurer bonds are required by the Farm Credit Administration of the Federal Government, $7,500 for the treasurer (this year raised to $10,000), and $5,000 for the assistant treasurer. The amount of $4.40 shown under Theft Insurance, etc., is for fire insurance on the furniture and fixtures.

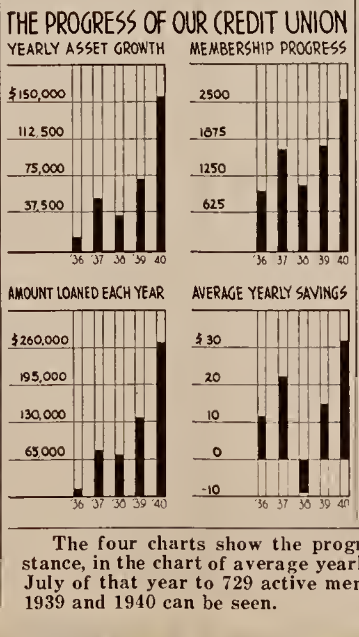
The annual supervisory fee and examination fee is charged to the Credit Union by the Federal Government to pay for the cost of au-

(Continued on Page 4)

Upper left, the Supervisory Committee, left to right—Albert Olson, John Howard and Karl Stahl. Upper right, the Board of Directors, left to right, standing—Leo Wallace, Loyal Decker and Clarence Hueber. Seated, Alfred Phillips, Gayle Griffith, secretary; F. H. Lemper, president; and Lee Cupp, treasurer. Absent when picture was taken—Irene Meyers, vice-president, and Veda Orff. Lower right, the Credit Committee, left to right—Adam Flager, Carl Vorndran and Florence Case. Absent when picture was taken—Alvin Powell and Roy Berdelman.

The officers of the Credit Union are elected annually by members of the organization. Meetings are held at regular intervals by the directors as well as members of the Supervisory and Credit Committees.

Progress Of The Credit Union Since Its Inception



OUR CREDIT UNION'S OPERATING EXPENSE

FOR YEAR 1940

STATIONERY AND SUPPLIES	$311.75	
COST OF OFFICE		
DEPRECIATION OF FURNITURE & FIXTURES	117 72	$429.47
TREASURER'S BOND	26.25

FILING & RECORDING INSURANCE		48.15
ANNUAL SUPERVISION FEE	10.00	
ANNUAL EXAMINATION FEE	100.08	
CHARTER FEE		
FILING OR RECORDING FEES		110.08
TREASURER'S SALARY	260.00	
ASSISTANT TREASURER'S SALARY	1532.40	
OTHER SALARIES	1327.61	3120.01
MEMBERSHIP EDUCATION		
BORROWER'S PROTECTION INSURANCE		
LIFE SAVINGS INSURANCE		
LEAGUE DUES		
INTEREST ON BORROWED MONEY		
OTHER EXPENSES		1453.11
TOTAL EXPENSES FOR YEAR		$5160.82

OUR CREDIT UNION'S OPERATING STATEMENT

FOR YEAR 1940

INCOME	
INTEREST COLLECTED ON LOANS TO MEMBERS (AT 1% PER MONTH)	$9,440.60
OTHER INCOME (INTERESTS ON OUTSIDE INVESTMENTS, ETC.)	186.39
TOTAL INCOME	$9626.99
TOTAL OPERATING EXPENSE	5160.82
NET INCOME	$4466.17
TRANSFER OF NET INCOME TO RESERVE FOR BAD LOANS AS REQUIRED BY LAW	893.23
BALANCE TO UNDIVIDED PROFITS	$3572.94

STATISTICAL DATA

POTENTIAL MEMBERSHIP	end 1940	8040
ACTUAL MEMBERSHIP	end 1940	2519
PER CENT ACTUAL MEMBERS	end 1940	31%
AVERAGE SIZE LOAN GRANTED	end 1940	$87.63
AMOUNT LOANS DELINQUENT	end 1940	$610.49
AMOUNT LOANS CHARGED OFF SINCE ORGANIZATION		$792.38

FINANCIAL STATEMENT

DECEMBER 31, 1940

OUR CREDIT UNION OWNS

LOANS DUE FROM 1130 MEMBERS		$98,037.55
OUTSIDE INVESTMENTS		
LOANS TO OTHER CREDIT UNIONS		
UNITED STATES BONDS		
OTHER INVESTMENTS	$10,000.00	10,000.00
CASH		
DEPOSITS IN INSURED BANK (AVAILABLE FOR LOANS)	46,199.40	
TREASURER'S CHANGE FUND		
TREASURER'S PETTY CASH FUND	10.00	46,209.40
OFFICE FURN. & FIXTURES VALUED ON BOOK AT		382.08
OTHER ASSETS		
TOTAL ASSETS		$154,629.03

OUR CREDIT UNION OWES

ACCOUNTS & NOTES PAYABLE	
OTHER DEBTS	
TOTAL LIABILITIES	

OUR CREDIT UNION'S NET WORTH

SAVINGS OF 2519 MEMBERS (SHARE & DEPOSIT BALANCE)	$147,953.92	
RESERVE OR GUARANTY FUNDS FOR POSSIBLE BAD LOANS	1,925.92	
UNDIVIDED PROFITS	4,749.19	
TOTAL SAVINGS, RESERVES, EARNINGS		$154,629.03

The four charts show the progress of the Credit Union since its inception in 1936. In all charts the recession of 1938 can be noted. For instance, in the chart of average yearly savings in 1938 an average of $9.48 per member was withdrawn rather than saved, and membership fell in July of that year to 729 active members—however, by the end of that year membership had reached 1,047. In each chart a steady increase for 1939 and 1940 can be seen.

An Important Thing To Remember — Wear Your Identification Badge

Credit Union

(Continued from Page 3)

diting the books and for the help and ideas given by the government field men. The salaries are paid the employees of the Credit Union who keep all the records of the members, write checks, balance passbooks, aid in filling out loan and withdrawal forms, etc. The amount under Other Expenses includes payroll deduction charges, bank service charges, telephone service charge, stamps, and other items which are not listed under headings shown in the operating expenses statement.

The Credit Union's operating statement shows the income which is received—mainly from interest at one per cent per month on the unpaid balances of the loans to members. Other income consists of a tax refund and interest on saving accounts deposited in banks. The total income minus the total expenses gives the net income. Now the by-laws of the Credit Union, in order to offer the utmost safety to the shareholders, require that 20% of the net income each year be added to the reserve for bad loan account. This year the amount of $893.23 was added to the reserve. Another way the reserve of $1,925.92 (shown and the Financial Statement) was built up was from the 25 cents membership fees which are charged each new member and added to the reserve. After the 20% of net income has been subtracted, the remainder is posted to the Undivided Profits account where it is available for dividends and as a back log to absorb any unforeseen loss which may occur in the future.

The statistical data shows that the employees of the Fort Wayne Works Plant of the General Electric Co. totaled 8,040 at the end of 1940—of course each and every employee of the company, both factory workers and office and salary employees, are eligible for membership in the Credit Union; so the total employees are the potential membership. The 2,519 members are slightly over 31% of the employees.

The average size loan of $87.63 shows that quite a few of the loans are small for there are some of $300.00 and some car finance loans of $700.00. Also of all our Hundred Thousand Dollars of loans only $610.49 are delinquent—a percentage of .62%, while the reserve for bad loans is 2% of the total loans. This means that the reserve is over three times the amount of the delinquent loans. The directors have seen fit to write off, out of the reserve, the total of $792.38 for loans deemed uncollectable due to total disability, bankruptcy and lack of work for loan holders. To date $268.11 of this amount has been collected and placed back in the reserve account.

At present approximately 30 new members a week are being added to the Credit Union, and most of the old members are saving more, so more money is available for loans. Thus 1941 should show more progress than last year.

Complete Ten Years With Volunteer Fire Department

Completing ten years service with the Volunteer Fire Department of the Fort Wayne Works seven employees were honored at a dinner meeting held last week and awarded the organization's ten-year gold service pin. The awards were made by General Superintendent C. H. Matson, who is shown with the ten-year veterans. Reading from left to right the men are: Albert Nebur, Roy Urick, Winfred Luebke, Harry Underwood, Lewis Barney, Charles Hartman and Jim Daley.

Wilson Urges Business—Government Co-operation For "Duration" And After

A long-term plan for "arm-in-arm" co-operation between private business and government through four stages including the period of rearmament for defense and afterwards was outlined by Charles E. Wilson, president of the General Electric Company, at the mid-winter convention of the American Institute of Electrical Engineers in Philadelphia.

Mr. Wilson emphasized the need for "total security," moral, physical, and economic, to protect the democratic process and system of free enterprise against "destructive forces flooding the world with false philosophies."

In suggesting a broad program, embracing both the current national defense effort and the following periods, he warned that "we might very readily delude ourselves if we fall into the error of laying our plans on the premise that when the next peace papers are signed, the national emergency will cease, and we shall return to that nebulous state known as 'normal living'."

Mr. Wilson expressed the belief that during 1943, 1944, and 1945 world conditions and the acceleration of the obsolescence of defense materials will require this nation to devote "much more of its energy and its substance to defense production than is generally believed."

He also said that the peak of defense production and employment will be passed in the next two to four years and that "the prospective reduction in employment, after this point has been passed, may be measured in terms of three to six million people, rather than ten to twenty million, as some quite sincerely believe."

Mr. Wilson described the first period in his program as the "recovery stage."

"This is the stage," he said, "in which we are now, and in which I believe we shall remain until the Federal Reserve Board index of industrial production (unadjusted) averages 140 during a two-months period."

He outlined eight "needs" during this stage:

1. A devotion to democracy and an understanding of and patience with its deliberative processes.
2. Respect for the laws made by the people through their representatives for the protection of their rights.
3. A thorough-going system of free enterprise.
4. Full time employment of all employables.
5. The free flow of all goods, purchasing power, and enterprise capital for production.
6. The encouragement and development of new inventions.
7. Rural electrification and the industrialization of agriculture.
8. "Hemispheric self-sufficiency through the development of South America as a source of raw materials—a development which should be subsidized, if necessary."

The second period he described as the "stabilization stage," immediately after the Federal Reserve Board index has averaged 140 for two months, during which the needs will be:

1. Credit and price control against inflation—against long-term commitments on durable consumer goods purchases and against non-essential personal loans.
2. Maintenance of a full supply of normal needs of a non-durable character to all stratas of society.
3. An acceleration of the modernization of industry.
4. Gradual reduction of governmental activities, expenditures, and loans connected with all non-defense purposes in the conventional field of private enterprise.
5. Taxation to balance the non-defense budget—"a step which, with the one preceding, you will notice I place in the second stage of this program because we want no restraints upon employment and increased purchasing power in the first."
6. Industrial development of the temperate zone of South America.

Mr. Wilson stated parenthetically that he believed there would be a wave of immigration from Europe to South America, whatever the outcome of the war, just as there was a wave of migration to the western hemisphere in the 17th and 18th centuries.

Mr. Wilson described the third period as the "backlog building stage, during which we undertake to dam up a part of the demand for goods" as a reservoir for the time when defense employment "could diminish in a degree sufficient to be dangerous to our economy and our way of life." This would come, he said, when the index had averaged 145 for two months and would call for the following:

1. Further credit and term restraints upon durable goods purchases and non-essential personal loans.
2. Encouragement of individual, industrial and governmental reserves through: promotion of government savings stamps and bonds of small denominations; increased payments, extended coverage and extended time periods under our unemployment insurance laws; increased payments and extended coverage under our social security laws; medical and hospitalization insurance on a national scale for those unable to buy protection from private organizations.
3. Drastic curtailment of all governmental activities, expenditures, and loans connected with all non-defense purposes in the conventional field of private enterprise.
4. Restraints on business expansion loans for non-defense purposes.
5. Taxation for reduction of the national debt.
6. Diversion of the major portion of sales promotion and advertising expenditures to the speculative promotion of pioneer products.

Because the private enterprise system will meet its severest test then, Mr. Wilson termed the final period the "free enterprise challenge stage," to be reached when the index has *declined* to an average of 150 for two months.

This will be the most critical stage, Mr. Wilson said, and will call for:

1. Prayer.
2. Credit and term expansion.
3. More and better housing for more people at a price they can afford to pay, and more consumer goods of every character at lower cost.
4. Intensive sales promotion and advertising.
5. Intensification of industrial and utility modernization.
6. Conversion of surplus defense plants on private property to the production of goods for normal needs of the nation.
7. Permanent government public works.

«« It's a Joke »»

A man was fumbling at his keyhole in the small hours of the morning. A policeman saw the difficulty, and came to his rescue.

"Can I help you to find the keyhole, sir?" he asked.

"Thash all right, old man," said the other cheerily, "you jusht hol' the housh shtill and I can manage."

* * *

"Ma! Ma! A big truck just run over Pa and squashed him all over the street!"

"Junior, how many times have I told you not to talk about such things when I'm eating?"

* * *

"Why did you encourage your wife to quit playing the piano and start playing the clarinet."

"Because she can't sing while she's playing the clarinet."

* * *

Salesman: "Did you like that cigar I gave you? For 500 coupons of that brand you get a banjo."

Clerk: "If I'd smoke 500 of those cigars, I'd need a harp."

* * *

A man wearing a bathing suit in the Sahara desert was accosted by a traveler going in the opposite direction.

"What are you wearing that for?" he asked. "There's no water around here."

"I know, but it's a mighty fine beach," answered the other.

* * *

"My son wants to be a racing motorist. What shall I do?"

"I wouldn't stand in his way."

* * *

I knew a girl named Passion.
I asked her for a date,
I took her out to dinner,
And gosh! how Passion ate.

* * *

Service Station Man: "Which do you prefer, leather or fabric upholstery?"

2nd Lad: "I like fabric; leather is too darn hard to wipe your hands on."

An Important Thing To Remember — Wear Your Identification Badge

NEWS THROUGH THE PLANTS

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

This is the time of the year that we are all trying to rush spring and yet it is too cold outside to forget that winter is still with us. There is nothing quite so refreshing around the house or office as green plants this time of the year. And really they are quite inexpensive too.

Sweet potatoes immersed about half way in water make a beautiful vine. They grow faster than ivy even though they won't last as long.

A large turnip hollowed to make a shell about one inch thick and filled with earth in which has been planted mustard seed, parsley seed or canary seed will grow and leaves will spring out all over the turnip, making a lovely ball of green for the window.

Dish gardens may be made by cutting a carrot lengthwise and placing it in a flat dish in about one inch of water. The ferny fronds are very "Japanesey" in effect. A beet top, turnip top, or horseradish root will add variety. Add a few figures and you have a dish garden to compare with one from your favorite florist.

Parsley comes into its own as a decoration. Put an old bath sponge in a crystal or colored glass bowl or a yellow pottery cereal dish. Fill one-fourth full of water and sprinkle parsley into the holes of the sponge. In a short time you will have the feathery plumes for a smart decoration as well as a garnish.

For a new kind of center piece for your dining room table, and very inexpensive at that, plant a row of grapefruit seeds close to the center of a low, round bowl of moist earth. In a few days, plant another circle an inch beyond the first. Keep repeating this until the dish is filled. The foliage will look like a pyramid, and this way it is more unusual than having it all on the same level.

Try some of these in your office and you will find many admirers you didn't know existed. These plants may not last the year around, but you will become tired of taking care of them by spring anyway.

We borrowed some of these ideas from Pittsfield and Lynn, so if they don't work, don't hold us responsible.

The Wire Department has discovered a new poet. Bill Rohe arises during the wee small hours of the morning to write about the boys in Bldg. 8 because he doesn't know what else to do when he can't sleep. Since we don't dare print the stuff, Elmer suggests he try to sleep the next time.

Shorts From 6-B

"The fleets in." At any rate Dorothy Nahrwald, "Red" Renbarger and Margaret Sampson turned up missing last Friday afternoon and the assumption is that the U. S. S. Blue is in dry dock.

Jake Sappington bought a flood light at the Employees' Store the other day, big enough for the "Queen Mary", and for which he had about as much use as he has for the Rock of Gibraltar, simply because the price was too alluring. A good confidence man could make a fair living off Jake if he caught him on Fridays.

Eldridge Gillium has a new arrival at his home and Bill Grubb passes out the cigars. Eldridge's knees were too weak.

Perry Shober invested about 48c for six light bulbs a few weeks ago and the other night when he had occasion to use one, he opened them up and found one that resembled a painting by Rembrandt, one looked like a Chinese laundry check, and the other four oil portraits by Whistler, Fournier, Steward and other lesser lights in the daubing business. A couple of bottles of red, yellow and black Glyptal near where they were secreted until whistle time told the jokee the story. Forty-eight cents is very reasonable for such works of art.

Habitual sayings by habitual people:

Art Kurtz—"You ain't just saying that."

Max Powers—"I hear you talking."

Miriam Valentine — "When do we move to Bldg. 4-6?"

Ed. Krick—"Yoe-Hoe."

Dollas Smith — "Number two's down."

Perry Shober—"Quiet, please."

Willadine Overmeyer — "I have no private life at all."

Ed. Witte (Bldg. 18-1) — "What's trump?"

Well, well, add Edna Mertz, Bldg. 26-2, to our list of absent-minded people. She wore two different kinds of slippers.

Ruth Phillips and Ruby Igney, Bldg. 26-2, seem to be unusually interested in Ft. Benjamin Harrison.

Rufus Niblick is getting quite a reputation for his ability to originate Indian names for anyone rooting for the Redskins. His favorites up-to-date are Chief Mud-In-The-Face Orezbindoski, and Heap-Steam-Up Witber.

Harry Mumma, the Fish Hound of Bldg. 4-3, certainly has his troubles with his fish but he has a lot greater trouble with the lovely little fellows who are eating his brand new home all up.

Friends of Curtis Rupright, Bldg. 26-2, are happy to see him back, pushing the broom. Lots of luck, Curt.

Bldg. 4-4

Hilda Brown's marriage to Dick Baker was a surprise to many of us, even she looks a bit awed. Congratulations, Hilda.

I guess the days of miracles aren't past. Sophia (Fica) Bodigan has taken a cat to raise.

Angie (Glamour Girl) Filius has a new hair-do and wants to be called Angeline.

Mary Ellen Butler and Helen Wilson were among the recent Sweepstakes Bowling tourney. Anyone wanting a small loan for a short time, see these girls.

We wondered why Stanley Marquardt wore dark glasses the greater part of last week, but we know now.

As children, Norbert Gase and Louie Hinen liked to play train. Now that they are grown up (or are they?) they still indulge in their favorite past-time using the conveyors as tracks and the trays as trains.

We wonder if it is catching. Leona Mowman was married recently. Congratulations, Leona.

Sunbeams From 17-4

Virginia Moran says that the only reason she came upstairs to work was to get her name in the paper. Well, we always try to please.

Mabel Murry thinks she should have been an octopus this last week, what with all of the tax papers she filled out, and several other jobs.

Bess Geller feels pretty low now that the boy friend has gone to camp, but cheer up, Bess, a year isn't long and after that you will both be in, probably for life.

June Martin thinks she will take up jiu jitsu, as it would be helpful in getting around the tables and benches.

There are all sorts of positions one can get into when thinking seriously, and Lisle Hodell has discovered that Bob Wefel thinks best when rocking his head in his hands, as though in great pain.

The phantom writer who has just begun to write the column from Bldg. 17-1, read with dismay and consternation a floor reporter's resignation. Please rest assured, no harm was meant, so to Mildred Gertz I have sent "Is Zat So?" for this week and your pardon now I seek. I hope that we may both still write the news and thus bring to light the good old gang in Bldg. 17-1.

The boys in Bldg. 26-5 know Jim Mitchell is having his ups and downs. One week Jim dresses like a millionaire and the next week like a violinist.

One of the compensations of being poor is that you get a thrill out of finding a dime in the pocket of an old overcoat.

Is Zat So?

The main topic of conversation of the gang in Bldg. 17-1 has been the house warming party that Loyal Decker gave at his new home on the Reckeweg road Friday night. Jack Leonard must have lost his way. After several telephone calls, to check on the directions, he still couldn't find the place. He says he wishes "Decker" would move back to town. Harry Kessler and "Wally" McKay were glued to the radio broadcast of the Louis-Burman fight. Kessler is glad the fight didn't go many more rounds as his money was "giving out." Edward "Frenchy" Brosche served the refreshments and made sure that every one was well taken care of. We still don't know why he kept repeating "Fifty Thousand Frenchmen Can't Be Wrong." Henry "Heinie" Wichern certainly did stow away the "eats" until his waistline expanded quite noticeably. We couldn't help but wonder where he put it all. Garland Meyers has a method all his own of talking to the cards. He managed to talk himself into several good hands and came out the winner. Henry Papenbrock announced that he has finally decided to purchase a new car, but refused to comment on whether or not an item in this column last week had any influence on his decision. "Art" Brockmeyer says he had a good time but he kept trying to forget about the appointment he had with the dentist on Saturday to have all his teeth pulled. The roosters made so much noise that it was impossible to concentrate on the cards so the game finally broke up and we decided it was time to go home. Everyone had a grand time and decided that the "gang" should get together more often, so "Ernie" Barr is going to be our next host. Thanks again for a very enjoyable evening, "Decker", and we sincerely hope that you and your family will always enjoy your new home.

That's all for this week!

The Question Mark.

Willard Hull, Bldg. 4-3, has completed the course prescribed by the LaOtto College of Fine Arts and has won his master degree. Hereafter it will be Prof. Willard Hull, D.B.G.P. While attending college, Bill was very active in sports, being coach of the football and basketball teams, also served as umpire in all games played by the college base ball team.

We all have heard of the notorious "Beeler Boys." Well, we have a new organization in Bldg. 4-3 to be known as the "Beezer Boys." Wm. Burke is president, and Alva Biggs is vice-president. They extend an invitation to all who can qualify to become members.

SANDY SAYS

When they announced "Men and Volts" it seemed that everybody had the same idea—get a copy and read it. Nearly everybody tried to buy a copy, and Cousin Colin and I tried to borrow one at the Employees' Store.

Well, I finally did, and have just finished reading it. It's such a fine book and has so much history in it that I'd like to keep a copy in my library. Now if I can only find enough friends who own them so I can always keep a borrowed copy on hand!

If you haven't read it get busy at once—don't waste any more time reading this—just buy, borrow or beg a copy at once and read it.

It's good entertainment, as interesting as a movie, and say—that's an idea—what a movie it would make—every bit as good as Don Ameche inventing the telephone or Spencer Tracy the electric light bulb.

And don't expect to find it merely a big advertisement for the General Electric Company, either. It does show how the Company was formed, but it goes deeper, or simpler, than that. It's the story of men who dared to be different, who weren't afraid to try something new, against the advice of everybody, and who weren't afraid to face hardships—mental, physical, financial hardships.

Now, that sounds too much like a description of a Horatio Alger novel, so I'll not say more. I won't even mention a moral to the story. I won't mention that they won out by producing "more goods for more people at less cost," and that we still have the same task before us today.

Of course, our problems may be different in detail. They had to build goods that worked. Now people take it for granted that General Electric products work, but our problem is to keep costs below prices. We can't always control prices, but we can do something about costs.

And above all, we get from the book the inspiration to be original in our thoughts—to always look for the "better way."

I told Cousin Colin this and he said, "Yes, Sandy, I've been thinking along original lines too. I've decided to rebuild my Model T windshield so it's reversible. Then I can stop at two filling stations and get both sides cleaned."

Who ever heard tell of going fishing and bringing back a rabbit? Gerry Foerster, Bldg. 16-3, tells the story anyway.

Borings From 4-4 Office

'Tis another week and all is quiet on the Western front. Hardly any noise here in the office. Nate Porter just informed me that he had another fire as he bumped up against the radiator the other day. He insists upon it that he carries those kitchen torches in his back pocket. Thus with a little friction, the stimulus was started. Smoke came out of Nate's pocket and Art Wedler and Don Niles ran for the fire extinguisher. The fire was out in no time.

Men in the office who are now strutting new hair cuts are Art Wedler, Mike O'Grady and Cliff Bowman. They were told to get a hair cut or buy a canine license. Again we can announce a new girl in the office. Her name is Mary Hakes. So far she too is quiet and we have found nothing to say about her as yet. Betty Mougin and Jean Bugert and respective boy friends were seen at Franke Park the other night and they were not ice skating either. They now are indulging in road work, just like track stars. And I'll tell you something else about Betty. Her parents are starting a brick-bat brigade to keep the many suitors of Betty away. So far they have thinned them down to just a pair.

Evie Meyers and Virginia Sanders found out Dan Manacke's middle name. It's not Ferdinand, nor is it Fritz, but it is Fay. Doesn't that just slay you? Mike Brayer won a bet from Marge Boerger. It is the first bet she has ever lost. I guess Indiana can't win all the games, in fact it might give them a feeling of over-confidence.

'Tis enough from me now except Clayton Culver is still angry with me for using my column for a want ad section for his lake cottage. He has enough old furniture to furnish three large cottages. And now he is worrying how he can reward his contributors. Sincerely as ever,

Elmer, the field mouse.
(The Rat to You.)

Deaths

Richard V. Dornbush died on January 31 following an illness of several years. Mr. Dornbush was employed in Bldg. 19-5 and had been an employee since 1923. Funeral services were held Monday afternoon with the Rev. F. H. Holtmeyer officiating. Burial was in St. Mark's Lutheran cemetery near Yoder.

The family of Mr. Dornbush wishes to express its appreciation for the expressions of sympathy and the floral tributes received from the Elex Club, the G-E Rod and Gun Club, Local 901 and its ladies auxiliary and from many friends at our Works.

Ask Pat Steup, Bldg. 19-5, to sing "Oh Johnnie." We didn't know Pat couldn't sing. The girls would like to know, Pat, if you have ever taken lessons. If so when and where.

Mrs. L. Hampton Roe, Doris to you, brought in the best candy the other day. I guess my little piece in the paper speeded her ambitions for making candy. It was very good too.

Voice Over Telephone: "Billy Smith is sick and can't come to school."

Teacher: "Who is this speaking?"

Voice: "This is my brother speaking."

Slips And Chips

By Sir Vis, 4-4

George Washington's crossing the Delaware on broken ice doesn't have anything on us who park on the Fairfield lot, especially for the last couple of weeks. We all know the early bird gets the worm, but according to Russell Grimm, you can be too early even for worms. We need not doubt Russell on this statement, because he arrived here at the gate wishing to obtain passage at 5:35 A. M. Being refused, he turned back to the lonely street, and there wasn't even a worm around. Russell's alibi is that some one gave the clock a trifle too much lead.

Old "Daggy" Thomas went to his cupboard to get his pals some soup. But when he got there, the cupboard was bare, because someone had cleaned out his coop. "Daggy" was very much perturbed over this situation. However, all is under control now, we hope.

Leo Blair started working the other morning all dressed up in his smock. One said, he looked like a medical specialist, and another said he looked like a veterinarian. I personally thought we were going to have an early spring because Leo always wears a smock in the summer. We were all wrong, because Leo was just shielding that new pair of trousers.

We all (who attended) had a very good time at the stag party last Saturday evening. We wish to thank "Daggy" Thomas for the use of his home and the necessary labor required to provide sandwiches, entertainment, etc. We also wish to thank LaVon Blair for the moving pictures of his vacation trip (they sure are swell), Max Shaw and Russell Reinking for the swell music, which was a very necessary part. Shorty Lawson for those tricks of magic (seeing is believing, but you try it), and last but not least, all those who attended, because it was they who made the whole party a success.

Just a little about the high lights of the party. It was very amusing to see the facial expressions of all who sat on the hot seat. Ewald's face changed from the expression of wonder to anxiety, then to embarrassment in a few short seconds when the heat was turned on. Asher was too quick for anyone to catch his facial expressions, however, he left a handful of potato chips on the seat.

The quartet was very good and they gave a very splendid rendition of "My Wild Irish Rose." We must hear them again some time. The personnel is: Bass, Ewald Stinsmuehlen; Baritone, Walter Buesking; First Tenor, Leo Blair; Second Tenor, Douglas Blessing. When they sang "My Old Kentucky Home," you really wished you were there.

We are still wondering why Bill Owen did not come. Was it Mrs. Owen? And then there are many others who did not come. All I can say is that they are the losers. We are hoping to have another party soon.

And did you ever hear the one about Bill Gregg, Bldg. 20-2, crawling around the office floor on his hands and knees looking for a mouse?

Bill Rohe, Wire-Insulation, got out of bed the other night to write a poem. We would suggest that Bill not bother to disturb his sleep. Oh well, we all have our weak moments.

Greetings to Jim Ehrsman, Bldg. 26-5, who is back after a long absence.

Punch Press 19-5

By Slug

Did you ever think you had a masterpiece, only you find out you had laid an egg? Well, it happens here every now and then, and I often wonder how our legal battery can keep their brains in first-class condition to such an extent as to avoid trouble. Oh, well, we really had a gang of notables tangled up in that yarn that somehow fell by the wayside, but I still claim that Stocks, Korte and Glenworth can take it. . . .And my motto as always is "let them have it". . . We hear the punch press department is planning a bowling party for the near future. Fred Rubke will captain the Innards and H. Kammer the Outwards, and I'll take care of the Sluggards. . . .Avery Spayde is a gentleman of the old school, and has been on the receiving end of many a joke which proves that he has plenty of taking power. But last week a hand forged trick was pulled out of the kettle and laid at his front door by a master culprit. It seems that Mr. Prince was presented with a large red apple with an appropriate note attached bearing Avery's signature. Of course we all know Avery would never pull a stunt like that—not since the days he came puffing into the first grade in short pants and handed the teacher his offering with the hope that it would forestall any possible goose eggs. Now Mr. Prince turned on his X-ray vision and diagnosed the case as a stray dose of miscalculation—so let the demerits fall where they may. John Figley, it is to be noted, was among the loudest applauders.

Marriages

Miss Louise Jean and Jimmy Wayne Blake, of Bldg. 19-1, were married in Huntington, Saturday, February 1, by Rev: Alvin Teter. The young couple are now at home in their own apartment at 508 West Berry street.

---

8 REELS of HUNTING

Sunday Feb. 9th
G.E.CLUB
Dick Robertson

Final preparations for the showing of eight reels of exciting hunting pictures at the G-E Club Sunday have been successfully completed according to a statement made Thursday by Sam Stillwell, Chairman.

All of the reels, which depict various types of hunting, have been carefully inspected and pronounced in good shape.

There will be two performances, one at 1:30 o'clock and the other at 4 and anyone may attend whether a G-E Club member or not.

19-5 Office Chatter

Our congratulations to Mr. and Mrs. F. Korte on the birth of a son. . . . Now let's make all other WORKS NEWS reporters envious. Mr. and Mrs. Mettler gave us a swell dinner at the Berghoff last Monday. The "WE" includes all reporters in the Series and Specialty Division. We certainly had a fine time. Our thanks again. . . . Seems as if everything is very quiet this week since everyone has their income tax paid. . . . It must be admitted that Mary Armey is a truthful and honest soul. Far be it from her to try to put anything over on the watchman when it comes to the matter of badges. . . . Never a dull moment in Rea Kuhn's life. Last week she went to Chicago and this week she slipped on a bar of soap. That is why Rea did not go to the dance.

Mrs. Leonard Petty sent son Harvey to town to pay her light bill. He marched straight to one of the utility offices and laid down the bill and the check but the cashier refused to take it. It finally dawned on Harvey he was at the wrong light office. Next time, Harvey, you should get full instructions from your mother before starting out. Be particularly careful which street car you take. They are all numbered.

Mildred Mullins, Bldg. 4-3, says she is having trouble with her numbers. One rainy day, she rushed out from work to catch a street car home. After riding a few blocks, she discovered she was on a Belt Line instead of a number 4 car. She arrived home so late she couldn't entertain company that evening. So Mildred would like to have all her guests come to visit her over the week end.

The other morning Alva Biggs, Bldg. 4-3, came to work with black spots all over his face. We thought he might be suffering from the Black Plague. But he explained to us that it was caused by a switch engine blowing wet soot all over him. We wonder if Alva might be riding freight trains to work.

We are all wondering what Gerald Gehl, Bldg. 4-3, did with those famous trousers of his. The ones made from mattress ticking, also his straw suit case. They seem to have been misplaced. Even Gerald does not remember what happened to them.

We have it on good authority that if Lois Hageman, Bldg. 12-B, doesn't win a bet pretty soon she's going to switch Alma Maters. Sure hope she doesn't, eh, Bill?

Welcome back Fred Erb after a week's absence because of sickness.

Neva Baker, of Bldg. 4-3, spent Sunday afternoon riding around with the South Bend boy friend. But this time she not only got him lost but ran out of gas in our fair city.

Glenn Kline, Bldg. 26-5, noted for his ability to catch all the fish off of the Lakeside dike, had a birthday and received a pencil suitably engraved.

A light company's inspector called on the busy housewife to repair a defect in the lighting apparatus.

"You're not always troubled with poor light, are you?" he asked.

"Oh, no," replied the housewife, "not always."

"Ah," murmured the inspector, "I thought so. It's only at certain times—eh?"

"Yes, only after dark," came the retort.

M. B. A. PATIENTS

General Purpose Motor Dept.—Donna Warner, Wayne Hotel; Vera Shaffer, R. No. 7, city; Harold Souder, 1221 Van Buren St.; Otto Proehl, 2028 Nelson St.; Joe Oliver, R. No. 4, city; Ralph McVey, 1116 W. Winter Street News

Congratulations to Robert Bauch, proud father of an 8 pound, 14 ounce baby boy on January 27.

Helen Dammeyer is either just growing into that forgetful stage of life or will never grow out of it because she is constantly telling someone, "Remind me to do this or that."

Famous last words:

C. Harlow Lammiman (at Muncie-Hammond Tech game): "Don't mind me, I'm only cheering to win two bits."

R. Schlup: "What is the matter with your dome-light?"

H. Hartman: "What do you have to have with a car? A bathroom?"

Danney Yoder and Bill Buesching sit parked in the car with the motor running until the gas runs out. Result: They have to walk a couple blocks to a filling station. (These conversations really must be very interesting; how about letting the rest of us in on them?)

Famous last words (cont'd): Walter Schmidt: You aren't just smackin' your ruby lips.

Chickens in the news again. This time it seems Vic Cartwright has a chicken (one with feathers) chase for some of his valuables, in the late evening especially.

Ruthmary Reidy, Bldg. 26-5, to Nola Decker: Says Nola, "is there any place in this plant where I can see a machine hand wind?"

An Important Thing To Remember — Wear Your Identification Badge

Improvements Bring $40.00

Art E. Swain, Bldg. 19-2, has made a lot of suggestions during the past years. His suggestion for improvements to equalizer forming fixtures was one of his latest and it brought Art an award of $40.00.

NEWS THROUGH THE PLANTS

(Continued from Page 6)

Tommy's Gone

Several weeks ago when the girls of Bldg. 4-4 office had a party in honor of Mary Bangert and Ardeth Hemp out at Lillian Magner's they felt as if something about the house was missing. All of the furniture was in place in the usual manner, but still in the air we all felt as if there was something wrong. It suddenly dawned upon us that Lillian's ever faithful cat was gone. We all asked her where Tommy was. She sighed and replied, "He's just outside." Letting it go at that, we resumed our bridge game. Tuesday of this week, Lillian told us that Tommy had died December 8, 1940, almost two months ago. Lillian had just gotten up courage to tell this to her friends.

The boys and gals of the Small Lot Section, Bldg. 4-3, are all in a tizzy and the reason: One Edna Callow, who came to work the other afternoon all dolled up.

We, the employees of Bldg. 4-3, are very much worried. We are very much afraid that if Harry Mumma and Buck Adams do not quit building houses all over the place all the machinery will have to be moved out.

Employees in Bldg. 4-3 have been wondering why Harry Parker's and Art Brandenburger's heads are so bare on top. Since we have ice and snow, the birds all follow them around for a slide.

If the girls in Bldg. 17-2 catch Mildred Kuhns holding her stockings up with tacks, don't ask any questions, just watch what she eats.

The girls on Insulating in Bldg. 17-2 think it would be a good idea if Walter Kryder would take up sewing lessons, because the next time he has an accident, Elsie Breicheisen might not be around.

We hear that "Popeye" Patterson, Bldg. 4-3, has been trying to date a girl for six months. When that happy moment came, he was called to work. Better luck next time, "Popeye."

When it comes to directing traffic on a Saturday night at a basket ball game, the cops ought to take a few lessons from Bill Burke, Bldg. 4-3, as he really can untangle them.

Arnold Bowers, the blonde of Bldg. 4-3, certainly likes his beautiful scenes, but we are very sorry that we do not have more of them on his usual daily route.

Paul Merkey, Bldg. 4-3, can get away with it when he displays a red umbrella, but it's just too much for the gang when he comes to work wearing a pair of red rubbers.

After Clarence Schooley, Bldg. 4-3, got a glimpse of the million inch machine, did he ever have a case of high blood pressure!

Margaret Niblick, Bldg. 4-3, really makes a good sentinel when she passes out the WORKS NEWS, but she makes a better one standing on Calhoun Street holding a bunch of packages.

Lloyd Garrison, Bldg. 19-5, says the only girls that rate with him now, have to be real young and wear bows in their hair. Lloyd, we may not all be that young but we can always stick a ribbon in our hair.

What was Helen Gerhardt, Bldg. 19-5, thinking of when she lined up twice to ring out one noon? Is it the thoughts of spring?

Never ask Kathryn Hepker or Bea Stalter, Bldg. 19-5, to buy any tickets for anything because they never know what the tickets are for or where things are being held. That's what happened at a bridge party last week.

Ed Glenwith, Bldg. 19-5, on returning from an unaccompanied shopping tour, a privilege which is extended to but few husbands these days, proudly displayed his prize package for his wife's approval.

Thisa And Thata 19-5

Either Avinell Gailey was so astonished at the amount of her check or in too big of a hurry to put it away, anyway she tore it in two. That's no way to endorse them, Avinell. . . .We offer our congratulations to Papa Korte. . . .We hope you're back to work for good, Maude. . . .This comes from good authority: Margaret Bennett has been kidding the folks about falling on the ice, and evidently just to show there are no hard feelings she took a pretty little tumble herself. . . .Add Hazel Martz to our collection of tumblers. . . .We hope Mildred Werling didn't feel too bad about her gift from the city. It happens to most of us once in a while.

Mrs. G., upon opening same, feasted her eyes on a glamorous sky-blue plaid shirt, which would have made the eyes of the "end man" in any minstrel show turn a livid green with envy. Upon closer scrutiny she discovered a tag fastened thereon with the inscription, "Merry Christmas from Helen to Jack." We claim this proves our contention that tastes differ in various males as regards wearing apparel. Don't you think a liberal discount should be allowed on goods repossessed in the Christmas exchange, Ed?

June DeWitt, Bldg. 19-3, has taken up the grinder's trade, but she doesn't know that it can't be learned in 45 minutes.

Why does Harry Todd of Bldg. 19-3 insist on having his work engraved? Is he a model workman or watchmaker, or does he think the job would look better if it was engraved with numbers and flowers?

Frank (Arkie) Ruesewald of Bldg. 19-3 was in a haze one day this week. When the watchman asked Arkie for his identification button, Arkie said, "Button, button, what button?"

Was Carl Conrad's face red one night this week while bowling at the G-E Club alleys? You ask the reason? Well, Carl pitched both balls in the same inning down the gutter. We wonder why? Was there some unknown reason or was Carl off his usual stride? Better luck next week, Carl.

We extend our sympathy to Lyle Ray, Bldg. 26-5, in the death of his mother.

Ask Milton Dennison, Bldg. 19-3, about the cigar he couldn't smoke because when he applied a match to the leeward end of it there just wasn't any cigar.

Since "Slugger" Sliger of Bldg. 6-3 has been taking in the exciting Golden Glove bouts he has been wanting to take everyone outside and show them a few "leather pushing pointers." Probably saw so many blows land that he himself is "punchy."

Those two tin horn sports of Bldg. 6-3 are back at it again. "Butcherly" Becker bet "Welcher" Wilson $75,000 that Red Burman would make Joe Louis put in seven rounds Friday, but it only took Joe six rounds, two minutes and 39 seconds—just 11 little seconds short. Becker sank to his knees, pleaded and begged, in fact did everything but jump through the radio but to no avail as Burman continued to snooze. This "so near but yet so far outcome" ruined Butcherly's week end and has kept him in a "running trot" ever since.

Someone better warn the Fort Wayne Police Department that Herman Ebel of Bldg. 6-3 has splurged into a new set of tires for his car. This will undoubtedly mean a new Fort Wayne to Waynedale speed record and if any of the "blue boys" need a couple of pinches to their credit they should make it a point to hang out around the Southern outskirts of town.

The conjurer was producing eggs from a top hat. He addressed a boy in the front row.

"Your mother can't get eggs without hens, can she?" he asked.

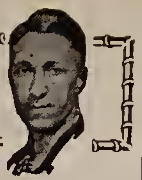
"O, yes," said the boy.

"How's that?" asked the conjurer.

"She keeps ducks," answered the boy.

ACCIDENTS DON'T "HAPPEN" they're CAUSED
—AND I CAUSE MOST OF 'EM!
CARELESSNESS

IN THE ROUGH



By WALTER SUNIER

There is a common misunderstanding about the names of the golf matches you play and the rules that apply. One of the commonest methods of play is where each of four persons, each playing his own ball, plays against the other three. This is not a foursome as it is commonly called. However, neither is it a four-ball match. What is it? Does it come under stroke competition rules or best-ball matches? When two compete against two, each playing his own ball and the side with the smaller number of total strokes winning, is this a four-ball or a best-ball match? Not knowing the answers, we asked an authority on golf through a national golf magazine. The answers are quoted. I quote:

"Here are the correct designations of all types of recognized match-play competitions: A match between two players is called a single match; there is no such thing as a 'twosome.' A match among three players, where each player plays a single ball is a three-ball match; where one of three plays against the better ball of the other two, the match is a best-ball match; where two players to a side, each playing a single ball, play against two of the opposing side, each playing a single ball, the match is a four-ball match. If two players of a side, playing alternate strokes with a single ball, play against another duo doing the same, the match is a foursome. In a foursome only two balls are in play.

"The form of competition which you mentioned, where four players engage each singly with the other three in separate matches is not a recognized form of match. It is nearer to the fundamentals of a three-ball match than to any other form. If the four players are competing on a hole-by-hole basis, we should say that the rules for three-ball matches would apply equitably. If the competition is based merely on the total number of strokes for the round, then, of course, theirs is a straight stroke or medal play contest.

"Where two players, each playing his own ball, play against two others doing the same, this is a four-ball match. If they choose to base returns simply on the total of strokes for the hole, there is no objection. Ordinarily the basis of competition is on the better ball of the two sides. To this is sometimes added another point for low total of the two members of a side; another variation is to count one point for the low ball, and to charge another point against the high ball."

ON - - the Alleys

By Bob Ringle

Something in the way of variety: Roeger with a 126 count, the lowest he claims he has rolled in ten years, and Mensch with three games of 144 each. Rinehart was pulling them out of the bag last night as fast as he could, and for awhile he had all of us on pins and needles. Rhiney rolled 14 straight strikes in a row, seven the last part of the second game and continuing on into the third game up to the eighth frame. He finished the game with a count of 238 making his total 653, the first two games being 159, 256. By the way, Cunningham said not to let it get around about that 114 count of his last Tuesday night, so for Pete's sake, keep it quiet. Flash—Wuxtra, Louise Schwartz rolled 195 in the Girl's League on Monday night. Maybe a few of us should join Elex, how about it, Louise. Feel better now "Sis." Wynne Kirke was using a basketball Tuesday night in place of a bowling ball because he made that well known basketball split. From across the way, Wilson was reported as doing all right with that new ball of his. Gee, a new bag too.

"Your father is quite deaf, isn't he?"

"I'll say he is. Yesterday he conducted the family prayers kneeling on the cat's tail."

A Simple Idea — But No One Thought Of It

Clayton Wilt, Bldg. 27-1, is on the latest suggestion list for an award of $25.00 for his suggestion to provide special crane hooks for frames. A comparatively simple idea? Perhaps, but no one else thought of it.

An Important Thing To Remember — Wear Your Identification Badge

Rod-Gun Club Is Accepted By NRA

Formal notice has been received from C. B. Lister, secretary of the National Rifle Association, Washington, D. C., of the G-E Rod and Gun Club's affiliation with the national organization during 1941. Particularly encouraging is the acceptance in that it is primarily the work of the rifle teams and in that it places the local organization in line to receive government guns and ammunition for the development of civilian marksmanship.

Following the policy of the national organization, all members of the local club were required to certify that they were American citizens, accept the oath of allegiance to the flag, and definitely deny any connection with any group of an un-American nature.

Club officers point out that any employees wishing to join the organization and become members of the classes being held each Tuesday night may do so by reporting on any Tuesday night at the Dehler-Hughes range. Classes are being held by Burl Tilman and Guy Raymond. Classes in pistol shooting are in the process of formation at the present time.

Tired after a hard day, a distinguished Congressman in Washington handed the menu back to the waiter and said: "Just bring me a good meal."

A good meal was served and the Congressman gave the waiter a generous tip.

"Thank yo', suh," the waiter said. "And if yo' got any frien's what can't read, yo' jus' send 'em to me, suh!"

Defiance Cagers Will Meet Club Wednesday Night

Kimball's Aces Offer Formidable Line-Up For Next Week's Game

Hoping to break the jinx that has so far dogged all of the out-of-town teams appearing at the Club, Kimball's Aces of Defiance, Ohio, will invade the G-E Club Wednesday taking on the Industrials at 9 o'clock.

Although the state of Ohio has never been noted for its great basketball teams, going in mainly for football and baseball, R. F. Kimball, an Indiana man, and of course vitally interested in basketball, has spared no expense, time, or trouble in organizing for himself a bucketball club that he can be proud of.

The center, Milton Adams, was picked up at Toledo University and was a teammate of Chuck Chuckovits, one of today's most prominent players. Adams, being very big, handles the rebounds and plays pivot, feeding his mates the ball on cut plays.

Two of the players, Ted Feeney and Martin Tate, forward and guard, respectively, formerly played for Defiance College. They have teamed up together for ten years, and make a formidable combination especially on fast breaks.

Dick DeGrogg, the other guard, hails from Lansing, Mich., where he was a member of the Old's All Stars. This club participated in the Gold Medal Tournament there, last year and DeGrogg was picked as an All Tourney guard.

One of the forward positions will be handled by Jim Vogel, one of Defiance's best independent performers for many seasons. Vogel has been one of the leading scorers of the Defiance City League for the last three years and fits in especially well with these other lads.

Just what starting lineup Coach Mert Edgar will use in going after his fourth win of the season is not yet certain. Last Wednesday all ten of his lads looked good in their 66 to 50 win over Hoagland, consequently it will be hard to pick a starting five although everyone is sure to see action before the evening is over. Two new boys, Offerle and Vonderhaar, both prominent players in church and independent circuits, have joined the Industrials and added strength to the team.

This game will be preceded by what looks to be a very good preliminary, matching West Side, one of the claimants for the first half title of the G-E Club Inter-department League, against Wolf & Dessauer, member of the Sappenfield League. Both clubs are young and have several good players on their roster, consequently this game should be fast and exciting.

There will as usual be no admission charge and anyone may attend whether a G-E Club member or not.

Rea Cagers Win From Club Industrials

The Rea Wire basketball team set back the G-E Club cagers to the tune of 21 to 22 in the Industrial League game last Wednesday night. Cheered on by a large crowd of fans the locals staged a come-back in the third quarter but were unable to hold the wire boys down in the final stanza. In the preliminary the Wayne Knits defeated Apprentice B 21 to 22.

With The G-E Club Bowlers

Depicted above is a man that is really making the G-E Club pin boys work for their money. Frank Kopp of the tough Apparatus League is again swinging into action and if this ball is rolled true to form it will undoubtedly be another strike. Frank so far this year is leading the Apparatus League with a 48 game average of 194.

Second Half Of Cage Schedule Gets Under Way

S. M. Factory, West Side And Main Office Chalk Up Wins In Opening Games

West Side, Main Office and Small Motor Factory started the second half of the G-E Inter-department Basketball League in the right way by chalking up initial wins over Apprentice A, Apprentice B and the Squares.

West Side and Apprentice A, who meet Friday, February 14, for the first half title, gave a sneak preview of what is forthcoming by tangling in a close and exciting game with the Westerners finishing on the big end of a 29-27 count. The first quarter ended in a 7-7 deadheat but in the next stanza West Side, with Offerle, providing most of the points, rolled into an 18-12 lead. Apprentice A, by holding their opponents to eight markers and staging an eleven point counter-attack, drew within three points of West Side at the end of the third stanza and set the stage for a torrid last quarter. Both clubs raced up and down the floor taking wild shots and being too anxious on easy attempts, consequently only seven points were scored, with West Side getting three of them to maintain a two-point margin.

Playing their best game of the season, hard-fighting Apprentice B gave Main Office followers a real scare by staying right with this highly favored outfit until the fourth quarter when the Office lads staged a red hot spurt to finish ahead, 39 to 23. With Kelly and Rolfing making all of the points Apprentice B finished the first half only three points behind, but then Main Office began to gather momentum, running up a seven-point third-quarter lead and then in the final chapter with Schneiders, Imel, Kent and Scherer connecting from all angles this close game was turned into a rout.

With every member of their squad contributing markers to their total, Small Motor Factory had a comparative easy time defeating the Squares 32 to 14. The Factory's first string lineup went right to work in the first quarter, turning over a 13-3 to their shock troops who were inserted in the game at the beginning of the next stanza by Coach Meyers. The understudies kept things rolling along by running up a 23-5 half time count. With Langenberg throwing in eight points during the last two periods the Squares managed to play the Factory on even terms but the first half lead was too much.

Winter Street Hangs On To Volleyball Lead

Continuing to maintain their steady march towards an undisputed championship of the G-E Inter-department Volleyball League, Winter Street chalked up three more victories Wednesday, this time at the expense of Apparatus Transformer to practically cinch the second half. The Refrigerator lads have already acquired the first half crown and need to win only five of their remaining nine games to grab the last half bunting and of course the league title.

Apparatus-Transformer played their best game of the year but Winter Street's all-around power, alertness and team play was too much. The A-T boys got off to a good start in the initial game, jumping into a 4-0 lead, but the ultimate winners staged a counter-attack to triumph 15-7 and then went on to get the next two 15-6, 15-6.

First-half results were reversed in the other three matches as the Apprentice revenged themselves against Small Motor Drafting 15-8, 15-7, 15-6. Small Motor Standards turned the tables on Main Office 15-6, 15-10, 15-4, and Small Motor Production downed Small Motor Factory 15-3, 15-13, 15-13.

An Important Thing To Remember — Wear Your Identification Badge

B&T

GENERAL ELECTRIC

FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, FEBRUARY 14, 1941 Number 52

Scrap Exhibit Proves Effective Display

Two barrels of scrap coils and wire along with a barrel containing pennies to show the value of the scrapped material proved an effective display in the various sections of the Specialty Transformer Division. The display points out that practical suggestions on ways and means of reducing waste and spoilage will result in saving much "hard to get" material and at the same time, by reducing our costs, help to meet continually growing competition. The display was placed at various localities during the week.

Deadline Nears For Badge Enforcement

Ruling of "No Badge—No Admittance" Becomes Effective On March 3 At Fort Wayne Works

With the deadline date set for just a little more than two weeks away, preparations are being completed for the rigid enforcement of the "No Badge—No Admittance" rule at the Fort Wayne Works. Starting on Monday, March 3, no employees of the Works will be admitted on Company property without proper display of identification badges, and all employees, without exception, who fail to have their badges with them will be required to obtain them before entering the plants.

The badge system was instituted at the Fort Wayne Works on Monday, August 12, in accordance with regulations made by the General Electric Company to protect the jobs of its employees and its property. The number of "badge forgetters" was fairly low even at the very beginning of the plan and this number has gradually been reduced until at the present time as few as two "forgetters" have been registered during a work day.

(Continued on Page 2)

Another 50-Year Employee With General Electric

Another employee of General Electric has joined the increasing number of men who have attained the distinction of having been in the service of the company for 50 years. He is Joseph D. Fredericks, of Bloomfield, N. J., who since 1927 has been assistant to W. R. Burrows, General Electric vice president in charge of manufacturing. Late in January Mr. Fredericks was awarded a diamond-studded pin and a certificate of meritorious service at a dinner attended by 150 of his present and former associates.

The oldest employee at the Fort Wayne Works in point of service is Charles E. Becker, Bldg. 18-4, who became an employee in December, 1893, and thus is starting his forty-eighth year of service.

More Than Ten Thousand To Hear Fisher's Band

Success Of Both Shows And Dances Appears Assured By Big Ticket Demand

It is estimated that approximately 10,500 persons will attend the free performances of Freddie Fisher's Schnickelfritz band when it makes its appearance here starting next Tuesday and that several thousand more will attend the dances at which the band will play.

Limited in number, the greater bulk of the tickets for the free shows, which are issued only to G-E Club members and their families, have already been distributed. The balance are being held at the G-E Club basement stand and may be claimed upon presentation of G-E Club membership cards. Tickets for the dance, which are also limited, may be obtained as

(Continued on Page 3)

Kelso Is Named To Suggestion Committee

N. T. Kelso, Bldg. 4-6, has been named a member of the central suggestion committee to fill the vacancy caused by the retirement of J. J. Kline. Other members of the committee are S. E. Palmer, chairman and secretary; E. L. Simpson and F. G. Duryee.

NAMED FOREMAN

A. R. Anderson

Announcement is made by J. H. Gargett, superintendent of the Specialty Transformer Division of the appointment of A. R. Anderson as foreman on the third shift in Bldg. 26-3. Mr. Anderson started work with the Company in 1925 and graduated from the Fort Wayne Works Apprentice School in 1928. He was assigned to the drafting department of the Motor-Generator Division in Bldg. 19-3 following his graduation from the Apprentice School. Since that time he has been engaged in designing and production work.

Position Of WGY On Radio Dial Will Be Changed

G-E Station Will Be Heard At 810 Kilocycles Instead Of Present 790 After March 29

WGY is moving.

Effective March 29 the Schenectady transmitter will be heard at another spot on the radio dial, 810 kilocycles instead of 790. The change is made by order of the Federal Communication Commission in accord with the North American Regional Broadcasting Agreement reached in Havana in December 1937.

Until March 29 WGY will continue to travel the usual path to your radio set, a path it has held continuously since May 21, 1923. The twenty kilocycle shift will have no effect on the signal as adjacent high powered stations are subject to the identical ruling—that is a twenty kilocycle move putting each station slightly higher on the dial.

WGY first went on the air February 20, 1922, at which time it was licensed by the Department of

• Blessing In Disguise

One out of every three men called up for their physical examination under the Selective Service Act will be turned down because of physical defects, according to the estimates of the United States Public Health Service.

At first glance you might think that the health of our Nation must be in a sorry state when one-third of these men cannot pass muster for the Army—men you'd think should represent the healthiest part of our population. Actually it's not as bad as all that, for the fact is that America's youth today is better fit physically than any previous generation. And the high rate of rejections may not be without some blessing!

The explanation for the large numbers failing to pass the physical examinations is that higher standards have been established by military medical authorities—standards based on the experiences of 1917-1918 and established for the good of the draftees themselves. Most of the men rejected are turned down for relatively minor impairments.

Thus, in a recent study of causes for rejection of Army volunteers in the New York area, in which one-third of the men were found unacceptable, the majority failed because of dental, eye or foot defects or underweight. A similar analysis was made of Navy volunteers who were turned down, and the reasons were practically the same.

The medical examinations disclose many draftees with various types of physical impairments which, up until now, they either did not know existed or else had neglected to have treated. Fortunately, many of these impairments can be corrected. To those young men, the draft will prove a blessing in disguise if they take advantage of this knowledge and have their physical defects remedied.

The rest of us can learn a valuable lesson from the medical experience of the present draft. Each of us should have a health examination by a physician once a year to find out where we stand physically in order to safeguard our health and our earning power. And each of us should follow a plan of living in which diet, rest and exercise, geared to our individual needs, all take part in promoting sound health.

Associate with men of faith. This tends to be reciprocal. Your faith will communicate itself to them, and their faith to you. Do your work in a "faith" atmosphere, and you will work at a maximum advantage. You impress others by your own faith, and they will have faith in you only in the degree that you have faith in yourself.—*Grenville Kleiser.*

• The Secret Of Socrates

Convincing the other fellow you're right is not always easy. Yet wise old Socrates never had any trouble.

Regardless how hot things got he just stuck to asking questions to which the answer had to be "Yes." Before the other fellow knew it he was agreeing with Socrates.

If it worked for Socrates—why not for you?

So long as we love, we serve. So long as we are loved by others I would almost say we are indispensable; and no man is useless while he has a friend.—*R. L. Stevenson.*

"In these times of trial, if we stick to the middle of the road, there is enough money, brains and ability to keep this nation the greatest nation in the world."—Charles F. Kettering, noted inventor.

Change WGY

(Continued from Page 1)

Commerce to operate on 832.8 kilocycles. In September, 1922 the position was changed, this time to 749.6 where the station remained until the following May when WGY took its present position, 790 kilocycles.

WGY is not the only broadcasting station affected by the FCC ruling. As a matter of fact 795 of the 883 standard broadcast radio stations in the United States will shift their frequencies to new assignments.

To most radio owners the change will make little difference—just a matter of twisting the knob. But many receivers today are equipped with push buttons enabling the listener to locate his station by simply pushing the buttons. The tuning point of all these buttons must be altered if the same stations are wanted after the allocation shift March 29.

The North American Regional Broadcasting Agreement was signed by Canada, Cuba, Mexico and the United States and is designed to permit the 1300 stations in North America to "operate simultaneously with a minimum of interference." Under this agreement the general pattern of the change—with few exceptions is as follows:

All stations now operating on channels from 550 to 720 kilocycles retain their present channels.

The stations now operating between 740 and 780 kc move up 10 kc.

Stations between 790 and 870 kc move up 20 kc.

The stations between 880 and 1450 kc move up 30 kc.

Clear channel stations between 1460 and 1490 kc shift to 1500-1530 kc.

Local stations now using 1500 kc move down to 1490 kc.

Some 28 other stations, including those now using frequencies about 1500 kc, make varied, irregular shifts.

Don't forget the Employees' Store is ready to serve you. Store hours from 10:00 a.m. until 4:00 p.m. Monday through Fridays.

Identification Badge

(Continued from Page 1)

Considering the considerable period during which the badge identification plan has been in effect, it is felt certain that by the deadline date of March 3 employees will have cultivated the badge-wearing habit to the extent that necessity of patrolmen to challenge anyone because of the absence of a badge will be practically negligible.

As has been stated before, the badge identification system has been instituted for the benefit of both employees and the Company, with its main purpose to prevent entrance to our plants of unauthorized persons. All employees are asked to promptly notify their foremen or supervisors if they see anyone wandering through their department or the plant without a badge or visitor's pass or with a badge indicating he's out of place.

Telediphone

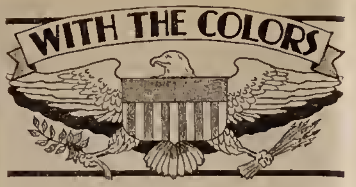
(Continued from Page 1)

Just dial a certain number and start talking. To be sure there will be no one on the other end of the line listening to you but nevertheless that important telegram will be recorded on a wax record and shortly after will be on its way. That, in brief, is the new Telediphone system installed at the Fort Wayne Works. For the present a limited number of persons have been initiated into the use of the new "system" but it is anticipated that later on more general use will be found a time saver to many.

The system involves telephoning a message to an ediphone receiving machine in Bldg. 18-4. Approximately 100 persons have studied the routine and are using the system. As soon as the correct number is dialed a short buzz is heard and the sender starts to dictate. The buzz, of course, contrasted with the former cheery "good morning" lacks something or other, but on the other hand the sender is assured of no "back talk."

That all is not jake with the early users of the machine is indicated by some of the remarks rolling from the cylinder when the girls get ready to transcribe them, as for instance, "Wonder when I'm supposed to start talking," or "How the devil does it stop?"

The Telediphone system includes only messages to leased wire points as indicated in the network chart of the inter-works telephone directory.



The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

EVAN E. BRADY, JR., Stock accumulator — Distribution. National Guard. 203 Esmond, Fort Wayne.

JOHN W. NAIL, JR., Electrician —General Service. Selective Service draftee, R. F. D. No. 7, Fort Wayne.

IN the ABC of SAFETY the MOST IMPORTANT LETTER is "U"

Seventeen Days To March 3 — Cultivate The Badge Wearing Habit

General Purpose Motor Scores Perfect Safety Record In January

Top row, left to right—O. Nahrwald, foreman and D. Moser, safety committeeman; A. Sonnenburg and V. Brunau, safety committeemen; R. Bennett, safety committeeman and P. Traub, foreman. Second row, left to right—H. Spahr, foreman and R. Griffin, safety committeeman; R. Wilson, foreman and Wm. Morton, safety committeeman; L. O'Brien, foreman and A. Heuer, safety committeeman. Bottom row, left to right—Hilda Scott, safety committeeman and L. Arnold, foreman; Ed Taylor, safety committeeman.

Representing the largest Division in the Fort Wayne Works the General Purpose Fractional Horsepower Motor Division started on its campaign for a 1941 no accident record with a perfect score, no accidents having occurred in a single department for the month of January. In the above pictures the various department foremen where departments won in the safety contest are shown with their safety committeemen. It is to be noted that the January record was established despite an increase of 223,137 man hours over the same period last year.

Other departments winning in the January safety contest were Tool Division—R. Renfrew, Bldg. 26-5; Decatur, Cash Lutz; General Service, W. Wiedelman, Bldg. 20-1; Distribution, A. J. Kaufman, Bldg. 6-4; Miscellaneous, Walter Wolf, Bldg. 12-2; Motor-Generator, Joe Mougin, Bldg. 19-2; Transformer, L. Sordelet, Bldg. 26-2; Winter Street, Wm. Kelsey; Plastics, John Sauers, Bldg. 12-1; Wire-Insulation, Glenn Greek, Bldg. 8-2; Series-Specialty Motors, Fred Castor, Bldg. 26-4 and M. Harrigan, Bldg. 17-4.

The twenty winning departments represent approximately 1,000 employees. Since the contest was started four months ago more than 4,000 employees have participated in the prizes.

The safety contest now in progress was instituted at the Fort Wayne Works at the beginning of the last quarter of 1940.

Chicago District Activities Centered In New Building

With the movement of personnel and equipment now completed, Chicago district activities of the General Electric Company and affiliated companies, formerly scattered in nine separate locations, are now housed in G-E's new $1,500,000 building in Chicago.

Occupying an entire city block, the structure is seven stories high, of modern design, and equipped with the latest in lighting and air conditioning. It was designed by architects Holabird and Root, and erected by the James Stewart Corp., general contractors.

Directed from the new regional headquarters building are General Electric's sales, engineering, and servicing operations in 11 midwestern states and parts of three others, including offices at Davenport, Detroit, Kansas City, Milwaukee, Minneapolis, Omaha, and St. Louis.

One third of the building's 350,000 square feet of floor space is allocated to offices, the remainder being used for warehouse, display, and servicing facilities. Occupying the offices are sales and engineering divisions of various General Electric departments; Carboloy Co., Inc., and R. Cooper Jr., Inc., (G-E distributor); General Electric Contracts Corp.; General Electric Supply Corp.; and Locke Insulator Co.

Fisher's Band

(Continued from Page 1)

long as any remain available at the stand.

It was announced yesterday, by Paul Vogt, chairman of the G-E Club entertainment committee, that a special surprise feature has been secured to be presented at each of the Schnickelfritz shows.

The schedule for the free shows is as follows: Tuesday, February 18 at 7 and 9 p.m.; Thursday, February 20 at 7 and 9 p.m.; Sunday, February 23 at 1, 3 and 5 p.m.

The schedule for the dances is Wednesday, February 19; Friday, February 21 and Saturday, February 22. On each of the three evenings the dance will start at 9:00 o'clock and continue until midnight.

SANDY SAYS

We generally agree that Mrs. NECESSITY is the mother of invention. But do we agree that a woman with such a remarkable child would stop with just one offspring? She has a lot more kinds than that, and I could mention several, but let's not take on too big a family. Let's just consider one or two,—say Invention and his twin brother, Conservation. Nice kids, both of them and their mother should be proud of them.

Be that as it may we still don't always like her, and don't want her to tell us what to do. For instance, we can row a boat all day, fight sunburn and mosquitoes and have a lot of fun doing it—but Hoot Mon! if we have to do it for a living—would we cuss old Ma NECESSITY.

Now if you have been reading this column you may have noticed a gentle hint now and then about economy, cost reduction and other such things dear to the heart of a Scotsman. Now, too, to a Scotsman these things are lots of fun, like rowing a boat, fighting a sunburn and mosquitoes, etc.

But now, even in this great land of ours, we find NECESSITY sneaking in and telling us to get busy and do a better job on these things than ever before. Nearly all (if not all) of the materials we use every day are getting scarce. We must conserve them in the interests of National Defense, by careful engineering, careful planning and careful workmanship.

If we want to help our Uncle, we'll do these things besides waving the flag and singing "The Star Spangled Banner". In fact, if we waste any of these materials through carelessness, we may be doing our Uncle as much harm as one of those lowest forms of animal life—a gooshegigilorimite.

Well, I knew that sounded terrible but I didn't know what king of a beast it was until I asked my wise old uncle Angus McOwl.

"Sandy," he said, "Don't you ken a gooshegigilorimite is a fifth columnist". Now if you don't believe this, call me up. I am supposed to know everything, even how to pronounce it.

Raymond Aker, Bldg. 12-B, advises all and sundry that respirators are much more comfortable to wear when not equipped with plugs designed to keep out the dust but not specially helpful in the process of breathing.

Lois Hagemann, Bldg. 12-B, sure gets all "wrapped up" in her basketball games. She became so carried away by the excitement of the South Side-Central game, that she paid Lawrence Gardt the bet she had lost to Bill Hattendorf. Better quit before it gets you, Lois.

We're all wondering why Adolph Schultz, one of Bldg. 12-B's most eligible bachelors, was passing the cigars last Friday morning!

Gerald Bosserman, Bldg. 12-B, rates better with the government than most of us. He received his questionnaire a short time ago, now his wife (a R.N.) has received hers, and they are looking for one to arrive for the baby any day now.

Jimmie Martin, Bldg. 19-3, was introduced by the Master of Ceremonies at the Berghoff Gardens the other night because he is from Massachusetts.

Slips And Chips

By Sir Vis, 4-4

We are so busy with defense and the usual work there is very little time for slips. However, Art "Breezy" Stoll is wearing one new shoe and one old oxford. One person thinks Breezy is purchasing his new shoes on the installment plan, one at a time. I think the shock of new shoes is too great for his feet, so he is letting a foot at a time become accustomed to the new shoes.

The other day I noticed Edison A. Martin start strutting (in a sort of spring dance fashion) and singing Tra-La-La-etc., and Wm. Owen was wishing for Andy Gump's Bull Moose. This rather puzzled me until I saw our own beloved Maxie Shaw all dressed up in his teddy bear suit.

Art Kraft took his teeth to the dentist for repairs and he is gumming his sandwiches now. Art says "You just clamp down and pull."

Walter Hazelet wishes to inform his friends that they need not plan any farewell parties now. He received his deferment so I guess that keeps him out of the army for a year or so.

Virgil Asher just took out a charter membership in the B.E.M. club. At first we thought he was just seeking admission to this newly formed organization. However, upon investigation, we found he was eligible for a charter membership with dues paid.

John R. Heine announced that his son was married on Lincoln's birthday. John says he must be getting old.

Since this is the week of Lincoln's birthday, I am taking the liberty to write one of Lincoln's famous sayings I like best: "The best way to destroy an enemy is to make him your friend."

Sunbeams From 17-4

Elizabeth Gay has her next summer's vacation planned, and it includes a ten-gallon hat with a tall handsome cowboy under it.

We read poems and hear songs about dreams, but ah me, it takes Edith Venrick to really tell about her dream Romeos.

Frank Peternell believes that where there is smoke there is fire, and so when he saw the rotor-burning machine smoking, he ran for a fire extinguisher. Nice going, Frank.

Things are not what they seem, and so Mabel Vizard found out, when she stuck her hand out behind her the other day.

Carl Brenner had one of those most embarrassing moments, when he became all tangled up in a chair and the chair won out.

Famous last words: Telephone Ruth; all the gals on the line-up.

Ever since Notre Dame has been in the market for a new football coach, Clarence Burke, Bldg. 6-3, Irishman, has been way up in the air. Instead of writing requisition numbers down on the log sheet he has been caught putting down names such as Shaw, Crowley, Stuhldreher, Miller, Boland, Leahy, etc. Why don't you apply for the job yourself, Clarence? Instead of routing electrical equipment you could turn your talents to touchdown routing.

No wonder Dorothy Franke, Bldg. 18-1, has to be called when it is her turn to bowl. The stag line is so big she can't even see the alleys. That young man with the button bearing No. 1045 seems to be doing all right.

What: Free G-E Club Movie entitled "Wings Over Shanghai."
When: Sunday, February 16.
Time: Two and four o'clock.
Where: G-E Club Gym.

Borings From 4-4 Office

Spring, oh beautiful spring, reminds me of love, of the sweetest day of the year—Valentine Day. I did so badly want to send my best girl (the one in Bldg. 26-1) a card, but she insisted upon a box of candy. I just told her beggars couldn't be choosers. Now she is tough with me. Best I go hide my ratty face in shame. But I love spring the best of all—gee, everyone falls in love, and I want a good romance.

Recently in the "Indiana Daily Student," an ad appeared in the classified ads, "Husband wanted for beautiful Vienese girl who will marry to avoid deportation. Will give good home and a suitable income to worthy man. Applicants please call 2733." Well, to tell the truth, while I was in Bloomington last week end, I rushed to the telephone to call this girl. Yes, I would be her husband, and I would make love to her too, (that is to say if she is as beautiful as she thinks). Well, I soon got my party, and do you know what it was all about? Well, it was an ad from the Indiana Theatre, advertising Hedy Lamarr and Jimmy Stewart's new picture, "Come Live With Me." I was squelched right.

Nate Porter believes in the old adage that music soothes the savage. Morning and night as farmer Nate milks his cows, they are learning all the latest dance steps. He says if it weren't for the Ascap Corp. in restraining his cows from learning the latest steps and songs, he knows they would give more milk. It is something new in the cow industry.

Evie Meyers was commenting on the Rat's P. A. the other day. She decided that Elmer needed both hair cut and of course a comb wouldn't hurt the head, says Evie. D. Fay Manacke, Bldg. 4-6, just found out the other day who Elmer is, but he also admits he wouldn't know me if he passed me on the street. He was telling some one on the elevator the other day that he knew me and I was standing right next to him. So I guess he is all wrong.

And we would like to know why "Casanova," Bob Reardon, Jr. stays away from our office. Is it the lack of publicity?

'Tis enough for now, I remain,
Sincerely as ever,
Elmer, the Field Mouse.
(The Rat to You!)

Thisa And Thata 19-5

You can always tell when a person is not accustomed to riding the street cars, but Alma Lahrman really should have known that street car seats are always warmer than automobile seats. . . . We don't know what was wrong with this kitty but the odor just got around. Maybe that's why Bill and Ray don't play euchre anymore. . . . What made Hazel Stauffer so absent-minded the other day. She worked all afternoon without discovering that she was wearing her boots.

Sergeant (at police station): "What! You back again?"

Prisoner: "Yes sir. Any letters?"

Punch Press 19-5

By Slug

For an A No. 1 department full of zip and zim, I am astounded by the fact that not one item of news was turned in this week. So the logical thing to do would be to lay down the pen which is mightier than the sword, cross my feet over the ironing board and devour something enlightening to the brain cells. With all the new men in the department there is bound to be an abundance of news. For instance we have C. Balyeat, an ex-truck driver, or Johnny Putnam, who served six years in the U. S. army, and a dozen more that we can't even get a peep out of. So come on out, boys, and loosen up a bit, the editor always stays my hand if I get too rough with the pencil. . . . Ed Barry was wearing a big strip of adhesive over his ear today which in a way didn't look so bad until Bill Tennison showed up with one eye plastered down with the same kind of adhesive. We didn't even know you two boys knew each other. . . . "Wildcat" Eylenberg is never seen without his chair during noon hours. The other day he was seen carrying it down the aisle and as the water fountain came by he sat down to drink. Musta have had a lot of big dies that morning, eh, George? . . . At last Bloomingdale is well represented in the department so youse guys who have been making passes at the shoulder chip had better hold a conference or count noses to see if it is safe to put the lasso on our Red Skins. . . . Well, nobody need break a leg to furnish news (maybe we should say stuff) but we would appreciate a little cream in place of skimmed milk. We will start the next meeting with a few songs so everybody will be in bad humor.

Winter Street News

A Farewell Dinner was given by the Winter Street Cost Department in honor of Bob Meyers who is being transferred to Specialty Motors Cost Department at Broadway. The event was held at the Y.M.C.A. last Friday evening. The speakers for the dinner were: O. L. Weitzman, M. A. Smith, and J. P. Murray. After dinner a lovely gift was presented to Mr. Meyers. Those present were: Oscar Weitzman, John Murray, Maitland. Smith, Clarence Kreischer, Mabel Martin, Harold Hartman, Josine Hilterbrant, Ella Grote, Kenneth Kreamer, Paul Dannecker, Lawrence Kramer, Milt Bryan, Eddie Heemsoth, and Rita Wagner.

The nine year old son of Shorty Herbst eagerly desires boxing gloves but Shorty believes in the old saying—"It finally gets you (this time the father) . . . in the end."

After living in his new home only a few days Ralph Billings, Winter Street, has decided that his kitchen is much too small for comfort. He got up early one morning to warm the baby's bottle and while waiting for it to get warm he sleepily gazed at the morning paper on the kitchen table. He noticed that he was becoming quite warm and it wasn't the new heating system either. His pajama coat tail had been dangling over the stove burner, result blisters and more blisters.

P.S.—It's a good thing spring is coming, as Ralph has only half of his pajamas left.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

We believe it was Emerson who said that "Manners are the happiest way of doing things." We don't believe that by manners he meant a slavish regard for rules of etiquette, for Americans have always been more concerned with the spirit than the letter of the law, especially as regards kindness and courtesy. There are rules governing handshaking, for example, but at times it's quite proper to break them all.

We shake hands when we welcome someone, when we congratulate, when we accept someone, when we meet friends, when we say good-bye to them, and when we thank someone. It's not at all certain how the custom originated, but today the custom of handshaking is a gesture of friendliness.

The general rules for handshaking, which are often broken and rightly so, are: A man waits for the woman to extend her hand, a host or hostess receives guests with a handshake, the guest offers his in leaving, the older person has the privilege of offering his hand or not, and women accept an introduction with a bow unless there is some special reason or feeling that prompts a handshake.

If you feel uncertain whether to offer your hand or not, it's safe to rely on the rule that older people and women have the privilege of offering to shake hands. While women have the privilege of offering to shake hands, one should always take any hand offered in friendship. Permit us to say here, that if you are going to shake hands, make it a real handshake, with your grip firm and decisive, not by limply placing your hand in the other's hand and expecting the party of the second part to do the shaking. A handshake should be mutual, expressing friendship and good intentions.

Herb Grueb and "Winnie' Saurbaugh of Bldg. 6-3 are certainly burned up. They've been faithfully going to school for several months but didn't get any mid-semester vacation and now the teacher has stated that there is a possibility of not having spring recess. Both boys are thinking of taking cigars next week to school to try and soften the instructor up.

Edna Callow, Bldg. 4-3 was very much disgusted the other day. She told us that she had to eat a whole dozen of eggs for her supper the evening before. It seems that Edna had a dozen of nice fresh eggs parked in her locker and some clumsy person let something fall on them and broke every one. So she took them home, strained out the shells, and scrambled them for her evening meal.

Anyone interested in the culture of that old-time favorite, the flowering oleander, see Art Brandenburger, Bldg. 4-3, who by the way is conducting experiments by crossing the oleander with acorns, which has produced a much larger and stronger plant. However, Art has for sale a few wilted ones which he said could be revived with a little care.

Don "Sweetheart Rosie" Voorhees and Everett "Honeybunch" McKee, Bldg. 4-3, have been observed walking up and down the main aisle quite frequently with their arms around one another. We wonder if they are trying to make the girls jealous.

NEWS THROUGH THE PLANTS

Bldg. 4-4

Gerald D. Mock, assembler on the third shift and Madeline Bennett, of Brooklyn, New York, were married last Saturday at 6:10 P.M. at the West Creighton Ave. Christian Church. Lots of luck to you, Gerald and Madeline.

The girls on "Coil placing" had a pot luck supper last Friday night. Some of the fellows hope they have another soon, and bring lots of good eats so there will be some left over. This isn't Elmer, the Field Mouse, either.

Marcella Trautman had a birthday recently and received a sparkler to be worn on the finger of the left hand.

Bob Arnett also had a birthday and the treats were on him to the tune of a big birthday cake. Thanks, Bob, and many happy returns of the day.

Nual McVey and Mac are taking a two weeks' vacation to Florida and points south, leaving Saturday. Have a good time and bring us back some sunshine.

We want to extend our sympathy to Catherine Roehling who had the misfortune of breaking her leg.

What sort of people do we have working on this floor anyway that the Works News photographer comes and personally takes their picture? Perhaps Lowell is a new type that Hollywood has been searching for. Do you suppose?

Phyllis High seems to be holding out on Earl. She hid the WORKS NEWS so he couldn't read the article in it about her hair ribbon.

Mary Kleber has a friend in the hospital whom she visits quite frequently. We were thinking this was done out of the kindness of her heart to cheer up a sick friend, but we find instead that she is drawn by the good things to eat her friend has there.

Say, what is this? Last week Stan Marquardt was sporting dark glasses. Now this week Orville Young has blossomed out in them. Perhaps the fellows are traveling incognito.

True or false? Al Miller, Bldg. 26-2, got a brand new pair of felt boots. The boys asked him what he was going to do with them and he is reported to have replied, "Hold the lantern while my wife milks the cow."

Warren Jackson, Bldg. 19-5, is sporting a new pair of shoes. We are all wondering if he is not wearing them for defense rather than style, for the shoes are too pointed for him to be wearing them for comfort alone. What say, Jack?

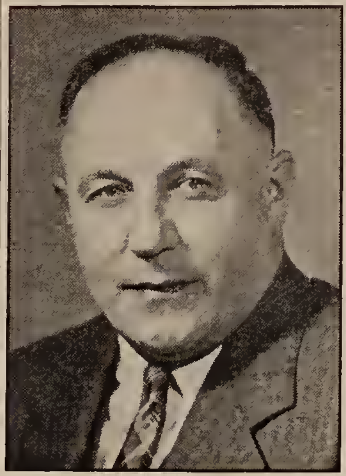
Ben Metker, Bldg. 19-5, should practice bowling before going out in public. He was seen at a bowling alley sprawled out on the floor still holding the ball. This happened last Friday night. Do you suppose it being Friday night had something to do with it? How about it, Bennie?

Carl Borchert has another convert. Loretta Gerardot, Bldg. 16-3, tried her luck at ice fishing. Her luck seems to follow along the same lines that Carl's does. She came home minus one good fish pole.

When Martha Ruhl, Bldg. 4-3, came to work last Monday, the news reporter thought she was driving a steam engine. But it happened to be that Martha was just late, that's all.

We are wondering what has kept Hazel O'Brien, Bldg. 4-3, in a daze all week, because she just can't remember to ring her own little clock card.

Quarter Century



Elmer J. Jockel

A new member of the Fort Wayne Works branch of the General Electric Quarter Century Club is Elmer J. Jockel, Bldg. 17-1, who has completed twenty-five years of service at the Fort Wayne Works.

M. B. A. PATIENTS

General Purpose: Emilia Thieme, 1319 E. Pontiac St.; Geraldine Smead, 1402 W. Fourth St.; Peggy Sonday, 1714 Nelson St.; Rosalie Spaulding, 802 Taylor St.; Brice Martin, 926 E. Columbia Ave.; William Moellering, 4022 Hoagland Ave.; Virgil Long, Methodist Hospital; Alrick Johnson, 901 Home Ave.; James Gerber, Methodist Hospital; Lucile Parrish, 823 W. Wayne St.; Helen Ross, Methodist Hospital; Doral Feasel, 915 Wilt St.; Luella Doehrman, R. No. 10, City; Jeanette Blough, 2522 Lafayette St.; Kathryn Roehling, St. Joe Hospital; Harold Souder, St. Joe Hospital.

Transformer Dept.: Lew Roberts, Ossian, Ind.; Raymond Adams, 2414½ S. Hanna St.; Louise Dougherty, 1206 Eidwood Dr.; Earl Green, Uniondale; Glenn Hobbs, 1316 Marion St.; Esther Liechty, 2817 John St.; Roland Miller, Columbia City, Ind.; Robert Mennewisch, 1511 Wall St.; Gatha Zion, 2514 So. Wayne Ave.; Joseph Schlotter, 425 W. Masterson Ave.; Darrel Zuber, 4023 Piqua Ave.; Amanda Weigman, 927 Lincoln Ave.; Bessie Chapman, Lutheran Hospital; Alfred Coxon, Lutheran Hospital.

Winter St.: Rudolph Brown, R. No. 2, City; Wm. Emkow, Ferwood Road; James Eddy, R. No. 4, City; Levi Filler, 1435 Lillie St.; Willis Fister, Waynedale; Joseph Zephyr, 3128 Oswego Ave.; Neil Daley, 3724 Gay St.; Veron Wolf, 1306 W. Main St.

Office: Fay Williams, Methodist Hospital.

Series and Specialty: Eleanor Kestner, 2316 N. Clinton St.

Apparatus: Lillian Brown, St. Joe Hospital; Michael Evers, 2003 Hanna St.

Plastics: Mabel Alcott, 2515 Brooklyn Ave.; Doretta Schlegel, New Haven, Ind.

Motor-Generator: Manford Lee, R. No. 4, City.

Left the Hospital: Janet Clappert, Rachael Beach, Otto Kammeyer.

Returned to work: Thelma Roberts, Dorothy Wallis, Revelle Shephard, Edith Baker, Mary Higgens, Otto Proehl, Cecila Smith, Paul Masson, Olen Swafford, Alice Pflueger, Gladys Balyeat, Irene Forest, Carrie Menges.

Is Zat So?

Since the gang in Bldg. 17-1 had such a grand time at Loyal Decker's "house-warming" party, they have decided to get-together again. Henry Papenbrock will be host at a Stag party at his cottage at Lake James next Saturday. We are all looking forward to another good time. I'll tell you all about it next week! . . . Some people have all the luck. A good example can be found in Harry Kessler and Arthur Conrad. We wonder if Arthur has purchased that cow yet? . . . We are glad to have Clyde Crabill back to work after an attack of the flu. Clyde's wife is also on the recuperating list after a recent operation. She required several blood transfusions, and we are proud of our tall, dark and handsome LaMoyne Gale who was one of the donors. LaMoyne says that it was that good old Gale fighting blood that started Mrs. Crabill on the road to recovery! . . . Anyone interested in buying fresh goat milk, please contact Howard Eastman . . . "Ye Question Mark" has been trying for some time to get an interesting item about Oscar Schelper and Edward Kronmiller, but without success. They can't always be so lucky! . . . We just discovered that Harold Fisher does have ears just like the rest of us. He finally splurged and got his hair cut. Harold says that he read where the hair styles for men were going to be much longer this spring, and he wanted to be in the height of fashion for the Easter Parade. . . . Congratulations to Mr. and Mrs. Loyal Decker who celebrated their Silver wedding anniversary Sunday. . . . Was Veora Habig ever all excited about the Big Indian Chief who turned out to be "the little man who wasn't there"! She says the Elex girls proved what good sports they are by playing Bingo instead. . . . We hope Barney Gausepohl catches a few more perch like the one he says he caught last Saturday. About three like that and he could entertain us all at a fish fry. How about it, Barney? . . . We express our deepest sympathy to Argen Denny in the sudden death of his father. . . . Watch for us next week and read all about "Pat's" Stag party.

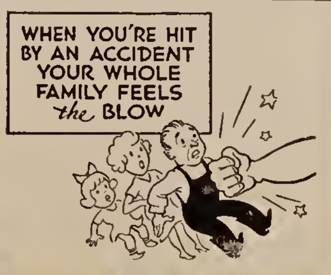
The Question Mark.

Some newspaper in this country is really passing up a good bet in not signing up Walter Fritz, Bldg. 4-3, as a star reporter. He has a nose for news unequaled by anyone in our time. "Super-Newshawk Fritz" he is known as. Better get busy, boys, and sign him up.

Martha Jane Clark, Bldg. 4-3, tried to show her brother a brand new way to cook carrots, but after the stove roasted her hand, there just weren't any more carrots to eat.

Bud Fischer, Bldg. 19-3, had a birthday last week and was presented with a real for sure "Dagwood Sandwich."

Margaret Woodward, Bldg. 4-3, spends her extra time watching the birds chirp and sing, and now she can make her hands go as good as the birds do, but we still don't hear any noise at all.



WHEN YOU'RE HIT BY AN ACCIDENT YOUR WHOLE FAMILY FEELS the BLOW

Given Promotion

Mark Tam

The recent appointment of Mark Tam as assistant operating engineer at the Power House is announced by Ralph Craig, operating engineer. Mr. Tam, who resides at 318 Kinsmoor Avenue, was first employed at the Fort Wayne Works in 1924. A few years later he enrolled at Purdue University and graduated in 1932 with the degree of Electrical Engineer. He was re-employed at the Fort Wayne Works shortly after his graduation.

19-4 Spot Jottings

Herb Braun helped his small daughter with answers to history problems and said S. D. came home very indignant because every answer was wrong. . . . Clyde Helms was presented with a beautiful tie by his pals. He didn't seem to appreciate it so we snatched it back and placed it in a "bundle for Britain," we'll show him. . . . Things you'll never see — Thelma Court and Herb Braun without their goolashes. . . . Lost, in the Paramount lounge, fifteen beautiful valentines. Finder please return to Howard Such. . . . Speaking of valentines, we hope Ross Strodel and Herb Braun received their usual amount of appropriate ones. Herb says at his peak he received twenty-one, and such pretty ones too. . . . Alva Powell was host to the testers at the Riverview cottage last Saturday. Everybody had a grand time even though Alva made his guests cut up a cherry tree. Thanks, Alva, for a very enjoyable party, such eats, such games, how can we ever forget them? . . . Irmy Gehle proudly displays a G.W.T.W. pine. One box-top and fifteen cents and it is reported that Irmy was much disappointed because no one raved, and she distinctly heard the radio announcer say everybody would rave about its rare beauty.

Why has Edna Martin, Bldg. 12-B, taken up knitting? Mebbe she has begun to feel sorry for the boys at camp. What will it be, Edna? Socks or a sweater?

She's Practical

There is no use in giving Velma Meads, Bldg. 26-2, a piece of wedding cake to tuck under her pillow—you know the old superstition about dreaming of your future husband—because Velma gets hungry during the night and eats the cake.

The Bldg. 26-2 gang offers best wishes to Betty Griffith. She was married on January 11.

Famous last words: "Boy, you hain't a' fooling"—Bob Todd, Bldg. 26-2.

Shorts From 6-B

Frow now on there will be an intermission of ten minutes from 4:50 o'clock 'til five to allow for a change of costume for Jake Sappington. He carries a complete new outfit for his street appearance, including a change of canes. Incidentally, anyone wishing to contribute toward the purchase of a wheel chair for "Gramp", will please send their pennies in care of Bill Walt, Bldg. 4-B—Thank you.

Dallas Smith is busy these days looking up the "Indiana Kidnaping Law" to see what teeth are in it. The other night while "strap hanging home on a State St. bus, a buxom lady in her hurry to get off, hooked an oversize coat button on Dallas' belt supporter, and Dallas, who weighs about 93 lbs. ring side, was dragged half way off the bus when either the button or the belt support gave way, and Dal was rescued by a sympathetic bystander.

All owners of new cars desirous of having them properly "city broke" and the "band-box" look taken off their fenders, will please consult "Red" Renbarger, who has a wife that takes care of all such details for him, and is anxious to enter the field in a larger way.

Dorothy Nahrwald has cancelled her libel suit against the "Works News" reporter and all is serene along the Potomac again.

All welders or those contemplating becoming welders are advised to look into this "sterilizing" business before going too deep into the game. "Bob" Wilson says the best way to not become "sterilized" is not to become a welder.

Habitual sayings by habitual people:

Louis Joseph — "You're telling me!"

Fred Lenz—"He done it again."

George Coplen — "How many screws are in that keg for a candy bar?"

Ruth Franzdorf — "Don't you ever ring your card?"

Virginia Drummond—"How do you break into the WORKS NEWS?"

«« It's a Joke »»

Breathes there a man with soul so dead, who never hath turned his head and said, "Hmmmmm, not bad!"

* * *

"Sometimes," said the mistress, "it will be necessary for you to help the butler upstairs."

"I understand, madam," replied the new maid; "when he's had one too many."

* * *

"My husband won a thousand dollars at poker the other night and he split with me."

"He gave you half?"

"No, he took his thousand and left!"

* * *

Policeman (to motorist): "Take it easy; didn't you see that notice—'Slow Down Here'?"

Motorist: "Yes, officer, but I thought it was describing your village."

* * *

Mrs. Green: "Why don't you ask your husband's advice on the matter?"

Mrs. Brown: "I intend to as soon as I've decided what to do."

* * *

"I thought the doctor told you to stop all drinks."

"Well, what of it? You don't see any gettin' past me, do you?"

Seventeen Days To March 3 — Cultivate The Badge Wearing Habit

West Side Breaks Three-Way Tie In Basket League

Last week's three-way tie for the lead in the G-E Club Inter-department Basketball League was reduced to a twosome, Thursday, as Small Motor Factory and West Side, two of the top spot claimants, tangled together with the Factory coming out on the long end of a 42 to 37 count. Main Office, the other member of the triumvirate, also maintained their undefeated status by downing Apprentice A 47 to 44.

Hitting several long shots West Side took a first period lead of 12 to 9 but then Small Motor Factory, by holding the Westerners to only one field goal, and staging a 14 point counter-attack featuring Vonderhaar's seven markers, went into a 23-18 half-time margin. The Factory continued to roll along during the first part of the third quarter and at one time held a nine point lead but West Side by using a fast break cut this margin down to only three points at the third stanza termination. With Clawson hitting a couple of buckets and Diffendorfer bagging three goals in three shots Small Motor Factory again built up a sizable lead and managed to protect this margin with stalling measures during the remainder of the contest.

The Main Office-Apprentice A encounter was a slam-bang affair with the Office's third quarter margin of eight points enough insurance for victory. The Office lads, using a fast break type of attack during the first two quarters, time and time again cracked the Apprentice defense for easy, sure shots at the basket. The A's by holding two men back during the last half managed to stop some of these "pup-shots" but then the Office cashed in on ten charity tosses to maintain their lead. Main Office, heretofore regarded as a small team, seems to have found the tall man that they were looking for as Kreig, newest addition, tallied 14 points besides helping O'Brien control the rebound situation. Apprentice A's chief scorers were Reynolds with 17 markers and Weigand with 13.

With the loser being forced to occupy the league's cellar position Apprentice B and the Squares staged a ding-dong battle that the Apprentice, by coming from behind, managed to win 29 to 22. With Neidhart and Bobay providing the points the Squares had a 14 to 11 half-time lead but the Apprentice tightened up their defense in the third quarter holding the Squares scoreless and staged a counter attack with Kelley and Rolfing doing the scoring that netted them this vital win.

Elex Theater Party Sunday Afternoon

Members of the Elex Club will attend the play "Our American Cousin" at the Civic Theater on next Sunday afternoon, following a noon luncheon to be served at the Chatterbox. The affair is under the auspices of Elex Club second shift executive board. Tickets for the luncheon are 75 cents and this includes admission to the theater.

An Important Man On The Team

"Jap" Voirol, the G-E Industrial's center and tallest man, was snapped in last week's practice. "Jap" has been participating in sports around Fort Wayne for a great number of years and the Industrials were fortunate in having him try out for their team.

He has been very prominent in baseball circles, having pitched for a great number of local organizations and has had tryouts and played with several professional clubs in the country. He also has been center and leading scorer of the Small Motor Factory club, one of the better teams in the Inter-department Basketball League.

Voirol and his mates will be busy practicing the next couple of weeks in preparation for their tough games ahead with the Miami, Ohio, Redmen; Coldwater, Michigan, Merchants; Huntington's South Side Furniture and Zollner's again.

Safety Award To Mile Of Dimes

A second gift of a safety award won in the local Works safety contest has been made to the "Mile of Dimes" fund to aid in the battle against infantile paralysis. The award was won by the Wire-Insulation group in Bldgs. 8-1 and 8-2 of which Glenn Greek is foreman.

IN THE ROUGH

By WALTER SUNIER

It doesn't pay to take your work lightly. Each job must be done with care even if it appears to require nothing more than the merest jab.

Johnny Fischer and Bobby Jones both took a jab at a golf ball and in each case it cost them a lot of extra work.

In the Amateur Golf Championship, Fischer was headed for a new low medal score for this event. On the fifteenth green, he started putting about five yards from the hole. His first putt slid by the left of the cup. His second putt had no more than a foot to go and Fischer expected to sink it with one hand. However, it did not can and instead of making a new record, Fischer had to be content with tieing the old record.

In another National Amateur match, Bobby Jones sent an approach putt within a foot of the cup. It was Jimmy Ward's turn to putt next. Bobby, thinking he would do Ward a favor, walked rapidly to his ball with a remark to Jimmy that he would knock it in. However, he didn't knock it in and the extra stroke threw him into a tie with Chick Evans. Fortunately, Bobby beat Evans in the play-off but he could have saved himself a lot of overtime by playing the putt carefully.

The old saying is true—"You drive for pleasure but you putt for score." It is possible to recover from a bad tee shot but a missed putt is a stroke lost. Putting is 50 per cent of the game as the putting par is two for every green.

First Half Title At Stake In Club Basket League

West Side and Apprentice A battle each other tonight at 8:30 o'clock in the G-E Club gym with the first half title of the Inter-department Basketball League at stake.

These two teams finished the initial round with four victories and a defeat apiece. Apprentice A dropped their only game to Main Office 43 to 40 while West Side's conqueror was Apprentice A, themselves, in the first game of the season.

West Side's entire squad is "ready and rarin' to go" but the Apprentice A roster has been greatly weakened by the loss of Charley Lauer, their great center, who is confined in a hospital. Lauer, league's leading scorer in 1939 and runner-up in 1940, was one of the mainstays of this year's Apprentice quintet and his absence makes the Westerners favorites to cop the championship.

Ward Horn, Apprentice mentor, will probably start Reynolds, Louden, Weigand, Pequinot and Allen while Coach Yoder's nod will be given to Offerle, Horstmeyer, Motter, Adams and Miller.

A preliminary starting at 7:30 o'clock will precede this clash.

ON -- the Alleys

By Bob Ringle

A few drips and drizzles from the bowling circuits:

Ted Schlup of the G-E Club Major League cracked out a nice single game Wednesday of 247 . . . Bill Doehrman's bowling is as "consistent as death and taxes" — he's always in the charmed 600 circle. . . . Draper of the Transformer League went the boys one better last week—he rolled two games under 100. . . . The Coils and the Ohms of the Transformer League had a nice battle Friday in their last game—it ended by a tie. . . . Did you notice that three-game score of Ed Lenz's, Tool Room League Secretary, a gigantic count of 640! . . . The whole Tool Room League was hot Wednesday as nine of the members rolled over 200. . . . The Infielders of the G-E Club Major League rolled a new three game high of 2,790.

Here is some sweet bowling that would make any professional blush with pride:

W. Mertz—210, 235, 236, 255, 203. Total—1139.

F. Matthews—290, 184, 244, 216, 238. Total—1172.

Matthews had a spare in the first frame of his first game and the remainder were all perfect strikes.

Checker Team Wins

The G-E Club Checker team composed of Russell Isaacs, Bob Short and Ray Schwegel defeated the International Harvester team by the score of 26 to 16 in the tournament held last Thursday evening.

Seventeen Days To March 3 — Cultivate The Badge Wearing Habit

GENERAL ELECTRIC NEWS
FORT WAYNE WORKS

RECEIVED
FEB 21 1941
PUBLIC LIBRARY
FORT WAYNE & ALLEN CO., IND.

Volume 24 | FORT WAYNE, INDIANA, FRIDAY, FEBRUARY 21, 1941 | Number 53

Board Chairman Appointed On Defense Council

Philip D. Reed, chairman of the Board of the General Electric Company has accepted an appointment with the Council of National Defense in Washington. He will serve as consultant to the priorities director in the office of production management, it was announced Wednesday in Washington.

PHILIP D. REED

In this new post, which he assumed Monday, Mr. Reed will be on duty in Washington from Monday through Friday each week. According to his present plans, Mr. Reed will be in his office at General Electric headquarters in New York on Saturdays. He will also be available at other times for consultation on company matters.

New Storage Plant For G-E Plastics

Plans for the construction of a new storage building, with space of 10,000 square feet, at the plastics plant of the General Electric Company in Pittsfield, Mass., have been announced by G. H. Shill, manager of the department.

The building, which will be used for the storage of compound materials for the Pittsfield, Meriden, Conn., and Fort Wayne, Ind., plants, is part of the long-range plan for Pittsfield operations of General Electric's plastics division. It will be of brick and steel construction, and will be erected to the north of the recently-completed pilot building.

Plans for construction are being drawn up and work is expected to start shortly after the beginning of construction on the new office and laboratory building, announced in December. That building is expected to be completed during the summer.

Defense—Our Biggest Job

Defense program production crowds the plants of General Electric and thousands of new employees are now at work making products for the army, the navy, and the air corps. During last year alone more than 16,000 new men and women were added to payrolls throughout the company. A large portion of this group went right to work on the defense work already set up. Many of them entered training courses to fit them for work to come. Before the next six months have passed, nearly as many more new names will be added.

Defense production is the keynote in practically all divisions of our company. It is the biggest job ever undertaken in G-E history, and every employee has a vital part to play in this national emergency.

The many products we are building which are directly concerned with defense include gun mounts, searchlights, fire control apparatus, and a host of other devices, some electric, some mechanical. Products indirectly connected with defense include turbines for utilities called upon to increase load facilities demanded by their customers . . . also engaged in defense work; motors to drive machine tools; gears to drive ships; miles of cable for the tremendous expansion in the building program of the nation; miles of wire to carry the current to run the machines and light the millions of new lamps which are burning night after night as this gigantic program gets under way.

General Electric is indeed a defense industry of front-line importance. Every employee has a part in this dramatic race, this compelling struggle to overcome the handicap of such a little time to do a big job. The success or failure of the program rests individually upon each of us. If we all take our part of the load and share in the sacrifices, the job will be done on time.

Issue Information On Federal Income Tax Returns

A greater number of individuals will be required to file Federal income tax returns this year because of two changes in the law:

1. The personal exemption has been lowered from $1,000 to $800, if single (or married but not living with husband or wife), and from $2,500 to $2,000, if married and living with husband or wife during entire year.

2. Gross or total income is now used as the basis for determining whether a return is required to be filed. Last year the requirements for filing were based on net income; i.e., gross income less deductions for certain taxes, interest payments, contributions, etc.

If both husband and wife receive taxable income a return must be filed if their combined incomes aggregate $2,000, provided they were living together during the entire year. If married only a part of the year, a return is required if their combined incomes equal or exceed the personal exemptions to which they are entitled.

A head of a family is entitled to a personal exemption of $2,000 but, if unmarried, a return is required to be filed if gross income is $800 or over.

In addition, a credit of $400 is allowed for each person (other than husband or wife) classed as a dependent under the income tax law.

As the Company is required to file returns showing name and

(Continued on Page 2)

$57,990 In Insurance Claims In January

Telediphone Users Greatly Increased

Following the article in last week's WORKS NEWS on the installation of the telediphone system at the Fort Wayne Works, numerous requests have been received for further details on the operation of the system.

Better than two hundred users of the telegraph system have been instructed in the use of the new Telediphone method of sending telegrams. Employees not yet contacted who desire to use the system are asked to call Arthur F. Vinson, phone 539, so their names may be added to the list of qualified users and so that proper instructions can be issued.

Ten Accidents Are Recorded In January

Ten losing time accidents are recorded for the month of January at the Fort Wayne Works. Of this number four resulted in injuries to the fingers and three to the toes. One of the mishaps occurred in the Distribution Division, two in the Motor-Generator Division; two in the General Service Division; two in the Refrigeration Division; one in the Tool Division; one in the Transformer Division and one in the Miscellaneous Division.

One Payment of $3,500 Made At Fort Wayne, Grand Total Reaches $18,248,278

During the month of January, beneficiaries of eighteen employees of the major apparatus Works received a total of $57,990 under claims paid through the Group Life Insurance Plan of the Company. The Schenectady Works had nine claims for a total of $32,750. Pittsfield Works had three claims for a total of $9,150, and Erie had three claims for a total of $8,190. There was one claim in the Lynn River Works for a total of $2,000; one in the West Lynn Works for a total of $2,400, and one in the Fort Wayne Works for a total of $3,500.

Throughout the entire Company, the total of death claims paid during the month of January was $103,572. The total of death and disability claims paid since the Insurance Plans were inaugurated on January 1, 1920, now stand at $18,248,278.

Prize To Charity

Evidently believing in the slogan "charity begins at home" A. J. Kaufman's section in the Distribution Department, having won the safety contest "Jack Pot" for the months of December and January, turned the proceeds over to Irene Meyers to use for whatever she sees fit.

Local Man Is Honored For Achievements

Armin F. Mittermeier Among Twenty-Five Employees To Receive Coffin Foundation Award

Charles A. Coffin Foundation awards were made today to 25 employees of the General Electric Company, recognizing them for outstanding contributions made last year to the progress of the Company and the electrical arts.

Included among the awardees is Armin F. Mittermeier of the Fort Wayne Works who is employed in the planning department of the Transformer Division in Bldg. 26-2. Mr. Mittermeier's award was made this morning by Works Manager M. E. Lord at a meeting attended by Fort Wayne Works officials.

The citation in connection with Mr. Mittermeier's award reads as follows:

"Public acceptance of fluorescent lighting has created such a demand for the fluorescent lamps made by our Company that Fort Wayne's facilities for manufacturing the necessary reactors or ballasts have been taxed. As a consequence an urgent need arose for methods of ballast manufacture which would allow quantity production of a quality product on an economical basis.

"Mr. Mittermeier designed and put into production two very unusual and ingenious machines for stacking the cores of these ballasts,

G-E Chicago District Activities Centered In New Building

With the movement of personnel and equipment now completed, Chicago district activities of the General Electric Company and affiliated companies, formerly scattered in nine separate locations, are now housed in G-E's new $1,500,000 building in Chicago.

Occupying an entire city block, the structure is seven stories high, of modern design, and equipped with the latest in lighting and air conditioning. It was designed by architects Holabird & Root, and erected by the James Stewart Corp., general contractors.

Directed from the new regional headquarters building are General Electric's sales, engineering, and servicing operations in 11 midwestern states and parts of three others, including offices at Davenport, Detroit, Kansas City, Milwaukee, Minneapolis, Omaha, and St. Louis.

• About Yankee Gumption

Back in the days when the electrical industry was a lusty infant and the people were still groping in the last stages of a gas-lighted world, there appeared on the scene a courageous Yankee by the name of Charles A. Coffin. Grandson of Tristram Coffin, pioneer settler of New England, he early exhibited the foresight, courage, initiative and perseverance known as Yankee gumption.

Armed with this qualification and fired with the belief that the electrical industry offered no limits, he laid the stable foundation for the present General Electric organization. The job was not easy. New paths had to be cut through the granite indifference of public opinion. Daring financial plans had to be devised and carried through. A thousand and one things had to be done before General Electric was ushered into the world. Coffin never faltered. He pressed on and overcame all obstacles.

When Coffin retired from General Electric in 1922, the foundation bearing his name was established. Each year since, employees with Yankee gumption have been chosen for awards. They perpetuate that spirit, that unceasing determination to overcome all obstacles and press on to a victorious solution of their problem.

We salute the new awardees. We hope that their hard won laurels will only spur them on to greater accomplishment!

• How Much Are You Worth?

Did anyone ever offer to buy your hand or arm?

Did anyone ever ask you what your life was worth?

Few of us have been faced with such questions but every time we take a chance or are careless in our work we are offering our body for sale at job lot prices. This is something to consider seriously, because once the sale is made there is little possibility of reversing the deal. The main failing of the human body is the fact it seldom replaces what it loses.

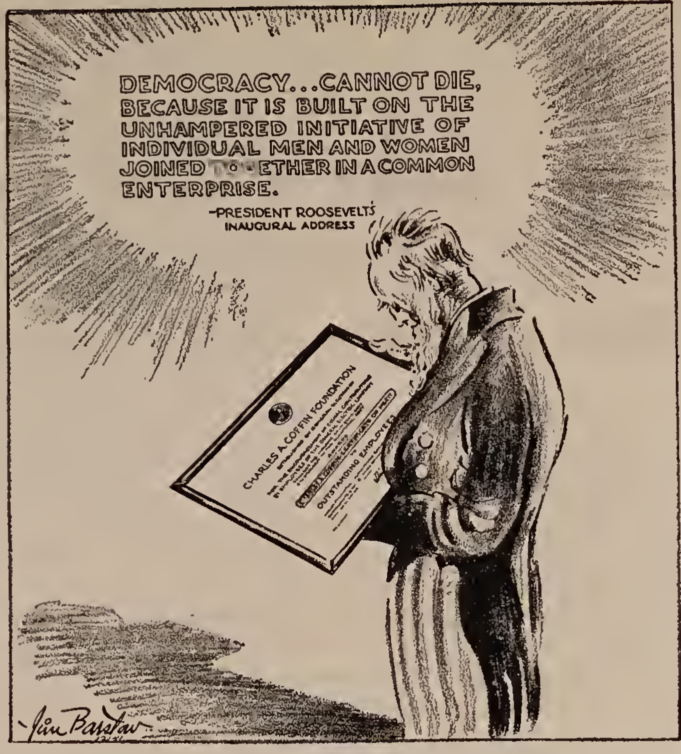
From the standpoint of earning power alone the human body is extremely valuable. An average wage of approximately $35.00 per week and 50 work weeks a year results in an annual income of $1750. When this annual earning power is compared to the earning power of capital at 5% interest, it would require $35,000 to furnish us an equivalent income. How many of us would handle such a sum carelessly, yet we will drive our car at 60 miles an hour or will take chances in our work endangering our ability to earn a livelihood? This may not only involve a personal loss but may seriously affect the lives of our families and relatives.

But aside from the money losses incurred by accidents or illness, there is a loss in ability to enjoy life that cannot be measured in dollars and cents.

The joys of seeing a movie or going hunting, the pleasure of visiting our friends, the sport of athletic competition; in fact almost all of the joys of life depend on the preservation of a sound body. Is it not worth while to think twice and protect that which means so much to you and to me?

—"Suds", Proctor & Gamble Co.

SYMBOL OF DEMOCRACY



DEMOCRACY...CANNOT DIE, BECAUSE IT IS BUILT ON THE UNHAMPERED INITIATIVE OF INDIVIDUAL MEN AND WOMEN JOINED TOGETHER IN A COMMON ENTERPRISE.
-PRESIDENT ROOSEVELT'S INAUGURAL ADDRESS
CHARLES A. COFFIN FOUNDATION
OUTSTANDING EMPLOYEES

Income Tax

(Continued from Page 1)

amount of compensation paid to each employee whose salary or wages (including General Profit Sharing) is equal to or exceeds the personal exemption claimed by employee, it is important that each employee determine whether he is required to file a return. A return may be required to be filed in some cases, even though no tax will be required to be paid.

The General Instructions attached to the returns provide very helpful information. If not otherwise available, they can be secured at the office of the Deputy Collector of Internal Revenue located in Room 340, Federal Building. Returns should be mailed in time to reach the Collector not later than March 15, 1941.

Oil Is Burned Upside Down In The New G-E Oil Furnace

A flame that actually burns upside down is one of the unique engineering features responsible for the outstanding efficiency of the new General Electric Oil Furnace. During the research which preceded the introduction of this new product, G-E engineers discovered that a flame burning upside down could then be reversed upward in a "heat trap" which squeezed much more heat out of the flame than former methods of combustion.

The "heat trap" as finally incorporated in the design of the G-E Oil Furnace stops practically all the useful heat developed in an oil flame, including that which formerly went up the chimney as waste. The "heat trap" design also reduces heat losses during off periods of operation. Thus, when the automatic thermostat has shut down the oil burner until additional heat is needed in the house, the "heat trap" holds the accumulated heat inside the boiler, rather than allowing it to be lost in the natural draft of the chimney.

Oil Furnaces can be purchased by G-E employees on easy monthly terms. Stop by at the Employees' Store for complete information.

At The . . .
EMPLOYEES' STORE

G-E Toasters, modern in design, make delicious, crisp golden-brown toast every time. Efficient heating unit provides quick and even toasting. Cool handles for raising and lowering basket sides. Gleaming Chromeplate finish with decorative embossing. CARLISLE, Cat. 119T-46, has solid side panels. EXPANDOR, Cat. 119T48, with expanding hinge control of doors permits sandwich toasting. AUTOMATIC, Cat. 129T76, toasts two slices of bread, both sides at once. Merely set the temperature-control knob to suit your taste. Selector knob allows choice of having toast pop up or remain in toaster to keep warm. Attractively patterned with decorative embossing on side panels. Finished in durable, gleaming Chromeplate with mottled Mahogany Textolite knobs and lifting handles. Long-life nickel-chromium heating unit is mica insulated. TOASTER SET, Cat. 149S76, is styled and patterned to take full advantage of the convenience features of the beautiful Automatic Toaster.

SCIENCE FORUM – by L. A. Hawkins

Q. If all the water vapor in the air were condensed, would it cover all the land including mountains and hills?

A. No. All the land would not be covered with water. It may startle some people to learn that there may be more than a million tons of water in a cubic mile of the atmosphere. However, fortunately for us this does not all come down at once as rain or snow. There is a never-ending cycle of evaporation from the surface of the earth and precipitation in the form of dew, rain or snow, and this varies greatly in different regions of the globe.

The surface of the earth is so large that even the tremendous amount of water in the air would not cover it to a great depth. An estimate is given in the book, "Physics of the Air," by Humphreys, that the average amount of moisture in the whole atmosphere, if condensed, would make a layer a little more than one inch thick over the whole surface of the globe. If this amount were added to the oceans only a small amount of land would be flooded.

Q. Would it be possible to operate a short-wave station near a high tension line?

A. Assuming the short waves to be in the 20-40 meter band, the answer is "Yes." It should be possible to operate either a receiver or transmitter near a high tension line.

Q. Millions of shooting stars are moving about the sun and the earth all the time, but they are not visible to us until they enter the earth's atmosphere. Why is this so?

A. These shooting stars, or meteors, are really not stars at all. The stars are intensely heated bodies like our sun, and glow because of their own high temperature. Meteors, while they are out in space, are cold bodies like our moon and planets. Unlike the latter, they are much too small to be seen by the reflected light of the sun. Meteors travel through space at speeds ranging from 15 to 50 miles per second, and, when they enter the earth's atmosphere, a great deal of friction is developed. This friction actually raises the temperature of the surface of the meteorite to the melting point, and it is wiped off, leaving a steam of incandescent particles and vapors behind it in the air. Usually this fusing process completely destroys the meteor long before it reaches the surface of the earth. Occasionally, because of its size or its low speed, one does get through the atmosphere and strikes the earth.

At certain times of the year, we are more likely to see meteors than at other times. They are unusually plentiful on the night of November 15.

Q. What is documentary film?

A. The term simply means film which contains a record. For example, the Library of Congress has on file over a million feet of film records obtained by photographing manuscripts in various libraries of the world, with a small camera using 35 mm. film. Instead of a whole page of a newspaper, for example, we have a picture of the page, only about one inch square and little thicker than the page itself. When one wishes to refer to the newspaper page, the small film picture is projected on the screen and one may have a copy of the page, of any size desired.

Q. What kind of material is uranium? Is it a liquid, a metal, or what?

A. Uranium is a metal. It has a white color in its pure state, and is one of the heaviest elements—more than 18 times as heavy as water of the same volume. It melts at approximately 1500 degrees Centigrade, and it oxidizes slowly in air and dissolves in the common acids.

Ten Days To March 3 — Get The Badge Wearing Habit

NEWS THROUGH THE PLANTS

Slips And Chips

By Sir Vis, 4-4

Wm. (Bill) Johnson recently purchased a garage (one of those sold to make way for the new air base) and had it moved on his lot. According to Bill the only appropriate use for the garage is a fire department because it is all red, including the roof. Bill is now trying to persuade the Waynedale council to rent his garage for the fire department. If this fails, Bill will just have to paint it. Luck to you, Bill, we hope you are successful.

"I really catch 'em," says Don (Daggy) Thomas, as he delivered a couple of fish to Oma August. I am wondering if this delivery was made to prove his statement or was it a farewell gift.

Don "Daggy" Thomas is leaving us for a better job. We wish him the best of luck, and may success be his.

My neighbors have all been excited and honored by the presence of an explorer (at least they thought so) in the neighborhood. It seemed rather fantastic, but they claimed they saw a man all dressed up in an explorer's or aviator's suit enter Charles (Flash) Meyer's house the other evening. I remained silent, thinking it was just a bit of gossip, as usually travels through most neighborhoods. But today I learned that they did see such a person enter Flash's house. However, it was not an explorer as they thought, but our own beloved Herman Lepper accepting an invitation to have a dish of ice cream. I do not know what all the fortification was for because the next day Hermy came to work with an awful cold. . . . One never knows what the morning mail will bring. That was my experience last Friday. Yes, Elmer (the mouse) and Charlene came dashing up to me with five letters. They stood waiting for me to open them. At first I was a little surprised to receive mail special delivery, but soon it dawned upon me that it was St. Valentine's Day. I opened the envelopes and discovered that others (at least five) know me besides my wife. By the way, two of the valentines came from Scotchmen because they only had one and one-half cent stamps on them. I certainly enjoyed receiving the valentines, and thank you, five friends, for thinking of me.

The savage African tribe of Ubangis have a habit of stretching the lips of their women around circular wooden disks until finally, they become six or eight inches in size, sticking right out from their faces like two plates. You've seen their pictures in travel magazines.

The story goes the rounds that two Ubangis girls met one very hot day in the jungle. One of them stuck her face up close to that of the other, and rapidly repeated:

"Peter Piper picked a peck of pickled peppers! Now you fan me awhile!"

Mrs. Miller's Tea Room was the scene of a dinner party honoring Dorothy Henry, Bldg. 4-2, who is leaving the company. The dinner table was centered with a lovely bouquet of snapdragons and carnations. A corsage of rumbrum lilies marked the place of the honor guest, who was also given gifts from the following: Dorothy Lytle, Edna Hassinger, Willadean Rathert, Marjorie Kavanaugh, Margaret Niblick, Evelyn Blotkamp, Virginia Hawkins and Irene Diek.

Helen Maxson, Bldg. 17-4, says since her fiance went to camp she will have to stop worrying because she can hardly keep her skirt on any more.

Bob Pence, Bldg. 4-3, is a regular Russian. The way he rushes around home on Monday morning is something to see. In the first place, he gets up late, then rushes to try to beat the clock, forgets his car keys, hat, identification badge, etc. The poor Russian does all his rushing for nothing.

Fred Geisler and Chas. Strodel of Bldg. 19-3 enjoyed a pot luck dinner at the plant Tuesday noon, Fred furnishing the pot and Strodel the luck (meaning the appetite). Sure did make the rest of the boys on the floor hungry.

Monday noon Bob Wefel, Bldg. 17-2 office, started out without his overcoat. He thought spring was here. For further details see Bob.

Ray Kierspe, Bldg. 16-3, reports that he is going batty. Every time he goes down cellar—there they are.

Left the Hospital: Evelyn Pearson, Lillian Brown, Helen Ross, Virgil Gerber.

Returned to work: Lawrence Clancey, Luella Doehrman, Cletes Binkley, Oliver Ewald, Emilia Thieme, Alrich Johnson, Brice Martin, Harry Stahl, Peggy Sonday, Maude Ehrhardt, Catherine Ryan, Esther Leichty, Willis Foster, Joseph Zepher, Pauline Poorman, Ethel Keller, Eva Fabian, Glenn Fletter.

Harry Mumma, Bldg. 4-3, has an awful lot of trouble with his tool box. It seems that some of the boys borrow tools out of said receptacle and leave it in a very disorderly condition. Harry said that he was going to install a set of grates in the tool box and when any of the boys wanted a tool, all they will have to do is shake said grates.

"What is Scotland Yard?"
"Two feet, eleven inches."

Honored For Distinguished Service

ARMIN F. MITTERMEIER

Coffin Award

(Continued from Page 1)

which have resulted in a higher-quality product at a reduced cost and increased output. There had been many previous attempts by others to accomplish similar results without success."

The awards were made for 21 distinct accomplishments, four of them were joint awards to two employees. Eleven were factory workers, ten were engineers, three were administrative or clerical employees and one was a salesman. Since the Foundation was established 18 years ago, 555 employees have been singled out to receive annual awards.

Outstanding in public interest was the award made to Horace S. Hubbard of the company's Pittsfield (Mass.) works for development and design of a 1,400,000 volt d.c. generator for the U. S. Bureau of Standards in Washington. The generator, described by Dr. Lauriston Taylor, director of the Bureau as "the first real piece of equipment I ever had," provides power for a 1,400,000 volt X-ray tube, also made by General Electric and in daily use by the Bureau for standardization tests and precise research on X-ray dosage problems.

The generator designed by Mr. Hubbard has five times the capacity of any such equipment in service and four and one half times the voltage of any generator previously built by the General Electric company for such service. It has many unusual features including an almost complete absence of corona or corona ripple, an essential factor in the successful operation of the big X-ray tube it provides power for.

Mr. Hubbard has been with the General Electric Company for 20 years. He is a graduate of Pratt Institute with the degree of electrical engineer and started with the Company in the testing department in 1920.

Other employees who received awards and their locations are as follows: Edward L. Hughes, Jacob J. Vinneau, A. U. Welch, C. M. Cederstrom and A. W. Everest, Pittsfield; W. C. Heckman, G. Bryan Shanklin, Charles Fuller, William Tromper, Anthony I. Kasper and Alfred Bowman, Schenectady; Henry A. Jensen, Joseph B. Stazinski and John D. Seaver, Lynn; H. E. Boles, R. J. Meier and James J. Mallon, Philadelphia; Victor J. Grieb, Erie; Ernest L. Richardson, Boston; John P. Suerth, Chicago; Walter R. Weeks, Bridgeport; Armin F. Mittermeier, Fort Wayne; Ira W. Lichtenfels, St. Louis and Mark Q. Allen, Columbus, Ohio.

Elex Club Meets "Our American Cousin"

An interesting feature of the Elex theater party last Sunday, when a group of the Club members visited the Civic Theater for a performance of "Our American Cousin," was the opportunity to meet members of the cast and do some "back stage" inspecting. In the above picture a number of those attending the party are pictured with the cast on the Civic Theater stage.

Ten Days To March 3 — Get The Badge Wearing Habit

NEWS THROUGH THE PLANTS

Tomorrow is the birthday of a very famous American.

When people think of George Washington's birthday, they think of Washington in the Revolutionary War. Washington at Valley Forge. Things looked blackest to him then. His men didn't even have shoes to wear.

It's a crude comparison and perhaps I shouldn't even try to get this past the censor, but let's compare that winter with the one we're going through now. Washington had trouble making both ends meet, he couldn't get supplies.

But he DID something about it. He didn't just sit back or go ice fishing, and wait for his prayers to be answered. He got busy and did something.

Now our cost reduction men aren't going around leaving blood tracks in the snow like Washington's men did, but they are having a hard time of it in some ways. In times like these, one of the first things we must think about is cost reduction.

One reason is to conserve materials which are scarce.

Another reason is to fully employ our skilled labor on the important jobs.

A third reason is to conserve the Nation's pocketbook (which after all is yours and mine) by not letting costs go up out of reason.

"Weel, Sand," Cousin Colin told me, "we may have our troubles but we couldn't be anywhere as bad off as General Washington. I canna imagine a man having sae many troubles and worries to the oxtent of his throwing a dollar across the river."

Punch Press 19-5

By Slug

In our opinion — which is no opinion at all—one of the most strenuous games for the human brain is this thing called Bingo. It is evident that after getting a whole mess of fours lined up time after time, only to hear someone at the other end of the table yell BINGO, there is bound to be a break-down somewhere. Thus we come to George Lauthan at a time when George had been out-bingoed at a point where human endurance could stand no more. As the final fatal BINGO echoed through the hall George jumped up, grabbed a lady's hat and ripped it into shreds. After salvaging the feathers to stick behind his ears he tossed the ruins aside. As people started edging toward the exits George saved the day by explaining that the hat was an old one he had found and brought along as a sort of safety valve for pent-up feelings. No wonder Bingo is such a popular game with entertainment like that. Me thinks I should betake myself to a session sometime.

Florence Stocks, Bldg. 4-3, is spending her extra time just wishing for signs of spring so she can wear those new spring togs.

Won't be long until you may see a sign on Oscar Schelper's (Bldg. 17-1) house, reading "Cabinet work done here." But don't let that sign fool you. Cabinet work isn't being done at his home. It's being done at Bernie's house, with linoleum being laid, too.

19-5 Office Chatter

Last Friday was really almost like Christmas with everyone in the office receiving gifts—well at least 90 per cent received valentines. Some of us were favored with a few extras, and of course those who received none at all are under deep suspicion. 'Twas strange that the handwriting on most of them was the same and that they evidently had all been bought at the same dime store. Ah well, I shall frame mine. Come up and see them sometime.

Hubert Langer, Bldg. 26-5, believes in a two-car family—one he can always rely on and one he can always work on. Happenings to his old bus are numerous; new starter; lost a wheel; new battery; punctures; engine failure, etc., etc. Young Langer finally got disgusted and got his own car so that he could get to work on time.

We are all wondering why our southern girl, Josephine Faulkner, Bldg. 4-3, is having so much fun enjoying the snow. Maybe some day she will not think so much of the idea of slipping on the ice.

Appreciation

Eileen Morris and Mary Hamman wish to take this means of expressing their appreciation to members of the Fort Wayne Works organization for their kind expressions of sympathy in the death of their father and husband, Amsy Hamman.

Bea Stalter, Bldg. 19-5, seems to be a pretty good bridge player. At least it is reported that she just takes it for granted that the prize is hers.

Safety Shoes Popular With New Employees

LET'S USE OUR HEADS TO SAVE OUR FEET

That the importance of safety shoes as an accident prevention measure is not underestimated by new employees is indicated by the considerable number of purchases of the shoes made during the past few months at the employees' store. In the above picture Vern Sheets, Bldg. 2-1, seated at the left, and two new employees Richard Jehl and Richard Blackburn, are shown being fitted by Ralph Perkins, in charge of the Employees Store.

The Safety Shoes sold through our Employees Store are guaranteed as to workmanship and material by the shoe manufacturers. If a shoe gives out before the wearer has used it 8 to 10 months (8 months for heavy usage and 10 months for light usage) the employee should report to the Personnel Office, Bldg. 21, for an adjustment and exchange of shoes, obtaining a new pair of shoes with credit.

In purchasing shoes much care is given to fitting. In case shoes are not comfortable, the matter should be reported immediately to the Employees Store.

We hear that the girls in the Aircraft Department have voted Heuston Hicks the Tyrone Power of Bldg. 26-5.

George Skimels, Bldg. 26-5, believes in saving time and money on his reducing treatments. Instead of waiting to get home to use an electric vibrator George removes a couple of spark plug wires on his car. He gets the treatment as he drives and saves time and electricity.

George Koons was at Franke Park to skate but claimed the ice was unsafe for him. What with water standing on the top and George mopping the ice every ten strokes, we don't blame him.

Earl Lenz is not concerned about the fish he catches. It's the ones that get away.

It looks as if Rufus Niblick will have to admit that although his Archers went after tiger stripes they came home minus and with their bows and arrows shattered and bent.

Fred Fitch has his car all fixed up and now everything is quiet again after a rough squall.

Famous last words: "What's the idea of going away and leaving the wind on"—Dick Miller, Bldg. 26-2.

Elva "Curley" Dafforn, Bldg. 26-2, is getting absent-minded these days or else he has forgotten how to turn off the spigot on the compound tank.

Elmer Wagner's valentine relating to his vocal accomplishments was quite opportune—his musical renditions are the awe of all who hear.

Wanted: One good Indian guide acquainted in the wilds of Jimmerson Creek, Lake James. Apply in person with hip boots and compass to Henry Papenbrock, Bldg. 17-1.

For Sale: One pair of shoes, guaranteed corn and bunion makers, size 8. Owner, Walter Prince, Bldg. 17-1, claims they are too small for a size 12 foot.

We wonder if Eddie Kronmiller, Bldg. 17-1, uses his 3-inch cigarette holder when smoking his cigarettes to put on a dignified appearance, or is it a safety measure so as not to ignite his curly locks?

Jerry Smith, Bldg. 4-3, put on the lights on his car and pulled up his coat collar but he had a fit when he looked at his watch and it was only 1:30 p.m. last Monday afternoon in the snow storm.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

A few hints to those of you who would be glamorous. You will find these useful anywhere you may be:

1. Be enthusiastic. Enjoy yourself and don't be afraid to say so.
2. Be proud that you are a woman.
3. Be kind and genuine and loyal.
4. Be friendly.
5. Be a good sport; don't whine or complain.
6. Learn to talk. If you can think, you can talk, for speech is nothing but just thinking out loud. The greatest fault of the quiet girls is their tendency to understate. Don't say, "I had a nice time" when you are really thinking, "I had the best time I ever had in my life."
7. Cultivate ways of putting yourself at ease; be always well-groomed. Study clothes and make-up in good books.
8. Learn to walk well and to stand tall because these give you poise.
9. Learn to do things that make a girl popular. Be a good dancer, good in outdoor sports, be able to add to everybody's fun.
10. Practice listening so attentively that you could repeat your friends' remarks. If you really understand the conversation, you cannot fail to have something to say in return.

Take another look at that 9th one. A good dancer doesn't kick her heels into someone else's shins.

And speaking of outdoor sports—Ice-fishing is fine for the figure during winter. It may be a little rough on the hands but you will get plenty of that "bend-down-sister" if you do it right. AND YOU WOULD-BE SUMMER FISHERS who are continually griping about the ice-fishermen taking all the fish out and spoiling your summer fishing should have your heads examined. The percentage of fish taken out during the winter season is so small compared to that taken out during the summer that even if you wouldn't use your traps we couldn't come anywhere near equaling your records.

These may help you out on the 6th one. See how many of the following words you can pronounce correctly without the aid of the dictionary: decadent, address, rebound, research, status, strata, sacrilegious, exquisite, pretenses, acumen, formidable, hospitable, impious, contractor, alternate, romance, detail and bouquet.

And for that number 2. In Personality Pointers, Jill Edwards says: "Many years ago, when Twashti, the Chinese Creator, wished to endow the original man with a helpmate, he found, to his distress, that he had employed all his materials in the creation of man. So he decided to create a combination. He took the lightness of the leaf, the glance of the fawn, the gaiety of the sun's rays, the tears of the mist, the inconstancy of the wind, the timidity of the hare, the vanity of the peacock, the harshness of the diamond, the softness of the down upon the throat of a swallow, the chill of the snow, the warmth of fire, the cruelty of the tiger, the sweet flavor of honey, the chatter of the jay and the cooing of the turtle dove. He melted all these together, and formed woman."

"Bon Voyage" to Willadean Rathert, Bldg. 4-2, who is vacationing in New Orleans, Florida, and Cuba.

Ten Days To March 3 — Get The Badge Wearing Habit

»» NEWS THROUGH THE PLANTS ««

Is Zat So?

Wasn't that sample of spring weather just grand while it lasted? The gang in Bldg. 17-1 decided that they had better take advantage of the break in the weather to do some odd jobs around their homes that they have been putting off for so long. . . . Henry Papenbrock consented to postponing his week-end stag party until a later date. Why not wait until the fishing season, "Pat?" . . . The season of the year is almost here for baseball, so it probably won't be long until Otto Brunner can be found sticking up for his favorite team. How do you think the Cubs will do this year, Otto? . . . Johnny Junk wishes to announce that the new addition to their family has been christened Margaret Louise. . . . Harry McKee and "Mel" Kessens are the very best of friends and would do anything for each other. Just to prove his feelings, Harry even gives "Mel" a shower bath—whether he needs it or not! . . . Warning to any person accepting a ride in Russell Gibson's car: Don't sit in the back seat. We hear that occasionally the bottom drops out of the back of the car. Russell may be good at the set up of Gridley's but admits that when it comes to automobile mechanics, he isn't so hot!! . . . It's another boy at the Henry Gollmer's. Larry Paul weighed 8 lbs. and is Papa Gollmer ever proud. He says he is going to show Eddie Cantor up. . . . Is Ed Kronmiller going high-brow on us? Why else would he raise a mustache and smoke his cigarettes in a fancy holder? Maybe he is going to try out for a movie contract, if he can decide whether he wants to be a great lover like John Barrymore or a villian that would put Simon Legree to shame. . . . Paul Geiger is getting ready to move out on the farm again for the summer. According to Paul, there is no place like a farm—in the summer. In the winter he prefers the city every time. . . . Although we enjoyed the sample of spring, we were glad that winter came back for a command performance. It puts the thoughts of housecleaning out of our wives' minds for a little while longer. We might as well enjoy this snow storm because before you know it, we'll be hurrying home to beat the rug. . . . I sure like winter, don't you?

THE QUESTION MARK!

Now Bldg. 19-3 has a candidate for the Ananias Club in the person of Walter Cornelius. Walter said, "The fish were biting so fast on Loon Lake Sunday, we couldn't put bait on the hook and the ones we caught that were lying on the ice were biting the poles." Some fish story, we would say, but we are sure Walter can qualify in the Liars' Club of fishermen and maybe that's what he wanted to do.

Complete Apprentice School Courses

Hubert Nichter

John Jennings

Maurice Oyer

Three young men have completed the courses of the General Electric Apprentice School of the Fort Wayne Works. They are John Jennings, a graduate of South Side High School who completed the draftsman course; Hubert Nichter, also a graduate of South Side who completed the machinist-toolmaker course and Maurice Oyer, a graduate of Elmhurst High School who completed the draftsman course.

Sunbeams From 17-4

Betty Keener was so thrilled with her new diamond that she wanted a notice put on the bulletin board, but said that she would settle for a few lines in the paper.

Louie Groves is selling some mighty fine rabbits these days, but the buyers are a bit skeptical about them really being rabbits.

If Blanche Hullinger's nose seems a bit red, it's because she has found a new way to test stators. She says it is a good way, only a little hard on the nose.

Bob Bennett has oiled up the old whistler and is practicing on all of the old Army songs—he's doing all right too.

Doris Tobias says that she hopes by the time she celebrates her Golden wedding anniversary she will have forgotten how embarrassed she was when filling out her marriage license. She couldn't even remember how old she was.

Why does George Guenther, Bldg. 19-3, blush so red when he has trouble unlocking his new Buick on the parking lot? Why don't you paint the keys a different color George, and then you won't have any trouble with the lock? Also you won't have people watching you and you won't feel so conspicuous.

Richard "Lynseed" Craighead, Bldg. 4-3, has been sporting a loud checkered shirt which took the fancy of Archie Boren. Archie wanted to trade his red checkered Alaskan Jockey cap and sling shot for the shirt, but "Lynseed" said "No Dice."

We wonder if Frank Martin, Bldg. 17-1, our patrol sergeant, was looking for a tailor to do a little job of sewing. He was seen walking up and down the streets of Angola recently with his trousers ripped in the seat.

What the gang in Bldg. 17-1 thinks about the new glasses they are wearing:

H. Wichern—"They're O. K. Makes a dime look like a quarter."

H. Kessler—"Fine. Every time I clean a chicken for a Sunday dinner, it looks like a turkey to me."

Walter Prince—"I think mine are swell, they make a bluegill look as big as a bass."

Jack Neuman — "Wouldn't be without mine. By letting them get a trifle dirty, I can go to sleep standing up and no one notices it."

Loyal Decker thinks these new SAFETY glasses the boys are wearing in Bldg. 17-1 are O. K. for the eyes, but not for him as far as his job is concerned. Loyal claims the work is coming in to him so near 100 per cent perfect he feels that his job as inspector isn't SAFE much longer.

When asked what he thought of the weather we're having these days, Jack Neuman, Bldg. 17-1, said that it was O. K. as long as it stays above freezing. Otherwise his teeth start to chatter from the cold. Whose teeth do you mean, Jack?

Eleanor Enderle, Bldg. 4-3, and Bob McKee were united in marriage last Saturday. Now we know that Eleanor will not have to travel alone again.

Anyone wishing to recondition old furniture see Ross Vaughn, Bldg. 26-5.

Winter Street News

Congratulations to Bob Ringle who was married last Friday and thanks for the candy.

Cupid's really hitting the "Bull's-eye" and "sparklers" are flying and being worn. Recipients of such are Mary Ellen Larimore and Virginia Baumgartner, both from the Shipping Department office. (Mary, are you slipping? You're the only one left.)

While watching the Maintenance men at work moving the time clock to its new location, Vic Cartwright was overheard to say: "Why don't they move it out on the parking lot? Maybe then I could punch in on time in the mornings."

Now that "Marty" Schwanz is home playing nurse-maid her theme song has changed to "There'll be some changes made" and boy, she's making them.

Johnnie Rockhill has a strange dislike for horses after being thrown from a horse on a recent "fishing trip."

Rita Wagner's famous Banana Cream pie calls for no bananas (at least that's the way she makes it.)

Whatta week end! Two of Bldg. 12-3 Mica section's most expert feminine drivers were reported to have been badly shaken-up as the result of a too close acquaintanceship with a ditch and a telephone pole, respectively. Tch-tch, girls, this'll make nice reading for those confirmed hecklers of us poor women drivers. Cheer up, though, we'll keep your identity secret, Evelyn and Mabel.

19-3 Valentines

Once upon a time, a man named Amatole France wrote, in one of his books, an account of a near-sighted old Frenchman who was cast ashore on a penguin island. He saw the big birds walking in the distance and thought they were men. When it came to placing the blame for comic valentines received in Bldg. 19-3, the error was almost as great—it seems the innocent penguins stand accused of being the guilty men, while the miscreants chuckle with glee and rejoice that their clean shirts made them look like penquins.

Bob Archbald received three identical valentines, casting reflections upon his place of residence. Ah me! How things do get around.

Pappy Archbald received an insult accusing him of tossing around the male bovine. We feel sure Pappy does not do this—MUCH!

All day long, as I sat at my desk, various people passed with assorted remarks such as "Thanks Pal", "Thanks for the valentine", "I know the snake in the grass", etc.—which all causes me to wonder why I did not buy and send out valentines. I, too, seem to be a penguin, or is it a man—aw shux!

Ozzie Lacert's most cherished valentine was one titled "Air Minded"—been off on another flight, Ozzie?

Talk about bad luck. Maybe it was walking under a ladder or maybe it was a black cat, at any rate we will have to ask Harold Such. On last Friday Harold lost his valentines, was an hour late, broke his glasses, and lost a sale for a radio.

Those who saw Garland Roby, Bldg. 19-4, foaming at the mouth the first of the week please don't get excited. It was a case of mistaken identity. He really did think he had the salt instead of the anti-sneeze Rinso when he was popping the corn.

There must be something about Bing Engelbrecht, Bldg. 16-3, that makes the gals go for him. Now they are bringing him cake to eat during work (and home-baked cake too).

Co-workers suggest that Ray Sink, Bldg. 12-B, get some use of that new fleece-lined hunting suit by wearing it to work these chilly days so that the fresh-air addicts in the wood section can get their daily quota and at the same time not impair that fine tenor voice of Ray's.

Notice: Theodore Schlup, of Bldg. 19-3, does and will pay the highest price for used lamp bulbs for the year of 1941. Mr. Schlup held this honor several years ago, as several people of Bldg. 19-3 can testify.

WHO ME?... OH.. AH.. ER... WE MIGHT HAVE VISITORS!
HEY! WOT IN..
HAVE A HEART PAL..

Ten Days To March 3 — Get The Badge Wearing Habit

News Around

(Continued from Page 5)

News On The Nose From 4-5

Greetings from Bldg. 4-5, all you lucky people—we're here to give that rat Elmer a run for his money. We caught him boring a hole in the wall so he could watch the pretty girls at work in the Bldg. 4-5 winding section. Tsk-tsk—what's the matter with Bldg. 4-4 glamour, Elmer? . . . But it's just the place for our most eligible bachelor, Carl Beyerlein. Dale Steward is very anxious to find a wife for Carl so that the production department won't lose a good man to Uncle Sam. . . . "Love's Old Sweet Song" threw Jim McGill at Mary Ellen Gingher's feet the other day. But shucks, 'twarn't no romance connected with it. He was just singing and leaning backward in one of the fancy office chairs, a relic of the "Inquisition," when this particular torture piece took him for a nonstop flight over the back of his chair. P. S. He stopped singing. . . . Mamie Allen has an original slant on the age old custom of eating. She has a new set of dishes ranging from the pastel colors to brown, the color of the song of the famous little jug. She sets the table, then with dishes to suit her prevalent mood. Her husband is still wondering how the brown ones "put her in a subjunctive mood." So are we.

Mike Sorgen, the dispatcher in Bldg. 19-3, passed the cigars this week in honor of a baby boy. Congratulations, Mike!

Talk about your absent minded professor. Comes now the tale of one who out-absent-minds the most absent minded. This individual, frequently seen in Bldg. 19-3 office, and who answers to the title of "Pappy", was observed on Saturday morning wandering around the dime store and mumbling in his beard. Suddenly he stopped before a display mirror and began to adjust his tie and scarf, then removed his hat and combed his hair. Was that dreamy smile erased and replaced by a look of surprise when a voice sweetly said, "Something for you?" You guess.

A Four Rose party was held at the home of Thelma Oswald, Bldg. 17-2. Wimpy sandwiches were a high light of the evening. Those there were Inez Giesler, Gladys Freeman, Louise Metker, Velma Meads, Bertha Gruber, Golda Mentzer, Stephany Hilker, Olga Dribelbiss, Virginia Boorman, Iris Steele, Clara Gidley, Florence Case, Loretta Bloom, Amy Whitley, Estella Morrolf, Dorothy Westling, Helen Stahl, Dorothy Swank and Virginia Mollet.

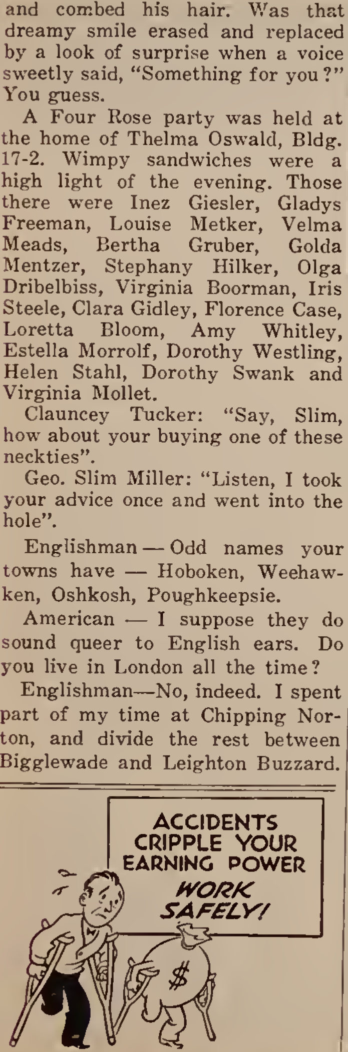
Clauncey Tucker: "Say, Slim, how about your buying one of these neckties".

Geo. Slim Miller: "Listen, I took your advice once and went into the hole".

Englishman — Odd names your towns have — Hoboken, Weehawken, Oshkosh, Poughkeepsie.

American — I suppose they do sound queer to English ears. Do you live in London all the time?

Englishman—No, indeed. I spent part of my time at Chipping Norton, and divide the rest between Bigglewade and Leighton Buzzard.



Shorts From 6-B

Upon an inspection of the genealogy of Ed Arthur's lineage, it was discovered that he is the original "Baldy Beeler" himself, and this is a warning that anyone getting into an altercation with him should have at least one hand on his gun.

Bill Walt, the other night, in a fierce battle with his gastronomic proclivities, lost the encounter by a nose, and as a result, spent the next morning at home with his bi-carbonate of soda and castor oil.

John Blakely, who feeds one-half the sparrows of North America in his back yard every morning with soft bread and warm pancakes, has been invited by the county officials to try to woo the army of starlings that nightly fresco the walls of our county building, into his yard and then ignite a barrel of T.N.T., and thereby win their everlasting gratitude.

One more on our friend Bill Walt. The other morning when they were passing out free samples of Beech Nut chewing tobacco at the gates, Bill wore out about four dollars worth of shoe leather walking around the block. He made every entrance in to the Works at least twice, and accumulated about twelve sample packages. Inasmuch as Bill takes a "chew" about the size of a bale of hay, the average mathematician can readily see that he had barely enough to last him till noon.

Sam Heer has a callous on the index finger of his right hand as thick as a rhinoceros' hide. I wonder if it could be from handling steel.

It is rumored that there is a small hand book out entitled, "Checkers as played by Russell Isaacs." This book is authored by Russell, edited by Russell, and published by Russell, and should be in every ambitious checker player's pocket.

After scanning the names of the winners in the finals of the "Golden Gloves" tournament, we can expect most any morning to see our friend Leo Heersche come in decked out in a new athletic jacket.

Maybe we shouldn't tell this one but we got mighty hungry waiting. Knight Houser, Bldg. 20-2, will ask his date to eat a sandwich before he takes her to dinner again. At least he should if he is chairman for another draftsman's dinner, and has twenty-five hungry people waiting a half-hour for him to get there. But he is forgiven because the steaks were delicious and besides it would take Superman to pack eight people into one car in record time. At least that's what we say. . . . After a little Winchell snooping on our part, we find that Goldie Branning favors a young stalwart in Bldg. 26-3 who will make her Mrs. on March 1st. Clifford Thompson is the man for whom the bells will chime. . . . That's all for this week, ladies and gentlemen, and Elmer, the Field Mouse. No hard feelings Elmer, but we remember our days together on the college scandal sheet, and you haven't changed a bit. It's the same old jokes and stories using different names. But we luvs ya, Elmer, and we wouldn't have you stop.

Hilda Walda, Bldg. 4-5, still seems to have birthdays. The following girls in her department had a dinner on her last Thursday noon: Opal Bates, Frona Witche, Harriet Gaunt, Ethel Koehlinger and Maggie Slagle.

The Safety Award for January was won by Winding Section, Bldg. 4-4. In turn this money was given to Catherine Reehling, who is convalescing in the St. Joseph's Hospital with a broken leg received in an automobile accident. Here's hoping for a speedy recovery, Catherine.

Bldg. 4-4

Paul, the wire boy, always tries to get to work about twenty minutes after seven so that he can ring in after the whistle blows.

Darrel Daniels seems to be quite lonesome this week. I wonder if it is becaus Bea is working nights?

Al Steinhauser can't seem to make up his mind what girl he would like. One day he gives one cookies, and the next day another candy. Could it be that he will go with anyone who will have him?

Anyone passing Catherine Roehling's room at the hospital last Friday night would think there was a party going on with all the presents she received and all the noise.

It is nice that some people are rich and can afford dollar passes. But they don't have to remind other people of it. What say, Vic Romanick?

The next time Edith Fuller stops to pick flowers in the park she had better have her red flannels on.

Phyllis High seemed kinda sick after the Ossian and Warren game. I wonder if it was only because Ossian lost.

Guy Coons must be thinking of going with a circus this summer for we saw him practicing a new trick that's done on icy steps. You should learn to do it without breaking up your dinner pail, Guy.

Congratulations to Mr. and Mrs. Robert Scherer who have a new baby girl, born February 10th.

From one of our good housekeeping girls on K placing who knows her poetry:

Of grouchy people and grumpy faces,
The banner at present goes to K placers,
Of all the new "stuff", so abundant with youth,
We find they bring with them manners uncouth.
The reason for all of this ill-bred contention,
We feel is something we just have to mention,
Of good housekeeping rules in this group we are proud,
And you'll have to conform if you stay with our crowd;
So please keep your wedges, your tubes and your leads,
Your linen, spaghetti, and applecore seeds,
All in the place for which they were meant,
And we'll be a people happy and content.

Ethel Evans was seen putting two sample packages of chewing tobacco in her purse. Gee, we didn't know she had taken up chewing.

Wonder where George Langenberg, Bldg. 17-2 office, found the red suspenders? Perhaps they're a Christmas present he was afraid to wear earlier. Anyhow, they do their duty, don't they, George?

Super Man, Floyd Mutton, Bldg. 19-3, threw the electric hoist away and now uses a chain hoist instead and sometimes just picks up the large shafts with his hands and places them in the lathe. Hence, the name Super Man.

Notice: Anyone in Bldg. 19-3 or thereabouts who received a comic valentine should get in touch with Elmer Wagner. He was observed leaving a local ten cent store with an arm load of insults.

Lawrence, coming in to work at 6 o'clock isn't so bad if you get in at a civilized hour the night before.

Edna Martin, Bldg. 12-B sure is bashful. She has one of the boys in Bldg. 12-B get samples of chewing tobacco at the gate and then send them in to her.

Recently heard from K. W. McOmber, Bldg. 18-1,—there's no Santa Claus and you can't believe in the ground hog any more. What is there left for me?

Borings From 4-4 Office

'Tis just another week—the one week above all other weeks—the week between the birthday of Abraham Lincoln and the father of our country, George Washington. I, like George Washington and the "Honest Abe," never told a lie, or should I say prevaricate. If you don't believe me just follow my column.

Doris (Mrs. L. Hampton) Roe has moved into her new home and she and Lloyd are now playing mamma and papa. Now for the house warming.

Virginia Sanders has been promoted to the office "elite" by receiving a new all metal desk. Nice work if you can get it.

John "Quinzy" Burnett is back to work after a very serious sore throat. We missed his daily blush.

Virginia Plummer has been seen looking over a generator to her telautograph in a private room with Ife Holmes. Purely educational, I'll let you know.

Betty "Boops" Mougin and Virginia Plummer are that way when a certain young man enters our office.

Pauline "Bumps" Young recently treated the office to a bag of pretzels. After stuffing all afternoon on the dry salty things, I was as parched (dry to you) as last year's Christmas tree. I went out to the drinking fountain and there was a sign above it which read, "Don't drink from this, or you'll get what I got—water."

Vern Daseler has been seen sucking the straws coming from a zombie chocolate milk. Just another thing I couldn't imagine 'till now.

A premature April Fool joke on the girls was played by Cliff Uncapher by bringing in a box of candy on Valentine Day and then taking it home to his wife.

"First night and passing judgments" (apologies to Esquire). Jean Bugert has been worrying about such.

Mary Hakes is getting used to army life by sleeping on an army cot. Now if a person is tired (I says) they could sleep on a dime and have three cents left. Well, we'll come to a close for another week, bringing us closer to the birthday of our first President. Let us all give a careful thought to the things he fought for by making our country a safe place for democracy: First in peace, first in war and first in the hearts of his countrymen. Sincerely as ever,

ELMER, the field mouse.
The Rat to you.

Martha Ruhl, Bldg. 4-3, really needs her little steam engine these days, 'cause she just puffs, and puffs, and puffs.

Frank Kopp had a good time trying to collect up old Works News to sell them for 5c each because they had his picture on the last page.

The girls in Bldg. 17-2 office recently entertained at a noon luncheon for Luella Franke at the Aulton House. Luella was the recipient of a lovely birthday gift. Present besides the honor guest were Dorothy Rinehart, Emma Sherbondy, Mildred Spuhler, Audrey Hickernell and Merle Kirkpatrick.

"Ma Says It Tastes of Coal Oil!"

MA IS probably right. The clerk who had to fit shoes and horse collars, measure out nails and putty, and draw kerosene couldn't always stop to wash his hands before he handled the butter and crackers. And every so often the potato on the spout of the oil can would joggle off.

Today, for most of us, the mixture of food and kerosene odor has ceased to be a problem. More and more of our food, packed by electric machines, comes to us in sanitary containers. Electricity does the work, too, of washboard and carpet beater. Automobiles and good roads have shortened distances to town and work. And because so many of the routine, unpleasant jobs which occupied our parents' time are now only memories, we have more opportunities for enjoying life.

Practically every industry in America has helped to bring about this progress. And every industry, in doing so, has made use of the economies and manufacturing improvements that electricity brings. General Electric scientists, engineers, and workmen have been, for more than 60 years, finding ways for electricity to help raise American living standards—to create More Goods for More People at Less Cost. Today their efforts are helping further to build and strengthen the American way of life.

G-E research and engineering have saved the public from ten to one hundred dollars for every dollar they have earned for General Electric

GENERAL ELECTRIC
952-117D

Ten Days To March 3 — Get The Badge Wearing Habit

Seven Become Members Of General Electric Quarter Century Club

Seven employees who started their careers with the Fort Wayne Works of General Electric twenty-five years ago this month have become members of the Company's honor organization, the Quarter Century Club. The new members are, top row, left to right—Edmund J. Bauer, Bldg. 20-1; Magnus E. Irmscher, Bldg. 27; and J. C. Miles, Bldg. 12-3; second row, left to right—Clarence J. LaGras, Bldg. 4-5; Harold Seidner, Bldg. 4-3; Jesse A. Greider, Bldg. 10-1 and James Johnson, Bldg. 6-B.

What You Should Know About Influenza — By Dr. H. W. Garton

Epidemics of influenza are being reported from several sections of the United States. Starting in California, it has now spread to several of the Southern states and to some of the New England states. If it follows its usual course, it will no doubt visit all states, in some degree at least. Reports to date seem to indicate that the disease is not as severe, and pneumonia is not as frequent, as during the epidemic of 1917 and 1918.

Unfortunately, we have no sure preventive measure against influenza. Only this month a new vaccine was reported for one type of influenza, but it is still in the experimental stage of development.

There are certain things, however, that everyone should know and practice when a "flu" epidemic threatens or is already present. The remainder of this article is quoted in full from a bulletin just issued by the U. S. Public Health Service.

"Influenza, one of the most widespread and destructive diseases of man, still remains unconquered, although a number of the great epidemic diseases have fallen before the determined technicians of medical science. Numerous factors are responsible for this lack of progress in the prevention and control of influenza. For example, the exact cause has not been determined for all types of influenza. The short period of development without recognizable symptoms permits the affected individual to continue his normal routine, thereby spreading the disease to many others before he is sick enough to go to bed. Isolation of such large groups is not practical. Finally, since immunity following infection is of short duration, one year or less, a significant proportion of the population is continuously susceptible to the disease.

What Causes Influenza?

The cause of influenza is at present believed to be filterable viruses of different strains, one of which has been isolated. Viruses are active agents too small to be seen with any microscope. Various other types of bacteria may cause complications in the disease.

How Is The Disease Spread?

The virus is present in the discharges from the mouth and nose. Coughing and sneezing spray the infecting agent into the air. These small droplets of moisture may be inhaled by persons nearby. Articles freshly soiled with discharges from the nose and throat of sick persons may transfer the virus. There is no evidence that the virus is ever carried in drinking water or milk. MAN is the carrier of influenza.

Symptoms of Influenza.

Symptoms of influenza are observed within 24 to 72 hours following invasion of the body with the virus. Typically, it is more severe an infection than the common cold. Fever and general muscular pains in the back, head, and limbs develop and usually last about a week. "Flu" leaves the patient exhausted out of all proportion to the length of time he is ill.

The most serious and important complication following influenza is pneumonia, which may be severe and sometimes fatal. Other serious complications are infection of the ear, or sinuses, and bronchitis.

Laboratory procedures have no practical value in determining the diagnosis of influenza with certainty. In its initial stages, influenza is frequently indistinguishable from the common cold.

Precautions to Observe.

It is believed that there is more danger of spreading the disease from persons in the early stages of "flu" than from those ill enough to be in bed or those who are recovering. In any case, unnecessary contacts should be avoided. Since few, if any, can hope to escape contact, it is not rational to become panicky or to attempt to avoid infections in too elaborate ways. Experience in previous epidemics has taught some valuable lessons. The closing of public, parochial, and private schools has not been effective in checking the spread of influenza. Relatively simple hygienic practices and rules of life are the most helpful. The persons who try to keep on their feet and "stick it out" are those who contribute the greatest numbers to the death rolls. In their weakened condition, secondary invading germs gain a foothold and permit the development of serious complications.

In protecting himself from influenza, an individual can generally do as much as anyone else can do for him, if not more.

What You Should Do

Before Infection.

1. During an epidemic, avoid needless contact with others, especially people who are coughing, sneezing, or sniffling.
2. Avoid exposure to inclement weather, but take advantage of as much open air and sunshine as you can.
3. Be sure that your home is well ventilated at all times but avoid drafts.
4. Eat a well-balanced diet; drink plenty of water.
5. Guard against fatigue; get plenty of rest and sleep.
6. Wear clothing suitable to the weather.

What To Do After Exposure.

1. At the first sign of a cold and especially if you have fever go to bed and stay there until your doctor says it is safe to get up. By so doing, you may prevent serious complications and check the spread of the disease to others.
2. Cover all coughs or sneezes with a handkerchief, preferably paper tissues which should be promptly burned.
3. Do not encourage visitors.

The New Flu Vaccine

A vaccine has been developed from one of the strains of influenza virus. However, the use of this vaccine is still in the experimental stage. It is too soon to make any statements concerning the efficiency of this discovery.

DO NOT INDULGE IN SELF-DIAGNOSIS OR SELF-TREATMENT. CONSULT YOUR DOCTOR.

H. W. Garton, M.D.

Employees Store Features Display Of I.E.S. Lamps

A display of I.E.S. lamps including floor, bridge and table models is being featured at the Employees Store. All of the lamps are of a new styling and are sold complete with bulbs.

Two new irons have been added to the line offered at the store. They are the Clipper, weighing five pounds and the Automatic, weighing six pounds. The irons have the temperature control for easy and positive selection of correct ironing temperature for rayon, silk, cotton, wool and linen.

Ten Days To March 3 — Get The Badge Wearing Habit

Cage Fans Offered Outstanding Bill

Three Exceptional Teams Matched Against Locals Next Wednesday Evening

A real basketball bargain bill has been scheduled for the G-E Club gym, Wednesday, February 26th, with Main Office taking on Greiner's Garage at 7 o'clock, Zollner Pistons meeting International Harvester one hour later and the G-E Industrials tangling with the Miami, Ohio, Redmen in the nightcap. There will as usual be no charge for these games and anyone may attend whether a G-E Club member or not.

The Zollner-Harvester clash promises to be a real battle as the winner will be given the honor of representing Fort Wayne in the professional tournament to be held at Chicago in March. The Piston roster is comprised of the younger basketball stars of the city such as Hilgeman, Gatton, Hamilton, Beery and Keller, while the Harvester will rely on the old standbys, Irons, Lang, Bobilya and Highes. Both clubs have enjoyed a very successful season and need to acquire only this additional glory to make it complete.

Not much is known about the Miami Redmen but their record so far this season of 27 wins and 6 losses seems to indicate that the G-E will have plenty of trouble on their hands. Although continuing to display steady improvement the Industrials dropped a close game to Zollners Wednesday, 26-20, but they expect to snap their losing streak and break into the win column at the expense of the Redmen. Coach Edgar will probably start Weigand, Marquette, Voirol, Hanley, and Vonderhaar.

Greiner's Garage just recently finished runners-up in the AAU Tournament held at Kokomo and will give Main Office, one of the Inter-department co-leaders a real workout. Both teams are made up of young players and the game should be very fast and exciting.

Elex Bowlers Go To All American

Five female keglers "the cream of this year's crop" will represent the G-E Club in the All American Bowling Tournament to be held at Chicago, Saturday and Sunday, February 22 and 23.

Gladys McMillan, Edna Etzler, Virginia Bowman, Virginia Mollet and Helen Tieman have been picked as representatives while Olga Dreibel will team up with the extra girl in the doubles. All of these girls have had considerable tournament experience with the exception of Olga Dreibel and Virginia Mollet who are participating for the first time.

These girls have been consistently turning in high scores in the various Elex Leagues during the entire season and consequently stand a good chance of ending up in the money.

A motorist had crashed into a telegraph pole. Wire, pole and everything came down around his ears. They found him unconscious in the wreckage, but as they were untangling him he reached out feebly, fingered the wires, and murmured:

"Thank heaven, I lived clean; they have given me a harp."

Volleyball League Drops Into Tie

With Small Motor Standards dropping Winter Street, first half champions, two out of three games and Small Motor Production sweeping their series with Small Motor Drafting the last half of the G-E Club Inter-department Volleyball League was thrown into a deadlock between Winter Street and Production, each having 14 victories and 4 defeats.

Winter Street, having a chance to cinch the second half title in this match, started out as if to turn the trick as they won the first encounter 15-11 but Small Motor Standards rallied to cop the next two 5-15; 10-15 and leave the championship still an issue.

Small Motor Production ran into trouble especially in the last two games but finally won all three 15-6; 15-11; 15-13.

In the other two matches Main Office defeated Apparatus 15-4; 15-6; 15-4; while Small Motor Factory trounced the Apprentice 15-5; 15-6; 15-9.

Standings

	Won	Lost
Winter Street	14	4
Small Motor Production	14	4
Small Motor Standards	13	5
Main Office	10	8
Small Motor Factory	8	10
Apparatus	6	12
Apprentice	4	14
Small Motor Drafting	3	15

Metropolitan Opera Via FM Broadcasts

Opera fans of the Schenectady-Troy-Albany area will be able during the current season to hear the broadcasts from the Metropolitan Opera House with far greater fidelity and tone value than ever before, thanks to General Electric's new frequency-modulation station, W2XOY, which began the broadcasts on Saturday, December 7, with the opening opera program. Since the opera broadcasts are an NBC Blue Network feature, and are not carried by WGY, the G-E long-wave station which serves the area, the new FM station becomes the only outlet. Opening program was "Marriage of Figaro". The broadcasts will be heard at 2 o'clock every Saturday. The station, located in the Helderbergs about 12 miles from Schenectady, will provide excellent signal strength within a radius of about 50 miles, which makes up the service area, and may be heard at even greater distances. Opera offers a type of program particularly suited to FM transmission.

IN THE ROUGH

By WALTER SUNIER

And there was born unto a golfer a son and seeing that the son was good, the name of Michael was bestowed upon him. It came to pass that the father, seeing the sturdiness of his offspring, did greatly rejoice and shouted, "Hosanna, a caddy!" And far and wide the papers carried the story of the great and crowning event of the Schwanz household.

A. L. Johnson, Bldg. 4-6, has a new set of clubs and expects to trip along the fairways this summer.

If we could get H. E. Stephens, Bldg. 4-2, to trip the fairways, that would be something.

Some of the boys are getting itchy feet and are very anxious to slug the tantalizing sphere as several have already spoken about getting out. It won't be long until there will be a chance to wade in the mud. You had better be counting on getting out soon so that you will be tuned up by the time the real good weather is here. You have planned on doing this other years. Make a definite resolution to really do it this year.

The dope now is that the big shots in the professional golf group are using strong, heavy club shafts and are steering away from the light, whippy kind. However, many of the leading pros who swing these clubs are big powerful brutes. Perhaps the lightweights should not use what the powerful guys use. Bruce Hamilton is one of the big boys who could wield a heavy shaft. By the way, Bruce has a new home on the Bluffton Road close to Brookwood. Looks like Brookwood is in for a beating this year.

Deadlock Holds In Basket League

Small Motor Factory by clipping Apprentice A 45 to 30 and Main Office by trouncing the Squares 44 to 23 continued to remain deadlocked for the second half leadership of the G-E Inter-department Basketball League each having a perfect record of three wins.

The Factory-Apprentice A score seems to indicate that Small Motor had a rather easy time but this was not the case. Only five points separated the two clubs at the termination of the second and third quarters but the Factory hit a hot streak during the final stanza to run up their big margin. Clawson and Vonderhaar, Small Motor forwards, by tallying 14 points between them, kept their team in the thick of the fight during the first two stanzas and continued their scoring outburst during the last half to finish with 14 and 15 points respectively although "Jap" Voirol also came through during the last part of the contest contributing 9 Factory markers.

Although the Squares were willing they were just not quite able to cope with Main Office's abundant speed, youth and natural ability. Continuing to rely on a fast break type of offense Main Office started manufacturing points early in the game and with every member contributing markers soon massed quite a total. Scherer with 12 points, Kent with 10 and Kreig with 7 did most of the Main Office damage although Schneiders and O'Brien set up several buckets for their mates with accurate passes.

In the other game on last week's card West Side remained right on the heels of the league's co-leaders chalking up their second win at the expense of Apprentice B 46 to 27. West Side, with Offerle getting three buckets in four shots, took an early lead and were never headed. Out of the eleven West Side men who saw action nine of them came through with points with Offerle's 11 along with Barker's and Motter's 8 leading the attack. Rolfing, Apprentice's big center, had a field day caging 13 points.

West Side Champs In Basket League

Jumping into an early lead and maintaining their margin throughout the entire contest, West Side annexed the first half title of the G-E Interdepartment Basketball League by downing last year's champions, Apprentice A, 40 to 33, Friday at the Club gym.

The game was exceedingly rough with numerous fouls being called on both clubs. West Side canned a majority of theirs but the Apprentice refused to take advantage of the Westerners' generosity, missing 13 charity tosses.

Horstmeyer, giant Westerner center, started scoring festivities with a foul and they run up seven points before Pequignot of the A's hit a field goal. West Side continued to play good ball during the entire first half and enjoyed an intermission lead of 19-11 but the Apprentice staged a counter attack during the third stanza to come within five points but the Westerners, playing a cool, cautious possession game, managed to nurse their lead to the contests conclusion.

Starkel with 10 points led West Side's attack while Pequignot's 8 made him high for the Apprentice.

Rod and Gun Club Given Recognition

Official acceptance of the Rod and Gun Club to receive government arms and ammunition has been received by E. J. Pion, secretary of the organization. Final approval has also been received from Lieut. Col. G. G. Parks, director of civilian marksmanship. Range Officer Arnold F. Bowers, together with Mr. Pion is planning the early requisition of supplies from the War Department.

With new impetus given club activities an official emblem is being adopted. Design for the emblem was made by Haven Miller.

Completing its fourteenth match the rifle team has made a record for indoor season activities. The match shoot with the Warsaw Rifle Club at Warsaw brought a victory for the locals with a score of 899. Members taking part in the Warsaw match were H. Murphy, J. Lewis, E. Pion, G. Raymond, C. Morrolf, A. F. Bowers, C. Miller, H. Hyndman and C. Moser. The match with the International Harvester was lost by a small margin of 4 points with E. Pion turning in a score of 185.

Plans are under way for the outdoor season which will be opened as soon as possible. Organized pistol competition will be a feature, the club having entered the Allen County Pistol League. Forming of a league will be under the direction of Carl Morrolf, Bldg. 4-5, and all employees interested are asked to contact him.

Fisher's Band Plays For Club Dances

"Freddie Fisher and his Schnickelfritz Band," more than living up to advance expectations, put on their entertaining program before capacity crowds at the G-E Club.

The "Schnickelfritzers" will play for dancing tonight and tomorrow night from 9 to 12 o'clock and will present three more stage shows Sunday at 1, 3 and 5 o'clock.

$1,054 Is Paid In Suggestion Awards

Defense . . . Toil And Sweat

Last week, General Electric's position as a front line defense industry was outlined. As such, the Company has taken its position with the other leaders of the American industrial system to insure the safety of the nation. It was pointed out that the job ahead is not an easy one. It will not be finished save through toil and sweat. It will require greater than ordinary demonstrations of the ability to give and take.

Practically all defense orders placed with General Electric require fine engineering and skilled workmanship. Some of this work is new to the Company and presents new problems for both engineers and workmen.

The Company has taken these orders because the Army and Navy believe it is best fitted to carry them out. It does not hope nor expect to make great profits out of their production. The margins of profits on defense orders are so narrow that the Company will be fortunate indeed if it breaks even. Profits . . . such as they will be, must come largely from the normal business of the Company. They will depend, of course, upon how successful the Company is in maintaining that business along with the huge volume of defense orders at the same time.

The problems of the future are many. These will include higher taxes for everyone, Company and employee alike. There will be fewer of the benefits of peaceful living. For a period of several years, we all face an increasing number of unusual and difficult situations . . . created by the efforts of a nation re-arming itself.

After it is over and adequate defense has been provided, the unfilled requirements of civilian living, now being piled up ought to make a mighty backlog to aid in restoring the tide of domestic production. Obviously the success of the second program depends upon the success of the first.

In any case, there's toil and sweat ahead.

Knudsen Checks General Electric

In a whirlwind tour of General Electric's big works at Schenectady, William S. Knudsen, director of the Office of Production Management for National Defense saw for himself what the Company is doing toward national defense. In the picture are members of General Electric's defense co-ordinating committee: Left to right are John G. Farrar, H. A. Winne, Mr. Knudsen, C. H. Lang (chairman) and J. F. Cunningham.

Hundred Thirty-Two New Ideas Adopted

Jack Teeple, Decatur Works, Leads Latest Suggestion List Covering Four-Week Period With Award Of $115.00. Don Poland Is Second With Award of $90.00

One hundred and thirty-two suggestions pointing out new ways of doing things netted Fort Wayne Works employees a total of $1,054 during a period of four weeks, it is revealed by the latest suggestion list. Leader on the list is Jack S. Teeple, Decatur Works, who received an award of $115.00 for his suggestion for changes to rotor shaft truing operations.

A close second is Donald B. Poland, Bldg. 26-2, who received an award of $90.00 in connection with his suggestion for changes to finishing and assembling operations on coils. Mr. Poland is a consistent suggestor and has received several awards for ideas on improvements to transformer coils.

For submitting the idea of providing adjustable winding heads, G. K. Buchan, Bldg. 19-2, was given an award of $70.00, while awards of $25.00 each were made to Joseph J. Koble, Bldg. 26-1, for his suggestion to improve packing crates for transformers, and to Melvin Beucler, Bldg. 6-1, for his suggestion to provide wagons for transporting bar stock.

Knudsen Impressed With Company Defense Work

Assistance Offered In Filing Federal Returns

An office will be established in Bldg. 21 from 1:15 to 5:30 on the afternoons of March 4, 6, 7, 11, 12, 13 and 14 to assist employees in filing income tax returns. Employees seeking this service are asked to bring their own blanks if they have been supplied. A limited number of blanks are available. The office will not be open on March 15.

World's Largest Fluorescent Lamp Factory Dedicated

When General Electric dedicated the world's largest fluorescent lamp factory at Jackson, Mississippi, last Friday, it was an event of state-wide importance. The governor of the state, Paul P. Johnson, was the principal speaker at a dinner climaxing an all-day celebration in the million-dollar plant where sand goes in one end and comes out the other, transformed into fluorescent lighting tubes.

Attending the dedication were Charles E. Wilson, president of the Company, and Joseph E. Kewley, vice-president in charge of the Lamp Department. Gov. Johnson honored both Mr. Wilson and Mr. Kewley by

• Great Man Of Tomorrow

In 1929, when the late Prof. Elihu Thomson was 77 years old he picked "the great man of tomorrow."

He said then, "The Edison of the future will be the young man of today who works the hardest.

"He won't be the one who feels that he can make money without working for it.

"He will be the one who finds an occupation, puts all he has into it, and resolves that the world will be a better place for his having been in it."

How well did Prof. Thomson live his own life on that theory is borne out by the 700 inventions that bear his name. But his life alone is his legacy to youth . . . an inspiring record of devotion which cannot fail to fire the imagination of young men.

There will be another Thomson and there will be another Edison. Who? Depends only on the future and plenty of hard work.

• The Busy Man's Creed

I believe in the stuff I am handing out, in the firm I am working for, and in my ability to get results. I believe that honest stuff can be passed out to honest men by honest methods. I believe in working, not weeping; in boosting, not knocking; and in the pleasure of my job. I believe that a man gets what he goes after, that one deed done today is worth two deeds tomorrow, and that no man is down and out until he has lost faith in himself. I believe in today and the work I am doing; in tomorrow and the work I hope to do, and in the sure reward which the future holds.

I believe in courtesy, in kindness, in generosity, in good-cheer, in friendship and in honest competition. I believe there is something doing, somewhere for every man ready to do it. I believe I'm ready—RIGHT NOW!—Bloomfield Works News.

• He Took His Own Advice

It is said Benjamin Franklin used both time and money wisely.

His saying, "An investment in knowledge pays the best interest," may help explain why he received degrees from five universities although he left school at the age of ten.

Today the chance to learn is greater than ever before. Ambitious people are taking full advantage of these opportunities to improve their ability and skill.

FIRST AID INSTRUCTION APPLICATION BLANK

Dr. H. W. Garton
Bldg. 21

I am interested in enrolling in a class for instruction in first aid.

I am employed on the .... shift.

Name...Bldg.....................

MARCH 3, 1941

On and after the above date, EVERY EMPLOYEE must have his Identification Badge prominently displayed on his or her person in order to gain admittance to the Works. Our guards have positive instructions to admit no one unless this rule is complied with.

We wish to cause no one any inconvenience and hence we have published this information well in advance of the effective date—the first time being in the WORKS NEWS of January 17th. This has given all of us plenty of opportunity to become accustomed to the requirement.

This regulation is for the protection of our facilities and products, a large proportion of which are now being devoted to National Defense activities. Then, too, it is some assurance of continuity of employment, being an important influence against temporary, or serious disruption of production due to outside influences.

This applies to all departments of the factory and offices.

Always Wear Your Badge On Company Premises so that there can be no question of your right to be present in the plant.

I know all our employees will cooperate with our guards, and the Management in this matter.

WORKS MANAGER

FEB. 21, 1941

FORT WAYNE WORKS—GENERAL ELECTRIC COMPANY

FREE CLUB MOVIES

Another in the series of G-E Club free motion picture programs will be held next Sunday, March 2. The programs will be at 2 and 4 o'clock and the feature film will be "The Masked Phantom". Club membership cards must be presented for admission.

Knudsen Impressed

(Continued from Page 1)

rar and J. F. Cunningham and in the afternoon visited all departments of the works where defense contracts are being carried out.

Where the construction of new buildings has been completed and tools installed, General Electric has made excellent progress, declared Mr. Knudsen: "I was delighted to see that more than 60 per cent of this huge plant is devoted to defense work and I was impressed with the wide range of skill of the employees, engaged in jobs ranging from those of the smallest nature to the building of giant turbines. The workmen seem to know how to do the job."

President Wilson said that the company now has more than $350,000,000 in armament and allied contracts and that 90 percent of this is destined for delivery to the United States army and navy with about 10 per cent scheduled for British delivery.

G-E CLUB DANCE

The regular Saturday evening G-E Club dance will be held tomorrow evening in the Club gymnasium. Music will be by Dannecker's orchestra.

Largest Fluorescent

(Continued from Page 1)

appointing them colonels on his staff. This is a high honor in Mississippi as the governor is allowed only 20 such appointments and only eight men have been so named. In return Mr. Kewley presented the governor with the first lamp made in the works.

The Jackson Lamp Works is unique in that it is the first plant in the country to make lamps by a continuous process all under one roof. More than 600 employees will shortly be engaged in the works, all of them recruited from Jackson and its environs. The plant represents the first big manufacturing operation launched by the Company in the so-called "deep South."

Plant production capacity has been placed at about 6,000,000 lamps a year. The building itself is 800 feet long of brick and steel construction, two stories high.

Suggestion Awards

(Continued from Page 1)

One award of $20.00 was made. This went to E. J. Stroud, Bldg. 20-2, on a suggestion to improve ditto duplicators. William Schible, Bldg. 20-1, was given an award of $18 for his idea to provide chain drives on conveyors, and an award of $17.00 was made to Merle F. Markoetter, Bldg. 26-B, on his suggestion for changes to flattening seams on case operations.

Three awards of $15.00 each were made to Gustave Doepke, Winter Street, who suggested providing testing fixtures for flanges; to Eugene A. Scherer, Bldg. 26-3, who suggested use of coil shield in dismantling operations, and to H. Cochran, Decatur, who suggested ordering shorter shell steel.

Other awards from $5.00 to $10.00 were made to the following employees:

Claude A. Curley, Bldg. 12-B; Wm. Rohe, Bldg 7-1; Roy D. May, Bldg. 7-E; Donald B. Poland, Bldg. 26-3; Louis F. Schwartz, Bldg. 19-1; C. F. Bohde, Bldg. 19-B; Herman Roesener, Bldg. 10-1; Louis D. Hopper, Bldg. 10-1; Anna E. Griebel, Bldg. 4-3; Orval Y. Stanton, Bldg. 4-3.

H. Fink, Bldg. 19-1; Vivian M. Renbarger, Bldg. 17-3; Clifton Hosier, Bldg. 6-B; James McCray, Bldg. 26-1; Karl Soest, Bldg. 27-1; Mary V. Renbarger, Bldg. 4-3; C. A. Reiz, Bldg. 6-3; Joseph S. Ostrowski, Bldg. 27-1; Raymond H. Adams, Bldg. 26-B; Wilbert B. Putt, Bldg. 6-B; Harold J. Bowker, Bldg. 4-3; Clyde Hoke, Bldg. 20-1; Rees D. Bodle, Bldg. 28-2; Rosemary Miller, Bldg. 17-2.

D. C. Winesburg, Bldg. 19-2; Ernest R. Linn, Bldg. 27; Janet C. Rathert, Bldg. 26-2; Milroy W. Ploughe, Bldg. 19-1; M. Whitmer, Bldg. 18-1; Loretta Day, Bldg. 26-3; Howard G. Miller, Bldg. 6-2; Elmer C. Witte, Bldg. 27; John W. Young, Bldg. 17-2; William B. Schenher, Bldg. 4-3; Wm. A. Zuercher, Bldg. 4-3; Clyde Hoke, Bldg. 20-1; Clara C. Heaston, Bldg. 6-B; Avonelle Beihold, Bldg. 6-4; Charles E. Elzey, Bldg. 26-1; Dorothy Hammons, Bldg. 4-3; E. Renbarger, Bldg. 6-B.

Clayton C. Schultz, Bldg. 17-1; Doyle D. Miller, Bldg. 22; Bernard J. Braun, Decatur; Walter Heinrichs, Bldg. 17-1; Cecil Franklin, Decatur; Wilma I. Butler, Bldg. 26-3; Chas. A. Weber, Decatur; R. E. Pinkham, Bldg. 17-1; Ed. J. Kaliker, Bldg. 26-1; Henry M. Beckler, Bldg. 26-3; U. B. Woods, Decatur; Mary N. Kaffenberger, Bldg. 26-3; Clarence Drake, Decatur; Vernon Fairchild, Decatur; Arthur H. Bieberich, Decatur; Edward W. Hesher, Decatur; E. J. Stroud, Bldg. 20-2; C. T. Brunnegraff, Decatur; E. Keith Wolfe, Bldg. 20-2.

Bernard Lauer, Winter Street; Charles A. Henderson, Winter Street; Edward Arthur, Bldg. 4-B; Julius J. Warnement, Winter Street; Donald H. Voorhies, Winter Street; Oma I. August, Bldg. 4-4; Horace L. Franklin, Winter Street; Hazel R. Somers, Winter Street; Wilbur H. Poehler, Bldg. 4-4; James O. Robinson, Bldg. 4-4; Ed. H. Gerdom, Winter Street; William H. Charleston, Winter Street; Pearl C. Cheneweth, Bldg. 4-4.

John F. Wilson, Bldg. 4-4; Wm. H. Ehresman, Winter Street; Terrace Colvin, Winter Street; Wilbert B. Putt, Bldg. 6-B; Eugene E. LaVine, Bldg. 4-4; Carl J. Furge, Bldg. 7-2; Mary C. Bangert, Bldg. 4-4; Douglas A. Blessing, Bldg. 4-4; Clara Lake, Bldg. 4-4; Terrace C. Colvin, Winter Street; Robert J. Arnett, Bldg. 4-4; Margaret C. Lepper, Bldg. 4-4; Layton High. Bldg. 6-B.

Howard R. Mertz, Bldg. 18-5; Harry H. Beltz, Bldg. 9-1-E; Eldon Braden, Bldg. 26-3; John D. Hall, Bldg. 20-1; Paul G. Gompf, Bldg. 20-2; J. Ray Snyder, Bldg. 12-3; Geo. Doll, Bldg. 12-B; F. F. Elliott, Bldg. 10-1; Miriam Shoaf, Decatur; C. Levon Schnepp, Bldg. 12-2; Ed. Hesher, Decatur; F. E. Fisher, Bldg. 9-1; Eugene F. Berg, Bldg. 18-B; M. A. Sorgen, Bldg. 19-3; Eleanor C. Paetz, Bldg. 17-2; Alfred J. Rudasky, Bldg. 8-1.

Chalmer E. Kleinknight, Bldg. 27-1; Paul R. Feaser, Bldg. 22-1; W. K. McIver, Bldg. 4-6; Marvin Van Skyock, Bldg. 19-2; Clarence Drake, Decatur; D. D. Miller, Bldg. 22-1; Richard C. Ehrman, Bldg. 26-2; Gerhardt J. Schinnerer, Bldg. 4-2; Raymond T. Smith, Bldg. 4-2; Anthony W. Crow, Bldg. 17-2; Walter H. Staight, Bldg. 4-2; Viola H. Guisinger, Bldg. 17-2.

SPIRIT OF RESEARCH...

With the world-famed Research Laboratory in Schenectady as a background and the figure of the scientist peering into the microscope, this photograph symbolizes the motivating influence keeping the Company ever in the front rank in the march of electrical progress.

GENERAL ELECTRIC

LET'S ALL "STAND BY" FOR AMERICA

WORKS NEWS CANDID CAMERA CAPTURES

SCHENECTADY WORKS OF THE GENERAL ELECTRIC COMPANY is its largest. Through its gates every day pour thousands of men and women, each with a definite job, each with a definite part in the day's work of a great industrial organization. Obviously it is impossible to depict photographically the complete story of the many things made in this great Works. Hence these few pictures symbolize what goes on with emphasis on the side of research and the mighty part it plays in the success of the corporate enterprise, known to the world as the General Electric Company.

FOR DEFENSE OF INDUSTRY

Not a new development of science in a combination machine gun and giant mortar, as it would appear from the picture, but the upper half of an 80,000-kilowatt turbine shell being built in Schenectady Works, for the Duke Power Company in North Carolina. Instead of destructive projectiles, this mammoth machine will hurl kilowatts of electricity to keep the wheels of industry turning in grinding out the country's defense program.

Coffin Foundation Award To Armin F. Mittermaier

Recipient of a Charles A. Coffin Foundation Award for outstanding achievements, Armin F. Mittermaier is shown above receiving the congratulations of Works Manager M. E. Lord. In the group above, present at the presentation, are, left to right—P. C. Morganthaler, Robert Wylie, C. H. Matson, J. H. Gargett, Mr. Lord, Mr. Mittermaier, W. K. Williams and R. H. Chadwick.

AROUND THE CLOCK WITH G·E

By L. X. Smith

Well, the new refrigerator lines are in and boy, oh boy, what a lot of features there are to tempt the eye and tickle the fancy! According to the experts there are 10 star points to look for, such as 120 ice cubes frozen and stored in the super-freezer, storage for 20 packages of frozen foods, near freezing temperature for quick chilling of bottled and canned beverages, high humidity storage of meat, storage for 11 quarts of milk, a place to keep butter just right for spreading, a great big vegetable storage drawer, stainless steel sliding shelves, space for dry storage of crackers, cereals, etc,

Best news of all is that you can now buy a seven foot box for the price of a deluxe six foot. All the new things, too, go with the new box.

Best drop around to the Employees' Store and see for yourself. After all, there's nothing like your own eye to size up a good thing.

Book "Men And Volts" Is Given Newspaper Review

An interesting review of the book "Men and Volts," which traces the growth of the electrical industry as well as the origin of the General Electric Company, was recently published in the Fort Wayne News-Sentinel. With the thought that the book, which is obtainable at the Employees' Store at a special price to employees, is of interest to all General Electric people the review is being republished herewith:

So often in these days of fast living and world conflict one hears or indulges in fanciful talk about the "good old days" that it becomes easy to slip into a way of wishful thinking that we turn back the clock to the simple life of the Gay Nineties.

A book like "Men and Volts," exceptionally well-written and dealing with the over-night growth of the electrical industry from humble and uncertain beginnings in 1876 to its present all-dominating position in world affairs, causes one to reflect that perhaps retrogressing to the Nineties would not prove to be the cure-all we sometimes allow ourselves to think, for we could no longer agree that the "good old days" sans electric lights, radios, washing machines, street cars, mechanical refrigerators, fans and other commonplace electrical conveniences of the present day were so good after all.

Inseparably linked with the progress of the electrical industry is the formation and growth of the General Electric Company through the eventual joining together of the four pioneers of electric lighting—Thomas A. Edison, Elihu Thomson, Charles F. Brush and James J. Wood, not to mention many other great figures in the electrical world.

John Winthrop Hammond spent more than three years in collecting the historical material for the volume. In 1922, when he started the work, many of the pioneers of the electrical industry were still living, and he was able to get the story from their own lips. He died in 1934, but the 300,000 word manuscript which he had prepared was later edited and condensed by Arthur Pound, well-known writer on industrial subjects. It writes the history of the General Electric Company up to January 1, 1940, when Owen D. Young, chairman of the board, and Gerard Swope, president, turned over the reins to Philip D. Reed and Charles E. Wilson, their respective successors and incumbents.

The early part of the book is devoted to the struggles attending the development of incandescent and arc lighting in the late '70's and early '80's. Edison's experiments in finding a filament which could be used in his first incandescent carbon lamps are detailed. In the rotogravure section of tonight's News-Sentinel appears a picture of Edison re-enacting the development of the first carbonized filament.

Wabash is mentioned as the first city to have a complete electric lighting system for its streets. The following account of the procedure is quoted from the Fort Wayne Daily Sentinel:

"Promptly as the courthouse clock struck eight, the thousands of eyes that were turned toward the inky darkness over the court house saw a shower of sparks emitted from a point above them, small, steady spots of light, growing more brilliant until within a few seconds after the first sparks were seen, it was absolutely dazzling. A loud shout went up from the crowd, the band began to play. . . ."

Throughout the book the reader is impressed with the meteor-like growth of the electrical industry, through the invention of generators, transformers, hydro-electric systems, steam turbines, the "Edison Effect" noted in incandescent lamps which led to the development of radio. Fort Wayne's part in the development of electricity as an industry and the General Electric as a company is chronicled, with a number of paragraphs on the old Jenney Electric Light Company plant of the Fort Wayne Electric Company.

J. E. BOUILLET.

COMPLETES COURSE

Paul Witte

Paul Witte is a recent graduate of the General Electric Apprentice School of the Fort Wayne Works. Mr. Witte, who completed a course in steel rule die and wood form making, is a graduate of South Side High School.

SCIENCE FORUM – by L. A. Hawkins

Q. From what materials are Nylon stockings made?

A. The basic materials from which Nylon is made are: coal, air, and water. The final product is many steps removed from the original ingredients, and the processing requires very careful material and chemical control. The resulting fiber-like material is composed of long chains of molecules, and is different in every way from the materials which form it.

Q. Can an electric current be sent along a light beam, as if it were a wire?

A. This is not possible. By "electric current" we usually mean a current of electrons, flowing along a conductor, through an ionized gas, or in a vacuum. Although the light beam itself is radiant energy, and therefore electrical in nature, a current of electrones cannot be transmitted over it.

Q. Is it in any way harmful to health to drink only hard water for long periods of time?

A. No. If the water is pure and drinkable otherwise, it will have no bad effects on the system. The amount of dissolved mineral solids in even the hardest water is not enough to do anybody harm.

Q. Are germs generally of one size, or do different kinds vary in size?

A. Most of us think of a germ as any organism that can cause disease. Used in that sense, a germ can be almost any size from those too small to be seen with the naked eye, to organisms which we are quite certain exist but which are too small to be seen with the most powerful microscope.

Q. Why is the moon seen sometimes as a sharp crescent, and sometimes as a dim, full circle with a bright crescent at one side?

A. The reason for that is easy to see when we consider that the moon is illuminated by two sources: the sun, and reflected light from the earth, or earth shine. The half of it on which the sun's rays fall directly is brightly illuminated, and the rest of it lighted only by the relatively dim earth shine, which falls only on that part turned towards the earth. Under good seeing conditions, we can see this dimly illuminated part; but when conditions are not so good, we can see only the brighter part illuminated directly by the sun.

Q. Why is rock salt added to ice that surrounds containers of ice cream?

A. The salt is added to lower the temperature of the ice cream by speeding up the melting of the ice with the result that heat is absorbed more rapidly.

Q. Is the distance from the earth to the moon changing?

A. Yes, we believe the moon is getting further away from the earth, but extremely slowly. Astronomers have computed that at one time the moon was only 9,000 miles away from the earth; but they estimate that that time was four thousand million years ago.

Q. How hot is the center of the earth?

A. It is probably higher than 6,000 degrees Centigrade. That temperature is four times white heat, and hotter than the surface temperature of the sun.

Don't Forget Monday Is The Day — Wear Your Badge

Twelve Become Qualified As Instructors In First Aid

First Aid Classes Are Offered To Employees

Twelve Fort Wayne Works Employees Qualify For First Aid Instructors

With twelve Fort Wayne Works employees qualified as first aid instructors an opportunity is being offered all employees to enter courses in this work. The activity is under the direction of Dr. H. W. Garton, works physician who outlines the purpose and nature of the classes in the following statement:

"First Aid training for the laity has always been important, but it is assuming an increasing importance now as a vital part of the National Defense Program. Red Cross has a goal of a half-million persons to be trained in the year 1941.

"First Aid enables people to save lives by giving prompt and intelligent attention to the severely injured. Severe bleeding, stoppage of breathing (as in electric shock), and internal poisoning can cause death before the doctor can reach the accident victim. Unnecessary pain, shock and long periods of disability can result from improper *first* handling of injured persons. It is in such cases that the First Aid trained person can be of valuable assistance until the doctor arrives. Lives have been saved in our own plant by the immediate and proper use of artificial respiration in cases of electric shock.

"Industrial groups probably lead the list of those who should take First Aid training; they fit in perfectly with the defense program, not only within the industrial establishment but outside as well. First Aid is one of those things that can be used at any time and any place, wherever the need may arise.

"First Aid goes hand in hand with Safety. The First-Aid trained person is more safety-minded than the untrained person. Throughout the course the *prevention* of accidents is emphasized along with the emergency care of the injured.

"The group of employees shown in the accompanying photographs gave 30 hours of their time (at night) during a two weeks period recently in order to qualify as First Aid instructors. They are now officially approved by National Red Cross in Washington, D. C. to pass this information on to others in a regular class room course consisting of a total of 20 hours instruction. With an average of 25 employees per class, we can immediately offer instruction to some 300 employees, running only one class each week for each group. We are prepared to offer classes to both day and night employees, and to both men and women. Those who are interested in taking this training should fill out the application blank and send it to the Medical or Personnel Dept., Bldg. 21. If one of the above instructors is located on your floor or in your department, consult him (or her) for further details about the course." The application blank may be found on page 2.

Novel Party Will Be Held By Elex

Those who have listened to the original "truth or consequences" program over the radio will appreciate the excellent probabilities for a good time for Elexites on March 10 for a program patterned after the original "truth or consequences" which is planned for that evening. Bob Wilson of the WOWO staff will be in charge of questions and penalties.

The party will start with a dinner at 5:00 o'clock. An additional feature of the program will be a talk by E. Alberta Brenner on the subject of "The Romance of Silver." Tickets to the party are 35 cents and all reservations must be made on or before March 7.

Top, left—Locating pressure point on neck to stop bleeding. Left to right: Carl Bobay, Joseph W. Goodman and Harry Chism. Seated: Paul A. Snyder. Upper right: Applying tourniquet to stop bleeding in lower arm. The tourniquet must be manipulated with the hand. No stick is used. In the picture, left to right, Jesse W. Hahn, Dorothy Zurbuch and Hoy Bastian. In the lower group the prone pressure method of resuscitation is being demonstrated. Left to right: John Bastian, Kenneth L. Breidenstein and Lillian Winkler. George F. Casper is playing the part of the victim. Elaine Goodman, also a qualified instructor, was absent when these pictures were taken.

Even A Spider Could Learn Something About A Web

Teaching a spider to weave a web might be likened to carrying coals to Newcastle.

Nevertheless, a conscientious spider well might spend a day or two in the General Engineering laboratory at Schenectady. The result might be an industrial revolution in the spider web weaving business. For in the laboratory during the past 14 years, Beatrix Larned has been spot welding, rather than weaving, "webs" that would be the envy of the most accomplished spider.

The web is a nickel-chromium filament for sensitive thermocouples, small tube-like devices used to measure high frequency, alternating currents or voltage. The filament is composed of three pieces of wire but 1/2000 of an inch in diameter or ¼ the thickness of a human hair and, when installed, looks like the letter K tipped.

Not only is this tiny filament spot welded, but the K-shaped assembly is spot welded also to the posts of the thermocouple stem. The stem then is sealed into a tubular, tipless bulb, approximately ½ inch in diameter and 1¼ inch over-all length.

The work is so detailed that Mrs. Larned must use a microscope to see the wire and a pair of small tweezers to hold the wire.

Dexterity, keen eyes, and patience are necessary for this job.

G-E Announces New Television Floodlight

New television floodlights that will produce the same illumination with but one-quarter of the heat as the present incandescent lamps have been developed by General Electric's laboratory engineers.

The new type floodlights use three, water-cooled, 1000-watt mercury lamps and will produce an illumination over 100 square feet equal to that of daylight on a reasonably clear day, it was announced today by A. F. Dickerson, lighting division manager.

Each of the mercury lamps is smaller than a cigaret. Combined in the floodlight, the three lamps produce 195,000 lumens of light, an amount equivalent to that produced by 225 of the 60-watt incandescent lamps commonly used in the home.

An Essay on Husbands
By a Little Girl

Husbands is the people that your mamma marries, and she always wishes that she hadn't picked out the one she did, but I don't know why, because husbands all look alike to me.

My mamma says that husbands is like the things you buy on the bargain table. They look fine and grand so that you feel like you'll die if you don't get the one you have set your eyes on, and you fight with another woman for it and are ready to pull her hair and scratch her face to get it, but after you get it and take it home with you, it looks like thirty cents, and you spend your life wondering what made you fool enough to want it.

Husbands is very kind and polite to strange women, and they laugh themselves most to death when the pretty, slim young ladies tell jokes, but when their wives are forty and has gotten fat, husbands is grouchy and when their wives tell a funny story, all they say is "Huh."

I guess husbands is a kind of fish because I heard some ladies say that Susie Jones was fishing for Mr. Brown, but they didn't think she'd ever hook him, and when I asked my papa what it meant he said it meant that men are suckers, which is a kind of fish.

There used to be a great many husbands, and you could go out and catch one just as easy as you could go out and kill a buffalo, but every year they get fewer and fewer, and they don't roam the plains any more, and soon there won't be any more buffaloes and husbands left except those in captivity.

There are two kinds of husbands. A good husband is a man who gives you plenty of money to go shopping with, and goes downtown to work every morning at 8 o'clock and doesn't come home until 6; and a husband that is a mean old thing is the one that makes his wife buy things on a bill, so he can see how she spent the money, and who goes snooping around the kitchen seeing how thick the potato peelings are pared, and who stays home all day.

A husband is a useful animal to have around the house, for it pays the bills. I am going to have a husband when I grow up.

Bloomfield Works News.

Men may be fools to marry, but what else is there for a girl to wed?
—Irish newspaper.

Heard In 26-5

Paul Weaver: "Who do I owe a quarter?" . . . George Skinnel: "Sure hill billies are smart." . . . Henry Gerdom: "I remember when I used to have time to go fishing. . . . Herschel Odier: "I wish I had an electric train like Paul was talking about, that will run from the first to the second floor inside the walls."

Margaret Andrews, Bldg. 26-2, had a fine experience when she laid a box of eggs on the hat rack while she hung up her coat. When Margaret picked up the box again it was upside down and did she ever get a shower of eggs! One egg survived and it fell in a pair of rubber boots.

Al Miller, Bldg. 26-2, says he's on a meat diet. He isn't just saying it for when he opens his dinner pail it looks as if half a cow were in hiding.

He Thought Of It First

Melvin Beucler

The transportation of bar stock interested Melvin Beucler, Bldg. 6-1, and he went to work trying to figure a better way. As a result of his suggestion for an improved method Melvin received a suggestion award of $25.00.

Slips And Chips

By Sir Vis, 4-4

Don (Daggy) Thomas is preparing to evacuate from the Bldg. 4-4 Service Section soon. This is evident since Daggy quit wearing an apron and he shaves every day. The suspension of his evacuation is just about to floor me because I got all set to miss Daggy and he is still here. If he doesn't leave soon, we will never miss him. Douglass Blessing need not arise at midnight any more. Yes, he has a new horn installed on his car and it better not toot by itself anymore. We hope not, Doug.

It wasn't an earth quake, nor was it Joe E. Brown talking in the office that we heard through the office walls. But I did find out what it was. Believe it or not, it was Ewald Stinsmuehlen talking over the telephone. You see Ewald's mind was on his work, and he thought he was seated at his desk (which is very near the material handling conveyor and the grinder blowers) talking in a normal voice for the factory. The other day I worked nights and I certainly enjoyed being with the second shift gang for an evening. Chas. (Flash) Meyers is still up on his toes, and by the way, Flash is using perfume now, especially when the two pole winding machine is down. I also heard that Klepper is planning on using perfume too. I do not know for sure but I was informed that Klepper brought perfume in the other evening. My old friend Hermy Lepper tells me he's going out for some ice cream again soon. Be sure you wear an extra suit of underwear, Hermy. Al Schoenheinz is the same fatherly friend he always is. Yes, he sees that every one is satisfied, relieving all conjestion where he can, and for the rest of the second trick gang, they are hitting the ball. To show their appreciation to Elmer (the rat), they all brought in a piece of cheese and made up a nice package for me to present to Elmer. I don't know if Elmer really appreciated it or not.

Neighbor: "I heard your kid bawling last night."

Parent: "Yes, after four bawls he got his base warmed."

Bldg. 4-4

Lucille Baker was seen having slip trouble the other day. Could it be because she shortened her dresses?

Cliff Witham seems to be a pretty good electrician. He was seen fixing the fans the other day.

Bonnie had a lot of thrills on her birthday last week, but the most exciting was the one when she needed wire and Paul couldn't get it for her.

Dolores Byanski seems to like weddings.

The Sol Andorfer's have a new baby boy at their house by the name of Michael Lee.

Conversation over phone:

1st Party: "Is Bill Weber there?

2nd Party: "Yes."

1st Party: "I wonder if he could get out of the dog house long enough to talk to me. Tell him it is Uncle Walt."

The girls of the KC winding section had a grand time at Sol Andorfer's Sunday. Sol's only regret was that he didn't have a camera to take a picture of Vic climbing over the fence.

News On The Nose From 4-5

Yessir—it's a wonderful world and visions of spring have us peering through a mountain of Kleenex at the beautiful, glorious universe. Of course, it's spring. The parking lot is ankle-deep in mud, and Gertrude Reinking has a starry look in her beautiful orbs. Some star dust fell in her eyes, and she promised some lucky young fellow she'd be his steady. But there is a lot of the stuff floating around, and Mary Ellen Gingher is blushingly wearing a United States Air Corps pin and wings. And Minnie Schaper has added a wedding band to her solitare—she's Mrs. Edgar Doehrman to you. . . . Of course, it's spring, unless nature tosses another blizzard in our faces. It has us all whacky, and suspicion has it that our demure little Phyllis Manes has also been afflicted with spring madness. She is carrying a liberal supply of chewing tobacco in her purse. Some one has mentioned a "Sonny Boy" as being indirectly responsible for the slight peculiarity. . . . Poor Andy Lee. He has to take the blame for everything. But that's what a man gets when he has the reputation for being the office jokester. But Helen Rumbaugh may not be so anxious to accuse him of hiding her coat the next time it is missing. At least she won't spend five minutes raving before she remembers having left it in the woman's wash room. No, we won't accuse Andy this time. . . . Talk about vicious circles, we've certainly been left in a daze this time. It's all about a party, a dinner party, with Dorothy Collar wishing on the birthday candles. When each member of the party has come up and privately told a joke on another member, we find that each has secretly thought hers was the only tale. We have visions of Blanche Allen doing the "Rhum Boogie", oh dignity, while Martha Glock used the floral decorations in an interpretation of Ferdinand the Bull. Not to be outdone, Dorothy Collar and Betty Boldt were caught down on their knees "pecking" in the best swing manner. . . . Jessie Filler arrived at work this morning with one very cold left hand. For some very peculiar reason, unknown even to herself, she chose two black gloves for her right hand and didn't notice the difference until she was well on her way to the scene of her daily toils. . . . Your information girl in Bldg. 4-5 has accumulated so many nick-names in the four months she has been here that she has learned this little poem in answer to some of the appellations:

> "I know how ugly I are,
> I know my face is no star,
> But I do not mind it
> Cause I are behind it,
> The guy who's in front
> Get's the jar!"

That's all this time, nice people, How are we doin', Elmer?

Lieut. Verne Pray Reports From Camp

The many acquaintances of Lieutenant Verne Pray, Specialty Motor Division, who left on January 17 with the National Guard for Camp Shelby, Mississippi, will be interested in extracts from a letter received this week by K. W. McOmber, Bldg. 18-1. They are as follows:

"Thanks for your letter and the WORKS NEWS. The fellows from the G-E sure gave that sheet a real inspection, and it tells us lots of stories we otherwise would not hear. Of course we are especially interested in our own departments, and it sure seems good to hear small gossip about the boys we were working with a short time ago.

"The camp is from two to eight blocks wide and about eight miles long. We sleep in tents with wooden floors and walls and a wooden frame that holds the tent in place. The frame also provides for a stove pipe. The stove is about the size of a five-gallon oil drum at the bottom and tapers up to fit a 4-inch stove pipe. These stoves will really heat a tent in any kind of weather.

"The mess halls, etc., are all permanent wooden buildings. The recreation building has a stage and a projection room, just like small town community centers. There are a lot of possibilities for a building like that but so far we have used it only for schools. I am going to promote a band concert and amateur contest before long.

"Give my regards to Perry Shober and the boys in the band. Tell them not to forget their badges."

Is Zat So?

The sudden splurge into the limelight does not as yet seem to have any effect upon the gang in Bldg. 17-1, although they have been receiving quite a lot of publicity lately. Otto Nahrwald's department won a Safety Award for last month, and Elmer Jockel was admitted into the Quarter Century Club, thereby gaining their respective pictures in the WORKS NEWS. Besides that, Jack Neuman decided to give "Ye Question Mark" a little competition by contributing some extra items to the WORKS NEWS, so we accounted for a good share of publicity last week. Good work, Jack, keep it up! About the funniest incident on our floor last week was George Mosshammer's exhibition of a matador (bull-fighter) encountering Marion Sprague and Howard Eastman, who gave very good performances as the bulls. We wonder if you aren't wasting your time working in the tool coop, George, or do you think you will live longer here? We are glad to have Leo Schlink back to work with us after his recent accident. We hope you are back to stay, Leo! The weeks go so fast when you are working nights that Joe Kramer didn't realize that it was Valentine's day already and he forgot to buy his sweetheart a greeting. He says his sweetheart is his mother, so he knows she will forgive him! Mabel Lieberenz certainly believes in playing safety first, and won't give any one a chance to play a joke on her if she can help it. The "Bugle Call" had Mabel stumped. Have you figured it out yet, Mabel? Loyal Decker has decided to get a pair of safety glasses after all. "Sandy", the Scotchman, could take a few lessons from Argen Denny. Denny lost a quarter and so he had Claude Johnson going through the sweepings looking for it all week! Ralph Pettit must be practicing so that he can join the Polar Bear Club. We hear that Ralph walked right into Turkey Lake the other night and had quite a time getting out! Clyde Crabill goes in for skeet shooting, but as yet he isn't a very good shot. Clyde says he is just learning to shoot so that he may be of some value in case of war! I wonder if Howard Eastman found that floating drill holder yet?

See you next week!

The Question Mark!

Congratulations

The many friends of Henry Lepper extend congratulations upon his seventy-ninth birthday which occurs today. Mr. Lepper retired in 1929 after thirty-five years of service with General Electric.

Deaths

Charles J. Bullion, who retired on pension on December 30 died on February 18 at his home, 3323 Clinton Court. Mr. Bullion retired on his seventieth birthday after 24 years service. He was employed in Bldg. 6 at the time of his retirement.

Albert Harber, 4022 Indiana Avenue, died on February 17. Mr. Harber, who was employed in Bldg. 4-4, joined the General Electric organization in 1916. Funeral services were held on February 20 with burial in the Catholic cemetery.

Walter S. Gladfelter, Decatur, died on February 18 from injuries received when a car in which he was riding was struck by a train. Mr. Gladfelter was a new employee in Bldg. 17-1.

Don't Forget Monday Is The Day — Wear Your Badge

NEWS THROUGH THE PLANTS

Among Latest Suggestion Leaders

G. K. Buchan
Third on the latest suggestion award list, G. K. Buchan, Bldg. 19-2, received $70.00 for his idea of providing adjustable winding heads.

Shorts From 6-B

It was reported that a burglar broke into Lynn Crawford's house the other night and got away again before he was robbed of his tools. . . While the Company is on this expansion program, it might not be a bad idea to put up a 150x150 lean-to for Bert Herrman and his materials. As the situation now stands, Bert has to back out of his den into the aisle in order to get a chew of tobacco out of his hip pocket . . . Jim Johnson, who just got out of kindergarten about twenty-five years ago, looks more like the office boy than a veteran of the Quarter Century Club, in the picture shown in last week's issue of the WORKS NEWS . . . The person who operates the call horn just outside the office in Bldg. 6-B could easily make Dorothy Lamour's South Sea Island jazz band with just a few lessons in technique and execution. (We're in favor of the latter, Ruth.)

Due to the overwhelming performance of the Schnickelfritz band, Charlie Slater, Bldg. 4-3, kept his hat on all during the show.

Lorain Sieter, Bldg. 4-3, is really walking the chalk line to keep her name out of the WORKS NEWS. One of these days, before long, we are very certain that she will have just one great big story for the NEWS.

The employees of the Mechanism group are wondering why our good friend Myrtle Bennett, Bldg. 4-3, came to work with her new coat on. Was it to conceal such a pretty "Navy" dress, Myrtle?

Russell Carpenter, Bldg. 4-3, can do a lot of magic performances but just how he put 50c in his vest pocket and it disappeared in thin air has Russell guessing quite a lot.

Anyone interested in hair tonic that really grows hair, just see Mildred Mullen, Bldg. 4-3.

The boys have been razzing Ozzie Nahrwald, Bldg. 26-5, about being unable to join them because of minding the baby. Now they're trying to tie that old gag on him.

For the latest methods on milking we refer you to none other than our expert, Isobel Perry, Bldg. 26-5.

Tom "Ace In The Hole" Harry Freeman, Bldg. 26-2, is reported to have a nice racket and that Paul "Anything Goes" Studebaker wants to cut in on Harry.

Punch Press 19-5

By Slug

The Punch Pressers not to be caught napping for lack of activity selected two bowling teams and staged a match game that has by far outmaneuvered all previous athletic activities so far staged by this magnetic group. Throwing their scientific minds in reverse these bowlers conceived and executed all the fine points which don't make the game pleasing to the eye. The Growlers out growled the Howlers by the gigantic total of 12 pins over the three game route. It is to be admitted that Kammer and Jacobs were taken care of by profuse booing and other methods to insure victory. The Growling team composed of Satterwaite, Springer, Shultz, Prince and Roebke are the inning combination. The Howlers included in their midst, Jacobs, Balyeat, Eylenburg, Louthan and Kammer. In view of the fact that these men are howling for a return match, the Growlers will postpone their bragging until further notice—Booooo!

Russell Rose, Bldg. 19-5, had quite a time last week. He and a hog were the principals. Russ shot and butchered the hog three times each day but it was not until Saturday the job was done. Let's butcher a beef this week, Russ, if we can sell the hide two or three times a day we can make enough money to buy a farm.

The Safety Award for January for Bldg. 4-3 was won by the Department under Mr. C. A. Hartman with Mr. Ed Taylor as safety committeeman. The members of this division decided to have a meeting last Thursday noon, when the check was presented to the group, who in turn turned it over to the Floral Fund of the floor. Mr. H. G. Siebold, congratulating the members of this group, said in part, "I understand that this check will be turned over to the Floral Fund, which is certainly for a commendable purpose. You not only protected your fellowmen by not having a lost time accident, but also you will be able to re-establish your neighborliness for a good cause when the occasion demands." This check, as well as other checks received by the various groups, have been given to needy employees, for which the employees of the floor have so generously consented.

SANDY SAYS

Little Sandy, Jr., has a habit of getting his slang mixed up. He told his Cousin Douglass, "Well, cut off my legs and call me February."

Which isn't so mixed up, at that, since February is the "Shorty" of all the months. Everybody laughed just the same.

Several of my relatives, nearly the whole clan, came over to help me write this column for today.

"Now," I said, "Why shouldn't I begin by saying that with February so short, we didn't have much opportunity to do a lot of inventing or cost reducing, but with the turning over of a new leaf (on the calendar) we have a long month in which to get something accomplished."

"Weel, my gude mon" said my wise uncle Christy Mc., "hardly would ye get that oot before someone like meself would come back with the oxplanation that wi the fiscal calendar we use around here, March isn't nay longer than February."

Well, there was one start killed in its early youth.

"Noo," I said, "March got its name from the war god Mars and I could say that we therefore and likewise should make war on high costs, poor methods of doing things, waste, etc., etc."

"Yes, and ye might also mention that we should be beware of the Ides of March."

"Ah yus," said Cousin Colin, "the Ides of March, like: I'de better think o my badge Monday morning. I'de better keep it in sight all day."

The boys were still working on their slang. Douglass tried to get classic. He said, "Well, burn my clothes and call me September Morn."

"Boys", said Colin, "How about putting meringue on my cheeks and call me pieface."

"Colin," I said, "with all your crust, you don't need meringue."

"Foosh, lads," said Uncle Chesty, "March is supposed to be windy, not ye two. What ye need is tae be caught in the draft. Then instead of blow, blow, blow all through March, it would be march, march march all through the blow."

19-5 Office Chatter

"Honest Abe Reitdorf" as he is now known to the Cost Dept. . . . Elmer Sible has been working so much overtime that he now has gold bricks made with his name on them. How about passing out samples? "Sheriff Tobias, is the latest." We don't know the story but it certainly must be a good one. . . . The fact too is that he is the office Emily on weddings, by going down the isle twice at one stride with his twin daughters. . . . Bob Meyers is wishing that someone would not wear the same kind of an overcoat as he does or at least wear the same size. . . . George Bridges found out the other day that he had an unmovable telephone. Too bad, George, that you had to move.

Archie Boren, Bldg. 4-3, used to be a railroad "Red Cap." He still is so interested in the railroad business that he wears a red cap to work now.

Howard Shipman, Bldg. 26-2, will be starred next week in the mystery of "The Empty Lunch Pail."

Dreams — Just Dreams

"I'm a dreamer; aren't we all—" so goes a popular song of some years ago. Great things have come from dreaming; also some situations quite embarrassing. Take, for example, Wally Clayton, Bldg. 19-3 Drafting, who recently entered one of our city cars while in the midst of a dream—or was it? Anyway, as he passed the coin box he held tightly clasped in his hand a street car token. Wally walked back to his seat and sat down with the same token still clasped in his hand. Cries from the motorman, "Have you a pass?" failed to disturb his reverie, until a man sharing the seat nudged him and said, "I believe he is talking to you." Wally awakened with a start, saw the token still with him, and murmuring some unintelligible words, walked up and made the customary deposit. He crept back to the seat in his most nonchalant manner—but the day was utterly ruined.

Grace Ledbetter, Bldg. 4-3, came to work last Monday morning and rode the elevator to Bldg. 4-3. Upon arrival on the floor, she noticed the position of the clock rack had been changed, and made several trips down the stairs to Bldg. 4-2 before she was finally convinced she was on the right floor.

Dorothy Zeigler, Bldg. 4-3, came to work last week one day a little hoarse. We wonder what kind of a game she was playing that she had to whisper in the girls' ears. Just too bad she needed a machine mechanic so much.

Mac "Wimpy" McHenry, Bldg. 4-3, is causing his friends no end of worry. The reason is his forgetfulness. Last Friday evening he forgot to send someone down to the gates for the lunches. Then again on Monday evening his absent-mindedness crept upon him; with the mercury hovering near zero, he sent two of the girls down to get the lunches. The girls failed to return, the half starved crew, with visions of hot sandwiches before their eyes, were getting out of hand. Mac realized that he had forgotten to call the restaurant. Like a true hero, he saved the girls from freezing, and managed the hot groceries for the crew. All is well that ends well, but do not let it happen again, Wimpy.

History Up-To-Date

A man named Nero once started a fire in a place called Rome and then stood on his balcony and fiddled his fiddle while the bonfire raged. For convenience, we will call his modern counterpart John—just John. This 20th century Nero resides in the fair city of Fort Wayne and is employed in the Bldg. 19-3 office. The other evening a shower of sparks and flame burst forth from the chimney of his residence. A hurried call had the fire fighters (we do not mean Henry Lojeck) on the job, and the situation was soon under control. Was our hero excited? No! According to friends he just fiddled around, trying to persuade the department it was part of their duty to clean out the chimney, carry out the ashes and a few dozen assorted cans and bottles accumulated in the basement as well as sweep the snow off the walks before leaving. Meanwhile, his equally enterprising son, noticing the throng gathered to watch the blaze, proceeded to sell magazines with the result that the evening netted the family $1.35. Which, students of history will observe, was more than Nero netted from his fire and goes to prove that, in fiddling, it takes more than a fiddle and bow to produce results. It's the finger work that counts in hot music.

Ella Black, Bldg. 4-3, the "Mistress of the Papers" spends her noon hours hunting through the papers for a picture of Dan Cupid. We hope some day you will find a real good one, Ella.

Fall, you sons of trees. Yes, it is a war of the bowlers of Bldg. 26-5. The third game resulted 2384 to 2119 in favor of aircraft. Let's see, that's two out of three for aircraft—isn't it, toolmakers?

Looks as if Ray Kierspie is trying out for a new job as janitor. At least he was seen picking up a hamperful of towels under the watchful eyes of Bill Milledge. Ray says "crime doesn't pay and how was I to know that Ray Renfrew was behind the rampart."

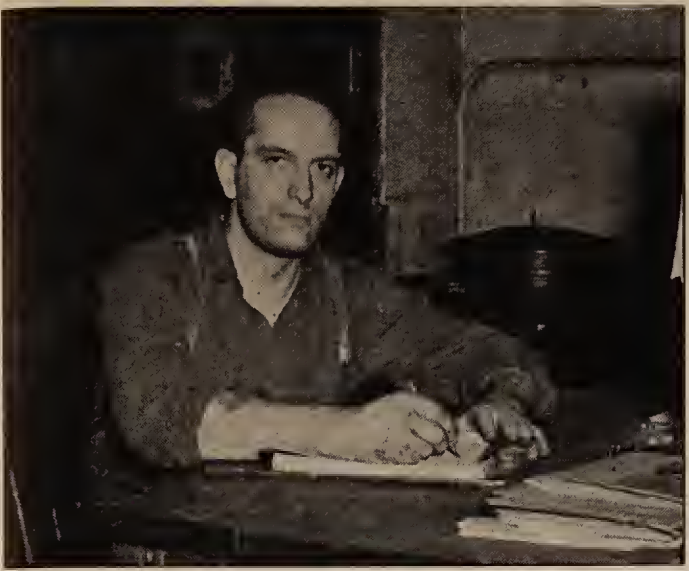
Kathryn Hepker, Bldg. 19-5, has a kill or cure for sore throats, all you have to do is eat two cheeseburgers at midnight. Kathryn says it will either cure your sore throat or you will die of indigestion.

An Idea That Was Worth $115

Jack S. Teeple
Naturally interested in rotor shaft operations, Jack Teeple, Decatur Works, determined that the truing operations could be changed to a decided advantage. His idea sent to the suggestion department brought an award of $115.

Don't Forget Monday Is The Day — Wear Your Badge

Packing Crates Interested Joe Koble



Joseph J. Koble

Joseph J. Koble, Bldg. 26-1, noticed that the packing crates for certain transformers would serve their purpose far better with certain improvements. He decided on the improvements needed, sent his idea to the suggestion department and received $25.00.

NEWS THROUGH THE PLANTS

Everything in Bldg. 6-3 can drift back to normal now. Freddie Fisher and his Schnickelfritz band "has came, saw and conquered."

Kate Minehart of Bldg. 6-3 certainly took a "shagging" over the week end. She bought an entire book of tickets for the Catholic Tournament and also bit on a megaphone, purple and gold banned, seat cushions and a gold chrysanthemum. To be sure and not miss a thing Kate also carried a couple of box lunches. But all this expenditure was in vain as her team, Central Catholic, was beaten in the first round.

You can tell that it's getting near Easter as Al Kruse of Bldg. 6-3 has started practicing church songs instead of "swing ditties" in the wash room.

Borings From 4-4 Office

'Tis just a little stuffed rat, bringing you late news, odd news, and a start on the news of the future, so here goes nothing.

Last week while nosing for news, I came across a new column in the Works News. He or she (as the case may be) said 'twas going to give me a chase for my money. She was wondering why I bored a hole in the wall last week. Well, to tell you the truth, there are plenty of glamour girls in our office, but the reason for tearing Bldg. 4-5 apart was, some girl came down and borrowed one of our blue prints and, of course, she didn't return it. So I was using my sleuthing powers by getting the lost print back. So that was the only reason why I'd ever be in Bldg. 4-5.

Now speaking of Ewald, he came to me bright and early Monday morning with a large collection of cheese, that was so generously contributed by the second shift men in Service Section. Besides, the cheese being old and dried out, it was wrapped in paper toweling. The cheese was swell, so thanks for the cheese. Please do it again, I enjoy it so much.

Paul Johnson, Winter St., has been telling us about a big fish that has been stealing his lines, hooks, etc., and of course he has been going back every week end to see if he could hook him. At last he got one, a 7½ lb. pike, but he still thinks it isn't the right one, so he is still hoping.

It was candy for all and cigars for the men in the office when Mike O'Grady announced that he was the proud pater of a baby girl—Patsy Lou. It is Number 3 for Mike and all are girls.

Don Niles stumbled on a box and fell head long into the stationery cabinet. LaVon Price was found sitting on the front porch Monday night (she said she was reading the evening paper). The truth of the matter was, she had gone out on the porch to get the paper and the door went shut and locked her out. She remained in the Spring atmosphere for over an hour while she was waiting for her folks to come home. Personally, I think it is too early to rush the season.

'Tis enough for now.

Sincerely as ever,
Elmer, the Field Mouse.
(The Rat to You.)

George Cooper, Bldg. 4-3, in telling us what a wonderful performer his new car is, said that he put three gallons of gas in it and drove 100 miles. Some mileage we claim, but the truth of it all is, we learn, that he did put three gallons in after purchasing the car, but both he and his wife were so engrossed in the smooth action and riding qualities of the car that they forgot all about the gas tank, when all at once said car came to an abrupt halt. Then came the realization of an empty tank, and not 100 miles either. George had to walk one-half mile to get gas.

Carl Kable, Bldg. 4-6, who had sent out a lot of mail, was heard to remark as the messenger brought it back: "It all comes back to me now."

The tenderfoot, new on the ranch, thought he would show the boys that he was tougher than they imagined.

"Fetch me a broncho," he cried. "I'll show you how to ride 'im, cowboys."

They produced one of their best and the newcomer mounted it. In twelve seconds, after some remarkable gyrations, he was hurled to the ground.

"What happened?" asked one of the boys, as he picked up the tenderfoot.

"What happened? Why, she's a demon bucker. Didn't you see her?"

"Buck!" said the other. "Why, she just coughed."

M. B. A. PATIENTS

General Purpose Motor: Edna Wolfe, 1619 E. Lewis St.; Helen Wilson, 1208½ Michigan Ave.; Lillian Voirol, 2019 Roy St.; Emilia Thieme, 1319 E. Pontiac St.; A. Reese, 745 Taylor St.; Florence Minnich, 1231 Ewing St.; Margaret McMaken, 428 E. Creighton Ave.; Alberta Kul, 2336 Lillie St.; Catherine Keller, 1521 Hugh St.; Ethel Klopfenstein, Grabill, Ind.; Sidney Fletcher, 822 E. Lewis St.; Samuel Beeler, Geneva, Ind.; Samuel Ake, 1326 E. Wayne St.; Doral Feasel, 915 Wilt St.; Pauline Baumgartner, Lutheran Hospital.

Transformer: Marcella Ramm, 1228 N. Anthony Blvd.; Francis Magers, 2012 Pauline St.; Carl Brayles, 2525 Miner St.; Georgia Dennis, 620 Runnion Ave.; Rosella Swift, 3007 So. Wayne Ave.

Left the Hospital: Bessie Chapman, Mary Whelchel, Fay Williams, Catherine Roehling, Pauline Subkouski.

Returned to work: Clare Coen, Ruth Hess, Jeanette Blough, Eleanor Kestner, LaVon Spoor, Arnold Blomberg, Ella Mayo, Louis Hoffman, Lavada Schlup, Neil Daley, Doral Feasel, Viola Parrish, Leo Schlink, William Tungate, James Eddy, Willie Lutz, Rachael Beach, Gary Baker.

Posies

The day Walter Histed, Bldg. 19-3, was assigned to his new location, he received a beautiful tribute of roses from his admirers. Such little acts cannot help but impress the recipient with the fact that it's a great life if you don't weaken—so, hang on, Walter!

Who was Goldie Mentzer, Bldg. 26-2, trying to bribe for what?

What is Jack Leeth, Bldg. 26-2, trying to hide, after being very much enthused over the whole thing?

A chance in a lifetime. Three men in aircraft, Bldg. 26-5, want a first tenor. See Mike Lowe or Mike Schmidt for details.

A farewell party was staged recently for Dave Hanson, Bldg. 26-5, a reserve officer in the field artillery, who was called into service. The party in the form of a dinner was held at the Indiana Hotel. Among those present were Paul Berlien, Milo Schmidt, Myron Lowe, G. Ernst, Gordon Diver, Elmer Fretz, Francis Fann, Otto Rodenbeck, Clarence Nussel, Mark Henigh and Jim Diver. Mr. Hanson reported at Chanute Field in Illinois.

St. Valentine's Day passed very quietly in Bldg. 4-3 with Marie Larimore and Art Brandenburger receiving the top honors of the most valentines received. My, oh my, such popularity must be deserved. We, of the small lot and flange sections, have a sneaking suspicion that these two unassuming personalities did send themselves a large portion of these valentines.

Helen Gearhardt, Bldg. 19-5, and John Smead were married Saturday, February 15, in the Westfield Presbyterian church.

Bertha Budd, Bldg. 19-5, and Ray Noble, Bldg. 4-5, were married Saturday, February 15, in the parsonage of the Church of Christ.

Sympathy

Employees in Bldg. 4-B and Bldg. 6-B extend their sympathies to John Shanahan in the death of his son.

Employees of Bldg. 26-2, wish to extend their sympathy to Katherine Ernsberger in the death of her father.

National Defense First In Nation's Laboratories

G-E Research Engineer Stresses Important Part By Scientists In Defense Work

National defense is being placed ahead of everything else in the nation's research laboratories, Laurence A. Hawkins, executive engineer of the Research Laboratory at Schenectady, told the American Institute of Mining and Metallurgical Engineers in a recent address. A column by Mr. Hawkins under the head "Science Forum" has been appearing from time to time in the Works News.

"The terrible national emergency now confronting us is forcing research activities away from the arts of peace into the technique of war," said Mr. Hawkins. "National safety must take precedence of all else in thought and effort.

"But when the emergency is over, and the free nations have won the right once more to liberty and the pursuit of happiness, research, and especially fundamental research, will be needed to open up new fields for industrial development, to absorb the labor set free from armament production, and to help restore a war-ravaged world."

Mr. Hawkins reviewed the achievements of pure research in the electrical industry and suggested the possibility of profitable studies in the metals field.

"Metallurgy seems to offer boundless opportunities for fundamental studies," said Mr. Hawkins. "In spite of great advances in recent years, metallurgy remains largely an empirical science as compared to physics, and many of its fundamentals are still imperfectly understood. Advances in physics, especially in the fields of x-rays, electrons and neutrons, have provided effective tools for metallurgical research."

Mr. Hawkins listed as products of fundamental research in the General Electric Research Laboratory, "the gas-filled lamp which produces probably 90 per cent of the nation's electric light; the radio power tube which made broadcasting possible; the Coolidge x-ray tube, which changed x-ray technique from a tricky art to an exact science and enormously extended its scope; atomic-hydrogen welding, making possible new fabrications from thin metal sheet; and the inductotherm for treating a variety of diseases."

"Fortunately there is no limit to such progress," he said. "The growth of scientific knowledge has been likened to the widening of a circle—the greater the growth, the longer is the circumference, and the length of the circumference marks the extent of our contact with the unknown."

Thisa And Thata 19-5

What kind of bracelet was Frances Smith wearing around her ankle? Pretty ritzy, we think!

We wonder what the attraction was in a poor defenseless tree the other day when Dorthy Dunifon was at the car wheel!

Best wishes to Alexandrena Vashano, who's wearing a brand new sparkler!

Arnold, don't you know better than to teach these new employees such bad habits as chewing tobacco?

Emma Sherbondy, time clerk from Bldg. 17-2, who is leaving Sunday for a three months' sojourn on the West Coast, was honor guest at a noon luncheon Wednesday at the Aulton House. Guests besides Emma were Luella Franke, Helen Buuck, Audrey Hickernell, Dorothy Rinehart, Mildred Spuhler, Mary Hile and Merle Kirkpatrick. Emma's co-workers presented her with an eversharp and fountain pen set. We're really expecting to hear from you while you're gone. Best wishes on your trip.

Said an excited citizen to a candidate: "I wouldn't vote for you if you were the Angel Gabriel."

To which the politician replied: "If I were the Angel Gabriel, you wouldn't even be in my precinct."

Why Stop At Just One Idea?

Donald B. Poland

The name of Donald B. Poland, Bldg. 26-2, has a habit of appearing frequently in the suggestion award lists indicating that Don doesn't stop with one successful idea. His suggestion for changes to finishing and assembling operations on coils places him on the latest award list with an award of $90.00.

Don't Forget Monday Is The Day — Wear Your Badge

Club Cagers To Meet Huntington

Free Basketball Program Offers Possibility For Exciting Game

Continuing to schedule their opponents from out-of-town ranks the G-E Industrials will tangle with the South Side Furniture of Huntington at the G-E Club, Wednesday, March 12th in the 8:30 o'clock feature game.

South Side Furniture has, for over a period of five years, one of the best won and lost records of any team in or near Fort Wayne and so far this season has more than lived up to this fine reputation. They have defeated a great number of tough Fort Wayne teams and included among their victories are Zollner's Pistons although Zollners later avenged this by beating them at Huntington and again in the Markle tournament last week.

Although hailing from Huntington most of the South Side Furniture players are picked up from the small town teams around Huntington. The club as a whole averages six feet in height but despite their tallness are exceptionally fast on their feet. Being a typical Indiana basketball club, they use a fast break type of attack and when this is stopped they resort to set plays run off a pivot formation. Johnson and Williams, right forward and right guard, are both exceptionally dangerous on long shots while Byrd, the other forward, is a one-handed wizard. Shively, center, is especially good on pivot shots and tip-ins while Tuggle, the other starter, is a defensive genius usually guarding and holding the other team's offensive ace to a very few markers.

To cope with this power house Coach Mert Edgar is expected to start his usual line-up of Marquette, Weigand, Voirol, Hanley and Vonderhaar, with Allen, Starkel, Clawson, Offerle, and Motter sure to see action.

The Coesse Independents, another out-of-town team, will appear in the preliminary starting at 7:30 o'clock taking on West Side, first half champions of the G-E Interdepartment Basketball League. Coesse does not seem to be quite as strong as South Side Furniture but is still tough enough to give the Westerners a real workout.

A CHALLENGE

The Series and Specialty Bldg. 19-5 factory bowlers issue a challenge to bowlers on any floor for a match. For arrangements contact Cecil Rose.

Fathers Honored By Gecode Club

A hundred members and guests enjoyed a party last Saturday evening at Decatur G-E Club rooms when the Gecode Club held its annual fathers-daughters' banquet. Fathers and daughters were introduced by the club president, Dollie Schladenhaufen.

The committee in charge included Charlotte Butler, chairman; Alvera Vian, Julia Andrews, Lela Brokaw, Thelma Andrews, Luella Werst, Mary Keller and Betty Schieferstein.

Locals Make Good Show In Tournament

Although not doing quite as well as they hoped to, the G-E Club representatives, by bowling a team total of 2162 in the Women's American Classic Tournament at Chicago last Saturday and Sunday, still managed to finish fifth in their division. Several splits at the wrong times cost the girls a much higher score.

Out of the five girls participating in the "all events" Helen Tieman with a total of 1505 finished on top. She had the high team total of 497, garnered 467 pins in the singles, and cracked over 541 pins in doubles competition. She also rolled the highest single game, a total of 235.

Gladys McMillian teamed up with Helen Tieman in the doubles competition and rolled a total of 421 to give this duo a total of 962. Gladys also rolled a nice single total of 448.

In the Class D doubles competition E. Etzler and O. Dreibelbiss rolled a total of 797 that is sure to finish up in the money.

The other doubles entry Virginia Bowman and Virginia Mollet bowled a total of 703.

Elex Night Shift Members Hold Party

Elex members working on the second shift will hold a "Hurricane" party at the G-E Club on Thursday, March 6, starting at 1:00 o'clock. A feature of the meeting will be a book review by Mrs. Harry Hogan.

A board meeting of the second shift girls will be held at the Hogan residence on Rudisill Boulevard on Wednesday, March 5, at 12:00 o'clock noon.

ON -- the Alleys

By Bob Ringle

With the circuit again, after a few weeks absence. Tuesday nights' little jam session had the maple spillers keeping the foul boy busy all evening. Schwartz was hot again. Someone better slow him down, he's been burning up the alleys lately. Yelling whoa won't stop that ball half-way down the alley, Murphy. Kelley, a new man in the league, on his first night of play was batting for a 600 to start out with, getting a total of 590, the games, 159-223-208. Chet Engleman had a big smile on his face after hearing the 'phone ring for him. Nice going, Chet, a lot of us probably wouldn't take it that way.

Two hundred counts were falling thick and fast. Those who tapped at the portals were Schwartz, 232; Kelley, 223-208; Billings, 222; Houser, 221; Crow, 210; Cunningham, 206; Roeger, 205, and Kreischer, 203.

Rod-Gun Club To Shoot At Armory

The G-E Rod and Gun Club, until further notice, will hold all pistol and rifle shoots and matches at the Armory on Clinton Street. The meetings will be on every Thursday evening, starting at 7:30 o'clock. All persons interested in rifle or pistol shooting are urged to attend, and instructions are offered newcomers.

The Armory range is considered one of the finest of its kind and offers excellent facilities for both 22 or high caliber guns.

Doehrman Establishes New Three Game High

Bill Doehrman of the G-E Club Major League established a new high three game score that is really something for his fellow bowlers to shoot at—672. This brings his season's average for 51 games to 200 pins. Bill's high count also enabled the Coaches to set a new high three game total for the second half—2791 pins. Talk about a "dog eat dog" race—take a look at the Tool Room League standings. There is only a three game difference between the top and bottom teams. Specialty FHP Motor League's star bowler, Clarence Rump, is also doing all right for himself—last week he rolled a three game total of 647 which gives him a season's average for 61 games of 193. Two teams have been picked by the Small Motor League to represent them in the State Tournament. Jim Daley will captain one team composed of Nahrwald, Franke, Mullins and Sheridan. Yahne will head the other with Haugk, Walt, Starke and Voorhees as his mates.

Safety Party Held By 20-1 Employees

Celebrating their winning of a January safety award which resulted from a one hundred per cent record during the month, employees of Bldg. 20-1 held a party at the Turners Hall on last Friday evening. Forty employees attended the affair which was arranged by a committee composed of Wm. Weidelman, chairman; Harry Underwood, Everett Keenon, Raymond Kreigh and Arthur Beck.

Following lunch and refreshments card games were played.

IN THE ROUGH

By WALTER SUNIER

We have been thinking about building a mechanical man with a couple of sets of ears. This guy will nod his head constantly and a phonograph inside will keep repeating, "Isn't that wonderful! Isn't that wonderful! Isn't that wonderful!" He won't be able to yawn or appear bored or say "You're a liar." We believe he would be a great comfort.

We may have to admit after all that golf is a screwy game. One golfer is still walking around in a daze because he saw his golf ball go when he was swinging and he heard the ball but still he had no feeling whatever of hitting it. His friends never told him that while he was swinging, his ball was knocked away by a sliced ball from the next fairway.

Two players hit shots into traps at one hole. One ball went into a trap on the right and the other into a trap on the left. When the players were in the traps, they could not see each other because of high banks. They hit each ball at the same time and both balls were headed for the far country when they collided above the pin and dropped close enough to the cup for conceded putts.

In a match, one player drove into a deep muddy ditch. When he tried to play the ball out of the ditch, he discovered, after he had swung, that the ball was stuck in a large gob of mud on the clubhead. He walked out of the ditch and onto the green. After removing the flagpole, he shook the mud and the ball into the cup. He claimed a birdie 2 and also the match since this was the deciding hole. Just in case you get in the mud some day, the U.S.G.A. has ruled that where a ball sticks to a clubhead it should be removed and dropped and then played.

«« It's a Joke »»

Customer: "Say, this hair restorer you sold me didn't grow one hair on my head."

Barber: "Mebbe not, but it has a nice cooling effect when it runs down around your ears, hasn't it?"

* * *

"I have been on this train seven years," proudly said the conductor of a slowly moving train.

Passenger: "Is that so? Where did you get on?"

* * *

"I was rather disappointed in that gentleman you introduced to me last night."

"Indeed! How so?"

"Why, you spoke of him as a bridge expert, and he turned out to be nothing but a famous engineer."

* * *

"It's scandalous to charge us $10.00 for towing the car only three or four miles," protested the motorist's wife.

"Never mind, dear," replied hubby, "he's earning it; I've got my brakes on."

* * *

"Where are some good places to stop on this trip?" asked the tourist.

"Well," drawled the farmer, "I reckon I'd stop at all railroad crossings."

Community Surveys And You

Wage rates are generally determined on a community basis and some six or seven years ago the Company announced as a wage policy that it would pay wage rates equal to or higher than rates paid in community industries for work requiring the same skill and efficiency. In order to live up to this policy, the Company initiated community surveys.

The most recent surveys show that the Company is paying—overall average for all plants for all hourly paid employees—7 per cent above the community averages.

If the Company just met community rates, wages might be frozen, but the Company has paid more than the community and this has prevented any freezing of rates. The record bears this out. In the various plants, as the result of surveys, hourly rates have increased from 18 per cent to 30 per cent above the 1929 level, and most of the changes have been made during the past four years. During the past six months a large number of rates have been increased as a result of surveys.

In addition to paying more than community rates, the Company pays a cost of living adjustment. This is paid as a percentage of weekly earnings, but actually it is a part of the wage rate. Payment has varied from 2 per cent to 5 per cent as the cost of living index has changed, and at the present time is 3 per cent. The cost of living adjustment also prevents the freezing of wage rates.

The 7 per cent above community averages when added to the 3 per cent cost of living adjustment makes a total of 10 per cent that the Company is paying above community rates. This 10 per cent, when applied to the present payroll of the hourly rated employees, amounts to more than $10,000,000 per year.

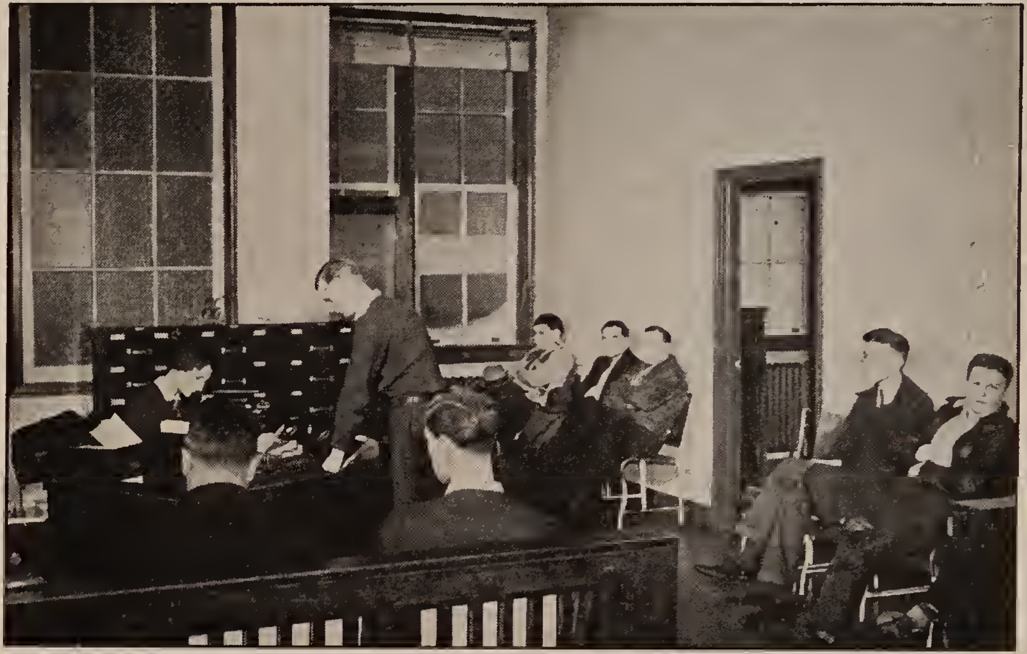
Assistance Offered In Filing Federal Returns

An office will be established in Bldg. 21 from 1:15 to 5:30 on the afternoons of March 11, 12, 13 and 14 to assist employees in filing income tax returns. Employees seeking this service are asked to bring their own blanks if they have been supplied. A limited number of blanks are available. The office will not be open on March 15.

500,000th Gear Casing In G-E Trophy Room

There are no antlers or sailfish in the trophy room of the General Electric Company at Bridgeport, Conn., but here is a specimen that has been added recently, glass case and all. It is the half-millionth Zamac gearcase manufactured for G-E by the Stewart Die Casting Company, of Chicago, and was appropriately mounted and presented by J. Ehrbar, manager of that company. The Zamac castings are used in G-E washing machines, and are noted for their exceptional light weight and strength. In any case, 500,000 is a lot of die castings, and—more important—a lot of washers, too.

Outstanding Service By Medical Dept.



(Photographs on Page 4)

Employees are shown in the waiting room of the Bldg. 21 dispensary. A careful record of all visits to the medical department and dispensaries is important to employer and employee. Records also make possible statistical studies and reports, such as the one that follows.

That Fort Wayne Works employees, as a whole, appreciate the importance of the Works Medical Department is indicated by the annual report which shows that thousands of visits were made to the various dispensaries the past year.

There were sixty-three lost-time accidents during 1940. Beyond these many of the thousands of calls may well be credited as a recognition of employees to the importance of the little things — a recognition of the trifling disorder, scratch or bruise which at home would hardly be noticed, but must in the shop receive immediate attention.

Of interest, then, to all employees, is the following article by Dr. H. W. Garton, works physician, and a review of photographs on succeeding pages showing various functions of the Medical Department:

Industrial Medicine Is Growing Up

As recently as a quarter of a century ago medical departments in industry were few, and Industrial Medicine, compared with that of today, was a mere infant. The then were limited largely to the care of factory injuries.

Today such a department interests itself in preventive and conservation measures as related to manpower in industry. To fulfill these increased obligations, many activities have been added to the original one of caring for factory injuries. These activities include such items as: physical examinations of new employees to establish fitness for work, and to help place activities of such a department employees on jobs suitable to their

(Continued on Page 5)

Defense ... A Teamwork Job

When Rudyard Kipling penned his immortal lines, "It's the everlasting teamwork of every blooming soul . . . ", he told the story about national defense in this or in any other country. In General Electric it is particularly true. Everyone must work together. As new employees take their places in training or on actual jobs, veterans in the Company's service will be there to help them get acquainted. The old timers can see to it that the new men learn the best ways to do good work. They can see to it that the new men get the right slant on safety so as to protect themselves and others. They can make them feel at home in the plant.

One of the most important facts in General Electric's contribution to national defense is that very little of the equipment we build is used as a whole. The greater part of it is designed to operate with other machinery, made by other manufacturers. It is vital that we finish our jobs on time. Our turbines must be ready for the destroyers and the battleships when the shipbuilders want them. Our superchargers must be ready when the plane maker wants them. Our motors must be on the assembly lines of other manufacturers of national defense equipment, when they want them there.

Throughout a long list of products the story's the same. Our biggest customer today is Uncle Sam and we can't fall down on delivery dates.

General Electric's products for national defense must be made right the first time. There is no time for doing the job again if something goes wrong. They must not only be made right the FIRST TIME . . . they must be made on time.

Defense IS a teamwork job!

Short Term Courses Partial Response To Demand For Labor

Personnel Head Announces G-E Plants Throughout The Country Are Training Men For Defense Program Work

Practical, streamlined, short-term courses, in which men are trained within several weeks to do one specific job, are the partial response of the General Electric Company to the increasing demand for skilled and semi-skilled labor.

In General Electric plants throughout the country, hundreds of young men are learning to run lathes, milling machines, drill presses, and grinders; read blueprints; and perform simple assembly jobs preliminary to taking their places in the national defense industrial program, it was announced today by G. H. Pfeif in charge of personnel under the vice-president in charge of manufacturing.

The short-term courses, though, are not the only way in which General Electric is attempting to meet the labor demands of the national defense program.

At all plants, including, of course, Fort Wayne, the company is co-operating with the vocational schools of the cities in the conduct of specialized courses.

To Schenectady have come older men from the Erie, Pa., and Pittsfield, Mass., works to learn the details of turbine manufacture in anticipation of the expansion of turbine production facilities.

• Give Your Ideas A Chance

During 1940 Fort Wayne Works employees submitted 3,537 suggestions through the Works suggestion system. This total represents ideas actually submitted. It would be interesting if there were a way to determine how many more ideas were born during the period that "never saw the light of day"—ideas that were dismissed from the mind in their first vague form because of some distraction of the moment, or because the originator simply kept putting off the comparatively easy task of placing his thought in writing, or transmitting it to the proper authority.

No one in our organization can afford to minimize the importance of constructive suggestions. Every product manufactured by the General Electric Company is the result of an idea. Every employee owes the possibility of employment to an idea; an idea that has borne fruit and is represented by a product we manufacture.

Ideas are, indeed, valuable. Especially valuable are constructive ideas which lead to improvement of things that people can use and enjoy, or which make it possible to produce and sell things for less money so that they become available to more people.

But no idea—no matter how big or important it may be—has any real practical value until it is brought out into the light of day and put to work.

Give your ideas a chance. Making practical suggestions is bound to help our Company hold its reputation as a leader in the electrical manufacturing industry with resultant benefits to every member of the General Electric organization.

• Working Well With Others

To work well with others is so important that it is worth while occasionally for a person to consider whether he is actually doing so, and to think how he may possibly do better.

The chief requirement for working well with others is *wanting to.* A man can be pleasant, cheerful, friendly, and helpful *if he wants to.* Aside from mere mechanical skill, the ability to work well with others means actually nothing more than to be *always agreeable, always helpful.* This is largely a matter of managing oneself, controlling and directing one's thoughts, one's emotions, and one's will-power. Is that too difficult?

One has everything to gain and nothing to lose from trying. For one thing, working well with others enables a man to enjoy his work. That in itself is a great advantage, because it's not possible to live a happy life unless one can really enjoy one's work.

• Learning Safety Rules

Usually when a man gets hurt it is possible to trace the cause. And very often the cause is found to be that he disobeyed a safety rule. Sometimes he admits that the reason he disregarded it was that he didn't know it. Because he hadn't studies the rules sufficiently.

Nobody wants to get hurt, of course. But many people just don't take the time to study the safety rules and actually learn them. Consequently, they make mistakes, get hurt, or cause others to get hurt. It is a wise plan to make it a point to study the safety rules until we make them a part of us. Safety starts with the mind, you know.

Short Term Courses

(Continued from Page 1)

At the same time, the four-year apprentice training program has been continuing in the company's nine major plants. This program was instituted in 1901, and at the present time, 1,015 men are in apprentice courses. All of these apprentices are high school graduates and are at least 18 years old.

The short-term training for specific jobs had its inception in the Lynn, Mass., works, and was begun at Schenectady last August. The extent of the program is limited only by the available facilities, Mr. Pfeif said. Thousands of men have applied for training and the problem is one of selection rather than recruiting.

Men residing within convenient distance of the various plants are selected, primary consideration being given to their mechanical aptitude or interest. Other factors being equal, preference is given those who have had machine shop experience in industry or in vocational or Federal training schools. Each prospective trainee must be at least 21 years old, must pass the same physical examination given to regular employees, and, in accordance with Federal regulations, must produce evidence of citizenship and a Social Security card.

The majority of trainees are assigned to machine tool operations although many are placed on assembly work.

The training program may run from three weeks to two months or more according to the progress of the individual and production requirements. A continuous feeding of new men into the system takes place for as one man is advanced another is engaged. As a result of the careful selection, the percentage of trainees failing to show satisfactory progress is surprisingly small, running from 5 to 8 per cent, according to the personnel officials. The enthusiasm of the men is high because most are of the depression generation and are grateful for the opportunity of remunerative employment.

Trainees begin in one of three ways. They may engage in nonproductive work under the direction of experienced men; they may engage in productive work under the supervision of expert operators; or they may observe and serve as helpers to experienced men. Each man learns eventually to set up and run one particular machine or to do a specific job. Some courses include training in blueprint reading. In instances where such is not the case, the trainees are afforded opportunities to obtain this training through vocational school programs.

Supervisors who direct the training programs have expressed satisfaction with the results obtained.

Kindling Orders Being Accepted

A sufficient amount of scrap wood is on hand at this time to permit filling of orders from employees for kindling. Orders are to be placed with the Personnel Department in Bldg. 21. A handling charge of $1.00 for a full load and 50 cents for a half load must be paid at the time the order is placed.

Orders for the kindling will be filed in the order received and deliveries will be made accordingly.

NEWS FROM THE CAMPS

Dear Editor:

I am a perfect stranger to you, but nevertheless I want to tell you how much I enjoy and appreciate reading the WORKS NEWS that is sent my husband by the company each week.

At the present time I am just one of many 'Army Widows' here in this place, and anything that tells you about your friends and how things are in general back home, means more than a square meal.

My husband has 18 years service with the company, leaving on January 15, to come with the Fort Wayne Units of the National Guard for a period of Military training, which I for one, certainly do hope it will be just for the promised year. I'd give most anything just to smell that G-E smell in his clothing, instead of the Mississippi rain and mud.

This so called 'Sunny South' may be all right, but here in this vicinity it averages raining two days out of a week. If it happens to only rain one day, in one week, it makes up for it the next, by raining three. When it rains, it really rains, not just a nice soft rain like we have up there.

At night we need more cover than we used up in the zero country. Having five blankets on the bed, and leaving the gas heaters burn all night through, then some times we have to take our G-E electric heating pad to bed too, to get the bed warm.

Getting back to the WORKS NEWS, in addition to the news items regarding the different persons connected with the company, I find good reading in the special items. In fact, I read it from cover to cover, and then start over again for fear I have overlooked something.

My husband has received several letters from his co-workers and when he receives them his face lights up, and his eyes sparkle, and then when he gets a WORKS NEWS I am a 'General Electric' widow until he has digested it, so you know we both enjoy reading all about the folks back home, and the town and works doings.

I know that every General Electric employee that is in the Service and receiving this weekly shop paper enjoys it as much as we do.

Again I want to express my appreciation, and thanks to whoever is responsible for our getting this paper, I am

Yours very truly,
Army Widow in Hattiesburg.
Mrs. Walter E. Pohler.

Urban Transit Load Is Worth 24,000 Homes As An Electric Load

The Cleveland Railway System operates 25 trolley coaches, equivalent in load-building power to 1,125 refrigerators, 600 ranges, or 17,325 washers, it has been calculated by F. V. Gantt, General Electric transportation specialist at Cleveland. The operating company last year paid a total of $808,500 for electric power, which translated into revenue received from the average domestic consumer represents 24,450 homes, said Mr. Gantt. In pointing out the importance of the trolley coach as a utility load, he said approximately 3,000 trolley coaches have been sold.

Your Identification Badge Vouches For You — Wear It

Sunlamp Bather After A Tan Should Watch His E-Vitons

The average sunlamp user is probably more interested in getting a good tan than in getting his E-vitons, but a slight introduction to E-vitons will prove a big help in acquiring that "just-back-from-a-winter-cruise" look in intelligent fashion.

General Electric's sunlamp engineers have made tests and drawn up charts to show just what the ultra-violet bather can expect in the way of both tan and E-vitons in comparison to the natural sunshine bather.

In general, sunlamps give off three types of radiation. The characteristics of the radiation are determined by the wave length, measured in angstroms. The important wave lengths in a sunlamp discussion are those above 2300 angstroms.

Ultra-violet radiation, the source of both E-vitons and tanning, is above 2800 angstroms. Ultra-violet radiation is invisible. Visible light all falls within the band from 4,000 to 7,500 angstroms. Above 7,500 angstroms is the infra-red, or heat, band.

The important thing to the sunlamp user, whether in search of E-vitons and their vital help in building vitamin D, or just a plain tan, is the ultra-violet radiation.

The tanning band is a very narrow one, concentrated between 3,800 and 3,850 angstroms. The vitamin D producing band is from 2,800 to 3,200 angstroms. This is called the antirachitic band and here are concentrated those rays which are known to help build calcium in the bones and teeth and have proven value in curing rickets.

Some sunlamps also give off rays shorter than 2,800 angstroms, but this ultra-violet radiation is either useless or harmful to the sunlamp bather. These rays are harmful to the eyes and require goggles to prevent conjunctivitis. General Electric sunlamps, therefore, have been designed to eliminate radiation below 2,800 angstroms without lessening the output of the beneficial vitamin D producing rays. The user of the sunlamp can be sure in this way, of receiving the maximum health-building and tanning effect without the use of goggles.

The E-viton (erythemal viton is the unit used to measure the antirachitic radiation. Rays of 2,967 angstroms produce the most E-vitons, according to laboratory and clinical evidence.

Natural sunshine radiates all waves above 3,000 angstroms, but includes only half of the antirachitic band. The sunlamp can therefore produce more E-vitons than the sun. The noonday midsummer sun, with an output of 5,000 E-vitons, causes a slight reddening of the skin in about 20 minutes. The G-E engineers, using an S-1 sunlamp, with an output of 12,000 E-vitons, have been able in the laboratory, to produce the same reddening of the skin in six or seven minutes at a distance of 30 inches.

One of the important things for the sunlamp bather is to avoid confusing this reddening of the skin produced by the E-vitons with the tanning effect. Tanning is the result only of the single narrow band of rays between 3,800 and 3,850 angstroms. The sunlamp's output of E-vitons is necessarily higher than its output of tanning rays, and this calls for patience on the part of the sunlamp bather anxious to acquire a tan.

Lengthening the time of the original exposure too rapidly will increase the reddening effect but not the tan. It may cause a bad burn, and may result in peeling which makes it necessary to start all over again on the job of acquiring a tan.

Tests by General Electric have proven that the only successful procedure to produce tan is to expose regularly once or twice daily, with adequate care to avoid over-exposure. A single over-exposure, however, may result in a burn which will cause the skin to peel and remove all trace of former tan.

The sunlamp bather who knows his E-vitons will appreciate the error in the common assumption that a heavy tan denotes rugged health. The antirachitic benefits are concentrated in the non-tanning vitamin D producing rays. But both the health and the handsome tan may be enjoyed by the ultra-violet bather who uses both discretion and an efficient sunlamp.

G-E World War Vets Plan Annual Membership Campaign

Left to right—Carl Rehling, Bldg. 20-2; Ed Witte, Bldg. 18-1 and Wm. Altekruse, secretary and treasurer G-E World War Veterans Association, who will be in charge of the organization's annual membership campaign.

Plans are under way for the annual membership campaign of the G-E World War Veterans Association. The above committee will be assisted by the following members who will serve as contact men:

Mart Kimble, Bldg. 26-5; A. E. Coxon, Bldgs. 26-3, 26-2, 192 Office; Louis Sordelet, Bldgs. 26-1, 26-B, 22, 24; Leo Didier, Bldg. 19-5; Alvin Powell, Bldg. 19-4; Chas. Thompson, Bldg. 19-3; L. P. Larenitis, Bldg. 19-2 Factory; A. R. Spencer, Bldgs. 19-1, 19-B; Art Druce, Bldg. 27; Leo Christle, Garage and Truckers; Carl Rehling, Bldg. 20; Howard Orr, Bldg. 28; Ed Witte, Bldg. 18; W. L. Whonsetler, Bldg. 4-6; Andy Lee, Bldg. 4-5; William Smith, Bldg. 4-4; John James, Bldg. 4-3; Joe Wyss, Bldg. 4-2; William Walt, Bldgs. 4-B, 6-B, 2-1; Erwin Zollinger, Bldg. 17-4; W. Summers, Bldg. 17-3; Emerson Whitehurst, Bldg. 17-2; Robert Daring, Bldg. 17-1; Louis Manz, Bldgs. 6-1, 6-2, 6-3, 6-4; Truman Buckles, Bldgs. 8, 2-2; R. Kaiser, Bldgs. 10, 9, and 5; Geo. Gettle, Bldg. 12; Cleon Noys, Bldg. 12-B; Argo Vegalues, Patrolmen; L. C. Swager, Bldgs. 21, 23; Ed Ehrman, Winter Street Office; George Graue, Winter Street Factory.

In connection with the membership campaign plans are under way for a banquet to be held early in April. All G-E employees who served with the Allied forces during the World War are eligible for membership.

Appointed Decatur Works Foremen

J. Kenneth Eady

Edward Warren

Raymond McDougal

Announcement is made by E. W. Lankenau, superintendent of the Decatur Works of the appointment to foremanships of Raymond McDougal, J. Kenneth Eady and Edward Warren. Mr. McDougal, who becomes foreman of the stator winding department began his service with the Company in 1925 as an insulator. Later he worked on internal grinders and stub lathes until the time of his present appointment.

Mr. Eady was appointed foreman of progressive assembly, stator machining, switch assembly and box motors. He began his service with the Company in 1920 and has been employed during the greater portion of his service as a toolmaker. Mr. Warren, who was appointed night foreman in charge of the second shift, began his service with the Company in 1923. He worked in the flange section as a Bullard operator and later served in various capacities in the flange section.

Scout First Aid Finals At G-E Club This Evening

The G-E Club will again this year be the scene of the midwest first aid finals of Boy Scouts of the Anthony Wayne Area, and more than 400 scouts are anticipated to take part in the contest which will begin at 8 o'clock this evening. Dr. H. W. Garton, Works physician, will be chief judge, and will be assisted by a committee which includes many G-E employees.

The finals cover entrants from nine counties and twenty municipalities, and the entrants were selected from the 1,600 scouts who received training during the year. Similar contests are being held in various parts of Indiana, Illinois, Michigan and Wisconsin at this time. Regional finals will be held in Chicago on April 19. Many of the scouts taking part in tonight's contests are the sons of G-E employees.

As a result of the midwest finals held at the Club last year, eleven teams qualified for the Logansport finals and of this number, eight teams qualified for the regional contests in Chicago—the largest single group in four states. Twenty of the boys received gold medals at Chicago and twenty received merit certificates.

G-E employees and their families are invited to attend the contest this evening.

Reservations Close For Elex Club Party

Reservations will close today for the Elex Club "Hurricane" party to be held at the G-E Club next Monday evening. Following dinner the girls will be entertained with a "truth or consequences" program under direction of representatives from station WOWO. Cash prizes will be awarded in much the same manner as that of the popular radio program broadcast under the title of "Truth or Consequences."

SCIENCE FORUM – by L. A. Hawkins

Q. How is it possible for sea gulls to fly with such a slow wing motion?

A. **First, because they are so light; their bone structure, for example, is very much lighter in comparison to their bulk than is man's, and generally they are built for the job of flying. Secondly, they know how to fly; they utilize the lift available from small air currents to the maximum. Often, they really glide instead of fly, sometimes sailing for long periods almost without moving a wing.**

Q. What happens when a person is knocked unconscious?

A. **Dr. W. W. Scott of Chicago has made some recent studies on this question, and his findings make it seem likely that the unconsciousness which follows a knockout punch or blow is due to a short lasting but complete brain anemia, or lack of blood. Apparently, the shock of the blow temporarily paralyzes or partly paralyzes the nerves controlling blood supply to the brain.**

Q. Could a person live in an air-tight room with plants that give off oxygen?

A. **I don't believe it has ever been tried, but theoretically, if conditions were just right, he could.**

Q. Could a machine be made to replace the heart?

A. **A machine could certainly be made to reproduce the pumping function of the heart; but whether we could construct a workable artificial heart, which would maintain life and enable its possessor to go about his everyday affairs, is a very debatable question.**

Q. What was Thomas A. Edison's first patented invention and when was it patented?

A. **His first invention was a vote recorder designed to permit a complete, recorded vote to be taken in the House of Representatives in about one minute, showing how each individual voted. The patent was applied for on October 11, 1868 and was taken out on June 1, 1869. It was U. S. Patent No. 90,646.**

Medical Department Renders Extensive Service

GENERAL DISPENSARY—BLDG. 21 (Top Left)

The General Dispensary is the general workshop where most of the injuries and medical cases are given at least preliminary care. From here they are sent to the other departments according to their needs. A total of 20,090 factory injuries, 2,149 outside injuries, 21,038 medical cases, and 18,508 redressing and retreatments were cared for in the dispensaries at Broadway, Winter Street, and Decatur Works during 1940.

SURGERY (Top Right)

A small operating room with a complete sterilizing unit is equipped for the care and treatment of most injuries occurring in the plant. The relatively few serious injuries are taken to outside hospitals for treatment. During 1940, 52 cases requiring some type of surgical procedure were cared for in the plant operating room. Of a total of 20,090 factory injuries, it was necessary to hospitalize only five cases during the year.

EXAMINATION ROOM (Center Left)

The general physical examination is the very foundation of industrial health work. Each new employee is given a physical examination, and many employees already on the payroll are re-examined after absences for lack of work, illness and injuries. Others are re-examined by reason of being engaged in certain occupations; still others by voluntary request. The rate of rejection of applicants, because of physical defects, was only 2.6%. The purpose of the pre-employment physical examination is not to reject as many as possible, but to help in placing the applicant on a job suitable to his physical and mental capacity. During 1940, at the Broadway plant, 2,757 were examined for employment, 481 after absence for illness, and 471 in special groups—a total of 3,709.

PHYSICAL THERAPY ROOM (Center)

Many types of industrial injuries are benefitted, and recovery is hastened, by the various forms of physical therapy, such as radiant heat, ultra-violet, and diathermy. 2,275 such treatments were given during the year.

LABORATORY (Center Right)

A small but well-equipped laboratory provides facilities for doing some of the more common laboratory procedures, as a part of physical examinations.

FLUOROSCOPE (Lower Left)

The fluoroscope enables the examiner to make a *visual* X-Ray examination of certain parts of the body. In industry it is valuable in locating metallic foreign bodies, in inspecting and "setting" broken bones, and in the examination of heart and lungs as part of the physical examination. It is a valuable aid in "spotting" cases of lung tuberculosis, with final confirmation being made by X-Ray photographs. A total of 1,550 such examinations were made last year.

(Continued on Page 5)

Your Identification Badge Vouches For You — Wear It

In Promoting Welfare Of G. E. Employees

(Continued from Page 4)

MEN'S WARD (Lower Center)

No patients are kept over night, but an emergency ward for men and a similar one for women are provided for sick and injured employees; these wards provide places of rest until other necessary treatment can be given, or until employees can be sent home or are able to return to work. Outlying branch dispensaries are equipped with one bed each.

X-RAY ROOM (Lower Right)

Many industrial injuries require X-Ray examination, particularly for the detection of broken bones and other bony injuries. X-Ray examination of heart and lungs is also important in industrial examinations, for example in the detection of early tuberculosis. 588 X-Ray examinations (photographic) were made during the year. X-Ray work is limited almost entirely to industrial conditions.

Above are shown the three dispensaries operated in addition to the main dispensary in Bldg. 21. Upper left is the Bldg. 2 dispensary on the east side of Broadway. Upper right, the Winter Street dispensary and below the Decatur Works dispensary.

Medical Department

(Continued from Page 1)

physical conditions; the detection of diseases and conditions caused by the occupation, and cooperation in the prevention of these diseases, which means surveys of working conditions; the temporary treatment of sickness occurring while at work; the determination of disability in relation to retirement of employees; the education of employees in health matters; in brief, the Medical Department is a clearing house for all those things of a medical nature which arise in a working population while on duty.

"The work of the Medical Department in industry should not conflict with the work of the family doctor—rather it should supplement it; the work of the former is largely preventive, while that of the latter is partly preventive, but largely curative. Both are interested in health promotion.

"No medical department in industry can attain any degree of success without the full support of management and the cooperation of employees. Both have contributed to attain what we believe to be a successful year. Employees have cooperated especially in reporting injuries, and as a result we were able to complete the year without any lost time caused by infected wounds. For every accident that caused lost time, there were 318 reported accident cases that did not lose time—another evidence of employee cooperation in remaining at work whenever possible.

"In this time of National Defense effort, the conservation of manpower, especially industrial manpower, is of vital importance. Industrial Medicine is concerned with all aspects of this job and hopes to make a valuable contribution to it."

G-E CLUB DANCE

Don't forget to attend the G-E Club dance Saturday night from 9 o'clock to 12. Pete Dannecker's orchestra will again provide the music. Tickets purchased before 6 o'clock Saturday will cost 20 cents while the price will go up to 30 cents after that time.

NEWS THROUGH THE PLANTS

Living out in the country has finally affected Helen Weinert of Bldg. 6-3. She has started to grow a crop of corn.

Those Wire and Insulation girls really go places when they throw a party. Eleanore Plock expects to roll her own from now on. Alice Friedman promises to show up at work with her face fairly shining each morning and Loretta Gerardot is sure she will never be hungry again. Those balloons Edna Martin had served was a nice introduction, but was it necessary to turn over your water glass? Marjorie Degitz gave several lessons in rug-cutting, but few were brave enough to venture out of their corners. They kept Mabel Alcott hid away down at the end with Marie Gehle guarding her to see that she didn't talk. A good time was enjoyed by all and we hope next time Mary Coggeshall will be able to join the party again.

Could some one tell us if Phil Tilford, Bldg. 4-3, had dirt on his lip or could he be growing a moustache.

Here is another way for someone to earn a nice wad of suggestion money. Joe Grosjean of Bldg. 6-3 has been wifeless for the last two weeks. The better half has been vacationing in Florida and Joe was supposed to write her a letter every day. Monday, Joe received a whole pack of epistles marked "address unknown." Mr. Grosjean is now in the market for some darn good excuses and alibis. Any advice will be gratefully accepted.

It is reported Ross Cohagen absolutely failed in his attempt to get Gordon McDougal to loan him his false teeth.

The Bldg. 4-6 Drafting Section are very happy now that Wm. McIver has a new pipe. The old one was strong enough to walk by itself.

The Apparatus Planning Department's stag party honoring Jack Fyock, who leaves us to accept a position with the Wire and Cable Sales Division, went off with a bang. In fact, several bangs, starting with lunch and ending with Henry Lojek administering the "Coup De Grace" to the evening with his attempt to nail a glass to the cellar wall. The boys gathered at the home of Ozzie Lacert, in whose basement was assembled all the items necessary to assure a gala affair—ranging from lunch and games to a movie show. In brushing aside a fog that seems to obscure part of the evening, I recall the quartet composed of "Nightingale" Keese, "Silver-voiced" Wagner, Bob Archbald, "The Yoder Yodeller" and "Uncle MacWell" Maxwell (yes Uncle Max has turned crooner), the educational movies, John Rogers, drinking Coca-Cola, those pests, Wagner, Rogers and Shultz, with their candid camera shots, Jack Toole 30c in the hole (such a face) the way the lunch and drinks (soft—to be sure) disappeared, Lojek and Uncle Max playing darts, Toole's juggling and magic acts and last, but not least, Lojek's masterful attempt to deft the universal laws of nailing, yes! nailing a glass to a cement wall—it didn't turn out well—not too well. The only grouch was Lacert's the next day. He complained because, Bud Fisher being unable to attend, there were two bottles of pop left over. Claims he was double crossed again. Such a life! Hic!!

G-E Oil Furnace Heats In 10 Minutes

On cold winter mornings it's a great comfort to have heat pouring from the radiators soon after you crawl out of bed. The new G-E Oil Furnace has a fast heating "getaway", sending heat into the radiators in 10 minutes, starting cold. From a warm start, such as when the furnace has been operating normally, it will furnish steam in less than three minutes from the time the thermostat calls for heat.

G-E engineers achieved this remarkable heating speed by designing a boiler with an unusually small water content, and by spreading the water thoroughly all around the heating surface so that the heat developed by the oil flame is quickly and efficiently transferred to the water.

Literature on this new G-E contribution to better living is available in the Employees' Store.

NEWS THROUGH THE PLANTS

SANDY SAYS

Hoot Mon! Today, being the seventh, should be as lucky as Friday the thirteenth is unlucky. Today and next Tuesday, the eleventh. The two numbers 7 and 11 have a magic charm about them, especially to some of us who sometimes gamble on the green (if the rug is that color) and use the little spotted galloping cubes.

Being a Scotsman, Old Sandy doesn't do very much gambling (if he thinks he might lose), so this should be a good time to discuss the evils o' gambling.

Every since man No. 1 had to take a chance on what was lurking behind the next tree, ever since the first farmer gambled on the weather, the insect pests, and the value of his crops, we have had a natural instinct to gamble.

Taking chances might be regarded as a fine sport but one kind of gambling is considered by all of us with contempt. That is gambling with other peoples' money.

Now, from gambling, how do you suppose we can work around to end up with lower costs?

Well, let's start with safety. When machinery came in, we got hurt too often, so we had to quit gambling with lost fingers, or even death, and put guards on belts and gears, ballyhoo safety, have safety committees, etc., etc. You and I don't like to gamble when you and I have so much to loose. The result is a very fine safety organization.

Now, when we get careless and spoil material we're gambling, too, and, worst of all, we are not only gambling with our own time and money, but with somebody else's as well.

The answer is, don't take a chance. Don't try to get by without thinking. When we spoil something in the factory, it's a 100 to 1 shot that we know better but just didn't think. No, take it from a Scotsman, no matter how rich you are or how much money your Company has, neither of ye can afford to waste anything.

Of course, my Cousin Colin gambles every time he starts out with his Model T. "Colin", I asked, "why don't ye get something more modern?"

"Weel," he said, "at least I'll never get held up and robbed in this."

"Why? Do crooks always pass up such old jalopies?"

"Yus, when they obsairve me coming doon the road they can see I've already had my shake-down."

Wonder why Carl Conrad of Bldg. 19-3 uses that gutter ball at the G-E Club all the time? There are plenty of good bowling balls at the Club Alleys and surely Carl could pick out one of them and then again it may not be the fault of the ball. It might be Carl was a little excited over something. At any rate, we would suggest that Carl get the Club Pro to give him some lessons before he starts bowling next week.

If any of you Bldg. 19-5ers failed to get your WORKS NEWS recently, you can blame it onto Jack Jennings who grabbed every available issue. He was even caught going through the waste paper baskets for extra copies. The reason? His picture on page 3. Some of the boys were unkind enough to remark that all the picture lacked was a profile view and a number across the chest.

Come On, You Polar Bears

Cold means nothing to the group of girls shown above for they not only spent a day galloping around the ice of Niagara Falls but enjoyed it. In the group are Sue Cameron, Mazie Greek, Rosamond Schooley, Mildred Atherton, Belle Buchan, Lois Miller, Alvena Greber and Merle Kirkpatrick, members of the Ki Cu Wa Club. Below, the girls, represented by the dark specs, are shown at the foot of the falls.

Sunbeams From 17-4

What we want to know is, whether Helen Maxson is on a budget or a diet—she not only neglects the candy lady but works the bathroom scales overtime.

Well, we will admit that the ladies pajamas now-a-days are lovely, and Corrine Bruns thinks that hers are exceptionally pretty, for she wore the top to work, in place of a blouse.

Violet Brower might come in to work on low but she goes out on high; in fact she leaves so fast that she neglects to put her coat on.

Curley Kruse can imitate a cackling hen so well that he has Jerry Pierce looking for the eggs.

Irvin Lange says that he caught twenty crappies at Hamilton lake. Could be, but the pay-off came when it was found that he didn't have any fishing poles. Sounds fishy to us.

Eight girls of the Ki Cu Wa Club visited Niagara Falls last week-end and found them beautiful at this time of year, even if Lois Miller did ruin a perfectly good veil, and Mildred Atherton found one objection to riding in the smoker. The girls who went were Sue Cameron, Alvena Greber, Lois Miller, Mildred Atherton, Rosamond Schooley, Merle Kirkpatrick, Masie Greek and Belle Buchan.

Carol Huntine doesn't need a very large pencil, in fact just an eraser with a small piece of lead in it will do.

Last week the city fire department had to visit the home of J. E. Rogers, Bldg. 19-3, to put out a fire in his chimney. All traffic was stopped for a few minutes while the fireman cleaned out his chimney. Nothing like getting a little of your tax money back, eh Johnny?

When George Gunther of Bldg. 19-3 came in last Monday he was all smiles and the reason . . . why, George has a new car.

Seventeenfore Splurges

Well those wedding bells have rung again. Richard (Dick) Seidel and Martha Stoddard were united in matrimony Saturday, February 22. Dick has originally intended upon getting hooked up in the year 1940, but owing to a 50 cent bet with Karl Stahl of Bldg. 17-4, delayed the affair until 1941. What a Scotchman won't do. Good luck and best wishes for a happy and prosperous married life. . . . Charlie (Pop) Haberkorn is sure getting to be quite a soup guzzler since he had about all his molars removed. Anyone knowing a new kind of soup, let Charlie know and he will try it out. . . . If anyone is in doubt as to why certain sections of the floor space on the north end are cleaner than others, just ask Ben Kapp and he will tell you. . . . Theo (Cy) Seymour has decided to change his crop on his acre of ground this year. Last year it was potatoes, and this year it will be strawberries. What is it going to be in 1942, Cy? . . . Charlie Schild was missing one of his cigar stubs the other day and after accusing Henry Reehling of confiscating it, found it lodged in one of his hip pockets. Better get the "G" men on the trail the next time, Chas. . . . Paul Redmerski has been walking around with his chest out a mile lately. His answer is that he is now a proud grandpa. . . John Howard is the proud papa of a baby boy. Congratulations, "Pop" and "Mom" Howard, may he grow up to be president some day.

Carl Alter, Bldg. 19-5, did not forget his badge Monday, but he did forget something else. When Carl peeled off his coat he was amazed to find two snakelike appendages dangling from his mid-riff. Amazement turned to embarassment when he found he had forgotten to hitch up his suspenders.

News On The Nose From 4-5

Last week we were afflicted a bit prematurely with spring madness. This week it's snow blindness and not even that jovial Irisher from the test department, Pat O'Brien, can raise us from this lethargy. . . . The boys in the commutator department want to know what Homer Davis is going to do with his canoe. Homer even has sailor hat (wears it eight hours a day) but the fellows haven't figured out how he can navigate his canoe on the ice. It has been suggested that he trade it in on a flat boat and put on some runners for smoother sailing. . . . Stu Herring was heard to wish audibly that he had Al Olson's money so he could go to Honolulu to get away from it all. Says friend Olly in return, "If you had my money down in Honolulu, I'd be right after you to collect Shylock!" . . . The fellows in the assembly line are contemplating a collection for Ed Stauffer who still has no 1941 license plates. Maybe he's planning to surprise them. Perhaps he is going to get a new bicycle. . . . From the same Winchell who gave us this bit of comment, comes this revelation. Maynard Cope comes to work at 3:30 p.m. and Adam Lazonga's the first shift girls. When they are gone, he gives the second shift girls a break. . . . A group of girls in 4-5 reported a very delightful time was had at a party given by Viola Wyss recently. They had a happy reunion with Rosemary Bennett, who left Bldg. 4-5 several months ago to become a lady of leisure. If A.S.C.A.P. will give us permission, we would like to present the Bldg. 4-5 parade of hits:

1. "I want a Girl Just Like the Girl That Married Dear Old Dad."—Carl Beyerlein.
2. "There'll Be Some Changes Made."—Vern Robinson.
3. "High On a Windy Hill."—Silent Ed Klomp.
4. "I Can't Love You Anymore."—Joe Trentadue.
5. "Lovely Lady."—Jessie Filler.
6. "Where Are You?"—Busy Eldon Vosburgh.
7. "Ain't You Ashamed?"—That Andy Lee.
8. "I'll Never Smile Again."—Colgate Jim Oma.
9. "Sophisticated Lady." —Myrtle Rauner.
10. "When Irish Eyes Are Smilin'."—Pat O'Brien.

If this nonsense has worked you into a "Frenzy" just remember that while we may seem a bit "Careless" with your names, it's just a lot of fun and "I Was Only Foolin' You."

Did you notice how pleased Ed. Tipton of Bldg. 19-3 was when he received all those valentines? That one of a hayseed! Ed. just wouldn't part with that one. He is going to take that one home to Albion and frame it.

What does Clarence Nichter of Bldg. 19-2 mean when he gives out one of those long sighs and says "Oh me"?

Theodore Schlup of Bldg. 19-3 must be going to farm on a large scale this summer as he has had several hayseeds looking for a garden tractor for him. Just wouldn't trust his own judgment. Well, after all those basket ball bets you can't blame him.

"I understand that Mimi has cured her Scotch boy-friend of stuttering. How did she do it?"

"She called him up long distance collect."

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

The furriers claim that fur coats are at their lowest price now for the year. Not being much of an authority on furs, we ask one of our male admirers to tell you something about the subject. The following is his letter as it was received by us:

"Knowing nothing whatsoever of the subject and feeling therefore qualified to assume the role of an authority on the subject I shall endeavor today to dissertate on a matter of vast importance to women in all walks of life. I mean Fur Coats. In today's talk we shall discuss the little known Twicket from whose pelt the fabulously rich Twicket coats are made.

This little animal, the Twicket, exists only two places in the world. First, on the island of Tweek, which has never been discovered, and second, in the imagination of your correspondent, meaning me. Consequently genuine Twicket pelts are very rare, there being none in existence and for this reason all Twicket coats sold are of simulated pelts which is another way of saying "faked."

In making a Twicket coat the pelt of a mouse is used. I might say the pelts of many mice are used, a mouse being, as you are no doubt aware, a somewhat smaller animal than somewhat. In making up a Twicket skin the mouse skin is first shaved by a man known as a shaver. Working as these shavers do with small razors on these small hides, they are known as little shavers. This operation of shaving of course leaves the skin of the mouse without fur, so other operators pluck from other mouse skins the individual hairs which other operators working with small needles sew back into the shaved hide. Now this is laborious work and seems entirely unnecessary and well as silly but the idea was originated by an auditor on the payroll at $25,000 a year and when you pay a man that much, you can't afford to ignore his ideas. These Twicket Pelts take sometimes as long as three months to make and when you consider that frequently 36,893 pelts go to make up one fur coat, you can readily understand why it is necessary to charge an enormous sum for a finished coat. Prices range from as low as $125,000 for a coat to as high as $125,002 and frankly even if there was one I bet it would look like hell anyhow. So as an authority on the subject I would advise you not to consider a Twicket fur coat unless you are crazier than I am."

Yours very truly,
Joe Doakes.

Amos Schladenhauffen, the welder in Bldg. 19-3, is going to attend traffic school in New Haven. We don't know why but perhaps Amos would enlighten us on the subject.

Fred Geisler of Bldg. 19-3 was seen passing out fried blue gills Tuesday morning and when questioned about it, Fred sighed, "We catch them that way in Big Lake." Now we know Fred, but to those who don't know, ask about him in Bldg. 19-3.

Ruth Fuller, Bldg. 4-3, celebrated her birthday and did she have fun. It happened to be on George Washington's birthday, and the same date must also have included her husband, for when someone asked her whose birthday it was, Ruth replied, "Mine, George's and him," pointing to her husband.

Your Identification Badge Vouches For You — Wear It

»» NEWS THROUGH THE PLANTS ««

19-4 Spot Jottings

Ed Robins is moving in from Arcola to his newly built home in Southwood Park. But Ed isn't so happy about the whole thing for he says, "Now I'll have to wear shoes both summer and winter." . . . As was reported last week Super Salesman Such broke his glasses and lost a radio sale. This week he at least didn't break his glasses. . . . One day last week Cal Langhor heard the five o'clock whistle blow, grabbed his coat and dashed out with a couple of bosom friends. Suddenly feeling a cold breeze Cal reached into his overcoat pocket for his ear muffs. No flaps. It was then that Mr. Langhor discovered he had arrayed himself in True Sheets' complete ensemble. We hear on good authority that True did not avail himself of the situation and wear the ear flaps home. . . . With Ray Soest having a birthday in February along with Lincoln and Washington we thought sure there would be a party. Oh well, spring is just around the corner and maybe we can have a garden party. . . . We welcome the people from Bldg. 17-3 and hope you will enjoy working with us.

Anyone wishing information on where the biggest hamburger for a dime can be bought see Ralph Steward, Bldg. 26-5.

William "Bill" Buesking spent a day last week as guest of his son at Ball State College, the occasion being Fathers' Day. Bill was an honored guest, having a special seat at the speaker's table during dinner.

George Skinnell says he doesn't mind the publicity he gets in the Works News but wishes that we would spell his name right. We're sorry, George S-K-I-N-N-E-L-L.

Henry Smith, Bldg. 28-2, would appreciate the loan of a compass the next time he stays at the Van Curler in Schenectady. We might suggest a hatchet so he could blaze a trail.

Bees In Your Bonnet

There seems to be a keen rivalry developing among the Bldg. 19-3 group as to who can report the most astounding adventure with our little insect friends.

Walter Histed's report on killing a mosquito last week certainly outdid Jim Stouder, who had his killing around the holidays, but the climax came when Frank Archbald reported wasps in his living room. Yes, chum(p)s, he claims they went blasting past him like bullets and further asserts the wasp—or was it a swarm—chased him around the house for hours until the critters finally dropped exhausted and were shoveled off the floor and into the furnace. It must be those new blends on the market!

It is reported that Earl Lenz used 500 gallons of gas in his car last year. The question is presented, what did he do with the two barrels he saved?

Roscoe Platt is the man that is wearing the checkered shirt, and he will tell you how to get one free. Ever hear of Purina?

Henry Gick did a fade-out one day last week when his wife called and informed him that water was running through the ceiling plaster. Hank's a full-fledge plumber now.

We found out why Gilbert Rose, the stockkeeper in Bldg. 19-3, comes in so early in the morning, when he said, "It's a lot colder out in the ccuntry than it is in Fort Wayne." So Gilbert must come to town to get warm.

Borings From 4-4 Office

With all the beautiful spring rains, we are all certain that the loveliest of all seasons, spring, is just around the corner. If I can just find that corner, I'll go and hide to do my romanticising. Ah, Spring, Oh beautiful spring. The first of the month, our creditors sends the bill, however, Betty Moughin has a different kind of creditor and comes out with a steady Bill. . . . Clayton Culver made the remark the other day that Eddie Cantor Mike O'Grady is going around the house opening all the blinds to let a little Son in. Mike gets up every morning at 4 to give the baby his breakfast. You should hear him rave about his little hand full. . . . Mike Brayer is hanging his head in shame 'cause his beloved Alma Mater Purdue let him down and lost to good old I. U. Now that's my school. . . . Say did I tell you that our jumping jiver, Virginia Plummer is giving instructions on how to lose friends and alienate people. Now if she would walk up to you and comment on your big feet with that power she has, just think nothing of it. Mary Hakes has been seen around town with the Rat. That's me, folks, and she also is sorta two-timing me for one of the messenger boys that comes into our office every 15 minutes. . . . Lisle Hodell must have been homesick for good old Bldg. 4-4 Office. He returned Monday (to start a week right) to visit our happy family. He greeted every one with his ever cheery smile. . . . This is the first week of Lent with all good resolutions to give us the one or two things we like the best. So far the only thing I have missed is my cheese. Charlene Snyder seems to be doing alright with herself by giving up the thing she likes the best. . . . Virginia Sanders, Evelyn Meyers, and Mary Hakes are all elated that their high school won this last week-end. But, as Bob Spitler might have said, if North Side had lost, my wouldn't they have long faces. Well, good luck, North Side. . . . Mary Hile is going to have a party soon 'cause her home has recently been redecorated. Now I am looking forward to a party over there. Sounds good, eh what? 'Tis just about enough for now and remember folks if you need any instructions on how to lose friends and alienate people, just visit Virginia Plummer, and perhaps Doris Roe could help too, because she is an authority now, too. Sincerely as ever,

Elmer, the Field Mouse,
The Rat to You!

Bertha Gruber and Carrie Green, Bldg. 26-2, should get together on wearing new styles. Carrie found that a cleaning process had made her dress so tight she simply couldn't bend, and Bertha, returning from a social event, discovered she had been wearing her hat backwards.

Lawrence Schuster, Bldg. 26-2, sure had his neck on a pivot at the basketball games. What good did it do him to win ten candy bars on the first Central game only to lose it on the second when North Side showed 'em what's what?

Virginia McCormick, Bldg. 16-3, has this button business down to a science now. Just spend one half hour looking for the button before leaving the house and it will save you an hours time necessary to return home and then hunt for the button. Too bad they quite passing out numbers.

Slips And Chips

By Sir Vis, 4-4

Out of the north (near Hurshtown) comes Enoch (Lochinvar) Hursh. He alights at the winding section and begins to tell the girls of his accomplishments. 'Twas just the other noon I saw young Lochi busily explaining the manufacture and uses of scotch tape.

Have you noticed that look of satisfaction in Walter Buesking's face since his wife has returned home from the hospital. We all wish Mrs. Buesking a steady and complete recovery.

Leo, the Blair, is shopping around for a new car. It seems that no one wants the overdrive, at least bad enough to pay for it. Have you told them how much gasoline it will save, Leo? If you haven't, try it and maybe someone will buy it.

Don Otermat is really a good euchre player (if he gets the right trump). This is what he tells anyway. But for some reason or other the turned trump is always the wrong color. If he makes the trump, he doesn't have enough trump in his hand. Don prefers red trump, but he never has red cards in his hand. I believe the red color fascinates him.

Joseph (Joe) Matis is ready and willing to make a wager that Bldg. 4-4 has the best looking girls of any floor at the Fort Wayne Works. For further details, see Joe.

While driving down Fairfield last Saturday P.M. I saw Arthur (Breezy) Stoll hovered up to a telegraph pole. This week I learned that Mrs. Stoll was waiting on Broadway while Breezy was waiting for her on Fairfield. It is very doubtful if we ever find out when they met.

Hermy Tigges was creeping across an intersection last Saturday morning and some one bopped him. Frosted windshields, etc., are good alibis, however, we mustn't rely too much on them.

Our department is really looking up now. The new tool box stands, bench tops and a little rearrangement surely helps the appearance. If we don't become too busy to keep it clean and in order.

Deaths

James R. Raby

James R. Raby, an employee of the Company for the past twenty-three years passed away on Wednesday night, February 26, after suffering a heart attack. He had been ill since the preceeding Friday prior to which time he worked as a stock clerk in Bldg. 19-2. Mrs. Raby and her daughters wish to thank Jim's many friends for the kindness shown them in their bereavement.

The employees of Bldg. 4-6 wish to extend their sympathy to Vivian Bond in the death of her mother.

Diedrich Muhlenbruck, age 76, who retired on pension in 1922 after 34 years of service with the Company as a machinist, died last week at the Lutheran Hospital following a short illness.

Just mention South Side to Ruth Phillips, Bldg. 26-2, then run.

Bldg. 4-4

We advise the girls to read up in your cook books as Paul is looking for a good cook. He thinks that the high death rate is due to poor cooking so he isn't going to run any risk.

We suggest giving Zella her Works News five minutes early so she can see if her name is in it. Then she can put her coat on and go home with the rest.

We wonder if Lulu Kline is getting old or if it was due to trying out her little niece's new jumping rope.

Could any one tell what Wilbur Pohler was doing with a lady's apron on?

Was Maxine trying to play an ostrich that she was seen standing on her head in the street Saturday night or was it that her shoe came untied.

Thisa And Thata 19-5

We are all thinking of backing Margaret Bennett as a "Golden Glove" entry next year. She swings a mighty left. . . . We are glad to see Edith Schriener back on the job, and we wish a speedy recovery to all the rest who are ill. . . . Congratulations to Doris Tobias Anderburg, formerly of White Armature.

The talk of Bldg. 12-3 these days is Evelyn Reiling's mail order romance. Evelyn's particular form of doodling is scribbling her name on scraps of paper. Evidently one of these scraps found its way into an order of dials for a Chicago firm. At any rate Evelyn's face turned a gorgeous pink a few days later when her morning's mail contained a letter from a gentleman connected with the Chicago firm requesting, it is reported, her picture and a date.

Dillon Kable, Bldg. 19-5, has a very smart youngster. When Dillon arrived home after having all his teeth extracted the boy piped up, "Daddy, I know a man that looks just like you," and proceeded to dig up a picture of Popeye. As an afterthought Dillon Junior added "but this man can hold a pipe in his mouth." Come on, Dillon, don't let the boy down, even if it hurts.

The wire gang of Bldgs. 8 and 2 wish A. Beck and C. Crowe smooth sailing and happy voyage on the matrimonial seas. Both received very useful presents from their coworkers.

Walter Larimore, Bldg. 19-5, isn't what you would call a boastful man but he did crow that he never did forget his button. He reached into his pocket and—no button. A hasty search around the floor, and a hurried back-track but still no button. Just as Walter's pals were assuring him that he would have to stay inside the works or he couldn't get back he found the button in the same pocket he had searched before.

Anyone interested in the story about the missing pajamas, please see Ray Kierspe. He would like to tell you the story before someone else gets a chance to distort it beyond recognition.

There is one man at Winter Street who is really thoughtful when he brings in the cigars. Of course he has only done it once, and just this week. Maurice Allen brought a variety of smokes so the smokers could have their choice on the occasion of the arrival of a seven pound baby girl named Barbara Jean. Needless to say Maurice was fairly walking around on smoke clouds.

M. B. A. PATIENTS

General Purpose Motor—Vandetta LaGrand, 1410 Eckart Street; Daniel Johnson, 717 Riverside Avenue; Harold Barbour, Lutheran Hospital; Mary Brown, 2141 Weisser Park Avenue; Mildred Ballert, Huntertown, Ind.; Joe Oliver, R. No. 4, city; Bernice Stohlmann, Lutheran Hospital; Fred Snyder, 1426 Fletcher Avenue.

Tool Dept.—Kenneth Doell, 1814 East Wayne Street; Carl Shidler, 4416 Arlington Avenue.

Transformer Dept. — Lorine Deicke, 2733 Indiana Avenue; Elizabeth Louis, 536 West Lewis Street; Darrell Zuber, 4023 Piqua Avenue.

Series and Specialty—Bess Martin, 916½ Lincoln Avenue; Lawrence Duke, Hudson, Ind.

Winter Street—August Eisenacher, 1306 West Branning Avenue; Glen Castle, 1024 Rivermet Avenue; H. F. Bennigin, 117 East Suttenfield Street; Ross Hindman, R. No. 4, city.

Apparatus—Evelyn Caston, 3008 South Webster Street; Glen Moody, St. Joe Hospital; Arnold Blomberg, 447 West DeWald Street.

General Service—Joe Fox, 311 West Superior Street; Clarence Amones, St. Joe Hospital; Harold Roche, 921 Sherman Street; Jo Miles, St. Joe Hospital.

Left the Hospital—Neva DeWitt, Pauline Baumgartner, Catherine Keller, Esta Griner.

Returned to Work—James May, Ben Wiley, Mirvil Cramfill, Levi Filler, Lillian Voirol, Dale Weaver, Charles Adams, Helen Wilson, Carl Brayles, Andrew Schuler, Ray Reddman, Francis Magers, John Howard, Max Shaw, Lucile Pence, Ann Thompson, Fred Vogt, Georgia Dennis, Ethel Klopfenstein, Willodean Mitchell, Robert Babcock, George Christman, Edith Schreiner.

Dear Oh Dear

As the house cleaning season approaches, Ruth Fuller, Bldg. 4-3, decided to get a head start, and tear all the paper off of her kitchen ready to paint it. After removing the paper, several cracks in the plaster showed up, and a man was called in to patch it up. After he examined the plaster closely it was found that the type of plaster Ruth had could not be painted. So off came the plaster. Ruth says at least she didn't have the plaster and paper mess to clean up all at once.

We will have to hand Ted Mullins, Bldg. 4-3, the big red apple for having available at all times an ample supply of tools whether it be at home or in the shop.

At last the mystery has been solved as to what Gerald Gehl, Bldg. 4-3, did with his straw suit case. He told us confidentially that at the time he came to town 18 years ago in his Model T Ford he deposited said suit case in the St. Marys river at the end of Broadway. Nice doing, Gerald.

Kate Shafer, Bldg. 4-3, likes to walk up and down stairs so well that she lets her automobile lights on so she can go back down to the parking lot and turn them off.

Marjorie Degitz, Bldg. 12-B, has found a new use for her badge. It may make a nice safety pin, but what do you do when the watchman asks to see it?

The Hagemann homestead has a new cook and bottle washer, as Lois' burnt finger will prove. It could be worse, what if she had burned the water!

Your Identification Badge Vouches For You — Wear It

Small Motor Factory Is Slated For Title In Basketball League

With the second half leadership of the G-E Club Inter-department Basketball League at stake Small Motor Factory and Main Office tangled in a hair-raising thriller that necessitated the playing of a three-minute overtime period before the Factory was able to annex a 36-35 win.

As has been stated this was a crucial game for both clubs as each had a clean slate of three victories and the winner of this contest was practically a cinch to remain undefeated for the rest of the half, consequently both quintets battled with everything they had.

Main Office drew first blood when Dorsa Kreig, their brilliant center and the most outstanding player on the floor, tossed in a pivot shot. O'Brien's long shot plus two more close-in shots by Kreig gave the Main Office a 9 to 8 first quarter lead. The Office continued to press their advantage and with Kent, flashy forward, taking up most of the scoring burden, finished the first half with a 14 to 11 lead.

Main Office continued to be without doubt the best team on the floor during the third stanza. They grabbed rebounds away from their taller opponents, stole passes and tallied 13 more points while holding the Factory to 9 and consequently enjoyed at the termination of the third stanza a seven point lead.

Sensing that their championship hopes were slowly but surely being dimmed, Small Motor Factory staged a counter attack that was not to be denied. Main Office attempted to play a possession game but the Factory managed to steal the ball and with Hanley counting on three sensational baskets, Voirol garnering two and Marquette getting one Small Motors with only twenty seconds to go established a one point lead. At this point Schneiders, Main Office forward, was fouled and with plenty of pressure on still managed to convert the charity toss and throw the game into an overtime. Main Office took the lead in the extra stanza as troublesome Kreig canned a field goal but Voirol tied the count with a pivot shot. Immel gave his club a one point advantage on a foul shot but big "Jap" Voirol came through again with a short toss to give his team a one point margin of victory.

Showing no sympathy at all for their fellow students, Apprentice A, by running up a big advantage in the first two periods, chalked up a 34 to 25 triumph over the Apprentice B. The A's were not only warm offensively in the first half but also defensively as they limited their opponents to only nine points. Things were reversed during the remainder of the game as the B's outscored the A's 16 to 9 but the first half margin was too great. Lowden paced the Apprentice A scoring with 14 points while Rohlfing was high as usual for the B's with 9.

Running into some surprisingly stubborn opposition West Side, first half champions, had to battle with everything they had to conquer the Squares, league cellar occupants, 43 to 36. West Side, never at any time of the contest, enjoyed a very substantial lead as the Squares with Hans, Neidhart and McNamara pouring in the buckets remained right on their heels. With the exception of two players the Squares' tight defense managed to keep the West Side point getters in check but Yoder's 12 points plus Golden's 15 kept West Side ahead and eventually earned them the victory.

Locals To Meet Huntington Cagers

Front row, left to right—Burneau, Byrd, Williams, Johnson. Second row, left to right—Tuggle, Shively, Keplinger, manager, B. Williams, Davis.

From the looks of the record and roster of the South Side Furniture team depicted above the G-E Industrials are headed for plenty of trouble when they tangle with this Huntington club Wednesday, March 12.

Out of the thirty-six games played so far this year South Side has won thirty-one and dropped five. They are champions of the County Wide League in Huntington, won two out of their three games with Zollner Pistons and this same group of boys also copped the strong Markle Tourney last year.

All of these lads played on their various high school teams, two or three of them played in college and all have had several years of Independent experience. They have played together for the last three years and this in itself gives them a decided advantage.

To cope with this powerhouse Coach Mert Edgar is expected to start the same lads who were instrumental in defeating Essex Wire in the fore part of the week namely Weigand, Marquette, Hanley, Vonderhaar and Voirol.

This game will start at 8:30 o'clock with a preliminary matching Coesse against West Side scheduled for an hour earlier.

The games are free and anyone may attend whether a G-E Club member or not.

FREE CLUB MOVIES

A free motion picture program will be presented at the G-E Club on Sunday, March 9. The feature picture is "Cipher Bureau," and the programs will start at 2 and 4 o'clock. Admission by presentation of membership cards.

Play-Off Scheduled In Volleyball League

Six of the eight members of the G-E Club Inter-department Volleyball League packed their gym clothes in moth balls last week but Winter Street and Small Motor Production by clean sweeping their last series over Apprentice and Main Office, respectively, must meet each other in a play-off match for the second half title.

Winter Street has already won the first half crown and need only annex this play-off to become the undisputed champions.

Small Motor Production continues to improve with every game and their last ones were no exceptions. Main Office has been a thorn in everyone's side during the entire season but was no trouble to Production as the scores of 15-4, 15-6, 15-5 indicates.

Needing to win all three of their games with Apprentice to remain in the first place deadlock Winter Street really turned on the heat to triumph by the counts of 15-0, 15-3, 15-11. Displaying their usual alertness and well balanced attack the Refrigeration lads looked as tough as ever.

Scores of the other two matches are as follows: Small Motor Standards, 15-15-15; Small Motor Drafting, 5-4-10; Small Motor Factory, 15-15-15; Apparatus-Transformer, 9-3-13.

Final second half standings:

	W.	L.
Winter Street	17	4
Small Motor Production	17	4
Small Motor Standards	16	5
Small Motor Factory	12	9
Main Office	10	11
Apparatus-Transformer	9	12
Apprentice	3	18
Small Motor Drafting	3	18

YOU HAVE ONLY ONE BODY IF YOU LOSE PART OF IT IT'S GONE FOR GOOD!
THAT'S WHY WE URGE SAFETY FIRST

IN THE ROUGH

By WALTER SUNIER

Last week we remarked that it would be something if we could get H. E. Stephens, Bldg. 4-2, to trip the fairways. We were immediately tripped by a challenge from Steve. Steve must be a good production man to be so quick on the draw. That is one of the quickest replies we ever received from a production man. He pugnasticates — "I read with interest your little—very little ditty in your very interesting Walter "Winchell" Sunier column and feeling that such a challenge should not go unchallenged, I hereby do challenge you to a free-for-all (no holds barred) golf match (will spot you +.000 —.000) to be held at Crooked Lake golf course during annual fun fest to be held some time during the first part of June at the writer's dugout on Big Cedar Lake. For your information, I have appointed W. N. Wehrs as my second in order to be sure that only fair methods will be used by my worthy opponent."

This has turned into a serious matter. In the first place, the limits on the spots he gives are very close. If Wehrs can work to limits like that he is directly in line for the job of vice-president in charge of manufacturing. However, the limits sound more like they were set by some engineer. With the production, manufacturing and engineering departments ganging up, what chance would anyone have? We give up right now unless we can draw a good second from the only remaining group, the commercial department. With a good salesman to draw up a good list of + 1's and +2's and something to take care of the 09's, we might stand some chance of surviving the ordeal.

What The Rod-Gun Club Offers Members

By A. F. Bowers

What does the club offer sportsmen?

Briefly, free copies of Outdoor Indiana, instruction in new game laws, through affiliation with the Allen County Conservation Council, indoor and outdoor rifle and pistol ranges and help in buying sporting goods.

Who may join?

Any employee of the General Electric Company or an immediate member of his or her family who is over 18 and an American citizen.

What are the dues?

One dollar per year per member.

Is the club affiliated with the National Rifle Association?

The club's original charter was issued June 13, 1940, and has been reinstated for 1941.

How does the N. R. A. charter benefit each member?

This affiliation chiefly helps members interested in shooting, and enables each shooter to compete for awards for proficiency in marksmanship and makes all competition in shooting eligible to entry in N. R. A. contests.

How does the N. R. A. benefit the club as a unit?

GENERAL ELECTRIC
NEWS
FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, MARCH 14, 1941 Number 56

RECEIVED
MAR 14 1941
PUBLIC LIBRARY
FORT WAYNE & ALLEN CO., IND.

Average Annual Earnings Set Mark

Highest In History Of Company In 1940

Total Earnings During Year Increase Twenty-Eight Percent. Employment Reaches 88,600 At Close of Year

Average annual earnings per General Electric employee amounted to $2,011 for 1940, compared with $1,913 for 1939, and were the highest in the history of the Company, President Charles E. Wilson announced today.

At the beginning of 1940 there were approximately 70,000 employees on the General Electric Company's payroll, exclusive of the number employed by its affiliated companies. As the volume of orders expanded, employment was increased, so that at the close of the year the employees numbered 88,600. The average number employed during 1940 was 76,314 compared with 62,797 during 1939, and total earnings of employees amounted to $153,497,000 compared with $120,130,000 for the previous year, an increase of 28 per cent. This increase was due to the addition of more employees, to increases in rates, and to longer working schedules, some departments having operated on two shifts for a considerable portion of the year, while others operated on three shifts.

Taunton Plant To Be Reopened For Plastic Operation

General Electric Increases Its Plastic Factories To Five

Further expansion of General Electric's facilities for the manufacture of plastic molded parts has necessitated the reopening and renovation of its former motor plant in Taunton, Mass. The plant will be one of the largest of its kind in the country and increases the number of General Electric plastics plants to five. It is expected that the new factory will be in operation by July 1.

(Continued on Page 4)

The Start Of The Contest . . . .

Ten Elex girls entered the Club's quiz last Monday evening and tried for fame and fortune by locating various localities, giving the names of birds, beasts and flowers and in fact giving any information that Bob Wilson of the local broadcasting station sought for. The contestants ready for the first round are, left to right: Merle Kirkpatrick, Margaret Lindsey, Eileen Morris, Dorothy Swank, Catherine Salmon, Angela Filus, Evangeline Robinson, Joyce Harwood, and Edith Mennewisch. Bonnie Hart unfortunately does not show in the picture.

Record Membership For Quarter Century Club

One Hundred And Eighty-Two Employees Will Complete Twenty-Five Years Of Service During Present Year

With one hundred and eighty-two employees eligible to membership in the Fort Wayne Works Chapter of the General Electric Quarter Century Club during 1941 this organization will attain the largest membership in its history during the coming year. Sixteen members who became eligible this month are pictured on page 3 of this issue.

Employees who are eligible during the balance of 1941 to become members of this unique organization are:

Martin W. Heider, Roland T. Fawcett, Gladys R. McMillan, S. Larue Cunningham, J. H. Breidenstein, Kenneth E. Thompson, Ella J. Grote, Catherine F. Wise, Joseph E. Laisure, Aloysius A. Fox, Paul A. Peterson, Alma Witte, Ross A. VanHorn, Martin F. Einsiedel, Lisle D. Hodell, Karl F. Stahl, Herbert C. Scherer.

Hugh M. Stephenson, Albert H. Hormann, Christ H. Thiele, Claire M. Voirol, Paul E. Bohn, Ralph Valentine, William H. Miller, William F. Knuth, Golda M. Mentzer, Harry M. Seitz, Edward W. Bailey, Paul J. Johnson, John F. Houck, Elmer J. Wagner, John S. Sowers, Albert Berger, Daniel C. Johnson, Harley J. Beery, Fred H. Schultz, Vern L. Gratts, Charles C. Langston, Bernard C. Weber, Orval J. Stanton, Harry L. Feaser, Dorsey W. Merchant, Clarence N. Hatfield, Elmer L. Warner, Leland P. Larenitis, James J. Valentine, Clarence A. Brenner.

Charles H. Koomjohn, Charles M. Spencer, Tillmon H. Gehrig,

(Continued on Page 4)

First Aid Classes Start Next Week

Classes in First Aid will meet for organization next week, as follows:

First shift men and women will meet in Room B, Bldg. 16-3, at 7:00 P.M., Wednesday, March 19.

Second and third shift women report to Room B, Bldg. 16-3, at 1:00 P.M. Wednesday, March 19.

Second and third shift men report to Room B, Bldg. 16-3, at 1:00 P.M. Thursday, March 20.

All employees who have sent in their applications, and any others who are interested in First Aid but who have not sent in applications, should report to one of the above classes. These meetings will be for organization, and times and dates for regular class work will be determined to suit the convenience of employees. We can accommodate all who wish to report for these organization meetings. Come and bring a friend and learn what it is all about!

H. W. GARTON, M.D.

ISSUE ANNUAL REPORT

Copies of the annual report to stockholders will be distributed with each Works News on Friday, March 21. This is the first time in Company history that this report has been available to all employees. It will be accompanied by a letter from Charles E. Wilson, president of the Company, pointing out some of the items of particular interest to employees. All employees are urged to watch for their copy when the Works News is distributed through the usual channels next week.

Fort Wayne Motors In Detroit Exhibit

The new Tri-Clad polyphase induction motor will be featured in the General Electric display at the Machine and Tool Progress Exhibition to be held in Detroit, March 25-29. Motors in three frame sizes will be shown, including a cutaway model.

Also of particular interest will be the display of a new line of fractional-horsepower motors developed especially for machine tool applications and manufactured at the Fort Wayne Works.

Another feature will be an operating display of the new speed variator, an all-electric adjustable-speed drive that operates from alternating-current supply.

A plugging switch, recently announced by General Electric, will be installed on one of the Tri-Clad mo-

(Continued on Page 4)

And The Finish . . . .

The winners of the Elex Quiz are pictured with Bob Wilson. They are left to right: Edith Mennewisch, Evangeline Klingman and Merle Kirkpatrick. All three of the girls had their answers ready and finally forced Mr. Wilson to declare the contest a three-way tie.

• The Good Old Days

Rarely does a new industry entirely displace an old one. Progress always absorbs more than it rejects, although history records that there have always been objectors to the latest machine, the newest device to free human beings from drudgery.

It has always been so. Consider the arrival of the stage coach. A book appeared in England in 1673 in which it was stated that stage coaches were among the greatest evils that beset the kingdom, that traveling by coach would destroy the breed of horses, make men careless of good horsemanship, hinder the trade of watermen and seamen and interfere with public resources. Also that those accustomed to travel in coaches became weary and listless when they rode a few miles and were unwilling to get on horseback, "not being able to endure frost, rain, or snow, or to lodge in the fields"; that to save their clothing and keep themselves dry and clean people contracted an idle habit of body by riding in coaches, and this was ruinous to trade.

To show the gigantic nature of the evil, it was stated that between London and the three principal towns of York, Chester, and Exeter, no fewer than eighteen persons traveled weekly, and a like number back, "which come in the whole to eighteen hundred and seventy-two in the year"! The coaches ran three times a week, making the journey in five days.

When the locomotive came there was a loud complaint "because hundreds of stage coach drivers would be put out of work". It is true some were put out of work temporarily, but for the hundreds that were, hundreds of thousands of railroad workers, better paid, took their place.

If America would have been satisfied with "the good old days" there would have been no automobiles, no radios, few of the "good things in life" now in general use.

• Use Your Imagination, Too

Doing things a certain way is necessary in the mass production methods of today. But that doesn't mean that these certain ways cannot be changed and that our minds must be closed to other ways of doing them. Cheaper and better ways can be found to do practically everything we do here. For that reason it is wise to be on the lookout for them.

A good way is to question ourselves as we go about our work. Is this the quickest way to do this? Is there a better way—one that will improve the product? Is this tool the best tool to use for this purpose? If we make our imagination work when our hands do, we'll find those better ways.

When you awaken some morning and hear that somebody or other has been discovered—you can put it down as a fact that he discovered himself years ago—since which time he has been working, toiling and striving to make himself worthy of general discovery.

—James Whitcomb Riley.

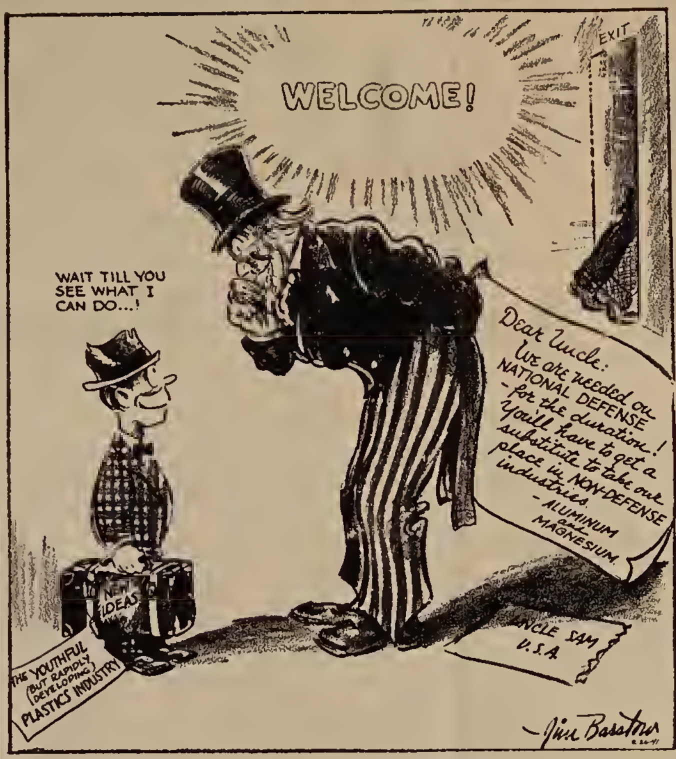
• Rumors Of Ruin

Rumors have proven a most effective weapon of dictators. Countries, weakened by such falsehoods, have been "taken over" without firing a gun.

Rumors destroy a peoples' confidence in their government and, at the same time, disrupt industrial production vital to the welfare and defense of that nation.

We, in America, are determined to defend our way of life. To succeed, our confidence in ourselves, our company, and our country must not be undermined by baseless rumors!

AND JUST IN TIME, TOO.



WELCOME!

Dr. Langmuir Receives Patent For New Method Of Detecting Viruses, Toxins And Poisons

A new method of detecting viruses, toxins, poisons, and other tiny and invisible substances suspected present in liquids is disclosed in a patent issued to Dr. Irving Langmuir of the General Electric Research Laboratory.

Dr. Irving Langmuir

The procedure, Dr. Langmuir explains, may prove useful in the study and control of biological reactions involved in the diagnosis and treatment of disease. Considerable work remains to be done and conclusions must be verified before use of the method can be applied to the study of any particular disease.

The method provides for the immersion of a conditioned slide in a liquid containing the suspected virus, toxin, or poison, and for the measurement by optical methods of the film, usually less than a millionth of an inch thick, that adheres to the slide.

The preparation of the conditioned slide is mechanically simple.

Stearic acid, a fatty acid, is spread on the clean surface of a dilute solution of barium chloride in water in a tank. A chemical reaction causes positive ions of the barium chloride to unite with the negative carboxyl group of the stearic acid to form barium stearate, an insoluble soap, on the liquid surface.

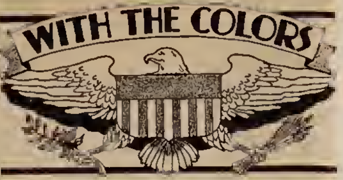
A clean slide is dipped repeatedly into the tank until 47 layers of the transparent barium stearate, each 1/10,000,000 of an inch thick, have been applied smoothly to the slide. The slide then is dipped into a one per cent solution of thorium nitrate.

This procedure constitutes the conditioning process which makes it possible to apply to the slide a substance that has a specific reaction toward the particular toxin, virus, poison, or other substance for which the test is to be made.

If the suspected substance is present in the solution tested, adsorption of a single layer of uniformly thick atoms or molecules of the substance will take place on the slide surface, producing an increase in film thickness and a corresponding change in color.

It is known that thin films of a transparent material, such as barium stearate, reflect iridescent colors, the color of a film being dependent upon its thickness. A film which has a thickness of 47/10,000,000 of an inch reflects a purple color when illuminated by white light. If the film is made slightly thicker, the color changes toward blue. Therefore changes in thickness can be measured by observing changes in color. In actual practice, the films commonly are illuminated by sodium light and the changes in intensity of the yellow sodium light are measured.

Each type of substance in solution is expected to produce a characteristic increase in film thickness and corresponding change in color of the conditioned slide. Once these characteristic thicknesses and colors for known substances have been determined, identification of suspected substances will be a matter of check and comparison.



WITH THE COLORS

The following employees have entered the military service of the United States nnder the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

DAVID C. HANSON, production supervisor in the aircraft division. First lieutenant, C.A. (A.A.) Air Corp at Chanute Field, Rantoul, Illinois. Residence, 2301 Westbrook Drive, Fort Wayne.

Bertha Lange Retires After Long Service

Bertha W. Lange, 3813 South Wayne Avenue, has retired on pension following completion of almost twenty-four years of service. Miss Lange was first employed on November 29, 1916, and assigned to work in A. L. Foellinger's department in Bldg. 4-5. She continued in fractional horsepower motor work throughout her period of service during the latter years working in Bldg. 17-2.

Expressions of friendship are extended to Miss Lange, who is confined to her home by illness, by her many acquaintances throughout the Works.

G-E To Exhibit At National Oil Burner Progress Exhibition

Electrical accessories for domestic oil burners will be exhibited by General Electric at the National Oil Burner Progress Exhibition to be held March 17-22 in Convention Hall, Philadelphia. Included in the display will be several fractional horsepower motors of the type used in domestic oil burners, and a diversified line of ignition transformers demonstrating a variety of mounting arrangements, styles of high voltage terminals, and low voltage connections.

The physical toughness of Formex wire insulation as compared to ordinary enameled wire will be demonstrated at the exhibit. This wire (now used in G-E oil burner motors) will be subjected to a "repeated scrape test" conducted with the use of a new portable instrument which acts as a mechanical "finger nail" to wear through the insulation to the metal underneath. Abrasion tests have shown Formex to be superior to conventional enameled magnet wire in the ratio of at least three to one. It will also resist much greater elongation without cracking of the insulation film.

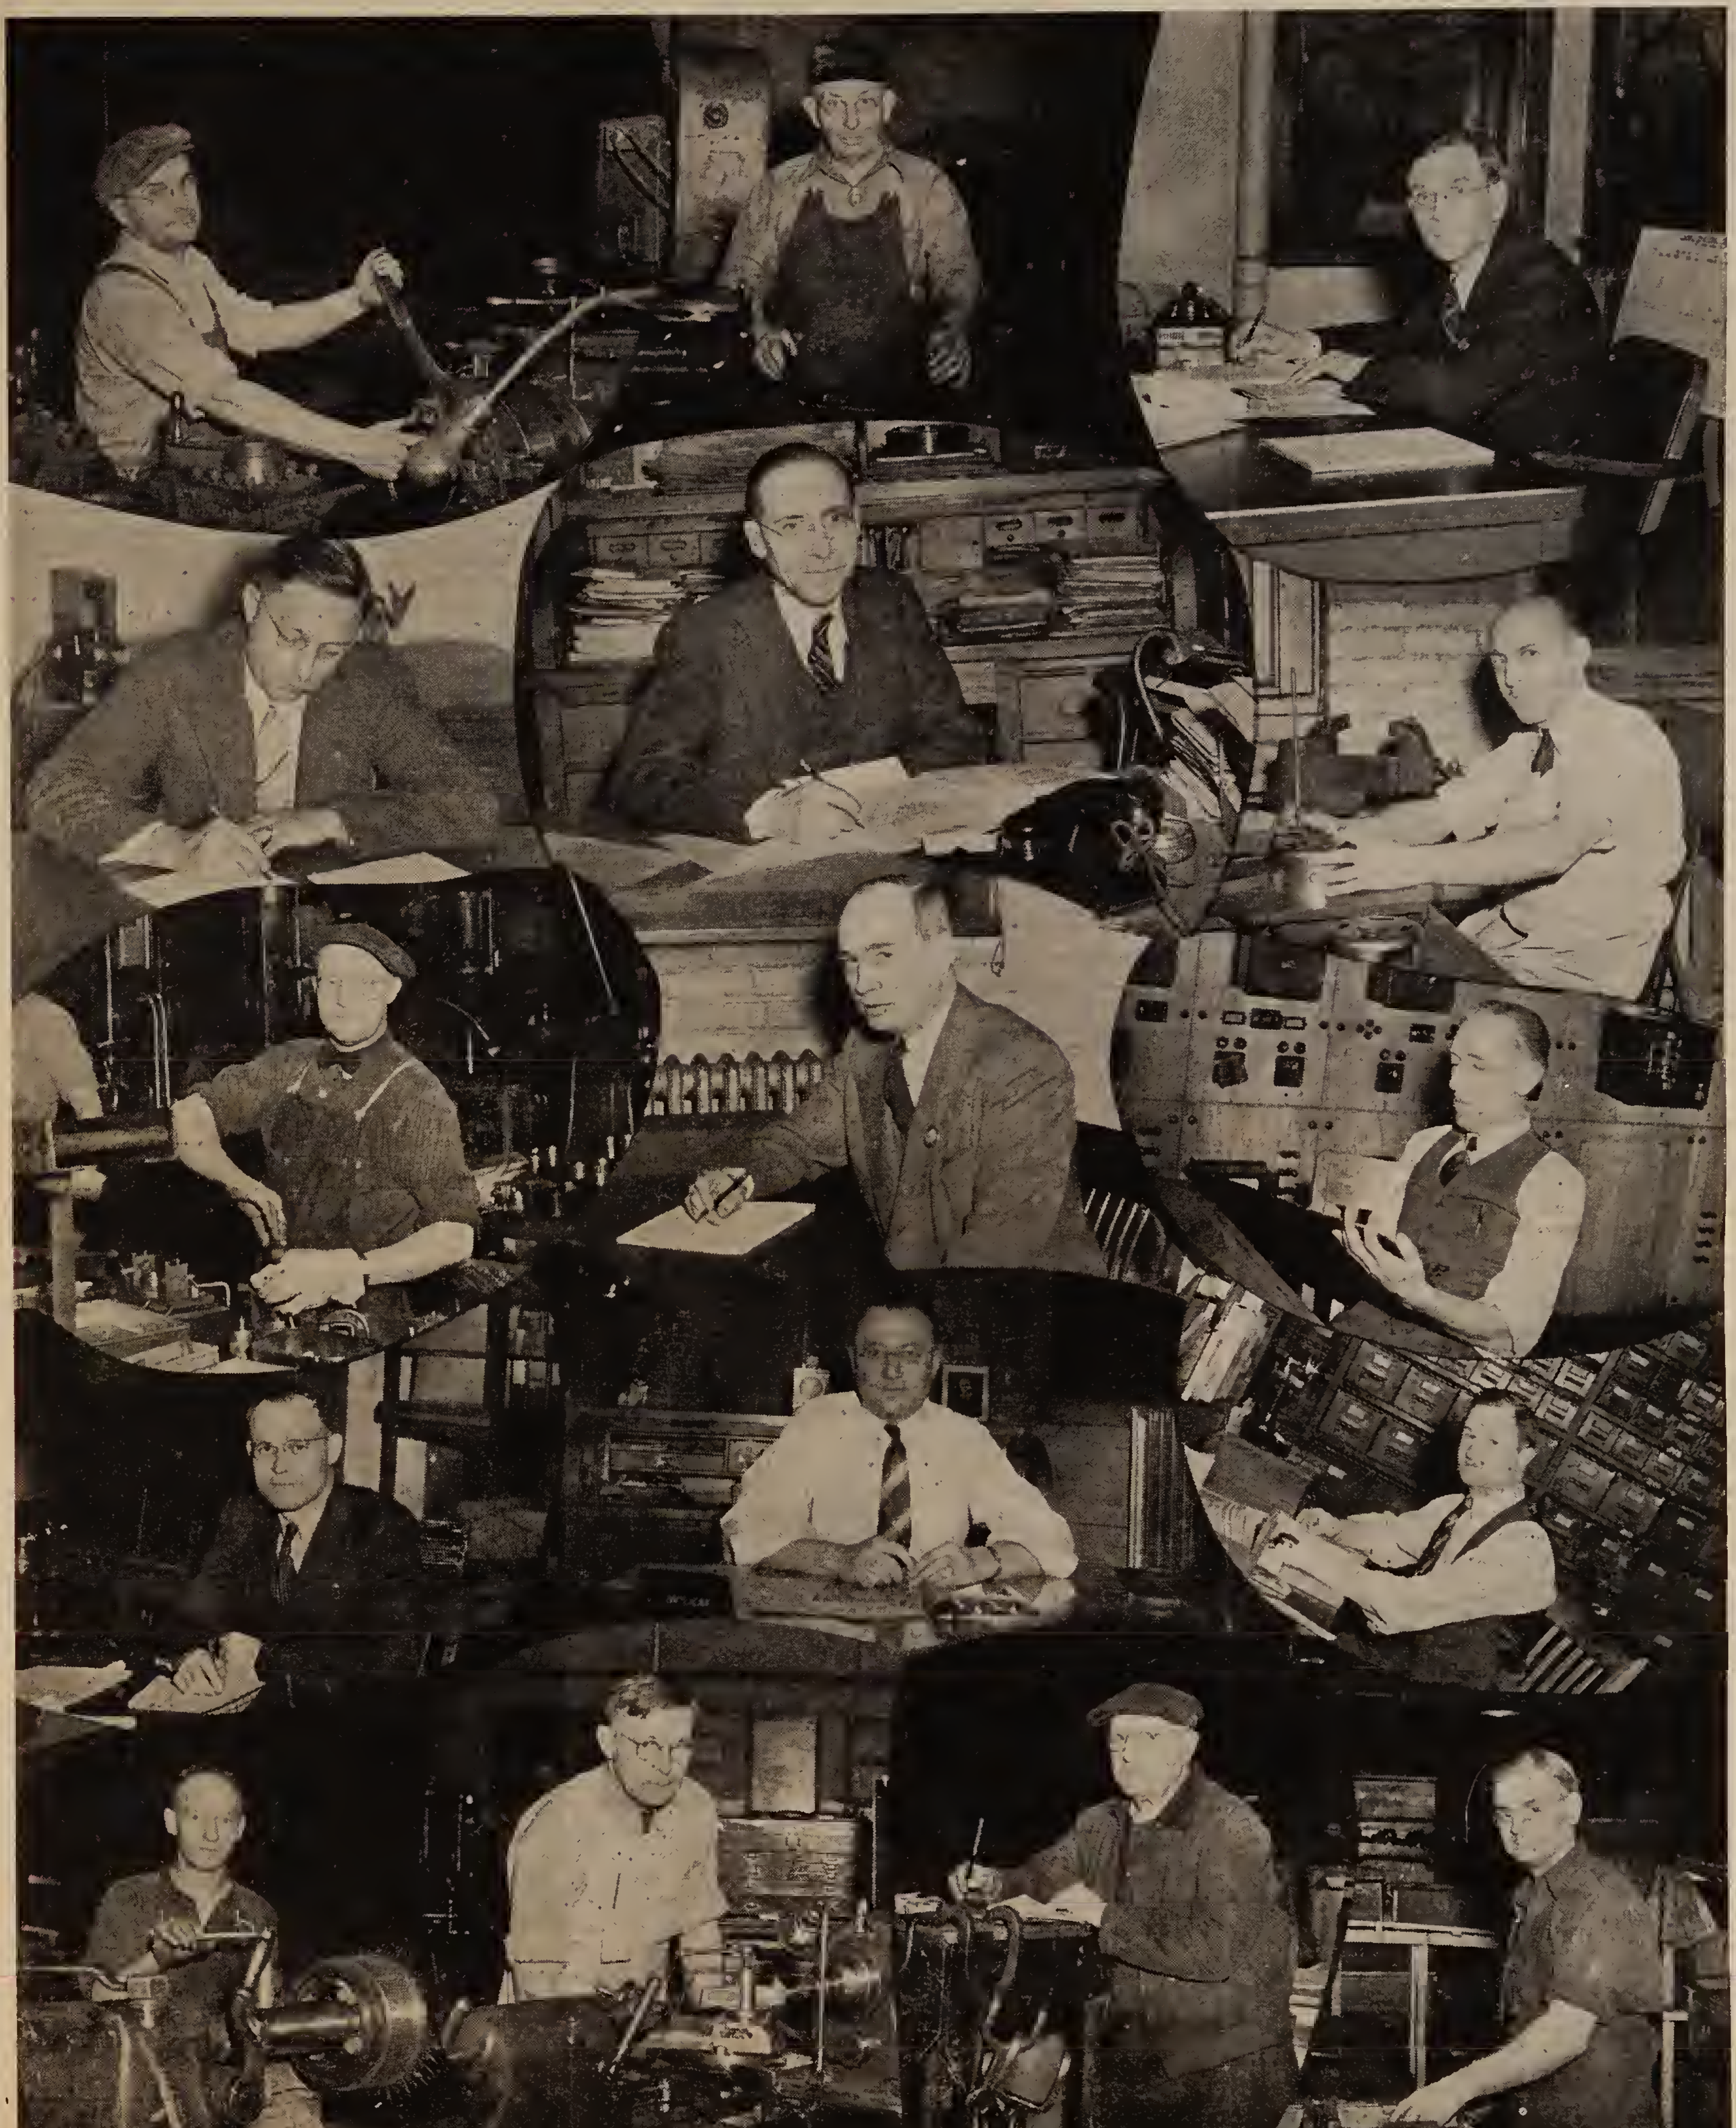
Among General Electric representatives at the Exhibition will be C. K. West, W. J. Dorworth, H. J. Miller, J. A. Herr, and J. W. Sholder, of Philadelphia; and D. L. Roloff and M. O. Marsh, Fort Wayne, Ind.

Dr. Katharine B. Blodgett and Vincent J. Schaefer of the Research Laboratory staff have assisted Dr. Langmuir in the investigations which started in 1935.

Dr. Langmuir is president-elect of the American Association for the Advancement of Science. He holds 67 patents and was awarded the Nobel Prize in Chemistry in 1932.

Make Certain Before Leaving Home That You Have Your Badge

New Members Of The General Electric Quarter Century Club



Top row, left to right—Walter O. Schelper, Bldg. 4-3; William L. Yates, Bldg. 4-B, and Carl R. Olson, Bldg. 18-1. Second row—Ray F. Leitz, Decatur; Ray E. Pumphrey, Bldg. 19-3, and Edwin J. Schneider, Bldg. 17-4. Third row—Louis C. Schuer, Bldg. 19-4; Alvin Konow, Bldg. 4-6 and Wm. C. VerBryck, Bldg. 9. Fourth row—Wm. L. O'Brien, Bldg. 4-5; J. C. Grosjean, Bldg. 6-3, and Frank Laier, Bldg. 19-4. Bottom row—Homer M. Hibler, Bldg. 19-2; Carl J. Schone, Bldg. 26-5; Henry Bradmiller, Bldg. 6-1, and Glenn Fortney, Bldg. 4-4.

Vets' Banquet To Be Held At Moose Hall April 19

Members of the G-E World War Veterans banquet committee are pictured above. They are, left to right: Andy Lee, Bldg. 4-5; Bill Walt, Bldg. 4-B; Ed Yahne, G-E Club and John Vachon, Bldg. 4-2.

Announcement is made by the banquet committee of the G-E World War Veterans Association that the annual banquet will be held on Saturday evening, April 19 at the Moose Hall. The committee reports an innovation will be the serving of the meal in family style with plenty of "seconds". A program of professional entertainment will follow the meal, details of which will be announced later.

A short business session for the election of officers will be held during the evening. The nominating committee includes Ed Ehrman, Winter Street; Jim James, Bldg. 4-3; Alva Powell, Bldg. 19-4 and R. Kaiser, Bldg. 10-1.

Taunton Plant

(Continued from Page 1)

Officials said that the expansion of their Plastics Department facilities has resulted from the tremendous requirements for plastics in the U. S. defense program, the consequent replacement of nonferrous metals with plastics, and the natural growth of the plastics industry.

In the Taunton plant General Electric will install 300 molding presses of the compression type, which will give them more than half the capacity they now have at their main factory at 1 Plastics Avenue, Pittsfield, Mass., the largest plastics molding plant in the United States. Approximately 400 persons will be employed.

The Taunton plant, formerly used for the manufacture of induction motors and idle since 1920, comprises 88,000 square feet of floor space. It is a one-story structure, ideally suited for plastics manufacture.

In addition to its Pittsfield plant, the General Electric Plastics Department also operates factories in Lynn, Mass.; Meriden, Conn.; and Fort Wayne. They are engaged in all types of molding and laminating manufacturing operations and conduct complete laboratory, engineering, designing, and mold-making facilities as well.

G-E CLUB DANCE

Pete Dannecker and his orchestra will again play for the G-E Club dance tomorrow night from nine to twelve o'clock. Admission prices continue to remain at $.20 before six o'clock, Saturday and $.30 afterwards.

William L. Gaskill, Edwin H. Lepper, Argo R. Vegalues, Ferman Pollard, Charles Fletter, Martin Kimble, Edwin F. Glusenkamp, Elmer W. Koehlinger, George Mosshamer, Clarence J. Hueber, Harold F. Briggeman, William C. Buuck, Henry P. Gick, Albert G. Powell, Maurice H. Cox, Robert T. Reardon, Casper M. Holocher, Fernando H. Crick, Alvin C. Hartman, Louis R. Ormiston.

Carl H. Deitche, Guy E. Oberlin, Albert R. Spencer, George R. McAfee, Wayne M. Cook, Harry B. Underwood, Madarus A. Putt, Ernie V. Riley, John A. Ormiston, Fred H. Barve, Charles E. Clawson, George H. Lenz, Kenneth L. McDaniel, Paul D. Dole, Arthur C. Eberwine, David H. Welbaum, Royal C. Roeger, Dewey A. Erne, Wm. N. Garihan, Walter J. Rauner, Clarence C. Scheiman, Brice J. Hamilton, George E. Sherrard, Earl L. Lenz.

George E. Telley, Edward O. David, William J. Uecker, Don L. Persing, John J. Butler, Frank Braun, E. A. Rosenberger, Leo A. Vachon, Adelaide A. Levenberger, Owen O. Vaught, Ernest J. Cuttner, Charles E. Spencer, Herman F. Braun.

The Quarter Century Club of the Fort Wayne Works was organized in 1914 by a group of thirty men who had completed twenty-five years of service. At the present time eight charter members are living. They are E. A. Barnes, Wm. H. Schultz, Stuart Rehrer, Wm. P. Kindt, Wm. Raidy, A. L. Hadley and F. S. Hunting. Mr. Hunting, who left the Company in 1922 is the organization's only honorary member. The balance of the chartered members are retired.

Officers of the local chapter are E. L. Simpson, president; C. L. Johnson, vice-president; George Waldschmidt, secretary and J. W. Crise, treasurer. Trustees are R. H. Chadwick, W. H. Franke, T. T. King, George Doehla and George Eylenberg.

At The . . . EMPLOYEES' STORE

"Years of painstaking research—thousands of dollars worth of equipment—acres of floor space"—These are the phrases in the manufacture of MAZDA lamps that make people realize the great value of the incandescent lamp—make them appreciate the resources of the General Electric Company which makes possible such good light at such low cost.

You may select from a most complete line of inside frosted lamps—15, 25, 40, 60, 75, 100, 150 watt—outside frosted lamps in white, ivory or flametint, round and flame shape—silvered bowl lamps — three-lite lamps with standard or mogul base—Lumiline filament lamps—Fluorescent lamps — Sunlight lamps — Photoflood and Photoflash lamps—Automobile lamps—Radio Tubes.

A limited number of BM-15 Sunlamps, complete with roller carriage and automatic timer, are offered at attractive prices by the Employees' Store.

BM-15 uses type S-1, powerful ultra-violet G-E Mazda Sunlight bulb. Enlarged reflector provides maximum ultra-violet effectiveness without hotspots. Positive adjustment permits tilting of reflector. Newly styled with statuary bronze enamel finish.

Store hours 10 a.m. to 4 p.m.

Exposition Exhibit

(Continued from Page 1)

tors to demonstrate the ease with which a motor, when brought to a stop by reversing the power connection, can be prevented from re-accelerating in the reverse direction, by removal of the plugging power at the right moment. Other control devices that are to be shown include push buttons, limit switches, and motor-starting switches.

R. F. Campbell and F. D. Wilson, of the local fractional horsepower motor sales department will attend the exhibition.

Apprentice Alumni Will Stage Party

The Apprentice Alumni Association will hold a "get acquainted" party on Friday evening, March 21 at the Kreis-Stolzenau hall, Calhoun and Brackenridge streets. A feature of the program will be technicolor films of Canadian hunting and fishing trips presented by Robert Klaehn. The balance of the evening will be devoted to card games and general entertainment. Tickets may be obtained from contact chairmen at 35c each. All apprentice school graduates are invited to attend the affair.

NEWS THROUGH THE PLANTS

Bldg. 4-4

Ralph Fishback chooses a unique position when he goes ice fishing. He angles from an angle—flat on his back. For the whole story, ask Bill (Chummy) Shreeve who wears a policeman's overcoat when he goes fishing.

Lucile (the Vitamin Kid) Crick says she doesn't know whether it's love or the carrots she eats that makes her so full of pep lately.

We wonder why every time Harry Snyder leaves his bench he takes his apron off, folds it carefully, and lays it on the table.

Pauline Poorman has a whole dime bet on the North Side-Burris game and North Side had better win because she would hate to lose her dime. Alice Parker thinks Paul inc should bet on Burris too, so she will be sure to break even.

Alice Parker took an airplane ride after sunset Sunday. She was still walking on air Monday morning.

Les Menze left Monday morning for Camp Ft. Benj. Harrison.

Borings From 4-4 Office

'Tis just another week and life is plenty boring for me. At the present there is no one I would want to catch in my trap. Doris Roe told me to omit her name from further publications. Personally, to tell you the truth, all this publicity has gone to her haid, and she doesn't want to admit it. Don't care what anybody says, Doris, you're all right.

Nate Porter had a touch of spring fever the other day when he came out of the elevator singing to the top of his voice.

Bob Reardon's boss knows now where to find him when he is lost in the shuffle. He is caught in the trap in the rear of Bldg. 4-4 office.

Seen in the Battleship, crunching or munching on chicken in the rough are all the guys and gals of Bldg. 4-6. Paul Berghorn couldn't get waited on and finally they told him they had sold the last piece, even the piece that had gone over the fence last. Some chicken, eh what, Paul?

Gosh, I needs must close now, will be seeing you all again at a later date. I remain sincerely as ever,

Elmer, the Field Mouse,
(The Rat To You).

Slips And Chips

By Sir Vis, 4-4

As a practical joker, Walter (Walt) Buesking leads the list. The other day (while eating in the cafeteria) Walt unscrewed the pepper shaker top for his friends. They noticed him and was very careful (with the pepper) to insure a well-seasoned meal. Laughing to himself about the situation (looking down at his plate(busily engaged in eating, so as to deflect any suspicion) he did not see them pepper their food. He picked up the shaker and "puff" the contents was on Walt's plate.

The other day Arthur Stoll decided to have a little higher seat so he sat on some clamps. But not for very long, beacuse Gee had been using the clamps while welding, and they were a trifle warm.

Herman Lepper thinks he has the laugh on me because his name was misspelled in last week's News. Well it was Hermy who had the accident and the alibis. By the way, Hermy had a birthday recently. I didn't know it until he bawled me out for forgetting it. We all wish you many more of them, you sweet thing. Since Daggy Thomas has left us the euchre players seem to have lost their spirit. The place just isn't the same.

I hear we are going to lose that Newton Milling Machine. We sure will miss it because it is always in the way.

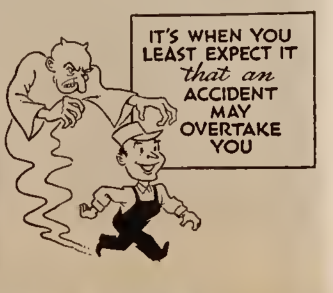
Sawmill "Shot-Gun Feed" Lives Up To Its Name

Electricity entered a new field recently when an electric "shot-gun feed" was supplied for a sawmill carriage at the plant of the Homestake Mining Company, Spearfish, S. Dak. General Electric equipment on this new carriage drive speeds 16-foot logs back and forth through a headsaw in less than six seconds, making more than ten cuts per minute. A round trip of the carriage, 25 feet each way, has been made in 5.2 seconds.

Until recently the application of electric power for directly driving sawmill carriages has not proven successful in meeting the high acceleration and retardation required. Investigation showed, however, that this problem could be solved by using amplidyne excitation which at the same time regulates the top speed set by the operator.

The carriage is of the conventional type used in most modern sawmills. The ⅞-inch-diameter steel haulage ropes which are attached to the ends of the carriage pass over sheave wheels and are attached to the ends of a drum located between two 80-horsepower General Electric motors in such a way that one rope winds on the drum while the other one winds off. These two motors speed the carriage forward through the headsaw at 600 feet per minute and snap it back at 800 feet per minute. Acceleration of the 27,600 WR^2 reaches 10.5 feet per second. A 125-kilowatt induction motor-generator set with amplidyne excitation furnishes power under adjustable-voltage control. Electrically tripped emergency brakes connected to the shafts of the motors will stop the carriage within six feet, even at the highest speeds.

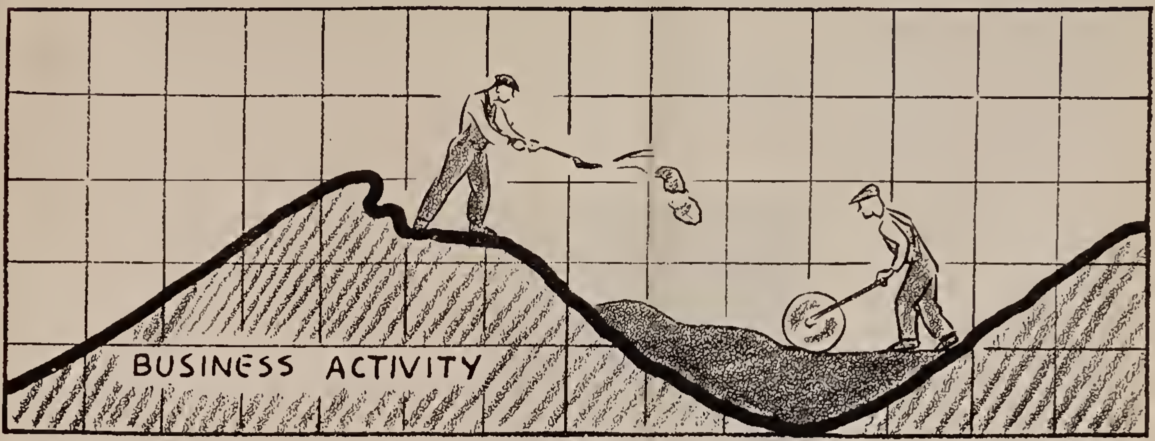
The stored energy in the carriage is returned to the electrical system by regenerative braking; thus the power consumed is only that required to supply the losses. The regeneration also produces a cushioning action at each end of travel. In addition, because of the use of electricity in the new drive, maintenance costs should be substantially reduced.



IT'S WHEN YOU LEAST EXPECT IT *that an* ACCIDENT MAY OVERTAKE YOU

Make Certain Before Leaving Home That You Have Your Badge

Smoothing Out the Business Cycle



EIGHT years ago, in 1933, when the bottom had dropped out of nearly everything, we heard a great deal about smoothing out the business cycle. For a while it seemed as if enough books were being written and enough articles were being published on this subject to keep the printing industry in the black even though everybody else was deeply in the red. Today, when business is booming again, we don't hear so much about smoothing out the business cycle—yet actually the time to do something about it is now, when business is on the upgrade.

We don't know of any tailor-made cure-all for the ups and downs of business, but we all know that during the last depression one thing helped tremendously to keep the situation from getting any worse than it did. That was the spending of personal savings which had been put away during the good times before the crash. As a matter of fact, the people of the United States withdrew three billion dollars from their accumulated savings in the years 1932–1935 and, by spending that amount of money during the depression, kept the curve of business activity that much higher than it would otherwise have been.

SAVINGS HELP SMOOTH OUT THE BUSINESS CYCLE

If that $3,000,000,000 had been spent instead of saved during the period of high business activity that preceded 1929, it would simply have pushed the 1929 peak to even greater heights. Saved, it helped limit the over-expansion of that business boom. In other words, saving in good times helps smooth out the business cycle in two ways. First it tends to keep business from growing too fast, and second, it gives us money to spend in hard times—money which helps bolster up the sagging demand for the goods and services of industry.

Right now, of course, business is going full blast—largely because of the National Defense Program. Millions of men and women are finding new jobs; overtime work is putting extra money into the pay envelopes of millions of others. But what's going to happen when our rearmament program is completed? At that time, or at some other time in the future, we shall doubtless face another business recession. Those who want to do something about it now may find useful the following summary of familiar ways of saving.

This Summary isn't, of course, intended as advice on how to save. If you need advice, better consult an expert.

Here are the common methods of saving

Savings Accounts are probably the most familiar and popular form of saving in the United States. Although savings department rules and regulations may vary with different banks, they're basically all alike. Money can be deposited and withdrawn at any time (although most banks technically keep the right to require written notice in advance of withdrawals). The bank agrees to pay compound interest on savings at regular intervals—usually semiannually. Most savings banks nowadays participate in a nation-wide insurance plan, under which the Federal Government guarantees to pay back up to $5000 of any savings a depositor may lose through a bank failure.

Life Insurance runs a strong second to savings accounts in popularity. Many of the policies that are bought today carry some saving feature; that is, part of each premium is put aside by the insurance company to accumulate at interest. As the policyholder pays his premiums, therefore, he builds up a cash reserve at the same time that he insures his life. As soon as the policy has built up a cash value, he may borrow on it or turn it in for its "cash surrender" value. "Term" life insurance, which is the type offered to G-E Employees through the Group Insurance Plan, never builds up a cash reserve or a surrender value. The reason is that term insurance is designed to give maximum protection at minimum cost. Moreover there are other convenient plans through which G-E employees may save.

Credit Unions offer their members both an opportunity to save and a means of borrowing money for personal use. The savings feature of a credit union works this way: Members buy stock, which the union issues in shares of small denomination (usually five dollars). The money taken in is lent to members or invested in high-grade securities, and the income is distributed among the members as dividends. The rate of interest charged on loans to members is comparable to the rate charged by banks, but varies with the security the borrower can offer.

Building and Loan Associations operate as follows: Members of a building and loan association subscribe for a definite amount of the association's stock, which they agree to pay for in regular installments. The money thus taken in is invested in mortgages, and the earnings of those investments pay the operating expenses of the association and the dividends on its stock. When a member's payments, plus the dividends his stock has earned, total the value of his stock subscription, he may withdraw his money in cash.

Bonds. When a person buys a bond he is really lending money for which he will receive interest. When the debt comes due (that is, when the bond "matures"), the owner turns it in and gets his money back. Actually there are more kinds of bonds than you can shake a stick at—they're issued and sold in all sorts of special ways. But the most important types, listed below, are usually bought through a bank or through a broker.

U. S. Government Bonds are loans to the Federal Government on the best financial security to be had: the credit of the United States. They fall into two general classes: (1) intermediate- and long-term bonds, which can be bought through banks and investment companies, and (2) "baby" bonds, which are sold through the Post Office Department. Baby bonds are issued in relatively small units (starting at $25) for ten-year periods and are "discounted" when they are sold. That is, instead of paying interest they are sold at less than their face value, and their worth gradually increases until they reach full value at maturity.

We'll probably hear a lot more about Government Bonds soon, for when the plans for financing the Defense Program go into action, all citizens will be urged to buy bonds similar to those issued during the Liberty Loan Drives.

State and Municipal Bonds. State bonds are issued against the credit of a state. Municipal bonds, however, are frequently backed by the income from a specific property, such as a water system or a toll bridge.

Corporate Bonds are, of course, issued by corporations, and are of several types. One familiar type is secured by a mortgage on real estate or other property owned by the corporation and is sometimes known as a "mortgage bond." However, another familiar type, the *Debenture Bond*, is generally backed only by the credit and good name of the issuing company. Nevertheless the debenture bonds of some companies are a better risk than the mortgage bonds of others. (Incidentally, the "employees bonds" issued by the G.E. Employees Securities Corporation are debenture bonds.) A *Guaranteed Bond* carries not only the issuer's promise to pay the principal and interest but also the promise of a second party—usually another corporation—to pay the principal or interest, or both, in case the issuing company defaults on the bond.

Stocks, which are issued by incorporated businesses, are a familiar form of investment, but they carry a relatively big risk. Buying *common stock* in any corporation is the same as buying an interest in the business, for common stock usually carries the right to vote in the management of the corporation. Holders of *preferred stock* generally do not vote, but they're paid a fixed dividend before the holders of common stock get any return. If a corporation goes bankrupt, its stockholders get back only what is left after the bondholders and other creditors are paid in full, and the claims of the holders of preferred stock generally are paid before those of the holders of common stock. Stocks are usually, though not necessarily, bought and sold through a broker.

NEWS THROUGH THE PLANTS

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

We believe that most people mentally complete the familiar quotation when they hear the title of Mary Margaret McBride's book "How Dear to My Heart." This is no formal autobiography, but a pleasantly rambling account of life in rural and small-town Missouri in the not so distant past. The book has a southern flavor, not the deep south of Scarlett O'Hara, faithful slaves, and white-pillared mansions, rather the background is of the plain people in a border state.

We are introduced to a gallery of characters, every one of whom is as real and familiar as the people next door. Mama was the center and mainstay of the McBride household; her deepest happiness and content lay in being needed and that was granted to her, for no matter how widely her family scattered, it was to Mama that they turned for comfort and strength to the end of her life. Papa deserves a paragraph to himself for he lives too in his daughter's description; he was debonair, proud, sentimental and not a little stubborn. These two and her younger brothers made up the major population of young Mary Margaret's world, but there were minor actors too. No spring was complete without a visit from Cousin Arthur, who had scandalized the family by being divorced, he prided himself on being able to keep designing women at bay, but in the end was captured by a widow, much to his amazement.

No one who reads accounts of the Christmas feasts, company dinners, picnic lunches and food exhibited at the County Fair, and Miss McBride obligingly gives some of the favorite family recipes, though she warns you that it is almost impossible to make them taste as good as Mama's. No one reading the mouth-watering descriptions of the food served on festive occasions, can doubt that rural America has a native cuisine that is second to none.

Mary Margaret takes you around the seasons, sharing joys and sorrows. Seed time and harvest are followed by winter with its deep snows, spring comes, and we learn of the spring revival meetings where she resolved to be a better girl. Each season had its duties and customs, gardening and preserving, hog killing and soap making. Miss McBride is a realist and doesn't minimize the fact that there was hard work and inconvenience as well as good living and fellowship in country life.

Altogether "How Dear to My Heart" recaptures for all of us the qualities of American life that are simple, steadfast and true — our precious heritage of the past.

We wonder why a strange woman walked up to Bea Stalter, Bldg. 19-5, the other evening, and asked her if she was Nancy's mother and if Nancy had come with her. Watch for your double Bea.

So that's what's the matter. Rosemary Blust, Bldg. 19-5, says she has spring fever twelve months out of the year.

Clarice Fyock, Bldg. 19-5, is back to work after spending two weeks in New Orleans where she participated in the Mardi Gras.

Miniature Greenhouse Encourages Unique Hobby

Many of us have hobbies but Ellsworth Geller, Winter Street, employed in the General Service Division, is probably the only Fort Wayne Works employee who enjoys the unique hobby of maintaining a miniature greenhouse. Mr. Geller, who is pictured above with one of his more rare plants, describes the operation of the greenhouse as follows:

"The greenhouse is about ten feet wide by fifteen feet long and is heated from the hot water boiler which supplies heat for the house.

"It was built about 25 years ago from material salvaged from the Geller Greenhouse operated by my grandfather, Theo. Geller, a good many years ago.

"Since then it has supplied plants and seedlings for the porch boxes and the annual flower beds as well as canna bulbs and dahlia roots which are stored under the bench in the winter.

"By looking closely at the picture one might even distinguish some of the various plants such as azaleas, double flowering hibiscus, fuchsias, geraniums, lantanas, coleus, ivys and several varieties of wax begonia.

"There is also a dwarf lemon tree which bears edible fruit, a night blooming cereus, shamrocks (giant-leaved oxalis), crown of thorns, a collection of aloes and cactus, including the Christmas cactus, baby tears, sprengeri fern and various odds and ends.

"The main attraction in the picture is the flower of the Amorphophallus Rivieri (Devil's-Tongue or Snake Plant is the common name.)

"It is an oddity in that it blooms from the bare bulb without soil. The bulb is planted in the garden in the spring and grows about four feet tall, resembling a palm in appearance. The first frost nips the foliage in the fall and the bulb is then lifted and stored in a cool place. About February or March the bulb, if of flowering age (5 to 6 years) will show signs of life as the bud starts to make its appearance. It is then moved to a warmer location and allowed to grow which it does rapidly, reaching a height of 5 to 6 feet in about three weeks.

"The one in the picture is 4½ feet tall and the blossom is 22 inches from base to tip and about ten inches wide.

"The spathe is maroon in color and the spadix emerging from it a dark brown. The stem is dark green and mottled. It gives off a very obnoxious odor after the bloom has been open for several days.

Shorts From 6-B

Ed. Lallak was once the proprietor of a nice steel locker which some one borrowed and forgot to return. A week or so ago Ed trundled a large "rough box" about the size of an Atlantic City bath house down to the South end of Bldg. 6-B, and when he saw several fellows regarding it with greedy eyes, he again removed it to "no one knows where." Our advice to Ed is to set up all night next Halloween and watch it as it is a pretty tempting morsel to intrigue the youthful pranksters.

The local furniture stores are now putting on a second shift to display their wares to Arthur.

George Coplen has deserted us for a new job in Bldg. 4-3. His fellow workmen will miss him, and the noon checker players will lose an able prompter. Lots of luck, George.

Jake "Beau Brummel" Sappington has bought a half interest in Ponce De Leon's fountain of youth somewhere in Florida, and we are expecting him to come to work most any morning now skipping the rope.

Best wishes to Hilda Schnelker, Bldg. 19-5, who was married on Saturday, March 8, at New Haven.

"What's your little brother crying about?"

"He's dug a hole out in the yard and he wants to bring it in the house to play with."

Winter Street News

We can add another name to our long list of people who don't believe in signs. Oscar Wiltzman was observed feeling the painted surfaces just adjacent to a large sign reading "Wet Paint." Yep, it was wet.

Charlie Kensil of the tool room showed Chick up on his style trends. Your new apron almost bumps your shins, Charlie, and you know everybody's wearing them much higher these days.

Charles Spice plastered his cellar floor over the week end. He diligently applied 80 lbs. of cement to one of his first floor walls and had to go and get more. After cleaning up his mess and taking it to the cellar he found most of his plaster gently reposing on the cellar floor. Those things between the lath are cracks Charles, and stuff, especially wet plaster, can be shoved through them very nicely.

Well, we finally give up. Paul Johnston reports going ice fishing, catching a nice blue gill and then having a second blue gill follow the first one through the hole in the ice and fall flopping at his feet. Now if we didn't know Paul we would swear that he was seeing double. However, his pertinacious pertinacity outweighs our pertinent remarks—and as we said before, we give up.

News On The Nose From 4-5

Now can we talk about Spring? Will you think we are balmy, or do you remember how glorious the weather was last Sunday. Maybe you took your best girl out to the park and snapped some pictures. What if you did plunge knee deep in mud, it's foolish but it's fun. Did the kids enjoy the drive you took them for last Sunday? Of course, you went riding because you're balmy with thoughts of Spring too. But balmiest of all, in a harmless sort of way, was "Shakespeare" Maynard Cope. You will remember him as the Adam Lazonga of Bldg. 4-5. Anyhoo, here are the thoughts of this second shift inspector at 10:00 P.M.:

"Try as you may,
Nothing worse can you find
Than a lazy assembler,
With a nawsty mind."

Then those screw-balls of the office, Bob Merrill and Jim McGill are carrying on the tradition with a friendly feud. They call each other "Fatter'n I am." But Jim has the edge on Bob because his Lenten pledge forbids his piecing between meals and he has lot five pounds. Jim has also given up cigarettes, brave man. Now all he smokes are cigars and pipe.

We wouldn't know exactly why some of the sweet young things in Bldg. 4-5 were passing a Zoe Beckley column around entitled "If You Pass This Test, You Care Enough to Marry." Um-m, sounds interesting!

Picture of the week was Dale Steward racing to catch the electric door before it completely locked. He succeeded in performing a beautiful feat of acrobatics on the floor. He is quoted as saying, "Shucks, that wasn't anything at all since I learned the Charleston."

We think this is the best description of a bald head that we've heard yet. Wise-cracked Ralph Clark, Bldg. 20-1, "I've got one face, and room for another."

With the telephone buzzing constantly in our ears, we were tempted to put our dark thoughts in verse. The resulting bit of doggerel is entitled:

"Complaint to a Telephone"
or
"Lament of the Hello Girl"

"Of all the blights on human kind,
Worst of the lot is hold the line.
Or just as bad if truth were known
Is Jake who bellows thru the phone.
Or Tillie, sweet and simple miss,
Whose low soft whisper is a lisp.
I grit my teeth and tear my hair,
When some smart dope pours thru
the air,
A list of figures long and sad,
While I seek wildly pencil and pad.
I Pray forgiveness
Humbled quite,
For if truth were told
Of this sad tale.
I'd find myself tossed
Right on in,
With those now guilty
Of the sin."

We've lost that balmy touch of Spring already. We're finishing this week's news after walking home in the snow Tuesday noon. We're losing our faith fast. Well, Elmer the F. M., haven't you anything to say to your old pal Snoopin' Sal? That's what the "kite-flyer" Darrell Franklin calls us among other not so fond names. And while we think about the ridiculous situations, here's a good one that happened some time ago. Joe Nyboer, brother of our production man Leo, was sent on a service call to do a bit of plumbing on a dip booth. He appeared upon summons, and asked very confusedly, who wanted service on a diaper. We are still wondering how dip booth could be taken for diaper by the young lady in the Service Department, and what Joe could do about it. . . . And an eating good time was had by everyone when the girls in the Bldg. 4-5 cast all weight problems aside at the Aulton House last Thursday.

Goodbye, all you nice people, we'll see if the editor will let us write again next week after publishing our not so poetic poetry.

SANDY SAYS

Next Monday morning, March 17, don't forget your badge—and green necktie. The badge will get you past the gate, but the green tie will really put you in solid with the watchmen. At least we have always heard that watchmen and policemen are always Irish. It's probably because they love a good fight. If you don't think they can get insistent, just try to get in next Monday morning without your badge, even if you do have on a green tie.

Now, you may wonder why a Scotsman should be talking about St. Patrick's Day. Weel I'll tell you. There are two reasons:

1. St. Patrick was really born in Scotland.

2. There's a little bit of Irish in us all.

St. Patrick, it is said, charmed all the snakes of Ireland with his music, so that they followed him to the sea shore where they were driven in and drowned. Now, this happened a long time ago, some time in the fifth century. There weren't any tourists in those days, only thrillers, so we have only the Irishmen's word for the story, including the fact that the Irish snakes of that day couldn't swim.

Of course St. Patrick had cost reduction in mind. Snake bites must have required a tremendous gallonage of snake bite remedy. Now, without them, this could be sold at a profit. At that, the Irish are exporting very little in the past year, while the Scotch has been sent to us by the shipload.

"Weel" Uncle Chesty says, "Ye canna blame the Scotsmen. When ye are being bombed, ye wouldna want bottle breaking all over the place."

"No", I said, "I couldna bear to think of it, any more than I can bear to see materials being wasted or ruined these days."

We are wondering why Frieda Reemer, Bldg. 4-3, enjoys so much sitting on the sidewalk on the corner of John and Pontiac Streets.

We hope that Dorothy Schelmer, Bldg. 4-3, will choose ice to skate on instead of concrete. It might not be quite so painful.

George Arnold, Bldg. 4-3, invites all his friends to the Bingo party and then he carries all the prizes home by himself.

Charlotte Sanford, Bldg. 4-3, has a lot of trouble with memorizing poetry while Myrtle Bennett has her troubles washing her patties after she eats a juicy orange. Marjorie Kavanaugh has her troubles keeping her red blouse clean at work.

Make Certain Before Leaving Home That You Have Your Badge

»» NEWS THROUGH THE PLANTS ««

He's Humane

Lem Carpenter, Bldg. 4-3, let himself in for an extra round trip the other evening. He arrived home, set down his lunch kit, his wife looked at it and said, "Why, Lem, that is not your lunch kit." Whereupon he took a look, opened it and found it full of food. He immediately did a hot foot back to the plant or some second shift man would have been minus his evening snack.

Alva Biggs, Bldg. 4-3, sure has his difficulties when it comes to fixing up around home. Last week end he decided to take the paper off the kitchen. He procured a steamer and went after it. He got the plastering so wet it came off with the paper. Poor Alva had plastering in his soup and had to take the baby outside and dust her off before putting her to bed.

"Doc" Markley, Bldg. 4-3, our "Roanoke Flash" had the misfortune to lose his identification badge just before the crack down period. He came to work on Monday, was refused admission, and had to cool his heels in the ante room while the button mill ground out a new badge.

Johnnie Driver, Bldg. 4-3, would like to have it explained to him why it is that some of our co-workers, who are not overly peppy, will in removing a tote box, pick it up and slam it down upon the floor with all their might. It must be the demolition instinct in them, Johnnie.

19-3 Agrees

Yes, Herb Borchelt, we believe it was either a door in the dark, or you fell down, that fixed up your eye in its present condition. These days we accept any explanation without argument—but, how does the other fellow look?

Any jewelry in need of repairs? Roy Mentzer, Bldg. 17-2, guarantees that he will make it or break it. Roy is well equipped, having two pipe wrenches and a pair of pliers.

Betty Hawk, Bldg. 26-2, is waiting for that third event to complete the cycle. First, she stumbled over a box and then she slipped on a piece of wire and dropped her coffee cup. Mebbe she was thinking of that dinner.

We hear that Carey Baker, Bldg. 26-5, and the watchman had a dandy game of "button, button, who's got the button?" We don't know if it's true but if it is we bet the watchman won.

Spring fever is expected at this time of the year but it appears that Ross Cohagan has the Waterloo, Iowa fever.

Is Zat So?

Did you miss me last week? Well, you know the old saying "No News is Good News!" That happened to be true last week and the "good news" was the fact that we were too busy working in Bldg. 17-1 to write anything for the column. We miss Harry Kessler's wagering—especially at the height of the basketball season. We hope you recover from your injury and return to work soon, Harry! . . . Ed Huhn is worrying about how he is going to plant his garden when he has to work overtime so much. Why not leave farming to the farmers, Ed? . . . Ralph Pettit is some fisherman! He carries a fishing box as big as a kitchen cabinet and has a very unique way of fishing through the ice. He advises that the best results are obtained if you set your lantern beside the hole and then jump in the water. After much prompting he finally admitted that if you don't catch anything else you may at least catch a cold! . . . "Jake" Bieler is still questioning Watchman Orville Haver about how he happened to let that dog through the gates! "Jake" wonders if the dog had a badge or is Orville slipping? Maybe it was a police dog, Jake! . . . It is a sure sign of Spring nowadays when a man's fancy turns to thoughts of new cars instead of love! La Moyne Gale has a new red Buick! Gale intends to keep it all shined up "purty"—hence the simonize! "Dan" Hoover says he still thinks the Chevrolet is the car for him and is proudly driving the latest model! O. Shookman says he prefers a Pontiac! Henry Papenbrock has a new Oldsmobile so you see there is quite a bit of arguing on our floor about the good and bad features of all automobiles. Al Middaugh traded his car in on a used car and says he finally decided on a "Chevy" because the salesman told him that it would run on reputation alone. Al admits that he has discovered that it does run better on gas! Otto Nahrwald's car seems to have a badly damaged fender. We wonder if he didn't do that on purpose just to convince the "better half" that they should have a new car? . . . We are glad to have "Ernie" Riley back to work. We wonder if the oncoming house-cleaning had anything to do with "Ernie's" recovery? . . . Judging from the noise Marion Patty must be putting on a Blitzkrieg in his department? How about it, Patty? Lillie Pion is still going around sort of dreamy-eyed, and explains that she and Elmer are still "honeymooning!" We are all invited out to "Ernie" Barr's house Friday night. We are looking forward to a good time!

The Question Mark.

M. B. A. PATIENTS

General Purpose Motor: Frank Williams, 2125 John Street; Henry Stegman, Route 4, City; Mary Rembarger, 807 W. Berry Street; Mildred Raymond, 2825 Queen Street; Renna Rupert, 3310 Bowser Avenue; Russell Poorman, Route 4, City; M. Markenke, 317 Greenwood Avenue; Harry Kessler, 604 E. Suttenfield Street; Dorothy Dennis, 1925 Franklin Avenue; Mildred Close, Lutheran Hospital; Bernice Stohlmann, Lutheran Hospital.

Transformer: Lillian Telly, 2106 Dodge Avenue; Florence Hessert, 632 W. Superior Street; Carl Bahnke, 4422 Oliver Street.

General Service: Benjamin Wiley, 2435 Gay Street; Owen Timmons, 810 Wilt Street; Ralph Spayde, 432 E. Wildwood Avenue; Ernest Fabian, 2341 Smith Street.

Shipping: Maurice Fair, Route 6, City.

Legal Notice

Henry "You-know-me" Lojeck, Bldg. 19-3, hereby notifies all parties concerned (especially Boyd Fisher) that unless the insulting notes placed on his desk when he is late noons, are discontinued, he will be forced to resort to stern legal action. After all, a guy has a few privileges not subject to public approval.

Karl Stahl, Bldg. 17-4, was sleepy-eyed long before quitting time one day this week. Karl was evidently fooled by the fact that it's getting lighter much earlier in the mornings for he appeared at work an hour ahead of time.

Herman Schuelke, after many months of hard effort finally reached the zenith of his bowling career by turning in a three game total of 399 with a low game of 104. Boy does the rest of the team appreciate his efforts.

FREE CLUB MOVIES

Don't forget to attend the free movies at the G-E Club Sunday, March 16. The feature picture entitled, "Singing Cowgirl," will be shown at two and four o'clock.

Sunbeams From 17-4

The girls are thinking very seriously of getting Ruth Lemert a soup ladle to eat her ice cream, as she never eats it until it gets to the soupy stage.

Martha Tappy and Edna Miller have only one topic that they can talk on, these days. You're right, it's Camp Shelby. Wonder if the boy friends are there?

Bob Bennet swears that someone pulled a Houdini on him the other day when the nickel he nailed so fast to the floor, popped right up into the hands of a truck driver. What Bob didn't see was the truck run over the fun-producing nickel.

Joe Henry has found the cheapest place in Chicago to get a hair cut. For $2.75 he even saved his dignity.

Deaths

Margaret Jane Crosby, 1220 Packard Avenue, died at the St. Joseph's hospital following a short illness. Miss Crosby worked in Bldg. 26-3 and had been an employee for the past six years. Funeral services were held Tuesday with burial in the Lindenwood cemetery. Employees of Bldg. 26-3 extend their sympathies to the bereaved family.

Karl E. Hoffman, 2134 Eby Avenue, died on March 8. He was employed in Bldg. 19-1 and has been a Fort Wayne Works employee since 1917. Funeral services were held Tuesday with burial in the Greenlawn Memorial cemetery.

Herman Ebel of Bldg. 6-3 celebrated his third wedding anniversary Tuesday. When asked what he did to celebrate, Herman replied "my wife and I had another honeymoon. Each of us took a can-opener, a basketful of tinned groceries and put on a real feed."

Another anniversary was celebrated in Bldg. 6 last week as Joe Grosjean joined the Quarter Century Club. Joe began his working career in November of 1902 as a messenger with the old "Body Company". He joined the Fort Wayne Lamp Works in 1910 but left the Company in 1911. He returned on February 3, 1916 to work in the cost and payroll department. In 1918 Joe took charge of the Billing Section and continued until 1927 when he was appointed Head of the Distribution.

Modern Mother Goose
19-3 Version

"Humpty Dumpty" (Dorothy Lindenberg) sat down on her chair
But strange as it seems—the chair wasn't there,
She lit with a bang, came up with a bounce
But the gal wasn't hurt, I'm glad to announce.

"Hi Diddle Diddle" 'two guys started to fiddle
We all wanted to jump over the moon.
But "Dagwood" and "Pappy" just fiddled with glee
While the boys all went into a swoon.

"There was a man (Wagner) in our town"
His friends were wondrous wise,
A girdle for his form they bought
To help him retain his size.

"Rub-a-dub-dub" some ice in a tub
With bottles of stuff and of pop.
They offered John Rogers a bottle of stuff
He answered "Ah no, I don't touch a drop."

The Bldg. 4-2 Needle Craft Club is looking forward to a very busy and prosperous spring season. It is rumored that Frank Kramer was elected president because of the years of experience he gains at night helping his wife with a hooked rug. Ralph Heminger and Andy Braun, the remaining officers, were elected because of the intense interest that they have shown in the project.

We hear Von Wherle had a lot of trouble last week. Badges, it is reported figured in the matter.

Ray Kierspie, Bldg. 16-3, finally put it over on Eddie Cantor. The Kierspie girls now have a little brother. It is reported that Ray had to take the young un away from the hospital because he tried to battle all the other crib inmates.

Eddie Kaliper, Bldg. 26-2, is reported to have had an exciting time on his way to work. The report goes that a small dog decided he did not like Eddie and started after him in full bay. It is further alleged that Eddie took to his heels, only to discover that the dog had lost interest and was headed the other way.

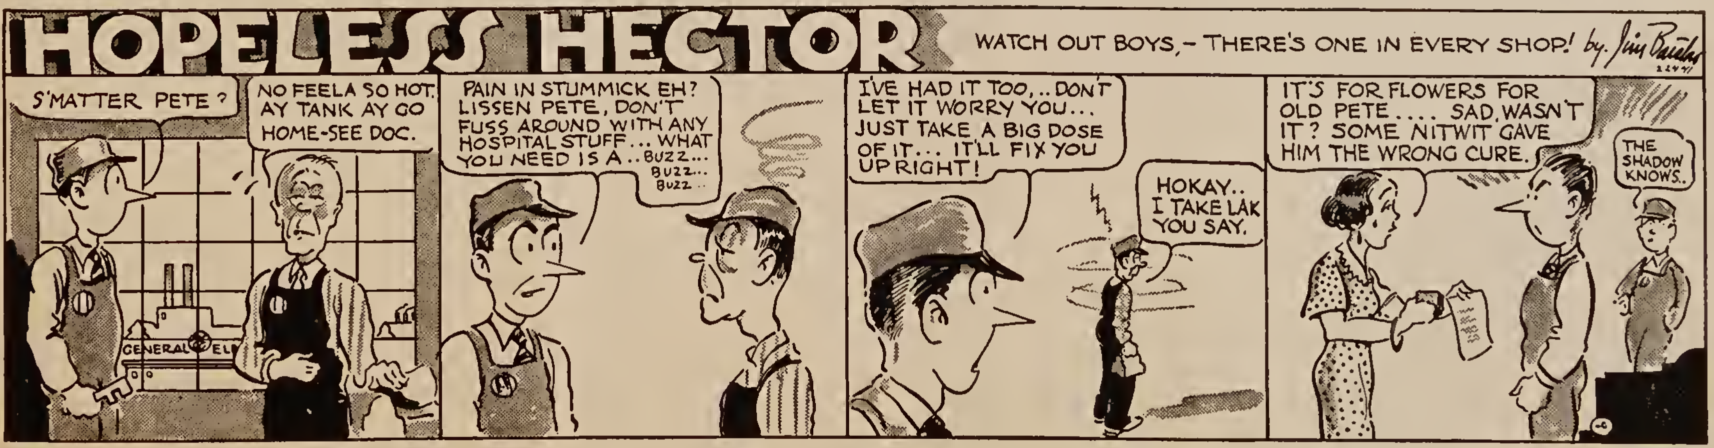
Don't forget the "Wearing of the Green" next Monday and the wearing of your badge every day!

Cliff Bowman sat down to breakfast the other morning and the ironing board fell down on him. Consequently, Cliff didn't feel like his usual self that day. Now this is strictly to be kept quiet.

The teacher had written 92.7 on the blackboard, and, to show the effect of multiplying by 10, had rubbed out the decimal point.

"Now, Alfred," she said, "where is the decimal point?"

"On the duster," replied Alfred, without hesitation.



HOPELESS HECTOR
WATCH OUT BOYS,- THERE'S ONE IN EVERY SHOP! by. Jim Butler
S'MATTER PETE?
NO FEELA SO HOT. AY TANK AY GO HOME-SEE DOC.
GENERAL ELECTRIC
PAIN IN STUMMICK EH? LISSEN PETE, DON'T FUSS AROUND WITH ANY HOSPITAL STUFF... WHAT YOU NEED IS A..BUZZ... BUZZ... BUZZ..
I'VE HAD IT TOO,..DON'T LET IT WORRY YOU... JUST TAKE A BIG DOSE OF IT... IT'LL FIX YOU UP RIGHT!
HOKAY.. I TAKE LAK YOU SAY.
IT'S FOR FLOWERS FOR OLD PETE.... SAD, WASN'T IT? SOME NITWIT GAVE HIM THE WRONG CURE.

Make Certain Before Leaving Home That You Have Your Badge

Securities Corporation Directors To Meet

Elmer G. Sauerwein

A meeting of the board of directors of the G-E Employees Security Corporation will be held at the office of the Corporation, 15 Exchange Place, Jersey City, N. J., on Friday, March 21, it was announced this week by W. W. Trench, secretary of the corporation.

Elmer G. Sauerwein, Bldg. 26-5, a bond director from the Fort Wayne Works wil attend.

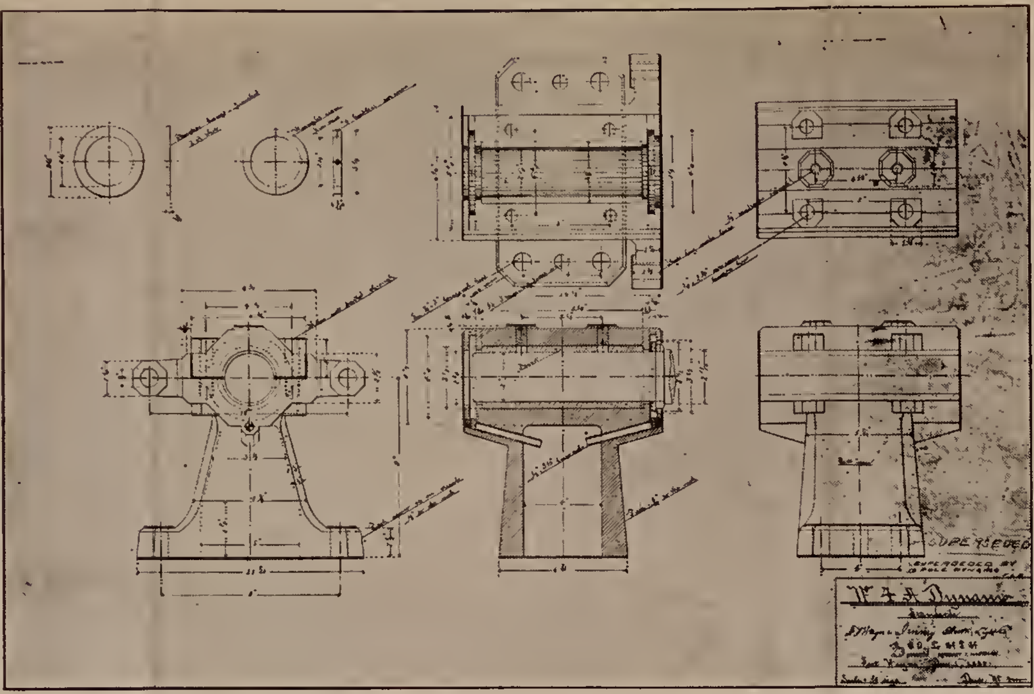
West Side And Factory To Meet For Championship

Only needing a win over the Apprentice B, Small Motor Factory turned on the heat last Thursday to down the B's by the count of 50 to 28 to become second half titleholders of the G-E Inter-department Basketball League. Factory and West Side, the first half champions, must now meet in a two out of three game series for the final championship.

With big "Jap" Voirol furnishing practically half his team's points on eleven field goals the Factory took an early lead and were never headed. The Apprentice by connecting on several charity tosses did manage to stay within "worrying distance" during the first quarter but then Voirol personally took charge and Small Motor ran up a 28 to 14 half time lead. The B's staged a slight spurt at the start of the third quarter when Rolfing, Apprentice center, who led his club's scoring with nine points, hit two quick fielders and a foul but Small Motor quickly squelched this rally and staged a counter attack of their own that carried them on to the necessary win.

Although the outcome of their tilt would have no bearing whatsoever on the league's lead Main Office and West Side put on one of the most outstanding games of the entire season with the Office finally coming out on top 38 to 36. The Westerners, by taking advantage of an early "hot streak", ran up a 24 to 15 half time lead but Main Office bounced back with a bang after the rest period to tie things up early in the fourth period. From there on in, each club took turns holding the lead but Main Office managed to garner the last and telltale bucket. Wickliffe, with eleven markers, was high for West Side, while O'Brien, with four fielders, led Main Office in points but everyone of his five mates contributed something to the total.

Tracing Number One Discovered In Archives



A recent examination of old records by the Blueprint Department brought to light the above tracing which is undoubtedly the first made by the Fort Wayne "Jenney" Electric Light Company for it is labeled No. 1. The inscription in the lower right corner indicates that the tracing was that of a No. 4 A Dynamo with the notation "superseded by 12 pole dynamo." The date is given as December 1, 1888. The drawing was made by Olaf O'Farrell and the tracing by Herbert T. Hartman. The drafting department made its own blueprint paper in 1888 and this accounts for the smudge to the right—part of the chemicals having stuck to the tracing. Tracing No. 1 has been framed and now hangs in the office of Homer A. Hartman, supervisor of drafting.

What The Rod-Gun Club Offers Members

By A. F. Bowers

(Continued from Last Week)

How does the N.R.A. benefit the club as a unit?

Through the N.R.A. we have been placed as eligible to receive help from the United States War Department in promoting civilian marksmanship. This aid consists of requisitioned rifles, ammunition and targets for the club's use.

Is there a fee for shooting on the Club range?

Membership in the Club gives you the privilege of shooting either on the range at the Armory or on the outdoor range at any authorized time, free of charge.

Must I join the Club first to visit the ranges?

No. The Rod and Gun Club invites all persons interested, to visit us at the Armory every Thursday evening.

What size and kind of gun may I shoot on the range?

At the Armory range you may shoot any 22 calibre rifle or pistol and all calibres of pistols.

Who must I see about joining?

The Club officers accept members every Thursday night at the Armory, or you can contact Elmer Pion, Bldg. 4-3.

She: "I thought I told you to come after supper."
He: "That's what I came after."

Essex And Club To Break Basket Tie Wednesday Night

With their three game series standing at one apiece the G-E Industrials and Essex Wire will play the deciding tilt Wednesday, March 19 at the G-E Club starting at 8:30 o'clock.

The Industrials took the lead in this match by defeating Essex Wire in an overtime preceding the Kautsky-Celt game but the next night in a preliminary to the Church League play-off Essex came back to swamp G-E 50 to 38 so the last contest ending this friendly rivalry should be a "thriller."

Essex has enjoyed a very successful season, being one of the strongest teams in the YMCA Industrial League. They have won the greater majority of their contests and number among their victims Zollners, Rea, Harvester and Coldwater, Michigan. They also advanced to the semi-finals in the Markle Tournament this season.

Glancing over their roster it is easily understandable why they are doing so well as Stanzak, Central Catholic's star player on their two National Championship clubs, holds down the pivot position. Forward slots are generally by Hank Kuleza, Central's great all around athlete, and Gene Maxwell, another one of Central Catholic's National Champions. Dan Bourne, member of Central's two great clubs of 1936 and '37 plays one guard and is paired up with Kitzmiller, one of South Side's State Champions. This lineup has just about everything a coach desires — scorers, height, speed, fight and experience and consequently is a tough combination to beat.

To garner this important win Coach Edgar is expected to stick with his usual starters of Weigand, Marquette, Vonderhaar, Hanley and Voirol but everyone on the squad is sure to see action before the evening is over.

In the preliminary starting an hour earlier Main Office, tough Inter-department member, will tangle with Litchfield of Warsaw.

IN THE ROUGH

By WALTER SUNIER

We received this week what we consider is one of the funniest bits ever sent in. Who sent it, we do not know. It consisted of a note and a newspaper clipping. The note read, "This was really some golf match—look what Snead shot and what happened to the other fellows." And below is part of the clipping.

ՄԻՈՒԹԵԱՆ ՀԱՄԵՐԳԸ

վրա: Մշակումը միջակ է եւ ալքատ՝ հեռու արժէքաւոր ըլլալէ: Երբ ուրիշ երաժշտագէտ մը մշակած է արդէն իսկ երգ մը, երկրորդ մշակող անձը, գրեթէ անողայման, նախորդէն լաւ մշակելու է, որպէսզի երգը ընդունելի կանդուածէն:

Պրն. Տիգրանեանը մշակած է նաեւ ժողովրդական մէկ ուրիշ երգ՝ «Ես Պուճուր, Եարս Պուճուր»-ը: Այս մշակումը չունի այն վեհութիւնն ու դեղեցկութիւնը, որ ունէր Երաժշտագէտ Գրիգոր Սիւնիի մշակումը:

Պրն. Ալեքսան Շիշմանեանը

It sure was some golf match. As far as we can tell, the match was played with black balls at midnight in Mammoth Cave. It's Greek to us. Sounds something like a coast to coast hiccup.

BULLETIN

The play-off between West Side and Factory for the championship of the Inter-Department Basketball League wil be staged at the G-E Club this evening at 8:00 o'clock and a second game next Tuesday evening at the same time.

G-E CLUB BOWLING LEAGUES

Ten High Three-Game Totals of All Leagues

1.	F. Matthews	656	Small Motor League
2.	Rinehart	653	Refrigeration League
3.	Blomenberg	612	Refrigeration League
4.	Roeger	611	Refrigeration League
5.	Seidel	608	Small Motor League
6.	Lenz	600	Tool Room League
7.	Tagtmeyer	594	Transformer League

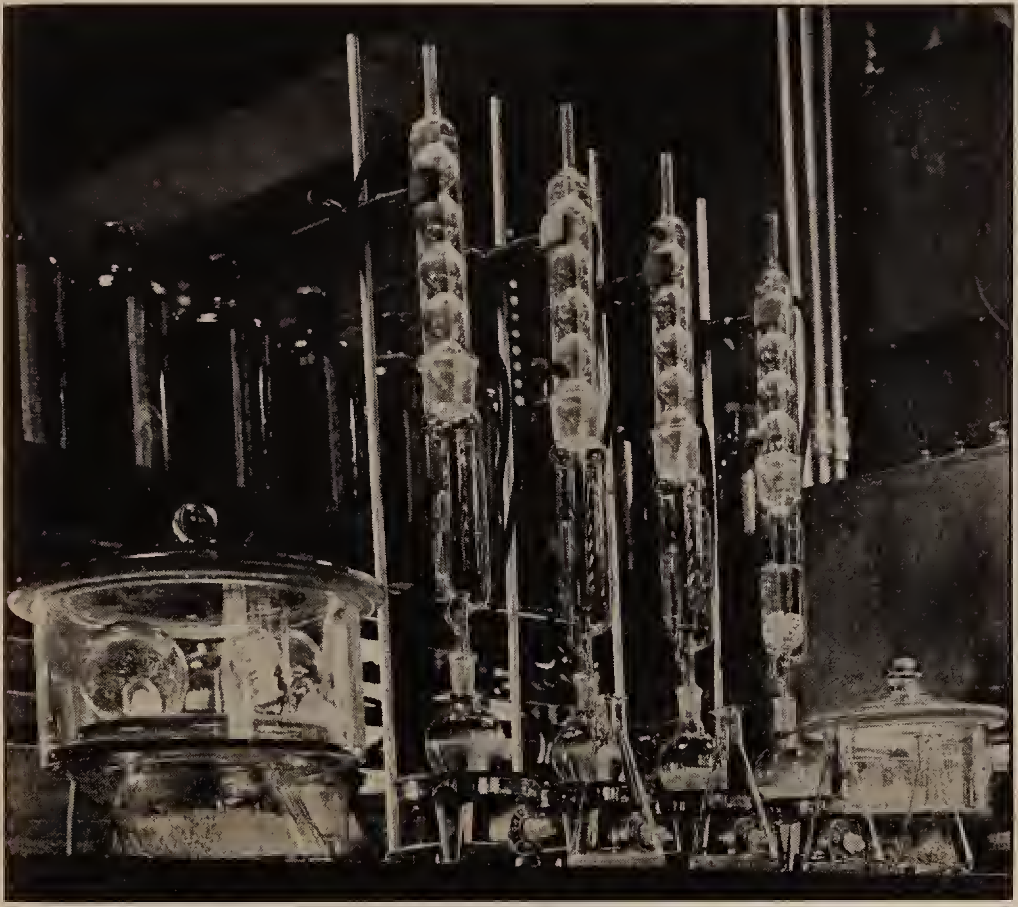
B & T

GENERAL ELECTRIC NEWS
FORT WAYNE WORKS

RECEIVED
MAR 21 1941
PUBLIC LIBRARY
FORT WAYNE & ALLEN CO., IND.

Volume 24 FORT WAYNE, INDIANA, FRIDAY, MARCH 21, 1941 Number 57

The Tools Of A Service Organization



An interesting treatment by our staff photographer of the more commonly recognized equipment used in the Works Laboratory is presented in the above unusual photograph.

Probably one of the least known of our service organizations—to the average employee—and yet one of the most interesting is our Fort Wayne Works Laboratory located in Bldg. 28. To many of us who have been more or less inclined to associate the work of the laboratory with feats of a spectacular and mysterious nature rather than with the great scope of work performed in connection with the operation of our Works the following article by Howard Miller, in charge of the Works Laboratory, will be decidedly informative.

By Howard Miller

Several years ago, Floyd Gibbons, the famous war correspondent and radio commentator, gave a series of radio broadcasts, in which he described, in his characteristic manner, the things he saw in the Research Laboratory of the General Electric Company at Schenectady, N. Y. In those talks, he referred to the Research Laboratory as the "House of Magic." The phrase "House of Magic" struck the popular fancy and was still further publicized by the "House of Magic" shows presented at the World's Fair and by traveling units.

Associated with the Research Laboratory at Schenectady are laboratories located at the several apparatus plants of the company. These are called "Works Laboratories." One of these is our own Fort Wayne Works Laboratory located in Bldg. 28.

The people working in the Research Laboratory and the Works Laboratories are not particularly keen about the term "House of Magic," for they say, and rightfully, that there is nothing magical about the things they do. Their

(Continued on Page 2)

Former Works Manager Recalls No. 1 Tracing

Reproduction of what is believed to have been the first tracing made at the Fort Wayne "Jenney" Electric Light Company, in last week's issue of the Works News, brings some interesting reminiscences from Fred S. Hunting, former Works Manager and at the present time chairman of the board of the Fort Wayne National Bank.

In a letter, which is addressed to Homer Hartman, Bldg. 18-5, Mr. Hunting mentions that the drafting was probably made in rooms at the old Weber Hotel. He has added the information that the quarters were established in the hotel following the destruction of the plant by fire. Manufacturing operations were established at the Kerr-Murray plant which was located a short distance east of the Weber Hotel.

The letter to Mr. Hartman follows:

"I have seen with a great deal of interest the reproduction on page eight of the March 14, 1941 issue of the Fort Wayne G-E Works News of what you designate as the Number One Tracing.

"As I looked at my copy of the News, the first thing that caught my eye on this tracing was the title, 'No. 4 A Dynamo,' and before I read any of the descriptive matter I knew it was a reproduction of a drawing that Herbert T. Hartman had done the lettering on. That title was a typical style of printing at that time.

(Continued on Page 2)

Credit Union Office Hours Increased

Office hours of the Credit Union, located in Bldg. 21, have been increased. The office will now be open from 7:30 a. m. to 8:00 a. m. from 12:00 noon to 1:15 p. m. and from 2:30 p. m. to 4:30 p. m.

Insurance Claims Total $18,378,387

Three Claims Totaling $9,500 Are Paid To Local Beneficiaries During February

During the month of February, a total of $66,695 was paid out in death claims under terms of the Group Life Insurance Plan of the Company, according to the monthly report compiled in the office of the Secretary. There were 21 claims in all. Schenectady Works had the largest number with ten or a total of $37,320. Next in line was Pittsfield with four claims for a total of $9,875, while Fort Wayne had three claims for a total of $9,500. In Lynn River Works, were two claims for a total of $7,000. West Lynn had one claim for a total of $1,000, and Philadelphia Works, likewise, had one claim for a total of $2,955.

Throughout the entire Company for the first two months of the year, a total of 62 claims have been paid for a total of $233,682.

The total of death and disability claims paid since January 1920 now stands at $18,378,387.

Excellent Future Is Forecast For Plastic Industry

G-E Club Engineer Voices Belief That Natural Growth Will Continue After Boom

The demand made upon the plastics industry by the defense program and the shortage of the nonferrous metals is resulting in an ever-increasing number of plastic applications today, but the natural growth of the industry will continue even when the boom days are over, H. M. Richardson, chief engineer of the General Electric plastics department, told members of the Rockefeller Center Square Club in New York this week.

"Plastics are not being used as a substitute material but as an original and a replacement material," Mr. Richardson said. "They are being applied only where they do an economically satisfactory job; and the study of plastics now being made by manufacturing men who need new materials is certain to react favorably for the plastics industry in years to come.

"Manufacturers are constantly discovering that plastics can be practically applied in an increasing number of cases," he continued. "With the advantages that plastics have to offer, there is every reason to believe that more and more discoveries will continue to be made."

Mr. Richardson pointed out that plastics have only half the density

(Continued on Page 2)

Restaurant Offers Additional Service

Following greatly increased patronage of the Works Restaurant, announcement is made that an additional dining room will be opened on the second floor of Bldg. 16, starting with next Monday, March 24. The dining room will be at the north end and will be open from 12:00 o'clock noon until 1:00 P.M. Employees may enter the dining room, which will have full serving facilities, by the outside stairs on the north end of Bldg. 16 or by entering the west door of Bldg. 16 and using the inside stairs. It is requested that the north outside stairs be used as the exit.

Restaurant service for second shift employees is being planned at the present time. Tentative plans call for this service to go into effect on March 31. A definite announcement will be made in next week's issue of the Works News.

Decatur Works Relief And Loan Officers Elected

In the annual election of the Decatur Works Relief and Loan Plan, Ralph Roop and Charles Fisher were elected to serve as administrators of the plan. Appointive members of the board are E. W. Lankenau and L. V. Baker.

At the first meeting of the new board, Ralph Roop was elected chairman to succeed Milton Brown, who served in that capacity during the past year. Charles Fisher was elected vice- chairman to succeed Bernard Braun, who held this post last year.

L. V. Baker was re-elected secretary-treasurer of the organization.

Eleven Mishaps During February

Eleven lost time accidents, four of which occurred in the Specialty Transformer Division and four in the General Purpose Fr. H.P. Motor Division are reported for the month of February. The total at the close of the first two months of 1941 now stands at twenty-one.

The balance of the eleven accidents occurred in the Motor-Generator, General Service and Decatur Divisions.

Works Laboratory

(Continued from Page 1)

work may involve odd looking apparatus and equipment, much of which is highly specialized and the problems may appear complex, but to the laboratory man it is all in a day's work, just like in any other job.

The Fort Wayne Works Laboratory is a service organization as the following definition will indicate. "Works Laboratory—A department composed of specialized engineers, working together as a group and having a common interest of effective service to the engineering and manufacturing departments."

This service involves many activities, most of them having a community of interest with each and every employee of the Fort Wayne Works in such common problems as cost reduction, improved quality, reduction of waste and spoilage, better materials and methods, improved working conditions and many others. Any employee at any time may call upon the Works Laboratory for service or information. The series of pictures accompanying this article show some of the activities and equipment in Bldg. 28 devoted to the everyday problems of the design, manufacture and testing of the many products of the Fort Wayne Works.

Acceptance Tests

When shipments of incoming materials, such as sheet steel, die castings, insulating papers and others intended for production come in to the receiving department, samples of each lot of material are selected and sent to the Works Laboratory for chemical analysis and physical tests. The results of these analysis determine whether or not the material is of satisfactory quality to go into the product. If not, the shipment is rejected and must be replaced by satisfactory material. This is one way in which the Works Laboratory helps to maintain General Electric quality. Photo No. 1 shows a portion of the analytical laboratory; No. 2 the spectrographic and metallographic equipment and No. 9 the physical test equipment, all used in acceptance test work. This equipment is also used for the investigation and development of new and better materials.

Electrical Engineering

The Works Laboratory is well equipped to help both the engineering and manufacturing departments in their problems of electrical design and testing. Many special electrical instruments and apparatus are maintained in the laboratory. Photo No. 3 shows a portion of the electrical section and pictures a cathode ray oscilloscope—a most useful electrical tool—being used in coordination with a wave analyser.

Electrical Insulations

The problem of proper and adequate electrical insulation of the products of the Fort Wayne .Works involves a variety of materials having exacting properties. The insulating papers alone constitute a major problem of development and control, that the factory may have a minimum of difficulty in the manufacture of motors and transformers. There also are the problems of insulating varnishes and treating processes of Formex and other types of wire insulation and many others. Photo No. 4 shows a portion of the equipment devoted to the study of treating processes and photo No. 6 shows some of the equipment used in testing and evaluating insulating materials and systems.

Magnetic Materials

The development and control of magnetic sheet steel and similar materials used in our product is an interesting and important part of manufacturing electrical equipment. Photo No. 5 shows some of the furnaces and equipment used to develop annealing and heat treating processes.

Welding and Brazing

Welding, brazing and soldering are important processes in the manufacture of the many parts entering into the products of the Fort Wayne Works. Photo No. 8 shows some of the welding equipment in the laboratory used in the study of the application of these processes to do the best job at the least cost.

Finishes

A durable and attractive finish is an essential part of quality merchandise. The Works Laboratory is well equipped to investigate and test the newest and best in both organic and metallic finishes. Photo No. 7 shows a "Weatherometer" used to test and evaluate organic finishes under simulated outdoor weathering conditions, but at an accelerated rate. The "Weatherometer" subjects the finishes under test to artificial sunshine, rain and other weathering influences.

Decatur Foremen Are Gecode Guests

Foremen of the Decatur Works were guests at the St. Patrick's Day party held last Saturday in the G-E Club rooms. Ann Murtaugh acted as toastmistress, and a sextet composed of Lorene Reppert, Charlotte Butler, Mary Miller, Dollie Schladenhauffen, June Miller and Vera Roth gave a program of Irish songs. The committee in charge of the affair included Miss Murtaugh, Eileen Dull, Mary Miller, Esther Strickler, Florence Brandyberry, Helen Roop, Effie McGill and Lucinda Borne.

WITH THE COLORS

The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

LESTER F. MENZE, Assembler—Bldg. 4-4. Selective service draftee. Temporary assignment Fort Wayne. Residence 2919 Smith Street.

DONALD W. REASER, Machine Operator, Motor-Generator Division. Selective service draftee. Assigned Fort Benjamin Harrison. Residence, 1410 Sinclair Street.

Tracing No. One

(Continued from Page 1)

"It may interest you to know that on December 1, 1888 I was a member of the drafting room force and if that drawing was traced at that time, the drafting room was in the old Weber Hotel building on Calhoun Street opposite the Wabash depot. The drafting room was the front bedroom on the second floor. I think that building has a different name now, but it was the Weber Hotel at that time. Now that the track elevation has gone through, the first floor of the building at present, I believe, was the cellar in 1888.

"Because Herbert Hartman was such a good hand at printing he was for a long time doing most of the tracing and printing for all of us but he didn't like it after awhile and rebelled against doing all this lettering and tracing.

"I want to call your attention to an error in the text below the reproduction of the tracing. This note says that the drawing was made by Olaf O'Farrell. This name is wrong. It should be Olaf Offrel. The way it is printed it is a peculiar combination of Scandinavian and Irish, but as a matter of fact Mr. Offrel, who was then the chief draftsman, was either a Norwegian or a Swede, and I think he was a Norwegian. He was a great friend of O. N. Guildin. They were both Scandinavians, but one was a Norwegian and the other was a Swede and I think Mr. Guildin was a Swede. I am afraid Mr. Offrel, if he knew it, might turn over in his grave to see his name made so Irish.

"You will probably find if you locate other early tracings made about that time, that Herbert Hartman traced and lettered very many of them."

Alonzo Price Retires On Pension

Alonzo Price, Bldg. 19-4, retired on pension this week after completing twenty-one years of continuous service. Mr. Price started work with the General Electric in 1918 but took employment elsewhere for a short period. He returned to the G-E in 1920 and was assigned to the ice machine department under the direction of Clark Orr. In recent years Mr. Price was engaged in Fr. H.P. Motor work and at the time of his retirement was employed as stator grinder in Bldg. 19-4.

Mr. Price, who received many gifts and expressions of friendship from his co-workers on his retirement, plans to spend much of his time fishing, hunting and making tours with his car. He will maintain his residence at 1212 Wall Street.

Plastics Future

(Continued from Page 1)

of aluminum. They are corrosion-resistant, and have comparable structural and impact strength and, in addition, provide excellent electrical insulation.

Although molded plastics is the more familiar type, Mr. Richardson stated that laminated plastics, formed by plies of plastic-impregnated paper or cloth pressed into a homogeneous mass also will continue to command the increased attention of engineers and manufactures. This material, he said, has largely been used as electrical insulation, but because of its toughness, strength and the other characteristics similar to molded plastics will find additional uses in various industries.

Mr. Richardson said that the automotive industry is the largest single user of plastics and the electrical industry is second.

$800 SUGGESTION

Eight hundred dollars for a single idea—that is what Rudolph Black has received from the General Electric Company. Black, an employee in the radio transmitter department of the Schenectady plant, made a suggestion a year ago for improved calibration of transmitter frequencies. The company rewarded him with $200. Increased production of transmitters this past year brought increased savings to the company, so Black received an additional $600 bonus.

FREE CLUB MOVIES

Another G-E Club Free Movie will be shown Sunday, March 23, with shows starting at 2 and 4 o'clock. The feature picture is entitled "The Outsider." Admission will be permitted on presentation of a G-E Club membership card.

Alex Smith To Be Keynote Speaker

Alex. Smith of Schenectady coordinator of the WORKS NEWS in the apparatus works of the Company will be the keynote speaker at an all day forum session of the House Magazine Institute at the Waldorf Astoria in New York, March 26. The forum will be devoted to speaking and discussion of employee publications. Many leading industrial editors of the East will attend.

Student Assistance Applications Are Now Being Accepted

Applications for student assistance through the three educational loan funds sponsored by the Company are now in order, according to the office of the Secretary of the Company. Applications must be made before May 1 for the Gerard Swope Loan Fund, the General Electric Educational Loan Fund, and the Charles P. Steinmetz Memorial Scholarships.

These applications are to be made to the Personnel Department, Bldg. 21 or directly to the Secretary of the Company, W. W. Trench, at Schenectady.

NEWS THROUGH THE PLANTS

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

We have all had our embarrassing moments and perplexing experiences, but has your button come under the heading of "Lost, Strayed or Stolen" since March 3rd? All the perfect alibis which went through your mind from the time you left the street car until you entered the gate just don't go over. Let's follow through the experiences of one of our girls and let it be a lesson to you.

"It was a beautiful morning. Everything had gone just right. I didn't pull any runners in my hose, didn't chip my nail polish and my hair, in spite of having been shampooed the night before, combed out beautifully. Yes, it was indeed a beautiful day until—

"I walked blithly through the gates of the General Electric Company, and in my usual absent-minded custom reached confidently into my purse for that very unflattering likeness of myself without which I don't even breathe comfortably. At that very moment the day which had seemed so perfect became most wretched. My badge had disappeared. It was incredible that I had at last done the thing which I have had nightmares of doing since last August. Lost? Forgotten? Stolen? It didn't make any difference which of these three I had become a victim of. From that moment on I was an outsider.

"The watchman who usually beamed, "Good Morning", on the worst possible mornings gave me a scathing look which plainly said, "Traitor!" as I falteringly told him of my unfortunate situation.

"The next hour was one of mental torture. I hopefully called home only to be assured that I hadn't left it on my dressing table. I grew panicky, and for the twentieth time dumped my purse, loaded in a typical womanly fashion, on the watchman's desk.

"After the watchman was really quite positive that my badge (and to think I once scorned it) was gone, he began to offer advice on the procedure of obtaining a new one. Being desperate, I obeyed him blindly.

"It was an embarrassing ordeal which I shall probably relive in horrible reminiscence many times in my life.

"From this dreadful experience I have drawn two definite conclusions that I would like to pass on to other 'Likely to Forgetters'. First, any effort one makes to remember his or her badge is not nearly so great as that to get into the General Electric without it. Second, you may be confident that there are at least a few true Americans in this world of fifth columnists.

"The next time you pass your watchman, salute him. He's one of them."

Anonymous.

Classes in Books, Travel, Personality, Art, Music and Religion are now starting at the Y.W.C.A. If you are interested, call one of us or the Y.W.

As Bill Winner, Bldg. 19-5, started toward the gatehouse, the smile left his face and his steps grew slower and slower. He fumbled through one pocket and then the other—ah! at last a smile broke forth. He found his badge. It was in the lining of his overcoat. Bill still says he was looking for a match.

Thisa And Thata 19-5

You could tell who were Irish on Monday morning. Did you notice Veva Healey and all her green finery? . . . Irma Huhn, Thelma Purdue and Gretchen Webb are still on the sick list. Hurry up and get well. . . . Betty Long had a shower in honor of Sue Thompson. Prizes were won by Ruth Harsch, Ruth Rosenberry, Avinell Gailey. Others present were Mildred Friedrich, Genevieve Frazier, Sarah Chelf, Erma Hiatt, Helen Weimer and Helen Engle.

Ruth Harsch seemed to have a little difficulty with Mr. Wind and her hat. Every time she got ready to grab the hat away it would go. It finally got so heavy with mud that Ruth was able to stage a capture. . . . Betty Breihoff seems to have a bad case of dropitis. Why doesn't Louie Clark buy a horse and buggy. At least the wheels go round . . . We don't know the cause, but we do know that Margaret Bennett and Rosie Lauer got off of the elevator on the fourth floor. Don't you gals know that we work on the fifth?

19-4 Spot Jottings

We worried quite a bit about the date of the vest given to Clyde Helms by his good friends. But we know now for we saw it on Ed Robins, and quite a handsome figure Ed cuts in it, too. . . . Flash, Herb Braun came to work one morning without his overshoes. Spring is practically here. . . . Hi there, Adele, that's a nice new gasoline buggy we saw you driving Sunday. . . . Thelma always rang in just under the wire, but now she gets here bright and early. To ease the curiosity of the other fan motor girls, Thelma was asked to make a statement. She insists she stages an early arrival in order to get a coat hook. . . . Agnes Grosjean says those terrific yawns on Monday morning were not caused by late hours on Sunday night. On the other hand, there were no yawns on Tuesday morning.

Do you remember when?—Harold Bohde, Bldg. 19-3, killed a deer in Michigan; Fred Geisler, was a good rabbit shot; Walter (high score) Cornelius was a basketball player at Columbia City; Gilbert Rosa made a drain tile at Aboite Center; George Claney was a truck driver out of Toledo; when the girls called to Charlie Roach, "Oh, Butch, I've got chocolate"; when someone drove a kicking white mule down Fairfield Ave. Oh boy, how time does fly.

Amos Schlaudenhauffen, the welder in Bldg. 19-3, must have thought he was on the wide open plains when he took a corner during the last icy spell. Amos says he knows a shop where they can iron out a car to look good as new.

Ted "Tater" Schlup, Bldg. 19-3, who raises a very fancy breed of chickens on his farm west of the city, had some bad luck the other day when a dog got into the flock and made a bunch of laying hens look like just ordinary meat market types of poultry. Ted called in the neighbors to evaluate his loss but it is reported that he was not satisfied, inasmuch that the hens were a cross between Shanghi and Red Banty, making them a special high class breed. The neighbors agreed inasmuch that the dog was also of high class breed and he never touched a few sick and fair to middling hens.

NEWS FROM THE CAMPS

As indicated by the above snapshot, Richard B. Olson is doing all right at Fort Crockett, Galveston Texas. Dick, who was employed in Bldg. 17-2 on inspection and packing is a member of Battery C, 20th Coast Artillery, harbor defense.

6-4 Magneto Mumblings

By the Eavesdropper

With visions of lovely spring weather completely shattered by Ole Man Winter's resurrection this week, Virgil Guebard finds it difficult to explain the "spring fever" he seems to have contracted.

At a party held recently by the "Magneto Madmen," H. Timms found a new method of playing that famous game he learned at Purdue, only in the new method, the winner doesn't take all. From what I "hear," the party proved to be quite a killer, bets on games being made in half cents, copper lead nickels, and counterfeit half dollars with holes in them. The wooden dice cubes manufactured on the spot proved very kind to Pete Kuttner, and they weren't loaded either.

Wilbur Stocks wants it known that the best way to both keep up the morale of an office and voice one's wrath, is to sing a song. After hearing his "little dittie," it is one person's opinion that he reserve his vocal contributions for the bath-tub.

Speaking of vocal aspirations, Wren Herbst, the Bldg. 6-4 John McCormick, requires only a wee bit of oncouragement to give a concert on demand.

Those four beautiful damsels of the bowling alley, Jean Fell, Phyllis Walter, Mary O'Connor and Yvonne Foley, bowled a swell hot fudge sundae score last Monday evening . . . eh, girls?

Here's something that ought to interest Esquire: Chuck "Pretty Boy" Lahrman, started a new style in men's shirts last Friday.

Rolly Wickliffe and Orville Ellingwood, Bldg. 26-2, sure were in the dumps Monday. You would think they owned stock in the Northside Red Skins.

Bronson Miser, Bldg. 26-2 found himself in a predicament when one of his shoes dropped from the bench into a box and got lost. Bronson had to borrow a shoe from one of the boys so that he could go home.

19-5 Office Chatter

It seems that news is hiding around the corner, at least it is not coming my way—but the boss won't take that for an answer so here goes. Carl Reynolds has dazzled all the fellows with his super super pipe, but it didn't belp him on his first euchre game. Virginia Klopfenstein has been pouring over road maps and trying to figure out how she is going to haul that ironing board to California in her coupe. Gordon Smith promises to report on a famous recipe that he is trying out. We want samples. As George Prince bets, so go the basketball games. Famous last words: "Bernie, do you want to solder an armature?"

Dots And Dashes 26-3

The Transformer Department wishes to express good wishes to the following girls who are venturing on the sea of matrimony: Bertha Thompson who will become the bride of Phillip Robertson on March 22; Mary Prince who will step it off with William Mitchell on April 13; Esther Liechty who became the bride of Lester Babcock on March 15 and Edna Yargen who becomes the bride of Victor Stahl . . . We hear that Grace Biedrzycki hates to see anything go to waste. Particularly if its a piece of chicken left on the platter. . . . What is this story about Vera Woodward changing shoes with most anyone as long as its a half size larger than her own? Must be a story in it but we don't know what its all about. . . . Shame on you, Edith Mennewisch, as often as you have seen ostrich eggs you should have known at the Elex Quiz that they are not blue. . . . Mildred Baker seems to have the wrong idea about bowling. You see, Mildred, the object is to knock down the pins, not to throw the ball down the gutter. . . . Hurrah for Edna Kiem, who knows how to change misfortune to happiness. Thanks for the birthday cake although it did take a whole half day to bake it. . . . Hilared Todd was honor guest at a birthday party held at the Berghoff, and in addition to other gifts received, a toy piano. Hilared likes to play but had no piano. Those attending were Loretta Day, Audrey Wilcoxson, Ruth Bremer, Marcella Davis, and Bonnabelle Hart.

Winter Street lays claim to the shortest and most painless divorce on record and we have photographs to prove it.

At the start of the Elex Quiz contest covered on front page of March 14th WORKS NEWS, one of the contestants shown is Mrs. Evangeline Robinson, happily married to one Keith Robinson. At the end of the contest she is not only one of the winners but is also divorced and has resumed her maiden name of Evangeline Klingman and all this without ever being away from the Quiz contest. If that isn't a record for speed and efficiency then Britain doesn't need our help. (P. S. We're only kidding about the whole thing.)

Arlo Hawk, Bldg. 4-4, put on some nice acrobatics for the second shift the other night. Arlo says he still gets a kick out of having a fist full of those big matches in his pocket. We feel he ought to leave some of them home for the little woman.

SANDY SAYS

Hoot Mon! March 21. The day I ought to start my spring offensive, (if I haven't been offensive enough all winter). But in the spring all our thoughts are "want to gang astray."

In the spring a young man's fancy lightly turns (according to Sandy, Jr.,) to marbles and kites. And you know very well where a housewife's thoughts turn to unless you have spent all your life in a hotel or hobo jungle.

And speaking of kites is someand hobo jungles, a kite is something that the business curve has gone higher than, and a housewife's instinct is what we need, with all this business clittering up the place, or it will look like a hobo jungle.

One or a dozen housewives couldn't keep it straight either. It will take every single one to help do the job. And in doing it we'll all help economize by not letting parts get lost, mixed up, or spoiled.

Now, with that thrown in for the lads, whoever they are, that put my picture on the bulletin boards, let's get on to something I wanted to tell you about.

It's about Cousin Jeannie with the light pink hair. She's Colin's wife. Well, Jeannie broadcast it to the Clan, as women will, about how Colin had helped her with the spring house cleaning. Of course she had to get her "persuader" out of the flour bin to get him started, but poor Colin bopped rugs, mopped floors, and swapped furniture until he all but killed himself. If he hadn't, Jeannie would have. The killing, I mean, not the house cleaning.

Well, the men got together and decided to do something about it, so we did. Uncle Angus made the speech:

"Fellow clansmen," he started. "we lads hae gathered to consider yon Colin, because of his vailent and unusual service in helping his spouse wi her cleaning, and to show our sentiments we present him with this beautiful empty watch case. Noo, if he repeats his performance next year, we'll give him the WORKS."

Sympathy

Employees of Bldg. 19-4, extend their sympathy to Clarence Johnson in the death of his father and to Arthur Witzigreuter in the death of his wife.

A .R. Vegalues, plant protection department, wishes to take this means of expressing his appreciation of the many expressions of sympathy extended him in the death of his father.

The filing department in Bldg. 19-5, wishes to express sympathy to Henrietta Deck in the death of her sister.

Our deepest sympathy to Catherine Peters and Clem Wilson in the deaths of their fathers.

Suppose Peggy Bowers, Bldg. 19-5, believes that a Miss Liberty emblem will take the place of her badge.

That gay young blade from New Haven, Eddie Hemsooth, now has a few blades of hair on his upper lip. They can plainly be seen if the microscope is adjusted just right. Perhaps a little Vigoro would propel these infinitesimal protuberances to the fore so everybody would know he is raising a mustache.

News On The Nose From 4-5

Dear Editor:

We are your devoted servant and columnist, but it just seems that we can't serve you with much copy for your wonderful WORKS NEWS, because the guys and gals in Bldg. 4-5 are just too busy working to furnish much activity for our not so newsy column. However, we have caught them unawares several times, and present these few candid shots.

We found Ray Swartzel wandering around in a contented daze after "Champ" Al Ray had let him win a game of checkers.

Hilda Walda, Betty Cox, Evelyn Straup and Betty Smith came back to work Monday with many delightful memories of a trip to Muncie where Fort Wayne's Redskins fought a good, though losing battle, in the super-regional basketball tourney, Hilda, it appeared, enjoyed the antics of "the man with a bottle" who sat next to her as much as the others enjoyed the game.

And A. L. Foellinger was in the right spirit Monday, and dated all his papers "Saint Patrick's Day" instead of the prosaic March 17th.

Who was the dignified gentleman we saw wearing a kelly green hair bow in his pretty grey locks? Some one told us it was Bryan Brown.

And didn't some one put something over on Andy Lee and Stu Herring who didn't notice the good looking red-haired typist, Jean Saunders, who was a recent addition to the Bldg. 4-5 office, until she had been there about six hours. Slipping pretty far, we'd say, and they can't understand it themselves.

Oh shucks, we've just lost all our inspiration and all because that nosey messenger boy, George Denner, from Bldg. 4-6, decided to grab a peek prevue of our column. To think he would do that to us when we never told about the time he had a "date with a dream," his own words, then had a frantic time getting some one else to take her out because he was going down to Tennessee over the week-end.

We close for this week with several good tips to pass along to those of you who work in offices. When you see some one on your telephone line and you want to use the phone, just start a conversation with yourself into your end of the phone. Irvin Koehlinger has noticed how effective the method is in making the other person drop off the line. Caution, however, it wouldn't be advisable if party No. 1 had already been connected with his party of the second part.

We personally have discovered how to keep your dish of paper clips and rubber bands from becoming personal property. Just mix them together so well that no one besides yourself will bother to take them. It worked very well on "Bill" Henninger, so we are satisfied.

In parting, let us offer these words of wisdom to those bitten with the love bug:

"It's fun to court,
But oh how bitter,
To court a gal,
And *then* not git her."

Mr. Henpeck (hesitatingly): "Sir, I—I think it is just about time I got a raise."

Boss: "Why, we just put a raise in your envelope on Saturday!"

Henpeck: "Why doesn't my wife tell me these things!"

Doctor: "I'm sorry, but I'll have to open you up again. I can't find my other rubber glove."

Patient: "Don't be silly! Here's a dollar. Go out and buy yourself another pair!"

Is Zat So?

Another get-together was held by the Bldg. 17-1 gang Friday night at the home of Ernie Barr. After a lot of hard work and a couple of broken ribs, Ernie finally got his basement fixed into a grand recreation room. Jake Bieler wanted to know how much sawdust he should bring for the floors! Billy Wehrs examined all of Ernie's tools and demonstrated that he still knows how to handle a hammer! After playing cards, LaMoyne Gale ran off several rolls of films on his movie projector and was surprised to find so many of us interested in the study of art! . . . Dorothy Buhr entertained the Birthday Club at her new home recently in honor of Loretta Himbert's birthday. The club also presented Lillie Pion with a lovely wedding gift. . . . Bill Franke and Russell Gibson must be going domestic. We hear that Bill is chief cook at the church suppers. We wonder if he might be practicing so that he could get a job with Harry Zimmerman at the Works' cafeteria! Russell Gibson was proudly wearing a pretty red and white house apron at work the other day and from the way he acted it wasn't the first time he ever had one on. That's all right, Russell, we thought it was very becoming to your tall and graceful figure. . . . LaMoyne Gale's determination to keep his new red Buick looking like new was to no avail. We hear he wrecked it the first day he drove it. Are you trying to compete with one of the characters in "Tobacco Road," Gale? . . . Henry Papenbrock and Dorothy Buhr have had a lesson in remembering. We bet they won't forget their badges again. . . . Ernie Riley, our red-headed Irishman, was proudly displaying a big shamrock and long green ribbons, Monday. . . . Harry Kessler is back to work and warns others not to try to roll down the alley on a bowling ball as it is pretty hard on the ribs. . . . Marvin Marhenke is on the sick list, but we hope he will have a speedy recovery, and soon be back to work. . . . We wonder how much mileage Argend Denney gets on one stick of gum? Denney's jaw must work on micro-motion, as the faster he runs his machine the faster he chews. His endurance is remarkable. . . . As Bill Fisher would say, "There I go, hitting the ball again," so I'll close for now. See you next week.

THE QUESTION MARK.

Buck Adams, Bldg. 4-3, sure has his troubles. He tells us that he now has a bad case of Automobilia. Every time he plans on using the family jalopy his wife beats him to it and Buck has to back up. Then he misplaced his new license plates and narrowly escaped having his chariot impounded. He said, "One of these days I am going to take that thing out and have it torpedoed."

We believe that Lawrence Ankenbruck, Bldg. 4-3, is becoming air minded. He and his young son were observed last week-end making for the wide open spaces—the boy with a kite under his arm. Upon reaching an open field, Lawrence proceeded to take said kite from his son and fly it himself. All that we have to say is Ankenbruck, Sr. sure flies a mean kite.

George Guenther, Bldg. 19-3, says "you must have a jar once in a while to awaken you." We wonder if that is the reason George thumped his car against the light poles in the parking lot. That happened Tuesday and George is very much awake, but it would save the car George, if you merely bumped your head.

Punch Press 19-5

By Slug

We are made very sad by the fact that one of our most esteemed comrades is reported to be failing in mental coordination. This gentleman went to great pains to secure tickets to the basketball game and considered himself all set until he came face to face with the man at the door, who always has his hand out. There followed a search through pockets, hat and shoes but finally Harry Magner grabbed Warren Jackson, his partner for the evening, and beat a hasty retreat to the Magner Manor. Sure enough there were the tickets reclining in the drawer where they had been placed. Followed then the long journey back but we hope the games acted as a soothing influence to jangled nerves. . . . Carl Satterwaite, the professor of bowling science, has taken unto himself a pupil, but the dope is that the pupil, Cliff Balyeat, has been warping the professor quite regularly. . . . Fifty years without a toothache sounds like the beginning of a dentrifice ad but it's the truth and the record belongs to Fred Roebke. Fred's luck fizzled out last week and he had to see the man who says, "open wide please." . . . Ernestine Johnson announced her wedding of last September and came well armed with candy and cigars. The Punch Press wishes you many happy years ahead, Ernestine.

A Busy Noon

Whistle blows. George Momper, Bldg. 19-3, dons hat and coat and sallies forth to sojourn with nature. Leaves identification button on vest. Vest on hanger in Bldg. 19-3. Jack Leedy spends noon in office. Deep in meditation. Phone rings. Jack answers. Momper held at gate house. Watchman says "no button, no get in" in much the same manner as Chinese laundry man who remarked "no tickee, no washey." George pleads for assistance. Jack putting aside desire to kabitz at euchre game or take nap finds button on vest. Rushes out with button. Delivers same to George. George gets in. Watchman happy. George happy. Jack tired but happy. Thus ends a busy noon.

Cozy Fillman, Bldg. 4-3, was observed at the east entrance to the plant on Wednesday morning at 10 minutes till 7 a.m., but she did not appear in her department until well after 8 a.m. She was wearing what appeared to us as a brand new identification badge. We wonder if Cozy had the misfortune to lose the original. In fact, we know she did.

Now that the Pug Dog is coming back into favor with dog lovers, Forrest Whonsettler, Bldg. 4-3, has leased 80 acres of land east of Avilla and is going to establish a super-kennel to raise these famous dogs. The kennels are to be known as Whonsettler's Pug Doggerie.

THE TIME
TO THINK ABOUT
SAFETY IS
BEFORE
YOU GET HURT!

Bldg. 4-4

Lula Heine missed her calling. She should have been a surveyor. She was busy surveying her bench the other day. . . . Lenora Boone planning on taking a lot of trips this summer in their new Buick. . . . Not everyone has the honor of getting two stickers in one day. Harold Amstutz found that out. March 13th was very unlucky for him. . . . Perhaps it's an old southern custom, I don't know, but I hear that Bernadine Wilson starches all of her wash, even her husband's pajamas. . . . Did you know that Harry Snyder cannot eat an apple without salt? . . . Have you noticed that Marjorie Thompson is losing weight? Thirteen pounds. If you keep that up, Marge, you'll be a mere shadow. . . . We wonder how Louise Roberts rates a spiral machine off in the corner. . . . Margaret Thompson did not get in to work before noon Monday. Was it because she had to wait on her yellow blouse to wear with her green skirt for St. Patrick's Day, or was she planting her sweet peas. . . . Victorie Roamick has a new G. E. stove. Vick says she is a good cook but with a G. E. stove any good cook can do better. . . . We wonder where Marian Stuckey got her new red hair bow. . . . We were all glad to see Elizabeth Wolf back to work after recovering from an operation. . . . We wonder if Phyllis High could have gotten her dates mixed as she came to work with her green sweater on Tuesday. . . . Bonnie Jetmore has a new boy friend and she says he looks like Robert Taylor. Bring him around some time, Bonnie, we would like to give him the once over. . . . We wonder what Paul had on his mind the other day when he tripped himself with his broom. Could it be the perfume the girls are using made him groggy? It might be the fibs Lucille Baker has been telling him about herself. . . . Oma August has found a new Sunday afternoon hobby. She has been sampling all the new car models on the market.

We haven't been able to find out why Carey Baker, Bldg. 26-5, had a toy dog chained to his bench with a 10-ton chain. And why the sign, "Mad Dog."

Congratulations to Arthur Singleton, of the General Tool Division, Bldg. 26-5, who has been transferred to the Developmental Department of the General Purpose Fr. H. P. Motor Division. Art is a graduate of the Apprentice School, having completed the machinist-toolmaker's course in March, 1940.

Notice: (Three car family expense too high.) One Chevrolet flywheel plus parts for one Buick plus reassembly of one Austin equals, too darn much. Ask Ed Schafenacker, Bldg. 26-5.

The rotor gang paid tribute to the North Side Redskins as follows: Rufus Niblick, one drumstick; Earl Lenz, one powerhouse; Walter Elliott, one ice cream sandwich; Gordon McDougal, one orange juice and one tomato juice. Hank Wittber is reported to have been willing to bet if he could get the whole tournament field as security.

Lloyd Cowell, Bldg. 8-1, was seen refusing to sit down on the street car while there were ladies standing. There must be some reason underneath it all.

Much comment has been heard in the Bldg. 4-6 Drafting Department regarding the disappearance of Bill Manecke's hirsute appendage. The chief discussion centers on how Bill gets by the watchman with the obsolete picture on his button.

Slips And Chips

By Sir Vis, 4-4

The other day Forest Gee walked into the wire fence surrounding the tool grinders. No serious injuries reported, just a slight skin injury from which he recovered very rapidly. . . . The Newton Milling hasn't been moved out yet. They must be figuring on sending it to some Indian reservation because it has been setting under a sort of tepee (tripod) all week. I suppose this was to get it acclimated to the surroundings. . . . And by the way, it looked so much like a tepee that Charlene (Minnie Ha! Cha!) Snyder tripped up to it in sort of an Indian dance step while some unseen person beat the Tom Tom. . . . Gee slipped twice this week and his slips are like whiskey, the longer they go, the better they get. . . . Gee (to himself), "I don't seem to get enough heat from my welding machine, so I'll just use Shaw's." (After adjusting Shaw's control board to the heat he wanted and carried Shaw's electrode to the job, he sat down to weld, picking up his own electrode and started to weld) . . . Gee (to himself again) "I don't know what's wrong but there is not enough heat yet." (He re-adjusts Shaw's control board to a higher heat and picks up his own electrode again and tries to weld). Gee (to himself) "By gum, I can't figure this out, I certainly ought to be getting enough heat." (Just at this time Shaw appears and picks out his (Shaw's) electrode). Shaw remarked, "You through?" . . . I hear that Red Rarick is furnishing Wm. (Bill) Johnson with lunch money. "Brother, can you spare a dime." . . . If you see Charlene Snyder purchasing Virgil Asher a piece of candy, it is to keep some story from me. It must be a good one because I heard Asher say, "I'll get a piece of candy from her for that slip." . . . When Bill Johnson goes home he really goes home, if he gets the right door out. Bill found himself going up to the wash room the other evening when he intended to go down the stairs. . . . I am told that the girls are now giving cookies to my friend Albert (Cookie) Steinhauser of the rotor section. You are sure reaping dividends from your investment. . . . For the benefit and pleasure of my dear friend Erick Helwig, of the rotor section, I quote "Another Friday has rolled around and not a thing to say." I hear Eric is figuring on copywriting this quotation.

Anyone desiring any pointers on golfing just ask Jane Clark, Bldg. 4-3. In a couple more lessons she's going to be teaching the pro.

Kathryn Carrick, Bldg. 18-4, received more than the usual box of candy for Valentine's Day. Lucky guy, this Tony.

McTavish was the proud owner of a new cash register. One day, when an old friend came into his place of business and bought a cigar, the customer noted that McTavish pocketed the money, instead of putting it into the drawer.

"Why not ring it up?" he asked. "You'll be forgetting it."

"Oh, I'll not forget it," replied McTavish. "I can keep track of it in my head until I get a dollar, and then I'll ring it up. It saves the wear and tear on the machine."

Parent: "My daughter tells me that you are a church member. What church do you belong to?"

Suitor: "Why — the — er — name some of them over."

(Continued on Page 6)

Basket Champ To Be Determined By Game Tonight

S. M. Factory and West Side To Play Third and Deciding Game at G-E Club

Four long months have passed but the championship of the G-E Club Inter-department Basketball League is still undecided.

West Side won the first half and Small Motor Factory copped the second, consequently a two out of three game playoff was necessary but two contests have been played and nothing has been settled as the Westerners took the first encounter 36 to 35 and the Factory evened things up Tuesday with a 35 to 30 win.

In the initial encounter West Side in the first two quarters practically made a rout of the contest as playing a cool, careful game they ran up a 21 to 6 lead. The Westerners during these first two stanzas kept control of the ball until one of their members shook himself loose for practically a cinch shot, and with Horstmeyer throwing in nine points and Offerle contributing six, West Side treated themselves to a lead that looked as if to be more than sufficient.

Small Motor Factory, driving with everything they had, managed to cut the lead down to ten points during the third stanza. In the next canto, the Factory, by using a fast break type of attack and an all over the floor defense, continued to cut down the Westerners' lead until, with only two minutes to go, Marquette hit his third successive basket to make it a "new game." Both teams started to tear up and down the floor in an attempt to get the next point. Vonderhaar, Factory forward, was fouled in a mix-up under the basket and converted the charity toss to give his team a one point lead, but Yoder, West Side captain, poured a mid-floor long shot through the meshes that netted his team the lead and game.

In the Tuesday contest the tables were reversed as Small Motor Factory took the lead and managed to maintain it throughout the whole encounter. With "Jap" Voirol garnering seven straight points, Small Motor grabbed a first quarter lead of 13 to 6. The Factory continued to be hot during the second quarter, holding the Westerners to only three markers while Marquette and Voirol split up nine points to give the Factory a 22 to 9 rest time lead. Small Motor increased their lead to seventeen points in the third frame but West Side's attack that had remained practically subdued during three-fourths of the game, broke out in a scoring rash during the last quarter.

The third and a cinch to be the last game of this series will be played Friday at 7:30 o'clock. There is no admission charge and anyone may attend, whether a G-E Club member or not.

G-E CLUB DANCE

Don't forget to attend the G-E Club dance Saturday, March 22. Dancing will be from 9 o'clock until 12, with Pete Dannecker's orchestra providing the music.

IN THE ROUGH

By WALTER SUNIER

We were all set to write one of those babbling brook, budding trees, flowers that bloom in the spring, tra-la, things when we happened to look outside. A blizzard was raging and it was only twelve degrees above zero. So some other day we will take along the greensward, down by the babbling brook and alongside the budding flowers.

The United States Golf Association performs a great service in several ways. It lays down the rules for play and is the final word on rule interpretation. If each followed their own ideas, golf would soon be a mess. I'll bet we would be breaking par every day, under our own rules. The Association also passes on the design of clubs. Otherwise there would be putters that couldn't miss, automatic sand blasters and so fourth. It passes also on the special specification for the golf ball. It has spent as much as $6,500 in a few months on the development of a standard ball. It has spent much in the development of grasses for greens.

Why not cross creeping bent with a rubber plant to produce a self-replacing divot?—one that automatically snaps back into place.

We wonder if the guy who said "It can't be done", ever tried to hit a golf ball down the middle of the fairway or out of a hole or if he ever tried to scratch a match on a bar of soap.

A girl may wear a riding outfit and not ride; she may wear a tennis outfit and not play tennis; she may wear a swimming suit and not swim; but when she puts on a golf outfit, look out.

A 36 is perfect or in other words a perfect 36. 36 above is OK for the ladies but 36 below - - - - .

Rod-Gun Club Hold Election

Nominees for the offices of the G-E Rod and Gun Club have been announced following a meeting of the nominating committee of which H. Hyndman, Bldg. 19-5, is chairman.

The candidates are C. Morrolf, Bldg. 4-5 and A. F. Bowers, Bldg. 4-3, for president; H. Hyndman, Bldg. 19-5 and E. Leiter, Bldg. 17-2, for vice-president; E. Pion, Bldg. 4-3 and J. McComb, Bldg. 19-5, for secretary-treasurer; L. May, Bldg. 19-5, L. Bland, Bldg. 27-1, K. Griffin, Bldg. 26-3, J. Lewis, Bldg. 17-2, H. Seitz, Bldg. 19-1 and Burl Tillman, Bldg. 19-1, for the offices of directors.

The election will be held during the early part of April.

Elex Board Meeting At Y.W. On March 26

A meeting of the Executive Board of the Elex Club will be held on Wednesday evening, March 26, starting at 7:30 o'clock. Any member unable to attend is asked to call Eva Lynn or Irene Meyers sometime before March 26. In the future a regular board meeting will be held every fourth Wednesday of each month.

Winter Street Is Champion Of The Volleyball League

Taking two straight games from Small Motor Production, Winter Street, Wednesday, added the second half pennant to their already acquired first half title and consequently became the undisputed champions of the G-E Inter-department Volleyball League.

As Production and Winter Street finished the second half in a deadlock, each having seventeen wins against four losses, a two out of three game series was necessary to settle the issue.

Production started out as if to stage an upset as they racked up five straight markers while holding their opponents to two, but the Refrigerator lads at this point staged a miraculous rally. With Rodenbeck racking up eight successive points on serves, Winter Street garnered thirteen markers to cop the initial contest 15-5.

The second game was more bitterly contested as Small Motor Production realizing it was "now or never" battled for every point. The lead kept shifting from one team to the other but the Refrigerator boys made two straight spikes by McLain and a Production misplay good for three points, a 15-12 win and the undisputed championship.

Members of the championship club are Lamimum, McLain, Goodman, Rodenbeck, Motter, Macy.

ON - - the Alleys

By Bob Ringle

A little bit of dirt from the bowling gutters: this is the sad, sad story of a bunch of keglers hailing from Bldg. 19-5. A few weeks back they issued a challenge to take on a team of five bowlers from any one floor in the plant. A bunch of kids hailing from Bldg. 19-3 heard this boast and immediately swung into action. The results were terrific. The challengers came out on top 2787 pins to 2768. Individual results are as follows: Bldg. 19-3 team—Skevington, 151-222-191; Weaver, 220-199-156; Wyatt, 147-181-161; Schlup, 172-212-197; Brandt, 209-173-196. Bldg. 19-5 team—Ludeman, 200-192-170; Rose, 147-172-182; Kammer, 169-243-195; Rump, 183-201-196; Rose, 184-144-190.

I guess Mussolini is not the only guy who is trying to take in too much territory. Take a peak at the G-E Club Major League results for last week—those boys were really mowing down the pins—Frank Matthews evidently not content with a 671 total last week came up with a fat 684 count Wednesday—this gives him a 12 point margin on the total pin lead—Bill Doehrman continued to boost his average to 201 for 57 games—don't look now but the boys will have to start staying home nights as the bowling season is rapidly drawing to a close.

SAFETY IS not A ONE-MAN JOB!
LET'S ALL HELP,

NEWS THROUGH THE PLANTS

(Continued from Page 5)

Borings From 4-4 Office

Greetings and stuff—just another week and life as per usual—nothing too exciting—but 'tis running along in the same groove.

Do you all remember Ardeth Hemp. Well Charlene Snyder and husband, me and my girl friend went to Sidney this week-end to see her. Say, you should see her ranch. I got lost a couple of times, but a good time was had by all. We were so afraid that we wouldn't get enough to eat so we took our own food along. It was fun and she was mighty glad to see us, too, (so she said). Talk about the Hoosier hoodlems, the Ohioans have us beat.

Did you know that Emmy Stock likes balcony? Just ask him.

Melvin Warner saves shoe leather nowadays by riding down the conveyor. Cliff Uncapher tried it too, but the thing stopped before it got too far.

Robert Reardon, Sr., wishes to announce that in the future when the name of Reardon appears in this column, it will be that of his son and not Sr.

Mary Hakes has lost her voice, and you should hear her try to elucidate into our weak brains. She sounds as if she had swallowed a biscuit and it is half way down. Now if you want a second Deana Durbin, don't call on Mary 'cause she would wreck a good set of ears listening to her.

Indiana University Star basketball team met the Pistons of Zollners. It was a clash of the red that met the flash of the blue. However, the blue didn't flash very much because the merry-maxs of I. U. took them, 63 to 33. Betty Mougin thought it was the dirtiest game she had ever seen (she was for Zollner). They weren't dirty, they were just good, having only played together for four years, they ought to be good. Many basketball fans were there to see their splendid basket work, net work, fancy passing, and just good all-around basketball.

Mike O'Grady says "when I'm at home, I feel like I am in a harem," with his three daughters, wife and hired girl. Now personally I do believe that he likes it a lot.

Ife Holmes, along with Vern Daseler, John Burnett and Fred Wilcox believe that the reasons for their telautographs not working is due to sabotash. One of the girls found a note saying that Estel Grier had taken all the fuses out because the machines wrote too much. Virginia Plummer and I got quite a laugh out of this. Now all we need is a full time telautograph operator and general fixer-upper. All applications will be taken by Mel Warner, Bldg. 4-4.

Now that all these blizzards and snow storms are over, maybe spring will soon be here. I hope so, because it's too cold to make love and be romanticised in weather like this.

'Tis plenty for now.

ELMER, the Field Mouse,
The Rat to You.

A Job Well Done

Marie Page, Bldg. 19-5, does things right when she does them. Marie decided to do a papering job and she never missed even a teeny weeney corner. In fact when she had finished she discovered that she had covered over the light switches.

Wonder why Helen Graham was late for work Thursday. We saw her rushing down Broadway toward home. Could it be that she forgot her badge? ? ?

Dick Miller, Bldg. 26-2, is reported to be a Dorothy Dix fan. They say Dick cuts out the column every day and brings it to work for the girls to read.

Wilma Crimm, Bldg. 19-3, and Bob Byers, Bldg. 19-3, have been betting every week since the football season started. Each week the result is the same, the man pays and pays, even to the extent of cracking his piggy bank for funds. Some guys never learn.

Helen Kelsey on the phone, "This is the third floor, I think."

The night that Malinda Gehle, Bldg. 19-5, received her Hurricane Lamp from the Elex Club she sat up all night waiting for a storm. No storm, but Malinda complained next morning that she did feel tired.

Leora Carpenter, Bldg. 4-3, was disappointed twice when her father got credit for finding the lunch basket, and it was Leora all the time, and then she didn't even get to eat it.

Guess Gerald Bosserman, Bldg. 12-B, is getting in some practice doing the shopping in case his wife's drafted into her country's service. Judging by the looks of that new dust mop he was seen toting around down town last Saturday, he must be understudying around the house, too.

The happy, smiling faces of the Magneto Dept. are already missed around Bldgs. 16 and 18. Thank goodness, the girls still like Bldg. 18-3 mirrors. Come back often, Virginia and Mildred.

Irvin "Jack" Koontz, Bldg. 19-3, is reported to have a new racket in gaining gas mileage on his car. 'Tis told that Jack reported to the boys that his battery was down and asked for a push. After being pushed around town hither and thither it is reported the pushers discovered that Jack's tank was dry. Oh well, Jack, it was a good try.

Herman Hake, Bldg. 4-3, had almost decided to trade off his Pontiac when he got stuck in the mud last week. He tells us he had to call a wrecker to come and pull him out. Then the wrecker got stuck and Herman had to pull the wrecker out. So maybe the Pontiac isn't such a bad car after all.

Carl Borchert, Bldg. 16-3, is sure glad the ice has left our lakes. He now has an excuse to go way up in Michigan. He'd better produce now (either fish or darn good excuses).

John Kirchenbauer, Bldg. 12-B, eats his candy with the wrappers on now—says it gives it a different flavor. He sure proved that old adage that the hand is quicker than the eye, all right, but we bet all that paper didn't do his digestion any good. Next time, look for the words "Cheese Crackers" on the label of your afternoon snack, Johnny, before you take it for granted.

Deaths

Joseph B. Johns, 51, well known Decatur employee and World War veteran, died at the Adams County Memorial Hospital, on Thursday, March 6, following a major operation. He had served as a toolmaker at the Decatur Works for the last 18 years.

Wot A Guy!

Charley Waltemath, Bldg. 19-3, wins the fur lined syrup pitcher for this week's masterpiece. It seems he drove to work, parked, and went to his labors. When the bell rang in the evening, Charley rushed out, boarded a street car and upon arriving home found the wife and children all ready to go riding. So out they went to the garage—but no car. Was some one's complexion pink?

GENERAL ELECTRIC
NEWS
FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, MARCH 28, 1941 Number 58

Defense Savings Plan Is Announced

Works Foremen Organize Association

With the election of officers announcement is made of the formation of a new Fort Wayne Works organization to be termed the G-E Foreman's Association. Officers of the association, who are pictured above, are, left to right: Wm. Weidelman, Bldg. 20-1, treasurer; Carrol Elder, Bldg. 17-4, director; Ed Schafenacker, Bldg. 26-5, director; Florian Korte, Bldg. 19-5, president; W. Holloway, Bldg. 4-4, vice- president; Carl Steinbacker, Bldg. 6-B, director; Herbert Driftmeyer, Blg. 26-3, secretary.

The newly elected officers will meet within a few days to outline a program for the organization.

Anniversary Program Planned By Elex Club

Twenty-fifth Year of Club's Existence To Be Observed On Sunday, April 20

Rounding out twenty-five years of its existence, the quarter century anniversary of the Elex Club will be observed with a commemorative "silver tea" on Sunday, April 20, it is announced by Club officials. Preliminary plans include the appointment of Bess Brown as general chairman of the anniversary program as well as members of the various committees.

A large number of guests, including officials of the Company, will be invited to the tea which will be at the Y.W.C.A. between the hours of 3:00 P.M. and 5:00 P.M.

A brief history of the Club, together with committee announcements for the anniversary observance has been prepared by the general chairman and is reproduced as follows:

The Elex Club By Bess Brown

In 1916, a group of young women employed at the Fort Wayne Works of the General Electric Company felt the need of joint fellowship, to further good will and recreation among co-workers. With the enlistment of E. A. Barnes, General Superintendent, they formed the Elex Club. Mabel Whitbeck, Secretary of the Y. W. C. A., assisted them in their program of recreation. The club met outside of regular working hours; original ideas in arts and crafts, social activity, a mandolin orchestra comprised the activities of the club. Minnie Blue, then employed in the Fractional Horsepower Motor department was elected the first president. Out of 360 girls working at the plant, sixty enrolled for membership. The club

BULLETIN

Beginning last Monday, March 24, 1941, dispensary service was made available to third shift operators in Building No. 21 from midnight until 8 A. M.

First aid service for the second shift will continue as in the past in Building No. 2-1.

Radio Stations To Be Heard From Different Spots

A major improvement in broadcasting will begin everywhere in the United States of March 29, 1941, and at that time most stations will come in at new locations on your radio sets.

The shift is called reallocation and has been planned for over a period of three years by the Governments of the United States, Canada, Mexico, Cuba and Hati with the purpose of improving reception of programs and eliminate interferences from stations broadcasting outside of the United States.

Here are new locations of the General Electric stations as well as other stations most commonly tuned in upon in this community.

Station	New Frequency	Old Frequency
WGY	........810 kc.	790 kc.
KOA	........850 kc.	830 kc.
KGA	........810 kc.	790 kc.
WOWO	......1190 kc.	1160 kc.
WGL	......1450 kc.	1370 kc.
WJR	........760 kc.	750 kc.
WLS	........890 kc.	870 kc.
WLW	........700 kc.	700 kc.
WGN	........720 kc.	720 kc.

President Wilson Urges Support As An Aid To U. S. Defense Plans

A new Defense Savings Plan is being formulated in order to make it convenient for General Electric employees to acquire United States Savings Bonds, it was announced today by President Charles E. Wilson.

Mr. Wilson stated: "The Company is, to the very best of its ability, co-operating with the U. S. Government in connection with the National Defense Program. The Government recently announced that it will issue Savings Bonds as a means of financing part of the great cost of the Program, and it therefore seems appropriate for the Company further to aid by making it as convenient as possible for General Electric employees to acquire such securities. I feel confident that you will want to give patriotic and wholehearted support to the Government by investing in these Savings Bonds, and in so doing I hope you will use the facilities which the Company is providing for this purpose."

Full details of the new plan will be announced as soon as they have been worked out, but in brief it is contemplated that, effective May 1, 1941, United States Savings Bonds

(Continued on Page 2)

Veteran Decatur Employee Retires

The retirement of Cassius E. Lutz, veteran Decatur G-E employee is announced by E. W. Lankenau, superintendent of the Decatur Works. Mr. Lutz has been employed by the General Electric Company since 1905, starting with the Plating and Finishing Department at Fort Wayne. In 1915 he was made assistant foreman of this department and continued in this capacity until 1919, when he was promoted to Inspector.

In 1920 when the new fractional horsepower motor factory at Decatur started production, Mr. Lutz was transferred to Decatur to take charge of the plating and finishing operations. In 1936 Mr. Lutz was made night foreman and continued in this capacity until 1938, when he was made foreman of the stator winding and finishing department, which appointment he held at the time of his retirement.

Before leaving, Mr. Lutz made the following statement: "I have been connected with the General Electric Company for the past 35 years. During this time I have seen

• A Challenge

In the news columns today we carry the story of the Defense Savings Plan as announced by Charles E. Wilson, shortly to be offered to all employees. In that story, the facts challenge us to make a sacrifice. They also give us an opportunity to serve our nation directly. The Company is throwing all of its vast aid to the government. It can ask no less of its employees.

Let each of us consider well the situation and be prepared to carry out the hope, expressed in President Wilson's words: "I feel confident that you will want to give patriotic and wholehearted support to the Government by investing in these savings bonds. . . . "

Let it never be said that we failed to rally at the call to service. These are stirring and vital days and we need every one of them and every dollar to put this gigantic program across.

Let us be thankful we need no Winston Churchill who can offer us nothing but "blood and sweat"!

Every wrong we do makes the world meaner. Every good we do makes the world richer and happier.—*Malcolm J. McLeod, D.D.*

No man can be provident of his time who is not prudent in the choice of his company.—*Jeremiah Taylor.*

• United We Build

Twenty-five years ago, fourteen girls with employment at the Fort Wayne Works as a common interest founded a new club which they named the Elex Club. The purpose of the new organization was set forth in the constitution in the following words: "The purpose of this Club shall be to promote social and educational activities, to foster the spirit of friendly service, and to stand for the highest ideals of womanhood."

That was twenty-five years ago, but the ideals which these fourteen pioneer Elex girls incorporated in the constitution of their Club endure to the present day, and still form the keystone, around which the many and varied Elex activities center. The Club prospered during the intervening years. The membership by 1925 had grown to two hundred and fifty. In 1929 it reached the five hundred mark. In 1934 there were seven hundred members.

Today Elex has a membership well over the thousand mark. It is the largest social industrial organization of its kind in the community, and one of the most active in existence. It is unique in its history of accomplishments for invariably its members bring any enterprise undertaken for the common good to a successful conclusion. Its slogan "United We Build" is not a mere catch phrase. It means just what it says and that perhaps is the real secret of the Club's' success.

The celebration of Elex twenty-fifth anniversary next month is more than a mere observance of the founding of this organization in 1916. In truth it is the observance of a quarter of a century of service—a far-reaching service that has made life enjoyable to thousands.

In its charities, its educational activities and its social gatherings Elex has never faltered from the golden precepts upon which it was founded. And so the WORKS NEWS joins the many friends of Elex in offering congratulations on its twenty-fifth anniversary.

If the race, and America in particular, is to prosper, there must be a return to the God who has been forsaken for other gods.—*Joseph Twomey, D.D.*

Ninety-Three Profit By Better Ideas

Total of $725 Is Paid To Suggesters During Period of Three Weeks

Ideas, submitted through the Fort Wayne Works suggestion system netted ninety-three employees a total of $724; during a three-week period, it is revealed by the latest suggestion list. A fairly simple, but valuable idea, that of making changes to pounding fixtures placed Norman A. Bender, Bldg. 17-1, at the head of the list with an award of $75.00. An idea to use stainless steel tubing on burners brought an award of $55.00 to John W. Braden, Bldg. 17-1, and placed him second on the award list.

An idea for material savings, that of reducing coil dimensions, placed Paul B. Gressley, Bldg. 26-2, in the suggestion leaders list with an award of $40.00, and also Margaret F. Rumbaugh, Bldg. 26-3, with an award of $35.00 with her suggestion to improvements to winding machines. An award of $25.00 was made to George F. Ely, Bldg. 20-1, who also suggested improvements to winding machines.

Ora Bowers, Winter Street, received an award of $20.00 for his suggestion to changes to milling operations and Pauline Ort, Bldg. 26-2, an award of $22.00 for her suggestion for improvements at the conveyor.

Other awards ranging from $5.00 to $15.00 are reported awarded to the following employees:

William R. Kizer, Bldg. 4-1; Ruth Hollman, Bldg. 18-B; Bertha Poole, Bldg. 12-3; Ralph T. Barnett, Bldg. 12-1; Robert J. Arnett, Bldg. 4-4; B. M. Turschman, Bldg. 4-4; Gustave A. Mittermaier, Bldg. 26-5; Luke E. Richter, Bldg. 4-4; Paul D. Weaver, Bldg. 26-5; John A. Inches, Bldg. 26-5; Leona A. Scheuman, Bldg. 4-4; Clarence R. Spencer, Bldg. 5-1; Joe H. Cline, Bldg. 4-4; Lewis J. DeVoe, Bldg. 4-4; Eugene E. LaVine, Bldg. 4-4.

Robert C. Moyer, Bldg. 26-5; Herbert W. Schwartz, Bldg. 11-A; Allison A. VanWormer, Bldg. 26-5; George R. Fann, Bldg. 26-5; Charles J. Ueber, Bldg. 26-5; Ronald J. Zimmerman, Bldg. 26-5; Gay Huey, Bldg. 4-2; Luella A. Doehrman, Bldg. 4-2; Charles Druce, Bldg. 26-B; P. H. Vorholzer, Bldg. 10-1; Ralph H. McCain, Bldg. 4-2; Wm. Rayhouser, Bldg. 4-2; L. A. Gocke, Bldg. 4-2; Robert H. Keck, Bldg. 26-2; Russell F. Berkheiser, Bldg. 17-4; Eugene D. Phipps, Bldg. 4-2; Harold Wm. Gebhart, Bldg. 17-2.

Eldon Mee, Bldg. 4-3; Fred Hofacker, Bldg. 4-3; J. C. Kensill, Winter Street; Vivian M. Renbarger, Bldg. 17-3; H. Fink, Bldg. 19-1; Edward Arthur, Bldg. 6-B; Morris Pool, Winter Street; Mabel Essig, Winter Street; Andrew B. Troxel, Winter Street; E. W. Koehlinger, Winter Street; Sam Baumgartner, Bldg. 27-1; James J. Neuman, Bldg. 17-1; Jonathan Ford, Bldg. 26-B; Lloyd H. Roe, Bldg. 26-1; Hazel R. Somers, Winter Street; James McCray, Bldg. 26-2.

Ralph V. Rockhill, Winter Street; John E. Whiteman, Winter Street; Hugo Wengert, Bldg. 17-1; Arthur C. Hume, Winter Street; Eleanor C. Enderle, Bldg. 4-3; Fred W. Gerke, Winter Street; R. L. Poorman, Bldg. 17-2; Elmer R. Gordon, Bldg. 19-2; Golda L. Draggoo, Bldg. 4-3; Edward G. Taylor, Bldg. 4-3; Russ Waters, Bldg. 26-1; Beulah Wooley, Bldg. 4-3.

G. L. Santon, Bldg. 19-1; Calvin W. Marhenke, Bldg. 19-1; Wilbur H. Poehler, Bldg. 4-4; Lucile A. Baker, Bldg. 4-4; Arlo Hawk, Bldg. 4-4; Carl H. Heemsoth, Bldg. 4-4; Robert Moore, Bldg. 6-B; Claude Holmes, Bldg. 4-4; Stella Fagan, Bldg. 4-4; Ivan Y. Butler, Bldg. 4-4; Monroe W. Brosius, Bldg. 17-2; W. Rehling, Bldg. 4-5; Christian D. Delegrange, Bldg. 4-4; W. E. Henninger, Bldg. 4-5.

Martin J. Didion, Bldg. 4-4; William H. Kayser, Bldg. 19-2; Robert W. Voltz, Bldg. 19-2; R. H. Hively, Bldg. 19-1; M. A. Sorgen, Bldg. 19-3; Ralph Dunlap, Bldg. 17-4; Louis D. Hopper, Bldg. 10-1; Jacob R. Renner, Bldg. 4-B.

NOTICE

The Employee's Store will be closed for inventory on Monday, March 31.

Regular store hours—10:00 A. M. to 4:00 P. M.—will be resumed on Tuesday, April 1.

R. E. PERKINS.

Defense Savings

(Continued from Page 1)

may be purchased by employees either for cash at time of purchase or on an installment-purchase plan.

Also, as announced by the G. E. Employees Securities Corporation today, the offer of G. E. Employees Four Per Cent Voting Debenture Bonds for cash will be suspended at the close of business on April 30, 1941. BONDS OWNED BY EMPLOYEES, PENSIONERS, AND OTHERS, AND SUBSCRIPTIONS UNDER THE INSTALLMENT PLAN NOW IN PROCESS OF PAYMENT, WILL NOT BE AFFECTED. The Income Accumulation Plan, as amended effective January 1, 1939, will be terminated as of June 1, 1941. Bonds will be issued under the Income Accumulation Plan as usual on June 1, 1941, and the accounts of all participants will then be closed by the payment to them of their remaining credit balances.

FREE CLUB MOVIES

"Adventures of Chico" is the title of the feature picture to be shown Sunday at the G-E Club's weekly free movie program. There will be two shows, one at two o'clock and the other at four with admission being permitted on presentation of a G-E Club membership card.

Anniversary Program

(Continued from Page 1)

membership grew in the next five years to two hundred and twenty-five out of eight hundred and fifty. Weaving and reed work added to the accomplishments of the girls.

In 1921 under the leadership of Irene Fox the first philanthropic project was endeavored and $450.00 was donated to the Day Nursery. The continued growth of the club was evidenced by new interests and a fine standard of service and character building for industrial club standing, which merited Elex winning silver trophies from time to time. In 1925 Lois Miller served as president and during this time Lillian Steup was given a scholarship to summer school at Madison, Wisconsin, for outstanding service. Miss Steup served the following year as the ninth president of the club.

Club meetings were held on the second floor of Building 16. It wasn't until fifteen years later when Irene Meyers, who is now the official club advisor and Girls' Personnel Director served as president, that the meetings took on a decorative note. The supper tables were decorated to carry out a theme with elaborate decorations throughout the club rooms. Each year surpassing the last until Elex today carries these special themes for all their pro-

DEFENSE, Our Big Job This Year

The Biggest Job We've Ever Had

"NATIONAL Defense" means something entirely different to us today than it meant a year ago. We spoke of it then in broad, general terms—a job for government, a job for industry. Today we know that the responsibility for getting the job done on time rests on the shoulders of each of us individually.

No longer can we think of defense only in terms of a national program. If we are not to be too late, every man jack of us must feel a quickening of the pulse, must tighten his belt and resolve to see the job through, regardless of sacrifice. Some of us may feel that our jobs are far removed from the defense program, but in today's complex industrial system the personal efforts of each one of us are vital to success.

A YEAR OF EFFORT

Since the Advisory Committee on National Defense was set up almost a year ago, the resources of the nation have been thrown behind the rearmament program. But the problem of producing, in large quantities, the complex weapons of defense is an enormous one. Precious months were required to plan our program, to build new factories and new machines, to train men to operate them. In spite of the tremendous efforts made so far by every branch of industry, this part of our defense program is not yet complete.

E PLURIBUS
UNUM

In the countries now at war, armaments have already crowded most peacetime goods off the production line. Great Britain has put every available tool and machine to work on arms and war supplies. For years Germany has been skimping on everyday necessities in order to build up a vast war machine. Keeping it running must be demanding even more of her productive effort. We hope to keep out of war; we hope that such sacrifice as that will not be required of us in America. But the comparison serves to emphasize the magnitude of our task and the terrible urgency that confronts us.

EVERY G-E JOB IS VITAL TO DEFENSE

We have only to look around to see how widely General Electric's facilities are being turned to defense. New buildings are going up at several G-E factories; new machinery is being installed. Last year more than 16,000 new employees joined the Company, a large percentage of them going to work on defense jobs or into training for defense work. And daily the list of defense items being produced in G-E factories grows longer. Daily the demands being made upon us by the Army and the Navy increase.

Nor does our responsibility end with filling defense contracts. The urgent need of our regular customers for the electric equipment necessary to *their* defense production must be met. Our motors, our transformers—all our regular apparatus—must not be allowed to become bottlenecks for the other industries we serve.

NOW IT'S UP TO US

Over the years General Electric men and women have built a nation-wide reputation for doing big jobs well—even, at times, for doing the impossible. Therefore, when the present emergency confronted the nation, the government recognized our ability—and responsibility—by turning to us for all the help we could give. For months our planners, our engineers, our building construction crews have been working night and day to produce the facilities for doing this great job. Now the stage is set; with every passing day more and more production facilities are ready for our use. It's up to every one of us to see that these facilities are translated into finished armaments at a speed that will make the world sit up and take notice.

Leaders In The Latest Suggestion Award List

Leaders in the latest suggestion award list are pictured above. Top left, Norman A. Bender, Bldg. 17-1 is demonstrating the result of his idea, which brought him an award of $75.00 to Superintendent Wm. Franke. Upper right, Margaret Rumbaugh, Bldg. 26-3, who received an award of $35.00. Center right, Paul B. Gressley, Bldg. 26-2, who received an award of $40.00 and lower right, George F. Ely, Bldg. 20-1, who received an award of $25.00. Lower left, John W. Braden, Bldg. 17-1 who rceceived an award of $55.00.

News Around

The old adage, "In Spring a young man's fancy turns to thoughts of love," has been proven untrue by the gang in Bldg. 12-B. Their thoughts turn to roller skating. First we see Lioba Ryan afraid to stand up on her skates. Marie Gehle glides shakily across the floor to the railing. Olga Ehlerding is just dying to teach some one a new step. Marge Degitz panting furiously after skating around the rink twice. Say, La Verna, was the grand march too much for you? Bill Glenn is seen leading the grand march. What's this we see, Edna Martin skating with the same partner all evening? Sorry, Edna, I mistook the railing for some one else. Anyone interested in fancy skating please see Howard Opliger, as he was seen skating continuously all evening. Strange thing about that, he had a different partner every time he went around.

Thisa And Thata 19-5

Spring is generally known as the time for relaxation but Evelyn Archibold has contradicted all this by having two parties—one week the wedges and the next week the winders. Where do you get all the ambish? . . . Have you noticed the two nickel grabbers? Jennie Frazier collects V nickels and Sarah Chelf connects Jefferson nickels. . . . Arnold Johnson says he must be slipping. He hasn't been in the Works News for the last two weeks. . . . Just to prove to Elaine Goodman that her husband is not the only one to rate the Works News we are including her name in our column.

The big question in the minds of members in Bldg. 6-3 is who's face had the brightest shine this week—Naomi Schubert's or Emma Meyer's? Naomi just received that fatal "third finger left hand rock" while Emma punched the clock for a year of happy married life. Both gals looked like they were zooming around on a magic carpet. A "darky" could have gotten a sun tan from the reflection off their faces.

Marge Weibel, Bldg. 4-6, must have been in a hurry to get home last Monday night after bowling at the Club. She changed her shoes and had her hat and coat on and still had another frame to bowl.

Marjorie Kavanaugh, Bldg. 4-3, found the solution on how to keep her red blouse clean, but we sure will feel sorry for her when summer comes because that coat will be awfully warm to wear then.

We are wondering what has happened to Harry Parker, Bldg. 4-3, because he does not eat any more peppermints.

Risher Hall, George Collins and Don Voorhees, Bldg. 4-3, are doing a lot of studying on basketball while Joe Cochoit looks on.

Did you know the new style for wearing ear rings? Beulah Wooley came to work the other morning with two different colored ear rings on. Beulah must get up in the dark.

FOR SALE

Two guineas for sale cheap. Please call Paul Weitzman, Bldg. 4-6. Paul just doesn't have the nerve to kill these little fellows.

NEWS THROUGH THE PLANTS

From the feminine VIEWPOINT

by Irene Perry and Hilda Berthold

Some of the most commonplace, everyday things, things that we regard when we think of them at all as of little cost or account, have the most romantic history back of them. For example—spices, yes, cinnamon, cloves, pepper and others that we buy at any grocery at small cost today, once were worth more than gold. Taxes and ransoms were paid in pepper, and wars were fought over these same condiments. When Columbus made his voyage in 1492, he did not seek a New World, but a short route to the Orient, and the so-called "Spice Islands."

No one knows when human beings first used spices, or what race discovered that food could be improved by the addition of pepper, but for countless generations spices have been used. For centuries Europe's supply of spices was obtained from markets in the Orient and was transported by camel caravans across Asia until a Portuguese sailor discovered a sea route to the Orient around Cape Good Hope, and so Portugal held a monopoly on the spice trade, but in the course of history this trade monopoly passed to Holland, then to England and finally to America, particularly New England after the Revolution. It was a New England captain who first learned while on a trading voyage where pepper was grown, and soon New England ships were supplying not only American but European markets with pepper.

We usually think of spices as being used to flavor food, but they have many uses in medicine, also in manufacturing soap and perfume. Most of the commonly used spices originated in the South Sea islands, but allspice, thus named because it combines the flavor of cloves, cinnamon, and nutmeg, is grown only in the western hemisphere on the island of Jamaica, and it is interesting to learn that the allspice trees grow only in Jamaica and always in a wild state exactly as they did when Columbus discovered the West Indies.

Another flavor which the New World gave to the Old, while not a spice, is more widely used as a flavoring than most of the true spices, except pepper, was vanilla. Did you know that the vine which produces the vanilla pods or beans, is really a species of orchid? It is true, and vanilla is the one orchid whose seed pods or fruits are of commercial value to mankind. The Spaniards learned of the use of vanilla as a flavor from the native Indians of Mexico, and they carried the vanilla pods or beans to Europe, but it was not until the second half of the nineteenth century that the demand for vanilla became so great that efforts were made to extend the cultivation of vanilla. Vanilla culture has been established in various parts of the world, both in the East and West Indies, but the original Mexican vanilla is still the most popular and the most in demand.

Winter Street News

It is reported that Mayme Ingle is seriously thinking of entering the Indianapolis speedway races. It seems that Mayme forgot her badge and had to make a run to New Haven to recover it. We are not giving the time but Mayme sure gets there before she starts.

Marie Johnson is suggesting guide service to new employees. She says it would save a lot of wandering around wondering where she is supposed to work.

Diary of a Sunday driver's trip; name, Bill Cook. Drives in front of house. Wife tears new hose getting into car. Bill's hat blows off and obligingly drops into passing car—so long hat. Car stalls—so long. 75c to get started. Drives out to new airport—car again stalls, so long. $4.00 for a tow. So long 'till next Sunday. P. S.—He's going for a walk.

Sunbeams From 17-4

Mabel Murry believes in taking those last 40 winks, she must have taken about forty-five the other morning, for she didn't have time to put her shoes on, or maybe she is proud of those new red house slippers.

David Slater really has something to brag about now, his new car is so wide that he had to cut the hedge in his drive-way to keep from scratching it.

Bonnie Shoner doesn't mind the cold days, it gives her an opportunity to wear that pretty red sweater.

Herb Weidman has always been known to we oldsters as just "Herb" but to the younger generation he has become "Herbie," My, my, how times do change.

Some people have ups and downs, but Frieda Cummins, Bldg. 19-4, seems to have all downs. Friday noon the rug slipped out from under her and she landed. The next day she tripped on the steps and landed. Watch your step Frieda.

It seems Susie Wagner, Bldg. 19-4, is having trouble keeping her eyes open. Time will tell.

Some one will have to hide Ned Biddle's cap, so he won't wear it all the time for he will be bald headed before his time.

Borings From 4-4 Office

Art Wedler has been going around the office with ten flashy finger nails. And the shade is rumpus, well anyway it has caused quite a flare up with the other men. Bob Spitler is plenty jealous, so he is going to rob his wife of her nail polish so he can strut his stuff, too.

Last Tuesday night Mary Hile entertained the girls of the office. Mary Armey gave a very interesting book review. Eating was the theme of the party, and for such purposes food is the best. Everyone ate so much they could hardly leave.

Robert Klingel, Bldg. 17-4, recently sent me a letter. He was wondering just why his name has not appeared in my column as yet, when he rates one of the girls in our office. Well Bob, this is probably the first time it has ever appeared, but I'll assure you it won't be the last time.

The teleautograph operator has been accepted as one of the force—when he has spent two whole weeks in the office. Mel Warner thinks that he's going to like it, too.

Cliff Bowman has suggested to Mike Brayer that balconies be installed to take care of all the purses, suitcases, and trunks that the girls are now carrying about these days.

Emmy Stock was seen in a barber chair the other day. The barber had to start at the bottom and work up, 'cause he couldn't start at the top, or perhaps Emmy would call it a spring coming out job.

The office cat said that he would eat a canary if we were to get one so I guess we will have to learn to enjoy Virginia Plummer's and Bob Spitler's whistling duet. It wouldn't be so bad if they would get together and whistle the same tune.

Open letters from every one have been flocking in. One from Mike O'Grady said: "Little mices should be seen and not heard."

'Tis enough for now, will see you all in church (the round one).

I remain, sincerely as ever,
Elmer, the Field Mouse.
The Rat to You.

Edith Farrell wishes to thank the many employees who through their remembrances and acts of kindness helped her through her extended illness of two years. Edith is back to work after winning a decisive battle over "Old Man T. B."

Everyone in the Transformer Department wishes Bessie Chapman a speedy recovery.

If you want to know who the hardest workers are on Bldg. 26-3, just ask Mildred Baumgartner, Josephine Lee and Hilda Scheuman.

Just ask Frances Craig who it was that dropped an iron gage in the cement mixture and had to fish it out with a piece of iron?

19-5 Office Chatter

Yes, it is chatter this week with all the gals coming back Friday noon loaded down with boxes. "Gill" is sure going to do some strutting in the Easter parade. . . . It seems that our Elma Tanner of the office—Hubert to you—is a little confused in his Kentucky Road and Tobacco Road. Mardo Tobias got the breaks going to Chicago, but he says its all work. The plan for a little side-line fell through for Mardo was too busy. George Zollars admits his disposition isn't what it used to be.

Bldg. 26-5 Machines

It seems that spring is in the air. The bird songster of Bldg. 26-5 is no other than Henry Whittber trying to imitate the bird calls he hears on his way to work. . . . Speaking of spring has us wondering what L. Boxell and G. Schlemmer will do with their spare time now as they both have sold their farms and will be lost without their hogs, sheep and cows. . . . That brings us to our curly headed friend, Ray Kierspie. It seems a while back that Ray was predicting he would soon be the proud father of a son, and some of the boys on Bldg. 26-5 wanted to bet a few steins of beer that Ray would be wrong and the new arrival would be a girl . . . but, so it is averred, Ray wouldn't bet. Time marched on and Ray got the boy he talked about, and according to the Bldg. 26-5 gang he has been trying to collect bets he never made ever since. . . . You have probably heard of Frank Hoffman, the philosopher of Bldg. 26-5. It seems that Frank's ice fishing days are over now that the ice is gone, but that doesn't discourage Frank for he is repairing his equipment and making new poles for next season. Frank says those little wooden tubes the new thermometers come in are just right for handles for ice fishing poles. Your reporter overheard Frank dickering with Paul Weaver, the other day, for some black fur. It seems that Frank's fur coat is getting worn in spots and that Paul has a black Angus cow with matching fur for Frank's coat. . . . The stories about income tax payments are still rolling in, and we've picked the best one. Earl Brandon is positive he paid enough. Earl added his exemptions to his income rather than subtracting them. We've never heard of a refund from Uncle Sam, but good luck, Earl.

"Welcher" Wilson lost another $50,000 to "please can't I get out Thursday" Becker on the Louis-Simon fight. Mr. Wilson when asked for a statement exclaimed, "If Louis don't go in the army I'll have to go to the poor house."

SANDY SAYS

Sunday was such a charming day that in the afternoon Cousin Colin and I packed our families into his Model T, and took a long (for it) ride into the country. On a side road some poultry menaced our progress.

"Just take a gander at that goose," said Colin as one walked across in front of us. Rather than be hit by such a jaloppy, Mrs. Goose took one big hop and landed on our hood. In a flash she bumped the windshield, left a shower of feathers, but escaped unharmed, trying to look dignified with a ventilated torso.

Colin stopped the car, "Ah weel, if you are prepared, ye can handle any emergency," he said as he stuffed the feathers into a slit in the sagging upholstery of the Model T.

His "emergency" reminded me of a story you probably know. It was told on the radio. It's moral applies so well to all of us every day on our jobs that I'd like to tell it again.

The story is about a man who went to a farmer to get a job, and goes something like this. When the farmer asked him what experience he had, he replied, "I know how to sleep on a windy night."

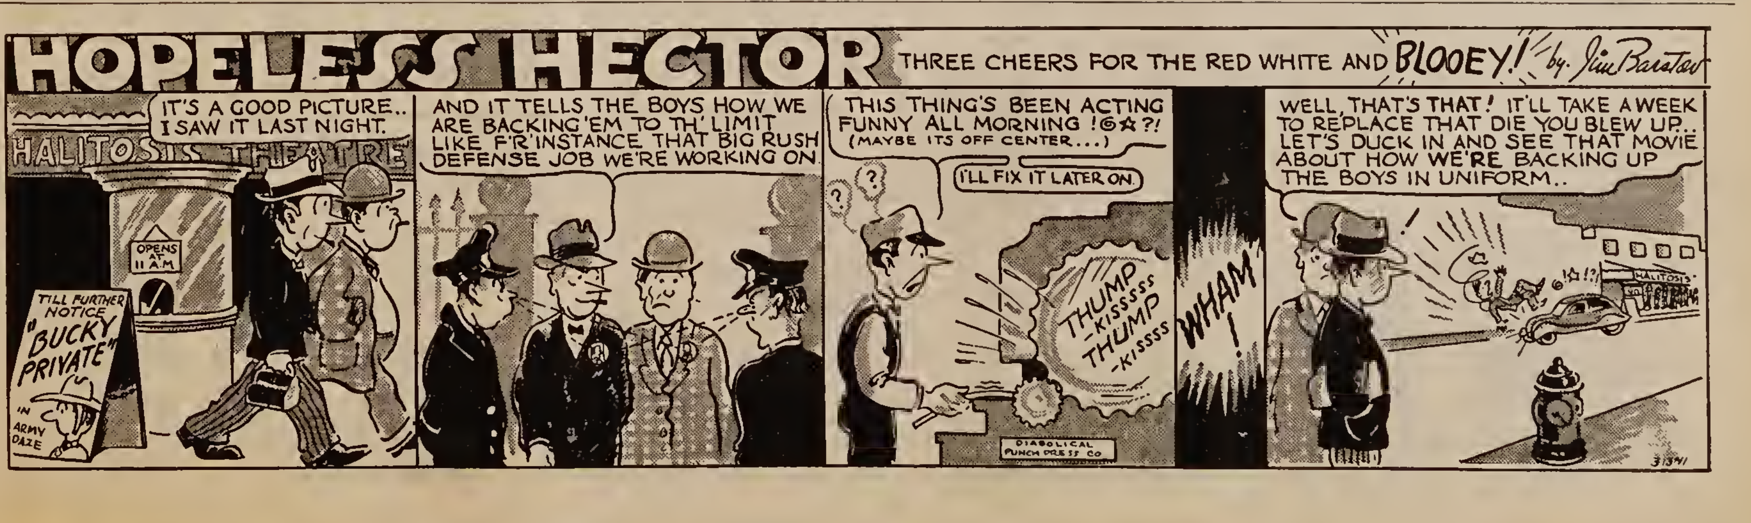
Now, the farmer thought that was a queer thing to brag about, but the fellow seemed pretty sincere about it, so he gave him a trial.

Then, one night, a terrible wind came up. It howled in the trees, and rattled the windows in the farmer's bedroom. He woke up with a start, and, knowing what such a wind might do, slipped on his overalls and dashed out to the barn. But when he got there, he saw the doors all fastened, the stock in their quarters, horses well stabled and bedded down, and the hay and straw stacks well wired to pegs tight in the ground. In fact the farmer felt a little sheepish as he slipped back into the house.

As he went by the hired man's door, he took a peek in. There he was sound asleep, completely oblivious to the waving curtains and ruffling bedclothes.

The farmer took a long look—and he knew what the man had meant when he said, "I know how to sleep on a windy night."

Monroe Green, Bldg. 4-3, said that he was reading an article in a certain magazine wherein it stated that sawdust and excelsior contain valuable vitamins. So he is putting green glasses on his horses and feeding them excelsior, and brown glasses on his cows and feeding them sawdust in place of bran.



HOPELESS HECTOR
THREE CHEERS FOR THE RED WHITE AND BLOOEY! by Jim Barstow
IT'S A GOOD PICTURE.. I SAW IT LAST NIGHT.
HALITOSIS THEATRE
OPENS AT 11 A.M.

Bldg. 4-4

Bob Arnett is very hard to convince, but after a half day's trouble, he finally takes the girl's advice.

Paul Habecker thinks this would be a swell world to live in if there were no women in it. But, says he, this is definitely a woman's world.

Those having Jig-saw puzzles, please notify Bonnie Jetmore, so she and Bob Saylor will have something to do on a cold evening.

What's happened in Bob Bultermeier's family that he gave a couple of the girls cigars the other day?

Arlene Middleton finally admitted that she changed her name to Beck December 28, 1940. Arlene, you know you can't keep a secret from we finishers. We are still looking for our treat.

Paul Habecker has decided he doesn't need a good cook, but he is afraid that one of these days he is going to need a good seamstress.

Louise Roberts sure must like fish or does she like to go riding. Anyway, she went to Lima, Ohio, for a fish fry last week.

Maxine Dunaway is glad she has a brother working in the drug store to prove she is 21 so she can play pin ball.

We wonder why Cliff is so tired. Is it because he is working too hard, or is it Spring fever?

Nual and May sure try to get their vitamins. They had a quart and a pint of tomato juice for lunch the other day.

Wot A Life

Tom Hildebrand, Bldg. 26-2, decided that he could brighten up his bathroom with some new linoleum and proceeded to pick out a pretty pattern. Then came the matter of laying the linoleum and Tom decided that a penny saved is a penny earned and that there was no reason why an able bodied man could not do a small job of that kind.

Tom took out all the fixtures and tore up the old linoleum and was ready to place the new when Mrs. Tom suggested that he nail down the floor boards that had been squeaking for lo these many months. Tom plied his hammer lustily, laid the linoleum and moved back the fixtures.

A good job well done, Tom went downstairs only to find that his kitchen was running in competition to reservoir lake. It seems that three of the six nails Tom used went through the water pipes. After rushing around the neighborhood Tom located some solder, moved out the bathroom fixtures, took up the new linoleum and soldered the leaks. Then he nailed back the boards, relaid the linoleum and moved back the fixtures. Now Tom's all through except a little figuring on redecorating the kitchen.

Is Zat So?

Spring is here at last! The basket ball season is over and we now turn to thoughts of baseball! The state tournament really provided lots of thrills but we wonder why "Kenny" Szink wasn't much interested in the games this year. Do you suppose the elimination of South Side had anything to do with it? When it comes to forecasting scores of basketball games it takes experienced people like Dan Johnson and Jack Neuman to pick the exact scores! . . . Mabel Lieberenz wonders why her name was omitted in last weeks column giving an account of the birthdays celebrated by the Birthday Club. Why Mabel, we heard you say that you were not having any more birthdays! . . . "Pat" Eichhorn, our State Senator, is back to work after spending some time helping to make a lot of laws for us to live by. We are glad to have you back with us, "Pat"! . . . Frank Hickman is one of the "gang" now! He recently purchased a new car and so he can join in on our favorite discussion forum! . . . We think Bldg. 17-1 has set a record! We have 14 of our co-workers enrolled as students in the First Aid Class and Hoy (Pop) Bastian is an instructor. Let's hear from some of the other departments! . . . Oscar Schelper was singing (?) "South of the Border" with such feeling recently! We wonder what caused him to select that song as his theme for the day! . . . Joe Kramer is a very good actor! He gave a nice performance the other day when he demonstrated the various ways to wear a cap! Such versatility is remarkable! . . . We wish to extend our sympathy to Claude Johnson in the death of his father, also to Fred Linker whose father was killed in an accident.

See you next week.

The Question Mark.

Bldgs. 17-2 And 17-4 Will Sponsor Party

A dance and card party is being sponsored by employees of Bldgs. 17-2 and 17-4 on Friday, April 25. The affair will be held at the Veterans Home and the price of tickets is 25 cents. Virginia Morand is chairman and will be assisted by a committee composed of Ed Meyers, John Meyers, Ralph Solt, Dave Slater, Edith Venrick, Georgianna Mahrt, Helen Weyer, Gertrude Johnson and Belle Buchan.

Didn't know that just running straight into a man's arms in the hall could get a girl so excited that she would miss her chair when attempting to sit down. Of course, Betty Snook, Bldg. 18-2, has a different story.

M.B.A. PATIENTS

General Purpose Motor—Marian Armstrong, 904 Madison Street; Elizabeth Skevington, St. Joe Hospital; Caroline Snyder, 1426 Fletcher Ave.; Alberta Welch, 509 Fairmont Place; Olive Skilis, 415 Poplar St.; Audrey Metcalfe, 310 W. Gumper Ave.; Edith Fuller, 2015 Broadway; Edna Crow, 723 Taylor St.; Gladys Castor, 1315 Wall St.; Paulis Adams, R. No. 4, City; Joseph Quinlan, St. Joe Hospital.

Transformer: Francis Magers, St. Joe Hospital; Virginia Parker, 1621 Wells St.; Marjorie Potee, Sacred Heart Hospital, Garrett, Ind.; Margaret Sabo, 310 E. Wayne St.

Series & Specialty: Bess Martin, 916½ Lincoln Ave.; Robert Elder, 903 Home Ave.

Apparatus: Arnold Berning, Medical Center Hospital; Helen Phinney, 500½ E. State Blvd.; Jane Hahn, 3625 Piqua Ave.; Kathleen Meyer, Lutheran Hospital; Alberta Bultermier, Lutheran Hospital.

Tool Dept.: George McAfee, 818 Runion Ave.

General Service: Chris Baade, 114 W. Taber St.; Bruno Gulbin, 2021 Weisser Park Ave.; Raymond Lahrman, Lutheran Hospital.

Wire & Insulation: Lloyd Cowell, 2520 Gay St.; Perry O'Neill, St. Joe Hospital.

Shipping: Granville Heck, St. Joe Hospital.

Left the Hospital: Jane Hahn.

Returned to work: Catherine Keller, Marcile Passe, Mildred Raymond, Walter Kruse, Betty Sonday, Neleanna Sanders, Dorothy Vodde, Ethel Evans, Paul Horstmeyer, Herbert Springer, James Gerber, Rita Clemm, Arnold Blomberg, Lester Busick, Velma Reiter, Ray Schmidt, George Miller, Charles Lenz, Harold Souder.

6-4 Magneto Mumblings

By The Eavesdropper

W. Stocks, the Magneto songbird, has warned yours truly about the course of a "boomerang." What's the matter, can't you take it, Wilbur?

Magneto Musicale:

"Ole Rockin Chairs Got Me"—H. Kroeger testing a new office swivel chair.

"So You're The One"—Mildred McKarns to her one and only.

"Oh, How I Hate To Get Up In The Morning"—J. Woodward.

"The Wise Old Owl"—H. Timms, he knows all the answers.

Welcome to Virginia Rapp, new typist in the Warehouse, who hails from Arcola. Another addition to the office force is Park Ranck, although he has been in the department for quite some time.

"She Shall Have Music Wherever She Goes" actually applies to Phyllis Walter, Huntertown, who carries a radio about the size of a camera from and to work every day.

So it has finally come out—Bob Firestone, next time "she" washes your hair, don't let her try those new style curlers, assert yourself!

George Knoll has either entered his second childhood or is learning Army technique—At least we saw him playing with two army trucks last Friday afternoon.

Gerry Gidley was surprised Monday night when the gang decided to celebrate her birthday with her—A Happy Birthday, Gerry.

Given Appointments

(Continued from Page 1)

supervisor of planning and wage rate at the Decatur Works.

Mr. Seibold became a General Electric employee in 1911 when he was assigned to the Mica Department. Later he was transferred to the Arc Lamp Department and in 1913, he enrolled in the Fort Wayne Works Apprentice School. Upon his graduation in 1917 he was assigned to the Tool Division but was later recalled to the Apprentice School where he served as Assistant Foreman and as an instructor in the Night School.

He returned to the Tool Division a number of years ago and served as Assistant Foreman in Bldg. 17-4. In 1936, he was made Supervisor of Planning Production, and in January, 1938, he was made assistant Superintendent of that Division. In April of that year, he was made Superintendent of the Tool Division, and he continued in that capacity up to the time of his appointment as superintendent of Bldgs. 4-2 and 4-3 in 1939.

Mr. Auer enrolled in the Apprentice School in 1925 following his graduation from Central Hingh School. Completing the machinist-toolmaker course in 1929 he was employed as a tool planner of Bldg. 4-1. During the succeeding years he was engaged as a tool and equipment planner, process or methods planner and in time study, routing and cost estimating work. He was transferred to the Decatur Works in 1936 to the planning and wage rate department and in 1937 was made supervisor of this department. He served in this capacity up to the time of his present appointment. Mr. and Mrs. Auer have a home in Decatur but plan to move to Fort Wayne at the earliest possible date.

New Water Heater Models Announced

"Specials" Will Supplement Thirty Gallon Single Unit Announced Last Year

Four new galvanized tank special electric water heaters, in 30-, 40-, and 50-gallon sizes, have been announced by the General Electric appliance and merchandise department, Bridgeport, Conn. The new heaters will supplement the special 30-gallon water heater, having a single unit, announced last year. The new 30-gallon heater, model G-302B, has twin units—600 watts for the lower and 1000 watts for the upper unit, as has the 40-gallon heater, model G-420B. The latter has a 750-watt lower unit and a 1250-watt upper unit.

The new model G-521B, of 50-gallon capacity, has a single lower unit, rated 2500-watts, while the model G-522B has a 1000-watt lower unit and a 1500-watt upper unit.

The new water heaters are round in shape, with sealed fast-heating Calrod units immersed in water, heating it directly. An accurate adjustable automatic thermostat controls each of the Calrod units. As hot water is drawn off the tank at the top, an equal amount of cold water enters at the bottom and is distributed by a cold water deflector. Rock wool insulation, an average of three inches thick, holds heat within the tank and reduces heat losses.

The tank is of heavily galvanized copper bearing steel, with 150-pound working pressure. The steel outer shell is finished in high-gloss, white Glyptal, baked on, with black base. Tank supports, of pressed steel, as well as the bottom cover and base legs are all welded together to make a rigid and permanent base.

Additional Copies Of "Men And Volts" At Employees' Store

An additional number of copies of the book "Men and Volts", the story of the electrical industry and General Electric, has been received at the Employees' Store and are now on sale. The edition sells at bookstores for $2.50 but is offered to employees at the special price of $1.00.

NEWS THROUGH THE PLANTS

Dots And Dashes 26-3

Did you ever hear the familiar saying, "I'd hate to work nights?" There always has been a certain horror for a night job. Perhaps its because one must give up those quiet evenings at home by the radio, or dates with the favorite boyfriend or girl-friend. Perhaps its the wives who do the complaining about having to play the part of a widow until their husbands get a "break" and work days.

It has its disadvantages as anyone can plainly see, but its advantages outnumber its disadvantages three to one. Perhaps the best advantage is those nice long mornings in bed. You don't see anyone come to work with eyes half shut, yawning, and continually repeating—"I'm so tired."

Instead, the night trick of Bldg. 26-3 is always wide awake. In fact some girls are so active that they think up poems while working. The most popular subject seems to be the new foreman. Some one must be keeping a pretty close watch on Bill Edmunds to originate one affecting him.

However the entire evenings are not spent in making up poems.

Dean Lockwood spends most of his spare time, taking off his new glasses and putting them back on. In fact he takes them off so often that he can't remember whether he sleeps with them on or not.

The night trick was quite honored to have Gale Rinehart work with us for several nights while "The Whistler" John Grandy was ill.

The night gang certainly was glad to have Darrell Hirshfelder join its ranks. Somebody must have told him how much we appreciate him, because he insists upon a clean desk at lunch time. In fact he has even been throwing hints that he needs a table cloth on the desk. We'll see what we can do about it, Darrell.

Of course the day people have a great deal of excitement as well as the night trick.

Doris Johnson has become a famous movie actress, for she stepped in new cement at the doorway being built in Bldg. 25. She evidently thought she was at the Graumens Chinese Theatre.

Rose Mary Bender was asked why she had her hair set every week? She told us it was a deep, deep secret. So I guess we will have to wait.

We are glad to see Clorine Trout in the swing of things again after a week of sickness.

We are sorry to say that C. P. Mentzer is still not with us. We hope to be seeing you soon, Mr. Mentzer, so get well quick.

Bob Hunt, a day trick foreman, has so many girls on group 66 with the same name that he can't keep track of them.

Florence Hessert had an operation on her eye and came to work two days later. I guess she couldn't stay away from Bldg. 26-3 with all its spirit and pep, not even an operation could stop her.

George Cooper, Bldg. 4-3, our Pied Piper of Hamlin, in telling us of his many adventures in ridding various communities of the pesky rodent forgot to mention that last Sunday a.m. he paid a visit to the home of George Coplen, Bldg. 4-3, who has a pet rat. He released it and said rat ran right to our brave Piper who became so frightened that he went outside and sat in his car until Brother Coplen penned up his rat.

Mary Rupp, Bldg. 4-3, wishes to insert this ad in the Lost and Found column: Lost, purloined or A.W.O.L., one perfectly good rabbit presented to her on her birthday by one of her co-workers. Mary still has the cage the rabbit came in but Sir Bunny is gone with the wind.

Charles Houser, Bldg. 4-3, tells us that his wife is very much provoked at him. The reason is that Charley uses so many matches to light his pipe, leaving match sticks lying all over the house. She suggested to him that he get himself a blow torch.

We hear that Robert Wiltshire is in the army now. Good luck, Robert.

That "slap happy" feeling of Bldg. 6-3 has already crept into the blood of one of the new comers — Jean Wigent. Imagine, she thought Central Catholic would win the National Tournament.

It looks as if that little fellow who runs around without any clothes but is a hot shot with the bow and arrow had better look to his laurels. We are informed on authority that Joe Haas, Bldg. 18-B has become so expert with bow and arrow that he can knock off birds, bees, rabbits, or in fact anything that flies, crawls or walks, with his little bow and arrow. Here's a swell opportunity for the Rod and Gun Club to save on ammunition.

Ray Kierspe wishes to thank all his friends who were so thoughtful of him on his birthday this week. He will endeavor to make use of all his gifts and the cards will furnish many hours of entertainment.

Virginia McCormick, Bldg. 6-4, would like to know why any man would want her lipstick before she puts it on. Sure she thinks she looks mighty pale these days.

Shorts From 6-B

It is not known whether Frank Graffe, now vacationing in Florida, reads the weather reports for Fort Wayne or not, but it seems more than a coincidence that the office force in Bldg. 6-B received a large box of assorted fruit this week. Frank wrote he picked the oranges on St. Patrick's Day, which, as we remember, was not exactly tropical in temperature in Fort Wayne.

Art Bashelier is circulating a petition around Wildwood avenue that the city install lights in his alley. It seems that Art drops his gloves in dark spots.

Lynn Crawford, formerly in Bldg. 6-B, is brushing up on his Government work in Bldg. 26-5. As two former "classmates" preceded him, George Morton and George Fann, Lynn will not feel entirely strange in the higher altitude.

Dorothy Nahrwold, formerly employed in Bldg. 6-B, was given a pleasant surprise when her coworkers presented her with a fine electric clock, and some other presents.

Alva Wehrmeister, well known box-pusher-inner in Bldg. 6-B, has left the company for Ohio where Alva expects to spend his time making "dough" in a different manner. The boys in this department have placed orders for doughnuts, etc., which have been promised.

Leo Heersche and Jake Sappington held quite a conference yesterday to settle the question as to what to mix together to get a "blue" color.

Will Yates, who has joined the ranks of the Quarter Century Club, claims he would have been a member sooner but Bill Walt borrowed his initiation fee.

Just to relieve the minds of the lady euchre players in the Winding Section, Carl Steinbacher's spruced appearance is due to his election as an officer in the Foreman's Club, and his hope that his picture will be taken, and not as they may have thought due to his winnings (?).

By POST SCRIPT.

G-E CLUB DANCE

Dancing at the G-E Club again Saturday from nine o'clock to twelve. Pete Dannecker's orchestra will provide the music with tickets selling at 20c in advance and 30c at the door.

Anniversary Program

(Continued from Page 2)

grams. People in many organizations have looked in on Elex parties for decoration ideas. The program today does not consist alone of just the decorative dinner meeting. Elex has enlarged into an organization of fine service and high ideals. Each year toys are furnished to children at the various orphanages, loving service to members of the club, donations to the Infirmary and gifts to the Rescue Mission, baskets of food to needy families and Easter baskets for poor children.

Pleasure trips today enlarged upon the one-day excursions that were enjoyed by the old group when the club planned outings to Cedar Point, Rome City or Niagara Falls, to the extreme honor of visiting the Nation's Capital, and tea and a reception with Eleanor Roosevelt, our First Lady at the White House. Later a trip to New York where the group was entertained with a formal dinner and a concert by Phil Spitalny's famous all-girl orchestra. At a visit by popular request to the New York World's Fair the entire club entour were greeted by Grover Whalen of New York. Mr. Whalen was presented a tiny motor by the girls as a tribute of the product of Fort Wayne industry. The following year a tour was enjoyed by Elex members to western grandeur when last year they visited Yellowstone National Park.

Speakers of interest, such as, Rabbi Tarshish, better known as "The Lamplighter", and Rosella Brewer and her seeing-eye dog, are only a few that have availed the club members the finest in entertainment.

When the girls in 1916 wearing middy blouses and skirts, the vogue then, as they are with our own juniors today, spent their leisure time weaving and making reed baskets, little did they know they were establishing a club to be eventually recognized internationally as one of industry's finest girls' organizations. When the membership reached a goal of 500 in 1934 it seemed the ultimate had been reached. In 1935 the first Elex conference was inaugurated. This was for the purpose of program planning, and the construction of work throughout the year. The first conference was held at Camp Yarnelle with a two-day session, climaxed by a beautiful candlelight ceremony, that has become a ritual at conferences held since in Huntington, Potowatomi, Indianapolis and Fort Wayne during the past six years.

The present membership of over 1250 includes the girls working at night, who are just as interested in the fine programs set up. They have been carrying on the same splendid program meeting afternoons and Saturdays. The growth of Elex from the original sixty women to the large membership today speaks for the interest, loyalty and loving service the girls have come to know and enjoy. "United For The Best" was first chosen as a very timely slogan, with the rapid growth and interest in the splendid building program that included culture, service and character building, the present slogan, "United We Build" was adopted at the last conference held in 1940 at Huntington, Indiana.

Nineteen forty-one will mark the twenty-fifth year, with a Silver Tea to be held at the Y. W. C. A., Sunday, April 20th. Past presidents and distinguished guests and those who have played an important part in the accomplishment of this fine organization will be honored. The silver anniversary will live long in the memories of the girls and their associates of the General Electric Company today and promises to be one of the outstanding spring social events. Eva Lynn, President, Eileen Morris, Vice-President, Irene Meyers, Advisor and Personnel Director, Helen Allen, Secretary, will receive the guests and welcome out of town visitors. Bess Brown is acting as General Chairman of arrangements for the tea, assisted by Helen Bleke, Alice Daily and Sue Cameron on the decorating committee. Veora Habig is chairman of the program committee, assisted by Margaret Koch, Alvina Gerber, Mrs. Harry Hogan and Belle Buchan. Mrs. L. D. Poorman is chairman of the hostess committee, assisted by Alberta Gollmer, Vera Berning, Merle Kirkpatrick, Dorothy Franke, Mrs. Ezra Garringer, Ruth Laney, Bea Livingston, Pauline Beaty and Mrs. Keith Robinson. Evelyn Smith is in charge of refreshments, assisted by Betty Minard and Florence Hayzlett. Invitations are in charge of Lois Miller and Hilda Walda. Irene Perry will serve as publicity chairman. Presiding at the tea tables will be Mrs. Harry Hogan, Marcella Koehn, Mrs. Rogers Filler, Grace Bushman, Evelyn Smith, Florence Hayzlett, Betty Minard, Irene Perry, Margaret Koch, and Annette Bauman. Esta Greiner and Betty Kiefer will assist at the refreshment tables. A musical program will be given by Miss Marguerite Hitzeman at the organ and Lela Hagan, violinist throughout the afternoon. Spring flowers and silver bows will be used for decoration with pretty appointments in silver and lace and spring flowers, pastel pink and blue candles carried out on the tea tables.

General Electric officials, past presidents of Elex Club, all Elex members and General Electric friends are being extended an invitation to attend this Silver Anniversary Tea.

G. E. Employees Securities Corporation

To employees, and former employees retired on pension, of General Electric Company and affiliated companies, eligible to purchase G. E. Employees Bonds, and to participants in the Income Accumulation Plan, effective January 1, 1939.

General Electric Company is announcing a Defense Savings Plan whereby its employees will be afforded facilities for the purchase, in support of the National Defense Program, of United States Savings Bonds to be issued by the United States Government, beginning May 1, 1941.

Notice is hereby given that the offer of G. E. Employees Four Per Cent Voting Debenture Bonds for cash will be suspended at the close of business on April 30, 1941.

Bonds owned by employees, pensioners and others, and subscriptions now in process of payment under the installment plan will not be affected.

Notice is also given that the Income Accumulation Plan, as amended effective January 1, 1939, is hereby terminated as of June 1, 1941. Bonds will be issued under the Income Accumulation Plan as usual on June 1, 1941 and the accounts of all participants will then be closed by the payment to them of their remaining credit balances.

many plans offered for the benefit of the employees. One of the finest plans that I have seen offered is the G. E. Pension Plan. I am glad I was a member of the plan and would strongly urge all employees to retain their membership, as it will prove most beneficial to them.

So far I have not made definite plans for the future, but I intend to spend much of the summer at the lake and enjoy myself."

Plans are being made for a farewell dinner to be held at the G-E Club Recreation Rooms on Saturday night in honor of Mr. Lutz. Advanced plans indicate that approximately 200 to 250 employees of the Decatur Plant will attend the dinner. A very interesting program has been arranged for the dinner meeting Saturday night.

Return Lost Badges To Personnel Dept.

Employees finding identification badges that have been lost by their owners are asked to return them to Irene Fox, Bldg. 21, at the earliest possible opportunity. It is, of course, important that the badges be returned to their rightful owners just as soon as possible. Employees losing their badges are asked to report the loss to their foremen or supervisors just as soon as the badges are missed.

S. M. Factory Is Crowned Basket League Champion

Wrests Laurels From West Side In Final Quarter Closing Game With 44 to 35 Score

With the naming of a new Champion only eight minutes away Small Motor Factory came through with a last quarter whirlwind scoring spree to defeat West Side 44 to 35 and become the 1940-41 title holders of the G-E Club Inter-department Basketball League.

Although Small Motor finished up with a nine point advantage there was really not that much difference between the two clubs, as at the end of the third stanza the count was knotted at 33 all. Both quintets during the course of the contest proved that they had one quality of a champion—that of coming from behind. With the Factory eleven points ahead at half time the Westerners grimly battled their way to a third quarter termination tie while Small Motor Factory after seeing such a big lead melt away should have by rights quit but instead staged a magnificent "about face" to go on to victory. In a game as close and important as this you would have expected quite a bit of fouling but a total of only eighteen personals were called on both teams.

The new "Champs" were the first to break into the scoring column as "Bonnie" Clawson snuck under for a fielder but George Golden retaliated with a long shot to tie the count at 2 all. Clawson hit a long one and Voirol threw in two fielders in rapid succession to give the Factory a six point lead before West Side's hard-working center, Horstmeyer, tallied a fielder. Vonderhaar garnered three more Factory points and Offerle helped the Western cause with two field goals to finish the first quarter with Small Motor on the big end of a 12-8 count.

With Marquette and Hanley handling the passing and defensive duties and Voirol and Vonderhaar pacing the attack Small Motor turned in a red hot second quarter to enjoy at the rest period what was thought to be a comfortable and safe eleven point lead.

West Side, realizing that something must be done and done in a hurry, launched a point-scoring campaign that was not to be denied. Offerle, diminutive forward, tallied nine points on some beautiful long shots, Miller hit an underneath bucket and Motter came through with two pivot shots, the last one tying the game and setting the stage for the last stanza.

The final quarter was only a minute old when Vonderhaar broke the tie by hitting an under-bucket shot and then he gave Factory a four-point advantage by canning a pivot toss. Voirol, who had been held scoreless during the second half by Horstmeyer, chipped in with a foul to give Small Motor a five-point lead. West Side at this point was having trouble in getting through the Factory's tough switching defense and were not garnering any good shots at all. Vonderhaar hit his third basket of the period as Small Motor once again began to roll; and then Marquette garnered the fielders that gave the ultimate winners a nine point lead with only two minutes to go.

This last bucket broke West Sides' fighting spirit and the game ended there 44 to 35.

Elex Bowlers Go To Kokomo Saturday

Eleven teams consisting of fifty-five Elex bowlers will participate in the Indiana State Woman's Bowling Tournament to be staged at Kokomo, tomorrow. Most of the girls making the trip are expected to take part in not only the team competition but also the doubles and singles.

These keglers plus approximately a hundred rooters and well-wishers will leave for Kokomo early Saturday. The Elexers are scheduled to start rolling around noon and will continue until three.

The tournament is divided into various classes so consequently everyone stands a chance of ending in the money whether a beginner or an old timer. Prize money is paid off for the highest singles, doubles, team and all events scores in every division.

These tournaments in the past have proven very popular with the feminine bowlers of Indiana and this year is no exception as a record breaking entry list has been posted.

The Elex Club representatives have always come back with more than their share of "greenbacks" and judging from the scores posted by the members during the season they are in for another profitable tournament.

«« It's a Joke »»

"Well, dear," said Mr. Blair, after tea had been cleared away, "what are you planning to do tonight?"

Mrs. Blair shrugged her shoulders. "Nothing special," she replied. "I'll probably write a letter or two, read, listen to the radio, and so on."

"I see," he replied, "When you come to the so on, don't forget my shirt buttons."

* * *

Sandy: "Say, when is Annie McTavish goin' to let you marry her?"

Andy: "It's very uncertain. Some fool gave her a big box of stationery with her name printed on it. She won't get married until it is used up—an' she writes very few letters on account of the postage."

IN THE ROUGH

By WALTER SUNIER

Brookwood will be considerably improved this year at No. 4 and No. 7. A new fifteen inch tile drain will be put in at once across these fairways. It will go through the hollow on No. 4 and from there across No. 7 to the creek. The old drain was too small and clogged to carry away all the water in the spring. With the new drain there should be no spring pools in front of No. 4 green.

You had better be out playing. Some of the boys are out every week end now limbering up their clubs. Didier, of course, has been out every week end since 1939. It is practically summer to him now. Most of the boys who have been playing for several weeks all know by this time how to lay their third putt dead and the correct stance for the fourth brassie shot.

Johnny Schwanz, father of Michael Schwanz, helps us out this week by sending in the following poem:

CHAMELEON ON THE LINKS
By W. E. Farbstein

A pill is a fellow who bests you at golf
Every darn time you go out,
But when he starts slumping and gumming his game,
Why, then he's a pretty good scout—
A pleasant companion—a charming old chump . . .
Until he begins to crawl out of his slump! ! !

Brookwood season tickets are $16.50 each this year. Family tickets are $25.00. Green fees on Saturdays, Sundays and holidays will be 75 cents for 18 holes and 50 cents for nine holes. On week days the fee will be 50 cents for 18 or nine holes. We understand that the green fees at the Elks course will be $1.00 on Saturdays, Sundays and holidays.

"Is anything the matter, sir?"

"It was on the tip of my tongue a moment ago and now it's gone."

"Think calmly and it will come back to you."

"No, it won't; it was a two-cent stamp."

Polar Mail Bag Gets Through To Antarctic Crew

Richard B. Black, Commander of the East Base of the U. S. Antarctic Service Expedition, now in south polar regions awaiting the delayed arrival of ships to bring members of the expedition back to the United States, Monday, acknowledged by radio the receipt of the 34th Byrd Mailbag sent out Friday night, March 14th, from General Electric's shortwave station, WGEO.

In a message to Alex Smith, Byrd mailman since the service was started on December 8, 1939, Commander Black said: "Enjoyed mailbag tonight and especially your personal greetings at the end. Ice still holding, but expect to get out before long."

Informed circles believes that a shift in the wind "down under" will enable the ships to pass successfully through the ice pack. For the first time in many years, a steady northwest wind has been blowing for more than three weeks, effectually retarding the progress of the expedition ships, the U. S. S. Bear and the U. S. M. S. North Star. A shift in the wind from the northwest to the east is necessary before the vessels can proceed.

Rod-Gun Club Takes First Match

By A. F. Bowers

The Rod and Gun Club's pistol team defeated the International Harvester Athletic Association in the match held at the Armory. This being the first match of the season for both teams all firing was done on slow fire targets. The course shot covered two targets for ten shots each, and Guy Raymond, the club's instructor, lead the match with 92 and 87 for a high score of 179.

A total of eleven men shot the course, the five highest counting as the team. Those making the team in addition to Mr. Raymond were: L. Bland, Bldg. 27-1, 163; C. Kronmiller, Bldg. 19-5, 157; Homer Murphy, Bldg. 18-1, 153; B. Tillman, Bldg. 19-1, 148. The five made a team score of 800 against 771 by the I.H.A.A.

A return match with the Harvester will be held in the near future on the Association range.

All pistol shooters, as well as rifle shooters, are invited to attend the weekly Thursday evening sessions at the Armory. Girls are invited with the possibility of forming a girls' team. Instruction in handling firearms will be gladly extended.

Club Table Tennis Tournament To Be Held On April 22

Fifth Annual Affair Free To Employees and Families Scheduled for Two Nights

The fifth annual Table Tennis Tournament will be held in the G-E Club on Tuesday, April 22 and Wednesday, April 23. As before, there will be no entry fee.

Leo Wallace, Bldg. 19-3, will again be in charge of the event as announced by Jerry Duryee, chairman of the Athletic Committee.

Matches will consist of men's singles, men's doubles, women's singles and junior singles. All women entrants, not G-E employees, and junior entrants must have G-E Club membership cards, the tournament being solely for G-E employees and the immediate members of their families. The employee parent of a junior must sign the junior's entry.

It is expected that the list of entries will be larger this year than for any previous tournament and that it will require close supervision and excellent planning to complete all the events in two evenings of play. On account of the number of entries expected, Mr. Wallace requests that those intending to play fill out and send to him at once one of the entry forms which will be found in this issue of the Works News.

"I wish the boys wouldn't call me Big Bill."

"Why?"

"These college names stick. And I'm studying to be a doctor."

P. C. Morganthaler

P. C. Morganthaler, 61, for the past fifteen years assistant to the manager in charge of engineering and an employee of the Fort Wayne Works for the past forty-four years, died Saturday morning, March 29, after an illness of one month.

(Continued on Page 2)

"Bottleneck" Relief Is An Important Objective

In the midst of American industry's effort to gear production to the output required for defense articles, the word "bottleneck" has become almost the title for a theme song. It is only natural that a program calling for so varied and so tremendous an effort, all with the accent on speed, should create many problems and obstacles. But while much has been said about the bottlenecks of production, there have been fewer stories telling what the ingenuity of America's factory men is doing to widen the bottlenecks.

As president of the American industry engaged in making the greatest variety and most intricate of defense articles, Charles E. Wilson, president of General Electric is one of the last to belittle the difficulties of getting the production lines rolling. A man who worked his way to the top of the company after starting as a factory worker, Mr. Wilson has more than an academic interest in factory problems. Today nearly all of his waking hours are devoted to a solution of bottlenecks.

But while concerned with bottlenecks, Mr. Wilson expresses the greatest confidence that the obstacles will be overcome by American ingenuity, knowledge and skill in manufacturing.

(Continued on Page 2)

Special Movie Program At Club

A special motion picture program will be presented at the G-E Club next Sunday afternoon at 2 and 4 p. m. This will be the last free show of the Club year and admittance, as usual, will be on presentation of membership cards.

In addition to the feature picture "Mercy Plane" there will be an interesting film on "Artificial Respiration." An added feature will be the unique picture "Fish From Hell" which was made by a group of wealthy sportsmen with the aid of diving apparatus and under-sea cameras.

Safety Record Is Best Since 1935

Safety Education and Equipment Is Cited As Important Factor In Reducing Mishaps

The lowest occupational fatality record since 1935 was established by the General Electric Company last year, it has been announced by George E. Sanford, chairman of the general safety committee of the company. A new record low for days lost per 1000 hours worked also was established.

Only one occupational death was recorded, and that under unusual circumstances. A construction engineer fell from a ladder on a construction job, broke his leg and died several weeks later of pneumonia while still in the hospital recovering from the fracture.

The 1940 record of one fatality compares with seven in 1939, four in 1937, eight in 1936 and none in 1935.

Only one-quarter of a day was lost for each 1000 hours worked statistics indicated. The comparative accident severity rates include a fixed charge of 6000 days for each fatality and lesser charges for other accidents in accordance with the code issued by the American Standards Association, and adopted by the U. S. Department of Labor, associations, insurance and other companies that keep accident severity statistics.

The number of lost-time accidents per million man-hours, 4.66, was the third lowest in the company's history, Mr. Sanford announced. The figure is slightly above those for 1938 and 1939 when 4.62 and 4.25 accidents per million man-hours were listed.

Mr. Sanford ascribed the excellent record to the company's safety plan.

"All new employees are given a copy of a booklet of safety regulations and recommended safe practices. Booklets with additional instructions are provided for certain jobs. Goggles and other necessary protective clothing are furnished by

(Continued on Page 2)

Plans Well Under Way For Elex Anniversary Tea On April 20

Final plans are being completed for the Elex Club twenty-fifth anniversary Silver Tea to be held on the afternoon of April 20 at the Y. W. C. A. All members of the Club are invited to the affair and in addition a considerable number of invitations are being sent to persons interested in the organization as well as Company officials.

Additions to the committees already named are Edith Mennewisch who will serve on the program committee and Ceal Romary who will serve on the hostess committee.

M.B.A. To Resume Collection Of Dues

Action Follows Long Suspension of a Little Less Than One-Half Year

It is announced that collection of MBA dues at the Fort Wayne Works will be resumed with the first deduction from pay earned the week of March 29, 1941. Resumption of collection follows a period of twenty-one weeks—a little less than one half year—during which no deductions were made.

Non-deduction periods are governed by the amount of reserves in the treasury. When the funds on hand reach a sum equivalent to $7.00 a member, collections are suspended. The lower limit is $4.25 per member.

The methods of operation of the Association permit exceptionally long periods during which no dues are collected. The suspension period prior to the one just ended covered a period of twenty-three weeks.

The scope of the organization is to be appreciated with the knowledge that during 1940 a total of $63,415, or more than $1,200 a week was distributed to the membership in benefits. The largest item during the year was sick benefits amounting to $53,918.

NOTICE TO EMPLOYEES

Employees on the west side of Broadway are asked to follow the walk along the east side of Bldg. 19 and use the side or alley entrance to Bldg. 21 when going to the dispensary. In this manner it will not be necessary to pass through the gates in going to or coming from Bldg. 21.

Elex Plans Easter Party At Club Monday Evening

An impressive Easter party is planned by the Elex Club for next Monday evening. The party will be held at the G-E Club and supper will be served starting at 4:45 p. m.

The program will include a spiritual talk on the Easter theme by the Rev. Howard J. Brown of the Forest Park Methodist Church. Music will be by the First Presbyterian Choral Society directed by Frederick E. Bieler. Veora Habig, social chairman is in charge of the program. Tickets will be thirty-five cents. Reservations close today.

No Garden Plots To Be Offered This Year

Due to a gradual decrease in requests for garden plots on the Company's Taylor Street property no reservations will be accepted this year. In past years the Company offered the use of the ground for gardens and made provisions for ploughing and marking the plots.

Two Appointments Announced

J. D. Milne

J. C. Miles

The appointment of J. C. Miles as supervisor of planning and wage rates in the Specialty Fractional Horsepower Division and of J. D. Milne, of Pittsfield, to succeed him as managing engineer of the Plastics Division has been announced.

Mr. Milne is a G-E Apprentice School graduate having enrolled in the Pittsfield Works school in 1912 and graduating in 1916. He has been with the General Electric Company continuously since that time

Volume 24 Friday, April 4, 1941 No. 59

• P. C. Morganthaler

It is with a feeling of irreparable loss that we record the passing of Mr. P. C. Morganthaler, assistant to the manager of the Fort Wayne Works.

Joining our Company forty-four years ago Mr. Morganthaler, during his years of service, became a vital part of our organization, and his death will mean a severe loss that cannot easily be repaired. He pioneered in the development of many of the products manufactured by the General Electric Company, and was particularly outstanding in designing and perfecting of meters.

Those who knew Mr. Morganthaler best admired him not only for his ability but for his fair and impartial treatment of those who worked for him, and for his rigid assumption of complete responsibility for the success of assignments made to members of his force.

The attribute of loyalty to his people was equaled only by his indomitable will to master any problem presented. It was this characteristic combined with his zeal for a thorough knowledge of the manufacturing and operating principles of everything produced at our works that enabled him to fulfill his responsibilities with such a remarkable degree of success.

Mr. Morganthaler's death will be felt not only at the Fort Wayne Works but throughout the General Electric Company.

• The Odds Are Too Great

Risking 12,000,000 minutes to save one minute certainly offs no inducement to even the most confirmed long chance gambler, and yet thousands of persons are accepting these odds every day in gambling with the most precious thing they have—their life.

There are approximately 525,000 minutes in a year. A person in his middle forties has, according to vital statistics, an expectation of twenty-four years of about 12,000,000 minutes. Every chance this person takes to save one minute through a careless act or disobedience of safety rules is a bet against fate. If he wins he gains a minute. If he fails he loses 12,000,000. The odds are too great.

Summoned By Death

(Continued from Page 1)

Mr. Morganthaler enjoyed what was probably one of the most colorful careers in the General Electric family. He first became an employee in 1897 when he enrolled as a student in an engineering course, which was maintained in much the same manner as General Electric's present test course. He was assigned to the Meter Department and two years later was placed on general testing work in this department.

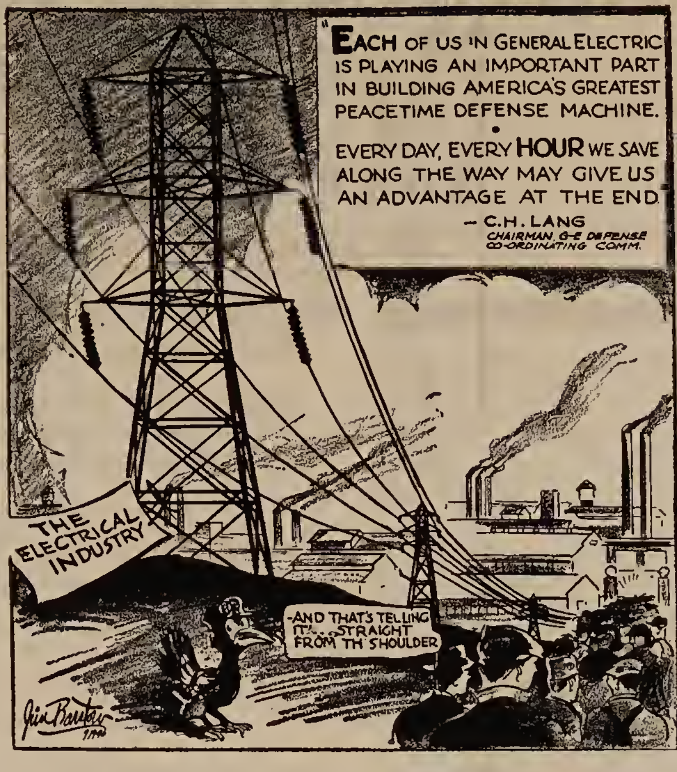
In 1902 Mr. Morganthaler became a member of the Meter Sales Department and after continuing in this department for some time he returned to the Meter Department to engage in the many phases of meter engineering and manufacturing. In 1917 Mr. Morganthaler was made managing engineer of the Meter Department and after nine years in this work he was on May 1, 1926 made assistant to the manager in which capacity he was serving at the time of his death.

An unusual honor was accorded Mr. Morganthaler in 1925 when he was selected by the General Electric Company as a member of a small group to visit a number of electrical manufacturing plants in Europe to investigate the designs of certain electrical equipment and the manufacturing methods used in these plants.

Mr. Morganthaler was a member of the American Institute of Electrical Engineers, Fort Wayne Engineers Club, The Quarter Century Club, the Fort Wayne Chamber of Commerce and other organizations.

Funeral services were held Monday afternoon with Dr. George William Allison of the First Presbyterian Church officiating. Burial was made in Lindenwood Cemetery.

FIRST LINE OF DEFENSE



"EACH OF US IN GENERAL ELECTRIC IS PLAYING AN IMPORTANT PART IN BUILDING AMERICA'S GREATEST PEACETIME DEFENSE MACHINE.
EVERY DAY, EVERY HOUR WE SAVE ALONG THE WAY MAY GIVE US AN ADVANTAGE AT THE END
— C.H. LANG
CHAIRMAN, G-E DEFENSE CO-ORDINATING COMM.
THE ELECTRICAL INDUSTRY
-AND THAT'S TELLING IT... STRAIGHT FROM TH' SHOULDER
Jim Berryman

To Decatur Works

The appointment of Robert J. Houser as supervisor of planning and wage rates of the Decatur Works is announced by E. W. Lankenau, superintendent of the Works. Mr. Houser succeeds George W. Auer who has been appointed superintendent of Bldg. 4-2 and 4-3 at the Fort Wayne Works.

Mr. Houser graduated from the Apprentice School in 1934 and worked as a toolmaker until 1935. During the following two years he was employed in tool equipment and process planning work in Bldg. 4-2, and in 1937 served in supervisory capacities in the planning and wage rate departments in Bldg. 17-2. He continued in this work until May 1938 when he was made supervisor of planning and wage rate in Bldg. 4-3 and later in Bldg. 4-2. He continued in this work up to the time of his present appointment.

Robert J. Houser

Mr. and Mrs. Houser and their two daughters Dorcas Ann and Joyce Ellen will move to Decatur in the near future.

A new consignment of electric irons and ironing boards have been received at the employees store. The iron, a 4½ pound streamline model and the met-l-top board are sold in combination at a special price. Store hours from 10 a. m. to 4 p. m. Monday through Fridays.

Bottleneck Relief

(Continued from Page 1)

How General Electric cut three months off a "bottleneck" threatening the production of the vital propulsion equipment for naval vessels is cited by Mr. Wilson as one example of both ingenuity and teamwork within industry.

In one of General Electric's largest plants in Erie, Pa., new facilities are being set up in two buildings, one for the manufacture of turbines and one for gun mounts. New machine tools—boring mills and lathes—were needed before work could get under way on the turbines. The Niles Tool Company, Niles, Ohio, was unable to promise delivery of these tools before October.

When the Niles Tool Company and General Electric got together to try to widen this particular bottleneck, it was found that some of the parts for both the lathes and boring mills could be machined in General Electric's gun mount division. Niles assigned these operations to the Erie Works of G-E.

The tool company called John Hoerner, 75-year-old pensioner of the General Machine Company, out of retirement and sent him to Erie to supervise the operations in General Electric's plant.

The parts for the boring mills and lathes are now being machined in Erie under the pensioner's supervision. As the parts are completed, they are shipped to Niles for assembly, then returned for installation in General Electric's new turbine building.

The whole process has resulted in advancing the delivery date for the first units from October to June. General Electric will be able to go to work on the turbines more than three months sooner.

This is just one instance of how bottlenecks are being widened in a company now devoting sixty per cent of its facilities in seven large plants to defense items. At the same time, a prodigious training program is under way. Little more than a year ago, G-E had 70,000 employees and today this total is rapidly approaching the 100,000 mark.

WITH THE COLORS

The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

FRANCIS W. ZUBER, Bldg. 19-2, enlistment in U. S. Army. Residence, 3330 South Calhoun Street.

CLARENCE F. MILLER, Apprentice School, enlistment in Army Air Corps. Residence, R. R. No. 10.

WILLIAM J. BAUSSER, Apprentice School, enlistment Air Cadet Corp. Residence, 5513 Hoagland Avenue.

DAVID F. WELCH, Transformer Department, enlistment in U. S. Navy. Residence, 2537 Maple Place.

JOSEPH E. KITSON, Decatur Works, selective service. Residence, Decatur, Ind.

LAWRENCE JESSIE BRESLER Motor-Generator, selective service, assigned to Fort Benjamin Harrison. Residence, 1415 Stophlet St.

ROBERT JOSEPH SHIREY, General Purpose Motor, selective service, assigned to Fort Benjamin Harrison. Residence, 501 Walnut Street.

Safety Record

(Continued from Page 1)

the company in accordance with the requirements of the job. Safety shoes are made available to employees at moderate cost.

"Foremen are charged with seeing that safety regulations and recommended practices are observed and that safeguards are provided when needed. All accidents are investigated and steps taken to prevent their recurrence. Frequently, suggestions in the interests of safety are made by the workmen and when these ideas are adopted, suggestion bonuses are paid."

Each plant has its safety engineer and these engineers comprise the general safety committee of the company. Frequent meetings of this committee permit the exchange of suggestions and all plants can benefit from improvements made at one.

Appointments

(Continued from Page 1)

with the exception of twenty-one months in the Air Service during the World War. He has been with the Plastics Department since 1927 and has participated in all three phases of that organization—that is commercial, engineering and manufacturing. Mr. Milne is married and has two children, a boy and a girl.

Mr. Miles is also an Apprentice School graduate having completed the machinist-toolmaker course in 1920. He worked in the tool room until 1928 when he was promoted to the designing section under B. C. Evans. He continued in this work until 1933 when he was transferred to the Wire and Insulation Division as mechanical supervisor. When the Plastics Division was decentralized in 1936 he became managing engineer of that Division and continued in this capacity up to the time of his present appointment.

Ten Presidents Of Elex Club Remain Works Employees

Ten of the twenty-two girls who have served as presidents of the Elex Club remain Fort Wayne Works employees on the eve of the organization's twenty-fifth anniversary observance. The girls are pictured above as follows: top row, left to right—Eva Lynn, Bldg. 16-1, present president; Hilda Rodenbeck, Bldg. 4-4, 1933; Veora Habig, Bldg. 17-1, 1938. Second row, left to right—Irene Fox, Bldg. 21, 1922 and 1923; Hilda Walda, Bldg. 4-5, 1925 and 1926 and Loretta Bloom, Bldg. 16-1, 1940. Bottom row—Irene Meyers, 1930; Louise Lawson, 1932, 1933 and 1936; Lois Miller, Bldg. 21, 1927. Lillian Wolf, 1936 was absent when the photographs were made.

News Around

"Sprinkle me with star dust". So runs a popular ballad. This must have been the thought spinning in Rachael Luellain's mind when she received a gorgeous nightie covered with shiney stars. My stars what next?

Clarence Speaker, Bldg. 19-3, the bird-house hodeler of great renown, has a new model bird house guaranteed to keep out sparrows, starlings and blackbirds. It has a trap door with a string attached to it, and when one of the above species tries to get into the house, you just refuse to open the door. Sounds O. K., Clarence.

Ted Schlup, Bldg. 19-3, has joined another team known as the "Twenty Mule Team". He sure keeps Bldg. 19-3 in the news.

It is reported that Frank "Arkie" Rusewald, Bldg. 19-3, star performer on the floor, was featured on the Palace stage Sunday evening. Arkie it is said, was supposed to make a noise like the opening of a bottle. The gang feels that that should be easy for him for he has had a lot of practice popping in Bldg. 19-3.

Sunbeams From 17-4

Now that Stella Nickrash has become so perfect at tying, she thinks that she should have a medal of some sort.

June Martin just loves to walk in the rain, especially up and down Maumee Avenue. The girls of the department gave a house-warming on Dorothy Wilhelm and her sister Thelma, Monday evening. The party was in the form of a pot-luck supper. Those present were: Mabel Vizard, Mabel Murry, Beryl Kolkman, Ann Rentschler, Bonnie Shoner, Ruth Lemert, June Martin, Lydia Scheiman and Belle Buchan.

Some of the boys were asking Art Brendenburger, Bldg. 4-3, why he did not attend the dance last Saturday evening. He offered more excuses than Heinz has varieties. Perhaps he was afraid that Ted Mullins and Don Voorhees, Bldg. 4-3, might be there and usurp some of his time.

We also want to congratulate Elmer Wagner, Bldg. 19-3, on his birthday of April 5. Almost an April Fool baby, weren't you, Elmer?

SANDY SAYS

"What's a substitute, Uncle Angus?" asked Sandy, Jr., one day.

"Ah Weel, me lad," answered Uncle Angus, "a substitute, to a Scotsman at least, is something ye get because it's cheaper but will still do the work."

"Cheaper than what Uncle Angus?"

"Cheaper that what ye really wanted."

"Well, then every day my daddy gets up, puts on his substitutes, eats breakfast, lights a substitute, gets into his substitute, and drives to work."

Now, I said, I don't mind your abuse of me but don't murder a grand old word in our language. Let me explain a meaning of it that lots of people don't usually think of. Most people think of "substitute" as something of poor quality, something to be avoided. Perhaps the first three letters of it give that impression.

The funny part of it is that after we go on for years using something, and then for some reason have to find a substitute, we often find to our surprise that the substitute turns out to be better and cheaper than the original.

As just one example, look at the Chromium plating on your automobile. It's better and cheaper than the nickel plating you saw on the gorgeous sport models of the 1920's.

A substitute that is better, yet cheaper than the original is my idea of a SUBSTITUTE. With this, and that getting scarce nowadays, there's a golden opportunity for all of us to keep our eyes open, and suggest substitutes right and left. Of course we might not hit upon an idea as important as substituting electric lights for the old gas jets, or the automobile for the horse, or railroads for stage coaches, but the field is not closed by any means.

That's a good idea Colin, I said—better but not cheaper. No one could write this column any cheaper than I do, since I write for nothing.

"Yes" said Colin, "it's worth that too. But if ye want help why don't ye run a contest?"

"You mean to offer a prize," I said with dismay.

"Why yes, o' course if we can find someone to donate them."

Irwin "Jack" Koonts, Bldg. 19-3, is reported to have made the statement, "I was going to buy a new car, but I gave the old car a bath last Saturday and it looks so much like a new one that I am going to put in some gas and run it another summer. That is if I can get the boys to help start it by giving it a push once a week." Note, battery salesmen.

Carl Conrad, the nifty little bowler of Bldg. 19-3, lost another bet last week. Wonder when we can collect, Carl, just name the time and the place and we will be "Johnny on the spot".

George Guenther, Bldg. 19-3, seems to have a grudge against a certain light pole in the Jones Street lot. George made a repeat last Monday.

Harry Karr, Bldg. 26-2, says a little thin ice can't keep him from fishing. But the gang says its no wonder because Harry keeps an innertube wrapped around him. You may be all wet at that, Harry.

Borings From 4-4 Office

Spring is here at last, and am I glad. I can at last shed my red flannels and all that goes with 'em, and how I can romanticize. Oh Spring, Oh beautiful spring . . . Speaking of spring, I saw Virginia Sanders running down Broadway with only one shoe. It so happens that she got on the street car and kicked her shoe off. So she had to run down the street to get her shoe. Talk about a modern Cinderella. Personally, it was too early to rush the season . . . Lillian Magner celebrated her birthday last Tuesday on April Fool's Day. Now if some one would ask me that's a heck of a day to celebrate a birthday. Why no one would know just when your birthday was. They would think you were just fooling. Well, Lillian, we all wish you a very happy birthday, and of course many more. . . . Vern Daseler spied a penny the other day on the floor—a bright new penny at that, so he stooped to pick it up. But to his amazement, it was stuck. He laughed and then went on in the office. Coming back he bit on the same penny. He can, however, take a good April Fool joke. . . . Nate Porter picked a good day to bring candy, April 1st. It was some extra special superdeluxe candy from Cuba, we all were fooled 'cause it was no fooler. . . . In last week's WORKS NEWS, I noticed a column from Bldg. 26-3. I guess all the girls are going daffy over their new night foreman. One of our girls is sorta that way about him too. Here is a poem that was dedicated to him this week:

"My love for you
Will forever flow,
Like water down a Potato Row.'

I'll let you in on a big secret, and no one is supposed to tell. But if you promise not to let it out, I'll tell you. Our own Mary Hile is going to leave the fair portals of the General Electric, April 25th, to assume the duties of a house wife Gee, I'll miss Mary a lot when she leaves, but good luck, Mary. . . . Charlene Snyder was seen carrying a large book of Victorian Literature. (It only has 4200 pages). She was overheard saying that in her lunch hour she was going to read Browning, Tennyson, Fitzgerald, Brontes, Keats, and all the rest of the great literary genii. . . . Well really, should close off for now. Haven't told you for a long time that I see Mel Warner, Don Niles, Mr. O. D. Uncapher and Thomas Staley doing their shopping (where I do mine) at the dimery. It 'tis enough for now. I remain, sincerely as ever,

Elmer, the Field Mouse,
(The Rat to You).

Thisa And Thata 19-5

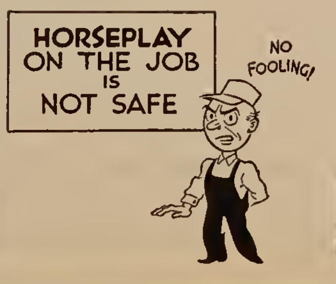
We have a charming little milk maid in our midst. Last week she milked two cows and came to work with a blister on her hand. It's a good thing the Mister only works nights every three weeks, isn't it Jenny? . . . One must be good to lead the grand march at the skating rink, but Mildred Werling sure delivered the goods. . . . Ruth Rosenberry had a group of girls out to her new home last Friday night. Prizes were won by Helen Weimer, Jenny Frazier, Mildred Friedrick, and Sarah Chelf. Others there were Sue Thompson, Frieda Kniche, Margaret Haner, Ruth Horsch, Betty Long, Helen Engle and Avinell Geidley.

Best wishes to Katheryn Kilgore, Bldg. 26-2, who was married to Arthur Eagleson on March 22.

Is Zat So?

We can all breathe more freely now that April Fool's Day is over! I hope you readers were not too easily fooled. After the third prankster told me my identification badge was gone I finally got wise and shouted "April Fool" and grabbed my badge just to make sure it really was still there! That's what I call taking undue advantage of one's sense of humor because we are all afraid that some of these days we might lose that precious little button. I am glad that I still have you fooled into reading this column and believe me, dear reader, this is no joke! . . . Frank Quinn has the nicest friends! They always remember him with a clever post-card when they are on their vacations! . . . Walter Prince is hereby unanimously selected as Bldg. 17-1's choice for the honor (?) of pulling the prize dumb stunt of the year! Walter has been proudly telling about the boat he was building in his basement. He recently completed the boat and decided to take it up to the lake, but was dumbfounded to discover that he couldn't get the boat through the basement door. He is undecided whether to tear the boat apart or to make a larger door to his basement! It is too bad, Walter, that you didn't build your boat in Oscar Schelper's basement, then you could just leave it there because Oscar's basement is always flooded every spring! . . . Ed Brosche has purchased a new Plymouth. We wonder why Henry Papenbrock, our salesman, is losing so many prospective customers. What's the matter "Pat," are you losing your old sales talk? . . . Harold Hoffman recently passed physical examination for Selective Service, and proudly proclaims that they don't come any better! . . . Lewis Watt is in the market for a goat! It seems that our Hazelhurst muck farmer is a little jealous of all the attention that Bob Taylor has received from the Government since they covered his farm with lime in order to make it more productive for Bob's three cows. . . . So Lewis has decided that maybe he could get some lime for his farm if he had a goat. May we suggest that you contact Howard Eastman as he may sell you one of his goats! . . . That big smile on the countenance of Gerald Humbarger is because he just moved into his new home on Parnell Avenue. Good luck, Gerald, and we are glad to see you so happy! . . . Just a little advice from Bldg. 17-1 gang to Alfred Nix who will leave April 15 to join the Draft. If the Camp Hostesses are anything like the pictures we have seen be sure to let us know, and another thing we advise is that you had better stay away from blackjack games until you have had a little more practice. Don't forget the gang in Bldg. 17-1, who will be working hard to do their part towards National Defense while you are doing yours.

See you next week,
The Question Mark.



HORSEPLAY ON THE JOB IS NOT SAFE
NO FOOLING!

4-6 Ramblings

There is always the problem of the working girl, heaven help her. Now take any Bldg. 4-6 employee (feminine). I wouldn't know, but I am told that . . .

She arises any time after the street cars have started running; she dashes a bit of cold water at her face, sprinkles herself generously with powder (just how much of her depends entirely on how long the street cars have been running), contributes otherwise to her schoolgirl complexion and is ready for breakfast. She winks at the only available portion of the morning paper, swallows coffee, brushes her four front teeth, tops the whole caboodle with one of those gadgets they call a hat now days and if she is lucky, she catches the street car that will get her to work ten minutes early.

In several cases out of several, she swings from one of those . . . she stands on the street car, clutching at this, that and some stranger's lunch bucket. Before she can spy a familiar face, the street car has stopped in front of Bldg. 18 and "this is as far we go."

We find her at the gate, fumbling in one place about her clothing, and then another, for a funny looking button. (Oh yes, that reminds me, there is sometbing else I want to . . .). Whew—(when she finds she did not forget it), she is permitted entrance, and she sprints up to Bldg. 4, throwing cheery "good mornings" carelessly about, still hopeful that she can start THIS day out with a bang. She enters the first door, but being seventy-ninth in line for the elevator, (about one-fourth of which have run in on Bldg. 4-1) she proceeds to stand on one foot (somebody has the other one) humming, whistling or clucking away the minutes until she can squeeze into that lift.

The first clock she meets tells her that if she is able to make it at all, she will ring in only at 7:59 and the ten minutes afore mentioned, must either come directly after 8:00 o'clock, or she can start to work "on the (breathless) dot".

But it is time to begin work and . . .

19-5 Office Chatter

Hugh Neiley is reported to have had himself a time waiting on a Belt Line car last Saturday morning. . . . It seems that Larrimore has a very good idea for reducing and will give his special diet to anyone just for the mere asking. It sounds like enough food to feed an army—especially the orange crush. . . . Wilma McKay returned from Indianapolis all enthused by the ice show. . . . No brides this week but we had one bridesmaid. . . . The whistling section is now practicing for Easter. . . . The riveters on the new addition have had the attention of all the top floorers.

By means of the office grapevine, it has been learned that Don Shultz, the poison pen writer of the Bldg. 19-3 Planning Section, celebrates his birthday next Tuesday, April 8. As Uncle McWell commented last summer, Don will expect remembrances from his associates individually or collectively—large or small—just so it is a gift.

Since Clarice Fyock, Bldg. 19-5, received that postal card from a certain captain in the army all of the girls are jealous.

Bill Gallmeyer, Bldg. 19-5, has gone into the paint and decorating business — he's painting goose eggs now.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

Last Saturday morning 60 Elex Bowlers and a number of rooters filled two chartered buses and several private cars to embark for Kokomo where the Women's Indiana State Bowling Tournament was in progress. As is usual when these girls gather, the buses were soon filled with much merriment, for no place is quiet for long with Ceal Romary, Polly Ort, Pat Chapin, Charlotte Stanford, Sue Camerson and Mazie Greek around. We outdid ourselves in the old songs enroute—from "Hail, Hail, The Gang's All Here" to "Sweet Adeline"—mostly off key.

Upon arriving at our destination and checking our bowling paraphernalia, we set out for a tour of the city. We rounded one corner and whom should we meet but Pauline Beaty and some friends who were on their way to Indianapolis, but loyal to Elex, they had stopped to lend some moral support. As we approached Main Street and the shops we saw Irene Meyers, Eva Lynn and Lois Miller emerging from the five and ten doing their Christmas shopping early.

Later on we saw Edna Knight, Louise Schwartz and Dorothy Franke going into ecstasies over the tin types they just had a poor man endanger his camera for.

When the gang sounded for roll call at two o'clock, all the keglers were on deck to roll the cannon ball at the maples. The gang did their best for good ol' alma mater. We did keep within our averages but no one set the house on fire. Wilda Click, captain, Polly Ort, Frances Allen, Martha Weibel and Ella Mayo rollnig for Elex Team No. 1 totaled 2099 to place third in Class C and Helen Tieman, captain, Helen Stahl, Edna Knight, Marie Downie and Olive Armey for Greenblatt's bowled 2066 to place fourth in the same class. Several of the group did a follow-up by staying over Sunday for the doubles. They carried on with the good work in the usual Elex style.

Back home again with memories of a grand time, we find our thoughts already turning to the 1942 tournament to be held in Evansville.

You really have to rate recognition like this. Harold Hart, Bldg. 4-3, lost his identification badge somewhere on the floor. Some one found it and promptly turned it into the office. Whereupon it was immediately attached to a card and put into the bulletin display case. My, my, such popularity must be deserved.

Our genial friend Everett "Honeybunch" McKee, Bldg. 4-3, is back with us again. He was transferred to another department but just could not stand being separated from his buddy Don "Rosie" Voorhees. So Everett is back with us again and all is well.

Francis Thomas, Bldg. 20-2, got the surprise of his life one day last week. Upon arrival home he found his wife had arranged a dinner party for him. Well, and good but Tommy claims the invited guests took up all the space at the table, and he had to eat with the children on the front porch. Tommy is going to make it a point to insist on a seat at the first table next time.

NEWS THROUGH THE PLANTS

26-5 Tool Bits

Spring is in the air! This statement explodes many things in our minds. We think of fishing, making garden, flying, singing, and even house-cleaning.

Hoffman, Tennyson, and Hartman already are counting the big bass they are going to get this spring.

Ed Schafenacker has his plow sharpened already for the spring plowing. Incidentally we forgot to mention besides having three cars he also has a ton-and-a-half truck and tractor to keep in repair. The trunk in Ed's Chevy is cluttered up as bad as "Fibber McGee's" closet. He says he can still get things in and out so we won't clean it out until some time this summer. If by chance you might be driving north on 27 some evening and pass a Chevy with corn sprouting out of the trunk you'll know you passed Ed.

Speaking of flying brings us to the bird boys of Bldg. 26-5. Frank Przebindowski is one of our active airplane enthusiasts and about any week you'll find him soaring over the Airport getting in flying hours to qualify him for his pilots license. Earl Shaefer, an apprentice of Bldg. 26-5, is also learning to fly.

The Song Bird Quartet of the Aircraft Department, Bldg. 26-5, will remain a trio unless they find a first tenor to make it complete. Mike Lowe, Mike Schmidt and Ozzie Nahrwold are looking forward to a fourth for their quartet.

We almost forgot to mention spring painting. It seems that Doris Windhorst bought a new pair of sport oxfords and after a week of wearing she tired of them because they didn't come up to her expectations of snappy shoes. So the Apprentice boys of Bldg. 26-5 gave them some class by slyly daubing red paint on the heels. This contrast was much too artistic for Doris, because she was later seen removing the paint.

Carey Baker is sure the proud one of Bldg. 26-5. He has been sporting a newspaper completely full of pictures and news comments about the state basketball champs of Ohio. His brother, Floyd Baker, is coach of this winning High School team of Martins Ferry, Ohio. We admit this is really something to be proud of. Too bad the North Side Redskins didn't come through so that the Baker Brothers could point with pride to their respective teams.

Ten cent sandwiches don't taste good to Ralph Steward and George Schlemmer since they found a place to get a good sandwich for thirty cents. We don't know if they are going back a second time since the first time George had to finance Ralph as he only had enough money along for a down payment.

We don't want to forget to congratulate Virginia Rummel who had a birthday last week. The little sample bottles of Coca-Cola were swell. Otto Rodenbeck didn't get to taste his because the cork popped out and the contents filled his vest pocket.

Kenneth Fremont McCague, Bldg. 26-5, is on the fence and doesn't know which way to fall. He can be a new car salesman but thinks he can make more money selling used cars to his friends. If he sells them used cars he loses them as friends and if he loses the sales he loses all the money and if he loses all the money he won't have any for his campaign for Mayor of Ossian and if he loses all his friends his money won't do him any good anyhow and if he quits to go on a farm he can't be a News Reporter and Safety man. Better stay at the G-E.

Can you imagine anyone taking a day and a half off after just having had two weeks vacation last year. Of course it could have been a cold. For details ask E. Fretz, Bldg. 26-5.

Prices may be going up but you can still buy a good laugh at nominal cost. For details see Margaret Shafer, Bldg. 26-5.

News On The Nose From 4-5

Here we are back in the old rut again, er-uh, we mean groove. After one week's absence from these columns of learning, we've come back again 'cause a whole five people have told us they missed our weekly chatter. . . . Gawrsh, gratifying, isn't it?

We should still be bowing our heads in shame though, after the hasty way we acted last week about the "awful pipes creating a cloud of smoke around the "info" desk. We are still apologizing to Frank Peternell, Maurice Reed and Irv Koehlinger for blaming them, when it was celluloid burning in an ash container instead of their beloved pipes. . . . And speaking of strange odors, the inspectors in the test section are still recalling the weird combination produced when Harold Anspach and Herb Cook put perfume smelling like "the last nite in Paris", (quoting Ray Schwartzel) in their hair. What did they use Ray, Sinful Soul? . . . In fact we women can't have anything strictly to ourselves any More. The men have even taken over the use of lipstick, as George Seabold can testify after .having performed a very artistic job on his kissable? lips. . . . Have you heard the wail of the broken hearts coming from the Bldg. 4-5 winding section? And all because the handsome lad, Bert Hartendorf, has taken for his lovely bride, the very attractive lassie, Jean Linehan. Congratulations Bert, we all think you did a mighty fine job of picking" . . . As wedding bells will soon be ringing for Evelyn Rapp, a shower was given in her honor by Mamie Allen for all the women inspectors on Bldg. 4-5. Our strawberry blonde, Evelyn, was so overwhelmed by all the nice things happening to her that she couldn't get to work Monday morning. . . . Much curiosity was aroused the other day when "Sailor" Elmer Davis arrived at work with his usual jodphurs and riding boots. He confessed that he had to dress up that day in order to give a lecture on ground hogs. So it takes fancy dressing now to approach the subject, eh Elmer? . . . We wonder whether Goldie Branning and her new husband are still keeping house on the floor. They haven't been able to get the living room suite they want because of manufacturing conditions in England. Will anyone offer any soap boxes as a starter? . . . And Carl Beyerlein is on top of the world these days because he was called handsome and wonderful. He even treated the boys to candy he was so elated. . . . Foreman Ed Klomp had to answer this innocent query the other day. Roy Whetstone, while working on the aeroplane, donut motors questioned, "Who's going to eat all the doughnuts made from these machines?" Perhaps Bldg. 4-5 will share them, they're a pretty nice bunch of fellers. . . . So 'till the next time Snoopin' Sal brings 'round a new gust of Winchellisms, we are yours truly, and all in fun. G'bye all you nice people.

Bill Fritz Is Confined By Illness

W. H. "Bill" Fritz, Bldg. 18-2, treasurer of the G-E Club is confined at the St. Joseph Hospital by illness. Bill's chief regret in being forced to bed is the fact that it represents his first absence from work, due to illness in thirty-five years. Bill is recuperating nicely and is receiving visitors.

Slips And Chips

By Sir Vis, 4-4

Paul Hitzeman was heard asking the candy lady for samples the other evening. He also has petitioned one of the leading oil companies for the erection of a couple more filling stations. Do you suppose his purchase of that new car has anything to do with this?

Why did John Heine drop his clock card in the black box last Thursday evening? Do you suppose they moved John's regular Wednesday meeting, held on Friday, to Thursday, and he became confused. Whatever was the cause, John started out the door when he realized his mistake.

Donald Otermot said "I do" last Saturday while his freedom took the wings of an angel. Maybe it won't be so bad Don. There is a lot of us guys, so you will have company. Congratulations and all that sort of thing.

We are blessed (or are we) with the Hursh brothers. Yes, Woodrow Enoch and Ralph (Bud) Hursh are now working with us. No brotherly spats as yet, but wait, they can't keep this up much longer.

As the clock nears 3 p.m., that white ball you see sailing through the air isn't spiritualistic phenomena at all. It is Chris Delagrange with his hat off.

The first day of April is known as Fools Day. Some show their wares while some (like fish) bite foolishly. In our department, two of our beloved co-workers fixed a nickel fast to the floor, hoping some passerby would become foolish enough to try to pick it up. After hours of disappointment, the nickel was removed. "Let's row over to another spot," said Owens to Martin.

Now my dear friend of the rotor section Albert (Cookie) Steinhauser was seen purchasing cookies again. Did the girls stop bringing them in? Say, by the way, did the Judge like your cookies on Wednesday morning a week ago.

Leo Blair has been wondering who inserted that story about him in "It's a Joke" last week. Well, Leo, it was the Works News Editor, and he copied it from the August, 1940, issue of a railroad magazine.

We wonder what makes Ella Wagoner's (Bldg. 17-2) face get red when Don Klopfenstein talks to her. Ah, Ha! Must be very interesting.

Irene Witham, Bldg. 17-4, has turned to knitting and sewing since her boy friend has gone to camp. Don't worry Irene, he'll come back.

It has been suggested to Emily Nierman, Bldg. 19-5, that she use a rubber ball the next time she bowls. Seems as if Emily cannot keep the ball off her feet.

Marie Lehman, Bldg. 17-2, being a good samaritan and saving Claude Gill from starvation, gave him a big red apple to eat until he reached home. Be careful, Claude.

Bldg. 4-4

A few misused words could be arranged into a sensible statement around election time don't you think so, Ivan Butler?

Walter McCormick, Bldg. 4-3, doesn't answer to the name of "Dutch" anymore. If you want to attract his attention, call him "Junior."

Bonnie Jetmore thought it was getting dark the other day and here it was only that figure in the black shirt standing at the drinking fountain reffected in her glasses.

We all think Al Steinhouser would make a good villain in his black shirt. All he needs is a moustache.

Since Mary and Oma are on a diet, they are not eating home made chocolate cake, or is that the reason?

We are glad to report that Catherine Roehling is doing fine and we expect her back in the near future.

Helen Maxine Dunaway was all excited the other day when Paul was kneeling at her place. Come to find out he only wanted to clean from underneath her bench. Marjorie Thompson wishes that anyone wanting to send her flowers for her birthday would sign their name. She appreciates the flowers, but she hates to be in the dog-house.

Louie Devoe played a pre-April Fool joke on Lela Siebert when he "borrowed" her kettle of chicken noodle soup which she had brought for the girls' potluck. Luckily he returned it before lunch time.

The Dale Irwin's have been doing some redecorating at their house. At least that was the reason Dale gave when asked why he was so sleepy lately.

Dots And Dashes 26-3

Do you remember last Tuesday? Yes, it was April Fool's Day. Maybe you weren't fooled but you probably know of someone that was. Marie Hershberger was one of them. She received a blank envelope . . . Be careful girls. We understand that Alice Norris is a past master at putting over a joke. . . . The winding department is happy to greet Donald Poland in their organization. We wish you the best of luck Don. . . . Roqua Wiebel, Betty Jackson, Pauline Holzworth and Ann Bremer are getting ready for summer. They are taking swimming lessons. . . . Can anyone tell us what subject is most interesting to Berniece Riley. Just mention remodeling to her. . . . Don't forget to ask Margaret Haggenjois what kind of sandwiches Rose Mary Bender likes best. . . . If you want to know who the hardest workers are in Bldg. 26-3, just ask Mildred Baumgartner, Josephine Lee or Hilda Scheuman. . . . Francis Craig can tell you who dropped an iron gauge in the cement mixture and then had to fish it out with a piece of iron. . . . Someone will have to hide Ned Biddle's cap so he won't be baldheaded too early in life. . . . The Transformer Department employees would like to express their deepest sympathy to Marjorie Robertson in the death of her father; to Lorine Kleine in the death of her mother and to Louise Perry in the death of her brother.

Dorl Feasel, Bldg. 4-3, has taken leave of us, much to our regret, and is to become a star flat foot in our Plant Protection Department. So take warning all you saboteurs and espionage agents.

M.B.A. PATIENTS

General Purpose Motor: Virginia Shivley, 337 W. Butler St.; Alrick Johnson, 901 Home Ave.; Floyd Enos, 524 E. Taber St.; George Horner, Lutheran Hospital; Joseph Quinlan, St. Joseph Hospital; William Yates, 128 E. Masterson Ave.

Transformer: Emma Bradford, 1719½ Lindley Ave.; Clarence Mentzer, 2110 Thompson Ave.; Bertha Roberson, Lutheran Hospital; Margaret Sabo, 310 E. Wayne St.; Harry Wilson, R. R. No. 2, City; Janice Thrush, 905 E. Rudisill Blvd.

Motor-Generator: Adelma Shaw, R. R. No. 5, City; Wanetta Mathais, 335 W. Berry St.

Plastics: Doris Oberlin, 730 W. Third St.

Series & Specialty: Ethel Hays, 1300 McClellan St.; Anna Fisher, 1344 Eliza St.; Thelma Court, 1118 Rockhill St.; Russel Earl, 713 Broadway.

Office: William Fritz, St. Joseph Hospital.

Winter Street: Ethel Carriger, 803 W. Berry St.

Shipping: Granville Heck, 2405 Poinsette Dr.

General Service: Raymond Lahrman, 2820 S. Barr St.

Tool Dept.: Alfred Rondot, 2508 Weisser Park Ave.

Left the Hospital: Kathleen Meyer; Alberta Bultemeyer; Perry O'Neill; Francis Magers; Mary Mace; Arnold Berning; Martin Marenke.

Returned to work: Chris Baade; Bess Martin; Audrey Metcalfe; Edith Fuller; Paulus Adams; Mary Renbarger; Gladys Castor; Edna Crow; Ruth Trout; Virginia Parker; Marian Armstrong; Lucile Counsellor; Alberta Welsh; Helen Ross.

Did you ever try operating a testing machine without turning it on? If you haven't, ask Dorothy Hammons about it, in Bldg. 4-3. She says it just won't work.

Anyone wanting to know how they play basketball in Florida should ask "Red" Renbarger, Bldg. 6-B. He especially enjoyed the girls game.

A pot luck dinner was enjoyed by the Insulating Core girls on the second shift last Thursday night. Those present were: Miriam Birely, Elizabeth Jones, Donna May Binkley, Ellen Gaff, Maude Goodrich, Marie Lehman, Bertha Witham, Ella Wagoner, Margaret Mettert, Eileen Brown and Marie Francies.

Our champion orange eater of Bldg. 4-3 is Myrtle Bennett. The only trouble is she forgets to bring the oranges along.

He Was'nt Curious

Henry Lojek, Bldg. 19-3, took his wife to the Home Show. In describing the display, Henry stated that they paid their dimes, entered one door, walked around the Shrine lobby, and exited by another door. At that point Madame remarked "there was not much of a display for the money". When Henry's friends inquired "didn't you go downstairs to see the big display?" Henry replied "Gosh, no! Did they have one? I didn't see any way to go down."

"Yes, it's really remarkable. Little Eli seems to eat twice as much chicken when we have visitors."

"And why is that, my boy?"

" 'Cause that's the only time we have it."

Voirol Awarded Scoring Trophy In Basket League

"Jap" Voirol, center for Small Motor Factory, champions of the G-E Interdepartment Basketball League, won the circuits high-scoring trophy by collecting, in nine games, forty-one field goals and nine fouls for a total of 91 points. Second place went to Louden, Apprentice guard who scored a total of 83 points while the "show position" was copped by Dick Kent, Main Office speedster, with a ten game sum of 76 markers.

Voirol and Louden were neck and neck for the scoring honors during the entire season with first one grabbing the lead and then the other but in the Factory's final league encounter against Apprentice B, Voirol amassed a total of 22 points to win the trophy.

Main Office placed the most men in the first ten with Kent Scherer and O'Brien grabbing three places. Three teams placed two men apiece with Voirol and Clawson representing the champions, Apprentice A having Louden and Weigand and Kelley and Rohlfing winning Apprentice B honors. West Side, runners-up for the title, had only one man in the top ten, Bud Offerle, who in only six games amassed a total of 62 points.

Name	Team	GP	FG	F	T
1. Voirol	Small Motor	9	41	9	91
2. Louden	Apprentice A	9	36	11	83

Burns Wins Honors In Golden Gloves

Bob Burns, representing the G-E Club and Journal-Gazette in the annual Golden Glove Tournament held at Chicago this past month copped just about every honor there was to be had.

Fighting in the welterweight division Bob was made recipient of the Barney Ross Trophy awarded every year to the welter showing the best ability, sportsmanship and mental attitude. This award helps to salve Bob's injured feeling as just a few minutes before he had lost the championship title in a hard fight.

Although losing the title, Burns was named on the squad that was to battle the New York champions, and eventually was chosen captain of the team by his mates. Because of his brilliant showing in workouts Bob was named as the number one welterweight and defeated the New York City representative to help his team to a 10-6 win.

Bob has been active in Fort Wayne amateur circles for a number of years. He was awarded the Journal-Gazette sportsmanship trophy in his first season and has been winning honors ever since.

IN THE ROUGH

By WALTER SUNIER

We want to admonish you again to grab ahold of them there clubs and start bashing the old ball around. Brookwood is becoming infested with golfers and it will be only a very short time until all the other courses will be infested. We have seen some of the old standbys such as Johnson, Butler, Bowman, Saaf, Allen, Didier, Buckmaster, Schwanz, Smoley, Kirke and so on.

Buckmaster has been hot enough to shoot a 42 on the second nine and Schwanz, father of Micheal Schwanz, has shot an 83.

The new drain through No. 4 and No. 7 at Brookwood is about half done and should be completed by next week end if the weather does not interfere. A tree has been cut down in the group to the left of No. 4 green and also the old tree back of No. 7. New flags were up last Sunday but the cold weather of Friday night and Saturday held up making new holes in the greens.

According to the dope, the same pros will be back at all the courses this year. Some improvements will be made at North Highlands and it seems quite likely that the length of the course will be increased. The new greens committee is made up of three G-E men—Priwer, Vinson and Kroeger. There is a rumor that there will be no 25 cent evening golf fee for nine holes as Fairview also expects to go to a 30 cent fee.

If present plans go through the League will start play on May 19th. If all the arrangements can be satisfactorily completed and there is no annual vacation shutdown or a late shutdown, the league play will be finished in jig time.

Next week's "In the Rtugh" will mark the sixth anniversary of the column's appearance in the WORKS NEWS.

Elex Bowlers Place In Kokomo Meet

Rolling a total of 2099 pins the Elex Number 1 team took over third place in Class C in the Indiana Women's Bowling Tournament being held at Kokomo this month. Greenblatts, another team made up of Elex bowlers, moved into the fourth spot in the same class by garnering a count of 2066 pins.

The Elex Number 1 team was made up of Wilda Click, captain, Polly Ort, Ella Mayo, Frances Allen and Marjorie Weibel. Helen Tieman captained the Greenblatt quintet and her mates were Helen Stahl, Edna Knight, Marie Downey and Olive Armey.

Lady Luck, with the exception of these two quintets, deserted the rest of the Elexers as no one was able to place either in the singles, doubles, or all event.

Seventy-five Elex Keglers participated in this tournament and were cheered on by approximately a hundred rooters and well-wishers. Although bowling scores were not as high as usual and was hoped for, nevertheless a hilarious time was had by all.

Night Shift Bowling Girls To Banquet

Members of the night shift girls bowling team will hold a banquet at the Fairfield Manor at 12:30 P. M. on Saturday, April 12. Following the banquet, election of officers will be held and prize money will be distributed. Chairmen for the affair are Mazie Greek and Sue Cameron.

NOTICE

All pistol shooters interested in entering the Rod and Gun Club teams to shoot in the Allen County League are asked to contact C. Morrolf at the Armory range next Thursday evening.

News Around

(Continued on Page 5)

What Do You Think?

Frank Archbold, Bldg. 19-3, is very much in the dog house and all due to the radio commission changing wave lengths of many popular stations. Being a thrifty soul of Scotch ancestry, Frank decided to re-adjust the setting of the push buttons to conform to the new wave length set up. Accordingly he tuned to what he thought were certain stations broadcasting chain programs. But alas and alack, he forgot to remember that there are hundreds of stations on these hook-ups. As a result, in place of Detroit, Chicago, and even Fort Wayne, he now gets Bees Knees, Kansas, Porgy Prep on the Hudson and Hang Knot, Texas, as well as other things, not mentionable, from the family. Now "Pappy" wonders if he has grounds for suit against the commission.

Friends of Burl Tillman, Bldg. 19-1, will be glad to learn that he is almost completely recovered from his recent harrowing experience. It seems that on a recent day, he was chin chappering to such an extent that the breeze became too much for some of his fellow workers. Someone—rumor says it was Ned Foster—scored a perfect bulls eye with a rubber band, it going into Burl's open mouth with all the accuracy of a bee seeking nectar from a flower. Accurate reports of Burl's comments on the situation are available but not printable!

6-4 Magneto Mumblings

By The Eavesdropper

It's a wonderful world, yes sir! When one can actually feel the pleasant warmth of Spring and smell her sweet breath, life is wonderful. There's no doubt about it. When the usually late person arrives in the morning on time for work, and someone chatters constantly about her new boyfriend, and someone else is gayly singing a tune, and someone else is wearing flowers, either in "her" hair or "his" lapel, and still another walks around as if he were in a dream, oh Glory Be ! ! ! ! It's Spring, all right! . . . Oscar Meyers, the tiniest man in the Magneto Department, vehemently insists that he can see nothing romantic about Spring. But then, how could he, surrounded by four walls, tearing wall paper from the sides? . . . Suggestions of Spring can also be noticed in some of the beautifully colored shirts which V. Guebard has been sporting. Girls, they are really something to oh and ah about. . . . And the "Spring bug" certainly must have bitten J. Woodward. His beoooootiful renditions of "classic" poetry, are indeed most touching, tch, tch. . . . We mustn't fail to mention the strange antics of our one, our only, our original H. Times. We just can't figure out which "bug" bit him, but from all indications, it must be the "love bug." For who else could be found constantly whistling, in a gay lilting manner, "The Object of My Affections" or "Jeanie with the Light Brown Hair", but a young man, in love, and in the Spring? . . . Speaking of bugs, the "flu bug" bit Wilbur (I'm just a crooner, kid) Stocks with such force recently that he was forced to stop singing for one whole day. Glad you're back in the groove, Wilbur, we just couldn't stand that awful "quiet."

Attractive Cashier to Manager: "I want a week off to preserve my health. I think my beauty is fading."

Manager: "What makes you think that way?"

A. C.: "The men are beginning to count their change."

Julia Martin, Bldg. 4-3, thinks the Easter bunny should bring her two baskets of eggs as it is also her birthday.

Anyone interested in stage shows or how to change your attire in a real hurry, just see Janice Mueller, Bldg. 4-3, as she now holds the floor's record.

Who is the man in Bldg. 20-2, of whom it is reported he can buy cars at special prices before they are put up for sale?

The gang in Bldg. 19-4 welcome back a brand-new bride, Thelma Thurber, who was married on March 22 to Paul Baker, Bldg. 8. Congratulations and best wishes.

The teacher had forbidden the eating of candy and chewing of gum during school time. One day she became suspicious of a lump in Jimmie's cheek. "Jimmie, are you eating candy or chewing gum?" she asked.

"No," replied Jimmie. "I'm just soaking a prune to eat at recess."

Elex Club Easter Distribution Planned

Hundreds of children and adults will be made happier next Thursday throught the offices of the Elex Club in their annual Easter distribution. A large number of Easter baskets are being prepared for underprivileged children and gifts will also be distributed to patients at the Irene Byron as well as shut-ins in this community.

G-E CLUB DANCE

There will be a dance as usual Saturday starting at nine o'clock and continuing 'till twelve. Pete Dannecker and his band will be on hand to provide the music.

SOFTBALL TRYOUTS

Try-outs for the G-E Club softball team will be held next Friday evening at 7:00 o'clock at the G-E Club. Any employee wishing to try-out for the team is asked to report.

Volume 24 FORT WAYNE, INDIANA, FRIDAY, APRIL 11, 1941 Number 60

Suggestion Awards Show Increase During First Quarter Of Year

$2,997 Is Paid For Ideas During First Three Months Of 1941 To Local Suggestors

Awards totaling $2,997 were paid Fort Wayne Works suggestors during the first three months of 1941, an increase of 202.1 per cent over the same period last year, it is shown by the quarterly report just completed. A total of 1,362 suggestions were received during the period as compared with 817 for the first three months of 1940.

Maintaining its record of the past three years the Wire and Insulation Division led in the number of suggestions per 100 employees, with the Specialty Motor Division in second place and General Service in third. The number of suggestors per 100 employees in the Works as a whole stood at 59.7

(Continued on Page 2)

Manufacturing Smiles

The youngster above is just one of hundreds who will be made happy because of the annual distribution of Easter gifts by the Elex Club. In addition to gifts to youngsters the Club distributes foodstuffs and other articles to shut-ins. The distribution is being made today. Bobby, pictured above, received his gift a little earlier by making a personal call to Irene Meyer's office.

New High For Orders Received In Quarter

Defense Work Helps Set All Time Record With Increase Of One Hundred Sixty-Four Per Cent

Orders received by the Company during the first quarter of 1941 amounted to $257,382,000 compared with $97,490,000 during the corresponding period a year earlier, an increase of 164 per cent, President Charles E. Wilson, announced today. This was an all-time record amount of new business for a three months period.

During the first three months this year, orders definitely known to cover equipment for national defense purposes amounted to approximately $112,000,000 and exclusive of such business, the orders for regular commercial products amounted to $145,382,000, or 68 per cent more than for the first quarter of 1940 on a comparable basis.

CLUB TO CLOSE

The G-E Club will be closed all day and evening on Easter Sunday, April 13. The regular Saturday night dance will not be held tomorrow evening.

G-E Chief Usher Retires On Pension

Frank H. Field, chief usher at the Schenectady Works and known to literally thousands of G-E employees, retired last week on pension after more than 32 years of service. Mr. Field had been chief usher since 1929 and in 12 years had welcomed more than 1,350,000 guests to General Electric in Schenectady.

A native of Brattleboro, Vermont, Mr. Field started his service with the Company in the Publication

Traffic Engineer Issues Instructions

Instructions to employees using the Fairfield Avenue parking lots have been issued by James T. White, municipal traffic engineer. All employees using the Fairfield Avenue lots are asked to read and follow the instructions carefully.

I am taking this opportunity to inform you that, upon completion of driveway approaches to your parking lots located on Fairfield Avenue, General Electric employees using the same are to be informed as to the following:

First—The City Utilities have erected two (2) street lights of 6,000 lumens each on the east side of Fairfield Avenue. This allows better visibility for the motorist and pedestrian protection during hours of darkness.

Second—All traffic leaving either of the parking lots will be restricted from making a left turn at this location.

Third—Fairfield Avenue will be painted in the usual manner between the Pennsylvania and Wabash Railroads as soon as weather conditions permit; also, upon completion, signs will be erected notifying motorists that they will encounter merging traffic at the en-

(Continued on Page 5)

Firemen's Benefit Next Friday Evening

A benefit party, to which all G-E employees and their friends are invited will be held next Friday evening at the G-E Club by the Volunteer Firemens' Association. Games will be played during the evening and a considerable number of prizes will be awarded.

Dispensary Service —

Beginning last Monday, April 7, dispensary service was made available in Bldg. 21 for second shift employees west of Broadway.

The complete Broadway dispensary service is now as follows:

Bldg. 21—Open all day and all night, with the exception of the noon period from 12:00 to 12:15. (Monday through Friday).

Dispensary in Bldg. 2-1—Open continuously from 7:00 a.m. to 12:00 midnight. (Monday through Friday).

On Saturdays, there is dispensary service in Bldg. 21 from 8:00 to 12:00 noon and from 1:00 to 5:00 p.m., and in Bldg. 2-1 (east of Broadway) from 5:00 to 10:00 p.m.

Three Appointed To Important Offices

C. H. Matson

R. H. Chadwick

Three important appointments in the Fort Wayne Works organization were announced this week by Works Manager M. E. Lord. They include the appointment of C. H. Matson, who has been serving as general superintendent, to the office of assistant manager; the appointment of R. H. Chadwick to the office of assistant to manager in charge of engineering to succeed the late P. C. Morgenthaler, and the appointment of E. J. Thomas as engineer of the specialty transformer department to succeed Mr. Chadwick.

Mr. Matson, the new assistant manager, was born in Fort Wayne and educated in the public schools of this city. He became connected with the General Electric in January, 1909, as a mechanical draftsman in the general superintendent's office. Later he was made head of the factory engineering department, and in such position had full charge of all engineering work in plant developments.

In 1919 he was made plant superintendent of building and maintenance of the Fort Wayne Works, and in 1925 he was advanced to the position of assistant to the general superintendent continuing in that capacity until 1931 when he was made general superintendent.

Mr. Chadwick, the new assistant to manager in charge of engineer-

E. J. Thomas

Alumni Association Will Hear Humorist

Axel Christensen, noted humorist and philosopher, will be the speaker at the Apprentice Alumni Association meeting to be held on April 22. Mr. Christensen, who has made several appearances in Fort Wayne, will speak on the subject of "Axel Grease for Your Funny Bone."

The meeting will be held at the Chamber of Commerce.

• A Real Defense Effort!

BECAUSE . . . General Electric men and women in several works gave up their vacations last year, a mighty battleship of the United States Navy proudly took to the waves this week. . . . three full months ahead of schedule!

BECAUSE . . . General Electric men and women in the turbine shops and offices worked twenty-four hours a day, the propulsion equipment, the great gears and allied equipment were ready for the ship when the builders wanted it!

BECAUSE . . . General Electric men and women dared to make sacrifices of personal plan and pleasures, never compensated by the dollars and cents of overtime. . . .

General Electric has once more proved to Uncle Sam its ability to deliver the goods!

Such achievement demonstrates beyond all argument that a group can work in harmony and unity to gain a common goal. Let us ever carry on in the same spirit. . . .

BECAUSE . . . Defense for the nation is defense for us!

• Our Workshop

Industry has come a long way since that distant time when some individual conceived the idea of gathering workers under one roof and started the first factory. Practices of those earlier days may still be recalled—the long hours, the harmful employment of women, child labor, unsanitary and dreary working conditions and many other abuses that were transplanted from the period when the dwelling served as a workshop.

It is difficult for us to fully appreciate the strides made in the betterment of working conditions, but many of the most drastic changes are within the memory of our older employees. "When I started working in the shop in 1889," reminisces one of our retired employees, "ingenuity took the place of equipment. I recall winding my first coil. The core was placed in a vise and two men passed the spools of wire back and forth while I tapped it into place on the core. Heapy objects were moved by hand or with pinch bars and transported on hand trucks. No back-saving equipment in those days. We didn't give much thought to lighting, safety, or sanitation, and if a workman was injured his fellows gave him first aid. Foreign particles in the eyes were removed with a match, toothpick or whatever appliance best suited the man asked for help."

If it were possible today to place a veteran workman from an earlier industrial era in our plant, what an amazing revelation it would be to him! Things we accept as commonplace would be startling innovations. The absence of the water bucket with its battered tin cups and the presence of sanitary water coolers, the elevators for general use, our dispensary, our telephone service throughout the plants, the convenient washrooms, our recreational facilities, employees' store, cafeteria, and a hundred and one other items would most certainly test his credulity.

He would marvel at our modern equipment and at what it has accomplished in the elimination of drudgery. Accident and fire prevention work, housekeeping and many other projects that make our plant a desirable place to work would be entirely foreign to anything he had ever experienced.

Our Company has played an important part in the improvement of working conditions. It has pioneered in many of these improvements and has adopted others of proven merit whenever possible. Time has proven that our faith in a continuation of this policy is justified.

By his co-operation every employee can assist in keeping our workshop to a high standard. In particular can he assist in maintaining cleanliness and sanitation. The same excellent co-operation experienced in the past is necessary for future progress.

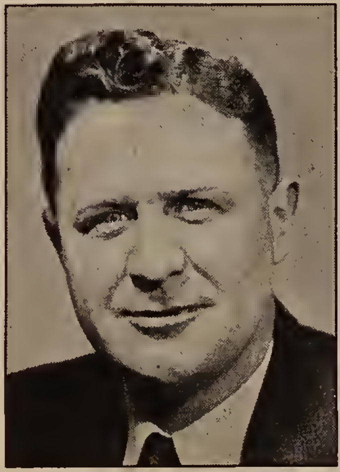
Six Employees Are Given Promotions In Fractional Horsepower Motor Divisions

Ellis Bleke

Alma Starke

Philip A. Tilford

Lloyd Jacobs



Ross G. Strodel

Edward J. Robin

The advancement of six employees, four in the Specialty Fr. H. P. Motor Division and two in the General Purpose Fr. H. P. Motor Division have been announced this week. O. J. Mettler, superintendent of the Specialty Division, announced the appointment of Lloyd Jacobs, as foreman of the punch press department; of E. J. Robin as foreman of the casting machine department; of Alma Starke, as forelady of the field winding (K Type) department, and of Ross G. Strodel as foreman of night supervision.

Two appointments announced by George W. Auer, superintendent of Bldgs. 4-2 and 4-3, is that of Philip A. Tolford, named assistant foreman of winding and switch-field assembly, and that of Ellis R. Bleke, named general foreman in Bldg. 4-3.

Mr. Jacobs started work with General Electric in the meter department on April 3, 1919. For the past two and a half years he has been serving as a tool grinder and repair man. Mr. Jacobs lives at 1920 Bayer Avenue. Mr. Robin joined the G. E. Organization in 1925 and was enrolled in the Apprentice Training School. He was later employed in the meter department, General Purpose Fr. H. P. Motor Department and the Refrigeration Division. With the inauguration of the Specialty Fr. H. P. Motor Division he was transferred to that division as leading operator on the fan motor line. Mr. and Mrs. Robin will soon be in their new home at 4710 Indiana.

Alma Starke started her service in 1925 in the General Purpose Fr. H. P. Motor Division. She continued in this Division until a few weeks ago when she was transferred to Bldg. 19-4. She lives at 2213 Opechee Way and has the distinction of being one of the two foreladies employed at the Fort Wayne Works.

Mr. Strodel began his service on December 18, 1918. He worked in the fractional motor department under Frank Thompson for two years and then was transferred to the Meter Department. He spent eighteen years in this department, with twelve years as leading operator. For the past two and a half years he has been serving as leading operator in the Specialty Motor Division. Mr. Strodel lives at 225 East Wildwood.

Mr. Tilford was employed at the Fort Wayne Works in 1936 as an assembler in Bldgs. 4-3 and 4-5. Later he was transferred to the mechanism department in Bldg. 4-3 and still later to the winding department in the same building. Mr. Tilford, who resides at 4001 South Lafayette Street, attended Rose Polytechnic Institute, and the Indiana Technical College. He will be eligible for a Bachelor of Science degree some time this year.

Mr. Bleke is an Apprentice School graduate, having finished the machinist-toolmaker course in 1928. He was employed immediately thereafter in Fr. H. P. Developmental department under Charles Schild and continued in this work until 1936. At that time he was transferred to time study and tool planning work and in 1937 he was transferred to Bldg. 4-2 as a section leader, which position he held up to the time of his present appointment. Mr. Bleke resides at 1827 Emerson Avenue.

President Named On Defense Committee

Charles E. Wilson, president of the Company has been named chairman of a defense advisory committee whose function will be to plan a state-wide program of varied activities for defense workers in New York State. Names of New York State industrialists and representatives of management who will serve on the committee will be announced shortly.

Appointments Made

(Continued from Page 1)

ing, joined the General Electric organization in July, 1912, following his graduation from Brown University. He was enrolled in the test course at the Fort Wayne Works and in December, 1912, entered the transformer engineering department under E. A. Wagner.

When Mr. Wagner was transferred to Pittsfield in 1926, Mr. Chadwick was appointed engineer of the transformer department. He has continued in this capacity up to the time of his present appointment.

Mr. Chadwick, who resides at 1005 West Lexington Avenue, is a member of the American Institute of Electrical Engineers, of the General Electric Quarter Century

Continued on Page 4)

Complete Twenty-Five Years Service With General Electric

Eight Fort Wayne Works employees have completed twenty-five years of service with the General Electric Company and have become members of the Fort Wayne Chapter of the Quarter Century Club. The new members are: Top row, left to right, Charles M. Bender, Bldg. 19-4; John J. Butler, Bldg. 19-2, and Owen Baught, Bldg. 4-6.

Second row: Left to right, Ernest Cutter, Bldg. 4-4; Leo Vachon, Bldg. 26-1, and George Tilley, Bldg. 27. Bottom row: Left to right, Charles E. Spencer, Bldg. 5, and Ed David, Bldg. 6-1.

G-E Children To Take Part In Band Festival April 19

Fifty Schools To Be Represented In Concert At Central High School

With a considerable number of children of employees participating, the announcement of the Tri-State Band Festival to be held on April 19 at the Central High School will be of more than general interest to members of the Fort Wayne Works organization.

The Tri-State Band Festival will feature bands, orchestras, ensembles and solos from schools in Indiana, Ohio and Michigan. There are about fifty schools comprising approximately 1500 students enrolled in the band festival.

Schools entered from Fort Wayne and Wayne Township are Franklin, Forest Park, Harmar, Adams, James Smart, Harrison Hill, L. C. Ward, Central Catholic High School, South Side High School, St. Patricks, St. Judes, Miner, Hoagland, So. Wayne, Justin N. Study, Hanna and Hillcrest.

A partial list of students whose parents are employed at the General Electric Company are: Buddy Rohe, Merrill Hackett, Clarence Foland, Lowell Barney, Paul Gruber, Robert Rife, Billy Wellman, Evelyn Groves, Dorothy Groves, John Pichon, Fay Suter, Harry Suter, Peggy Hart, Donald Foland, James Enos, Sally Place, Kenneth Redding, Paul Harruff, Chas. Kennell, Gloria Lutz, Barbara Norwald and Don Jean Grier.

Price of tickets are 25c per session, 50c for a season ticket.

Chief Usher Retires

(Continued from Page 1)

bureau now known as the Publicity department. After long service in this division, he took over the job of official greeter for General Electric in Schenectady. He numbers among his friends, employees from every works and office of the Company plus those from the International General Electric Company and many affiliated organizations.

His post as chief usher will be assumed by Frank W. Sharpe of the Office Service department, himself widely known throughout the General Office organization.

Suggestion Awards

(Continued from Page 1)

per cent as compared with 52.3 per cent for the first quarter of 1940.

The greatest number of suggestions submitted, regardless of the number of employees in the Division, came from the General Purpose Fractional Horsepower Motor Division, with the Specialty Transformer Division second, and the Specialty Motor Division third.

In the per cent of suggestions adopted the Specialty Motor Division leads with 87.5%. The closest competitor is Decatur with 46.9%. Third is the Tool Division with 45.0.

A comparative table of suggestion activities for the first quarter will be found on this page.

Rod-Gun Club Holds Election

Newly elected officers of the G-E Rod and Gun Club are shown on the Club's range at the Armory. Left to right, are Burl Tillman, Bldg. 19-1, director; L. Bland, Bldg. 27-1, director; E. J. Pion, Bldg. 4-3, secretary-treasurer; A. F. Bowers, Bldg. 4-3, president; H. Hyndman, Bldg. 19-5, vice-president, and L. May, Bldg. 19-5, director.

Appointments Made

(Continued from Page 2)

Club, the Orchard Ridge Golf Club and president of the Fort Wayne Engineers Club.

Mr. Thomas, who succeeds Mr. Chadwick as engineer of the specialty transformer department, was graduated from Wisconsin University in 1924, and enrolled in the test course at the Fort Wayne Works immediately thereafter. In 1925 he was named an instructor in the Fort Wayne Works Apprentice School, and he continued in this work until the following year when he was transferred to the transformer engineering department under Mr. Chadwick. Much of his work has had to deal with radio and miscellaneous transformers.

Mr. Thomas resides at 1215 Maxine Drive, is a member of the AIEE, the Fort Wayne Engineers Club and of the honorary engineering fraternity, Eta Kappa Nu.

Suggestion Activities Of The Fort Wayne Works During The First Quarter Of 1941

	Year	Suggs. Per 100 Emps.	% of Suggs. Adopted	Amount of Awards
Series-Specialty	1941	78.2	87.5	$ 45.00
	1940	71.0	54.6	450.00
Transformer	1941	59.5	27.1	623.00
	1940	34.9	22.7	83.00
Motor-Generator	1941	49.2	30.4	509.00
	1940	37.6	44.8	105.00

Total	1941	59.7	31.3	$2,997.00
	1940	52.3	36.0	1,483.00

Finds Means Of Preserving Snowflake Crystal Forms

A simple method for preserving permanently the crystal beauty of snowflakes has been revealed by Vincent J. Schaefer of the General Electric Research Laboratory in an article in the magazine *Science*.

By covering a snowflake with a drop of a solution of Formvar, a transparent plastic resin often used for electric insulation, and allowing the drop to dry, Mr. Schaefer found, a permanent cast of the snowflake crystal can be obtained.

Though the film remaining is only about eight one hundred thousandths of an inch in thickness, he reported, it preserves the characteristic hexagonal snowflake features in the most microscopic detail for later photographing or microscopic study. No two snowflake crystals are ever exactly alike.

"A strip of velvet, or other dark material, fastened to a board or table, a few glass microscope slides, a toothpick or wire and a weak solution of a suitable resin are all the equipment necessary," explained Mr. Schaefer. "The only other essential is an occasional snow flurry.

"As soon as a suitable flake is observed on the dark background a drop of solution is placed on the glass slide with the toothpick or wire, and the flake is lifted with the same tool and placed in contact with the drop. The solution should wet the flake completely. A second drop placed on top of the snowflake is sometimes desirable, particularly if the flake is of large proportions. After wetting the flake in this manner the solvent soon evaporates, leaving the snowflake encased within a shell of resin.

"A one per cent solution of polyvinyl formal resin, designated as Formvar 15-95, dissolved in ethylene dichloride and cooled below freezing was found to produce excellent replicas. The thickness of such a replica is of the order of 20,000 Angstrom units.

"As soon as the solvent has evaporated, the slides may be removed to a warm place. The case may be protected from abrasion by covering with a transparent sheet of resin or a glass coverslip or slide. The casting materials can be carried anywhere, thus greatly increasing the possibilities of obtaining unique specimens.

"A slight modification of the method provides an equally easy way to make a permanent record of breath patterns and any other structures, such as frost crystals, hoar frost and similar perishable formations.

Efficiency And Quietness Feature New G-E Fans

Vortalex Blade Will Be Available In Wide Variety of 1941 Models

The quiet operation and efficiency of the Vortalex fan blade comes in for renewed emphasis reflecting popular acceptance in the 1941 line of General Electric fans. The Vortalex blade, subject of years of engineering development by the G-E fan section at Bridgeport, Conn., is available in a wide variety of "Super-Quiet" models, while the "Quiet" G-E fan, with overlapping blades, is featured in three different sizes of desk-type fans.

Quietness and efficiency in air movement go hand in hand with the Vortalex blade. The scientific pitch and shape of the blade puts every bit of blade surface to work with maximum efficiency. The result is a super-quiet fan which even in the smallest size has an air delivery which exceeds that of conventional fans with larger blades. Economy of operation is another by-product of efficient air movement.

At the same time, the variety of "Super-Quiet" models available is an answer to the increasingly varied uses being found for a fan which does a better job and does it more quietly.

The desk-type fans equipped with Vortalex blades include small, medium, large, and master models. The small and medium models have three blades, while the others have four. These are supplemented by "Super-Quiet" pedestal fans in large and master models.

Quietest, perhaps, of all the General Electric desk-type fans is the small "Super-Quiet," equipped with a single-speed switch. A non-oscillating fan is available with a black finish, while the oscillating model is finished in either black or cream enamel; the medium "Super-Quiet" has two speeds, oscillates; is finished in black enamel with chrome trimmings; the large "Super-Quiet" has three operating speeds, oscillates, and is finished in black enamel with chrome trimmings.

The pedestal models have a telescoping column, permitting height adjustments ranging from 40 to 61 inches. The base, pedestal and guard are finished in bronze, and the four Vortalex blades are finished in ivory.

New Consignments Of Irons And Boards

A new consignment of electric irons and the Met-L-Top ironing board has been received at the employees store. The iron and board are offered in combination to employees at a special price. The iron is the famous "dial-the-fabric" model which maintains the correct heat for every fabric. Its large soleplate affords the maximum ironing surface.

A certain cousin o' mine came over to my house last night. "Sandy," he said, "I just got a picture from old Uncle McNed in Scotland."

"How does he look," I asked.

"I don't know, I haven't developed it yet."

"Colin, don't tell me ye are pulling that old joke."

"Aye, me gude cousin," he answered, "but I'm going it one better. I'm asking tae borrow your darkroom and chemicals."

While we were developing the negatives we got talking about pictures.

Funny how we take photos for granted. We see them everywhere—so we think they're easy to make. But we see a lot of good suggestions too, and we know most of them took lots of thinking and planning. I'll bet the suggestor didn't see the whole scheme right away either.

In fact a good suggestion is like a good photo. Let's see how you get one.

First you want to make one.

Then you must look for a good subject, and you must be prepared. You must have a camera loaded with film. Then you must give it the proper exposure. The light must be right, and the camera must be held at the proper viewpoint to catch the scene at its best advantage.

Then, assuming you've done all these things properly, you can't just sit back and admire the results.

First the film must be developed. You spend an hour in the dark room fussing with thermometer, timer, chemicals, viscose sponges, developing tank, etc. Still no picture—just a film.

Well, let it set for a day. Next evening you spend another hour with more chemicals, darkroom light, trays, sensitized paper, printing box or enlarger, wash water, etc. Finally, the next morning, all dried nice and flat, ye have your picture to view in daylight. Did ye do all of a dozen operations right? The picture will tell you.

But most important of all, was the subject worth while, and was the lighting and camera viewpoint right to show it to its best advantage?

"Speaking of pictures," said Cousin Colin, "How is your contest developing?"

"Speaking of pictures," I said, "It ought to be a snap."

Sunbeams From 17-4

Since Dorothy Wilhelm's boy friend is in camp, you can find a good supply of airmail stamps in her purse.

Wayne Worman is the chewing gum vender in the department, any time you feel the need of a chew, Wayne has it.

Scales have a way of creeping up on one, or should we say weight does the creeping, anyway Al Hartman is trying to find that out.

At last we have a good joke on Karl Geller, also Ruth Lemert. After hunting for hours for a certain chart they found the shy little thing, with its back turned to them.

We are happy to have Bess Geller, who has been very ill, with us again.

19-4 Spot Jottings

We sure miss our Euchre players, Johnny Ormiston is on the night shift and Alva Powell and John Pifer report at 12:30. This leaves Louis Stalf and Harry Bennett without anyone to play with. . . . The annual smelt fry was held at the Riverview cottage last Saturday. The boys took their knitting along and had themselves a time. . . . The fan motor girls are really intrigued by the number of persons Eleanore Kestner went to school with. . . . It is reported that Louise Scherrer tried to pick up one of those nailed down pennies on April 1.

Traffic Instructions

(Continued from Page 1)

trance of the parking lots upon each side of Fairfield Avenue.

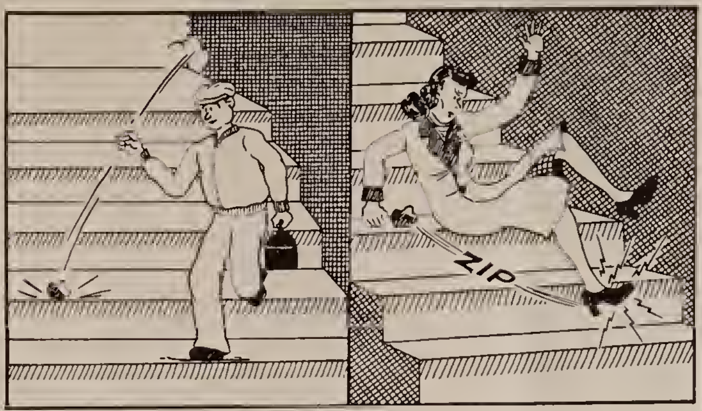
Fourth—General Electric employees must cooperate by strict obedience to the restriction named above as a matter of relieving confusion or congestion during dismissal hours.

Fifth—The above information should be handed your employees at the earliest possible date as the recommendations named above will be effective on April 14, 1941.

Trusting we may look forward to receiving the whole-hearted cooperation of the General Electric Company and its employees as we have during past occasions, I remain,

Respectfully yours,
JAMES T. WHITE,
Traffic Engineer.

It Has Happened Here



Aside from the unsightly appearance it is a definite safety factor to keep the stairways clear and free of rubbish. The accident illustrated above happened at our works some time ago. A workman tossed a piece of rubbish on the stairs and as a result a girl slipped and fell down a number of steps suffering a fracture as the result of the fall.

Matches, boxes, wire spools, milk bottles, boards and other objects which may easily cause a similiar accident are frequently left on the stairs leading from some departments. The cooperation of all employees is asked to eliminate this hazard.

Thisa And Thata 19-5

Louie Clark is at it again. We don't know if its Louie or his car but the old auto wouldn't start, so Dorothy Craig, and Helen and Margaret Bennett tried to push. At twelve minutes to eight they finally got it started, and so Louie said, "Hold on girls, we'll make it yet even though we've got to stop for Edna Rohrbach." They parked the car and raced for the shop, but poor Margaret took a fall in the scramble. Louie is just a little worried for fear she got dizzy because of his corner cutting. P. S., they rang in on time. . . . I've been told that Bill Wickliffe and Mardo Tobias can hardly wait for the fairways and greens to dry off so they can find something to do with their leisure time. . . . Veva Healey had dampened spirits the other day. She returned home in the rain to get her badge.

Sure sign of spring—Claude Curley, Bldg. 12-B, ducking into the men's washroom to shed his red flannels.

Wonder why Gladys Truby, Bldg. 19-4, doesn't visit the candy lady anymore. Can it be that she is saving her money for gasoline since she bought that new car? How about a ride, pal.

Bldg. 19-4 will lose two mighty popular girls this week when Ethel Klopfenstein and Thelma Baker sever their connections with the Fort Wayne Works. Ethel has been with us for over seventeen years and Thelma for over two years.

Bldg. 20-1 Remarks

Congratulations are in order for Winfred (Pop) Luebke on his promotion to Assistant Fire Chief. Good work, Pop.

Willie Travis is scouting around for a good book on "How to Raise Sheep," which he intends to give Rolly, the welder, for a birthday present.

Cheer up, Johnny Nail, only ten more months; the first hundred years are the worst, keep your Ohms up to par.

The wire jerkers were highly elated when Howard Boren promised to set the gang up to a keg of beer, poor team work on the part of the (self-appointed) entertainment committee left the plans foamy.

Sincerely yours,
A Lover of (Light) Work.

It has finally happened. It is reported that when Maxine Pelz, Bldg. 19-4, arrived home the other evening she took off her shoes and started bedwards only to have a wicked mousetrap snap and grab her big toe. So it is reported. Take it for what it's worth.

Will someone tell Jackie White that she works on 19-4. She either starts to get off at 19-3 or wants to ride to 19-5. It's in the middle, Jack, in the middle.

Lawrence Schuster, Bldg. 26-2, has a serious problem. He has a new car that he wants to keep polished up but he doesn't have the time because he likes to ride in it so well.

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

Elex Club held their annual Easter party last Monday night, and what a beautiful, appropriate-to-the-season party it was. The table decorations were unusually attractive and decidedly novel. Pale pink candles in crystal holders and delicate green fern made a background for dainty white miniature trellises which in turn provided an effective setting for the tiny flower pots that held spring flowers of pastel colors.

Since there must be food for the body as well as for the soul, we take just a tiny space here to state that the supper served at the party was delicious.

We feel sure that everyone was thrilled and encouraged by Rev. Mr. Brown's little talk; his theme was the Peace that Jesus Christ gives unto the world. Music and song expresses so well our deepest feelings and aspirations, and we listened with delight and appreciation to the hymns of praise and triumph as the choir of the First Presbyterian Church sang them for us.

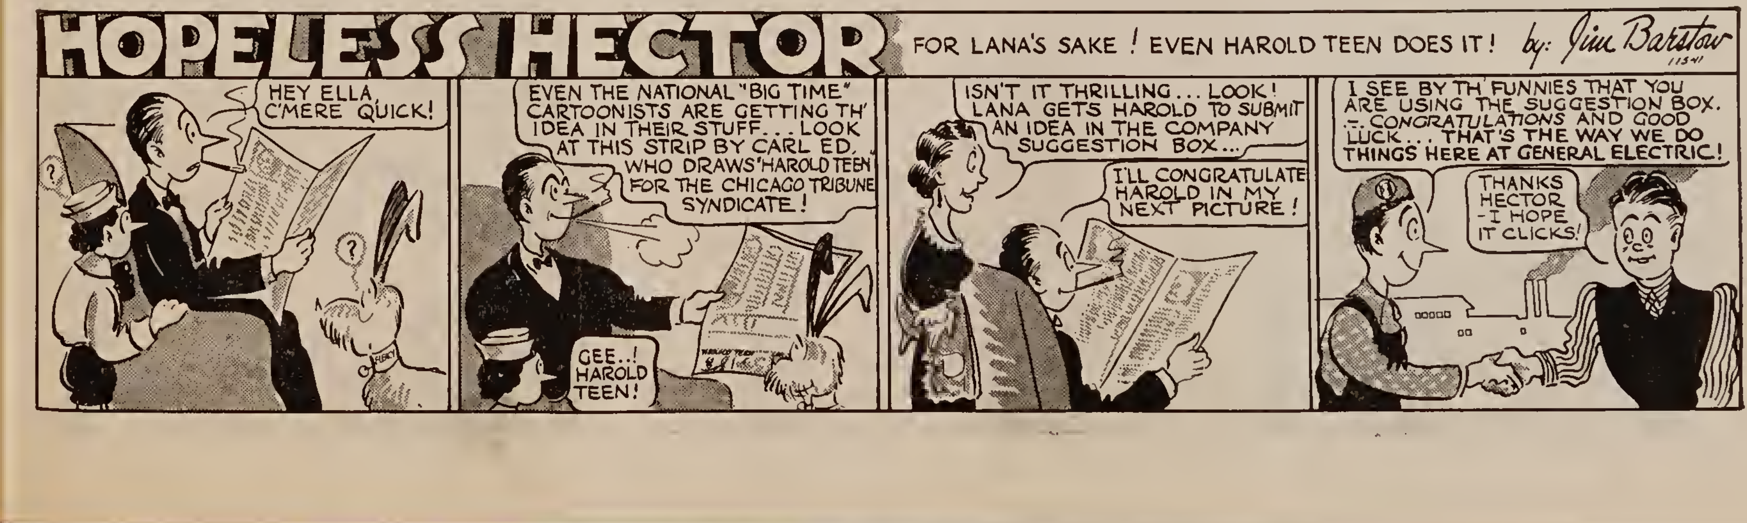
Easter is symbolic of the ultimate triumph of life over death, good over evil and hope over despair, and we'd like to quote this bit of verse that seems in its humble way to inspire the least of us to rise above defeat:

"Every day is a fresh beginning,
Every morn is the world made new.
Ye who are weary of sorrow and sinning,
Here is a beautiful hope for you,
A hope for me and a hope for you.

All the past things are past and over,
The tasks are done and the tears are shed.
Yesterday's errors, let yesterday cover,
And yesterday's wounds that smarted and bled
Are healed with the healing the night has shed.

Every day is a fresh beginning,
Oh, listen my soul to the glad refrain,
And 'spite of old sorrow and older sinning,
And trouble forecasted and possible pain,
Take heart with the day and begin again.

Helen Dornich, Bldg. 4-3, has read in the Works News of so many champions she is wondering what she can do to get her name in the news. Well, Helen, here it is.



HOPELESS HECTOR
FOR LANA'S SAKE ! EVEN HAROLD TEEN DOES IT!
by: Jim Barstow
11541
HEY ELLA, C'MERE QUICK!
?
?
EVEN THE NATIONAL "BIG TIME" CARTOONISTS ARE GETTING TH' IDEA IN THEIR STUFF. . . LOOK AT THIS STRIP BY CARL ED, WHO DRAWS 'HAROLD TEEN' FOR THE CHICAGO TRIBUNE SYNDICATE!
GEE..! HAROLD TEEN!
ISN'T IT THRILLING . . . LOOK! LANA GETS HAROLD TO SUBMIT AN IDEA IN THE COMPANY SUGGESTION BOX . . .
I'LL CONGRATULATE HAROLD IN MY NEXT PICTURE!
I SEE BY TH' FUNNIES THAT YOU ARE USING THE SUGGESTION BOX. . . CONGRATULATIONS AND GOOD LUCK . . . THAT'S THE WAY WE DO THINGS HERE AT GENERAL ELECTRIC!
THANKS HECTOR - I HOPE IT CLICKS!

NEWS THROUGH THE PLANTS

"Production Plus"

April 7—This is not a historic date, or any particular person's birtbday; rather it is the date of the great illusion. The girls of Bldg. 19-3 service bureau had gathered at noon preparatory to resuming their labors. All were light hearted and gay, for it was a beautiful spring day. Suddenly there came a sound like the patter of rain drops falling and faces that beamed so brightly a moment before, registered deepest gloom. All rushed to the window to witness the deluge, but no rain. Investigation disclosed the illusion was due to the fact that Nadine Tierney neglected to remove the moth balls when she unpacked her spring coat. Happiness reigned again.

Since Everett Keese, Bldg. 19-3, laid the new linoleum in the bathroom, his wife can now take a shower while preparing the family meals in the kitchen. Not at all complex, anyone can do it in their home. Just drive a few nails into the water pipes below the bathroom floor.

June DeWitt does insist on doing the impractical. April 1st she left the office in the evening with a sign on her back reading, "A fool there was and I am it."

The euchre addicts of Bldg. 19-3 can't get enough euchre at noon now since the half hour noon is in force, so they spend one or two nights per week trying to catch a striped kitty and if all reports are true Maynard Spade and Bill Grover was made a present of one by Al Adams and Joe Burton, one night last week. We thought the fur season was over.

We just wonder where Gil Rose of Bldg. 19-3 gets all the maple syrup he brings in to the boys in the shop. Wonder if he gets it from the Wabash river; sure must come from some where else than maple trees or else Gil has a large forest, but oh boy, is it good; bring us some more samples, Gil. We liked the last one better.

Spring has arrived officially. How do we know? Why, Fred Paul, Bldg. 19-3, has shaved his moustache off. When asked the reason of the clean lip, Fred said, "I always shave it off every spring when I get the lawn mower sharpened.

Art "Jekyll and Hyde" Brandenburger, Bldg. 4-3, reveals to us his true personality on Saturday morning when there are no members of the fair sex on the floor. He takes off his cap and bares his glistening dome to the elements.

Doctor: "Wait a minute. You are too quick. I didn't tell you to say 'Ah-h-h'."

Patient: "I know you didn't. I just caught a glimpse of your new nurse."

News On The Nose From 4-5

With spring in the air, love in our hearts, and money in our pockets—on Friday, it's a wonderful world. In fact we're beginning to thing it's a loverfull world, if you'll permit our going sentimental. And here's conclusive evidence: Evelyn Rapp, Bldg. 4-5, and Robert Fry, Bldg. 4-4, became Mr. and Mrs. over the last weekend, while Helen Ross, Bldg. 4-4, has just revealed the fact that she has been an "old married woman for three months now." Mrs. Leonard Johns is the name. Edna Roemer donned the orange-blossoms and all the trimmings last Saturday, and is now getting used to being called Mrs. Carl Hormann. . . . We hear that Rod Stair, newly initiated into the assembly group of Bldg. 4-5, did himself up right proud as toastmaster at a banquet recently. In fact he turned quite a rosy hue when reference was made in one of the speaker's talks about the lovely young lady Rod was escorting. Turn about's fair enough — What say? . . . Merlin Roussey claims he is the original boy who left home and made good. He owes it all to the reading of a dime novel about twenty years ago, entitled "How to Become President Overnight." . . . The Bldg. 4-5 office staff are still mystified by the smooth way Mary Ellen Gingher put a big one over on them. Leaving Bldg. 4-5 to rest and maybe travel, Mary Ellen did some fast treking down to Orlando, Florida where U. S. Army Air Corps Private Phil Dunham made her Mrs. . . . Things we are never without around Bldg. 4-5. . . . Darrel Franklin and the perpetual floating lumber in his mouth — tooth-pick to you. "Red" Lee bellowing a deavening "Hallow" into the phone. Mark Staker with his hair combed perfectly. Jim Cushing and his cheerful grin. Vern Robinson and his cigars imported from Mexico—there oughta be a law. . . . They tell us that Richard Young has quite a time getting his work right when there's a Rome City influence around—um, I wonder what they mean? . . . In closing, we make this vow, that before another month is up, we'll find what it is that Frenchy LeGras does not want printed about himself. . . . and if you think we've written more about the men this week, you'll know it's because the girls in Bldg. 4-5 are too busy thinking about their new spring outfits, er, I mean working too hard to have time to make news. Yours, all in fun.

Snoopin' Sal.

Tom: "My wife talks to herself."

Tim: "So does mine, but she doesn't realize it—she things I'm listening."

It Was A Lucky Find

When Richard Gunkel, pin boy at the G-E Club found a purse containing $60.00 he promptly turned it in at the Club stand. As a reward for his honesty Bill Johnson, Bldg. 19-4, who had lost the purse, presented Richard with a crisp ten dollar bill.

Punch Press 19-5

By Slug

The Howlers have not only evened up the score with the Growlers but it being a year of great surprises they proceeded to make it two out of three, and believe me anyone who can accomplish this must be on their toenails. As the student outbowled the professor, plus Pop Louthan's 185 and Kid Eylenberg's run of luck it certainly hustled Kammer and Jacobs to hold their team on its unusual uneven keel. A feature was "Pinkey" Sordelet, who filled the shoes of George Prince, and who proved himself to be a bowler of unrecognized ability worthy of the Growlers hospitality. Fred Roebke, of course, is a star at any time as is "Wee Willie" Schultz. Twas I that tipped the scales in favor of the Howlers. The feud is not over by a long ways, instead of two out of three it has been raised to four out of seven, to be continued next season. Yes the Growlers shall be avenged for their untimely defeat.

Charles Houser, Bldg. 4-3, is looking for a pocket size fire extinguisher. He has to carry so many matches to keep his pipe lit that it creates a fire hazard. The other day Charley's matches ignited and burned a hole in his overcoat pocket. Anyone knowing of a manufacturer that makes this type of extinguisher, please contact Charley.

Bldg. 4-4

Paul seems to be in his second childhood already. He was seen sticking his tongue out at one of the girls the other day.

Woody didn't seem to mind the other day when Mary Kleber held his head.

Phyllis High went to Muncie over the weekend. It was only to take her ring down and have it repaired.

Wonder why Maxine Dunaway brings her home-made cookies to work? Could it be that she's trying to show the boys what a good cook she is.

Mary Kleber seems proud of her boy friend's new car. She has been going around taking her girl friends for a free ride. But when the ride is over, she informs them that her lunch the next day will be on them. Did some one say a free ride? Every one was wondering what the excitement was in the KC section the other day. When some one looked, it was all over. Katherine Roehling was coming back to work. Paul, the wire boy, has to watch his diet pretty close since he got his new trousers. He's afraid he will get too fat and tear this pair too.

We are told that Alberta Kul, Bldg. 19-4, has a very becoming blush.

I am off for Bldg. 4-6, would you care to come along! You know after a long winter of shut windows, dark suits and dresses, and dull monotony, we can hardly wait for the Easter season to usher in the new topics of color and conversation. Nature bursts forth in all her newness, and the "fancy young man" lightly turns to thoughts of "shiny red autos and bright blue suits." Bldg. 4-6 "a-la-ladybug" buzzes with new hat, purse, shoes, gloves, coats, suits conversation. Gentlemen, Bldg. 4-6, have changed their conversation from politics to golf and much to our relief. We spent all winter wondering if our whole lives were going to be as hum-drum as each week-on-week has been. Nothing interesting seems to happen. But here in Bldg. 4-6, we can't really feel as if we are in a rut (I know right now I should never have brought that matter up). Life has moved about a good bit of late and there "have been some changes made."

Until Max Farrell, Bldg. 4-3, explained to Alice Pflueger, Bldg. 4-3, what Einstein's theory of relativity is, Alice had us believing that we were descended from the ape. It also took Phil Tilford to get her convinced that the word "relativity" had nothing to do with her relation. After all this explaining, Alice says, "I am going to ask Ray if he has read a couple of books."

We are wondering why Lorine Leiter picks a crowded street car to go down town every noon. Does she expect her "most embarassing moment" to happen every day?

We just can't imagine why Lester Hock, Bldg. 26-2, is slicking down his hair so pretty these days.

During the past week, wedding bells chimed for one of Bldg. 4-6's own couples, Virginia Baker and Edward Whipple. Congratulations and lots of luck.

Our Robert Shirley has marched away with the boys to be a member of Uncle Sam's troops. Many of us, Raw Material men included, are going to miss his cheerful assistance.

Anna Marie Kestner has given us the go by for some fellow in Bldg. 18, though what they have over there that we don't have, I fail to see.

To all of our absentees, we wish good luck and pleasant traveling.

Oh—you say you are leaving me here? O.K. I'll be seeing you.

Raymond "Jeep" Johnson, Bldg. 4-3, has a weakness for meat, especially beef. He said he believes he could eat a cow's drum stick at one setting. So the boys in the south end are taking up a collection to get Ray a whole cow and a meat grinder for his birthday. In fact when it comes to beef eating, he has Wimpy backed off the boards and fanning for air.

(Continued from Page 6)

Spring

According to ancient astrological lore, when the sun enters the first sign of the Zodiac, known as Aries, it heralds the beginning of Spring. At this time the sap starts flowing, nature begins to awaken from Winter's sleep, flowers poke inquisitive heads above the ground, children hunt up marbles and kites stored away for the winter and older folks take new energy from the season and have childish ideas and ambitions. Not such a person, however, is Elmer Wagner, Bldg. 19-3. The fact that Elmer is now walking to work on occasions has nothing to do with spring, sap, marbles, or youthful ambitions. Confidentially, he started a chain of reasoning, something like this, "Girdles are for men with fallen chests, exercise reduces, I'll exercise"—hence, the walking. But with all, Elmer is still the ultimate in caution. From reports I received, he walks along the street car lines, overlooking many short cuts, the easier to hop a convenient conveyance should the old bunions start protesting. About this time of the year, Walter Sunier, John Schwanz, and sundry other members of the golfing gentry feel the urge the same manner as Lowell described the emotions in his poem, "The Vision of Sir Launfal," an inspiration to rise to greater heights —and I do not mean hitting too much under the ball. Think perhaps I'll look my clubs over, just in case. Other signs of Spring are the preparations, now taking place in many quarters, of a long trek down the aisle to the strains of Lohengrin.

If the male insists on hibernating in some gal's home for the winter, he can expect to pay the price in the Spring. Then, take the fisherman (go ahead, take him) his review of all choice lures, repair and reconditioning of equipment, search for sleek streamlined angle worms, minnows, and Hellgrammites to lure the elusive finny tribe. New tales are told of what I almost caught last year, the big one that got away, where I am going to get them this year. By the way, "Where did I put all my equipment?" With us always are the "mooners" who compose verse, good and otherwise, inspired by this season of the year. It seems June, moon, spoon, love, dove, and stuff seem to chase each other around the brain of our embryo poets. Even "Ye Scribe" bursts forth in one grand fling: Quote:

Ah April, with your many showers,
It's said you bring us bright May flowers, .
But when our feet with rain are wet,
Oh heck; That's wrong again, I'll bet." Unquote.

Yes, Spring, you work in wondrous ways, and do bring a feeling of joy and good cheer to every one. Fond parents play with Junior's toys, young folks feel the magical effect of your strange influence, the urge to build a nest dominates both bird and man. Things seem to harmonize after Winter's discords, all nature seems in tune. What I'm trying to say is, "Spring, you're pretty nice, I think I like you."

The first of April ran true to tradition. Earl Gebert was heard calling his own number. Raymond Kierspe called the police station, but couldn't stand being the only one in the office so passed it on to Bernard Byanskie. "Advice to the Lovelorn" Byanskie was asked to hold the line and he was still holding it at 5:15.

What's this we hear about Ceal Romary and all her medals?

The Wrong Way — And The Result

Considerable annoyance is being caused by employees who persist in the careless parking of their cars on the parking lot. Above a car is shown parked at an angle and the result is pictured below—waste space. This is one of the minor parking faults. Others include parking cars in the driveways, assuming space assigned to others, wedging in cars so that the next car can only pull out at the expense of scraped fenders, etc. The cooperation of all employees using the parking lots is asked by the Plant Protection Department.

Slips And Chips

By Sir Vis, 4-4

Spring, the most welcome season of the year. Oh how invigorating it is to be walking to work as the sun starts its trip across the sky. The robins finishing their get-up song, the turtle doves and red birds helping to fill the air with melodious vibrations, only broken by the saucy chatter of the blue jay. Spring, the hypodermic of dreams,. It turns our minds to the creeks, rivers, lakes and woods. Spring brings many things with it, as for Charlene, I quote, "I have a code in da doze! . . . Edison A. Martin is wild about yellow, especially yellow sweaters. I hear Ama is contemplating the purchase of one too. . . . The truth will out, you know how Bill Weber proudly boasts of smoking only twenty-five cent cigars. You should have seen him grab for those five centers I brought in. . . . Now and then a blink and occasional yawn and Art Kraft finishes the day nicely. He only wore colored glasses for five minutes the first day. We are glad to have you back with us on days Art. . . . The time goes by so fast for John Heine (so he says) that he purchased an alarm clock. The ringing of the alarm will attract his attention and prevent him from working too long. . . . The Easter bunny left a bag of Easter eggs for my dear friend of the rotor section. The sack was addressed "To my little Easter Rabbit, from Bonnie." Well Cookie, it seems that the girls still think of you. now and then.

Motor Generator Static

According to the announcement in last week's Works News, Don "Rock Garden" Shultz, the Bldg. 19-3 "poison-pen" writer, passed another milestone on Tuesday, April 8, 1941. The capacity of the office mail system was severely taxed due to the influx of gifts, which arrived with every delivery. Four large cakes, one adorned with enough candles to make it look like a forest fire were received, a "first edition" entitled "Three Little Pigs," and several indoor games following in close order. Later in the day he was presented with a solid steel signet ring, made up at great expense by one of the finest artisans in the jewelry trade.

At 5:15, Don was heard mumbling to himself, "Little man, you've had a busy day."

Kenny Betts, Bldg. 4-3, has returned to us after several weeks in the repair shops. He tells us that they not only removed his appendix but also gave him a general overhauling, including a valve grind. Kenny says he now feels tip-top, and is hitting on all eight.

Harry Parker, Glenn Cutler and Buck Adams, Bldg. 4-3, finally turned the sheep barn of Big Long Lake into a piggery, but we are confident by midsummer they will have made it over into just one grand circus for the flange boys to visit.

Gerry Habig and Ruth Lauer, Bldg. 4-3, kept the store clerks busy last Saturday picking out their Easter togs. Now the girls are worrying that they will not know each other when they are in the Easter parade.

M.B.A. PATIENTS

General Purpose Motor—Eleanor Paetz, Lutheran Hospital; Paulus Adams, R. No. 1, city; Calorin Fuercher, 2929 Holton Avenue; Virginia Shivley, 337 West Butler Street; Marion More, 1133 Kinniard Avenue; Elizabeth Gay, St. Joe Hospital; William Yates, 128 East Masterson Avenue; Garnet, 1655 Richardson Street; Samuel Ake, 1326 East Wayne Street; Beulah Wooley, 3106 Broadway.

Winter Street—Norman Lehman, 718 Union Street.

Office—Dolores Orth, St. Joe Hospital.

Air Craft—Russell Earl, St. Joe Hospital; Paul Berlein, 1220 McKee Street.

Transformer — Bertha Lorenz, Maysville Road.

Apparatus — H. Muehlenbuck, 835 Madison Street.

Series and Specialty—Janice Thrush, 905 East Rudisill Boulevard; Emily Brouwer, 421 East Pontiac Street.

General Service—Bruno Gulbin, St. Joe Hospital.

Left the Hospital—Bertha Roberson, Joseph Quinlan, William Fritz.

Wire and Insulation—Beulah Jones, 2806 Fox Avenue; Arthur Fryklind, 923 West Washington Street; Phillip Ormiston, 2010 Fox Avenue.

Returned to Work—Glen Moody, Henry Stegman, Alrich Johnson, Evelyn Pearson, George McAfee, Marjorie Potee, Neva Dewitt, Ida Trenary, Robert Elder, Olive Lewis, Sidney Chapman, Pauline Subkouski, Lucile Snyder.

Borings From 4-4 Office

Everyone is behaving well for such lovely weather. I know if I weren't working, I'd go out and pitch a tent (not woo) along the river and fish all day long (now I suppose you wonder what sucker would bite at my line). Gee it's too nice to have to work. However, the nights are OK now.

Last Saturday morning Denton Fay Manecke came to work and in all his flurry he left the car running. He closed the door, leaving the keys inside, and to make the short story still longer, the doors were locked. However, he didn't notice all this until he had gotten way up to Bldg. 4-6 where he puts in his time. The watchman called Denton and told him that his car was running. So he ran down the hall at great speed and hopped on the elevator. He wondered why the elevator refused to work when some one came to his rescue and told him to punch one instead of six. So Manecke ran out, but the doors were locked, with the keys inside, and the car still had enough gas to operate. I'll end the story by telling that he had to call his little girl to bring the other set of keys over. Now this is just a sample of the excitement in every day life for Denton Fay Manecke. He wonders why does all this have to happen to him.

Ivan Butler is the proud father of a beautiful baby girl. She is to be christened Constance Louise, or Connie Lou for short. This is number two in his hit parade and both are girls. Congratulations, Ivan and Mrs. Butler.

LaVon Price is tossing a brawl or should I say a real dinner party for the Gat-Rocks. Ask her about the centerpiece of wabbits.

One of the girls was just taking her time coming to work the other day and she stumbled over her own feet. She remarked later that in all the ice, snow and rainy weather, she had to pick a beautiful spring day to fall down. No, she didn't hurt anything (only her pride and her good Nylon hose).

In the future if this column is a little bit too dead, just blame it on to my Spring fever. It's catching, so you better watch out. My mother has already given me my double dose of sulphur and molasses.

'Tis plenty for now, I remain,
Sincerely as ever,
Elmer, the Field Mouse.
(The Rat to You).

A short, short play starring Bob Archbald and his three hens.

Act 1

The Hen House, Early Morning

Bob speaks: "Now listen girls, these are trying days and all should do their part in the crisis now existing—so I expect each of you to produce!" Bob exits by door and hens get together in consultation. Hens hold extensive conversation, then each goes to a nest with a smile on her face.

Curtain Falls.

Act 2

Next Day, Same Hen House

Bob enters and inspects nests, registers first, disbelief, then surprise. Is heard to murmur, "Doggone, they went and did it."

Curtain Falls.

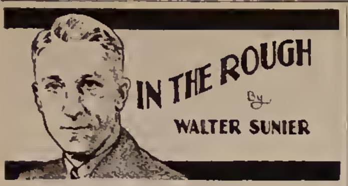
Act 3

The Office, Same Day

Bob speaks: "Fellows, I've got something started, I talked my three hens into laying four eggs each day, they take turns about laying an extra egg. "Nice work, I calls it."

Curtain Falls.

Anyone who knows the deep, dark secret of how to break one hundred on the club bowling alleys, please get in touch with Lois Hagemann, Bldg. 12-B. She sure would like to know how it's done.

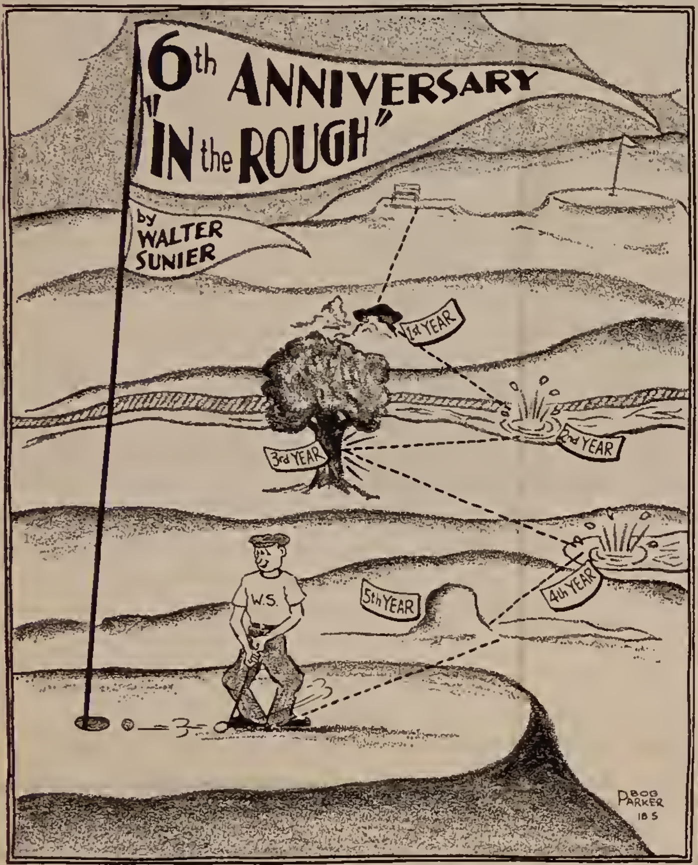


And now we have another milestone around our neck. Perhaps it should be a millstone and we should be dropped from a high bridge.

When the birthday of "In the Rough" comes around, the genial editor generally gives us a new head—we generally need it. Bob Parker drew it and we think he did a swell job.

For six years Walter has toiled and sweat in grinding out more than 300 columns. The column was born as an aftermath of the depression and the author is still depressed. If all the columns were laid end to end, they would still smell. The Board of Health has been a little careless.

I have known him for ten years, which is twelve years too long. He is rare—in the sense of raw. In the heights he has reached, he towers over the tallest louse. There is only one like him—thank heavens. He regrets that he has only one life to give his company. I don't think it was too. Peace—it's wonderful.



Congratulations to "In the Rough," and its author, Walter Sunier. We wish the column continued success another six years.—*All the Golfers.*

He says so much in such a small space. Very interesting reading.—*Chas. Johnson.*

I always admire anyone who does a good job. Congratulations Walt.—*Willard Bowman.*

There is only one "In the Rough." Think two would be too much.—*Earl Spiker.*

"In the Rough" has taught me you can fool some of the people at least six years.—*Toppy Moffatt.*

I learned how to play golf from reading "In the Rough," and I'm still there most of the time.—*Bill Wehrs.*

How such words of wisdom can be gathered together for six years is beyond me.—*T. N. Kellogg.*

No other column like it. Very interesting. I read it at least three or four times to find out why?—*Ben Butler.*

To write a column each week for six years is very hard. I know, because it's hard to write even this congratulating "In the Rough."—*Leo Wallace.*

Looking back, "In the Rough" is the history of golf in these works, written by a grand person. Congratulations, Walter, we were only kidding.—*All the Hecklers.*

A tramp knocked on the door of the inn known as "John and the Dragon." The landlady opened the door and the tramp greeted her:

"Could you spare a poor, hungry man a bite to eat?"

"No!" and she slammed the door.

A few minutes later the tramp knocked again. The landlady once more opened the door.

"Could I have a few words with John?" asked the tramp, grinning sheepishly.

Champion Inter-Department Basketball Team

By defeating West Side in the last two games of their two out of three play-off series Small Motor Factory won the championship of the G-E Inter-department Basketball League. West Side during the regular season copped the first half and Small Motor took the second, making a play-off necessary. The Westerners took the first tilt but the Factory rallied to win the next two and the title. Members of the championship club depicted above are: Front row, left to right, Coach Meyers, Clawson, Maxham, Winebrenner, League Manager Kessen.

Back row: Left to right, Hanley, Dent, Diffendorfer and Vonderhaar. Voirol, team and league's high scorer; Marquette, Small Motor captain, and Assistant League Manager Straub were absent when the picture was taken.

Table Tennis Entries Must Be Made In Near Future

T. L. Wallace, chairman, reports that final arrangements are being completed for the Table Tennis Tournament which is to be held in the G-E Club building on Tuesday and Wednesday, April 22 and 23. He requests again that all who intend to enter send him their entry at once so that the proper arrangements can be completed.

As stated before, there will be no entry fee.

Matches to the quarter final will be played on the basis of two out of three games, and quarter final, semi-final and final matches will be on the basis of three out of five games.

This tournament will be the fifth annual match. Carl Smith, Decatur won the men's singles in 1937 and 1938 and L. Michel in 1939 and 1940. Men's doubles were won in 1938 by Hanna and Townsend and in 1939 and 1940 by Michel and Fox. Women's singles was won by Mrs. Hubert Myers last year and Junior singles by Art Hoffman.

The tournament has proven a popular feature and has grown larger each year since it was inaugurated. All persons interested in table tennis are invited to watch the matches.

Seventeenfore Splurges

Facts have just been brought to light why Charlie Schild has been smoking his cigars down to where you have to use a tooth pick to hold them. Charlie's favorite cut rate cigar store has closed its doors and the result, no more two for a quarter cigars for twenty-four and one-half cents. . . . J. Hensler has been getting his weekly car fare free by performing his daily duties of changing the trolley for the car operator when the street car reaches the end of the line. We wonder what Jay is going to do when they start the busses on the Bloomingdale run. . . . John Howard bought a used car the other week and after telling one person it was a Ford and another that it was a Chevrolet, some one suggested that Johnny wash it and see what it really was. . . . Married life surely must be agreeing with "Dick" Seidel. He has been putting on weight and his appetite is getting so great he was seen coming out of a nearby ice-cream parlor after work one night where he had just consumed a double malted milk. . . . It won't be long now until that nice weather will be here. Then Emma Reiling will start looking for flower seeds, Charlie Isreal will be sporting that last year's ice-cream suit of his, and Lester Stauch will start rowing that boat of his around Lake James. . . . While on the subject of spring the old saying "A young man's fancy turns toward love" surely applied to Carroll Elder. The other day when the bell rang for the girls' quitting time, Carroll, his mind no doubt being on the feminine beauty, rushed for his coat and hat, and started to get in line with the girls. When asked by a fellow worker if he was quitting early, he replied, "Oh, I thought that was the alarm clock ringing for me to go to work."

St. Peter: "How did you get up here?"

Latest arrival: "Flu."

GENERAL ELECTRIC NEWS
FORT WAYNE WORKS

Volume 24 FORT WAYNE, INDIANA, FRIDAY, APRIL 18, 1941 Number 61

G-E RESPONSIBILITY
The chief concern of General Electric will be to serve our country well.
—CHARLES E. WILSON

An Invitation To The Elex Silver Tea

An invitation is issued to all Fort Wayne Works employees, as well as Elex members, to attend the Silver Tea at the Y.W.C.A. next Sunday afternoon commemorating the club's twenty-fifth anniversary. However, hundreds of written invitations were found necessary to the many friends of the organization outside of our own works. The sizable job of addressing the invitations was undertaken by the above group who are: standing, left to right—Irene Perry, Helen Bleke and Ceal Romary. Around the table, left to right—Evelyn Smith, Eileen Morris, Eva Lynn, president; Irene Meyers, Pauline Beaty, Edna Knight and Roxy Brewitte.

Col. Lohman Speaker At Veterans Banquet

Local Air Base Head To Be Honor Guest. Nominations Completed for Election of Officers

Col. E. A. Lohman, head of the local Anthony Wayne Air Base, will be honor guest and speaker at the annual meeting of the General Electric World War Veterans Association meeting to be held on Saturday evening, April 19, at the Moose Hall it is announced by Herschel Smith, president of the association.

It is anticipated that approximately three hundred and fifty veterans who served in the World War and are now employed at the Fort Wayne Works will attend the meeting.

Mr. Smith, and E. A. Barnes, honorary president of the association, will preside at the meeting. Mr. Barnes was general superintendent of the Fort Wayne Works during the period of the World War.

A social session has been arranged for the evening. This will be preceded by a short business meeting which will include the election of officers. The nominating committee consisting of Ed Ehrman, Winter Street; Jim James, Bldg. 4-3; Alva Powell, Bldg. 19-4, and R. Kaiser, Bldg. 10-1, announces the following

(Continued on Page 3)

Perfect Safety Score Maintained By One Division

Works Frequency Standing Is 6.09 At Close of First Quarter of 1941

The Wire-Insulation Division remains the sole division to complete a perfect safety record, at the close of the first quarter of 1941 excluding the Magneto Division which has been in operation for a comparatively short time. A close competitor, however, is the Series and Specialty Motor Division with an accident frequency at the close of three months of 2.51.

(Continued on Page 2)

NOTICE TO EMPLOYEES

Starting May 5, 1941 the pedestrian entrance and exit at Union Street will be closed. Employees usually using this entrance in coming to and going from work are asked to use the Wall Street-College Avenue gate or the Broadway gate.

F. C. DURYEE,
Plant Protection Department.

BULLETIN

Beginning Sunday, April 27, Broadway and Winter Street Plants will operate on Eastern Standard Time in accordance with an ordinance passed by the City Council in 1928.

All clocks in the office and factory will be set forward one hour at midnight, Saturday, April 26th, and the plants will operate on the advanced time until midnight, Saturday, September 27, at which time the clocks will be set back to Central Standard Time.

M. E. LORD,
Manager

Gerard Swope Named On Defense Board

Gerard Swope, honorary president of the Company has accepted an appointment by President Franklin D. Roosevelt as an alternate member of the National Defense Mediation Board. Mr. Swope will serve as alternate to Walter C. Teagle, regular member of the board.

ALUMNI MEETING

The Apprentice Alumni Association of the Fort Wayne Works will hold a dinner meeting at the Chamber of Commerce next Tuesday evening. A feature of the meeting will be the appearance of Axel Christensen, noted humorist and philosopher.

New Employment Record Is Set By General Electric

At the annual meeting of stockholders of the Company, held Tuesday, April 15 in Schenectady, President Charles E. Wilson said that the Company now has 105,000 employees, largest number in its history and that new employees are being added at the rate of 1000 a week.

Mr. Wilson also stated that the Company now has a backlog of $500,000,000 in orders and that 75 per cent of this is national defense work. He said the Company is "ahead of schedule" on turbine work and up to schedule on a large part of its other work.

$11,250 Paid In Insurance Claims Here

Grand Total of Payments Since Plan Was Started Now Stands at $18,502,224 March Claims $123,837

Claims were paid to beneficiaries of 19 employees of the Apparatus Works of the Company during the month of March under terms of the Group Life Insurance Plan, according to the monthly report from the office of the Secretary. The total of $61,750 was paid out in the claims covering payments under both the Free and Additional provisions of the Plan.

Schenectady Works had a total of eight claims for $27,200. Fort Wayne had four for a total of $11,250, Pittsfield Works had three for a total of $10,500, Lynn River had two for a total of $7,000, West Lynn had one for $3,330, and the Philadelphia Works also had one for $2,500.

Throughout the entire Company, the total of death claims paid during the month of March was $123,837. Since the first of the year, more than $350,000 had been paid in death and disability claims.

The total death and disability claims since January 1, 1920 when the claims were inaugurated, now stands at $18,502,224.

New Family Of Standard Fans At Low Price

The General Electric fan section in Bridgeport, Conn., announces a new standard line of electric fans for 1941, offering for the first time a "family of fans" in the low-cost bracket and embodying the latest features in styling.

The new standard line includes 8, 10, and 12-inch fans with newly designed wide blades which provide forceful delivery quietly. An addition to the standard models is one at the lowest price ever offered by General Electric for a 16-inch oscillating fan.

The smart modern styling of the smaller standard fans features molded plastic bases and a curved motor support plated in chrome. The streamlined fan guards have a high-

Elex Anniversary To Be Observed Sunday

Employees and Friends of Club Invited to Attend Silver Tea at the Y.W.C.A. Starting at Three O'Clock

A record breaking attendance is anticipated for the Elex Silver Tea commemorating the club's twenty-fifth anniversary which will be held at the Y.W.C.A. next Sunday afternoon between 3:00 and 5:00 p. m. A general invitation has been issued to all Fort Wayne Works employees and their families to participate in the observance and in addition many civic leaders and friends of the club are expected to attend.

Eva Lynn, President, Eileen Morris, Vice-President, Irene Meyers, Advisor and Personnel Director, and Helen Allen, Secretary, will receive the guests and welcome out of town visitors. Bess Brown is acting as General Chairman for arrangements for the tea, assisted by Helen Bleke, Alice Daily and Sue Cameron on the decorating committee. Veora Habig is chairman of the program committee, assisted by Margaret Koch, Alvina Gerber, Mrs. Harry Hogan and Belle Buchan. Mrs. L. D. Poorman is chairman of the hostess committee, assisted by Alberta Gollmer, Vera Berning, Merle Kirkpatrick, Dorothy Franke, Mrs. Ezra Garringer, Ruth Laney, Bea Livingston, Pauline Beaty and Mrs. Keith Robinson. Evelyn Smith is in charge of refreshments, assisted by Betty Minard and Florence Hayzlett. Invitations are in charge of Lois Miller and Hilda Walda. Irene Perry

Volume 24 Friday, April 18, 1941 No. 61

• Our Double Duty!

With the loud tocsins of defense ringing in the ears of everyone, and the major effort of industry turned to the grim business of providing the nation with the sinews of war at top speed, the problem of what to do for regular customers asserts itself in no uncertain terms. It is a problem faced by practically every industry in the United States today. It resolves itself into the question: "How can we do our part toward national defense and at the same time keep our regular customers happy?"

In war or peace, General Electric's biggest customers are the utility companies of the nation. In a sense, they are the Company's most fruitful source of business. The very foundations of the General Electric Company are interlaced with the histories of the utilities companies. In normal times a large percentage of the total business of the Company comes from the utility companies of the United States. What then do we tell them when more than 75 per cent of our present output is going into defense work and to customers also engaged in defense work?

One answer was given recently by C. H. Lang, chairman of the Defense Co-ordinating Committee before members of the Edison Electric Institute, meeting in Chicago. In response to the question, "what is our manufacturing industry going to do for you?" Mr. Lang said in part:

"It's going to do a job, for you and for our country—the hardest job it ever undertook—but its best talents, its most resourceful ingenuity, its tireless determination, its total energies will be devoted to the task. That commitment I know I can make without reservation for the entire electrical manufacturing industry.

"Be assured," declared Mr. Lang, "that the men and women who are the lifeblood of this electrical manufacturing industry have been aroused and are not losing a moment in doing this job in which electricity has the greatest single role. You know their character, their patriotisms, their abilities, their spirit. Have faith in them. They won't let you down and they won't let their country down!"

• Being Busy Must Not Stop Us

America's all-out effort for all-out defense has created a production job for American industries on a scale never known before.

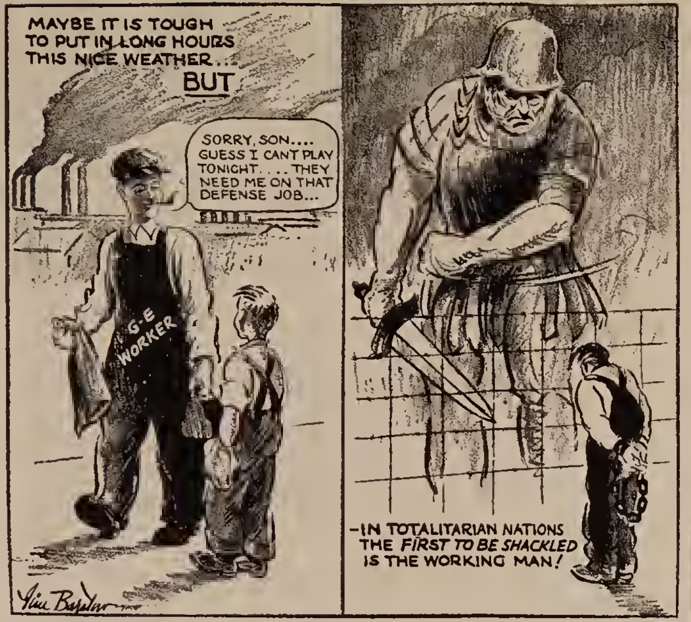
We have a part in this, as does every other organization whose people are engaged in turning out a useful product. Naturally, we all wish to do our full part, do it well, and do it even ahead of schedule, if possible.

All this is going to keep every one of us extremely busy in his or her own job, but no matter how busy we are or become, we must *KEEP ON WORKING SAFELY!*

Let's prove to ourselves that we can boost production and reduce accidents at the same time!

"The best way to keep good acts in memory is to refresh them."—*Cato.*

LET'S FACE THE FACTS



MAYBE IT IS TOUGH TO PUT IN LONG HOURS THIS NICE WEATHER... BUT
SORRY, SON.... GUESS I CAN'T PLAY TONIGHT.... THEY NEED ME ON THAT DEFENSE JOB...
G-E WORKER
—IN TOTALITARIAN NATIONS THE *FIRST TO BE SHACKLED* IS THE WORKING MAN!
Vic Bayler

Safety Standings

(Continued from Page 1)

Eight lost time accidents are recorded for March as compared with six for the same month last year. This makes the accident frequency at the end of the quarter 6.09 compared with 5.01 for the same period last year and the accident severity .158 compared with .21 for the same period in 1921.

Standings of the various divisions are as follows:

	Freq.	Sev.
Wire-Insul.	0.0	0.0
Magneto	0.0	0.0
Specialty Mtr.	2.51	.008
Gen. Purpose	3.90	.11
Tool	6.51	.02
Motor-Gen.	6.98	.11
Distribution	10.16	.05
Transformer	11.05	.12
Gen. Service	12.48	1.37
Decatur	13.69	.15

Assume Foremenships In Motor-Generator

C. W. Marhenke

H. M. Kramer

J. B. Grogg

Announcement is made by R. M. Hartigan, superintendent of the Motor-Generator Division of the appointment of three men to the positions of foremen. They are Calvin W. Marhenke, Herbert M. Kramer and James B. Grogg.

Mr. Grogg was first employed on August 28, 1919, and assigned to the Fractional Horsepower Motor Division under J. Trautman. Later he was transferred to the Meter Division and in 1934 to Motor-Generator Division. He has served in various capacities including assistant foreman of winding, stock keeping, and blue print and time keeping. Mr. Grogg resides at 1045 Shore Drive.

Mr. Marhenke enrolled in the General Electric Apprentice School of the Fort Wayne Works in 1929. After completion of the electrical tester course in 1933 he was assigned to test and inspection work in the Fractional Horsepower Motor Department. In 1935 he was transferred to Motor-Generator test and continued in this work up to the present time. Mr. and Mrs. Marhenke will take up their residence at 1903 Curdes Avenue in the near future.

Mr. Kramer's service started in August, 1919, when he was employed in the induction motor department under L. D. Meader, in Bldg. 19-2. When the induction motor work was transferred to another Works and the AC and DC work was combined, Mr. Kramer acted as leading workman in the AC stator coil group continuing in this work up to the time of his present appointment. Mr. Kramer resides at 2014 Short Street.

Elex Silver Tea

(Continued from Page 1)

will serve as publicity chairman. Presiding at the tea tables will be Mrs. Harry Hogan, Marcella Koehn, Mrs. Rogers Filler, Grace Bushman, Evelyn Smith, Florence Hayzlett, Betty Minard, Irene Perry, Margaret Koch. and Annette Bauman. Esta Greiner and Betty Kiefer will assist at the refreshment tables. A musical program will be given by Miss Marguerite Hitzeman at the organ and Lela Hagan, violinist throughout the afternoon. Spring flowers and silver bows will be used for decoration with pretty appointments in silver and lace and spring flowers, pastel pink and blue candles carried out on the tea tables.

If the wife goes home to visit the folks week ends, or if for any other reason you have the responsibility of getting your own meals, breakfast, at least, presents no problem if you have a General Electric Automatic Coffee Maker, Toaster, and Cooker. Press a button and you get a delicious brew of coffee; drop in the toast and it pops out perfectly browned; and for eggs just fry a couple with bacon on the Cooker. (If you are real ambitious, or take manly pride in your culinary skill, you will find a General Electric Roaster capable of cooking whole meals.)

WITH THE COLORS

CLOIS JOSEPH SHADY, stub lathe operator, General Purpose Division. Residence, 1311 Taylor

DAN BISHOP, inspector and packer, Bldg. 17-2. Residence 2517 South Harrison Street.

ELMER WM. SCHEER, inspector, Bldg. 4-3. Residence 1214 Oakdale Drive.

SAMUEL E. SCHLADENHAUFFEN, winder, Motor-Generator Division. Residence 929 Parkview.

GEORGE HENRY KNOLL, production clerk, Regional Warehouse. Residence 2110 South Lafayette.

HOWARD DRAPER, cost clerk, Specialty Transformer Division. Residence 2921 South Anthony Boulevard.

ARTHUR MAXHAM, billing clerk G. O. Billing Department. Residence 3602 South Lafayette Street.

WILLIAM J. SCHLECHT, grinder Bldg. 4-4. Residence R. R. 1.

BULLETIN

Starting next Monday, April 21, luncheons will be served at the Works Restaurant for members of the second shift. The serving period will be between 5:30 and 8:00 P.M. in Bldg. 16-1. The luncheon charge will be 20c.

Safety Glasses Prove Protective Qualities

Wm. W. Johnson, Bldg. 4-4, is shown inspecting punch which but for his foresight might have cost him an eye.

When Wm. W. Johnson, Bldg. 4-4 tool grinder, started on one of his regular operations this week he carefully adjusted his prescription glasses which he had obtained six weeks before. Bill's precaution stood him in good stead for a few minutes later a punch flew out of the grinder chuck, struck the right lens of Bill's glasses and ricocheted back into the body of the machine. Would Bill have lost an eye if he had not been wearing the glasses? Sufficient to say the lens where the punch struck was badly marred. The glasses are duplicates of the pair that was displayed some months ago throughout the works and which withstood thousands of hammer blows.

New Fan Line

(Continued from Page 1)

ly polished finish, and the newly designed wide blades are smooth black. The decorative monogram is red and aluminum.

The 8, 10, and 12-inch standard fans follow the styling of a 10-inch fan introduced in 1940. The immediate popularity of this fan resulted in the "family of fans" in the 1941 standard line. The 8-inch fan is non-oscillating. The 10-inch fan is available either as an oscillating or non-oscillating model. The 12-inch standard fan oscillates and has three running speeds.

Gecode Club Holds Annual Easter Party

Approximately one hundred members and guests of the Gecode Club enjoyed an Easter party at the Decatur Works club rooms Saturday evening. A sacred program was held during the evening. The committee in charge of the arrangements for the party included Estella Franklin, chairman; Mary Jane Fritzinger, Fern Passwater, Eileen Bowman, Katherine Weiland, Irene Light, Helen Sheets, Margaret Scott, Doris Schifferly and Betty Reichert.

Going — Going — Gone

One good tug represented the last ten seconds of one of the New York World's Fair's outstanding landmarks—12 tons of stainless steel shaped to simulate a lightning bolt. The 125-foot shaft stood in front of the General Electric Building where man-made lightning was one of the Fair's big attractions during two seasons. The lightning bolt motif was one of the Fair's most remarkable achievements in engineering design. It was built by the Edward G. Budd Manufacturing Company with a stainless steel skin like that of a streamlined railroad train. Erected in one piece, it also came down in one piece. Wreckers applied acetylene torches to the base. One tug from a cable sent the lightning bolt to earth with a thud that symbolized the destruction of the World of Tomorrow. It came to rest in a tangled heap of the ruins of a building which had thrilled some 15,000,000 visitors.

The lightning bolt motif was a popular photographic subject for fair visitors and numerous pictures of it were taken by Fort Wayne Works employees visiting the General Electric buildings.

M.B.A. PATIENTS

Motor General Purpose: William Yates, 128 E. Masterson Ave.; Beulah Wooley, 338 W. Jefferson St.; Mary Ogg, Caylor Hospital, Bluffton, Ind.; Robert Moore, Roanoke, Ind.; Carl Mosser, 722 W. Dewald St.; Walter Kline, 1317 Michigan Ave.; Elizabeth Gay, 2130 Broadway; Robert Truschman, St. Joe Hospital.

Transformer: Clifford Schwarz, 2010 Dodge Ave.; Betty Fleming, 2148 Fox Ave.; Irene Forest, 421 W. Butler St.; Robert Happel, R. No. 3; Robert Hutson, R. No. 2, city; Elizabeth Luois, 536 E. Lewis St.; Marguerite Malich, 2726 Parnell Ave.; Donna Roe, Lutheran Hospital.

Series & Specialty: Carl Rietdorf, Lutheran Hospital; Riley Maynard, Lutheran Hospital; Neal McNamara, 2323 Pleasant Ave.; Emily Brouwer, 421 E. Pontiac St.

General Service: Lawrence Clancey, 4230 Indiana Ave.; Elmer Hatfield, 2925 Euclid Ave.

Winter Street: Fred Ellinger, Sacred Heart Hospital, Garrett, Ind.; Orville Tracey, Lutheran Hospital; Glen Macy, 2837 Lawrence Ave.

Apparatus: H. Muehlenbruch, 835 Madison St.; Virginia Ostrouski, 2107 Lafayette St.

Wire & Insulation: Phillip Ormiston, 2010 Fox Ave.; Arthur Fryklind, 923 W. Washington.

Office: Otto Brunner, 1229 Swinney Ave.; LaVona Spore, 2017 Drexel Blvd.

Left the hospital: Dolores Orth, Glenn Stanger.

Returned to work: Wm. Fritz, Harold Roche, Herbert Dornte, Paul Berlien, Granville Heck, Bernice Scheumann, Eric Hellerig, Janice Thrush, Catherine Roehling, Samuel Ake, Paulus Adams, Beulah Bailey, Garnet Holzworth, Donna Means, Russell Poorman, Esta Greiner, Rosella Swift, Gladys Tudor, Margaret Fall, Perry O'Neill, Doris Oberlin, Norman Lehman, Thelma Court.

Col. Lohman To Speak

(Continued from Page 1)

nominees: Wm. Walt, Bldg. 4-B and C. Rehling, Bldg. 20-2 for president; Andy Lee, Bldg. 4-5 and Rudy Kaiser, Bldg. 10-1, for vice-president; E. W. Witte, Bldg. 18-1 and E. H. Haugk, Bldg. 18-2, secretary-treasurer and Wm. Smith, sergeant-at-arms.

Veterans who have not as yet made reservations but wish to attend the banquet tomorrow night may do so by presenting proper credentials to the sergeant-at-arms.

PARTY CHAIRMAN

GEORGE DOEHLA

George Doehla, fire and patrol chief, is chairman of the Volunteer Firemens' Association party to be held this Friday evening at the G-E Club.

Famous World Traveler To Speak At Club On April 25

Dr. Onderdonk Scheduled For Free Program Next Friday Evening—To Speak On "America's Role In The World Crisis."

G. E. employees and their families will have an opportunity to hear Dr. Francis Skillman Onderdonk, famous world traveler and lecturer on international affairs, next Friday evening, April 25, at the G-E Club when he will deliver an address on "America's Role in the World Crisis."

DR. F. S. ONDERDONK

Dr. Onderdonk, whose home is in Ann Arbor, Mich., is on a lecture tour, one of the many he has undertaken since 1934 and during which he has covered over 200,000 miles in his specially arranged motor equipment.

In the last two months of the first World War, young Onderdonk worked as draftsman in the rebuilding of Gorizia on the Austro-Italian front. Then he witnessed "the two most dramatic days in the last seven centuries of Austria's history: the collapse of the Hapsburg reign and the erection of a republic," spending those 48 hours by force of circumstances on Vienna-bound trains jammed with revolutionary troops.

Dr. Onderdonk married a Czech girl in 1920 and returned with her to his native country, America, where he worked as a draftsman in architecture. In 1922, however, the couple went back to Vienna and remained in Austria three years, witnessing the evils of inflation.

In 1925 Dr. Onderdonk became an instructor of the College of Architecture at the University of Michigan and taught there until 1933. During that period he wrote "The Ferro-Concrete Style" (a $12 volume with 400 illustrations); 26 articles appearing in architectural journals, and many essays. He lectured before architectural societies in New York, Washington, Philadelphia, Detroit, Chicago, St. Louis, and Kansas City as well as at the leading Schools of Architecture in the mid-western and eastern states. He has spoken repeatedly for the Extension and Broadcasting Divisions of the University of Michigan.

Dr. Onderdonk has gone to Europe every third year since making his home in Ann Arbor. In August 1938, on his eighth trip abroad since 1901, he attended the International Conference at Pontigny, France, as the guest of Lord Davies. He was at Geneva during the Munich disaster and previewed there a striking talking picture on "World Organization," showing the League of Nations' successes in combating epidemics, drug traffic, social evils, etc. This non-political work is now to be continued from a new international headquarters at McGill University in Canada.

Dr. Onderdonk owns the only copy of above talking film now being exhibited in America and frequently includes it in his lectures.

In his address in this city, Dr. Onderdonk will present his opinions concerning the significance of the present world crisis and outline the foreign policy which he believes the United States should adopt.

Fellowships Are Awarded Seven

Charles A. Coffin Fellowships have been awarded seven graduates of as many colleges and universities by the General Electric Company, it is announced. These Fellowships, granted annually under terms of the Charles A. Coffin Foundation, enable outstanding graduates to continue or undertake research work in educational institutions either in this country or abroad. The fields in which awards are made include electricity, physics, and physical chemistry.

This year 21 applications for the Fellowships were made. The seven men, their schools and the schools in which they will pursue additional studies are: William J. Barclay, Oregon State, to study at Stanford University; Willard H. Fenn, University of California, to study at same school; Henry M. Foley, University of Michigan, to study at same school; John A. Hornbeck, Oberlin College, to study at Massachusetts Institute of Technology; Paul M. Marcus, Columbia University, to study at Harvard University; Theodore Moreno, Stanford University, to study at same school; Robert L. Sproull, Cornell University, to study at same school.

Since the Fellowships have been awarded under terms of the Foundation, 122 individuals from 68 different colleges and universities have received them. Researches have been or will be carried on at 29 universities, including three in foreign countries. More than $93,000 has been awarded since the plan was established 19 years ago.

Firemen's Banquet At Club This Evening

The Volunteer Firemens' Association of the Fort Wayne Works will hold a benefit party at the G-E Club this evening. All G-E employees and their friends are invited. Prizes consisting of chickens and hams will be awarded during the evening.

»» NEWS THROUGH THE PLANTS ««

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

We have seen some rather interesting bits of news in the columns from the east lately. Maybe you would like to see them too.

From Pittsfield we get a glimpse of new hair-do's for this summer. The 1941 hair-do will rise high from the temples, the sides and top will be shorter, and it will be long enough to fall gracefully in back. It will have a cared-for look, a decided relief from the careless, frowsy bobs of the past. Your fundamental question, however, will be, not "Is it the latest?" but "Is it becoming?" Nice to know you can get away with earrings again.

And here comes a tip on fingernails. As of today you can stop blaming your split and broken nails on your Indian-red polish or any other color. Dermatologists tell us they are caused by a run-down condition and not enough vitamins in the diet. Maintain your health at the highest possible standards and your nails won't split or break. While we're on the subject perhaps you'd like to know what those white spots are that appear out of nowhere under nailplate. They are simple bruises and will grow out. Those black splinters are from sharp blows causing a slight hemorrhage, nothing to be concerned about, and will disappear as the nail grows up.

Cross ridges on the nail comes either from nervous shock, an infectious disease or skin trouble. They are called Beau's lines, nothing to do with the One and Only, but named after a Mr. Beau who 'way back in 1846 discovered this systemic disturbance. Just watch your health, be kinder to your nails and use your polish to your heart's content.

This being the month of frequent showers and storms we would like to pass on to you some common sense advice about what to do during a lightning storm as given by the lightning experts from the G. E. high-voltage engineering laboratory at Pittsfield. (We should say —what not to do). Stay away from the piano, do not take a bath or shower during the storm. A needle will not attract lightning, but do not use an electric sewing machine.

Golfers are warned not to seek shelter under large trees and not to hold on to steel clubs during an electrical storm. Swimmers are warned to stay out of the water Contrary to the old belief that lightning never strikes in the same place twice, Dr. Karl B. MeEachron reports that studies show the Empire State building is struck between 40 and 50 times yearly.

Is Zat So?

Spring is here at last and we hope that it is here to last! This is the time of year when every thing changes. The trees change from a drab bare skeleton to green leafy branches. We change our conversation from basketball to baseball, and lay away our hunting clothes to be replaced by fishing tackle. Ah, Spring! it sure works wonders! By the way, have you played any golf yet? Ed Sonday certainly must have spring fever! He was seen diligently working, trying to repair a wheel for a skooter. My! My! Ed don't tell us you still ride one of those things! We wonder what "Heinie" Wichern must have been thinking about the other day when he tried in vain to put a left hand die on a right hand machine? Did you know that Bldg. 17's elevator operator, Albert Burns is the father of Bob Burns who made such a brilliant showing in the welterweight division of the Golden Gloves tournament this year? . . . Alfred Nix and Harold Hoffman were presented a supply of cigarettes and best wishes when they left the 17-1 gang, going to join the ranks of the Army. . . . Loyal Decker has finally been convinced that he can not reduce when he buys a pie every morning from the candy lady, so he has decided to eat a candy bar instead! Woe is me! Haven't you ever heard of the saying "Out of the frying pan into the fire", Decker? . . . La Moync Gale and wife, Maxine, are announcing an addition to their family . . . their bird dog presented them with five little puppies on Easter morning! We still think that ought o call for cigars, Gale! . . . Von A. "Pat" Eickhorn may be all right as a State Senator and know quite a bit about making laws, but he admits that he knows absolutely nothing about a Doctor's profession. "Pat" decided to doctor his cold with a simple home remedy and consequently he was absent from work for several days! "Pat" can't decide whether he got an overdose or whether he is just a "quack"! . . . Our deepest sympathy is extended to Claude Johnson in the death of his mother.

See you next week!

The Question Mark.

It may be a little late—but we do want to thank Merle Kirkpatrick for her contribution on the Elex Bowlers' trip to Kokomo. We might mention that since then ten of our twelve teams have placed. The Elex Club No. 1 heads the local team winners in Class C. H. Linnemeyer, W. Click, H. Lacey are among the ones finishing in the money. Here's to better luck next year.

Leave For Training Quarters Today

Left, N. G. Norris, fractional horsepower motor drafting department, bids goodbye to reserve officers Joe Anderson, center, and Stanley Tomkinson, right, who are leaving their duties as draftsmen to enter Uncle Sam's service. Mr. Anderson is a second lieutenant in the infantry and will be stationed at Camp Livingston, Louisiana. Mr. Tomkinson is a first lieutenant in the coast artillery and will be stationed at Camp Davis, North Carolina.

Sunbeams From 17-4

In the spring a young man's fancy turns to romance, and Lce Jones is no exception, the girl friend is now wearing a new diamond.

And talking of romance, we hear that the wedding bells are going to ring for Arnola Brindle in June.

Claud Birely is sure on good terms with the big fish in Rose lake, and to prove that he is, he brings along the pictures of the biggest ones he caught.

Mabel Vizard bought an outboard motor for the boy friend for Christmas, and now she has joined the fishermen widows' club.

Charlene Orn really believes that mental telepathy is better than Cupid, for creating romance, all she needs to do is think hard about a certain young man and, alas, he asks for a date.

Dorothy Wilhelm wanted to be sure that she got a card for Easter, so she mailed herself one, and then went to New Haven after it.

Dick Snyder, Bldg. 4-6, recently purchased a kite for his young son. Last Sunday daddy and grandpa took Junior out to fly his kite. Daddy and grandpa were having all the fun when Junior asked "Daddy, isn't that my kite?" Dick has invited some of the boys out from Bldg. 4-6 telling them it sure is lots of fun playing with his son's toys.

19-4 Spot Jottings

It seems as though everyone is leaving to take up the career of housewives. This Friday, Bldg. 19-4 will lose another of its members when Agnes Landin leaves to take up the duties of Mrs. Howard Cooper. Good luck Agnes.

Notice to Edythe Roller: Those straps on the street cars are for the explicit purpose of holding one up on their two feet. What were you jerking yours around for the other night? Did you think it was a punching bag? Of course, one must get in shape for pitching.

How come Alberta Keel looked for the WORKS NEWS so anxiously?

Congratulations on your promotion Alma S. We're all proud of you. We're glad we can work for you.

Wm. "Mouse" Bailey, Bldg. 4-3, is planning on big things when it comes to chickens, He now has two hens, each one setting on a batch of eggs and Bill is anxiously awaiting the blessed event. He already is soliciting customers for fresh eggs, and if things go as per schedule, he is going to give a big chicken fry this fall for the boys in the north end.

"Did you hear about the man who drank gasoline for whiskey?"

"No."

"Now, instead of hicking, he honks."

"Oh, auto-intoxication!"

SANDY SAYS

Me (philosophizing) "All things are relative."

Cousin Colin (reading Sandy Says in the WORKS NEWS) "And this thing is all relatives."

Weel, it does seem that I have as many relatives as Bob Burns and use them as often. But this time I won't mention them—much. Instead, let's compare two things that are relative to each other.

It's a favorite trick o' people to compare what they want to talk about with something else. When people talk about electricity, they compare it to water in a pipe. When they talk about music, they talk about the "color" of the tones. When they talk about photographs, they talk about the "tone" of the colors.

Now, let's do a little mixing on our own hook. Last week we compared a good suggestion to a good photograph. This week lets reverse that process and compare a photo to a suggestion. That will enable us to completely surround our subject and view it from both sides.

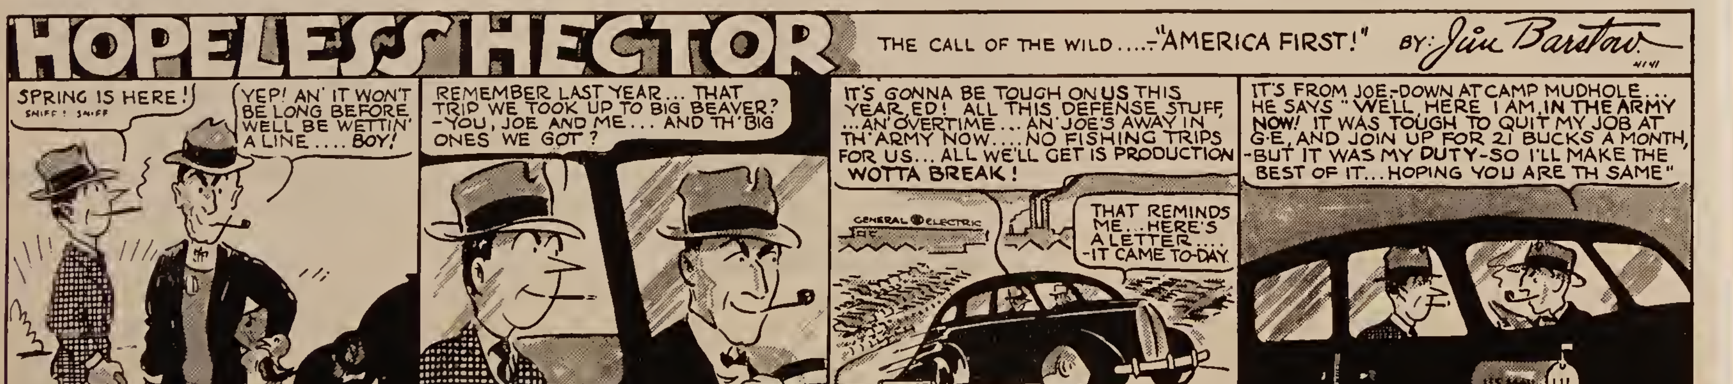
"Beating around the bush," is another name for it.

Now, if ye have a good memory for trifles, and happened to have read last week's "Sandy Says," ye recall that we covered hastily the process of making a good photo, with suitable inferences to good suggestions. This week, starting from the same place, but this time taking the main line instead o' the side track, let's say—first—you must WANT to make one. Second, you must find a good subject. Next, you must have the proper equipment. The nice part of that is that we all don't have cameras, but we ALL do have what it takes to make a good suggestion. Ye recall all the steps it took to get a picture—well, it all boils down to one word—WORK. That same word spells the difference between many a good idea gone wrong or forgotten, and a good suggestion that pays off.

O' course the idea must be good to start with. Ye can't take just any dumb idea, like one my Cousin Colin had, for instance:

"Hoot Mon!" he said, "I hae a gude idea. I want tae wire my garage, and I think I'll use weatherproof wiring. In that way I won't have tae patch the roof."

The unseasonal heat seems to have had its effect on Marjorie Degitz, Bldg. 12-B. She was observed "applying" a whole can of shellac to the front of her dress and hose. Let us in on the secret, Marjorie, does it make 'em wear better?



HOPELESS HECTOR
THE CALL OF THE WILD ....–"AMERICA FIRST!"

NEWS THROUGH THE PLANTS

26-5 Tool Bits

Henry Wittber bought a cow for Roscoe Platt. No, don't hold your breath. It was only a picture cow from a candy bar and Hank graciously ate the candy . . . The travels and adventures of Earl Lenz should be the title of this story, but Earl would rather tell you in his own words of his experiences on and off of the main drag at Markle . . . Fred Fitch had about the best fish story of the past week-end. One of Fred's friends' brother's uncle—or somebody—cast sixteen times, only, and netted sixteen bass . . . We wonder why all the boys are whistling "California Here I Come"? . . . It must be the weather when Milt Ray puts on Art Jenne's coat by mistake and gets clear down to the elevator, fumbling all the way in the pockets for his favorite smoking, before he discovers his error. Milt dashed back and met Art coming along with Paul Berlein's coat. The two returned to the coat rack to discover Paul scratching his head, and wondering if he wore a coat, and if so what color. . . . Art Thieme is the busy man these days. He came to work with sawdust in his back (not oats) and with his trouser cuffs bulging with the same. We wouldn't be surprised to see a young pine seedling sprout from the cuffs some day. All the result of the fine new home Art is building. . . . Dick Lenz is back on the job after a trip to St. Paul, Minn., where he did his stuff in the ABC tournament. . . . Russel Hoffman, of the slotter gang is in a quandry with lots of work on hand Russel can't figure out how he will find time to get in training for his match with Joe Louis. Russ claims that Joe's bouts have all been pushovers and that anyone with half a punch can take him. Russ has easy got a half punch with a little to spare. . . . Herb Mennewisch was presented with the cup award for his able directing of the red heel fad. Herb says it came in very handy in nursery. . . . Frank Hoffman was observed recently taking Ed Steward's pulse. After careful examination he proclaimed Ed in good shape. "Boy now I can take another chew" said Ed. . . . Henry Frey and Elmer Sauerwein are having an awful time deciding who is going to pull this gag. "Why do ducks fly north in the spring?" The answer "Because it would be a heck of a long walk."

Kurt Martin has been telling the boys the best way to catch fish. It seems that first thing to do is to find the fish. Then you stroke them on the back while telling them a fish story. Finally you grab them. . . . John Ebert is reported willing to take lessons or even give lessons on how to park a car straight in the parking lot. . . . Herb Thiele is sporting a new car.

It must be admitted that Frank Martin, Plant Protection Department, is willing. It is reported that Frank received a call the other evening advising him that it would be a good thing to wash the windows in the new gate house. Frank did a pretty good job before he discovered that the call did not come from the commandant but from a pal.

One day's work must have seemed like a week to Kathryn Hepker, Bldg. 19-5. At any rate after ringing her card Monday to go home she threw it away.

Extra. Kathleen Moran, Bldg. 19-5, is reported to have bought a brand new car to drive one block to the bingo games, and then after parking it use a street car to go on down town.

Salvaged Water Brings Award

Clarence Amones, Power House, is shown receiving the congratulations of Ralph Craig, operating engineer for his idea which brought him an award of $125.00 through the suggestion system.

Among leading suggestors during the first part of 1941 is Clarence Amones, power house, who received an award of $125.00 for his idea which resulted in the saving of water and sewage costs.

Continuous sprays of water are used in the ash pits of the power house to quench the cinders. During the past, water for this purpose came direct from the city water mains. It has been the practice at the power house to salvage the cooling water from air compressors, etc., where it is economical to do so and to return it to a "make up water" tank from which it is re-used. The water returned to this make up tank is greater than can be re-used so that the surplus overflows to the sewer. Mr. Amones conceived the idea of utilizing a large part of the water formerly overflowing into the sewer for the ash pit quenching.

A simple idea? No one else thought of it and it brought Mr. Amones an extra $125.

Slips And Chips

By Sir Vis, 4-4

We have enjoyed another beautiful week of spring. The trees, shrubbery and lawns are now on parade showing us their new clothes. They surely look grand though their clothes are the same model and design. The trees brought forth their new, delicate and tender leaves overnight like some miracle was performed. Paul Hitzeman, like the trees, shot out a few young, tender and delicate whiskers on his upper lip. I sure hope the frost doesn't nip them before they reach maturity. We would like to see what they really look like in full size and color.

After announcing the arrival of a baby girl at my house, Marie Wickleman said, "Why wasn't it a boy?" "There's a shortage of boys, you know."

John R. Heine has fulfilled all the necessary requirements for membership in the B.E.M. club. He will be formally accepted into the membership at the next regular meeting .

The fishermen are at it again. At least they are doing a lot of talking. Charles "Flash" Meyers and Carl A. Klepper are going to make Paul Hitzeman prove his story. It seems (according to Paul) that the fish are so thick in the river at Foster Park that they use the paths on the banks. Only time will tell. We hope to know more next week.

Wm. "Bill" Johnson is in the market for a pair of steel gloves. Something like those used with the 16th century Armors. Bill can't use his work shop until he obtains a pair of these gloves, especially the jointer.

Henry "Hank" Nahrwald purchased a new Old's coach. He had an Old's coupe. Either he is planning for the future, or maybe he's going in the taxi business. Enoch Woodrow Hursh, alias Lochinvar, alias Beau Brummel of Spencerville, at one time belonged to a woman's club. Is that where you acquired your appetite? We know now why you hang around the girls.

A medical journal advances the theory that "man is slightly taller in the morning than he is in the evening." We have never tested this, but we have certainly noticed a tendency to become "short" toward the end of the week.

* * *

Office Manager: "Before we can engage you, you will have to take an intelligence test."

Girl Applicant: "Intelligence test? Why, the ad said you wanted a stenographer."

Forrest Whonsettler, Bldg. 4-3, surely wins the big cookie when it comes to being absent minded. A certain young man asked him if he might ride with him into Fort Wayne the next morning to look for a job. Forrest agreed to bring him in, but when morning came, he drove off leaving the young man standing bewildered in the maze of traffic of the Avilla streets. Perhaps Forrest was engrossed in other thoughts as he was seen to drive out of town by another route.

Wm. "Beezer" Burke, Bldg. 4-3, in telling us of his days as a jockey, said that he had to quit this most pleasant vocation due to the fact that it was extremely difficult to tell who was ahead in the race, he or the horse when they rounded the final turn into the home stretch.

Motor Generator Static

Yes, indeed, old "Poison Pen" feels very humiliated. That swell birthday celebration with its gifts and good wishes has completely neutralized the "virus" that dripped from his pen—yes, has even changed it into the "milk of human kindness". In the future all his writings will be restricted to art, science, and the uplift and betterment of mankind. In keeping with this resolve, he offers for your approval three articles which may be an inspiration to some deep in woe, due to slicing in golf, having your mother-in-law come for a visit, or meditation upon the spring taxes soon due.

Article One—"Animal Diet"

Mary (Butch to her friends) Lauer, Bldg. 19-3, whose name appeared in a recent issue of the news, has a dog, which according to the story, stepped upon her, thereby cutting her lip. This phenomena is now explained by said canines diet. It seems this member of the "Canis Familiaris" family thrives upon two quarts of milk each day, fortified by gobs of bananas, oranges, lemons, grapefruit and marshmallows. Nice going we sez. . . .

Article Two—"Science to the Rescue"

K. McDaniels also of Bldg. 19-3 has been encountering some difficulty in locating his "Chevy" on the G-E parking lot. It seems he only remembers the last three numbers of his license and hereby hangs this tale.

The other day Mac was seen trying to insert his key in the lock of a "Chev" but with a definite lack of success. After several trips of inspection around the machine and other tries at the lock, he walked across the lot to another car, same make, same model, and with the same last three numbers on the license plate, which opened at the first insertion of his key. Research laboratories are now working on a car that will wig-wag its fenders upon the owner's approach. So courage, Mac.

Article Three—"Jealousy"

Yes, that green eyed monster has reared its ugly head in our midst. The tranquil existence in Bldg. 19-3 has been rudely upset. It seems that Henry Lojeck, whose name has become synonymous with fires, fire apparatus and fire drills, was cut to the quick when reports began filtering in that Elmer Wagner was seen riding down Broadway, on a city Fire Truck, one day last week. Don't let it get you, Henry, Elmer never received a beautiful leather "HERO" medal as you did; and I doubt if he ever will. He just took that ride for a thrill.

Do not be as Ogden Nash writes. in "So Penserose"

Wonder why Henry Engelbrecht of Bldg. 19-3, wears two different kinds of shoes. Is it a new style you are trying to promote or were you undecided as to where you were going? Please give us the low down as we are much interested.

Would everybody please notice Bob Barnes', Bldg. 19-3, hair cut? It is something to see. Wonder where Bob got it? He even got a sucker with it. Tightwad. . .

If you were working in Bldg. 19-3 one night last week, you would have heard a loud thump. Don't be alarmed. It was only Annabelle Haines falling off her chair. No, she didn't fall asleep. Her chair slipped as she was about to sit down, so she says.

We would suggest, that when Joe Quincy Burton, the popular inspector, Bldg. 19-3, goes to South Bend again, that he takes the old pitcher pump along, and it won't cost so much for fuel pumps. Joe says the old can just won't go to South Bend and back unless it pulls some kind of a truck on it.

Some excitement was caused in Bldg. 19-2 last week when Irma Antoine slipped and fell on the floor. Several people rushed to Bldg. 19-2 thinking there had been an earthquake. We would suggest Irma wear ice creepers in the future.

After hearing the report on the bowling trip to St. Paul, we wonder if Ted Schlup went to the bowling match or just to look at the scenery along the river.

The noise you have been hearing in Bldg. 19-1 that you thought was a dish washing machine, was Geo. Schacker using the new store teeth. We hope George has better success with his latest purchase than with the ones he had several years ago.

To Jimmie Knupp of Bldg. 19-1 goes the honor of being the first bather in Pretty Lake this season. It seems Jimmie and several friends went canoe riding last Sunday and some one saw a fish. Being such an unusual thing to happen, Jimmie decided to catch the said fish; hence the bath, as the canoe upset. No fish, just a bath for all.

HELP! HELP!! HELP!!! Will someone please be Al Hiegel's, Bldg. 19-3, little ray of sunshine. Or will somebody buy a lamp for YOOHOOTY to hold so little Al can see. It seems that he must have plenty of light and we can't figure out what it is to be used for. Why won't he put up his blinds and let the beautiful sunshine in, or haven't you seen the sun yet, Al?

Woman (in subway): "I wish that good-looking young man would get up and give me his seat."

Six men got up.

"Dear Madam," wrote the Heart Throb columnist to an inquiring parent. "You say you have been trying to keep your daughter at home by hiding her clothes. I am afraid you have not been around much. Try hiding her lipstick and nail enamel."

To Preside At Vets' Banquet

H. L. Smith, Bldg. 21, will preside at the G-E World War Veteran's banquet to be held tomorrow evening at the Moose Hall.

Appreciation

We wish to take this means of expressing our appreciation to our friends in Bldgs. 19-4 and 26-4 for their kindness and consideration—Wilma Swager and brother Nelson Swager.

(Continued on Page 6)

NEWS THROUGH THE PLANTS

Thisa And Thata 19-5

That unusually bright light shining around the inspectors wasn't the sun. No it was the ring on Betty Beirhof's third finger on her left hand. . . . Frieda Knoche was a few minutes late last Friday. Due to the change in weather she changed her coat and left her badge on the other one. Yes she went all the way home for it. . . . Best wishes for a speedy recovery to Edna Harkenrider.

Floyd Steinbacher, Bldg. 19-5, is reported to have a new racket, or should we say wreckit. At any rate we are told that the Steinbacher Auto Wrecking Company is now in operation, and that anyone having an old car to get rid of will be welcomed. Floyd only has one car now, but who knows what the next few weeks will bring forth.

Power, power, wonderful power. Ask Carl Fletcher, Wayne Gillion, Paul Deemer and Floyd Doswell, Bldg. 26-2. The only excuse the boys could find was euchre and golf.

Nora Coburn, Bldg. 26-2, sure can get around these days. Coming to work she rode in an automobile as far as church; rode a street car to the transfer corner and then transferred back to an automobile for the rest of the journey. Nora could go over in a big way as a hitchhiker.

Any information desired on vaccinations? Just ask Ed Leitz, Jr., Bldg. 26-2.

Borings From 4-4 Office

Here 'tis the Rat bringing you the oddities of the news. Here's one for the books. A rat hringing bunny news, or news of the Easter season.

Easter styles bring back to life the urge of a new wardrobe. 'Tis mighty fine after wearing the same old smelly clothes all winter. So now we'll all feel better with all our new Easter duds to chase away all signs of the dead cold winter.

Easter brought every one out in the open. Perhaps some to church, while others joined the children in the egg hunts at the different parks.

We find Mr. and Mrs. Cliff Bowman coming out of church with their small daughter Sandy. We see that they are all dressed up showing off the latest spring clothes. Also coming out of church we see Mr. and Mrs. Ife Holmes and their two daughters. All except Ife are donned in the latest accents of spring. Speaking of Ife, I saw him up town Saturday at the woman's counter trying to select a present to surprise the wifey. Whereas on the other hand I also saw Wm. Weber. But his wife was right along. Too bad, Bill, you just can't surprise your wife.

Red carnations for Art Wedler, Bob Spitler and Charlene Snyder. We just can't figure all the flowers out. Now who was the one that did the sending.

Now to get back to Easter Sunday, Jim Bentley was seen on an Easter egg hunt for children from five to nine at Foster Park early Sunday morning. Now the question is, "How old is Jim, eight or nine?"

Virginia Plummer certainly looked pretty as she was seen going home Friday in her new outfit of blue, blue and blue. You'll have to see it to get the full benefit of the dress.

Mary Hile recently failed to pay her insurance 'cause she fell up the stairs, thus falling down again. Did you ever hear of such a thing? Now she has her insurance paid for a year in advance so she won't have to fall up the stairs again. Now that Easter is over, everyone is bringing in all their left over candy and it is a mad scramble in mid-afternoon for the broken rabbits, chickens and eggs. Here's hoping we all recover all this stuffing.

Sincerely as ever,
Elmer, the Field Mouse,
(The Rat to You.)

Bldg. 4-4

They say that the early bird catches the worm, but not so with Shorty Lawson and Jack Payton who were among the first fishermen this spring. Shorty, in his anxiety to make a perfect cast, threw bait, line, and pole into about twenty feet of water, from which it was never recovered. His friend Jack, not to be outdone, neatly landed his first cast in the branches of a tree. I guess he was fishing for fox squirrels.

We noticed Tom Freeman with mismated shoes on this morning. Is this his way of proving that he has more than one pair?

Lucille Baker was standing on the elevator holding a pair of men's trousers the other day. What happened to the owner? Did he get away?

That sure was a bright tie Al Steinhauser was wearing last Saturday. At first I thought it was a stop signal.

We think Marge Thompson has the spring fever or something because she seemed to be watching the moon the other night. She came to work the next day and told the girls how beautiful it was.

From the looks of things Phyllis High must be making a collection of hair bows. Anyway she came to work the other morning wearing one rose and one blue hair bow in her hair.

We are all glad to welcome Katherine back to work after her long illness.

Mary Higgins says she is going to be an old maid. Wonder what her reason is?

Doloris Byanski didn't believe that black eyes could be gotten by running into a door, but the other night going home from work with both eyes wide open, she ran into a door.

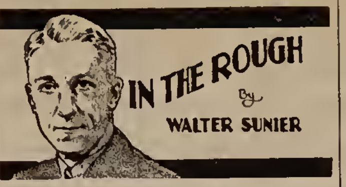
Phyllis High rated two Easter outfits. What's the big idea, Phyllis?

Wonder why Harold Amstutz is feeding Hilda Rodenbeck peanuts? Could it be that she looks hungry, or is he trying to keep her in good humor?

In the Easter parade of last Sunday, we found lots of Easter oddities. Carl Clevenger, Bldg. 4-3, sitting on a bench in the park without his coat or vest on. Eldon Mee, Bldg. 4-3, wearing a new light colored hat. Harry Parker, Bldg. 4-3, attending a dutch wedding all rigged up, and Sam Allmandinger, Bldg. 4-3, looking over places that once forest fires raged. Fleta Erickson, Bldg. 4-3, spent Easter reading for something to put in the News while Ruth Lauer and Martha Jane Clark, Bldg. 4-3, forgot to wear their Easter bonnets to church.

John Zimmerman, Bldg. 4-3, over the week end was helping his wife do some house cleaning. John perched himself upon a chair to do some aerial work when all of a sudden he slipped and fell and was impaled upon a door knob. The results, John with a decided limp, and a pair of well ventilated trousers.

It was said by Henry Marahens, Bldg. 4-6, that he never would forget his identification badge. No sir. Not with the little gadget that he wore on his wrist. But, alas, last Monday morning Henry must have been half asleep. He had to go home after his badge.



Gee, we hope you saw what the Bunny Rabbit brought us on Good Friday. We received some very nice eggs thrown by some good eggs and we received some not so nice eggs thrown by some good eggs, or should we say, yeggs. Some of the commentators should be writing this column because they are cleverer than we are. Spiker, Moffatt, Wehrs and Butler really had some clever lines. Of course, the fellows that said the nice things—Johnson, Bowman, Kellogg and Wallace—are the keen, intellectual type. No doubt we deserved comments of all kinds as we are just a wolf in cheap clothing, or maybe a louse in sheep's clothing. In any event, we are glad to have comments and we must say that they certainly touched us to the bottom of the quick. At least we are encouraged to carry on and will continue to work on into the wee small hours, travel long distances for news and study the game diligently.

Unfortunately, quicksand was encountered in laying the tile through No. 4 and No. 7 at Brookwood and completion of the work has been delayed. Also, unfortunately, there was no rain last week and it was thought that it would not be best to cut the greens as the new fertilizer would be thrown into the mower bag.

Mike Byrne, who has been an old faithful for years, has been transferred to the Philadelphia office and left last Friday. Mike will be missed greatly.

The faithful are beginning to show up. Last Saturday and Sunday we saw Schmidt, Allen, Hayes, Hamilton, Kellogg, Tobias, Beatty, Saaf, Didier, Kirke, Leegard, Skevington, Schoenherr and Link. We also saw Ed Horning, who was visiting some of his old haunts.

Table Tennis Tournament Will Open Next Tuesday

All preparations have been completed for the opening of the annual G-E Club table tennis tournament on next Tuesday evening, April 22, it is announced by T. L. Wallace, chairman. The juniors are scheduled to start play at 7 o'clock and play will be completed during the evening. Entrants under 18 years of age are in the junior class. Senior matches start at 8 o'clock on both evenings.

It is expected that the entries for all matches will total more than 100. The number interested in the tournament makes it necessary to run it for two nights even though five tables are used. On account of the large number of players, it is necessary that most of the matches be scheduled before the opening night. Therefore, Mr. Wallace asks again that all the players send their entries in at once. An entry blank will be found in this issue of the WORKS NEWS.

Balls will be furnished by the G-E Club. Players should bring their own bats. Shoes with rubber soles and rubber heels or gym shoes should be worn.

Excellent lighting and plenty of room is assured. Also, smoothness in handling the large number of matches is assured from the experience Mr. Wallace has had in managing the former tournaments.

The tournament is held for all G-E employees and members of their immediate families. Anyone is welcome to watch the matches.

Softball Players Meet This Evening

A meeting of all softball players has been scheduled for the evening at the G-E Club starting at 7:30 p.m. The purpose of the meeting will be to acquaint the players with the many rules of the game and the decisions confronting the umpire.

The meeting will be in charge of Orla Blauvelt, president of the Umpires' Association, who will answer questions. A unique feature of the meeting will be an electric recording machine which will indicate whether right or wrong answers are given. All G-E softball players are urged to attend.

Elex Bowlers To Attend Banquet

The annual Elex Club bowling banquet will be held on Monday evening, April 28, at the Y.W.C.A. The banquet will begin at 6:30 o'clock and tickets may be obtained from team captains.

Defense Production Going Into High Gear

Airport Commander Addresses Vets

Colonel Eugene Lohman, commander of the local new Army airport, was guest speaker at the annual meeting of the G-E World War Veterans' Association held last Saturday evening. Colonel Lohman is shown seated at the speakers' table with Works Manager M. E. Lord who introduced him to the assemblage.

New Motors For Machine Tools Being Built Here

Many Outstanding Features Incorporated to Meet With Rigid Requirements

A new fractional-horsepower motor, built specifically to meet the requirements of machine tools and other industrial applications where frequent start-stop service, plugging, and metal-dust atmospheres are encountered, has been introduced by the General Electric Company. The Fort Wayne Works is building the motors described and they are available in ¼-, ⅓-, ½-, and ¾-horsepower sizes for operation on three-phase and d-c systems.

Fashioned to the specifications of machine tool builders and industrial users as a result of extensive investigation, the new motor is of totally enclosed construction and has several design features to provide it with the high degree of rigidity and sturdiness demanded in machine tool operation. Its outstanding features include a sturdy cast-iron base, closely machined end-shield and stator rabbets, tough Formex wire insulation, ball bearings, a one-piece indestructible cast-

(Continued on Page 3)

Quarterly Report Shows Progress In All Phases Of Huge Undertaking

"A Report on Defense Production" is the title of the first quarterly report to stockholders signed by Philip D. Reed, chairman of the board, and Charles E. Wilson, president of the Company, and issued today. In a sweeping survey of what has been accomplished since the greatest industrial effort in the history of the United States was started, the report details what General Electric has done and is doing as its share of the national movement.

The introduction points out that last October a general outline of the extent the Company was participating in the National Defense Program was published. "That report," continues the introduction, "consisted principally of our plans for the succeeding months, for when it was written, we were in the process of solving the many personnel, plant and production problems arising as a result of the tremendous volume of defense equipment orders we had received up to that time. New designs had to be made in the case of many products, new plants had to be built, more men had to be employed and trained, the necessary raw materials had to be obtained, new tools were needed—all of these and many other steps were necessary before production could get out of low gear.

"Although we have since received orders for many additional millions of dollars worth of defense equipment, we are now able to report substantial progress in getting our pro-

(Continued on Page 2)

BULLETIN

Beginning Sunday, April 27th, the Fort Wayne and Decatur Works will operate on Eastern Standard Time.

All clocks will be set forward one hour at midnight, Saturday, April 26th, and the Plants will operate on the advanced time until midnight, Saturday, September 27th, at which time the clocks will be set back to Central Standard Time.

Pension Payments $2,647,706 In 1940

Figures Released by President Show In Excess of Two and a Half Million Is Distributed During the Past Year, $97,993 at Fort Wayne Works.

General Electric pensions paid last year to 3,491 employees retired from active service totaled $2,647,706 according to figures released this week by Charles E. Wilson, president of the Company. Throughout the eight major apparatus Works the total paid in pensions was $1,696,824 with the largest payment being made to retired employees of the Schenectady Works. Since the pension plans were established in 1912, a grand total of $28,506,609 has been paid to retired employees throughout the whole Company.

By Works the total amounts of pensions paid are as follows: Schenectady, $953,275; Lynn River, $291,364; Pittsfield, $154,107; West Lynn, $107,500; Fort Wayne, $97,993; Bloomfield, $27,102; Erie, $40,085 and Philadelphia, $25,398.

General Office payments totaled $408,506. In the District Offices the total was $219,362 and in the Lamp Department $243,494 was paid. The payment in the Appliance & Merchandise Department including the Bridgeport Works was $38,231 and in all other divisions of the Company it was $41,289.

At the beginning of 1940 there were 3410 pensioners on the rolls.

New Midwestern FM Transmitter

"Evansville on the Air, Inc., will go on the air about May 1 with new call letters, W 45 V, when it starts operation of its new 10 kw frequency modulated broadcast transmitter. A construction permit has been granted by the F.C.C. for operation on 44.5 mc.

"The transmitter will embody a General Electric Type GF-1-B, 250 watt exciter and other G-E apparatus and tubes to produce 10 kw, and will be the third G-E transmitter in service in the Midwest."

AIEE President And President-Elect Visit Here

Left to Right—R. H. Chadwick, D. C. Prince and R. W. Sorensen.

When Royal Wasson Sorensen, of Pasadena, California, president of the American Institute of Electrical Engineers arrived in Fort Wayne for an address before the local chapter of the AIEE he had an opportunity to get together with his successor D. C. Prince, of Schenectady, G-E manager of commercial engineering. The two men met Monday and are pictured above with R. H. Chadwick, assistant to the manager, of the Fort Wayne Works, in charge of engineering.

Volume 24 Friday, April 25, 1941 No. 62

• It's Only The Beginning

In the news columns of the WORKS NEWS today is the formal report of progress on the Company's huge part in the national rearmament and defense program. It is an encouraging document. It proves that General Electric men and women are awakening to the seriousness of the situation. But, it's only the beginning!

As we come to the end of the first month in the second quarter of the year, we must remind ourselves to redouble our efforts and then redouble them again. There is no speed limit on the highway to defense. There are no laurels to rest upon, for the victory won today, must be re-won a thousand times tomorrow and all the tomorrows.

Let us not kid ourselves. This defense business is the most serious business we have ever taken up. Upon the successful completion of our part of the job may depend the success or failure of future national movements. We . . . every single one of us are in this production battle. It must be won!

Remember the old adage "for the want of a nail the shoe was lost: for want of a shoe the horse was lost and for want of a horse the rider was lost." Let us remember this well and mark also again. . . . It's only the beginning!

• The Right Spirit

Friendliness is to cooperation on the job what oil is to the bearing of a machine. It prevents friction and enables people to work together smoothly and efficiently.

It is the cheerful answer, the helping hand that go a long way to make a hard job more agreeable. And it seems most of us get such jobs once in a while.

When a thing costs so little yet does so much good, it would seem we should be generous with our friendliness!

• Industry . . . .

If you were suddenly asked to change all your habits overnight, and develop all the attributes and the skills of some other person, it would probably strike you as a highly difficult task.

But that's what has happened to a large number of American companies as a result of the defense program. More important, they've succeeded in accomplishing the job set for them—and doing it in truly astonishing fashion!

This is the situation: When the defense program got under way, American industry was not equipped to make weapons for defense. It had been devoting itself practically exclusively to the manufacture of products to raise the peacetime standard of living. As a result, under the pressure of our new national needs, many companies were faced with the sudden and novel task of changing over rapidly to the making of entirely new kinds of goods.

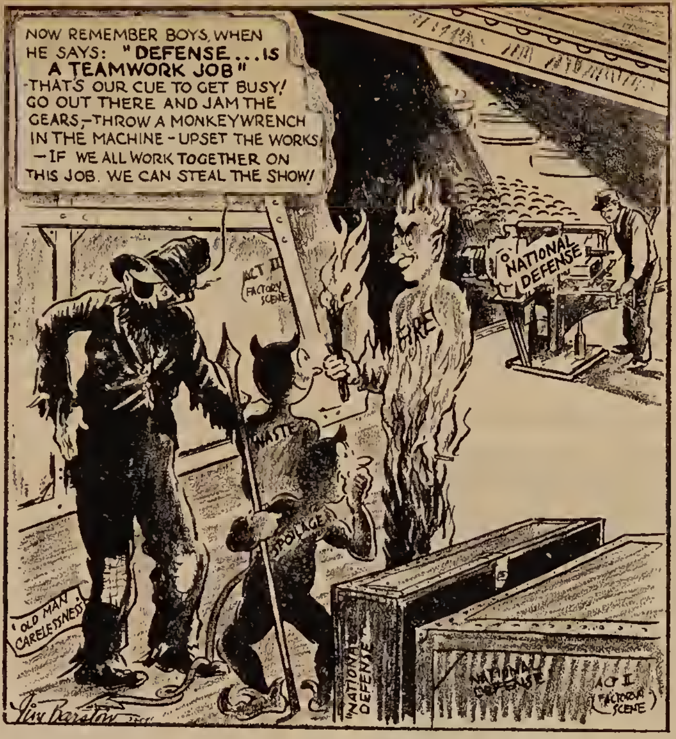
The way in which the change over was effected will stand as one of the truly remarkable stories of our times.

In a flash, wooden "taps" for shells suddenly started coming from a plant that had been making wooden spindles; makers of sewing machines turned to the production of pistols; a maker of lingerie began weaving mosquito netting; a linoleum factory went into production on making shells; a typewriter factory, machine guns; a tobacco machinery plant, diesel engines; a lipstick maker, shell casings; and a lawn mower company, fuses. All over the country, changes like these are being made with a minimum of fuss and feathers.

Industry has proved two things in these myriad cases. First, it has shown the adaptability and the ingenuity of free men using their own intelligence. Second, it has shown its very real patriotism in forgetting about the "easy way" and doing what is best for the national security.

Both demonstrations do the heart good.

THE VILLAINS



NOW REMEMBER BOYS, WHEN HE SAYS: "DEFENSE . . . IS A TEAMWORK JOB" -THAT'S OUR CUE TO GET BUSY! GO OUT THERE AND JAM THE GEARS,-THROW A MONKEYWRENCH IN THE MACHINE - UPSET THE WORKS! —IF WE ALL WORK TOGETHER ON THIS JOB, WE CAN STEAL THE SHOW!

Quarterly Report

(Continued from Page 2)

duction into high gear. We have moved from the blueprint and tooling-up stage into one where much of the equipment so urgently needed is coming off the production lines in steadily increasing quantities.

Power for Ships

"General Electric's biggest and most important job for defense involves building the units which drive the navy's fighting ships and the vessels of our expanding Merchant Marine. These propulsion units make up the powerhouse—the vital organs—of a modern ship. Years of scientific achievement, engineering genius, and manufacturing skill are built into every unit. General Electric pioneered the developments which have resulted in today's compact, efficient ship propulsion turbines, and, although they are relatively small in size, they furnish enough power to light a city.

"The tremendous speeds at which the turbines operate are reduced to propeller shaft speeds by means of reduction gears, also made by General Electric. The latter are huge units measuring up to 18 feet in diameter, and weighing as much as 70,000 pounds, but which must be machined to tolerances of one ten thousandth of an inch.

"Even the smallest naval vessels utilizing this type of propulsion equipment require two turbines and two sets of reduction gears. In addition, auxiliary turbines are needed for generating the electricity used by power equipment and by control devices, as well as for light and communication. General Electric is making these auxiliary turbines, and other electrical equipment for ships, in large quantities.

"Although our facilities for manufacturing all such items had to be multiplied several times, this important and complicated equipment is currently being produced on schedule and it is anticipated that as fast as the hulls of the ships are completed, our products will be ready for installation in them.

Superchargers

"Another vitally important defense product is the supercharger for aircraft. In the development of turbo-superchargers General Electric was again a pioneer. Like an automobile motor, an airplane engine derives its power from an explosion of a mixture of gasoline and air. Superchargers compress the air as it is drawn into the engine, thus increasing the power of the explosion. This function becomes increasingly important at higher altitudes where the air becomes thinner, and the advantage of higher altitudes to combat planes emphasizes the need for more and more efficient superchargers. Turbo-superchargers are driven by the exhaust gases from airplane engines, and some idea of the engineering and manufacturing problems which must be faced in producing them may be obtained when it is realized that they must operate at tremendously high speeds and at temperatures which would melt ordinary metals.

"We are being called upon to produce these devices not by the hundreds, but by the thousands. We are also turning out impellers—superchargers geared directly to, and driven by, the engine of the plane—by the thousands. Only by doubling our output during the past several months have we been able to keep close to production requirements for these products. As for the future, we are confident that we can meet the steadily increasing needs of the aviation industry.

"Because of our experience in building similar equipment, we have also been asked to produce other aeronautical accessories, such as generators, propeller motors, and a variety of delicate aviation instruments. The successful operation of modern fighting aircraft requires extreme accuracy and efficiency of these accessories, and we have fully utilized our vast research facilities in improving and perfecting them.

Armament and Ordnance Control

"Firing a big gun is not today simply a matter of getting the range and direction and pulling the lanyard. Such factors as wind direction and velocity, temperature, atmospheric density, state of tide, and even the rotation of the earth, must be taken into account. More than twenty different operations are now performed in bringing a big gun to bear on its target, and throughout the process electricity plays an important part. General Electric is producing the motors and control and the calculating devices which make possible the fast and accurate firing of modern ordnance, and this work is proceeding according to, or ahead of, schedule.

"In addition to fire-control apparatus, we have also been asked to turn our facilities to the manufacture of gun mounts and howitzers—items outside our ordinary manufacturing experience. In view of this circumstance, the speed with which we solved production problems and started delivering such items is particularly gratifying. Our deliveries of these products are ahead of schedule and at the current rate of production we will continue to gain on the schedule.

Searchlights

"We are making hundreds of searchlights for the Army and Navy. Each army unit, which is of 800,000,000 candlepower, is accompanied by its own portable power plant, for in the field it must have an independent power supply not only to feed its sunbright core but also to raise and lower the light and to direct its beam.

"Although designs have been frequently changed to incorporate the latest improvements, production is increasing rapidly and should soon reach scheduled requirements.

Radio

"Effective co-ordination of land, sea, and air forces at modern speeds is made possible by radio. We are

Bldgs. 17-2 And 17-4 Card Party And Dance

The employees of Bldgs. 17-2 and 17-4 will have a card party and dance at Veterans of Foreign Wars home on West Main street this evening. Pete Dannecker's orchestra will provide music for the dance.

Employees of the two floors who have not as yet obtained their tickets may do so at the door.

Elex Twenty-Fifth Anniversary Observance Proves Huge Success

With hundreds of employees, club members and friends in attendance the Elex Silver Tea held last Sunday at the Y.W.C.A. in commemoration of the organization's twenty-fifth anniversary proved an outstanding success. It is impossible by either word or picture to portray the beautiful appointments and the gracious reception of guests by those in charge. Pictures on pages 4 and 5 of this issue will give some conception, however, of the affair.

Elex Club Rummage Sale On Saturday

The Elex Club will hold a rummage sale tomorrow starting at 8:30 a. m. in the building at the northeast corner of Calhoun and Brackenridge Streets. Anyone having material for this sale is asked to call Irene Meyers or bring it to the sale quarters Saturday morning.

Two Employees Join Ranks Of Quarter Century Club

CATHERINE WISE

ELLA J. GROTE

Two women employees completed twenty-five years of service this week and became members of the Fort Wayne Works branch of the Quarter Century Club. They are Ella J. Grote, Winter Street, and Catherine Wise, Bldg. 19-4. In observance of the span of a quarter of century of service with the Fort Wayne Works fellow employees presented Miss Grote with a bouquet and Miss Wise with an anniversary cake.

Quarterly Report

(Continued from Page 2)

making large quantities of radio transmitting and receiving equipment for all three branches of services. Since we had made this type of equipment for many years, the increased demands upon us presented no unusual engineering problems, but it was necessary to provide for a tremendous expansion of our manufacturing facilities. By careful planning and by pretraining of men, we were able to put into immediate operation a large new factory which was constructed in 57 days, and our production of radio transmitting and receiving apparatus is right on schedule.

Other Products

"Among the many other products of our skill which are needed to make this 'Arsenal of Democracy' strong and secure, are motors, control, switchgear, wire and cable, etc. The manufacturers of tanks, planes, guns, and ships, and the producers of steel, aluminum, and machine tools with which to make them, depend upon the entire electrical industry to meet the increasing demands for all such equipment, and General Electric is doing its part in producing the products as they are needed.

Research

"Much of the more intricate and highly technical defense equipment we have now been called upon to produce in such great quantities, was conceived and developed in the past by the men of science in our Research Laboratory. Today the full resources of that Laboratory, and the experience and talent of its staff, are being utilized to solve newer problems, and that effort may well give birth to ideas which will shape the course of things to come.

New Building Program

"A substantial expansion of our plant facilities was necessary in order to handle the great volume of defense orders we have received. We did not wait for the signing of defense contracts before beginning the construction of new factories, but went right ahead with the necessary program as soon as possible. So far this expansion program has called for an investment of well over 50 millions of dollars. Some factory buildings are already completed, and fourteen new buildings and additions are under construction and will be completed this year.

Personnel

"The substantial expansion of our plant facilities would not have increased our capacity in the least had we not been able to provide the personnel to operate it. In training personnel we have also looked ahead. Wherever a new factory is being built, workers are being trained to man the machines which it will house. Last year 18,600 new employees were added to the payroll of the Company, most of them going directly into defense work or into training for defense work. So far this year we have been adding more than a thousand employees each week. Perhaps it will help you to visualize the magnitude of this training job if you realize that more than 500 foremen are now supervising defense work alone in our factories.

"Of course, our regular apprentice and other training courses have been greatly enlarged. In addition, each of our plants is giving short, intensive courses of training to new employees on specific single operations. The plan has the advantage of speed, and is producing excellent resultst. The need for draftsmen and mechanics has been particularly acute, and while this problem has been a serious one, so far it has not delayed defense production in our shops.

"In the final analysis, the success of our whole program depends upon the men and women in the factories, in the laboratories, and in the offices of the Company. Never, in any industry, has there been better co-operation and teamwork than has been evident in your Company during this critical period.

Eliminating Bottlenecks

"The following illustrates how, through co-operation and ingenuity, one of our potential bottlenecks was eliminated. In our Erie, Pennsylvania, plant, additional facilities were being set up for the manufacture of turbines and for gun mounts. New machine tools were needed before work could get under way on the turbines, but the manufacturer was unable to promise delivery of these tools before next October.

"In attempting to widen this particular bottleneck, the tool manufacturer and our engineers found that certain manufacturing operations on some of the parts for the necessary machine tools could be performed in our gun mount division, and thus help to shorten the delivery schedule. The tool company called out of retirement a 75-year-old pensioner, who was an expert in this particular field, and under his supervision the needed parts are now being machined in our own plant. As the parts are completed, they are shipped out for assembly by the tool manufacturer, and the completed tools are then returned for installation in our new turbine division. The whole process has resulted in advancing the delivery date for the first of the necessary tools from October to June, and we will thus be able to start our production more than three months sooner.

"We have also been successful in eliminating other bottlenecks in our own plants by subletting operations to skilled shops which are equipped to handle the work. In several cases we have contracted for the full 24-hour day output of shops whose facilities were available. This constant search for additional facilities is the major concern of one of our committees.

"This, then, is a summary of how General Electric stands with respect to defense production. From experience gained to date, we believe that your Company has the ability, the energy, and the determination to handle successfully and expeditiously, the great demands which have been made on it.

Pension Payments

(Continued from Page 1)

During the year 306 were added while 225 died, making a net total of 3491 as of December 31, 1940. The average age of the group was 69.6 years with average continuous service to date of retirement of 29.4 years with an average annual pension of $758.

New Motors

(Continued from Page 1)

aluminum rotor, and firmly anchored windings.

The motor's totally enclosed construction protects it against the harmful effects of abrasive metal dust, chips, cutting compounds, and other foreign materials. A convenient conduit box built into the totally enclosed endshield contributes to the motor's compactness and pleasing appearance in harmony with modern tool design.

The stator is especially designed to withstand the stresses of starts and stops as well as plugging and momentary overloads. Formex, G-E's new heat- and solvent-resistant magnet wire, is used for the windings which are wedged in the stator slots and firmly anchored. Both stator and end-shield rabbets are machined to close tolerances, providing concentricity between the rotor and the stator, so that a uniform air gap is maintained.

Because of the thrust encountered on the majority of machine-tool applications, ball-bearing assemblies are used in the new motors. This type of bearing construction allows the mounting of the motors with the shaft at any angle to the horizontal, and the stator can be rotated to any desired position. End-mounted motors can be mounted vertically as well as horizontally and may be obtained for flange, flat-face, or rabbet-machine mounting.

As protection against the vibrations encountered in machine-tool, as well as other applications, base-mounted motors are furnished with a sturdy, malleable, cast-iron base, solidly bolted to the stator. The mounting dimensions of this base are similar to those for motors of comparable frame size which have been furnished previously for machine-tool service.

Dr. Onderdonk Famed Lecturer At G-E Club Tonight

G-E Club members and members of their families will be privileged to hear Dr. Francis S. Onderdonk, author, world traveler, educator and famous lecturer on international affairs give a talk tonight at the G-E Club on "America's Role In The World Crisis". The talk will begin at 7:30 and will be free to all persons holding G-E Club membership cards.

A member of the Sons of the American Revolution, the Society of Friends (Quakers), the Detroit Philosophical society, and the International Lyceum Association, Dr. Onderdonk comes of noted old Holland Stock. Dr. Adrian Van Der Donck, author of the "History of the New Netherlands" and creator of the first map of New Amsterdam, is believed to have been the original ancestor of the Onderdonk family in America which furnished two bishops of the Episcopal church. Dr. Onderdonk's grandmother sprang from the same Huguenot family of which George B. Cortelyou, secretary of the Navy under President Theodore Roosevelt, was a descendant.

Though born in New York, young Francis Onderdonk went to live in Austria when he was ten years old, due to the second marriage of his mother to the attorney of Johann Strauss. Later the young American studied architecture at the Imperial and Royal Technical Institute in Vienna, receiving the degree of Doctor of Technical Sciences there in 1919. Besides his arduous studies during his University career, he engaged in public service and during the World War directed the distribution of 126,000 copies of the Gospels printed in the eight languages spoken in the Austro-Hungarian armies.

"Those who hear him may well count on an interesting experience, for he represents the rare combination of a very real American who had all his education in Europe as well as spending 20 years in that charming Central Europe which has now been turned into the desert, "Moralinsania" it is said by persons who have heard Dr. Onderdonk speak elsewhere.

KINDLING AVAILABLE

A supply of kindling is again available for employees. Orders may be placed with the personnel Office in Bldg. 21. No charge is made for the kindling but a handling charge of $1.00 for a full load and 50 cents for a half load must be paid at the time the order is placed.

ELEX BOARD MEETS

The Elex Club board meeting will be held next Wednesday evening, April 30, at the Y.W.C.A. starting at 7:30 o'clock. Members who are unable to attend are asked to notify Eva Lynn or Irene Meyers.

NEWS THROUGH THE PLANTS

From the feminine VIEWPOINT

by Irene Perry and Hilda Barthold

Visiting the sick is a duty, and it should be a pleasure, too—a pleasure especially to the person who is ill. Whether our visits are pleasant interludes during a long illness or a stay in the hospital, or merely another pain to endure depends largely on our bedside manner.

It's better to make several short calls than one long drawn-out visit, remember that one who is ill tires easily. We here call attention to the fact that a person who has just had an operation prefers to talk about their experience rather than listen to a detailed account of the operation you had two years ago. Above all, don't entertain your sick friend with a cheery little story about "the lady next door" who died from the same illness from which your friend now suffers. We have known people who were just that tactless.

Sit where the patient can see you easily, don't stand over the bed and force him to look up, and speak naturally. Be careful about jarring the bed, an obvious thing to avoid, yet many people are careless about it.

Flowers and fruit are usually welcome gifts, but it is better to bring them in small quantities several times than one huge basket of fruit which may spoil before the patient can possibly eat it. A small bouquet in a pretty vase may bring more pleasure than a dozen American Beauties that may have to be put into a commonplace container and set in an obscure corner of the room.

Many convalescents can use writing paper, or postcards and here again we suggest small packets of different colors and types rather than one large box. A scrapbook made up of subject matter in which the patient is interested makes a simple, pleasing gift.

We, the girls of Bldg. 4-3, wish to congratulate Alma Ladig on her will power of laying off Pepsi Cola.

Alma Kurtz, Bldg. 4-3, keeping the hand winders in good spirits by her good natured giggling eight hours per day. Her motto is, "Laugh and the world laughs with you."

Edna Crow, Bldg. 4-3, forgetting her badge, had to return home for it. Edna laughed and laughed because she knew she needed the exercise.

Mary Baumgardner, Bldg. 4-3, Wanted. Some one to sit on her turkey eggs.

Complete Apprentice Courses

Top row, left to right—Lester Shroyer, Earl Hoff and Donald Welbaum. Below, William J. Willig and Carl E. Swaim.

Five young men have completed courses in the G-E Apprentice School of the Fort Wayne Works. They are Donald D. Welbaum, a graduate of Ossian High School, Carl E. Swaim, also a graduate of Ossian High School and Earl Hoff, a graduate of North Side High, completed the machinist-toolmaker course.

William J. Willig, a graduate of North Side High, and Lester Shroyer, a graduate of Elmhurst High, completed the draftsman course.

Bldg. 4-4

Betty Notestine sure likes graham muffins with plenty of (cow) butter on them. We think Betty will get a cow that gives butter.

Bill LaVine likes to work days just fine. We think he will until his wife gets her house cleaning all done.

Maxine did not come in to work last Monday. From what we hear, she was nurse maid for their new family of kittens.

We wonder if Helen Wilson was thinking she was working nights this week. At any rate she didn't get in until noon.

We hope the former Doris Haiflich doesn't forget she has a husband as easily as she forgot her wedding ring last Monday.

Lowell Arnold better get unbreakable glasses if he is going to try new stunts, or were the kids to blame.

Daughter: "What is alimony, Mother?"

Mother: "It's a married man's cash-surrender value, dear."

Borings From 4-4 Office

Just don't know what to prepare for spring, winter, or summer, but the weather changes whether anything else does or not. . . . Betty Mougin is now spring cleaning. Cleaning out the files and all the replacements. Methinks the people in Bldg. 4-6 are not liking her very much. My suggestion would be to clean all the files. . . . Jean Bugert came to work last Tuesday all dressed up in her spring outfit. I guess the occasion was her birthday. . . . Lillian Magner's mother cat was blessed with six baby kittens. If anyone wants a good cat, just call 206 and Lillian will gladly fill your order. . . . Ardeth Hemp (former G.E. coed) will arrive in Fort Wayne Friday to paint the town red, white and blue. This is her first home-coming since she left February 19th. . . . Charlene Snyder will celebrate her first wedding anniversary April 26th. . . . The other day I was rushing in the gate and stumbled over a dead rat in the yard. Can you imagine one rat being afraid of another rat, and if the other rat was dead? 'Tis news, I'll let you know. (Perhaps I should say I was petrified and the other was dead.) 'Till next week, I remain, sincerely as ever,

Elmer, the Field Mouse.

Elmer "Sneezy" Harshman, Bldg. 4-3, was observed last Saturday afternoon scanning the poultry in the market place, but the price per pound was too much to suit him. He had just about decided to drive out into the country and run down a couple of chickens when he happened upon an elderly lady who was having a closing out sale. She offered Elmer two chickens at a price well within the limits of his purse. So ended his quest for feathery food.

Josephine Faulkner, Bldg. 4-3, has us wondering since spring has arrived, just who her tenderest thoughts might be dwelling upon. Has anyone ever heard of "Baby Dumpling"?

SANDY SAYS

Once upon a time—but I can't start that way, because this is not a fairy story. It goes something like this. A young lady, her mother and her sister were driving home from a forced trip when all of a sudden they discovered that they had forgotten a hat and some music. Well, they were poor, and 50 miles back meant a lot of precious gasoline. (Cousin Colin would agree on that, even if he isn't poor.) But they must have the hat and the music, so they decided to expend the gasoline.

To make a long story short, the young lady, when she was getting the forgotten articles, ran into a couple of talent-scouts, and in a short while landed in the movies.

Now this is a true story—it really happened—and I believe the young lady's name starts with Judy.

Her bad luck turned out to be good luck after all. This time it was a sheep wearing a wolf's fur coat. Or, good luck in false whiskers and big black hat, in other words, a blessing in disguise.

Lots of things around here turn out like that. You could mention several in your own department, I'll bet. A lot more will show up in the next year or two. One good place to look for them is in the shortage of some kinds of material. This always throws us into a panic—for a while, but someone always finds a way around it. The result usually turns out better than the original.

WILL THAT SOMEBODY BE YOU? Well, if not, why not, and if so, why not!

Of course, all bad luck isn't "blessings in disguise." It can be just plain, bad luck, BUT half the time, ye can make it turn out to be a blessing, if ye get busy.

When the crowd of bad luck demons comes your way, don't do like my cousin Colin did the last time we saw a CROWD of Hula dancers in grass skirts. All day long he hung around the OUTSKIRTS of the CROWD.

Now that spring is here, the old automobile feud between Frank Kimble, Bldg. 4-3, and Clarence Hatfield, Bldg. 4-3, like the spring flowers, has blossomed forth in full bloom again. Frank said that if Hatty would get himself a real auto, he would not be all stoved up and his teeth would not be loose after a trip. Hatty retaliated with, Frank never rides in his own car enough to loosen up his teeth, and that one of these days Frank will get his car all cleaned up and take his annual trip to Ligonier and back, and that is that.

Thisa And Thata 19-5

Mildred Werling and Elinor Gligor reverted back to the days of their childhood at a recent party. Mildred was quite the sensation with her short dress and red hair-ribbons adorning her pigtails, and Elinor won first prize for the most juvenile looking miss . . . Can you imagine Arnold or Bill without their chew? We can't. . . . After all my preaching about forgetting badges, I forgot mine. . . . Wonder what people thought when they say little Florence Minnich parading around in Leona Busche's raincoat the other day. Florence could have accommodated at least another girl. But she did not get wet.

Glayds Truby must have been in a daze for it is reported she came to work wearing her pajama tops. Who knows it may be a new style.

Hazel Whitby, inspector in Bldg. 19-4, is one of our new brides. Best wishes.

Fred Zehendner, Bldg. 12-B, is so busy with his spring gardening these days that he wears his house slippers to work so that he doesn't have to waste time changing from shoes to slippers when he gets home at night. Nice planning, Fred, shows your General Electric training!

What's this we hear about Red Noyes, Bldg. 12-B, attending pink teas now! What's happening to all our red-blooded he-men, anyhow? Say it ain't so, Red, say it ain't so.

We know of one member of the fair sex who wasn't so well pleased with the wonderful "parade" weather we were blessed with on Easter Sunday! In fact we'll bet she didn't get much enjoyment out of her spring outfit, worrying about that dollar she owed to a certain canny gentleman in Bldg. 12-B, thanks to the uncooperative weather man. After this, if you must bet on anything as uncertain as the weather, Marj, confine your betting to nickle candy bars and you won't feel so bad when you lose!

What kind of a colony are the X. girls cooking up? Ask Francis Allen what it is if you are interested in fresh air.

Was it spring fever or just forgetfulness that made Howard Oplinger, Bldg. 12-B, leave his badge on the inspector's table Friday night? At any rate it is reported he cut a very pathetic figure as he waited at the gate while a pal went after his badge so that Howard could get in.

Elsie Brown, Bldg. 26-2, is reported to be sporting a beautiful diamond.

Someone has suggested to Dorothy Funk, Bldg. 26-2, that if she is really interested in broad shoulders, she take a look at Superman or Tarzan.

Margaret Frehill, Bldg. 26-2 got plenty of her favorite color combination of red and yellow. She spilled a can of yellow paint all over her red dress.

Goldie "Ruffy" Mentzer, Bldg. 26-2, was initiated into the national euchre skunk club last Sunday. Cheer up Goldie, we know lots of nice people that belong.

NOTICE TO EMPLOYEES

Starting May 5, 1941, the pedestrian entrance and exit at Union Street will be closed. Employees usually using this entrance in coming to and going from work are asked to use the Wall Street-College Avenue gate or the Broadway gate.

F. G. DURYEE,

Motor Generator Static

They say that however long it may be delayed—justice will, in the long run prevail. Poison Pen's associates in Bldg. 19-3 have often thought that as time went on and his stories continued to grace the columns of this paper that perhaps here was an exception to the rule of justice. However, April 18th will go down in Bldg. 19-3 office history as the day when even Poison Pen was hoisted before his fellowmen in a position as uncomfortable as any which he had previously so carefully and poisonously narrated for his reading public.

Shortly after the resumption of labor on the afternoon in question the telephone in Bldg. 19-3 began ringing with a request that Don Shultz proceed to the parking lot and make the horns on his car desist their fearful din which was making it impossible for the neighbors to tell when the trains were passing on the nearby Pennsylvania tracks—in fact some claimed that they could not even listen to their favorite radio programs. Don being in Bldg. 27 was not to be located at once so the phone calls continued to pile up. Finally after Don emerged from the elevator our hero was informed of the fact that less music (two toned) from his car horns would be appreciated. Don, however, having been the author of countless practical jokes upon his fellow workers, for several minutes would not believe he wasn't being ribbed a bit in turn. Finally, however, he was persuaded that he was really wanted and proceeded to the parking lot at last restoring tranquility to an upset neighborhood.

Forever hence he is to be known as "Tooter Shultz."

Walt New President Of Veterans' Club

Wm. Walt, Bldg. 4-B, was elected president of the G-E World War Veterans Association at the annual meeting held last Saturday evening at the Moose Hall. He succeeds Herschel Smith. Other officers elected were Andy Lee, Bldg. 4-5, vice-president; Ed Witte, Bldg. 18-1, secretary-treasurer and Wm. Smith, sergeant-at-arms.

M.B.A. PATIENTS

Motor Dept.—Martin Blakley, 1620 California Ave; Marian Stuckey, Leo, Ind.; Emeric Renbarger, 807 W. Berry St.; Bertha McLaughlin, 2879 Bowser Ave.; Alma Geary, 1524 Sherman St.; Walter Buskirk, 2118 Oliver St.; Rita Butts, 2609 Gay St.

Transformer Dept.—Betty Fleming, St. Joseph Hospital; Donna Roe, Lutheran Hospital; Robert Happel, R. R. No. 3, City; Joe Houser, 301 W. Leith St.; Waide McCutchen, 1224 Oak St.; Naomi Newhard, 912 Savilla Ave.; Verla Walfe, 804 Huestis Ave.

Series and Specialty Dept.—Edna Hergenrader, 339 Brandriff St.; Helen Rehrer, 3518 Smith St.

Winter St.—Glen Macy, 2837 Lawrence Ave.; Orville Tracey, 1441 Huestis Ave.

Left the Hospital—Eleanor Paetz, Clifford Schwartz, Carl Rietdorf Riley Mannard, Joe Houser.

Return to work: Irene Forest, Emma Bradford, Carl Moser, Virginia Shivley, Arnold Berning, Elsa Frede, Jan Hahn, Pauline Baumgartner, Gretchen Webb, Hilda Hecker, Emily Brouwer, Grace Montes, Harold Barbour, Dewald Slater, Bernice Stocklman.

Slips And Chips

By Sir Vis. 4-4

After a two hour search with a small set of grappling hooks, Shorty Lawson recovered his fishing pole. Shorty has now added them to his fishing tackle. . . . "Seven thousand million people" exclaimed Don Niles, when he endeavored to tell us how many people were through the Hall of Science at the Chicago World's Fair. . . . While Ralph Hardy was leisurely driving on Clinton Street a squad car pulled up along the side. Yes, sir, they had a special delivery (and I do mean Special) card. This card requested Ralph to have an audition on the radio.

Have you any old vacuum cleaners that you need repaired? See Earl (Red) Rarick for details. He is giving a new bag with every repair job this week.

Have you seen anyone resembling the bicycle bandit that Walter Hazelet is trying to catch. Walter chased him for miles but the bandit just speeded away with the loot. (His girl friend's purse.) And was his face red the next day.

Is Zat So?

We have a suggestion that fences be erected etc., so that a lion's den can be made out of the park to give Tony Federspiel a place to sell his dogfish. . . . We have an official statement from Buck Adams, Bldg. 4-3 and Don Thomas, Bldg. 17-4, that a new all time record for bluegills has been establishedat Beaverdam Lake. Maybe they are right. The catch amounted to twenty pounds and eight ounces. . . . Square table discussion, all subjects included. Time 12:15 to 12:55 every day except Sunday. Station VIC. . . . The boys in Bldg. 17-1 were all a-flutter the other day thinking that a new girl had taken employment in our department, but upon investigation we found that it was only Harry Kessler sporting a ladies' apron. We still don't know whether Harry was trying to imitate a butcher, bartender or dentist or whether it was just a habit. . . . Yes, spring is here all right judging from the way Ed Brosche and Garland Hewitt are seen each morning talking it over. . . . We understand that Ed Huhn had quite a time with his new car.

The Bldg. 18-B gang is gradually getting back into its stride after spending an evening celebrating the announcement of Kenneth Petgen that he had been married to Helen Wight, lo, these many weeks. Kenneth put it over on the boys but made it alright by producing a bang-up party.

Shorts From 6-B

Wilma Cress has door trouble. First she locks the one on her car with the keys inside, and then she closed her eye on an open one—or did she.

Famous words by William Frances Walt, "See."

Leo Heersche did a beautiful spraying job on a housekeeping sign. He didn't know it was to be hung in his own bailiwick.

Clair Coen, one of the transfer men in Bldg. 6-B, received a sudden call from Uncle Sam. He left for Washington, D. C. last Wednesday. A card from him to the gang reassures us that he has everything under control. Best of luck, Clair.

Nick Kramer, genial conveyor attendant in Bldg. 6-B, has faced the perils of the scrap conveyor and explored the wilds of the Lazy-jack, but it took a tame platform to make him cry "Uncle." See Mr. Walt next time, Nick. Bill says it's all a mental condition. ,

Robert Moore, the inventory clerk, is in Martinsville on the sick list. We understand he'll be back before long. Best wishes, Bob.

Mary Ogg is recuperating at the hospital in Bluffton. We wish her a speedy recovery.

Anyone having $5,000 they wish to invest should see Marcel Gaut, Bldg. 4-3. He has invented a combination can opener and fountain pen that he will sell to the right person.

Alva Biggs, Bldg. 4-3, our super flange chaser upper, is right in there battling this spring. He is doing a big paint job on the interior of his home. We hope that the baby has been spared a shower of paint. Alva also has a new Katy-did green car and a new dachsund dog that follows him all around.

A big construction program is now on in full blast at Art Brandenburger's place at Big Long Lake. When asked what was going on, he explained to us that he was going to raise pigs there this summer. He is building many pens, an enclosed runway down to the lake, also a ramp up to the porch, so that the pigs can get in out of the sun. This arrangement will enable Art to sit on his porch and feed said hogs with a minimum amount of effort. The name of the place will be "Art's Hoggerie." His official slogan will be "Fresh pork on or off the hoof."

Lost

Eight kodak pictures, also negatives, in Masterson's envelope. Finder please notify Lorene Leiter, Bldg. 4-3.

NEWS THROUGH THE PLANTS

News On The Nose From 4-5

Spring—conscription—rush work love — more work — going to dances and silver teas — overtime work—ah well, 'tis life at the G.E. and we're all for it. . . . Carl Beyerlein came to work with his hair standing on end and we do mean literally. His story has it that he washed the crowning glory without putting the usual gaa plaster on it. The result is a fringe of cox-comb that's truly new in 1941 hair styles. . . . The Bennetts, Bob and Rosemary, are in a real Dagwood daze these last few hectic weeks. They welcomed the first Bennett heir at the same time the young Bumsteads made history with their newest addition. . . . Can anyone have missed the dazzling sunburn Ed Stauffer is proudly suffering these days? Eddie plays nine holes of golf each day to build that mighty physique. . . . Bud Neu recently acquired a brakeless Ford of ancient vintage. When he wants to stop the jalopy, his kid brother climbs out on the fender and drops a brick in front of the wheel. Crude, but effective, eh wat? . . . The Bldg. 4-5 time study department is getting to the desperate stage. They contemplate calling in the smoke ordinance officials to investigate the cloud of smoke that has invaded the office after the close of Lent had permitted Maury Reed to go back to his pipe with added vigor. . . . Andy Lee is about ready to demand a secretary and private office. He feels so important since he received a special invitation to the Elex Club Silver Tea. . . . Jim McGill also vowed not to give up the chance to mingle with society at the big "doins." . . . Cleopatra has come back to glorify the room and dazzle all eyes in Bldg. 4-5. Helen Rumbaugh did a new job on her hair by cutting some bangs Cleo style. If she can stand the gaff until the bangs grow out, we salute her, but the fellows are doing a thorough job of "putting her on." . . . Maurice Petgen feels mighty put out. He didn't know until this April that he has had a daughter-in-law since last October. . . . The girls all wonder when Ruth Walda will start wearing the same hat twice. We've been here five months and have yet to see her wear the same one twice, and yet some men say that all wom n's hats look alike. . . . Ah, how sweet is young love, especially when it travels clear down to Fort Knox, Kentucky, to see the object of its affections, which is where Theresa Rumbaugh spent a glorious day Sunday. . . . Plaint of a lovely young lady at home alone on Sunday afternoon: "What would you do with a boy friend who doesn't come over to see you or even call you up on Sunday afternoon?" Our advice would be to go out with one of the others who keep calling you.

Sure sign of Spring. The "Boys and Girls" in Bldg. 6-B office no longer spend hours looking over the pictures Frank Graffe sent from Florida.

The boys in Bldg. 26-5 are trying to figure out just what Cary Baker is trying to do with all the road maps he has been looking over lately. They don't know if he is figuring on taking a trip, collecting maps, or just looking for the shortest trail to the Indian reservation of North Side.

Nellie Williams, Bldg. 4-3, went sleep walking one night last week, and walked into the living room. She came upon her sister and boy friend and scared the poor boy so badly he hasn't been back since. Spooks, Beware!

26-5 Tool Bits

Jack Schemehorn has the best place for night crawlers. 'Tis said that Jack states all he has to do when he wants to go fishing is to go out into the back yard with a quart can and scoop them up. One scoop brings enough worms to last several expeditions. . . . Well, well, we understand congratulations are in order for Glenn Reynolds. . . . Times sure have changed. The gang used to call Jack Ebert "Boat Anchor" but his new monicker is "Rough House" given him by a certain apprentice. . . . Anyone seeing a suede jacket and cap whizzing out of the door at noon, need think nothing of it. It's just Clem Hugenard on his way to check up on the carpenters who are building his new home. Party time pretty soon we betcha. . . . That reminds us. John Roemer has a new home. Bet the lathe men will enjoy it as soon as somebody figures out who is going to round up the refreshments. . . . No. Frank Hoffman was not leaving for a fishing trip in the real sense of the word. It was a matter of badge fishing. . . . Does Carl Ahlersmeyer look like Gable with his mustache or is it more on the dictator side. Walt Greiner had Vera Beam investigate with a magnifying glass, but no decision has been forthcoming as yet. . . . Frank Prezbindowski is all down in the dumps because he can't get up in the air. It is reported that he has tried everything even to the extent of buying Wing cigarettes for a dime and selling them for a nickel so that he can confiscate the coupon. 'Tis of no avail, however, for despite his glowing essays the company has failed to give him that plane. Mebbe the essays sound artificial. . . . Did you ever see wild ducks roosting in trees? It is claimed they do around Zanesville judging from Louie Boxall. The answer is that mushrooms grow so large in that territory the ducks have no place to land. . . . The Wayne Township trustee might be able to save money on a siren for the township fire truck if he were to check up on some of the siren imitations in the grinding section. . . . By the sound of things one day last week there was a lot of talent going to waste. The department should be proud to have an honest to goodness fireman in its midst. . . . Some thought is being given to the idea of getting George Skinnell a radio. It seems it worries George if he misses the noon news broadcast. . . . Richard Kelly wants to know if Dave Lewis could whinney like a horse. Dave said not but that he could make a noise like a fire siren. It seems to be the opinion, however, that if Dave were in the country and started to turn on the steam he might find himself surrounded by a bunch of mama hogs looking for their younguns.

Motor Generator Static

Tom Gouty of Bldg. 19-3 is making up a collection of hides for an overcoat. What kind of hides you might ask? Why, skunk hides, of course. Tom collects several each week in a euchre game.

We were wondering why Elmer Warner, the shaft inspector of Bldg. 19-3, threw out his electric stove and put his old gas range back in use, and now we know. After the last election was over, Elmer had no use for the excess gas he used in politics so now he is going to burn it.

Although the football season seems far in the distance as to time, nevertheless we are told that Al Adams of Bldg. 27 and Joe Burton of Bldg. 19-3 are practicing a forward pass in the euchre games they have been playing, but have had very little success, as the opposing team has had but very little trouble breaking up the line passes. As a good coach, we would advise you to stick to a regular line formation and rush the opposing team off their feet and forget the trick pass. At the end of the game Adams and Burton was on the short end of a 14 to 22 score.

« «It's a Joke» »

Conductor: "Next station is Long Wait Junction. Change cars for Mauch Chunk, Squeedunk, Quakake and Podunk, Hokendaqua, Catasaqua, Mecanaqua, and Tamaqua."

Green Brakeman (at other end of car): "Same at this end."

* * *

The tramp entered the doctor's office. There was a worried look on his face.

"Doctor," he said, "you've got to help me. I swallowed a quarter 25 years ago."

"Good heavens, man!" ejaculated the doctor, "Why have you waited all those years? Why didn't you go to a doctor the day you swallowed it?"

"To tell the truth," replied the tramp, "I didn't need the money at the time!"

* * *

The farmer had watched the motorist working on his second-hand car for about an hour.

"What are you looking at?" asked the motorist. "Is this the first motor car you ever saw?"

"No," was the dry reply, "but it's very much like it." — Christian Science Monitor.

* * *

Sam, a colored gentleman, was being implored by a church committee of brethren to contribute to a special fund the church was trying to obtain.

"Well," said one of the Brothers with a clincher of an argument, "don't you-all think you owes de Lawd anything?"

"Oh, sure, ah does," said Sam, "only He ain't pressin' me like mah other creditors is."

* * *

A very dull play was talked of, and one attempted a defense by saying, "It was not hissed."—"True," said another, "no one can hiss and yawn at the same time."

* * *

Rastus was in trouble again, and the judge asked him if he were guilty or not guilty. "Guilty, suh, ah thinks, but ah'd rather be tried 'n make sure of it."

Elex Second Shift Members To Entertain Mothers At Party

Second shift members of the Elex Club will entertain their mothers at a "May Day Dinner" to be held next Thursday, May 1. The dinner will be at the West Creighton Avenue Church and will start at 11:45.

Special recognition will be given the oldest and youngest mother in attendance and the mother coming the greatest distance. Reservations must be made not later than Monday, April 28.

CHECKER TEAM WINS

The G-E Club Checker Team won over the Wayne Pump team by a score of 20 to 12. Members of the Club team were Ray, Hawk, Curley, and Thomas.

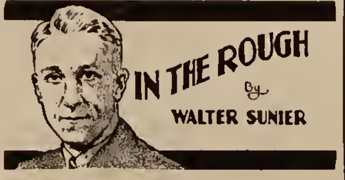
THE STORY OF GENERAL ELECTRIC

BY J. W. HAMMOND

To older G-E employees this book will recall familiar names and scenes. To the younger generation it tells, for the first time, the inspiring story of the pioneer days of the Company. A book that every employee will want to own.

NOW ON SALE AT THE EMPLOYEES STORE



IN THE ROUGH

By WALTER SUNIER

We understand that Mert Edgar and Norm Blankenship played a grudge match a week ago last Saturday. They had agreed that they must play their first eighteen holes together. Blankenship couldn't get his sails up right and had to do a lot of tacking and was scuttled by many holes.

It is supposed to be an ill wind that blows no good but in spite of this proverb, we could not see any good that last Saturday's and Sunday's wind blew. It blew so hard that it blew the hair right off of all the heads of the golf clubs. Golf bags when turned sideways to the wind acted like sails and carried golfers down the fairways. We hit 250 yard drives that went out only 150 yards against the wind and for some funny reason went only 175 yards with the wind. It was a peculiar wind in that way. Even putts curled on the greens. Traveling No. 7, 8, and 9 at Brookwood was like a long uphill climb.

It is easy to get tired even when there is no gale blowing. Who wouldn't be tired in April after a March of 31 days? One good thing —if your feet get hot on the golf course you can turn your hose on them.

Defense workers are striving hard and golfers are also hitting the ball.

We know a couple guys who will get tees by crawling on all fours. It must be hereditary.

Him: "My wife says if I don't chuck golf she'll leave me."

John: "Hard luck, old chap."

Him: "Yes—I'll miss her."

Outdoor Range T Be Opened Sunda By Rod-Gun Club

Fifty and Hundred Yard Rifle Range As Well As Pistol Range Is Scheduled

Plans have been completed the G-E Rod and Gun Club for opening of its outdoor shooti season on Sunday morning, Ap 27. With the change to Daylig Saving Time shooting will also held every Thursday evening.

The range offers complete ou door facilities including a fifty a hundred yard rifle range and twenty-five to fifty yard pis

The range may be reached following the Miller road to Country Club and then turning at the first road past the cl house. After crossing the aba doned interurban track and the ra road tracks a right turn is ma at the first road. The range is cated on the right hand side.

Second shift employees intereste in the club are asked to report Sunday or contact Oral Emri Bldg. 19-5. At the present ti plans are under way to form a s ond shift team. A new "plinkin target, commonly called the "Do will be in operation at the ran

Girls' Bowling Banqu Monday Night At Y.

Members of the G-E Club gi bowling teams who played in Monday and Friday night leag will have a banquet at the Y.W.C next Monday evening starting 6:30 o'clock. Election of officers be held and awards will be made high and low teams. Special pri will also be awarded to the winn of the roll-off teams.

Defense Savings Plan In Operation

Maggie With The Long Electric Underwear

Among the less orthodox signs of spring at Bridgeport, Conn., are the nightly charts kept by engineers at the bedside of an unusual creature who has won the affectionate name of "Maggie." Maggie has spent the winter on the roof of the General Electric factory in Bridgeport in the interests of science.

Maggie is heated electrically, inside and out, and her charts showing a falling off in watts consumed to keep her comfortable are the surest signs of spring.

Maggie is the engineer's solution to General Electric's search for a substitute for a human being to

(Continued on Page 8)

Three Types Of U.S. Bonds May Be Bought Either For Cash Or Payroll Deduction

Charles E. Wilson, president of the Company, this week announced to all employees, the Defense Savings Plan which became effective as of Thursday, May 1. In his formal statement, Mr. Wilson said:

"As you know, the Company is co-operating with the U. S. Government, to the very best of its ability, by providing engineering and manufacturing talent and plant facilities for the production of increasing quantities of equipment required by the National Defense Program.

"When it was recently announced that United States Savings Bonds would be issued as a means of financing part of the great cost of that Program, the Company immediately decided further to aid the Government by making it as convenient as possible for General Electric employees to acquire such securities. Notice to this effect was given in a preliminary statement issued to the employees on March 28, 1941.

"Accordingly, the accompanying Defense Savings Plan has now been adopted, effective May 1, 1941, whereby any employee on the Company's payroll may purchase United States Savings Bonds on an installment basis, as well as for cash. Also, to insure that its operation might not interfere in any way with the sale by the Government of United States Savings

(Continued on Page 2)

Engineering Defense Training Is Offered

Announcement is made by G. H. Russell of Central High School of the formation of United States engineering defense training classes. Tuition will be free and the classes are open to all G-E employees who have a high school education or its equivalent.

Application may be made at any of the sessions which are scheduled as follows: Production Supervision, Monday and Wednesday from 7:00 to 9:00; Tool and Die Design, Monday and Thursday from 7:00 to 10:00; Engineering Drawing, Tuesday and Thursday from 7:00 to 10:00; Metallurgy, Tuesday and Friday from 7:00 to 9:00.

NOTICE

Starting Monday, May 5, employees riding bicycles to and from work will be asked to park their wheels outside of the enclosed grounds. Racks have been placed at the west Wall and College Streets gate; the Lindley Avenue gate and the Fairfield Avenue gate.

Nearly 100,000 Employees Get Raise

Defense Work Plays Part In Radio Output

Minimum of Changes Foreseen As Engineers Work on Electronic Defense Project

Beginning immediately, the extensive resources of the General Electric Company, normally concerned with the research and development of radio and television receivers and electronic tubes, will be devoted in a large measure to vital defense production of an electronic nature for which a sudden need has arisen, Charles E. Wilson, president of the company, announced today.

The corporation's offer, made voluntarily to Secretary of the Navy Frank Knox, and to Admirals Stark and Bowen, has been accepted as an example of industry's wholehearted co-operation with the

Hourly Rated And Salary Groups Enjoy Increases Retroactive To April 7

Charles E. Wilson, president of the General Electric Company, announced on Tuesday a salary increase of $4 per week, retroactive to April 7th for all salaried and other clerical employees of the company receiving up to and including $4,000 a year. Over 20,000 employees are affected by the salary raise.

Mr. Wilson's announcement brought to nearly 100,000 the total number of General Electric employees who will receive pay increases. A statement Monday announced a 10-cent per hour wage increase, also effective April 7th, for nearly 80,000 shop workers.

The notice to salaried employees also announced that the company's cost of living adjustment plan would be discontinued effective immediately. This plan, in effect since 1936, has been applied to the first $3000 of earnings of employees who receive $4,000 or less per year. Adjustments of basic earnings have

G-E President To Speak

Charles E. Wilson, President of the Company, will speak Sunday night on General Electric's "Hour of Charm" between 9 and 9:30 Daylight Time. Mr. Wilson's talk will be on the topic—"G. E. and National Defense." A special musical program, largely patriotic in its appeal, will be presented by Phil Spitalny and his all girl orchestra.

Veterans Prepare For Memorial Day Noon-Hour Program

Active plans are under way for the annual Memorial Day program sponsored by the G-E World War Veterans Association it is announced by Wm. Walt, president. The first program was held last year at the base of the memorial flag pole and met with such success that it was decided to make the affair an annual event. The program,

Defense Savings Plan

(Continued from Page 1)

Bonds, the G-E Employees Securities Corporation has announced that the offer of Employee Bonds for cash will be suspended as of April 30, 1941.

"I hope all of you will make use of the facilities for acquiring United States Savings Bonds provided by this Defense Savings Plan. By investing in such Bonds, you will not only be prudently saving for the future, but you will also be patriotically supporting the U. S. Government in its great effort to provide for national defense."

Three Offers

United States Defense Savings Bonds may be purchased through the Company on the installment plan or for cash in full at time of purchase by any employee on the payroll of the Company.

During the month of May 1941, and at such future times as may be announced by the Company, employees on the payroll may authorize the Company, on forms which will be provided, to make deductions from their earnings for the purchase of United States Defense Savings Bonds on the following bases:

Series E

For each unit costing $18.75 (maturity value $25.00):

$0.75 weekly for 25 weeks.

$1.50 semi-monthly for 5½ months and a final installment of $2.25.

$3.00 monthly for 5 months and a final installment of $3.75.

Defense Series F

For each unit costing $74.00 (maturity value $100.00):

$3.00 weekly for 24 weeks and a final installment of $2.00.

$6.25 semi-monthly for 5½ months and a final installment of $5.25.

$12.50 monthly for 5 months and a final installment of $11.50.

Defense Series G

For each $100.00 of face value:

$4.00 weekly for 25 weeks.

$8.50 semi-monthly for 5½ months and a final installment of $6.50.

$17.00 monthly for 5 months and a final installment of $15.00.

Installment collections will be segregated from the general funds of the Company and no interest will be allowed on accumulated installments as none will be earned by the Company.

Employees may cancel their authorizations under the installment-purchase plan at any time before completion of payments on forms which will be provided, and their accumulated installments will be refunded.

United States Defense Savings Bonds will be accepted for safekeeping from employees at Works and principal offices of the Company where safekeeping facilities are available, or they may be deposited for safekeeping at any Federal Reserve Bank.

May Buy Stamps

Defense Postal Savings Stamps may also be purchased through the Company for cash by any such employee.

Denominations—$.10, $0.25, $0.50, $1.00 and $5.00.

A savings card will be furnished for mounting the $0.10 stamps. Purchasers of stamps in denominations of $0.25 or more will be given Defense Stamp albums in which to mount stamps. An album containing 75 of the $0.25 stamps has a cash value of $18.75 and may be exchanged for a United States Defense Savings Bond—Series E, which in ten years will be worth $25.00. There are similar albums for mounting the $0.50, $1.00 and $5.00 stamps, exchangeable for $50 and $100 Series E bonds.

Further details of procedure under this Plan will be posted on bulletin boards and published in Works papers.

This Plan may be amended or terminated by the General Electric Company at any time, and notice thereof will be published.

Complete details, maturity tables and other pertinent information are published in a special booklet GES-2760 which will be distributed to all employees.

Additional Copies Of "Men And Volts" At Employees' Store

An additional number of copies of the book "Men and Volts" has been received at the Employees' Store for sale to employees at the very special price of $1.00. The book describes in an inspiring manner the pioneering days of the General Electric Company. It has been reviewed by numerous publications and is hailed one of the most outstanding books of its kind.

To both new and old employees it will give a vivid picture of the early days of a Company that has grown to be the largest electrical manufacturing company.

Local Suggestors Are Paid $1,139 For Ideas

One Hundred Forty-Five New Ideas Are Adopted By Suggestion Department During Four-Week Period

One hundred and forty-five new ideas adopted during a period of four weeks brought Fort Wayne Works suggestors a total of $1,139 it is revealed in the latest award list released by the Suggestion Committee.

Leader in the list is Alma A. Tindall, Bldg. 26-3, who received an award of $50.00 for a suggestion to provide containers for resistors. Some time ago John Braden, Bldg. 17-1, suggested improvements to oxydizing burners and received an award of $25.00. Later it was found that greater savings were made through the suggestion than anticipated and so an additional award of $30.00 was included in the award lists.

Vern E. Pray, formerly of Bldg. 19-4 but now in the service at Camp Shelby, was given an award of $40.00 for his suggestion to provide electrical tachemeters for text fixtures. Four awards of $25.00 each were made as follows: Walter J. Wolf, Bldg. 6-1, for a suggestion for improvements inmaterial transportation; Donald H. Shoner, Bldg. 17-5, for changes at lathes; William Schlup, Bldg. 26-B, for providing stock racks for paper, and John C. Ruhl, Bldg. 8-1 for improvements at gas ovens.

Walter F. Wellman, Bldg. 26-3, received an award of $16.00, additional to $20.00 previously awarded, for his suggestion to buy straw tubing in more substantial lengths and Louis C. Pfliger, Bldg. 4-2 and George Angel, Bldg. 17-1, received awards of $15.00 each, the former for a suggestion to improvements at winding machines and the latter for a suggestion for improvements in the use of Kane-Roach machines.

Other awards from $5.00 to $10.00 were made as follows:

C. Swanson, Bldg. 27-1; Homer Platt, Bldg. 4-5; M. S. Marks, Bldg. 4-4; Geo. I. Fields, Bldg. 27; Wm. C. Schlie, Bldg. 19-1; Milroy W. Ploughe, Bldg. 19-1; Herman Ebel, Bldg. 6-3; J. A. Burton, Jr., Bldg. 19-3; R. S. Williams, Bldg. 19-3; Earl W. Strong, Bldg. 4-2.

Otto H. Braun, Bldg. 26-1; William R. Kizer, Bldg. 4-4; Frank L. McClure, Bldg. 4-2; Robert Hatfield, Bldg. 10-1; Paul Gressley, Bldg. 26-2; Walter Kammeyer, Bldg. 4-2; Herbert C. Bobay, Bldg. 20-1; Robert J. Arnett, Bldg. 4-4; E. J. Stroud, Bldg. 20-2; Eugene E. LeVine, Bldg. 4-4.

Darrel M. Daniels, Bldg. 4-4; Donald F. Thomas, Bldg. 4-4; David F. Mannix, Bldg. 26-2; James O. Robinson, Bldg. 4-4; Burnis Laisure, Bldg. 26-3; LaVon Price, Bldg. 4-4; Kenneth Guisinger, Bldg. 4-2; Ralph Weikart, Bldg. 4-2; Lorene E. Foltz, Bldg. 4-2; Lloyd H. Roe, Bldg. 26-1.

John W. Trinen, Bldg. 26-1; E. H. Leitz, Bldg. 26-2; Allison A. Van Wormer, Bldg. 26-5; Earl Mossburg, Bldg. 4-1; A. F. Bowers, Bldg. 4-3; H. Cockran, Decatur; Alice M. Norris, Bldg. 26-3; W. E. Henninger, Bldg. 4-5; Edward G. Taylor, Bldg. 4-3; Fred A. Thompson, Bldg. 6-B.

Clara C. Heaston, Bldg. 6-B; Nancy C. M. Laramore, Bldg. 4-3; William H. Owen, Bldg. 4-4; W. W. Brooks, Bldg. 26-2; Edith Niemeyer, Bldg. 4-4; Chas. Fisher, Decatur; Charlene Snyder, Bldg. 4-4; Hubert Cochran, Decatur; Lulu Mae Kline, Bldg. 4-4; Jesse E. Niblick, Decatur.

Sophia Bodigan, Bldg. 4-4; Max Powers, Bldg. 6-B; Lawrence Chesterman, Bldg. 4-5; Ruth J. Lauer, Bldg. 4-3; Mary C. Brown, Bldg. 4-4; Helen Dunaway, Bldg. 4-4; Margaret Sampson, Bldg. 6-B; Howard Shipman, Bldg. 26-2; Flossie Davis, Bldg. 4-3; Clarence Watterson, Bldg. 4-3.

Max P. Shaw, Bldg. 4-4; Milton E. Roller, Bldg. 6-B; Anna E. Minard, Bldg. 19-4; Ralph W. Keller, Bldg. 17-3; George W. Cooper, Bldg. 4-3; C. Pfeil, Bldg. 19-4; Norman A. Bender, Bldg. 17-1; Carl Hankel, Bldg. 8-E; Herman Buuck, Bldg. 19-5; Maurice L. Roe, Bldg. 17-3.

Frank Brindle, Bldg. 19-4; Herbert C. Braun, Bldg. 19-4; Floyd D. Loraine, Bldg. 4-5; Edward C. Gebhart, Bldg. 4-5; Edward G. Kerch, Bldg. 2-E; Reinhold Frede, Bldg. 4-5; Robert L. Haslup, Bldg. 17-3; True W. Sheets, Bldg. 19-4; Ralph W. Keller, Bldg. 17-3; Lloyd A. Garrison, Bldg. 19-5.

Carl Scheimann, Bldg. 10-1; Edward C. Gebhart, Bldg. 4-5; Viola E. Donahue, Bldg. 19-4; Melvin Bell, Bldg. 8-1; Lester Hubartt, Bldg. 17-3; Neal V. McNamara, Bldg. 17-3; Mary A. McAdams, Bldg. 17-2; Irma Huhn, Bldg. 19-5; Wm. E. Nordyke, Winter Street; Martha E. Woodward, Bldg. 19-4.

Duane C. Watson, Bldg. 17-2; Walter C. Colchin, Bldg. 17-3; Edward H. Gerdom, Winter Street; Loretta M. Mulligan, Bldg. 12-3; Rea Glee Kuhn, Bldg. 19-5; Ralph

(Continued on Page 4)

AROUND THE CLOCK WITH G-E

Now that spring has gotten around that long awaited corner and the robins and bluebirds are picking out new home sites in the backyards of the nation, north of the Mason and Dixon line, it's time to think about hot kitchens once more and what can be done about them. Of course, right now kitchens aren't apt to be too hot for mother to work in, but in another month or two, summer weather will be here and she'd certainly appreciate an electric range.

Never in the history of electric cookery has the art been so well developed. The new ranges have features undreamed of a few years back. Think of it, the new G-E Calrod units bring food to cooking temperature in 30 seconds. The heat is focused right on the bottom of the pot. None is wasted. Foods are cooked in their own juices. With electric cookery there is no soot, no smoke . . . nothing to dirty the pots or soil the kitchen walls.

And for small apartments, the G-E Automatic roaster will cook whole meals. But, see both the ranges and the roaster at the Employees Store and do your own judging.

100,000 Get Raise

(Continued from Page 1)

been made according to variations in the cost of living indexes published by the U. S. Department of Labor. The rate of adjustment since 1936 has ranged from 2 to 5 per cent. Although this plan is being discontinued, the current cost of living adjustment of 3 per cent will be incorporated in the salary rate of all employees who have been participating under the plan.

Nine Employees Round Out Twenty-Five Years Service

Nine employees entered the Quarter Century Club during the past several weeks, having completed twenty five years of service with General Electric. They are, top row, left to right—Kenneth E. Thompson, Bldg. 17-2; Albert H. Horman, Bldg. 19-B; Adelaide Levenbarger, Bldg. 6-3. Second row, left to right—Martin F. Einsiedel, Bldg. 18-1; Joseph E. Laisure, Bldg. 19-2; Martin E. Heider, Bldg. 19-2. Bottom row, left to right—J. H. Breidenstein, Bldg. 26-5; D. Leo Persing, Bldg. 4-3 and Wm. J. Uecker, Bldg. 17-1.

Leaders In Latest Suggestion Award Lists

Leaders in the latest suggestion award list covering one hundred and forty-five suggestions made within a period of four weeks and bringing a total of $1,139.00 are shown above.

Top row, left to right—John C. Ruhl, Bldg. 8-1; Alma A. Tindall, Bldg. 26-3, and John W. Braden, Bldg. 17-1. Bottom row, left to right—Donald H. Shoner, Bldg. 17-4, Wm. Schlup, Bldg. 26-B and Walter J. Wolf, Bldg. 6-1.

Mr. Shoner, Mr. Ruhl, Mr. Schlup and Mr. Wolf received awards of $25.00. Miss Tindall received an award of $50.00 and Mr. Braden, one of $30.00, which was additional to $25.00 previously awarded.

Ideas suggested during the period covered a wide and varied field.

Defense Work

(Continued from Page 1)

defense program.

The plan involves the transfer of development and research personnel and facilities from work on commercial equipment to the new electronic apparatus so urgently needed by the government in all branches of the armed services. From the government standpoint, it will mean an immediate and considerable acceleration in production of certain radio and electronic devices for which there is a vital and urgent need.

"The General Electric Company is particularly qualified to undertake this vital defense job", Mr. Wilson said, "since for many years it has devoted a large part of its extensive research and development facilities to the electronic art. At Schenectady and Bridgeport the G-E radio and television department has what is probably the largest radio and electronic engineering, research, and development laboratory in the world, specializing not only in radio and television receivers, transmitters, and tubes, but in all types of electronic energy-transmitting and control equipment.

"The action of the company will not affect the commercial radio receiver models for 1941-42 which are now designed and already in production, but it will undoubtedly mean standardization on fewer models and a minimum of changes for the duration of the defense period. To compensate for this temporary sacrifice on the part of the company there will undoubtedly be, after the emergency, rich awards for seller and consumer alike, in the form of scientific achievements to advance radio and television," the G-E president said, and as evidence pointed to the rapid development of radio itself as a direct result of the last war.

Suggestion Awards

(Continued from Page 2)

W. Keller, Bldg. 17-3; Adam N. Farrell, Bldg. 27; Scott T. Armstrong, Sr., Bldg. 2-E; Elmer L. Hart, Bldg. 6-B; Herbert H. Tons, Bldg. 17-1; Arthur M. Breiner, Winter Street.

George E. Maloney, Bldg. 17-4; Arthur H. Bieberich, Decatur; Pauline M. Gehrlich, Bldg. 4-6; Andrew P. Kreidt, Bldg. 18-B; Lela A. Brudi, Bldg. 4-6; Clarence F. Morgan, Decatur; Edward G. Kerch, Bldg. 2-E; Paul J. Hazelet, Bldg. 17-2; Ruth J. Lauer, Bldg. 4-3.

George I. Fields, Bldg. 27-1; Claude L. Gill, Bldg. 17-2; Emnit C. Ort, Bldg. 8-1; Ben M. Fleek, Bldg. 17-1; Paul L. Lewis, Bldg. 4-5; Raymond P. Saul, Bldg. 4-3; Lester C. Preuninger, Bldg. 17-2; Edwin W. Stute, Bldg. 17-2.

Promotions Made

(Continued from Page 1)

Bldgs. 17-2, 17-3, 17-4 and 2-2.

Mr. Traub graduated from the Apprentice Training School in 1917 and was assigned to the Tool Department as a die maker. In 1925 he was transferred to the fractional horsepower department planning section when his first assignment was tool and equipment work. He continued as a planning engineer up to his present appointment. Mr. Traub resides at 2723 Parnell Avenue.

Mr. Harper joined the G-E organization in 1929 following his graduation from Central High School. After attending the Apprentice Training School he was transferred to the Bldg. 4-2 rotor department and was employed there up to the time of his present appointment. Mr. Harper resides at 336 Burns Boulevard.

»» NEWS THROUGH THE PLANTS ««

From The Feminine Viewpoint

By Irene Perry and Hilda Barthold

After looking at the expressions the men are wearing around here now-a-days, we take it that it is time for spring house cleaning. Being business women and always looking for short-cuts, we know some very good uses for common, ordinary salt. In case there are some you don't know, we will print them here; and if you know some others, how about passing them along?

1. Stains on porcelain bathtubs or table tops can often be removed by sprinkling salt on a piece of flannel and rubbing the stain.
2. Perspiration stains may be removed by soaking in a solution of salt before washing. Use a handful of salt to each quart of water.
3. To remove stains and discolorations from china and earthenware, rub stains with salt moistened with a little water.
4. To remove dirt from curtains, add half cup of salt to the water in which curtains are being soaked. The dirt loosens more rapidly.
5. To clean silver, add ½ cup salt and ¾ cup soap flakes to sufficient cold water to cover silver in aluminum pan. Remove from fire as soon as it boils. Wash silver in hot soapy water, a few pieces at a time, and dry thoroughly.
6. To clean brass, copper and pewter, make mixture of salt to which you have added an equal quantity of flour and vinegar. Apply a paste made of these ingredients. Let the paste remain on for an hour and then rub off. Wash with water and polish.
7. To remove ink spots from carpets, pour salt immediately on the wet ink spots, changing the salt frequently. This will soak up the ink and remove the spot. Even old spots may be considerably lightened and made inconspicuous by wetting spots with water and applying thick coat of salt.
8. Use salt to kill weeds in driveways and gutters. Wet the ground and sprinkle with a generous quantity of salt.
9. When washing spinach and other vegetables, put a handful of salt in the second water. It will take out any insects and the clay or dirt will sink to the bottom of the pan. A third water will then clean thoroughly.
10. A slightly scorched taste can be removed from milk by putting the hot pan into cold water and adding a pinch of salt to the milk.

Two new diamonds are reported in Bldg. 12. The wearers are Esther Faus and Greba Cox.

6-4 Magneto Mumblings

By The Eavesdropper

Sure, and it takes a lot of ambition to dig for "dirt" on a day like this. Methinks it would be much easier to follow tradition and gently lean on my shovel, but the "Magneto Mumblers" are clamoring for attention, so here goes, mine frans . . . Harold Kroger, Magneto wonderboy, simply doesn't appreciate good music. The other day he nonchalantly sat on a brand new record of Freddie Fisher's Snickelfritzers and smashed it to smitherings. Was my face red, eh Harold?? . . . We think that Bill (Jitterbug) Shuler "Missed the boat" in choosing his profession. After watching him cut a rug (gracefully, to be sure) recently, we know posalutely he could make Fred Astaire look like a toy soldier which someone forgot to wind. . . . Hear ye, hear ye, all ships, departments, and yes, even maidens in distress: When disaster befalls you, please don't hesitate to call on the one and only Fire Chief, R. C. Dennison, to the rescue!!!! . . . That old saying "Absence makes the heart grow fonder" really applies to Mid McKarns. When one stays up til' the "wee small hours" to meet a train, man o' man, it must be love. . . . Howard Timms, our candidate for the absent-minded professor, is still whistling, and we're still wondering what he could be so happy and carefree about. Maybe he has just discovered that Spring is here and is letting his thoughts run fancy free. . . . It seems as though yours truly is also becoming aware of Spring. Ho hum, now where did I put that shovel???? Oh, here 'tis. . . . Until next time, G'bye Now.

Sunbeams From 17-4

Art Ryan of Bldg. 26-1, has learned that "You can fool part of the people part of the time", but you can't fool friend wife about fish, she knows her carp.

Eileen Morris certainly fooled everyone in the department, it has been over a month since she said those fatal words "I do", even Mrs. Newshound, didn't know, anyway what we are trying to say is, congratulations, Eileen and Bob.

The department party was a huge success, and if you don't think so just ask Virginia Morand, who's feet are still aching.

Mary Guilliff, Bldg. 4-3, can't imagine why some of the other girls are so interested in Spring. It doesn't mean anything to her when Charlotte Sanford comes to work wearing a huge orchard bouquet.

John Deahl, Bldg. 4-3, reports the new fire buggy of Waynedale is now ready for delivery and we all know that if John does not get the first chance to drive it he will be broken hearted.

Thisa And Thata 19-5

At last we can all breathe more easily, Mildred Friedrich and Avinell Gailey both became "Uncles" during the past week.

We are thinking of starting a "Forgotten Badge Club," so far we have about eight members, the latest to join is Margaret Bennett, she even had to borrow a car to go get hers.

Can you imagine Alfred Hurdley without a toothpick or match in his mouth? We can't.

26-5 Tool Bits

The management of a Toledo manufacturing concern was agog some short time ago when a telegram was received stating that Mr. L. Roebel and Mrs. G. Diver, of the Fort Wayne Works would arrive next morning for a conference on business matters. It is reported that the management, impressed by the fact that the General Electric Company was sending a woman to do purchasing, went out of its way for a reception with special chauffeur and car and everything. There must have been a let down when they discovered that the telegraph operator had made it a Mrs. Diver in place of a Mr. Diver. . . . Jim Mitchell certainly takes his work home with him. The other night Mrs. Mitchell saw Jim arise, still sleeping soundly, and start for the down stairs. When she called to him Jim continued on his way muttering 'I gotta check my files, them motors gotta be shipped." . . . There seems to have been a slight error as to Dave Lewis and his whinney. Dick Kelly asked him if he could whinney like a cow, and Dick fresh off of the farm too. Tsk! Tsk! . . . Another good sign of spring is Frank Druhot minus his cap. . . . Pearl Schoaf, of the night shift, is not the type of fisherman who brags about his success without ample proof. Monday night he brought in a four pound bass to prove that he was a fisherman of the old school. . . . Anyone wanting free lessons on self defense see Bill (One Punch) Wedler. After his demonstration of Tuesday morning it seems as though his theory is quite simple. If you swing and miss, follow through and try to connect with a tool-box.

Thank You

Many thanks to a swell committee for the fine cooperation and untiring efforts in planning the Elex Silver Anniversary tea. — Bess Brown, general chairman.

Don Voorhees, Bldg. 4-3, spent the week-end at a certain lake. We are still wondering why the grass wasn't cut over the week-end.

Is Zat So?

Spring fever has taken hold of the Bldg. 17-1 gang. Every once in a while someone will show signs of the symptoms! It was so nice the other noon that Ed Sonday went out for lunch in his shirt sleeves. When he returned and started to enter the gate he realized that he had left his badge on his vest hanging in the coat rack! Ed persuaded his companion to secure his badge for him. Take heed, dear readers, and profit by the experience of Mr. Sonday! . . . Loyal Decker came to work Monday all "decked out" in some new summer work clothes and with his hair clipped short! He explains that he spent his winnings of the check pool to prepare himself for the summer heat wave! Bulletin: Jack Leonard has joined the force of Waynedale's volunteer firemen, consequently the value of Waynedale property is expected to be increased. Jack seems to know quite a lot about the job and we wouldn't be surprised if he wasn't soon made fire chief of Waynedale, because he looks so well in the "Chief's" hat! Everything will be fine and dandy as long as someone in Waynedale does not have a fire on Friday nights! . . . The tool room gang wonders why "Red" Braden doesn't spend some of his suggestion award money and purchase himself a new lock! . . . "Bill" Decker was recently admitted to the Quarter Century Club and was proudly displaying his new Club pin. "Bill" is going to have his picture in the WORKS NEWS so be sure to watch for it! . . . We have a mystery that, as this issue goes to press, we have been unable to solve. . . . Why is La Moyne Gallis attempting to raise a moustache? Watch for the answer next week! (Sounds like a movie thriller, doesn't it?)

The Question Mark!

Deaths

Alvena P. Zwick, employed in Bldg. 4-3, died on April 21, after a two-week illness. She had been an employee for the past thirteen years. Funeral services were held on April 24 at the home and the Emanuel Lutheran Church with burial in Greenlawn Memorial Park.

Apprentice Alumni Trip Is Cancelled

The inspection trip to the International Harvester plant at Indianapolis planned by the Apprentice Alumni Association has been cancelled. The trip had been planned for May 24. A trip for May 17 is being planned at the present time and if arrangements prove successful further announcement will be made in the near future.

SANDY SAYS

Here's a good question for a "Truth or Subsequences" program.

Question: What one word can ye say that would describe nearly everything we do — business, our work, our play, politics, Europe, two girls after one fellow, (and Girls, two to six fellows after one girl), athletics, horse racing, bridge, poker, and not to slight our No. 1 Columnist, Mr. Walter Sunier — Golf.

Answer: A Contest.

Ever since the old struggle for food, clothing, and shelter started (did I say OLD?) man has been in one contest or another all the time. He's so used to contests that he even gets into them for recreation —and if he doesn't feel like that— he goes to a ball game.

So ye see, he never gets out of sight of a contest.

In fact, my cousin Colin and I have hinted in this column a time or two about holding one here. The other day he said, "Hoot Mon! tae do this contest business up right, why don't ye hold a contest tae see what kind o' a contest ye should have."

"Ye can say that double," I answered, "A contest to choose a contest!"

And it's not a bad idea, at that.

Well, as I said, Contests are everywhere about us, and whether we believe, like, or know it, our cost improvement program, and our suggestion system are small ones. Ye pit your brains against a problem, and if ye can lick it, your reward may be anything from five bucks to several hundred, depending on how big Mr. Problem was, and how hard ye socked him.

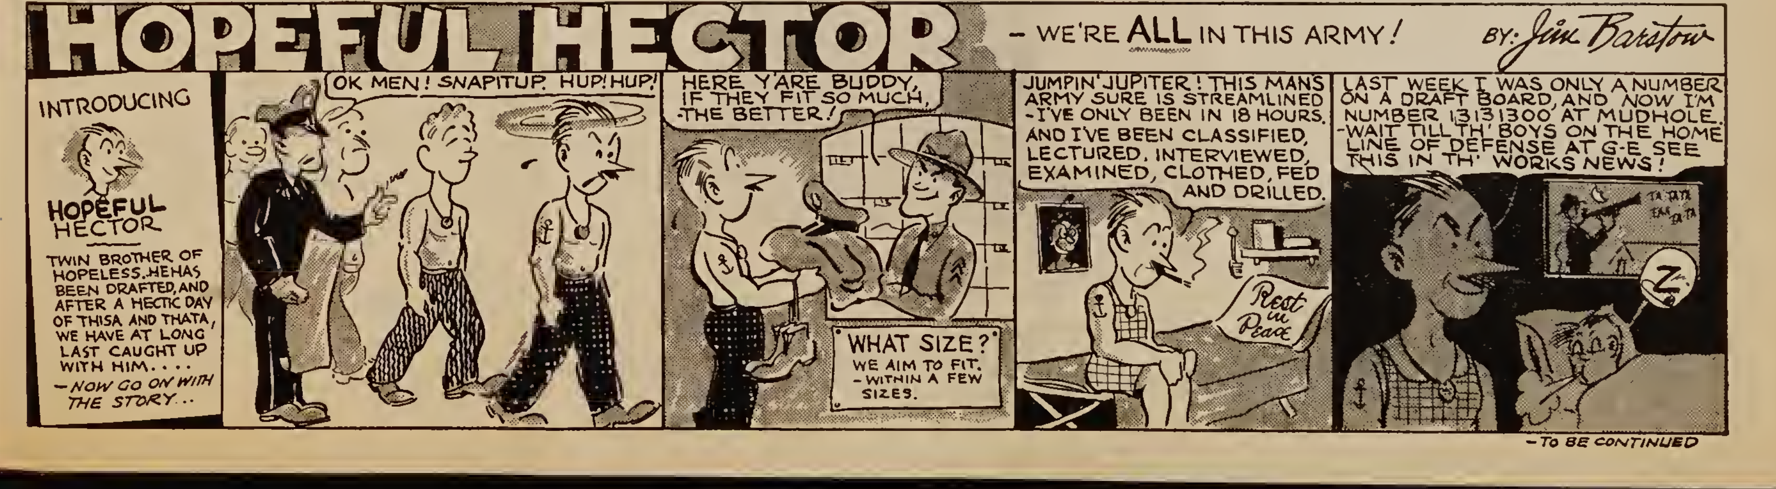
And it's not just you against him, either. Some one else may beat you to him—and take the reward.

And o' course ye must find this Problem, too. That's where ye may be at a slight advantage to Joe Lewis, for instance. He only gets the ones some fight promoter digs up for him.

The other day I tried to start a contest with my cousin Colin. "Colin," I said, "I'll bet I can smoke a cigarette faster than ye can, and to prove it, let's have a race—ye furnishing the cigarettes."

I couldn't hear what he said, but it sounded like, "I'll see you inhale first."

Harry Parker, the do or do not of Bldg. 4-3, is busy these days on the problem of putting a lot of attention to road maps. He still is wondering how to get to the "Hoggery."



HOPEFUL HECTOR
- WE'RE ALL IN THIS ARMY!

NEWS THROUGH THE PLANTS

Winter Street News

Gerald McLain is seriously thinking about wearing his pajamas to the next poker party. Not because the boys clean him out but because the police stop him in the wee A.M. and insist he have two headlights burning. He states they were so long in checking up on him and writing out his ticket that he fell asleep in his car.

Jack Herney sure was proud of his new car. After extolling its virtue to all his friends about how well it was built, some one opens a door and the arm rest falls. He suspects sabotage.

Gettys also was proud of his new one until he reached down to the front seat adjustment handle and came up with the handle but no adjustment. These fancy gadgets!

We've heard of people getting oiled and cars getting greased, but it took Walter Knoche to give Joyce Harwood a good grease job. Her shoes were squeaking rather badly and kept her awake when she walked so Walter got an oil can and proceeded to eliminate said squeaks. Next A. M. squeaks same as usual.

Walter Shady is taking motorcycle lessons, or if he isn't he should. After purchasing a new one he proceeds to give various demonstrations each noon. Last week his two most outstanding performances were forgetting to apply the brakes until the front wheel was gently nosing its way through the back of the bicycle shed and the other when he accordion pleated a parked car fender while getting away from the curb. He very firmly states, "I'll ride that ?x*?x* cycle if it kills me, and it probably will."

The Machine Shop boys are glad Jackie Scarpelli started work in the Spring. The way she runs around opening all the windows would freeze them all out in Winter time. If Spring is here can Winter be far behind? Better start training her now.

Carl Walden is sure telling some tall tales lately. Not that we don't believe them—far from it—but sometimes we kinda wonder.

19-5 Office Chatter

The spring fever has everyone and so no one seems to be doing much—just sitting, gazing and just sitting—but that does not go for Richards, as he is very much telephone minded, so much in fact that we all are too. This last Saturday was hard on Mardo Tobias, when every so often his friends called out "FORE"—Gill (Mae Rose), has been helping cupid, so much that it meant an extra trip upstairs to the fifth floor to be sure that a big thick letter got on the west coast plane. Our southern gal, Wilma, certainly had her hair crimped for that dance last week. NOTE — There has not been any dirt blowing toward "Slug", how about you fellows helping a fellow out as we all miss his articles. Just wonder if the stories that Carl Rietdorf will dish out when he comes back will have an A-1A Priority rating? Capt. Stark blew into the office and it seemed so funny to see him on a visitors pass. That makes me wonder how all the fellows are and this is to let them know that we all say Hello, to wherever you are located. Just a little reminder to all fishermen, the season will open on June 16th, so don't be so disgusted.

It is reported that Lawrence Rickert, Bldg. 26-2, is going on a diet and he's only going to eat once between meals.

Borings From 4-4 Office

This last week many have been caught in the trap and some of their sayings and doings are worth repeating, while the rest of the oddities of the news, it would be a lot better to remain mum, than to go around talking about it.

Don Niles has been saying the following lately. See if it makes sense to you: "You often see the watchman watching the watchman. The other day, the watchman was watching the watchman watching the watchman who was watching the watchman. But this noon as he went out the main gate, the main watchman was watching the watchman watching the watchman who was watching the watchman.

Art Wedler is now a charter member of the Green Tops. The other instigators of the club are Mike (Green Cheek) O'Grady, Virginia Plummer and Marge Boerger. Applications for membership into the club will be taken up the week of May 5th to 9th. Initiation will take place May 14th in the conference room. We're warning you, this is a tough initiation, and no sissies are wanted. Art Wedler is in charge of initiation.

It certainly does seem lonely around the office since Mary Hile isn't here. Yes we all miss her cheery smile and a jolly hello. A group from our office had a scotch party in honor of Mary, 'cause she was leaving, Ardeth Hemp, ex-G-E co-ed, who arrived from Sidney, Ohio, to spend the week-end, and Charlene Snyder, who celebrated her first wedding anniversary (confidentially, between you and me, Charlene received paper napkins). Good luck to the three of you.

Thanks to LaVon Price, a big scandal was stopped in the office. Clayton Culver was seen on the street car with a very young girl. All the tongues were wagging, and when LaVon approached Culver and asked him who the girl was, he promptly and proudly boasted that he was with his daughter, Phyllis Culver, Bldg. 19-3.

Bob Klingel, Bldg. 4-3, is getting very impatient with me because he has been rating one of the swellest girls of Bldg. 4-4 and he doesn't make the WORKS NEWS. Well, Bob, here's more power to you.

Have you all noticed Esther Allar's new hair do. Gosh she's pretty. And all the turls, that's why we call her "Turley."

Evie Meyers, Virginia Sanders and Marge Brown don't seem to be quite here of late. Could it be the Spring? No I don't think so. I just jump with joy when I see Spring is coming.

Seen running down Calhoun street after a street car were two former track stars from I. U. One from our office, the other from Bldg. 26-B. News to you, M. Dyke.

'Tis plenty for now, I remain your ever ratty reporter who says that if you expect to live long, keep catty remarks to yourself. Sincerely as ever,

Elmer, the Field Mouse,
The Rat to You.

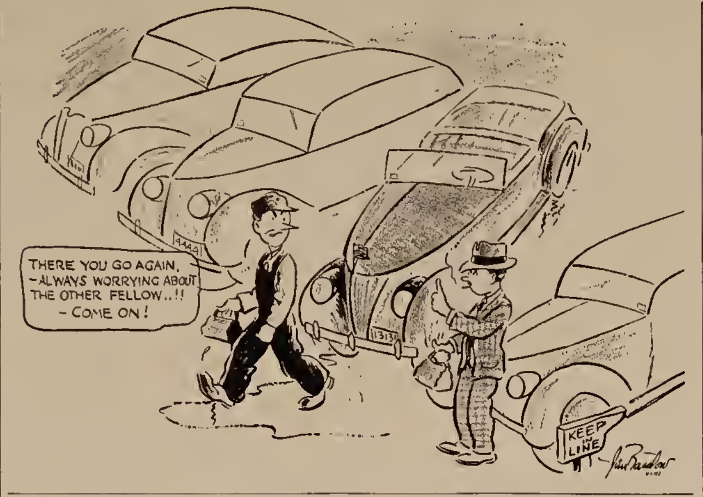
Anyone interested in getting locked doors open by turning the knob, see Carmelita Fough, Bldg. 12-1.

Betty Perry, Bldg. 12-1, has sprouted four new grey hairs since her sister told she was going to turn Bessie, Betty's pet cow, into steaks.

"I love looking at her when she laughs."

"Why?"

"There seems to be so much of her having a good time."



Hermetic Office 17-2

Bldg. 17-2 proudly congratulates its new twenty-five year member, Lisle Hodell . . . he's proud, too, of the shiny new pin on his lapel. . . . What can a mere "skating partner" become? We suggest you look at third finger, left hand, of Mildred "Termite" Spuhler, for the answer, which also explains why the young and hopeful are seriously considering the art. . . . We've heard what the hot summer can do to a fisherman's imagination; but when George Langenberg tells of passing out large amounts of large fish to lots of people (who aren't there) we're convinced there is something to it. . . . The past few "dazes" have been a case of the "St. Louis Blues" for Helen Buuck—he's in the army now. . . . Last Tuesday the girls in the office enjoyed a potluck at the home of Luella Franke. . . . Was it the excitement of the explosion that caused "Red" Smith to jump over desks and chairs, or is he naturally inclined? . . . Audrey Hickernell seemed to have some trouble, too, when she tried to "shinny" over a drawer. . . . We all know of the man who comes around, but the man who doesn't come around with the popcorn is George L.

SUZY SLEUTH.

Guess Who?

Taking a chance of being mobbed we give the old telephone formula —guess who? We'll tell you. It is a picture of a Bldg. 26-5 safety committeeman at the climax of youthful preparation towards the successful entrance to life work. Sure its Rufus Niblick.

26-5 Tool Bits

Must have been a good story. At least the girls in Bldg. 26-5 cost department responded with plenty of laughs. . . . Moonlight and flowers, a parked car, man and a maid, throbbing music—all speak the language of love. Here's a new twist on the Bldg. 26-5 office. A desk, a maid, a man on his knees, broad daylight. He murmurs softly. We suggest you see Betty Larimore for details. Oh, why keep you in suspense? The man was on his knees because he slipped off of a makeshift waste basket seat, and the murmuring was probably some cuss words. . . . Dick Wagner is keeping away from cigarettes. His tubular holder when extended places the cigarette in the next department. . . . Bert Telly, of the slotter gang, was seen sitting on the running board of a parked car at Lewis and Clinton streets looking very down hearted. Bert claims he was waiting for a street car but the theory is advanced that he was brooding because of his failure to get financial backing for his fighter, Russ Hoffman, for that match with Joe Louis. Who is the scout who is supposed to be looking for the man with the extra one half punch. . . . Jack comes close to being a second Dagwood with his sandwiches. John was seen with one which included three or four kinds of meat, cheese, lettuce, pickle, etc. Of course Bob Schulke isn't so far behind nor is Gus Kruse. Bob don't have them built so high but oh the length and the width. One large loaf of bread slit lengthwise. Gus keeps up with plenty of pumpernickle, while Dave Lewis always has his tea and cake. Herschel Odeic must have found a tree, on the way to work, with plenty of vitamins because he nearly always is chewing on a leaf stem and his waistline is increasing. Herschel should show Russel Dunten and a few more where this tree is located.

That wasn't a riot on College Street the other Saturday night. That was the second shift of Bldg. 12-1 having a swell time at Adelma Meeces' wedding reception. Congratulations, Mrs. Meece.

Our nomination for the most absent-minded person is Grace Funk in Bldg. 12-1. Doing her good deed for the day she turned in a pair of glasses she found in the washroom, only to discover when she got home that they were her own.

Erma Need, speed demon of Bldg. 12-1, swears she can drive 19 miles in 45 minutes. How about challenging Sir Malcolm Campbell, Erma?

Greater love hath no man than Dan Hughes, Bldg. 12-1, has for his Ohio cousin.

M.B.A. PATIENTS

Transformer: Verla Wolfe, 804 Huestis Ave.; Evelyn Halter, Cederville, Ind.; Betty Griffith, St. Joe Hospital; Maxine Druhot, Lutheran Hospital.

General Purpose Motor: June Juday Grabill, Ind.; Margaret Mackee, Lutheran Hospital; Merle Wright, 1117 Garden St.; Olive May Waters, St. Joe Hospital; Frona Witsche, Lutheran Hospital; George Tounsend, 1328 Green St.; Virgil Lomiller, Methodist Hospital.

Series & Specialty: Maxine Peltz, Methodist Hospital; Helen Rehrer, 3518 Smith St.

General Service: Raymond Lehrman, Lutheran Hospital; Tony Holocher, 706 Greeley; Earl McVey, 1333 Wall St.

Office: Ruth Wichman, 2314 Eby Ave.; Virginia Mollet, 720 Walnut St.

Apparatus: Virginia Ostrouski, Methodist Hospital; Wilma Schamerloh, R. 10, City.

Left the hospital: Mildred Snyder, Riley Maynard, Clifford Schwartz, Russell Earl.

Returned to work: Edna Hergenrader, Ortha Sexton, Elmer Hatfield, Thelma Prudue, Walter Busick, Elizabeth Louis, Virginia Fox, Harry Kessler, C. L. Saurbaugh, Wafe McCutchen, Frank Williams, Kathleen Meyer, Robert Happel, H. Muehlenbruck, Martin W. Blakley, Otto Brunner, Maurice G. Fair, Harold Roche.

Shorts From 6-B

We read periodically where a groom creates a sensation by fainting during the ceremony; that's considered news, but come to think of it, did you ever hear of a bride fainting. Getting back to the factory, our new man, Delmar Wagoner, created something, while being treated in the dispensary for a cut finger. Maybe it was the nurse that overwhelmed him.

Carl Steinbacher, years ago, of course, gave a very excellent lesson to his two daughters on how to use naphtha to clean clothing. After successfully demonstrating the proper motions, speed, etc., he very nonchalantly disposed of the cleaning fluid, container, etc. What happened within the next few seconds completely spoiled his object lesson, also moved the furnace off its foundation and blew the doors off. Moral: Where is the proper place to dispose of explosives?

Conversation in Bldg. 4-B:

Bill—Do you smell what I smell burning?

Leo—Did you look at Jake's neck?

Bill—I smell wood, not rubber.

Leo—Then look at his head.

Jake Sappington to Dan McKenzie. "It makes me so embarrassed. Every time I scratch my head and the sawdust falls, someone thinks I've got dandruff."

Bob Gruber is itching to get on someone's softball team. The note he received in the mail last week was a solicitation, but it wasn't for softball. Bob thinks it was a put up job by Ruth Franzdorf.

Wm. Eisennacher, who cruises with Chrysler products now, flows through traffic with a new fluid drive Dodge, and we are still surprised, Mrs. Eisennacher is driving it, already.

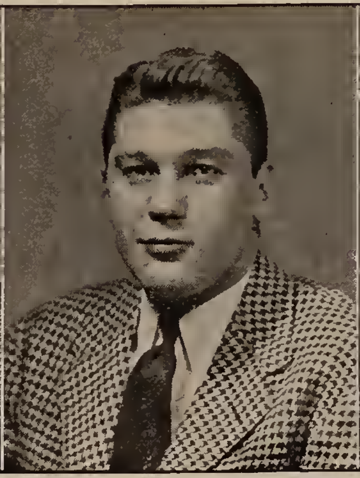
And speaking of uniforms, and we don't mean the army, our late reporter looks even more spiffy in his new regalia than he did and does as a band leader, and that's the truth, Perry.

Eddie Krick says he isn't afraid of anything—he's faced bullets.

POST SCRIPT.

Complete Machinist-Toolmaker Courses

John M. Allen



Wayne L. Winters

A. L. Rediger

Three young men have completed the machinist-toolmaker course of the Fort Wayne Works Apprentice Training School. They are John M. Allen, Wayne L. Winters and A. LeRoy Rediger. Mr. Allen is a graduate of South Side High School, Mr. Winters of Central High School and Mr. Rediger of Woodburn High.

News Around

(Continued on Page 5)

Motor Generator Static

Could it be?

Could it be that Ozzie Lacerte is getting absent minded? This tale starts back quite some time before the actual act took place. Ozzie came to work the other day and discovered he had carried one of "Juniors" Toys with him—a clever little rubber horse that projected its ears and tongue when squeezed. Such a thing could not pass unnoted in Bldg. 19-3; and as a consequence, his ears were subject to such remarks as "getting playful," second childhood," and "taking toys from the baby." However this is incidental, the real story starts at 5:15 when Ozzie started home.

Frank Archbald (our little helper) inquired as Ozzie was ringing out, if he had forgotten the toy. Our hero dug deep into a coat pocket and produced key, papers, and personal belongings he had never seen before. With a dazed look upon his face he returned to the coat rack, placed coat and vest upon a hanger and donned another coat of similar material. Frank (ever helpful) discovered the coat and vest were the property of Ray Bowman who weighs perhaps 50 pounds more and who's chest measure is about 5 inches greater than Ozzie's. When asked if the coat was too large, Mr. Lacert remarked, "Slightly, but not bad because two vests help to fill it up." When questioned he admitted that while he wore his own vest he absentmindedly donned Ray's vest along with the coat and this is spring . . . AH—Me!!

John Rogers, Bldg. 19-3, recently proved his claim to the title of works worst euchre player when he and his partner were taken for 15 straight points before scoring. We have heard of skunks, but this defeat is so fragrant it should be spelled "skonk."

Ozzie Lacerte, Bldg. 19-3, would like to borrow a dog for a few days. It seems he won some dog food at a local grocery and does not want it wasted.

Jack Toole, Bldg. 19-3, is at it again. Not painting this time, but washing the house. Anyone passing after dark may see Jack garbed in overcoat and mittens industriously scrubbing away by the light of "G-E" mazda lamps (plug).

Nadine Tierney and Mary Zimmerman, Bldg. 19-3, wish to announce that they are leaving Friday evening to attend the Kentucky Derby. They decided to attend when one of their friends informed them the Derby was not a hat, but a horse race.

While F. T. McInerney, Bldg. 19-3, admits he has been with and had lots of flat tires in his short life, the one that caused him the most grief occurred in South Wood Park the other evening. Mack was observed performing real manual labor on a completely depressed tire while the friend stood by with a very bored look, holding a flash light to illuminate the place of action. Perhaps the old horse and buggy were the best after all.

Anna Roth, Bldg. 19-1, must have the gift of piercing the veil to the future. The other evening she dreamed of setting, 'sans rainment,' in the middle of the test floor, hugging a pillow. This was quite embarassing no doubt; and she remembers awaking afraid the WORKS NEWS would carry an account of this act. And strange as it seems—here it is.

Lost

or

"The Missing Lunch Basket"

Starring Henry Ludeke, Bldg. 19-3

Footnotes—

By this little playlet, we attempt to portray an incident in the life of Mr. Average American — that individual who represents a cross-section of our daily life, his joys, sorrows, work, and recreation are interwoven with each ones existence. We too, are average Americans.

ACT 1

Scene: Bldg. 19-3 factory. Time: Early morning.

Henry enters from left wing, walks up to foreman who is arranging the daily schedule.

Foreman: "Good morning Henry, I have assigned a new bench to you, it's the third one down the line."

Henry: "Thanks boss, it sure is a honey."

Henry walks over to bench, pulls out large drawer and deposits tools, lunch basket, shoes, and personal belongings.

Curtain

ACT 2

Scene: Same Time: 3½ hours later.

Henry is seen in the distant end of building working on some special equipment. Jack Ormiston and his crew of movers enter.

Jack: "Well boys, that looks like the bench we are to move, take it away."

Movers pick up Henry's bench and leave.

Henry returns, ready for lunch, sees bench is missing. Starts frantic search throughout department.

Curtain

ACT 3

Scene: See note. Time: Still later.

Note: the location of action changes so rapidly it would be impractical to attempt portraying each place. However, in passing we mention that the search carried Henry up and down aisles, stairways to other floors, and even out on Wall Street. Finally the elusive bench was discovered in Bldg. 19-B.

Henry sighs and murmurs "Ah, there you are!"

Makes rapid check and finds all possessions still in drawer, sets down and eats lunch.

Curtain

ACT 4

Scene: Bldg. 19-3. Time: Later.

Henry is observed walking around with hammer and nails in hands accompanied by fellow workers who are aiding in his search for a spot to nail the bench to the floor. One man speaks: "I sure hope he finds a place, Bldg. 19-3 would miss Mr. Ludeke."

Curtain Falls

Ask Ned Foster, Bldg. 19-1, what kind of a sun-lamp he uses. He had last Friday afternoon off. Saturday he came to work with a beautiful sun burn. Sure am powerful, eh Ned?

Words of the Week offered by Bldg. 19-3 . . . Jerry Frye, Bldg. 19-3, remarks, "Doggone, when a man is sick, he ain't well."

Every time a new magician comes to town we have a new bunch of slight of hand performers around the G-E. In this new batch we find Ray Williams and John Alterkruse of Bldg. 19-3, who thought they could imitate the great Blackstone by making a rabbit disappear. Ray and John borrowed a rabbit from a small neighbor boy to try their luck. Sure enough the rabbit vanished and now the boy wants his rabbit back, but the sad part of the whole thing is our amateur performers can't find the little bunny anywhere. Could it be that Ray ate the little bunny? He is quite an ardent hunter during the rabbit season.

Voughn Hiser, Bldg. 19-2, is the champion cheese eater. He has a hunk in his dinner pail every day and he can't complete a Sunday meal without it.

Dave Mannix, Bldg. 26-2, caught a two and a half pound German bass in the river Sunday. He says it had scales as big as a quarter and was good eating.

"Fritz" Rudasky, crack enameler in Bldg. 8-1, endorses the real thing in "Ersatz" coffee by including a generous portion of pencil sharpener shavings.

With June drawing near "Special Advice to Prospective Brides, Inc., C. O. D." should be doing a rushing business. Any of the fairer sex interested see Cecil Young, Manager, Clarence Favourite, 1st assistant; or Bill Meiners, secretary. The office is located in Bldg. 12-1.

Spring has definitely come to Bldg. 12-1. Florence Peters has worn the latest Shirley Temple frock to work.

Jim Fleming, Bldg. 12-1, has one for Robert A. Ripley! A goat that looks, acts and barks like a Great Dane. If you don't believe it ask Jim where his underwear is.

It is said that Harold "Popeye" Patterson, Bldg. 4-3, has a chauffeur drive his car while he smokes a big cigar and takes in the sights of the city.

"You've plenty of nerve, Rastus. The idea of stealing my chickens and then trying to sell them to me."

"Well, boss, I thought you'd pay a better price for these chickens since you raised 'em yo'self. You'd know what you wuz buyin'."

Attention folks: "Popeye" Patterson, Bldg. 4-3, is expanding his activities. Realizing that some of our districts were in need of taxi service, he proceeded to establish a line serving these peoples. He has one cab in service and has made several trial trips with gratifying results. He has a liveried chauffeur and as business warrants it, he will put on more cabs.

Harry Mumma, Bldg. 4-3, tells us with deep sorrow in his voice that he has witnessed the passing of his faithful old jallopy which has served him well for many moons. The other morning he tried to start old Methuselah, but nary a snort would he emit. So Harry, in disgust, called the dead wagon and had him carted away. We hope that his new gas gulper will be as everlasting and faithful as the old.

As a plow jockey, "Doc" Markley, Bldg. 4-3, is not much of a success. The other evening he sallied forth to do a little tilling of the soil, but dark tragedy lurked in the offing. As "Doc" was wending his weary way homeward, his horse became frightened and unhorsed him. "Doc" made a sensational contact with the ground. The result being one badly scraped front paw.

The girls of the Switch and Mechanism Section, Bldg. 4-3, held a surprise housewarming party on Nellie Williams and Gladys Balyeat recently in the form of a Hard Times party. All the guests came dressed to suit the occasion, and a gift was presented to the hostesses. Adele Kuckuck's costume was patterned after the latest thing in hobo attire. Marjorie Hargrave was dressed in the latest "midriff" style. Games were played and lunch was served late in the evening. Those present were Leora Carpenter, Sadie Wolff, Mildred Raymond, Fern Truelove, Carolyn Hans, Adele Kuckuck, Myrtle Bennett, Irene Martz, Gladys Brown, Marjorie Hargrave, Gladys Balyeat, Nellie Williams and Charlotte Stanford.

Fall weather may remind most of you that it's time for a weiner bake but we know some people who think the Spring is just as good. The girls in Bldg. 17-2 office, Dorothy Rinehart, Helen Crabill, Merle Kirkpatrick, Audrey Hickernell, Mildred Spuhler, Luella Franke and Helen Buuck, journeyed to the Franke mansion in Elmhurst addition one night last week where they indulged in the "Great American Pastime," inhaling hot dogs with all the trimmings. What's good enough for the King of England and the President of the United States, is good enough for us.

Introducing Brother Hopeful Hector

Hold your hats folks, Hopeless Hector is off on another adventure. It has been a long time since Hopeless has done much more than keep up his record for getting into trouble and his creator, Jim Barstow, has decided that something different has simply got to happen. Hopeless, in case you don't know has a brother Hopeful who has been away from home for a long time. He's joined the army or rather has been invited to join through the processes of the Selective Service act and you'll enjoy reading the story as it unfolds in the cartoon.

Watch for the first cartoon of the series and then follow it for the next four weeks. Also if you have any ideas you think will help make these cartoons better, why not write to Jim Barstow, care of the Works News editor?

As we of Bldg. 4-3 view the passing show, we note that Frank "Darling" Phillips has discarded his patent leather trousers which served him well throughout the Winter months. Al Timme being reprimanded and chased out of his pet parking place in one of the parking lot driveways, and lastly, Marie Larimore receiving a double purpose ticket. Overtime parking and no tail light.

We hear that George Arnold, Bldg. 4-3, went to a bingo party at K. P. Hall, bingoed and didn't know it until too late. Better luck next time, George.

Artificial Lightning Generator Is Given To School By Company

A portable million-volt artificial lightning generator has been given to the University of Colorado by the General Electric Company. It will be used to test the effect of high altitude on insulation and for other research.

The generator is the one used some years ago by Dr. Karl B. McEachron, G-E lightning expert, to determine the effect of lightning discharges on power lines in Michigan, New York and elsewhere. It weighs six tons and was shipped here from Pittsfield, Mass., in 100 cartons.

"After being assembled here, the generator will be taken to various altitudes in Colorado so its impulses may be used in determining to what extent the artificial lightning it generates breaks down the insulation," explained Prof. W. C. DuVall of the university's electrical engineering department.

"Back in 1914, F. W. Peek made significant experiments at approximately sea level in which he measured effects of electrical impulses on insulation. Then he evolved the theory, hitherto not verified, that the higher the altitude, the lower the voltage breaking down insulation.

"The new equipment will permit us to check the accuracy of his theory as it applies to higher altitudes."

Initial tests will be made at Boulder, altitude one mile; Leadville, altitude about two miles; Climax, about two and one-fourth miles; and at Idaho Springs, about one and a half miles.

The generator, one of the largest of its kind in the world, was given to the university by the General Electric lightning arrester department of which V. E. Goodwin is head.

Engineers of the Public Service Company of Colorado will assist both in the research and in transportation of the equipment.

Rod And Gun Club Receives Federal Supplies

87 Compete In Table Tennis Match

Left to Right—W. Fox, D. Hart, W. Sunier, R. Hanna, Mrs. H. Myers, L. Michel, W. Rapp.

A new champion was chosen in the men's singles in the Table Tennis Tournament. Rapp, a student at Indiana Tech and a brother of Virginia Rapp, who is employed in the Regional Warehouse, Bldg. 6-4, was the winner. In the finals, he played the perennial runner-up, Bob Hanna, who has occupied that position for the last three years.

Michel and Fox, who have been doubles champions for the last three years, won again, defeating Hart and Sunier in the finals.

The women's singles were won by Mrs. Hubert Myers who also is a repeater since she won last year. The runner-up was L. Moyer.

J. Powers won the Junior championship by defeating H. Moyer.

Bats and balls were awarded to the finalists.

The affair was a success in every way. Much of the success of these tournaments is due to the experienced and expert way in which Leo Wallace keeps the event moving. It is a difficult task to handle the 87 entries without confusion and delay. Although the number of entries this year was slightly less than last year, the class of table tennis played was better than before.

Electric Underwear

(Continued from Page 1)

conduct continuous and long-term tests on the automatic electric blanket. She's a dummy stuffed with straw, but by means of a peculiarly designed suit of long underwear, her body has temperature characteristics approximating those of a human being in sleep.

Maggie's underwear is similar to that being tested for aviators flying in the very low temperatures found at high altitudes. Heat is produced by low-voltage electric current supplied through insulated copper wires sewed in parallel waves to give utmost flexibility to the underwear.

Preliminary studies indicated that the average skin surface temperature of a person sleeping is from 94 to 95 degrees and the heat normally given off by the body while sleeping is equivalent to 86 watts per hour of electrical energy. Maggie's underwear, therefore, was connected so that an energy of 80 watts was consumed with corrections for human losses by breathing.

Maggie's underwear is also constructed on the same principle as the automatic electric blanket which General Electric has been developing and testing for several years. The chief purpose and avowed virtue of the automatic blanket is to protect both the comfort and health of the human body, under normal sleeping conditions by automatically providing a uniform bed temperature, regardless of fluctuating room temperatures.

An explanation of the function of ordinary blankets makes an understanding of the automatic blanket easier. Sleepers seldom stop to think that ordinary blankets or other bed-coverings do not actually supply heat on a cold night. All the heat is supplied by the human body. The blankets merely act as insulation, keeping the heat generated by the body in the bed.

Every sleeper is familiar with the inconveniences of trying to sleep with the wrong amount of insulation—or blankets. It is hardly necessary to explain the sensations of being too warm or too cold. But few sleepers realize how their bodies are working to compensate for the differences in temperature. There is a direct relation between waking up feeling fit in the morning and the warmth of your bed during the night. On a cold night, with inadequate bed coverings, the body does more work to radiate more heat. Indeed, the engineers cite fairly usual circumstances in which a cold sleeping body is doing work which is equivalent to walking two miles an hour all night long. This work uses up calories, and the need for a big breakfast in the morning to take on more calories, is evidence of the energy lost in inefficient sleep.

SHOOTS PERFECT SCORE

L. May, Bldg. 19-5, led the G-E Rod and Gun Club team in the recent Industrial Bowser Trophy contest by making a score of 150. This consists of a perfect score on the prone, sitting and offhand targets. The team score was 447 out of a possible 450, placing the club in second place. Members of the team in addition to Mr. May were E. Pion, Bldg. 4-3 with a score of 149 and K. Griffin, Bldg. 26-2 with a score of 148.

Veterans Program

(Continued from Page 1)

this year, will be held in McCulloch Park.

The general committee includes Jim James, Bldg. 4-3, chairman; Carl Bobay, Winter Street and Jacob Sapington, Bldg. 4-B. Members of the speakers committee are A. R. Vegalues, Bldg. 18-1; Robert Loveland, Bldg. 19-5 and Elmer Haugk, Bldg. 18-2. The patriotic service committee consists of Carl Roehling, Bldg. 20-2; Wm. Smith, Bldg. 4-4, and Louis Witte, Bldg. 20-1. The publicity committee includes H. L. Smith, Bldg. 21 and Howard Orr, Works laboratory.

Elex Annual Party For Mothers Monday

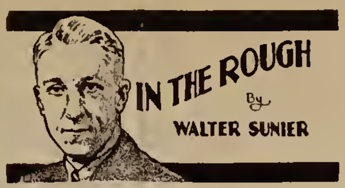
The annual Elex Club mother and daughter party will be held next Monday at the G-E Club starting at 8:00 o'clock. Gifts will be presented to the mothers and a program consisting of an operetta "The New Minister" will be presented.

Special honor will be paid to the oldest mother attending, the mother coming the greatest distance and the mother having the most daughters working for General Electric.

An American applied at a Canadian recruiting office to enlist.

"I suppose you want a commission," said the officer.

"No, thanks," was the reply, "I'm such a poor shot I'd rather work on straight salary."



Now is the time for all good men to start swinging—not on a gate or on a rope but with a golf club. If you don't get started now, some of the boys will be ahead of you. Get them old joints limbered up and get the blood coursing through your veins by contact with old Mother Earth. You will hear the murmuring of the brook, the wind in the trees, the birds in the thickets and you will see the blooms of the spring beauties among the trees. And as you go down the middle of No. 18 fairway at Brookwood, you will find three tiny birds in a nest about a hundred yards in front of the tee. At first we could not but wonder why the mamma bird ever picked the middle of the fairway to make a nest but evidently she is smart and knows that is the place least frequented by golfers.

What's the difference if it does rain? Harris, Townsend, Lee, Allen, Edgar, Didier, Kirke, Saaf, Leegard, Schwanz and others we did not see braved the rain last Sunday and didn't get very wet.

Billy Wehrs has been promising faithfully to get out for the last two Saturdays but the press of business has kept him away. Next Saturday, sure, he says now. It is time P. O. Noble gets out and gets into the old Noble swing. Another one who should be wielding the sticks is Rush McClure about whom P. O. says, "Not far but always down the middle."

Nick Smoley (who should be called Smiley), the genial giant, who has the audacity to address us as "Shorty," is getting hot. Perhaps we should say hotter because he has always been a hot number when it comes to golf. On the very windy Sunday a week ago, he shot a 39 on the second nine at Orchard Ridge with a 7 on No. 10. As further evidence of the heavy wind, he used a No. 4 wood to get onto the par 3, No. 17, which is 140 yards long. Evidently physique helps him in the wind or does he talk so fast the wind is nullified?

Teacher: "Who can tell me what the former ruler of Russia was called?"

Class: "Czar."

Teacher: "Correct, and what was his wife called?"

Class: "Czarina."

Teacher: "Correct, and what were the Czar's children called?"

A pause, and then a small, timid voice piped up: "Czardines."

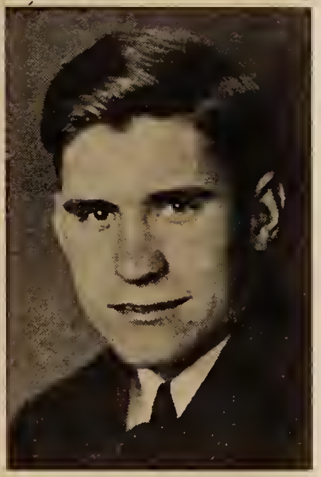
Gets Maximum Allowance Of Guns And Ammunition

Issue of military supplies by the government to the G-E Rod and Gun Club has been completed, it is announced by A. F. Bowers, president of the organization. The consignment in addition to Springfield rifles includes 17,500 rounds of ammunition, targets, gun slings and cleaning rods. The shipment represents the maximum allowance of supplies as regulated by Congress.

The rifles are of 22 caliber size, and built to the National Rifle Association specifications. They are issued to the club by the War Department for the purpose of training civilians in the foundamentals of marksmanship.

Shooters on the qualifying course will receive appropriate medals and awards from the director of civilian marksmanship. Practice shooting for qualifying awards will start at once and will be conducted on the 100 yard outdoor range each Thursday evening and Sunday morning. The supply of targets issued is ample so that all shooters may enjoy a lengthy practice before trying the official course. All members are especially urged to shoot the course as our supplies for next year will be prorated on the number of persons qualifying.

Publicity Chairman Enters U. S. Service



ARTHUR MAXHAM

Arthur Maxham, Bldg. 6-3, is among employees who left recently for a year's service in the U. S. Army. Art has been serving as publicity chairman for the G-E Club and as WORKS NEWS division editor in the Shipping and Receiving Division.

Softball League To Start Play On May 8

The G-E Club softball team for 1941 will make its bow to the public on Thursday evening, May 8, when it will take on its old-time rival the Kuehner Packing Company nine at the Municipal Beach. The game will begin at 7:15 p. m. and G-E employees are asked to come out and root for their team.

The G-E Club team is not completely formed and candidates are asked to report for tryout at the Taylor Street diamonds on the following dates: Friday, May 2, at 5:30 p. m.; Sunday, May 4, at 1:30 p. m. In case of bad weather on the above mentioned dates the tryouts will be held in the G-E Club gymnasium.

G-E To Take Part In America Defense Broadcast Saturday

Prominent Company Officials To Take Part In Program. May Be Heard Here Over WGL

General Electric will play a major part in the May 10 Defense of America program of the National Association of Manufacturers to be broadcast from Schenectady Saturday night between 6 and 6:30 central daylight time over the red network of the National Broadcasting Company.

Taking part in the program will be C. H. Lang, chairman of the company's defense co-ordinating committee, Dr. W. D. Coolidge, director of the research laboratory and Dr. E. E. Charlton of the research laboratory. The program will originate in Rice Hall in Schenectady and will be switched to actual factory departments as it progresses.

Stations within good range of General Electric cities and over which employees are likely to get good reception are: WGL for Fort Wayne; WBEN, WTAM, and WCEA for Erie; WGY for Pittsfield and Schenectady; WTIC for Bridgeport; KYW for Philadelphia; and WEAF for Bloomfield. For Lynn, the program will be heard between 9:30 and 10:00 P.M. as it will be recorded by WNAC at the hour it is given and rebroadcast at the later hour.

G-E Meter Division Moves To West Lynn

The Meter Division of the Central Station Department of the General Electric Company, which has been located at Schenectady, moved to West Lynn, Mass., the first week in May.

The new headquarters of the Meter Division will be in a recently built three-story office building of modern brick and steel construction, sound proofed, air conditioned, and lighted with the latest type fluorescent units.

This office building adjoins the manufacturing plant at West Lynn.

Battery In G-E Portable Radio Is Rechargeable

Latest Model Can Be Played On A.C. While Non-Spillable Unit Is Being Recharged

Billed with reason as "the most practical portable" ever developed, a new luggage-type portable receiver (model LB-530) has just been announced to distributors and dealers by the General Electric radio and television department, which operates on a rechargeable airplane-type storage battery and eliminates for all time the inconvenience and expense of dry-cell replacement. Heart of the new set is a plastic-encased non-spillable storage battery, and a built-in General Electric automatic battery

NOTICE
To Credit Union Members

A request is made by Credit Union officials that all members wishing to withdraw sums from their accounts give notification at least twenty-four hours in advance. This will prevent delay and assist in the efficient operation of the organization.

Confidence And Faith In Defense Program Voiced By President

Speaking Sunday night, May 4, over G-E's Hour of Charm program, Charles E. Wilson, president of the Company asserted "an overwhelming faith and confidence in the final result" of America's national defense program.

Mr. Wilson made a general summary of the progress of defense production in the hope, he said, of meeting some of the anxiety caused by "alarming statements that we have not yet fully awakened to our impending danger and that as a nation we have too little understanding of the enormity of the task which lies before us."

"Behind the headlines of the day, Mr. Wilson said, "there is an outpouring of economic and industrial activity, which will ultimately and certainly decide the pressing issues."

Citing the activity of this company as an example, Mr. Wilson said that 60 per cent of General Electric's production was now de-

(Continued on Page 2)

G-E Photographers Given High Honors

Highest honors in the commercial photographic field were awarded two General Electric photographers by the Professional Photographers Society of New York which met in Utica recently for its annual convention. Top award, the gold medal, was presented to Sherman E. Surdam, and the silver medal, for second best exhibit, to George F. Burns.

There were 44 entries, each photographer submitting sets of three or six prints. Surdam's exhibits were of a diesel-electric locomotive, a welding operation, and of a pair of hands holding a miniature airplane engine. Burns' three photos, all of which have been widely used in newspapers and magazines throughout the country, were of a big generator shaft photographed at an angle to make

• Vigilance, Our Safeguard!

General Electric has always been noted for the loyalty of its employees. Co-operation has been a by-word throughout the rank and file of the Company since the very beginning of the organization. These two attributes have been important factors in the success of the Company.

Today, more than ever before in Company history, loyalty and co-operation are essential. General Electric is engaged in vital defense work . . . without which the United States government would be severely handicapped in the grave days ahead. The Company has the responsibility not only of producing vast quantities of materials for the army and the navy, but it also is entrusted with the responsibility of guarding this production against the activities of foreign agents.

We must face realities. These foreign agents who seek to hinder defense efforts throughout the land do not herald their approach. They do not tell their business from the housetops. No, indeed! They carry on under the cloak of respectability and try to gain employment so as to join the ranks of thousands of employees, the better to spoil materials, slow down work, damage equipment and in countless other ways, hinder the job in hand, if indeed not wreck it completely.

Obviously General Electric is co-operating with federal authorities in taking every possible precaution to prevent the hiring of foreign agents.

But, if by chance such individuals are able to elude all safeguards and gain employment . . . then the only remaining effective protection against them and their nefarious activities is an INTELLIGENT AND ALERT VIGILANCE on the part of all loyal employees.

Just as a disloyal employee can be in a position to spot weak points where interference to production could be most effective . . . so can a loyal employee be alert to such possibilities and be on the lookout for any suspicious actions.

Experienced men on any job know how a man should conduct himself at work. Undue interest on the part of relatively new employees in matters pertaining to federal contracts, defense materials, manufacturing methods WHICH ARE NOT DIRECTLY RELATED TO HIS WORK should be reported promptly to the foreman.

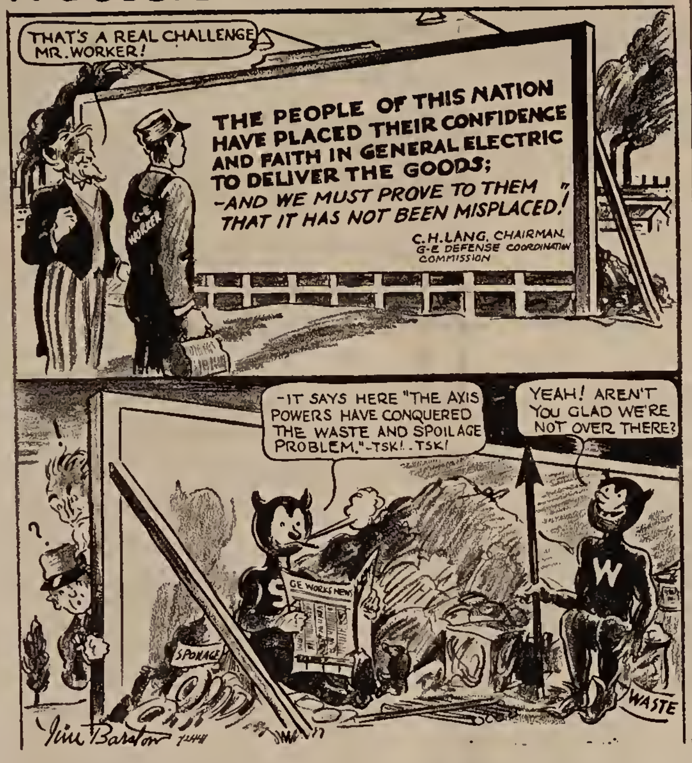
The alert co-operation of all loyal employees to this ever present danger is just as necessary as their productive efforts. Eternal vigilance is always the price of safety. After all, if anything happens, not only the Government and the Company will suffer, but also the individual employee.

• The Way To Skill

Generally speaking, workmen are supplied with most of the tools and equipment they need to produce their best work. But there's one important thing which no tool room can supply—and that's skill!

Skill comes from learning to do each new job the right way and then taking care to do it that way every time. Skill means turning out the right quality and quantity without accidents or waste.

A DOUBLE-BARRELED CHALLENGE



THAT'S A REAL CHALLENGE MR. WORKER!

Defense Program

(Continued from Page 1)

voted to defense and that production was increasing every day. Equipment for navy propulsion, airplanes, radio and other defense items by General Electric are on or ahead of schedule, he said. As an instance of the sacrifices industry is making, he pointed to the Company's action within the last week in freezing the design of household radio receivers for the duration of the emergency.

"During the last week," he said, "we have been given an assignment by the Navy that requires a large number of highly trained engineers, for research and design of equipment urgently required by the Navy. These skilled engineers are available only in General Electric's radio receiver design engineering department. By agreement with Secretary Knox, Admiral Stark and Admiral Bowen, the design of our household radio sets is now frozen for the duration of the emergency and the entire engineering organization is immediately assigned the task of speeding up the design and production of the Navy's newest requirements. If this is a sacrifice on the part of the General Electric Company, as generously stated by Secretary Knox, it is one that the Company is indeed happy to make in the circumstances."

Mr. Wilson added that "the spirit of all American industry is similar to ours in the General Electric Company — airplanes, guns, mortars, tanks, shells, ammunition, rifles, ships and trucks are being produced in ever increasing volume. The building of new factories, now completed or nearing completion, has been a prodigious and successful undertaking. And yet, everything we have all so far accomplished and contributed may be but a small part of what we still have to do before the raging issues are resolved."

"Much emphasis has been given to the disagreements within industry, and they have unquestionably cost America production which is badly needed," Mr. Wilson said. "We must now face the situation much more realistically, and anything which tends to slow the flow of vitally necessary defense materials must be subordinated to the cause of an 'all out' defense program."

Mr. Wilson expressed the congratulations and thanks of the General Electric Company to all of its employees for their "harmonious, self-sacrificial devotion to the defense work we have undertaken."

Plastic Pulley Sheave Replaces Aluminum

A new use of plastic part to replace aluminum has been found by the General Electric Plastics Department in the development of a plastic pulley sheave. The first application has been installed in the G-E Pittsfield plant on wire enameling machines. A sheave eight inches in diameter is used in this case, and it is believed that the plastic development is adaptable to larger or smaller installations. It is made of molded laminated Textolite, is light in weight, but has all the necessary dimensional stability and chemical resistance. The plastice sheave has several advantages over its aluminum predecessor in the wire enameling machine. It does not pick up the coating from the wire and, therefore, no sediment is left in the groove as was the case with aluminum. Another feature is that the plastic sheave does not become as hot in operation, reducing the need for lubrication.

G-E Battery Radio

(Continued from Page 1)

charger. The new radio offers three alternatives to its owner at the turn of a switch—it may be played on battery alone; it may be operated on alternating-current and will bring in programs while the life of its battery is being renewed; it may be recharged swiftly and silently on AC without concurrent radio operation.

The new set has other features designed into it by G-E radio engineers to make it the leader of a newly-announced line of portables.

(Continued on Page 8)

AROUND THE CLOCK WITH G-E

Wow, what a sink! I never thought I'd go off the deep end about a kitchen sink, but so will you, after you see the new General Electric cabinet type. Made of gleaming white porcelain, it is 48 by 25 inches with a drain board. It has a swing type spout with faucets. There's a five-inch opening with a cup-type strainer. The cabinet is of heavy steel with shelves, a towel bar and basket for your soap.

And here's the best part of it . . . This sink is all set to have a G-E disposall and a dishwasher hooked right up with it. So, if you are building this spring and don't want to spend the extra money for the disposall and dishwasher until later . . . why not put in this new one and maybe later you'll get the money to fix it up ultra modern.

There's one thing about all these new General Electric things for the home . . . most of them are designed to permit their use with something else. You really can start with nothing but a sink and wind up with a whole kitchen. I know one man who started his electrical life with just a 25-watt light bulb and now he has a houseful of things electrical.

NAMED TO NEW POST

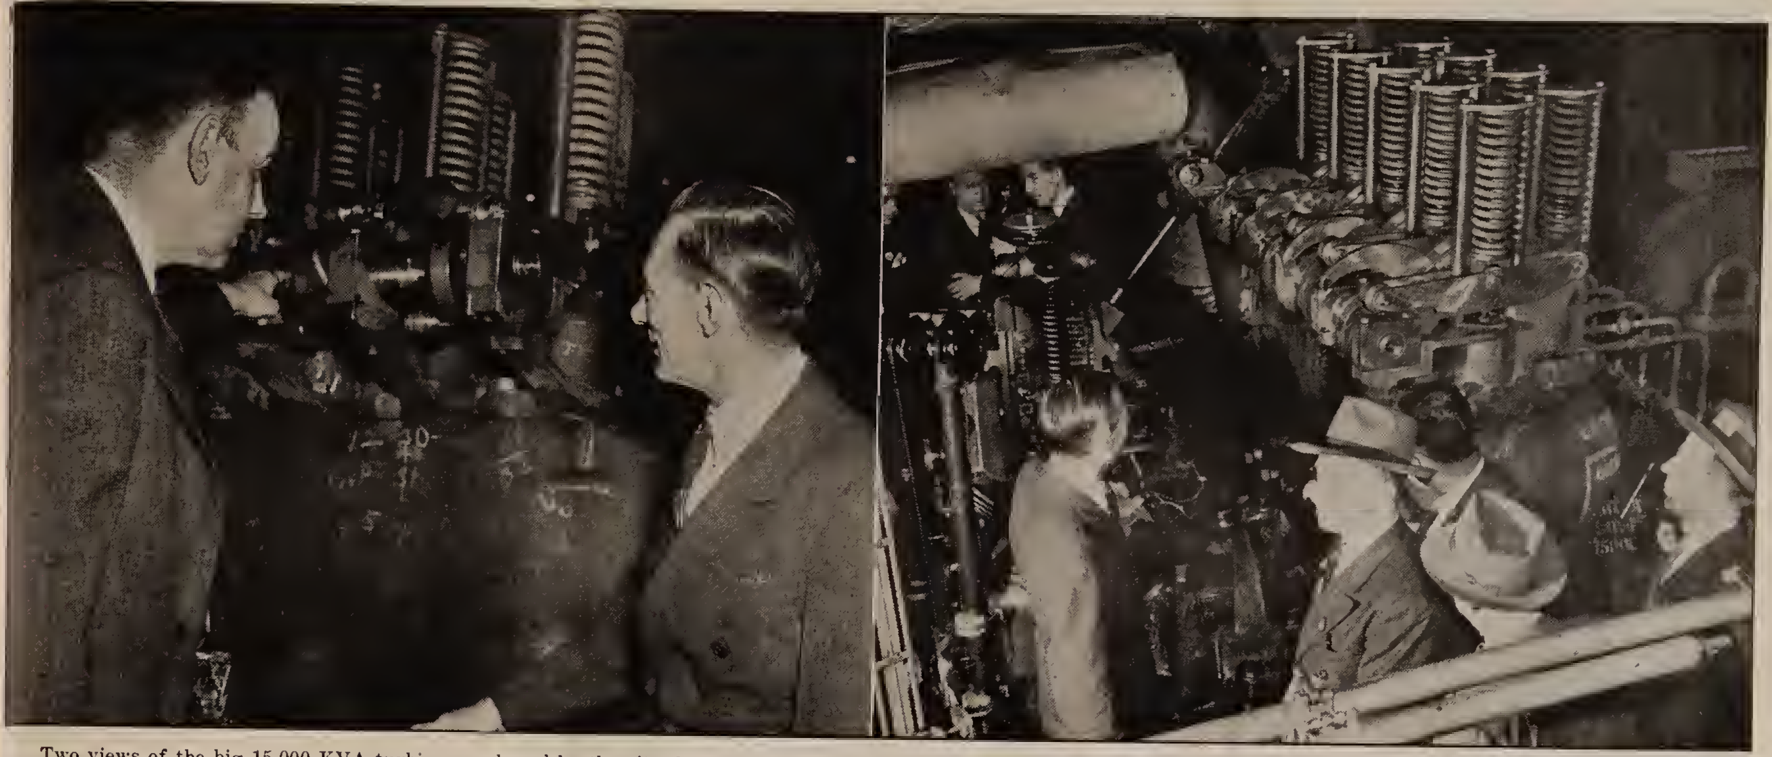
W. H. FRANKE

The appointment of W. H. Franke as superintendent of the contributing section and material service department in Bldgs. 17-1, 4-B and 6-B, is announced by Assistant Manager C. H. Matson. The appointment became effective on Monday, May 5.

Mr. Franke joined the General Electric organization in 1908 as a toolmaker. In 1920 he was made foreman of the Meter Tool Room and two years later assistant foreman in the general tool room. In 1931 he was appointed tool room foreman at Winter Street and in 1934 was assigned to duties as tool designer for the Refrigeration Division.

He became general foreman in Bldg. 17-4 in 1936 and continued in this capacity until July 24, 1939, when he was appointed section superintendent of Bldg. 17-1 and a portion of Bldg. 2-1, which position he was holding at the time of his present appointment. Mr. Franke resides at 4003 Tacoma Avenue.

City Officials Interested Spectators Of Final G-E Turbine Test



Two views of the big 15,000 KVA turbine purchased by the city for service in the plant of the City Light & Power Works are shown above. The turbine will bolster generating equipment at the city plant where one turbine, of the same capacity, now carries most of the burden of power and energy generation. Pictured at the left inspecting the new equipment are Mayor Harry W. Baals and H. L. Wirt of the Schenectady Works. In the foreground of the picture to the right are Mayor Baals, Mr. Wirt, Robert G. Beams, chairman of the Board of Works; Otto H. Adams, general superintendent and Wayne T. Kehoe, chief engineer of the City Utilities.

Once Neglected Invention Becomes Major War Item

Probably the happiest and most triumphant man in America today is Dr. Sanford A. Moss, the General Electric engineer who developed the supercharger, the device which makes possible the altitude, speed and range of the modern airplane.

"His greatest creation, the turbosupercharger, at last has come into its own," writes Hickman Powell in an article on Dr. Moss in the June issue of Popular Science Monthly. "It has become one of the most important focal points in America's sudden war effort. No effort or expense is being spared to push its mass production. At last the sky is really the limit."

Twenty-three years ago, in order to help beat the Kaiser, the writer recalls, Dr. Moss harnessed up a red hot tornado, sheathed it in heat-resistant metal, and hitched it to a Liberty motor at McCook Field, Ohio. Then, sheltered behind a barricade, he opened the throttle up. With a wild roar of broken connecting rods the airplane engine disintegrated and the spark plugs tore out through the roof.

Dr. Moss, a small scientific gentlemen with a Van Dyke beard, knew perfectly well what he was doing in this seemingly irrational behavior, just as any airplane pilot today knows that you are likely to tear your engine to pieces if you open up wide at sea level with a Moss supercharger. He was giving the turbosupercharger its first demonstration, and he did his violent deed at the insistence of skeptical air corps engineers, to convince them that his odd contraption was worthy of an official test at the top of Pike's Peak, in the rarefied atmosphere it was built to conquer. At half throttle they had refused to be convinced.

On Pike's Peak, in September 1918, the turbosupercharger proved itself. In those days an airplane engine lost power rapidly as it gained altitude because less oxygen was sucked in to mix with the fuel in the combustion chambers. The turbosupercharger was a centrifugal compressor, or fan, which forced air in sea level quantities into the engine's carburetor. In the words of Dr. Moss, it "kidded the engine into thinking it was at sea level. The compressor was revolved by a turbine, driven by a whirlwind of flaming fumes from the engine's exhaust.

The test Liberty motor, which had produced 350 horsepower at Dayton, would give only 230 horsepower at the 14,000-foot altitude of Pike's Peak. But when Dr. Moss cut in his supercharger, it gave 356 horsepower! And this full power was much more valuable than at lower altitudes, for in the thin, high atmosphere an airplane could move at high speed with much less air resistance.

One of the great obstacles to flight had been conquered. In 1920, Major R. W. Schroeder flew to 33,000 feet in a biplane equipped with Dr. Moss' turbosupercharger. Macready, Stevens, Street and other army aviators made more records.

Dr. Moss also developed the geared supercharger, a small centrifugal compressor built into an airplane engine, which takes its power from the engine crankshaft by means of gears. When he went into what he thought would be retirement at the age of 65, on Jan. 1, 1938, after 35 years of engineering research for General Electric, every modern American airplane engine except a few small pleasure plane motors was equipped with a geared supercharger made from designs by Dr. Moss, and the turbosupercharger had some use on military planes.

The story of the device is the story of Dr. Moss's life. At 16 he was apprenticed as a mechanic in San Francisco, where he was born, in a shop which made air compressors. After finishing his four-year apprenticeship, he became an engineering student at the University of California, sweeping up the floor of the college shops to earn his way. By 1900, he had bachelor's and master's degrees and went on to Cornell University where he received his doctor's degree in 1903.

His graduate work on a projected gas turbine attracted the attention of General Electric and he went to work in the company's West Lynn, Mass., plant and there began his supercharger work during the World War for the National Advisory Committee for Aeronautics.

Important as it was, Dr. Moss's supercharger department grew slowly. For years it occupied one room and the engineering staff numbered five men. While the exhaust-driven turbosupercharger took over nicely at around 15,000 feet, making it possible for the engine to "breathe" normally up to 25,000 and even 30,000 feet and to get on comfortably up to 40,000 feet, few people wanted to fly so high.

Now all that is changed. There are turbosuperchargers on the Boeing flying fortresses, Lockheed interceptor pursuits, Republic fighters and many other planes. The engineering staff has been multiplied astronomically. Production experts have been moved in. Great factories are being rushed into commission. Millions upon millions of dollars are being poured in. Economically as well as theoretically, the sky is now the limit.

And back on the job in the midst of it all is Dr. Moss himself, called back to work as a consulting engineer—as happy, dazed and excited as two children at the circus. At 68 years of age, his dreams have come true.

War Time Conditions Offer No Obstacle To Canadian Travels

Employees contemplating journeys into Canada during such vacation times as they may have throughout the coming summer, will be interested in the following excerpt from a statement furnished through the Canadian General Electric Company:

"In Canada you'll be in a foreign land, with all the thousand details that make foreign travel interesting—yet the international border means less than ever, now that we are sending all-out aid to the British Empire's war effort. Canadian authorities put no restrictions on your travel—no passport is needed to enter Canada. For convenience when returning home, have some simple means of indentification ready for our own immigration authority, a birth certificate, an auto or driving license. A tax bill or similar paper will do well enough.

"Incidentally, take your sporting equipment along if you like—you may take in cameras, golf clubs, guns, camp equipment, outboard motors and all similar equipment without payment of either duty or deposit. In the case of firearms, write to the Commissioner of the Royal Canadian Mounted Police for a permit."

SCIENCE FORUM

by A. L. Hawkins

Q. What kind of material could I melt silver in, and what material could be used to make a mold in which to cast it?

A. Use graphite. It is a material which is inexpensive, easily worked, and it will stand the temperature of the melted silver.

Q. If the temperature of the sun should increase enough to melt all of the ice and snow in the world, would this raise the level of the oceans enough to submerge most of the earth?

A. It has been estimated that such an effect would raise the level of the ocean about 40 feet. This, of course, would submerge large areas of land, but not a large proportion of the total land now above water.

Q. What do cold germs look like?

A. Nobody has ever seen a cold germ. It is probable that the organism which causes the common cold is what is called a filterable virus. This is an extremely small something which can pass through the finest filters which it is possible to make. It is so small that it cannot be seen even with the highest power microscope.

Q. When painting pictures in the evening, what kind of lamp should be used to give light of the same color as daylight?

A. Some of the new daylight *fluorescent* lamps give a pretty good imitation of average daylight.

Photographers Honored

it appear like a giant cannon, a turbine casing which had the appearance of a wartime mortar, and G. E.'s new 1,000,000-volt industrial x-ray unit.

First And Second Shift Elex Club Members Entertain Mothers

More than a thousand first and second shift Elex Club members, their mothers and in some instances, grandmothers, attended the annual mother and daughter parties held last week. Special recognition was given the oldest mother, the youngest mother, the mother coming the greatest distance and the mother having the most girls employed with General Electric.

Top left is shown a general view of the first shift party. The group top right represents five sets of three generations. The grand mothers, daughters and granddaughters in that order are as follows: Mrs. Mary Schlotter, Mrs. Clara Gidley and Geraldine Gidley; Mrs. Clara Wysong, Mrs. Maud Acker and Mary McAdams; Mrs. A. Schust, Mrs. Charles Schneider and Pauline and Margaret Schneider; Mrs. George Brudi, Mrs. Fred Kruse and Evelyn Kruse; Mrs. T. Smith, Mrs. A. Stephens and Lena Stephens.

The center row are from the second shift party. Center, left—Mrs. C. Manes and daughters Joan and Barbara. Mrs. Manes was the mother having the most daughters employed here. Two other daughters employed here were unable to attend. Center—The oldest and youngest mothers, with their daughters.

Center, right—The mothers who came the greatest distance: Mrs. John Schum and daughter Delores and Mrs. Guy Scott and daughter Rachael.

Lower left—President Eva Lynn congratulates the youngest mother at the first shift party, Mrs. Emma Johnson and daughter Pauline. Center—The oldest grandmother, Mrs. Caroline Young, 88 and her granddaughter Hilda Walda. Lower right—The oldest mother, Mrs. Emma Richey with her daughter Emma Reiling and Irene Meyers, club adviser.

»» NEWS THROUGH THE PLANTS ««

From The *Feminine Viewpoint*

By Irene Perry and Hilda Barthold

A small nation once occupied a large place in world affairs. Its people refer to the period as their Golden Age, after the Golden Age came a great Folly, but out of the Folly there came a Golden Harvest. The Harvest continued for three hundred years, then came an invader, after this the harvest was no longer golden. Such is the story of Holland and its tulips.

The seventeenth century was the Golden Age of the Netherlands, or of Holland as we usually term the country, their flag flew on more and farther-traveling ships than that of any nation. Tulips were brought to Holland from Persia in 1593 by a botany professor at the Leyden University. So many people wished to buy the bulbs that he placed an outrageous price on them to be free of the demand, but the tulips were stolen one night and not heard of for several years after which a large number of Dutch gardens had the brilliant blooms.

The foolish period that came out of the Golden Age of Holland is referred to in history as the "tulip mania," but the Dutch call it the Great Folly. This folly or mania was nothing more nor less than gambling on the bulb market. The mania reached its height in 1636, rare bulbs were sold for thousands of florins each; great and small, rich and poor were affected. No bulbs were actually shown, but according to paper profits everyone was rich and some were fabulously wealthy. But the bubble burst a last and almost overnight the rich were poor and the poor destitute. So back to earth to work once more and to grow tulips rather than trading in them.

Bulb raising grew to a major world industry. For three centuries the best flower bulbs were produced in Holland, the moist atmosphere, the well-drained soil and the industrious Hollanders formed the right combination.

As immigrants from Holland came to the United States they formed settlements in southwestern Michigan as the shore area of Lake Michigan terrain and soil conditions were similar to that of their homeland and bulbs did very well indeed in this New World location.

The natural increase of bulb plantings is a slow process and the American market did not at first warrant the importation of any considerable growing stock. More Dutch trained bulbmen came to Michigan from time to time and established farms at various places, and Holland, Michigan, became the center of the bulb-raising industry.

Since the war in Europe has cut off the importation of bulbs, it is necessary that an American source of supply be developed. In Long Island there is considerable planting, but a million bulbs is a small stock when the situation calls for one hundred million which is the annual American demand. Probably the area between Washington and Oregon will provide several million bulbs, but the Dutch growers in Michigan are looked on as the mainstay of the American supply. The American grower has before him the opportunity to develop a new major industry.

The annual Tulip Festival held at Holland, Michigan, has focussed attention on this area for the past 12 years. The 1941 Festival dates, May 17th through the 24th, are set to coincide with the blossoming of the tulips. Three thousand Hollanders don the colorful costumes and quaint wooden shoes of their forefathers and stage pageants, parades and exhibits. Tulip Time began as a flower festival, but has developed into a floral-folk exposition in which the Dutchman's pride of ancestry has resulted in the revival of many traditions of Old Holland.

19-5 Office Chatter

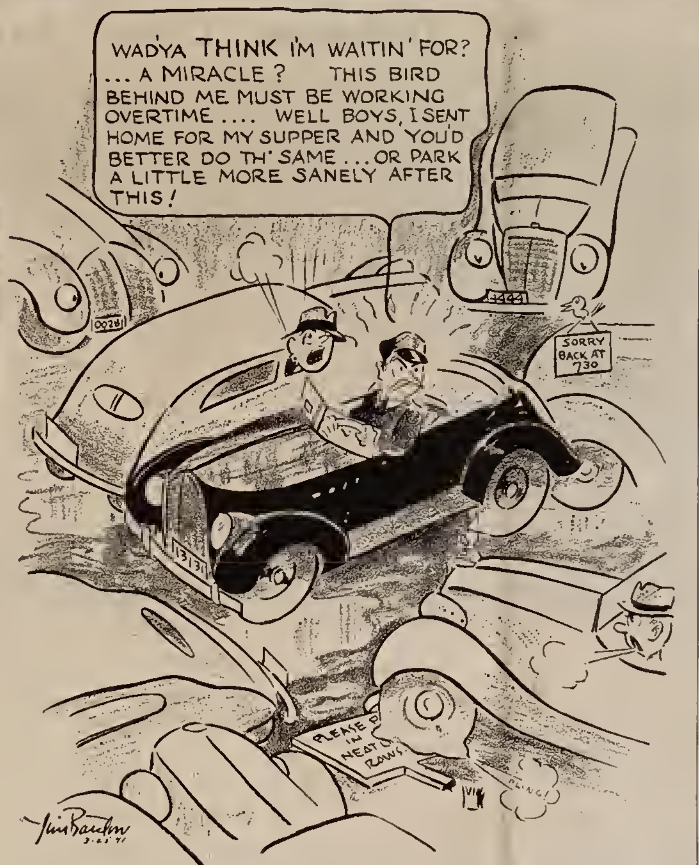
Do you remember way back when Bill Caston and Walter Larimore spent the night at Angola. That brings up the question, do you remember when the Toonerville trolley was the only way to get to Lake James outside of horse flesh. . . . Never let it be said that packages can come into the Bldg. 19-5 office and the gals not find out what is in them. No secrets in the package. . . . Congratulations go to Alma on keeping company with her typewriter.

The boys in Bldg. 19-4 look so cute and natural pushing those little trucks around. Is it from experience or is it training?

The other day the wind was blowing so-o-o-o- hard that Glen Miller and Bob Haslup, in Bldg. 19-4, had to put on the cutest make-shift hats. What you boys need are hairnets for those fly-away tresses.

If Edyth Roller doesn't stop flashing that bunch of rubber bands under peoples noses she may cause a riot. It seems the bands feel and look like an octopus.

Ask Jack White, Bldg. 19-4, if she likes the aroma of onions. At any rate Jack had no trouble on the street car for the nice man said he liked onions, too.



WAD'YA THINK I'M WAITIN' FOR? ... A MIRACLE? THIS BIRD BEHIND ME MUST BE WORKING OVERTIME.... WELL BOYS, I SENT HOME FOR MY SUPPER AND YOU'D BETTER DO TH' SAME ... OR PARK A LITTLE MORE SANELY AFTER THIS!

19-4 Spot Jottings

About twenty fan motor girls treated themselves to a chicken dinner at Big Lake last week. They had a grand time but those big platters of chicken were perhaps a little too tempting. At any rate Betty (just call me Doc) Minard came to the rescue with a whole purse full of pills, powders, drops and what have you, thus keeping the situation well in hand. . . . Helen Meuhlmeyer, Bldg. 19-4, and William Bierbaum, formerly of Bldg. 19-4, now have a joint name. Congratulations to Mr. and Mrs. Bierbaum. . . . Best wishes and happiness to Jeanette Crum who was married last week. . . . Ruth Tutwiler is spending a week at Hattiesburg, Miss., visiting her nephew at Camp Shelby. . . . Clair Geigher knew that Herb Buck had never been any farther south than Dunkirk so he and his wife took Herb and Mrs. Herb on a tour of southern Indiana. The trip was a great success as Herb exclaimed, "By gum, I didn't know Indiana was so purty, and you people who merely go across town after your badges, when you forget them, are really pikers. Clair went clear to Zanesville for his and I am not kidding."

Sunbeams From 17-4

Now the department can breathe easy again and so can Jerry Pierce, now that the new little son has arrived. Congratulations to Mr. and Mrs. Pierce, and we are happy to have Jerry sufficiently recovered to be on the job again.

We are happy to have Mary Bishop back with us again, Mary was severely burned at home several weeks ago.

Wayne Worman can whinny like a horse, and even though he doesn't like it, we might call him Barney.

Annabel Kinsell doesn't agree with our large scales, she thinks they weigh large.

One need not look outside to know that it is spring, all you have to do is look at Beth Garman and Dorothy Kintz, such ambition, my, my.

William McClish, Bldg. 27, is the grandpa and Martha Ruhl, Bldg. 4-3, is the aunt of little Billy Lee McLish who arrived the other day weighing 9 lbs. 8 oz. and are his relatives ever proud of him!

We've heard of paying bets late, but Ruth McCuaig, Bldg. 4-3, takes the cake. She just paid an election bet last Tuesday, April 29th.

SANDY SAYS

Once upon a time someone "Broadgassed" about "Contests" and never once spilled a word about "Team Work." But not being a Fairy Story character, I won't let ye off without at least several, so, if ye don't want to "read all about it," just skip on down to the so-called humor at the end o' the column.

Contests usually require team work. Baseball needs teams, armies need team work, and one of our most delightful forms of gambling needs a pair of well teamed cubes.

The trouble with writing about teamwork is that so much has already been said. It's hard to say anything new. Ye know all about the two donkeys tied together and the two piles of hay that they couldn't get by yanking at each other, so they both ate one pile and then the other together. Weel, I'll not bore ye with that one. The only difference with me is that I don't have another donkey (ye have another name for him) tied to me. I may find a rope around my neck, though, if ye catch me.

And then there is always the comparison of anything under the sun to a baseball team. Each man on the team is a specialist (not the kind ye are thinking about) and has his part in the game. Even the bat boy has his part to play, and sometimes a batboy can win a game, by doing something at the right time—probably by making a suggestion! Now, need I say more?

Well, I will. Last Saturday my uncle Angus was trying to get his two boys to mow and rake the lawn. He wasn't getting team work out of them. Cousin Colin and I, like a couple o' musicians, tried horning in. Weel, all we got was discords, until Colin promised the boys a nickel each of uncle Angus' money.

"Ye'll make me spoil them, lavishing money on them like that," said Angus. "But that's the only way to get them to work together, they're so different from each other."

"Ah, yus," said Colin, "But ye'll never find any two children alike. Why, I've only got one and even he isn't."

Measles are quite prevalent in Huntertown. Can it be that was what caused Velva Waterson's, Bldg. 4-3, face to be so red as she got off the first bus home from work Monday morning, or was it because she forgot her identification button?????

NEWS THROUGH THE PLANTS

News On The Nose From 4-5

"Time and tide wait for no man" and Irvin Hott discovered this the hard way. Several weeks ago, he happily awoke early Sunday morning and breezed down to the Bldg. 4-5 office twenty minutes early so he could be the first one to work and greet the others as they sauntered in. As sad tales end, so did his, for everyone was working when he got there, and he was just forty minutes late. It was the same old story about forgetting to turn the clock an hour ahead. . . . The men in the Bldg. 4-5 commutator section have been complaining of the blinding light shed frequently on their work. They blame this dazzling phenomena upon the rainbow dresses worn by Mamie Allen and Jean Hermann. . . . Tsk-Tsk, we are ashamed of them. . . . Jean Saunders, lovely little red-head of the office, is sporting a necklace made of cork bobbers. Andy Lee is trying hard to find what fish-bait company handles them. He's trying to catch another poor fish to keep him company. . . . And the great fisherman, Charlie Reid, hasn't had any time to go fishing lately. The sheep shearing business has been too good lately. . . . "Tiny" Stauffer bought so much candy from the candy lady that it so confused everyone, half the crowd started to follow him thinking that he had taken over Annie's job. . . . Amid other signs of summer's approach is the depleted store of ice-cream which finally arrives in the Bldg. 4-5 office after having made the rounds. It's heart breaking to see how Gert Reinking and Betty Williams struggle to keep from weeping when all they can find are Brown Giants. . . . Another sure sign is when Fred Campbell and Al Olson shed their suit coats in homage to the fierce heat. . . . And we see a real feud in the offing between Jeanne Fox and Irv Koehlinger. The question being, "to turn or not to turn on the fan when the torrid heat waves overcome the lady in question." Irv complains of a stiff neck when the cooling waves turn his way. So far the compromise has been to direct the fan toward the ceiling.

Forest Whonsettler, Bldg. 4-3, is bemoaning the fact that his boat, which he keeps parked on Fertilizer Lake is A.W.O.L. This is causing him no end of worry. We suggest that he see Sam Allmandinger, Bldg. 4-3, who, by the way, is establishing a summer loafing pavillion on Big Long Lake. Perhaps Sam might have borrowed Forrest's scow with all good intentions in mind.

Katherine Shaffer, Bldg. 4-3, spends more money for gas going back home to get her button than what it really costs her to go to and from work. Why don't you just leave your button in the car, Katherine?

Deaths

Bertha Lange, an employee since 1916, died Monday at her home 3813 South Wayne avenue after an extended illness. She had been employed in Bldg.17-2. Funeral services were held Wednesday at the Emmanuel Lutheran Church and burial in the Concordia Cemetery.

Ruth Lange, Bldg. 12-3 wishes to take this means of expressing her appreciation of the many kindnesses extended her sister during her illness.

Will Exchange "Civies" For Uniforms

The names of two Fort Wayne Works' employees are added to those who already have left for service with Uncle Sam. Right, Virgil P. Kline, General Service Division is saying goodbye to R. S. VanAuken. He has not yet been assigned to any particular camp. Left, O. J. Lacerte receives best wishes from R. M. Hartigan, superintendent of the Motor-Generator Division. Mr. Lacerte holds a major's commission in the Reserve Officers and will be stationed at Camp Davis, Hollyridge, N. C. For the present Mr. Lacerte's family will remain in Fort Wayne.

Is Zat So?

The main topic of conversation all over the plant has been pertaining to the raise recently granted. Here are some of the reactions and remarks made by the Bldg. 17-1 gang:

Loyal Decker—I'm gonna buy a bigger and better lawn mower.

Howard Eastman—I'm gonna celebrate!

Oscar Schelper—Won't do me any good until I get it—then I'm gonna pay bills.

Bill Franke—I'll have to take a trip somewhere this summer.

Veora Habig—Just another reason why I'm glad that I work at the G. E.

Argend Denny — It's a good thing, 'cause I'm about bankrupt.

Mabel Lieberenz — I'm putting mine in the Credit Union to save it to buy chickens.

Russel Gibson — My wife will take care of that!

Art Brockmeyer—I've got plenty of places for it!

The new prosperity was soon displayed in Bldg. 17-1 office. Henry Gollmer was outstanding in his new dark blue trousers. Lillie Pion added a little bright color to the office when she bought that new dress. Mabel Lieberenz purchased new shoes! . . . Bill Uecker will probably have to buy a new hat since he had his picture in the Works News as a new member of the Quarter Century Club. . . . Last week's mystery concerning La Moyne Gale's mustache has been solved. Gale was growing a moustache to improve upon his appearance . . . Then why did you shave it off, Gale?

See you next week!

The Question Mark.

Some of the boys in Bldg. 4-3 are interested in and are going to promote horse racing this coming summer. Archie Boren has a string of first class plugs that do not like green grass, so he has to send them to Kentucky to eat blue grass. Archie is to be general manager, Carl "Truck" Clevenger, chief handler, and Eldon Mee, the jockey. There ought to be something good come out of this combination.

M.B.A. PATIENTS

Transformer: Bernice Rodemund, 937 Eckart St.; Wanda Letts, 1718 Richardson; Jean Geyer Grant, 1605 Columbia Ave.; Mary Fogwell, Markel, Ind.; Ervin Becker, St. Joseph Hospital; Dewight Sutton, 1213 E. Lewis St.; Rosemary Mentzer, 2307 Miner St.

General Purpose Motor: Elden Burns, 1427 Wall St.; Jeanette Ehrman, 1419 Taylor St.; Dorothy Forest, 1802 Beyer Ave.; Paul Groh, 2334 Glenwood Ave.; Thelma Johnston, 725 Anderson Ave.; Alvin Myers, Lafayette St.; Ella Mayo, 829 Belle Ave.; Marjorie Macke, 430 Buchanan St.; Olive May Waters, St. Joseph Hospital; Edward Willey, 801 Grace Ave.

Apparatus: Irma Antoine, 2516 Bowser Ave.; Carl Moore, St. Joseph Hospital; Bernard Aseis, 3625 Piqua Ave.

General Service: Merle Bachellor, Payne, Ohio.

Series and Specialty: Mary Markwith, 2438 Weisser Park Avenue.

Tool: Chester Reynolds, Decatur Hospital; Louis Gage, 677 Huffman St.

Winter St.: Virgil Lomiller, Methodist Hospital; Raymond Bailey, Methodist Hospital.

Office: Phyllis Farrell, 2116 Reidmiller Ave.

Shipping Dept.: Ruth Wichman, 2314 Eby St.

Left the hospital: Raymond Lehrman, Donna Roe, Maxine Druhot, Betty Griffith, Bruno Gulvin, Robert Truschman.

Returned to work: Alma Geary, Joe Houser, George Tousend, Walter Kline, Erma Huhn, Robert Happel, Mary Mace, John Miles, Elva McMaken, Ermeric Rembarger, Elizabeth Skevington, Wade McCutcheon; Neal McNamara, Naomi Newhard.

Thisa And Thata 19-5

"In the Spring, etc."—What I am trying to get across is that Marjorie Wittmer is wearing a diamond. . . . We're glad to see all our sick folks back at work again. . . . A correction on last week's items. The name is Hertel. . . . Can you imagine Connie Zollinger without that good smelling cologne.

26-5 Tool Bits

There must be wailing and gnashing of teeth among the fair sex for one of our most eligible bachelors, Edward Grote tripped up to the alter last Friday and firmly promised "I do." . . . Doris Windhorst must have a reserved seat in the Lafayette bus. "Purdue here we come." . . . Ed Schafenacker probably got tired of his streamliner breaking down. At any rate he came to work in his truck. 'Tis said he is taking reservations for check cashing trips down town on Friday noons. . . . George MacAfee must have missed that notice in the Works News as he was seen trying to come through the Union Street gate last Monday. He walked back. . . . Edith Williams used the old bean during a recent rain storm. Instead of closing a window she is reported to have scurried under a table. . . . Ozzie Nahrwold is probably getting a taste of the future for it is reported his daughter is keeping him broke buying new cars—April fool they're toy cars. . . . The new way to attract attention is to block traffic at a popular hamburger stand. Ask Yolande Rockstroh for details. . . . Ann White must like the street cars. She gets on at one end, walks through the car, exits and then boards another. . . . What is Hueston Hicks intimating when he sings "It Won't Be A Stylish Marriage." Some of these days he probably will be singing "Only A Bird In A Gilded Cage." . . . Henry Gick was almost scared 'batty" when something whizzed by his dome. He investigated, secured a bat and punished the bat. . . . It is suggested that Al Rondot could use a periscope while parking in the lot as a means of saving fenders. . . . Ross Cohagen gave up his plans for his Waterloo, Iowa trip. He sunk his money in a well—a deep one. . . .

A feud rivaling the famous Hatfield-McCoy feud of the Kentucky mountains has broken out at Big Long Lake. Buck Adams, Bldg. 4-3, states that if Art Brandenburger, Bldg. 4-3, persists in raising hogs on his place that he (Buck) will start raising eagles to prey upon Art's young porkers.

To And From

Dear Hermite,

Greetings. How's everything on Bldg. 17-2? Everything is fine on Bldg. 17-4.

You remember little Shirley Ohneck? Well, I've heard several people calling her "Bashful Basil" lately. That seems silly to me, because Shirley's not bashful, just a little shy.

We all extend our deepest sympathy to Irene Myer.

Oh, yes. Irene Witham and Scotty were arguing about diets the other day. Irene took the affirmative and Scotty the negative. I always say—"Don't let it get you down gals—we like you the way you are.

Well, answer soon, and tell me all the dirt on Bldg. 17-2.

Girl from Upstairs.

Dear Girl from Upstairs,

That Girl from Upstairs is always twitting me about not having any news from Bldg. 17-2. Things happen so fast around here that I hardly have time to write one thing down before something else happens. So here you are.

Mary Ellen Heddon tried to cut her nose off to spite her face, but why choose a winding steel.

The way Gracie Koch led the band at our party almost gave the drummer apoplexy.

Of course I should mention how popular Joe Bahr was at the Elex Tea Dance. He danced with Dottie Forst and Sammy Bradtmiller—simultaneously. He got in free, too.

The next time Virginia Ramsa wants to learn to tango, she's going to take lessons from La Zonga instead of La Bee Graves.

I wonder how Charlie Rice likes to eat at the Cafeteria instead of the Bldg. 17-3 picnic grounds? Wait until the hunting season opens, Charlie, we can start having "pot-lucks" again if you bring the rabbits.

Now I hope you're satisfied, Girl from Upstairs.

Hermite of Bldg. 17-2.

A young farm-hand visited London to spend a holiday with a relative.

His clothing being decidedly rustic in appearance, his host suggested that he should get a suit from a city tailor, to which the young man agreed.

"What about a small deposit, sir?" asked the tailor when measurements had been taken.

"Just as you like," replied the other, "put one in if they're fashionable."

"When is the next train to Albany?"

"Twelve o'clock, sir."

"What, isn't there one before that?"

"No, sir. We never run one before the next."

Glad to hear that Maxine Pelz, Bldg. 19-4, has recovered from her appendicitis operation and is coming along fine. Hope to see you soon, Maxine.

Best wishes to Jane Fitch, Bldg. 19-5, on her marriage to Raymond Getty, Jr., at St. Peter's rectory on April 8.

A Humanitarian

Lots of people are kind to animals, but Alma Witte, Bldg. 19-5, goes beyond that point. Alma was seen the other evening covering a peach tree with a bed sheet to keep it from being injured by the frost. It was not entirely a humanitarian motive, however, for Alma states, "Well, it had three peaches on it last year."

New Members Of The Quarter Century Club

Six new members have been enrolled in the Fort Wayne Chapter of the General Electric Quarter Century Club following completion of twenty-five years of service with the Company. The new members are, top row, left to right—Frank Braun, Decatur; Ross Van Horn, Bldg. 19-3 and Milo C. Waite, Decatur. Bottom row—Hugh M. Stephenson, Bldg. 4-6; Alma Witte, Bldg. 19-5 and Christ Thiele, Distribution Division. A group of seven more employees will be eligible for membership this month.

Seventeenfore Splurges

Wonder why John Howard ran into the sill, by the office door, and why Carol Elder brings those nice red apples once in a while? Could it be the former school teacher in the office? . . . Jay Hensler has been changing the trolley for the motorman at the end of the line. Wonder what Jay will do when they get the new busses out his way? Why not change the tires for them, Jay? . . . Harold Knepp has been explaining to Frank Koziol how to save for a rainy day. Harold now keeps his automobile in the garage and rides a bicycle to work. Frank says maybe he had better drop the idea of getting a new car and get a bicycle too. . . . Ed Schneider has a pair of glasses for every occasion. Walking, riding, eating is just a few of the varieties he has. By the way, Ed has been sporting his annual sunburn. The kind that starts from your eyebrows up. Ed says he didn't have to go to Florida to get it either. . . . Charles Crankshaw has been trying to organize the boys in Bldg. 17-4 into a scout troop. He thinks learning to tie knots and build camp fires, etc. would do "Cy" Seymour no harm. . . . We extend our hopes for a quick recovery to Frank Koziol's wife who underwent a major operation recently. . . . We also extend a welcome to our new clerk in the office, Shirley Talbot. . . . Joe Quinlan has returned to work after a recent appendicitis operation. Glad to see you back Joe, and the best of luck to you. . . . Charles Haberkorn has his new set of molars. He had some difficulty of getting them to fit, but after a little filing and surface grinding, they now do him justice. . . . Wonder why Bill Wehrs is always on the losing end of those cigar bets with Cy Seymour? Could it be that Bill expects some of those strawberries that Cy is going to raise on his farm? . . . Emma Reiling has fallen in line with the smoke nuisance movement. She has suggested that a ventilator be installed in the office to take away the aroma of tobacco. . . . Our national commander, Ervin Zollinger, just can't convince the boys as to what this war is all about. Why not carry a hammer with you Erv, and if they don't agree with you, let them have it?

The circus that's coming to town Tuesday should prove to be good this year, as Byrl Miller, Bldg. 4-3, is appearing with the show as a stunt driver. He was seen practicing some of his fancy driving in Swinney Park the other evening.

Walter McCormick, Bldg. 4-3, decided to see a doctor about his cough, and was told he had the whooping cough. Mac, we thought you were grown up.

Edna Crow, Bldg. 4-3, was off work due to a sprained ankle. Better watch your step next time, Edna.

Alma Ladig, Bldg. 4-3, says she is on a diet, but after seeing her carry in the big dinner when she came to work one day last week, we wonder if she really is on a diet.

Due to conditions beyond our control, Elmer, the Field Mouse, will be unable to have an article this week.

Hermetic Motors 17-2

Birthdays come and birthdays go. We take 'em as we find 'em. But if we looked as young as Wefel, I'm sure we wouldn't mind 'em. Happy Birthday, Bob! . . . If any one finds the drive shaft for a '39 Hudson, please notify Charlie Rice at once. Although he has another one that works better than the one he lost, he was rather attached to it—even if the car wasn't. . . . A perfect example of "when the honeymoon is NOT over" is Dorothy Rinehart. Congratulations on your first anniversary, Dorothy. . . . Ernie Bailey's theme song "I Ain't Got Nobody. . . . Note to Frank Gamec. W & D's have the cutest hat to go with the dress you were modeling Friday noon. It has a deep purple ribbon on it, about the shade of your face at the time. . . . According to Ted Budecki, his pet lake is a fisherman's paradise. But when he was asked if he caught anything, he said the bass were hitting night crawlers, and all he had was artificial bait. Well, Ted, a poor excuse is better than none.

Suzy Sleuth.

Overheard at the noonday Bldg. 19-5 Hot Stove League: Danford (adding the various populations of Europe): "Now lets see, there are about 80 million in Germany and 40 million in Italy. Anybody know how many people in France?"

Thomas: "About 50 million."

Danford: "Where did you get that figure. That sounds way high to me?"

Thomas: "Well you know the old song, 'Fifty Million Frenchmen Can't Be Wrong'."

Richard "Linseed" Craighead, Bldg. 4-3, has just finished his latest novel, the title of which is "A Saga of the Desert". Taking his characters from real life, he is featuring Carl "Pudge" Clevenger as the hero, Nellie Williams as the heroine, Archie "Snap Snap" Boren as the villian, and George England as the sheriff. It promises to be a thriller, so get your copies early.

(Continued on Page 8)

News Around

(Continued from Page 7)

Motor Generator Static

"Time rushes on."

Jimmy Stouder, Bldg. 19-3, has passed another milestone on the road of life. His pals did not forget this date in current history and as a result when James returned from his noon hour euchre game he found his desk adorned with a beautiful cake covered with enough candles to light and heat one-fourth of our fair city. Jim puffed and puffed (much like the "big bad wolf of the 'The Three Little Pigs' fame") till the last flame was extinguished after which the cake was cut and passed out to his co-workers. Many more happy birthdays, Jim.

"Horses."

Betty Neeb, Bldg. 19-3, took her first horseback ride Sunday and has proven that as an equestrienne she ranks in a class with "Pappy Archbald" of "Sea Horse" fame. "Bouncing Betty" claims the "Critter" absolutely refused to cooperate — whenever she was coming down the horse was going up; but admits they did get together at the wrong time. As a result, her head, feet and all intermediate points are in a state of irritation, which make life's vocation and hours of relaxation one big "nightmare" (that was really horsey). We think perhaps that after a few days she may again look upon life as something worthwhile. Happy Landings.

"Fish."

Bill Kaiser, Bldg. 19-1, according to reliable gossips from that floor, has a terrific hankering for fish. His pals report this desire is so great, that Bill carries a can of sardines in his pocket during the closed season for fishing. Such devotion.

"Thanks, Pals."

"Old Poison Pen" was very happy Friday afternoon when a gift arrived in Works' mail. As the wrappings fell away and the cover was lifted, there, reposing upon a cushion of waste paper was a beautiful penholder embellished with the words "Poison Pen" and a skull and cross-bones. However, one of the writer's more mercenary co-workers, immediately set forth a proposition that if certain facts pertaining to his (the co-workers) latest escapade were not printed, he would refrain from mentioning this gift to the public.

These facts will remain unprinted, not because of this veiled threat but rather because that person looks much nicer with blue eyes than with black—and I fear, what his wife might do, should his latest act of absent-mindedness be recorded.

"RETURN good for evil."—That's us.

"Help Wanted—Male."

The girls of Bldg. 19-3 Service Bureau were recently discussing their desires and preferences regarding the male of the species.

Spoke Geraldine Tilbury — "I want a man who has a coupe with a rumble seat." Replied Phyllis Wright—"I want a man, period."

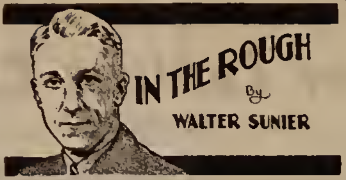
The saying of the week—

Remarks Jerry Frye, Bldg. 19-3: "Fifty percent of the married people are men."

Ray Aker, Bldg. 12-B, really commands attention when he ventures into a strange department. It seems that he and a companion on the night shift made a trip to Bldg. 17-2 one evening to secure some boxes they were in urgent need of. Ray casually pressed the button for the elevator and stood waiting for it when all at once he became the center of attention. Everybody came running up demanding where the accident was, how badly was he hurt? etc., etc. Slowly it dawned on Ray that he had pushed the emergency button by mistake! We'll bet they'd just as soon you stayed in your own department after this, Ray.

Page Mr. Ripley! Barney Zuber, Bldg. 12-B, owns a car (Packard) whose engine consumes gas faster than a filling station pump can pour it in. It seems Barney stopped recently at a gas station to have the gas tank filled. The attendant was perplexed no end at the refusal of the tank to register "full." Upon investigating, he found that Barney had forgotten to shut off the motor (which runs almost too softly to be heard). We can see where that car is going to be pretty expensive to keep up, Barney!

Prosperity is definitely around the corner. Bob McLoveland (Sandy's uncle) is negotiating the purchase of a car. Here is where the cost reduction gets a real workout!



In the beautiful spring,
Our feelings are true.
The animals start snapping.
How about you?

In the beautiful spring
The trees get new.
They get full of sap.
How about you?

In the beautiful spring,
The cows go moo.
We missed the ball.
How about you?

In the beautiful spring,
If I beat you,
Some people are tickled.
How about you?

In the beautiful spring,
You should not get blue.
There are crabs in the creek.
How about you?

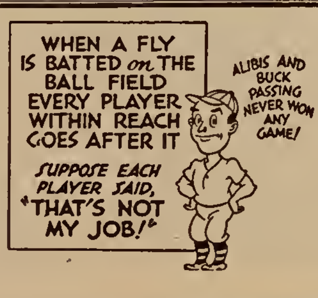
In the beautiful spring,
We gave strokes, too.
We got stung.
How about you?

In the beautiful spring,
I love you.
If I get in a bunker,
Why 'nhell don't you?

In the beautiful spring
The flowers are blue.
The bees want some honey.
How about you?

In the beautiful spring
He sinks a putt on you.
He thinks it's funny.
How about you?

In the beautiful spring,
Poetry flows like goo.
I don't like this
And neither do you.



WHEN A FLY IS BATTED on THE BALL FIELD EVERY PLAYER WITHIN REACH GOES AFTER IT
SUPPOSE EACH PLAYER SAID, "THAT'S NOT MY JOB!"
ALIBIS AND BUCK PASSING NEVER WON ANY GAME!

Apparatus Is Again First To Initiate The Duck Pins

The Apparatus Mixed Duck Pin League, Bldg. 19-2, for the thirteenth consecutive year opened the duck pin season on the G-E Club alleys. Four teams started to duck on Thursday evening, May 1. Jim Crowe, captain of the Cores, won three games from Paul Larenitis, captain of the Commutators.

Carl Dicke, captain of the Armatures won one game—but the season is in its infancy. Watch out for the finish. High score was bowled by Joe Leisure—a 134 with total pins of 391.

Elex Bowling League Election Is Held

Election of officers of the Elex Club bowling leagues, which meet on Monday and Friday evenings, and on Wednesday afternoons was completed at recent meetings. Officers of the Monday night League are Merle Kirkpatrick, president; Edna Etzler, vice-president; Helen Blake, secretary. The Friday Night League officers are Charlotte Stanford, president; Pauline Ort, Vice-President and Ruth DeHaven, secretary. Officers of the Wednesday afternoon League are Vera Millinger, president and Catherine Armstrong, secretary.

G-E Battery Radio

(Continued from Page 1)

Two antennas—one a beamascope located more effectively than heretofore and the other a supplementary antenna for window mounting—give the set added usefulness, and an optional cable may be used to recharge the set from an automobile battery by connection through the cigar-lighter outlet.

It is the battery provision, however, which is calculated to arouse the highest interest in the radio field. The power box, a self-contained non-spillable unit in a steel case, consists of a two-volt storage battery, a 90-volt vibrator, battery charger, and transformer. The battery is of a new non-spillable type developed by Willard, and its plastic case is transparent. It contains about a spoonful of free liquid, and when necessary this supply may be renewed from an ordinary faucet. Automatic charge indicators, consisting of three colored floating balls, tell at all times the state of the battery and indicates when it needs charging. The vibrator is simple and reliable, proved in automobile service, while the battery charger is a copper-oxide rectifier of a type developed by G-E for railway signal systems. The back of the receiver unsnaps easily, giving access to the battery unit and its indicators. The supplementary antenna and cigar-lighter charging cable are stored in the rear compartment.

The beamascope antenna, for regular operation, is located in the lid of the new model, where it gives maximum performance under normal conditions and does away with the "directional" receptivity so characteristic of many portables. An additional window antenna, which is standard equipment, may quickly and easily be attached to the window of a train or plane by means of rubber suction cups.

Rod-Gun Club Range Open For Second Shift

Employees working on the second shift are offered the use of the G-E Rod and Gun Club outdoor range on Thursday mornings, it is announced by A. F. Bowers, president. Oral Emrick, Bldg. 19-5, will be in charge of the range and employees interested are asked to contact him. Regular shooting on the range will continue on Sundays with organized shooting in the morning. Weekly practice sessions are scheduled for Thursday evenings.

« «It's a Joke» »

"My wife had a dream last night and thought she was married to a millionaire."

"You're lucky. My wife has dreams like that in the daytime."

"Hello, where have you been?"

"Just got back from a camping trip."

"Roughing it, eh?"

"I'll say so. Why, one day our portable dynamo failed us, and we had no hot water, heat, electric lights, ice, or radio for almost two hours."

The woman autoist posed for a snapshot in front of the fallen pillars of an ancient temple in Greece.

"Don't get the car in the picture," she said, "or my husband will think I ran into the place."

Spectator: "I can't understand anyone's missing a putt as short as that."

Golfer: "Let me remind you that the hole is only four and a quarter inches across—and there is the whole world outside it."

Boogy—"I can see good in everything."

Woogy—"Can you see good in the dark?"

A Dublin doctor sent a bill to a lady as follows: "To curing your husband till he died."

A Scotch husband was boasting about his wife.

"You know," he said, "my wife is so economical that after she changes the goldfish water we have fish soup for two days."

"You ought to feel highly honored, young man," said the big businessman to the life insurance agent. "Do you know that today I have refused to see seven insurance men?"

"I know," replied the agent. "I'm them."

A small boy at the zoo asked why the giraffe had such a long neck.

"Well, you see," said the keeper gravely, "the giraffe's head is so far removed from his body that a long neck is absolutely necessary."

Give 'em room — they're moving! Cranemen swinging their giant loads of tank frames and turbine castings . . . operators of massive presses thumping out parts for guns and motors . . . workmen lit by the flare of electric welding—moving to the quick beat of the punch press, to the rumble of the conveyor, to the whine of the whirling lathe. Things are rolling today in America's factories.

Action — that's what we're getting—from the world's best workmen and the world's best production machinery. For the American workman of today is a superman compared with his counterpart of only a few decades ago. Industry has given him as helpers mechanical strong men in the form of power tools and machines. These multiply his effective strength; they help him to produce more—better—faster.

Men and machines — they've made the American standard of living the highest in the world. Now, working together as never before, they're making the things we need to defend that American standard.

Heads up! Industry is on its way—meeting the urgent requirements of the immediate present.

Today, as for the past 60 years, General Electric scientists, engineers, and workmen are finding new ways to apply electricity to multiply the strength of the American workman's muscles—to increase his efficiency—to make America secure.

Vacation Curtailed By Defense Work

Work's Manager Buys First Defense Stamp

Works Manager M. E. Lord was accorded the opportunity of purchasing the first Defense Postal Savings Stamp. The Stamp is being sold to Mr. Lord by H. D. Kammeyer, Works cashier. The stamps may be obtained by applying at the cashier's office in Bldg. 18-2 and are sold in denominations of $0.10, $0.25, $0.50, $1.00 and $5.00. When the proper amount has been purchased they may be exchanged for United States Defense Savings Bonds.

G-E Short Wave Stations Assuming New Importance

The Company's three shortwave stations, acknowledged tops among such facilities in this country, are daily assuming a new international importance. Twenty-two out of twenty-four hours of the day international broadcasting is going on from one or more of them. Reliable sources in Europe and South America report that the signal strength of our stations WGEA and WGEO at Schenectady is equal to any and better than most other U. S. stations, and KGEI in San Francisco is the only U. S. transmitter rendering reliable service to Alaska and the Far East.

The stations' unbiased news reports rate first place among the program preferences of South American and European audiences. To meet this demand the Schenectady stations have increased their news programs 125 per cent in the past six months, broadcasting now in Spanish, French, English, Portuguese, and Greek. Tied for second place in program preference are religious and hot American

Early Opening Of Lakes Navigation Proves Big Boon

Fundamental in defense work is iron and steel production. Much of the iron ore for this work is shipped from the mines of Minnesota, Wisconsin, and Canada through the Great Lakes to the furnaces and mills of Western New York, Pennsylvania, Ohio, Michigan, and Illinois. Hard-pressed steel operators found a ray of sunshine last month when ore freighters broke

Credit Union Members Will Meet On May 26

Credit Union members are asked to attend a meeting to be held on Monday, May 26, at the G-E Club, starting at 7:30 o'clock. The purpose of the meeting will be to consider the installation of a full time treasurer.

BULLETIN

J. M. Howell, executive assistant to E. D. Spicer, manager of the Schenectady Works, today was named manager to succeed his chief, who has been advanced to the post of assistant to the vice-president in charge of manufacturing.

Announcement of the promotions was made today by W. R. Burrows, vice-president in charge of manufacturing. The appointments are effective Monday, May 19.

Administrator Speaks At Purdue Institute

I. H. Freeman, personnel administrator of the Fort Wayne Works, will be a guest speaker at the Second Annual Foreman's Institute of Indiana, to be held on Saturday, May 17 at Purdue University. Mr. Freeman's subject will be "Rating The Job."

The institute is sponsored by the Engineering Extension Department and the Division of Education and Applied Psychology of Purdue University.

One Week's Leave To Be Arranged Wherever Possible

Varied Conditions Make Uniform Policy Impossible At Present Time

An official bulletin, regarding vacation closing plans and indicating that because of National Defense work it will not be possible to adopt a uniform vacation plan this summer has been issued by Works Manager M. E. Lord. Only two departments at the Broadway plant will close for specific vacation periods. In all other departments an effort will be made to give each employee eligible for a vacation, one week's vacation, provided that the week desired suits the requirements of the department.

The official bulletin reads as follows:

Fort Wayne Works Bulletin
May 12, 1941

"It must be evident to all employees that departments engaged in defense work have the need for the greatest output at the earliest date and should be closed for vacation the shortest possible time.

"Conditions vary so greatly between departments that it will not be possible to adopt a uniform vacation schedule for all departments, nor for individuals in departments.

Honeymoon Special At Employees' Store

A four-in-one gift, designed especially for June brides and including the "three most hoped for electrical gifts," was introduced May 1, by General Electric Company, and is being stocked at the Employees store.

"Honeymoon Special" is the name of the combination offer. A General Electric automatic glass coffee maker, an automatic speed iron, and an Expan-dor toaster are attractively packed in a Wheary trousseau case, which makes the fourth element of the four-in-one gift.

"Start it-forget it" is the slogan of the glass coffee maker which makes as few as two or as many as eight cups. The automatic speed iron is light-weight and streamlined and is equipped with a pilot light. The toaster has expanding door hinges which permit toasting sandwiches and muffins.

G-E Products Vital In U. S. Shipyards

Construction of merchant and naval vessels in American shipyards on January 1 of this year reached the huge total of 4,327,177 tons, as compared with 1,732,424 tons building on the first of last year—an increase of 150 per cent. Shipbuilding, our key industry, is working at the highest peak of production in the history of the country, except for the World War I period. Although ships are great markets for

• Democracy's Coulee Dams

We Americans have a habit of taking even our biggest achievements in our stride. Maybe that's a mistake. For instance:

Two years ahead of schedule, Grand Coulee Dam has begun operations on the Columbia River in Washington. If the dictators had completed so mighty a project in so short a time, their fanfare and flourishes would have reverberated throughout the world. At a time when high pressure publicity men like Goebbels and Gayda play an important part in world affairs, we Americans can well afford to blow the trumpets for ourselves.

Here is the largest man-made structure in the world. Its power plant will bring light and power to a large section of the Pacific Northwest. Its irrigation system will bring water to 1,200,000 acres of productive land—land that will support some 300,000 persons.

What better example of the way democracy works? Out of this engineering achievement will grow the development of a vast area of America. This 20th century pioneering is what democracy means. It is the process by which free men build the future.

American imagination, American engineering, American labor—all set free by democracy—have combined to produce a great symbol of democratic efficiency.

There is no reason why we should take the physical successes of democracy for granted. Without enslaving labor, without destroying freedom, without unleashing hatreds, our American democracy is proving that it outdoes the achievements of the dictators every day in the year.

Why shouldn't we make a special point of boosting Grand Coulee, the Golden Gate Bridge, the Henry Hudson Parkway, the Skyline Drive, Radio City, and right now, the overnight industrial expansion for defense?

These are things worth bragging about. They prove that democracy can be efficient for constructive ends. They prove that democracy is modern, streamlined, businesslike, and progressive. They prove that the democratic system is far superior to any of the phoney social orders touted by the would-be masters of the world.

It's high time for each of us to do some skywriting for the Grand Coulee Dams of democracy.

Honor is like the eye, which cannot suffer the least injury without damage; it is a precious stone, the price of which is lessened by the least flaw.—*Bossuet.*

• Times Have Changed

Years ago when a replacement part was bought for a machine, so seldom did it fit that one old timer remarked, "They ought to supply a file with every part."

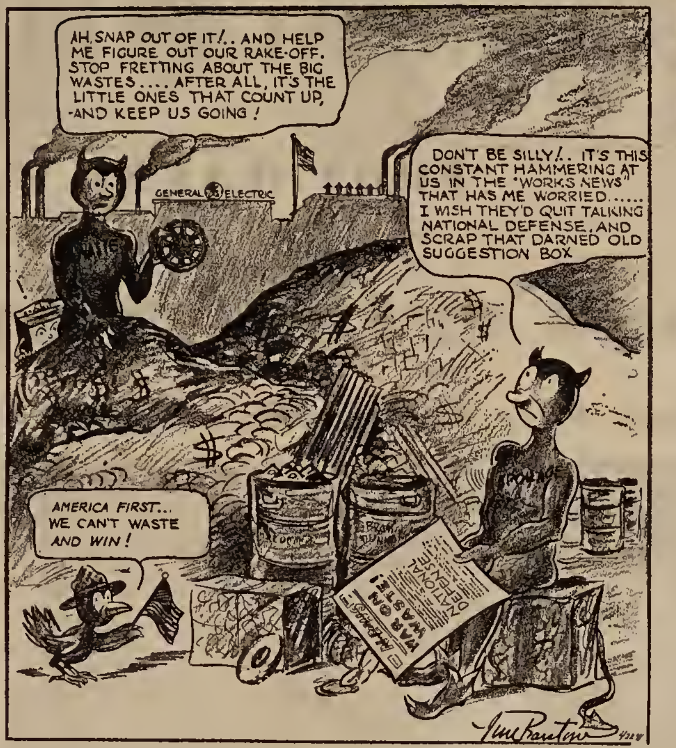
Today if an ordered part fails to snap into place on the first try the mechanic tells the foreman, who calls the purchasing department, who in turn raises "Old Ned" with the supplier.

Such is the progress of quality standards and it shows why we must constantly strive to improve the quality of our products.

He deserves praise who does not what he may, but what he ought.—*Seneca.*

Every one complains of the badness of his memory, but nobody of his judgment.—*La Rochefoucauld.*

THE IMPS OF INDUSTRY



AH, SNAP OUT OF IT!.. AND HELP ME FIGURE OUT OUR RAKE-OFF. STOP FRETTING ABOUT THE BIG WASTES.... AFTER ALL, IT'S THE LITTLE ONES THAT COUNT UP, -AND KEEP US GOING!
GENERAL ELECTRIC
DON'T BE SILLY!.. IT'S THIS CONSTANT HAMMERING AT US IN THE "WORKS NEWS" THAT HAS ME WORRIED..... I WISH THEY'D QUIT TALKING NATIONAL DEFENSE, AND SCRAP THAT DARNED OLD SUGGESTION BOX
AMERICA FIRST... WE CAN'T WASTE AND WIN!
WASTE!
NATIONAL DEFENSE

Little Girl Again Throws G-E Engineers Into Turmoil

Four thousand engineers of the largest electrical company in the world again have been stumped by a little girl.

Two years ago, a little girl from The Bronx, New York City, asked the General Electric Company for "a little sample of electricity, if you can spare it." It was the first request of its kind ever received and officials of the company promised to find a means to "spare something"—just as soon as they could figure out what it would be. They are still figuring.

Now comes a little girl from Chicago who wants "a couple or all eight diagrams of electricity." And company officials and electrical engineers once more are tearing their hair. For they say, "If we can't find a sample of electricity, how can we make a diagram of it, much less a couple or eight diagrams."

Charles E. Wilson, president of the company, has replied to the little girl's letter, explained the company's dilemma, and sent her a copy of the company's new history "Men and Volts."

SCIENCE FORUM – by L. A. Hawkins

Q. If two steel poles are set into the ground and they are connected to a source of electric current, why do worms come to the surface in the area between the poles?

A. **Applying voltage between the two poles will cause an electric current to flow through the ground between them. Worms are sensitive to this current, and they come to the surface in an attempt to get away from it.**

Q. I understand that sound travels through air at different speeds, depending on the temperature. Could you tell me what this speed is for several ordinary temperatures?

A. **At the freezing point of water, zero degrees Centigrade, sound travels 1088 feet per second; at usual room temperature, 20 degrees Centigrade, sound travels 1129 feet per second; while at 100 degrees Centigrade (the boiling point of water), sound travels through air at the speed of 1266 feet per second.**

Q. What is the lightest known metal?

A. **The lightest known pure metal is lithium, which has a density of only about half that of water. Lithium is hardly a practical metal. It is far from plentiful, and it is one of the most active metals; that is, it reacts quickly and even violently with most other chemicals. For example, it unites with nitrogen, usually a very inert element, at ordinary temperatures. Probably the lightest practical metals are alloys, of the aluminum and magnesium types.**

Q. What is an I.Q.?

A. **I.Q. is simply a ratio between mental age and chronological age. It is used as a measure of intelligence, although, of course, intelligence is a pretty hard thing to define accurately. Some psychologists simply say that intelligence is what an intelligence test measures, and let it go at that.**

Q. Is there a device that can distinguish more different colors than the human eye can?

A. **Yes. In the General Electric laboratories we have developed an electrical color-analyzing instrument, called the spectrophotometer. This instrument can distinguish between no less than 2,000,000 different colors.**

WITH THE COLORS

The following employees have entered the military service of the United States under the Selective Training and Service Act, and have been given advantage of the provisions made by the General Electric Company which include a year's leave of absence, plus a 40-day period for re-employment and one month's full pay.

JAMES CLAIR DAFFORN, Motor-Generator, selective service. Residence, Yoder.

JUNIOR JENNINGS DRAKE, Decatur Works, selective service. Residence, Decatur.

MARVIN ARTHUR DEGITZ, Motor-Generator, selective service. Residence, 908 Colerick Street.

CHARLES ARTHUR ENGLE, Specialty Transformer, selective service. Residence, R. R. 8, Fort Wayne.

ROBERT ANDREW FRENTZ, General Purpose Fr. H.P. Motor, selective service. Residence, 3108 Thompson Avenue.

HAROLD JOSEPH HOFFMAN, General Purpose Fr. H.P. Motor, selective service. Residence, 317 Esmond Street.

ARNOLD HERMAN HORSTMEYER, Specialty Transformer, selective service. Residence, 1431 Taylor Street.

FRED MERIDITH HUEBER, Series-Specialty Fr. H.P. Motor, selective service. Residence, 2102 Meridian Street.

WILLIAM ROBERT KITE, Motor-Generator, selective service. Residence, 623 East Douglas Street.

DARRELL EUGENE KLINKER, General Service, selective service. Residence, 212 W. Main Street.

FRANCIS ORLANDO LAKE, Specialty Fr. H.P. Motor, selective service. Residence, New Haven.

ALFRED JOHN NIX, General Purpose Fr. H.P. Motor, selective service. Residence, Columbia City.

HUBERT BURGESS RISSER, Motor-Generator, selective service. Residence, 802 W. Dewald.

HENRY FRANK SARWARK, Motor-Generator, selective service. Residence 1516 E. Wayne.

CARL SCOTT, Specialty Fr. H.P. Motor, selective service. Residence, 818 Lavina.

MAURICE ROBERT SCHULTZ, General Purpose Fr. H.P. Motor, selective service. Residence 3125 South Fairfield Avenue.

ARTHUR CORNELIUS SWAIN, Motor-Generator, selective service. Residence 3417 Broadway.

MERLIN CLETUS TERNET, Specialty Transformer, selective service. Residence 526 Fulton Street.

ALBERT RUSSELL WEINMANN, General Purpose Fr. H.P. Motor, selective service. Residence 807 West Creighton Avenue.

ROGER STANLEY WILLIAMS, Apprentice Department, selective service. Residence 506 West Main Street.

ROBERT JOHN WILTSHIRE, Specialty Transformer, selective service. Residence 4225 South Calhoun Street.

FRANCIS WILLIAM ZUBER, Motor-Generator, selective service. Residence 3330 South Calhoun Street.

Vital To Shipyards

(Continued from Page 1)

electric equipment, the yards themselves are often forgotten markets for a diversity of G-E products, including motors and control, welding equipment, electric furnaces, transformers, switchgear, wire and cable, locomotives, crane equipment, etc.

Spring Means Work Too

Vacation Plans

(Continued from Page 1)

"All departments will close for the week ends, generally, including the holidays — Memorial Day, Fourth of July, and Labor Day, as follows:

May 30, 31, and June 1
July 4, 5, and 6
August 30, 31, and September 1

"Only two departments will close for specific vacation periods as follows:

"TRANSFORMER DEPARTMENT, Bldg. 26-3, and manufacturing sections contributing parts to it will close for one week beginning Monday, July 7.

"HERMETIC MOTOR DEPARTMENT, Bldgs. 17-2 and 17-4, and manufacturing sections contributing parts to it will close for two weeks beginning August 18 and August 25.

"In addition, an effort will be made in other departments to give each employee eligible for a vacation, one week's vacation, provided that the week desired suits the requirements of the department.

"All individual arrangements must be made at an early date.

"Vacation pay allowance will be made for any portion of the vacation not taken.

"Detailed instructions will be issued by department superintendents."

M. E. Lord,
Works Manager.

Decatur Works

The Decatur Works has designated the week beginning August 18 for vacation period. It is proposed, however, to operate the plant that week and obtain the highest possible output. Anyone eligible for vacation should contact his foreman or department head at an early date so necessary arrangements can be made for them.

In addition, an effort will be made to give a vacation of one week to eligible employees who find it impossible to take vacations on the designated week, provided that the week desired suits the requirements of the department.

Vacation pay allowance will be made for any portion of the vacation not taken.

Winter Street

At the Winter Street Plant an effort will be made to give each employee eligible his full vacation, contingent upon future defense work and provided that it suits the requirements of the particular department.

All individual arrangements must be made at an early date.

Vacation pay allowance will be made for any portion of the vacation not taken.

Honeymoon Special

(Continued from Page 1)

The Wheary trousseau case is of airplane weight, rigid-tested construction. The covering is a rich brown DuPont Fabrikoid, with saddle leather binding. The case is 18 inches square and 8½ inches deep.

The "Honeymoon Special" will be advertised in national magazines during May and June. The schedule includes one full page and two half pages in Life and a half page insertion in Ladies' Home Journal. Advertising and promotional copy describe the combination as "the perfect present for any bride—and a gift that any wife will love on her anniversary." It is also featured as a "perfect group gift for bridal showers, weddings and anniversaries."

Five Given Advancements In Plastics

The advancement of five employees in the Plastics Department is announced by J. D. Milne, managing engineer. The men are E. L. Price, Clarence E. Meeks, B. Swift, Cecil Young and C. O. Favourite.

Top row, left to right—Cecil Young, L. Price and Clarence E. Meeks. Lower left—B. Swift and lower right—C. O. Favourite.

Mr. Price is named foreman of maintenance. He joined General Electric in March, 1906 and was assigned to the developing of mica cones and segments in the mica department. He recalls that the first mold was brought into the mica department to be developed in 1917. As the department grew, molding was separated from the mica department. This was in 1920 and Mr. Price was placed in charge of manufacturing and molding from that time until 1940. In 1940 he was placed in charge of process engineering and served in that capacity up to the time of his present appointment.

Mr. Favourite, who is placed in charge of planning, joined General Electric in 1924 as a helper in the Transformer Division. In 1927 he was assigned to molding in the Plastics Department and in 1936 was made leading operator on molding in the department. In 1937 he was named foreman of second shift molding in the department which position he held till his present appointment.

Mr. Young, who is named foreman of molding, second shift, began his services with the Company in 1929 and was assigned to Bldg. 4-2. Since that time he has served in various capacities in the Refrigeration Division, in Bldg. 26-3 and Bldg. 21-1.

Mr. Swift, who is named inspection foreman, became an employee in 1923 when he engaged in assembly work in the Wire and Insulation Division. He was transferred to inspection and test in that department in 1928 and in 1933 was assigned to the Plastics Inspection Department, where he was engaged up to the time of his present appointment.

Mr. Meeks, who assumes the foremanship of first shift molding, first joined the Company in 1916. He saw service in the World War and rejoined General Electric in 1919. After four years as an instructor in the Apprentice Training School he was, in 1923, transferred to the Transformer Developmental Department. He continued in this work until 1931 when he was transferred to Bldg. 26-5 and worked on tools and molds. In 1937 he joined the Plastics Department on mold maintenance and continued in this work up to the time of his present appointment.

Short Wave Stations

(Continued from Page 1)

dance music. Other programs include travelogues, symphonic music, book reviews, and educational programs.

WGEO was recently recognized with a George Foster Peabody award for meritorius public service as a result of the "Mail Bag" program for Byrd's men in Little America. WGEO was the only shortwave station thus honored.

Currently in the news is a "triple-play" in broadcasting technique, in which WGEO at Schenectady records speeches by President Roosevelt and other leaders broadcast during the day and then rebroadcasts them to Britain at midnight when reception conditions are at their best.

HORSEPLAY ON THE JOB IS NOT SAFE
NO FOOLING!

Recreation Program Is Offered By Y. W. For Second Shift Girls

A special, recreational and health program for G. E. girls working on the second shift as well as for girls working on the regular shift is being offered by the Y. W. C. A. Activities for girls who work on the second shift will be provided Tuesday mornings, and activities for girls working in the day time will be scheduled for Wednesday evenings.

The Y. W. will offer bicycling hiking, archery, horseback riding, tennis and other outdoor sports. The pool will be open all summer for those who want to learn to swim and dive.

The summer program begins June 1 and further information will be supplied by Irene Meyers.

NOTICE

Information has been received that considerable difficulty is being experienced in supplying the demand for model B7-41 refrigerators. Attention of employees, who wish prompt delivery, is called to model BH7 which is of the same size as model B7-41 and has many of the same features. It is exactly the same in appearance externally and sells at a lower price. For further information inquire at the Employees Store.

Opening Of Lakes

(Continued from Page 1)

through the Great Lakes ice for the earliest opening of Industrial navigation on those waters in 41 years.

Steelmen hope to move nearly 75,000,000 tons of ore through the Lakes this season, exceeding 1929's record of 65,205,000 tons. And electricity will play an important part in this transfer. Although the ore is all loaded by gravity at the western end of the Lakes, at the delivery end great electric unloaders remove it from the boats and place it in railroad cars for shipment to the mills. Then electrically operated car dumpers load coal into the empty ore carriers for shipment back to the head of the Lakes. In addition some of the bulk freighters are electrically propelled, and others are equipped with electric unloading equipment. G-E products are widely used in these operations.

AROUND THE CLOCK WITH G-E

The new 1941 ranges now available to employees through the Employees Store offer many additional advantages. For example, the switches are located on the backsplasher, up out of the reach of children's curious fingers and away from the danger of having things spilled on them. They'll last longer, too, because they are removed from the heat sources which caused moving parts to expand, thus producing abrasive wear.

And the thrift cooker on the new models . . . my, my, what an improvement! There are five cooking speeds instead of the customary three. There's an extra higher high and an extra lower low and if that isn't something, then I'm no amateur cook. And here's news for folks who like things fried in deep fat such as French fried potatoes, croquettes, oysters, scallops, fritters . . . but stop, my mouth is afloat now. Anyway, there's a six-quart kettle with no drip lid and a big wire basket to do the job up brown (no pun intended).

And the broiling department has been improved. There's 30 per cent more space and the unit is 48 per cent faster. Small quantities can be broiled successfully with a minimum amount of current.

Take a look at these new cooking marvels, folks, and be convinced yourselves.

You wouldn't think there was much you could do to a washing machine to make it look beautiful. But, take a look at the 1941 General Electric in the Employees' Store. If you don't change your mind, then I'm no guesser. On the score of good looks plus real mechanical superiority in the grim business of getting grime out of dirty clothes . . . the new washer has no equal. Massiveness is the keynote of the whole machine . . . from its appearance to its innards.

The one control wringer has steel gears with closer tolerances which give longer wear. The control operates from either side and can be pushed or pulled. The control bar is painted bright red, easy to see and remember.

The control for the activator operates like the gear shift on a car and the pump control is a fingertip device requiring no fussing at all. There's a new sediment drain channel to catch the dirt, too. The new "polymerin" finish is chip proof and gives a gleaming finish . . . All in all, the new washer is a humdinger . . . right from the start!

PARKING NOTICE

Repeated requests have been made for proper parking in the various Company parking lots. A grave offense, that of parking in the drives continues, and unless offenders stop this practice stringent measures such as towing away cars will become necessary.

F. G. Duryee,
Plant Protection Dept.

»» NEWS THROUGH THE PLANTS ««

SANDY SAYS

Sherman has a name for war.

Our Order and Production men probably have found out by now that he's right. That is, if they have been trying to get aluminum, nickel alloys, zinc, or other so-called "critical items", that are getting scarcer than talent scouts at an old maids' convention.

The last time my cousin Colin and I talked the situation over, we decided that a "Scotch Critical Item" is anything that ye canna get free.

Now that's not exactly our Company's idea of critical items but I'll bet if savings could be made in any of the "Scotch" items, they'd be welcome. What could you and I do to help? Weel, we can't all design the machines, or choose the materials to build from, but we can make suggestions, and can eliminate waste of these many precious "Critical Items."

It's natural for all of us to shy away from things that are scarce and expensive. At least it always has been among my relatives. For instance, we wouldn't think of putting in a furnace that would burn nothing but wood. Coal, oil, or gas are cheaper and more plentiful. (Unless ye have a woods at your disposal, and a wife who can swing a mean axe.)

When tungsten was discovered, it quickly took the place of the scarcer and more expensive platinum. O' course, it hasn't entirely replaced it yet. I haven't heard of a "Tungsten Blond", so I'll have to stick to the old-fashioned platinum variety.

Now, the fluorescent lamp is relieving the tungsten situation.

It all sounds good, one thing relieving another, and so on, but it would be more "Scotch", if ye could just eliminate the first critical item in the first place.

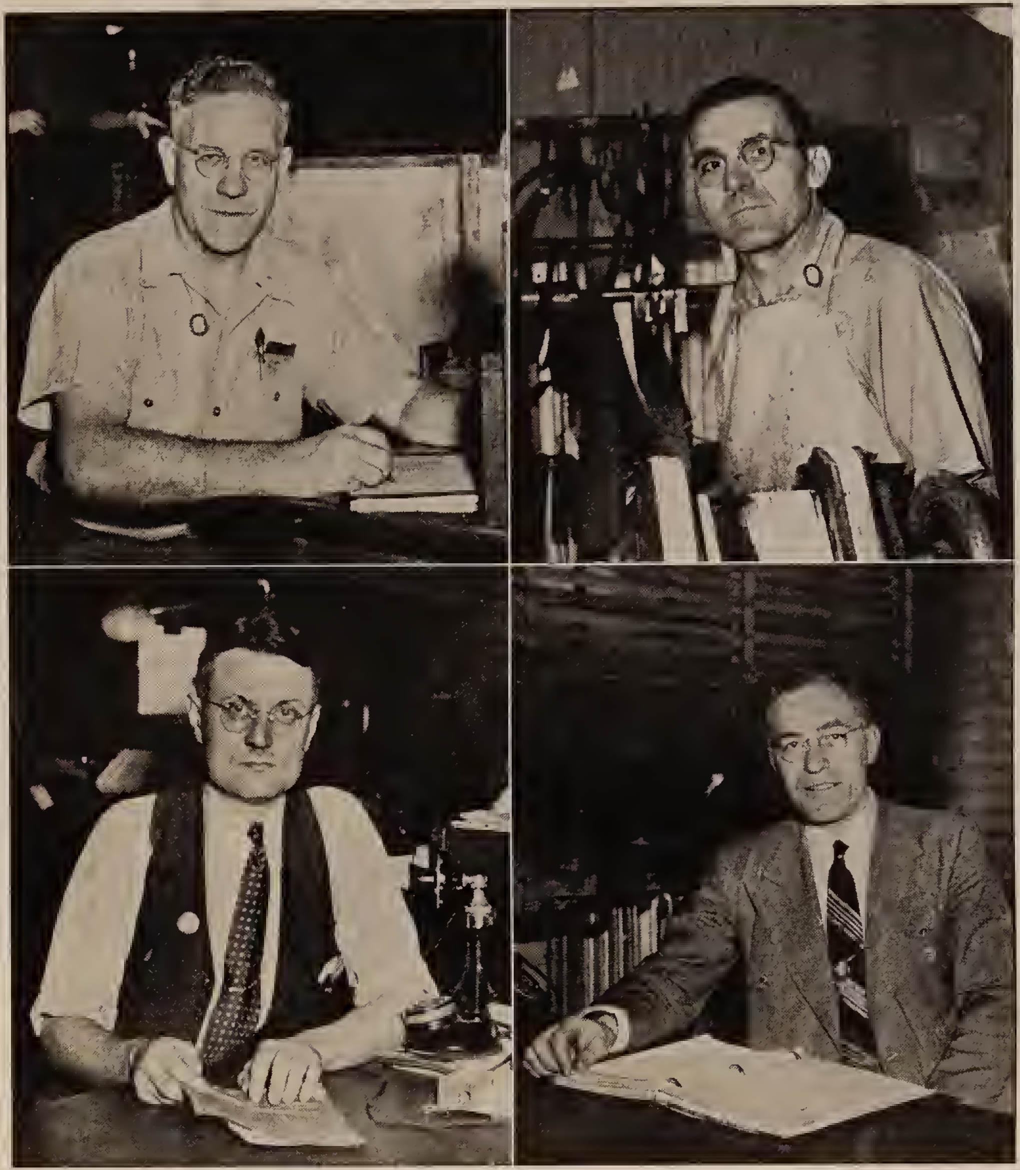
That reminds me o' my old Uncle Angus, when his well went dry. He said, "Hoot Mon, now I'll hae tae quench my thirst wi' 'Duggins Dew' ". (But he always did any way.) He said "Now I'll nae get tae take a bath." (But he never did anyway.)

Transformer News

Golda Mentzer, Bldg. 26-2, sure celebrated her 25 years service with a bang and a biff. The girls that were working with Golda had a surprise on her Friday night. Golda was going to a card party when she came down stairs—it was dark and about 24 women jumped out at her —did Golda shake? She sure was surprised. They gave her a beautiful mirror and a G-E Radio besides some other lovely gifts. The guests were, Christine Williams, Geneva McIntyre, Irene Heckber, (they worked with Golda about 10 years ago), Sally Lawrence, Helen Varmer, Gladys Freeman, Louise Metker, Stephany Hilker, Elma Berger, Velma Meads, Bertha Gruber, Loretta Bloom, Loreta Halt, Mildred Oyer, Olga Dreibelbiss, Helen Stahl, Carrie Green, Thelma Oswald and Emma Wiegman.

Ella Black, Bldg. 4-3, invited the girls around her for dinner the other day. Everything went along fine until Ella discovered that she had left her shopping bag with all the food in it at home.

New Quarter Century Club Members



Upper left—S. L. Cunningham, Winter Street. Upper right—Aloysius A. Fox, Bldg. 27. Lower left—P. Peterson, Bldg. 26, and lower right—Lisle Hodell, Bldg. 17-2.

19-4 Spot Jottings

Another tradition exploded. It is usually conceded that brides are very adept with can openers but Helen Bierbaum exploded this tradition when she prepared the first meal. She cut her hand so badly that Bill had to finish supper. It will not, however, happen again for the girls presented her with one of those new-fangled safety can openers. . . . When Ruth Bennett works days her appetite exceeds her lunch, so we suggest her mother pack a basket so that Ruth can have both breakfast and lunch. . . . Cal Langhor very reluctantly took his small daughter out to West Swinney park, but as soon as he took one ride on the new "choo choo" he was very much sold on the idea. In fact his wife was unable to drag him away, and it was only when the attendant politely but firmly said he had to put the train away for the night that Cal consented to leave. . . . Otis Uran is going into the chicken business in a big way. They are gaining a pound a week and think how big they'll be in ten weeks. Get your order in early.

Cleon Oyer sure knows his euchre. He plays his hand alone but never takes in a trick. They say that's ten times worse than an ordinary skunk.

Is Zat So?

Everyone in Bldg 17-1 seems to be enjoying this grand spring weather, but Bob Taylor says that he hopes we have another cold snap yet this spring. Then maybe the fellow who took his coat by mistake will wear it and Bob can exchange it for the reasonable exact facsimile! . . . Hoy "Pop" Bastian says that he is getting plenty of exercise helping the Mrs. clean house. "Pop" says there is one consolation in the fact that it can't go on forever! . . . Oscar Schelper must have had an overdose of spring fever or do you suppose he ate some Mexican jumping beans? At any rate he was seen hopping all over Bldg. 17-1 the other day about quitting time! . . . No, that isn't a new young fellow working in Heinie Wichern's department —that is just Jack Neuman with his new set of teeth! . . . If you want to get Henry Gollmer's goat, don't wait to see where he ties it, just call him Henry Aldrich, and that will sure do the trick! . . . Due to circumstances beyond our control (yes, I listen to the radio) this column will be discontinued indefinitely but I'll still remain—

The Question Mark.

Sympathy is extended to Glenn, Allen, and Dwight Willits, Bldg. 4-6, in the death of their father.

East End Of 17-2

We were wondering if it is spring that makes Ardis Walters leave her lunch on the street car so the nice fireman had to deliver it to her.

We hear Ralph Solt is retiring and planning to raise mushrooms on a larger scale. We certainly see nice specimens of them in Bldg. 17-2 lately.

We bet that if a window fell on Bessie Justice or Edith Brudis' nose they wouldn't laugh so much, would they Mary Siffle?

We noticed four girls on our floor with that certain gleam in their eyes. Upon investigating we found four new "Mrs.". Mrs. Dorothy Koorsen Gitter, Mrs. Vivian Yoder Steinman, Mrs. Garnet Holsworth, and Mrs. Donna Neu Benschneider. We wish you lots of happiness and good luck.

Just We Two.

FaraLee Walter, Bldg. 18-1, is in the market for a few good excuses. Last Saturday she baked an angel food cake, and while it looked beautiful, it wasn't quite up to the usual standard. Investigation revealed she had put a cup and a half of salt in it.

The explanation for that worried look on Grace Funk's face in Bldg. 12-1, is because Betty Alma is just getting over the flu.

From The
Feminine Viewpoint

By Irene Perry and Hilda Barthold

And so another year has passed. A year of groaning and moaning in agony trying to bring forth some ideas from these worn-out brains of ours. May 19th we are going to celebrate the second year of this column. We honestly feel that Walter Sunier deserves a medal for thinking up enough nonsense, philosophy and humor to fill his column each week for six long years. After the expiration of two years we are exhausted.

Many things have happened this past year. It is hard to believe the plant could have grown to the size it has. There are many new faces and all smiling and happy. We are glad to have these people with us, and hope they will remain for a long, long time.

We were very happy to hear from one of our pensioners this week. She read the column on salt and has a couple very good suggestions on the use of it. Of course, we would expect Lenora Tumbleson to know many things about the use of kitchen materials after having done all our baking for 20 years. She says "After peeling onions dampen the hands, rub well with salt, and it will take away the onion odor. When the hands become wrinkled from having them in soap suds, while they are still damp, rub them well with salt and the wrinkles will quickly disappear. Neither of these are very good suggestions if one has an open sore, as a cut, on the hand." Thanks loads, Nora.

Maybe the reason we enjoy our Elex meetings so much is because we see all the people who have left during the past year either on pension or to take up other duties in the home, as well as greeting all the new girls who have joined our ranks. Would you believe it, Elex has passed the 1450 mark?

There are several who left us during the past year who will not return. They each had their own sorrows and joys, but we are thankful for those we could share with them. We know this world is a better place for their having been with us.

Hermetic Motors 17-2

Snipe Hunting, Office Style. After a strenuous hunt, started by Red Smith, Earnie Bailey has discovered they just don't make keys for staplers . . . When we saw George Langenburg eating that all-day sucker it reminded us of the popcorn he promised to bring us guess it's just going to be a memory . . . We think Al Hartman should be told when a new group is started on Bldg. 17-2, then he won't answer—"but we have no 68 group up here, the last one is 67—" Quoted A. Hartman.

Suzy Sleuth

Jeanne Fox, Bldg. 4-5 Office, appeared to be floating on air and her face beamed with a continuous smile last Friday. She said it was the largest pay check she had ever received. Don't spend it all in one place, Jeanne.
